XULLA or ZULLA ISLANDS, a group, Indian Archipelago, 70 m E Celebes the largest are Tellaba and Mangula (which see), and Booney which is about 35 m long, and populous and well cultivated. Near its S.E. point there are a Dutch fort and a native village, where ships may procure refreshments.

XUPFANIE, a vil, Austria, Sclavonia, generalship of Peterwardein, on the Save, about 10 m from Vinkovci, with two E. Catholic churches. Pop. 2100.

Y.

[For places not found in Y look Z, F and J]

Y Holland. See IJ

YA ASUA, one of the Feejee mts., S Pacific, lat. (Tasman's Peak) 16° 50' 15" S. lon. 177° 23' 30" E. It is the most N. of the Aana group, and forms a narrow belt stretching about 10 m N to S. In the latter direction it rises into the peak of Taa-dika, which has a height of 781 ft. At the foot of this peak lies the beautiful little bay of Ya-suy-jan with a picturesque rock on its E. side resembling a ruined castle. The rock is entirely volcanic, and is the object of some superstition among the natives.

YALOSO-KIANG, a river Tibet and China. It is formed by several streams, the principal of which the Das-Taitair kama, afterwards the Taitair-Taitairkama, rises on the S W side of the Ban khara-cola Mountains, Tibet, about lat. 33° 30' N, lon. 96° E. It flows at first S E, then turns nearly due S, forms part of the W boundary of the Chinese province Szechuan, which it subsequently enters, and still flowing continually S falls into the Ku-chu-hung near the S. extremity of the province after a course of about 400 m.

YALDIN a river U. States, rises at the foot of the Blue ridge, in the W of N Carolina, flows first E N E, then S E E enters S Carolina, and takes the name of the Great Pee Dee (See Pee Dee). Near the junction of the Ulaure, the Yaldin previously 600 to 600 yards wide, enters a mountain gorge, which contracts it to about 30 yards. These narrows present one of the most remarkable natural objects in the state.

YAFEA a steppe in Turkey. See JARFA

YAGUA a vil. New Granada, dep. Cundinamarca, prov. and 20 m S. Nerve.

YACUACHE a vil. Ecuador dep. and 16 m. N E Guayaquil.

YAKUNO-SIMA or **YAKUNO-SIMA** an isl. Japan, off S end of Kiuman lat. 30° 23' N lon. 120° 30' E. It is 20 m long and 8 m broad is hilly and has a mountain called Mitake.

YAKI a vil. a gov. of L. Siberia bounded, N by the Arctic Ocean, E. by Okhotsk, S. the Chinese Empire K. W. gov. Irkutsk, and S. by the Lena lat. 43° 30' 74" S lon. 103° 163' E. greatest length, E. to W. about 1700 m. breadth 1100 m. area 1 071,274 sq. m. or about 26,618 sq. m. of that of Europe. The sea-coast, which stretches for an immense distance E. to W. is generally low lined with shoals deeply indented, and during a great part of the year completely blocked up with ice. The surface runs towards the interior and on the S. and E. frontiers is covered by the chain of the Stanovoi or Jablonoi Mountains, which send forth long branches at right angles to the coast. Between these branches, forming the great water-sheds of the gov. are extensive plains or steppes, generally of very barren description not so much from any natural infertility of soil as from the rigorous nature of the climate. In the N. these plains are extensively covered with mosses, and called *tundras* on which large numbers of reindeer are kept but towards the S. the pastures become capable of rearing and feeding cattle of which large herds are possessed by several of the wandering tribes; and several kinds of grain among others wheat and rye are sown chiefly by the Kuzanets, mostly in the neighbourhood of towns. Much of the ground thus sown is frozen to the depth of 500 ft., but the temperature begins to rise in April and the first night-frost occurs about the 15th of May. From this period summer continues without interruption till the 17th September and is both long enough and warm enough to thaw the frozen ground to the depth of 3 ft. or 4 in. and mature all the ordinary cereals which thrive amazingly, yielding near the town of Yakutsk, 15 fold on an average, and occasionally 40 fold. In the same locality the mean warmth of June, July and August is 57° 66° and 61° respectively, and the thermometer often stands at 77° in the shade. In January, on the contrary, the depth of winter the cold has been found consistently, during the first ten days, was -40° Reaumur = -50° Fahr., or 52° below the freezing-point. The large mountain-ranges of Sakhat, and the perpetual snow which covers them, send a great number of mighty rivers, which generally have a N. direction and flow in long and narrow basins nearly paral-

led to each other. The most important of these rivers is the Lena. Immediately to the W. of it is that of the Oleneck, and to the E., in succession, the Tura, Indighirka, and Kolyma. There are few lakes. The rivers teem with fish, particularly salmon, which, dried or smoked, forms one of the principal articles of food, and are also frequented by innumerable flocks of water-fowl. The forests, chiefly of pine and birch, though situated in the N. contain much good timber in the S., and are frequented by large numbers of grizzly bears, wolves, foxes and various other fur-animals. This constitutes the principal article of export. The chief imports are tea, sugar, brandy, woollen and cotton stuffs, and hardware. Towns and villages, common in the centre of the gov. and along the great road from Irkutsk through Yakutsk to Okhotsk, are inhabited chiefly by Russians and Cossacks. The great body of the inhabitants are nomadic, and consist of Yakuts, Buriats, Tenguists and Koriaks.

YAKUTSK, a m., T. Siberia, cap. above gov. on a plain surrounded by lofty heights 1 bank Lena. The streets present a singular aspect, being composed of houses of European structure standing apart, while the intervening spaces are occupied by winter yards or huts of the northern nomads, with walls of cow-dung, earthen roofs, doors covered with heavy hides, and windows of ice. The principal buildings are a large stone-cathedral another church a great stone market-place, and a wooden fort with four half-moon towers. The trade is of great importance. Cars come with Chinese and European goods brought from Irkutsk by the boats on the Lena, proceed every year over the mountains to Okhotsk, and also collect the produce of the whole line of coast on the Polar Sea between the parallels of 70° and 74° from the mouth of the Lena to the furthest point inhabited by the Tchukchis. One of the principal articles of this latter trade are the skins of the polar fox. The Yakuts and Tchukchis also dispose of the skins of the wild reindeer which they kill in summer.

Another important article is the fossil ivory obtained from the numerous antediluvian animals which are found buried in the deep alluvium of the Lena and its tributaries, and along the shores of the Arctic Ocean. Much of the trade is in the hands of the American Trade Company who have here one of their most important factories. Important fairs are held four times a year. Pop. (1849) 2900.

YALDING, a vil. and par. England on Kent, intersected by several branches of the Medway across one of which it is approached by a long narrow bridge 6 m S. W. Maidstone. It has a parish church in the decorated English style, an endowed school a castle-fair and a considerable trade in coal, corn and timber. Area of par. 5804 ac. Pop. 3672.

YALI [see YALU] a small vil. off S. E. coast, Asiatic Turkey at the entrance to the Gulf of Koe, 7 m S. Koe.

YALTA, a seaport in Russia. See IALTA.

YAMINA a m. Central Africa, state Bambarra, 1 bank Jeliba, lat. 12° 40' N lon. 6° 50' W.

YAMPAREK, a m. Bolivia, 20 m N W Chuquisaca, on the Cochimayo.

YAMPUL, a m. Russia. See JAMPUL.

YAMSK JAMSK, or **JAMSK**, a m. Siberia, at the mouth of the Tura, in the Gulf of Lena, an inlet of the Gulf of Gigitnik, lat. 59° N, lon. 154° E. It is surrounded by hills, and has a church and a good harbour, but is otherwise insignificant, consisting only of a few wooden houses. The entrance is obstructed by sandbanks and hidden rocks.

YANA a river Siberia. See IANA.

YANAON, a vil. and French colonial possession, India, on the Coromandel coast, 22 m N N E. Pondicherry. It is situated on the delta of the Godavary, and is accessible by vessels of 200 tons burden.

YANBO, a maritime in Arabia. See YANBO.

YANDBOO, a m. Burma, 1 bank Irrawaddy, 60 m W by B. Ava. Here a treaty of peace was concluded, Feb. 28 1824, by which the coast of Tanamcrin, with Aracan and its dependencies, was ceded to the British, and the king of Ava renounced all claims on Assam, Jymnah, and Minsapor.

YANG-HO, a river, China, prov. Pechelien, rises in the N W of Mongolia, flows first N E then S E and unites with some other streams in forming the Hoan-ho, which passes 10 m S W of Peking.

YANG-KUANG, a city, China, prov. Kiangsoo cap. dep., on the Imperial canal where it crosses the Yangtze-Kiang, and 50 m N E. Nankin. It has an extensive trade in all descriptions of Chinese goods, but particularly in salt, which is made on the spot.

YANGTSE-KIANG, or simply **KIANG** or **TA-KIANG** (the River, or Great River, one of the largest rivers of Asia, rises in Tibet, about lat. 33° N, lon. 95° E in the Choo-koole Mountains, not far from the sources of the Hoang-ho, and flows for about 1300 m S E, under the name of the Kuei-ho, to the S W frontiers of China, where it is joined by the Yangtze. The united stream, which may now be considered as the Yangtze proper, flows very circuitously, first N E through prov. Szechuan, past the towns Sontchen Tchong-kang and Koo-tchong; and augmented on the left by the Min-kang and Mue-tung, and on the right by the Gung-tung then S E, through prov. Houpe, past Kinshou Yeh-shu, Han-yang, Youtching and Hoang-tchou and augmented on the left by the Han-kang, skirts the N of prov. Kiangsoo, passing the towns of Kieutching. Flows N E through prov. Ngunghoi past the towns of Ngankin and Taping and finally entering prov. Kiangsoo, a little above Nankin, flows E past Fohng-Kiang, where it is crossed by the Imperial canal and falls into the ocean in lat. 32° N by an estuary about 60 m wide at Tching-mung Island which divides it into two branches. Its direct course, nearly due E, is estimated at 1850 m its indirect at 3000 m and the area of its basin at 700,000 sq m. The tide ceases to be felt at Kiang-yin about 116 m from its mouth, but it continues to be navigable for the largest vessels to Nankin, a total distance of about 325 m. Its higher course is very importantly known but it is said that no river in the world surpasses it in picturesque grandeur.

YANI, or **NYANI**, a state, W Africa, Senegambia on the S bank of the Niger, between lat. 18° and 14° N and lon. 14° and 15° W.

YANINA, a tn European Turkey. See **JASTRA**.
YAO-AN, a city, China, prov. and 95 m W N W Yun-nan. It carries on a large trade in musk, and in salt, obtained from a lake in the vicinity.

YAOORH the cap. of a native kingdom of Central Africa, about 4 m N L. from r bank Niger and 60 m N N E. Bousso lat. 9° 5' N lon. 6° 15' E. It has a high and strong wall of clay said to be between 20 m and 50 m in circuit, and is entered by eight large gates well fortified after the manner of the country. The inhabitants manufacture a very coarse and inferior sort of gunpowder, very much adulterated with, etc., grow indigo, tobacco, onions and various grains and rice of a superior quality and have horses, bullocks, sheep, and goats. A market is held in the city daily under common shade, but is insufficiently attended. — The state or kingdom lies along 1 bank Niger and is traversed in its E. part, E. to W. by the Mayarou on an affluent of the Niger. **YAR GOMAR**, or **OCAR**, an isl. N Pacific Ocean, lat. 9° 55' N lon. 138° 1' E, the westernmost large island of the Caroline Archipelago. The isl. is low, rising gradually into hills to the N and in many parts it abounds with coconut trees. The island has a pleasing aspect, many well constructed houses are scattered over it, and the natives are stout and well formed.

YAPTON, par Eng. Sussex 1699 ac. Pop. 609.
YARQU, a river Mexico. See **HUACIL**.

YAR, or **YARE**, a river England, formed in Norfolk by the union of two streams of same name, flows circuitously E and unites with the Wey river in forming a considerable expanse above Yarmouth where, with the Bure, it falls into the German Ocean. A little below Norwich it receives the Wensum, and is navigable. It forms part of the Lowestoft Navigation, which is about 80 m long, and admits vessels drawing 8 ft.

YARACUY, a navigable river Venezuela, dep. Caracas, rises in a mountainous region S W the Gulf of Truxes into which it falls at the village of the same name, 30 m N W Valencia. Length of course 60 m to 70 m.

YARBOROUGH, par Eng. Lincoln. 1183 ac. P. 245.
YARCOMBE, a v and par England, co. Devon, on the canal from Taunton to Okeham. It has a parish church, with

a square embattled tower and spire a Baptist chapel and quarries of blue lias. Area of par, 4689 ac. Pop. 790.

YARDELEY, a v and par England, co. Worcester, on the Birmingham and Worcester canal and the London and Birmingham, and the Birmingham and Derby railways, with an ancient church, two endowed schools and extensive sub-worka. Area of par, 7855 ac. Pop. 4713.

YARDLEY par Eng. Hertford 2405 ac. Pop. 630.
YARDI h Y ILASTIKOS, a v and par England co. and 8 m S E. Northampton. It has a very ancient Norman church with a square tower, an independent chapel a school, and manufacturers of pillow-lace. Area of par 8510 ac. Pop. 1210.

YARENGA a river Russia. See **LAKHENA**.
YARKAND, or **YARKIANE**, a river, which rises in Chinese Turkistan, in the N slope of the Karkorum Mountains flows first N N W to the town of Yarkand, and after a course of about 300 m, unites with the Kashgar, Khoten, and several other streams in forming the Tarim.

YARKAND, a city, in the W of Chinese Turkistan, in a fertile plain, on the river Yarkand, 140 m S E. Kashgar, lat. 38° 19' N, lon. 78° 17' 42" E. It is enclosed by an earthen rampart and entered by five gates, outside of which are some very straggling suburbs, and a stone-citadel on the S. Another and much larger citadel within the walls is now all but abandoned. Its houses are built of stone and clay and mostly of one story; its streets are intersected by canals and aqueducts. It has two large bazars, besides inferior ones many caravansaries and mosques, and 10 or 12 large Mahomedan colleges. It is said to be more extensive than Kashgar and is now the chiefemporium of the trade between the Chinese Empire and the countries beyond its W frontier. The native merchants are not permitted to pass beyond its province, either toward Tibet or independent Turkistan and strict vigilance is maintained by the Chinese to prevent Europeans from entering the territory but traders from Bokhara, Badakshan, Kokan, &c. pass the mountains to Yarkand with the produce of those countries, slaves, Kirgiz horses, and European goods. These they exchange for tea, silk, and other Chinese produce, fruits, and shawl-wool great quantities of which last are sent to the West and S. The inhabitants are chiefly Turks or Uzbeks, and Mahomedans among them are however, some Esmaks or Persians, Calmucks, Armenian Christians and about 200 Chinese traders; the Mahomedans bear the character of being peculiarly tolerant. About 7000 Chinese troops, partly Manchoes and Mongols, under two commanders, garrison Yarkand, which is the principal military post of the Chinese on the W; they are located both in the citadel and in detached encampments outside of the city; and are partially recruited from the Turgens, a race of people in the vicinity who enter the service, while youths, for a period of 14 or 15 years. The civil government is vested in a Male metan hakim-beg or sang who is always a native Uzbek. Yarkand is a great mart for horses, and horse-flesh is sold in its markets at the same price as mutton. Its fertility is very fertile, yielding wheat, rice, barley, jowary (Hedysc. sorghum) oil-plants, fine fruits, and silk in large quantity, and pasturing large herds of goats, sheep and cattle. Pop. of city probably 50,000 exclusive of troops. — *Kitter's Asien Bureau*, 6c.

YARKEILL par Eng. Hereford 1666 ac. 1 op. 517.

YARLINGTON par Eng. Somerset 1207 ac. P. 244.

YARM a market in and par England, co. and 44 m N W York, on a peninsula formed by the Tees, here crossed by an ancient stone-bridge. It has a neat townhall. By the river on the W side of the town is a handsome church, with a beautiful Norman tower and there are several Dissenting chapels, a free grammar-school in hospital, manufacturers of tobacco pipes, and some trade in agricultural and mineral produce. Area of par 1136 ac. 1 op. 1647.

YARMOUTH a township U. States, Massachusetts Cape Cod, on both sides of which it has harbours for fishing and coasting vessels, 70 m S S E Boston. It consists of several distinct villages as Yarmouth Proper, Yarmouth Port, S. Yarmouth, and W. Yarmouth and has three churches, at least six mills, and a number of vessels, employed either as coasters or in the cod and mackerel fisheries. Pop. (1850) 2695.

YARMOUTH a seaport in and par England, Hampshire, Isle of Wight, 8 m. W Newport, at the mouth of the

Yar. It consists of several neat streets, with well-built free-stone houses and has a castle and small fort built by Henry VIII., a neat church, Baptist and Wesleyan chapels, a handsome market-house, public halls, a quay, and some trade, chiefly in fine white sand, used in making flint glass and the fine sorts of British china. Area of par. 143 sq. Pop. 572.

YARMOUTH (Great), a par. and town, bar., seaport, &c. par. Eng. lat. 52° 45' N. lon. 1° 43' E. on the Norfolk railway, and on a long narrow slip of land between the Yare and the sea. It is irregularly built, consisting of four principal streets, and is connected by a drawbridge with Little Yarmouth, or South Town in Suffolk. It has a very large and ancient parish church, founded in the time of William Rufus and two other handsome churches, several Dissenting chapels, a synagogue, a free school, a spacious custom-house, borough-hall, and theatre. A Nelson monument, in the form of a beautiful column 144 ft. high; two hospitals, charity, free and other schools, building yards, and manufactures of crabs and silk goods. The quay, considered one of the finest in Britain stretches along the river upwards of 1 m. The harbour is in the Yare, and is accessible by vessels of about 200 tons. The exports are agricultural produce, malt, herrings, and other fish to the Mediterranean and West Indies. Yarmouth is the great seat of the English herring-fleets, in which about 250 vessels, and 3000 hands belonging to the port, are employed. Many hands are likewise engaged in the deep-sea fishing the produce of which is forwarded daily to London by railway. In 1851 there were registered at Yarmouth 326 sailing vessels under 50 tons burden, aggregate tonnage 9305 and 825 vessels above 50 tons, aggregate tonnage 25,805 and 13 steamers, tonnage 1290. The same year entered 2643 coasters, tonnage 198,718, and 192 steamers tonnage 28,091, and cleared 1017 tonnage 64,894 and 199 steamers, tonnage 27 67. In the colonial and foreign trade there entered 209 vessels, tonnage 24 977, and cleared 82 tonnage 5240. Yarmouth sends two members to Parliament. At a remote period, the ground on which Yarmouth stands formed part of the bed of a great estuary which extended as far as Norwich. It first became firm and habitable ground about the year 1068. The mouth of the Yare has been, within the last five centuries, diverted about 4 m. to the S. Immediately of Yarmouth and parallel to the shore is a great range of sandbanks, the shape of which varies slowly from year to year and often suddenly after great storms. Pop. (1841), 30,879. Area of par. 1510 ac. Pop. 56,880.

YARBOOMBIE, par. Eng. Devon 2047 ac. P. 472.
YARNTON, par. Eng. Oxford 1613 ac. Pop. 517.
YARPOLE, par. Eng. Hereford, 8223 ac. Pop. 645.
YARRA YARRA, a river, Australia, in India, rises in a gully between the Snowy and Southern Mountains flows first W then N then S. E. W and falls into Port-Philip, 4 m. N.W. Melbourne, up to which, by a tortuous course, it is navigable for steamboats and vessels of light draught. Its total direct course, nearly due E is about 100 m.

YARRINA, a kingdom Africa, Upper Guinea, which reaches lat. 10° N. and is bounded, N. E. by the Monima, an affluent of the Niger, E. by the Niger itself, S. E. by the desert, and S. by the kingdom of Senegal; S. by a river which flows parallel to the coast about 90 m. distant from it, and W. by Dahomey. It is traversed E. to W. by the Kong Mountains, and contains a large population, living chiefly in towns or villages, which, as a protection from the incursions of the Tallahas and people of Dahomey, are surrounded with walls and ditches, or situated on lofty precipices, in the heart of impenetrable forests. After the capital, Abbeokuta (which see) the chief towns are Katanga or Eyo, Ada Larro, Jemba, Alobo, Boko, and Itabo. In the capital are many native Christians, who have emigrated from Sierra Leone.

YARROW, a river, Scotland, rises from St. Mary's Loch, on the borders of one Fife and Schick, flows W. N. W. through the latter, and after a course of about 25 m., joins 1 bank Eddick a little above Schick.

YARROW, par. Scot. Schick 16 m. by 16 m. P. 1294.
YARU-ANGA-PO-ENG (Clear River of the West) the principal river of Tibet Proper which country it traverses in nearly its entire length W. to E. It rises about lat. 35° E., and between lat. 30° and 31° N. by several heads in the Horse, Elephant, Fumecot, and Lion Mountains, which border on the

E. the region of Kailas, with its sacred lakes, thenceforth it flows mostly E., receiving in Ulterior Tibet five considerable affluents from the N. and as many from the S., on the last of which, near its mouth in the Dmug bo, stands Chae-lo-um-bo (which see). Near this it divides into branches, including numerous islands, and over one branch is an iron-bridge of 13 arches the most remarkable public work noticed by travellers in Tibet. Farther on, the Dmug-bo is crossed by an iron suspension bridge, forming a portion of the route from Bostan to Lams, which city is on one of its tributaries, about 50 m. N. the main stream. Near the town Bangri, lon. 92° 30' E. the Dmug bo begins to trend to the S. E., and we soon afterwards lose all trace of it in Chinese maps, which are our only authorities for the S. part of its course, and indicate it no farther than the Chinese frontier. It had been supposed continuous with either the Irrawadi, or the Drabm-pootra on the whole the latter supposition is the more generally believed. In its upper portion it flows through a broad and comparatively fertile valley. The course of its banks increase in number as it proceeds E., the principal is Jiga gonggar, or Shigakonggar, about 80 m. S. E. W. Lams. (Hatter Erdkunde, v, &c.)

YARWELL, par. Eng. Northampton 1880 ac. P. 450.

YASI Kot a large vil. Asiatic Turkey, Anatolia, about 90 m. N. Angora, containing 500 houses, of which three fourths are inhabited by Mahometans, and the remainder by Greek Christians. The latter manufacture wine and opium.

YASSA, a vil. near the considerable settlement in the vicinity of YASSA, a vil. New S. Wales, sec. King and Murray, on a

river of same name, 48 m. W. S. W. Goulburn.

YASSY, the cap. of Moldavia. See JAMBY.

YATE, par. Eng. Gloucester 4043 ac. Pop. 1080.

YATELEY, par. Eng. Hants 10 936 ac. Pop. 2150.

YATESBURY, par. Eng. Wills 1667 ac. Pop. 251.

YATVOVA, a vil. Spain prov. and about 25 m. from Valencia, a bank James with a church, courthouse, prison, and primary school, manufactures of linen and woolen soap, distillery, &c. Pop. 1110.

YATTENDOWN, par. Eng. Berks 1995 ac. Pop. 263.

YATTON, par. Eng. Somerset, 5374 ac. Pop. 3061.

YATTON KEYNELL, par. Eng. Wills 1749 ac. P. 516.

YAVANI, JABANI or HIBANI, a river S. America, rises in a branch of the Andes, in the E. of Peru. Sows N., forming part of the boundary between Peru and Brazil then E. and joins a bank Amazon, about lat. 4° 30' S., and lon. 69 30 W.

YAVERLAND, par. Eng. Hants; 1834 ac. Pop. 78.

YAXHAM, par. Eng. Norfolk 1596 ac. Pop. 506.

YAXLEY, a vil. and par. Eng. Kent, co. and 13 m. N. Huntingdon. It is well built and has a handsome church, with a tower and spire, an Independent chapel, a workhouse, and school. A little E. of the village is Whitelake, a sheet of water 6 m. long and 8 m. broad, abounding in fish. Area of par. 4290 ac. Pop. 1445.

YAZOO U States, Mississippi—J. A. in on the river of same name, 40 m. N. W. Jackson, in a rich cotton-district with 500 shrimps on stagnant courthouses, and a large trade in cotton of which about 50,000 bales are annually shipped for New Orleans. Pop. (1855) about 2900.—A river formed by the junction of the Tallahassee and Tallahatchee. Sows very crookedly S. E. W. and after a course of about 160 m. joins 1 bank Mississippi about 13 m. above Vicksburg. It affords easy navigation for steamers.

YAZOV, par. Eng. Hereford 2051 ac. Pop. 322.

YBES, a tn. and river, Lower Austria. See Irs.

YBBITZ, a market tn. Austria. See Irs.

YBERA (LAGUNA) an extensive swamp, S. America, La Plata, between the Paraná and the Paraguay, and immediately S. of the state of latter name, about lat. 27° S., and lon. 57° W. It is about 100 m. long by 50 m. wide, and is for the most part covered by aquatic plants and shrubs though it also contains many lakes, and has dry and elevated patches, which are cultivated. It is supposed to derive its waters by infiltration from the Paraná, and discharges itself by four rivers of which the largest, the Miriza, joins the Uruguay.

YBERG Isarno, or Isanzo, a vil. and par. Switzerland

on. and 6 m. E. N. E. Balerna, on a mountain ridge, above an

affluent of the Rhod. It consists chiefly of scattered cottages,

but as a parish, ranks as one of the oldest in the country Pop. 1472

YBCUI, a river, Uruguay. See **IAICUI**

YCA, or **SAN GABRIEL-DE YCA**, a tn Peru, dep and 166 m S.E. Lima, r bank Yca. It is surrounded by sand hills and nearly of triangular form consists of about 20 streets and a spacious market place and has two churches, three chapels, two colleges, a normal Lencasterian and several other schools, and a considerable trade as an entrepot for the interior. It has suffered severely from earthquakes Pop. about 5000—(Martín a, v 164)

Yc, a tn in Further India, prov. Bengal on the Tamasserin coast, 88 m S.E. Moulmain, esp prov of same name, on the Yc, about 6 m. from its mouth. It is an insignificant place.—The province the smallest of the Tamasserin provinces and except a few places, devoted to rice-culture, is covered with dense forests, brushwood or jungle.—The river is much obstructed at its mouth, and not safely navigable by large vessels.

YEADON a vill and townlet in England, co. York, 6 m N.W. Leeds, on an eminence. It has a church with a square embattled tower Wesleyan and Association Methodist chapels and three large woolen factories. Pop. 4109

YEALMPTON a vill and par England co. Devon, on the Yealm here navigable and crossed by a bridge. It has a parish church, partly in the early and partly in the later English style and a ruin said to have been a palace of the Saxon kings. Area of par, 3537 ac. Pop. 1150

YEBENES, a tn Spain New Castle, prov. and 22 m S. Toledo. It has two townhouses, a palace of the comendador of St John, an endowed school, two parish churches and several hermitages flour and oil mills, tanneries, and manufactures of fine woolen stockings which are exported chiefly to Extremadura. Pop. 3169

YELUWU ECU (Green Lake), a lake, Chinese Turkestan 80 m N. E. Karia, 160 m. of Koutenun Mountains, 30 m. long N.W. to S.E., and about 10 m. broad lat. 38° 10' N. lon. 83° 50' E. It receives several streams both from the N. and from the Koutenun Mountains, but has no outlet

YELLA a tn Spain prov. and 42 m N. Murcia at the foot of a hill crowned by a ruined castle. The locality of the houses are two stories high and provided with all the requisites accommodation for an agricultural population. There are three squares, one of which has a piazza on two sides a townhouse, with prisons and granary in the basement two parish churches, an hospital, six elementary schools, a poorhouse, a Latin grammar and two elementary endowed schools, and several private schools a suppressed convent six hermitages, a promenade, and a cemetery Agriculture is the chief occupation, but there are also eight manufactories of soft and one of hard soap 80 oil mills, five branly distilleries and eight flour-mills. YEDDI a spot or Jeddah a seaport in Japan cap. and on a bay on the S. E. side of Isl. Yapon, near the mouth of a river of same name lat. 33° 40' N. lon. 139° 40' E. (p. 1) It stands on an eminence plain with a magnificent background of mountains and wooded country is built in the form of a crescent, and consists generally of houses of one story more remarkable for their vast numbers, and the large spaces they cover, than for elegance or imposing appearance. Among the public edifices, which do not seem to be numerous are the imperial residence, occupying the centre of an extensive and somewhat elevated flat, surrounded by numerous excelsed from the river, and adorned with woods and gardens and several other palaces, grouped around this principal one, and including those of the imperial princes, of the middle or senior principal wife of the emperor or secondary wives, of the great officers of state, &c. The Dutch have long had a commercial mission here and both the Americans and British have recently concluded treaties from which important results may be expected The gulf which is of a circular shape, forms a most capacious and admirable harbour with five fathoms water close to the shore, and consequently accessible by the largest ships On November 11 1850, an earthquake destroyed 100 000 dwellings, 84 temples, and 80 000 inhabitants, and fire broke out in 50 different parts of the city The population probably greatly overrated has been stated as high as 2,000,000

YELLOW RIVER, a larger river China See **HOANG HO**

YELLOW SLA (I. China, W. Kang loo) an extensive inlet of the Pacific Ocean on the Y E coast of China between lat. 33° and 41° N. lon. 117° 23' and 127° 10' P. having W. the Chinese province a Kiangsoo Shantung and Pootsie N. Leaocong, and E. the peninsula of Corea length about 620 m. greatest breadth about 400 m. N. and W. it terminates in the gulfs of Leaocong and Pootsie, into the latter of which pour numerous large and important rivers Two large peninsulas project into the Yellow Sea, one in the province of Leaocong terminating in the narrow point called the 'Regent's Sword' the other in Shantung terminating in the promontory of the same name. On the E. coast are numerous groups of islets, part of them included in the Corran Archipelago. It is very shallow and obtains its name from the muddy yellow colour of its water near the land arising from the nature of its bottom, which is often washed by *verucula variegata* g. l. The large quantity of alluvium continually brought into it by the rivers Hoang ho and Yangtse-kiang causes it gradually to decrease in depth.

YELLOWSTONE a river U States, the largest affluent of the Missouri. It issues from Lake Bollette on the E. slopes of the Rocky Mountains about lat. 43° 40' N. lon. 108° 30' W. and flowing N. E., falls into the Missouri, about lat. 43° N. lon. 104° W. where it is 800 yds. broad after a tortuous course of 1000 m. of which 700 m. or 800 m. are navigable. It flows first through a mountainous but well timbered region then through a fertile country and as it approaches the Missouri through meadowlands and low grounds

YEMBO or **YASSO**, a tn Arabia, Hijaz, on a low barren sandy tract, near the Red Sea 120 m. S.W. Mekeas of which it is the port. It occupies a large space and has a wall about 12 ft. high, pierced with loop-holes for musketry and often dilapidated houses of coral limestone, and confined dirty streets. The harbour is said to be one of the best on the coast. The inhabitants are mostly Arabs of the Johelab tribe but the other residents are merchants, descendants of Mussulman Indians, who along engage in trade. Pop. about 2000

YEMELIN a principal division of Arabia, comprises the S.W. angle of the peninsula adjacent to the Straits of Bab-el-Mandeb. The name originally signified the country on the right hand, that is to the S. just as the name Decan in India (in Sanscrit, Dandina) signifies the right-hand or southern country but the same term was also used to convey the idea of luck or good fortune and hence in the prosperous days of this country the secondary sense of its name seems to have been that most generally accepted, and Yemen was known to the Greeks and Romans as Arabia Felix, the Happy or Fortunate Arabia. Yemen in the widest sense, is bounded N. by the Red Sea, S. by the Gulf of Aden N. by Hajar and Najd, and E. by Hadramout. As the chain of mountains which runs along the W. side of the Arabian peninsula, approaches the sea-coast S., till it terminates at the Straits of

Bab-el Mandeb. Yemen necessarily comprises two regions physically distinct, namely, a Tihama or lowland between the mountains and sea-shore and an elevated mountainous tract to the eastward of the former. Our knowledge of this country is still very imperfect, and by no means adequate to furnish a comprehensive and accurate account of its physical features. The Tihama of Yemen varies in width from 10 m. to 30 m. and is a barren desert wherever it is not irrigated by streams from the mountains. These streams are perennial in the high lands but in the low country they flow only during the rains, and it sometimes happens that after a succession of three or four dry seasons, their beds become overgrown with brush wood so as to be nearly obliterated. But a few of them—and these only occasionally—reach the sea, as the Moldan, W. of Aden, the river of Zabid and one or two small streams farther N. Banks of coral along the sea-shore afford wherever they leave an opening secure anchorage within owing to the growth of coral, the line of deep water seems to be constantly receding, but the beach or water mark undergoes no change, and the opinion that the Tihama of Yemen has emerged from the sea within the historical period has no good foundation.

The mountains rise abruptly from the desert plain inclining valleys of great luxuriance. The table-land in the interior of Yemen has an estimated elevation of 4000 ft. and some of its mountain groups, as Sâder S. of Taas, is supposed to attain a height of 7000 ft. or 8000 ft. Granite is probably the basis of all the mountains but to the road from Mocha by Zabid to Sana, the rock which first occurs is porphyry fractured so regularly into columns, that the steep cliffs sometimes present the appearance of organ-pipes. trap-rucks with basalt succeed, and at Sana the common building stone is a lava. Mount Sâder, likewise, is an immense mass of trachyte and other volcanic rocks.

Yemen considered in the extent above indicated has no longer a political existence. The country has long ceased to be combined under one government. The frontier provinces have in several instances become independent and the Yemen proper of the present day or the dominion of the Imam of Sana, does not actually embrace above two thirds of the territory formerly included under the same general title. The Juhâ (mountains) or highland territory of the Imam is divided into 24 districts each under a local magistrate entitled Isha. Of these districts the most worthy of note are Sanhan, on the elevated table-land—it contains Sana the capital of Yemen and in many respects one of the most remarkable cities in the East; in Mukharrah-el Aneq, S. of Sanhan and on the road to Aden is Hama distinguished for its college in the district of Yaman, not far from the town of the same name are the ruins of Dhuofar supposed to be the Saphara of Ptolemy. Kataba, through which the Moldan flows to the southern coast, brings to mind the Catalaba of ancient writers. Taas contains the lofty and productive mountain group of Sâder, supposed to rise to the height of 7000 ft. or 8000 ft. and said by the Arabs to nourish on its slopes all the herbs of the earth. It is clothed with superb forests to the summit. On the almost inaccessible heights of its rocky sides are perched numerous villages, the inhabitants of which reach themselves by the cultivation of coffee and of Maiz. On the highest point of Sâder are the ruins of an ancient stronghold, named Hama el A'ra, or the Bride's Castle. Within the precincts of Sâder are said to be 100 sheikhs or petty chieftains who are virtually independent. In the vicinity of the same mountain the Arabs show what they believe to be the true cave of the Seven Sleepers. At the foot of Sâder on the N., is the town of Taas, well built supplied with water by an aqueduct from the mountains, and enclosed by a brick wall. Proceeding N. along the W. limit of the mountains we meet with Belad-Im Alkan, with the city of Dorabot on the summit of a mountain, and famed for a prison cut in the rock and specially dreaded by the Arabs. The district of Lâdan produces the best coffee, that of Adab-el-Ala the best tobacco. Knauma, too, is a high mountain covered to its sum with coffee-plantations. In all these mountainous districts there are numerous ancient families, dwelling in their almost inaccessible castles, and scarcely acknowledging a political superior.

The status of Yemen not dependent on the Imam of Sana, are Aden, on the sea-shore to the S., the ruler of which bears

the title of Hulan. The capital of this little state is Lahaj, about two days' journey from the peninsula and seaport bearing the name of the principality, and now a British emporium. Khanûn on the S.E. with the town of Taoufayh, is said to have been at one time peopled chiefly by Jews; Kankabab, a mountainous district W. of Sana, the Belad-el Kabûl (country of the Camel, called also Hushab or Bakl, extends over the mountains N. of Sana as far as the foot of Amanas. The petty highland states into which this tract is divided combine in defiance of their common independence, the clans, nevertheless, do not disdain service in arms under the Imam of Sana, who keeps in his pay some regiments of them. N. of this country is the independent district of Balah, which borders on Hejaz. Its capital is Sada. Three days' journey from this N.E. is Najran, a country abounding in corn, fruit, dates, and horses. The wastes extending from Najran to Hadra, midat, and comprehended under the name of Jaf, are inhabited only by Bedouin or wandering tribes, who are said to have in an eminent degree the gift of poetry or rather perhaps, of extemporaneous vortification. Between Kataba and Hadramut lies Jâfa, the chief town of which is Shahr, a seaport on the coast, W. of Makallah.

The Tihama of Yemen bordering on the Red Sea, is divided into the following districts.—Mocha extending to the Straits of Bab-el Mandeb. Adab-el Ardal (Lower Adab), to N. of the preceding. The chief place in this district is Hisea, situate in a valley at the foot of the mountains, and having Mansûf for a port. Proceeding N. we meet in succession with the districts of Zabid, Bel-el-Fatih, Hadila, which has no territory beyond the town and port and Lobas, including the islands of Khamra and Firda, which latter derives value from its vicinity to the pearl fishery. The districts of Tihama enumerated above formed part of the dominions of the Imam of Sana, previous to the subjugation of the Wahâbi by Mahomet Ali; but this subtle chief having once carried his victorious arms to the southern borders of Hjaz, easily found a pretence for advancing into Yemen, where the independent mountaineers had generally favoured the Wahâbi, and he seized, almost without opposition, all the commercial towns on the coast. His troops even occupied Taas for a time, but the obstinate hostility of the mountaineers E. of Mocha, have since kept the Turks in check. N. of Lobas, again are two maritime districts always considered as belonging to Yemen though wholly independent of Sana, namely Abu Arâh (which see) extending from the confines of Lobas to about lat. 17° 40' N. and beyond that, for about 50 m., a tract inhabited only by Bedouin, whose peculiarities of language and religious usage seem to prove their affinity to the tribes occupying Asir in the interior. The seaport of Jûda or Qasim as it is sometimes called in Abu Arâh, has a considerable trade in sunna and coffee. The N. limit of Yemen on the sea is generally assumed to be at Hâf, in 18° 34' N.

Yemen, taken collectively still bears unmistakable traces of its ancient superiority in wealth and civilisation, the natural causes of which must be sought in its great extent of elevated table land, with temperate valleys and copious springs, and in its position on the route of the caravans that conveyed the Indian merchandise from the shores of Hadramaut to Socatra. Besides its numerous towns, which are largely well built, it is characterized by the great number of castles, many of them strong and capacious, scattered over its hills and in which petty chiefs with their families and retainers, like the barons of Europe in the middle ages, live in absolute independence. Yemen is the only part of Arabia in which the traveller has nothing to fear from predatory Bedouin. In the towns are many rich merchants, while in the rural districts the peasantry are numerous and in easy circumstances. These have also a physical superiority, for while the Bedouin are ordinarily below the middle size, the peasants on Mount Shâra are said to be tall fair, and have long hair, which justify the scriptural words, 'the Sabaeans men of stature.' The dialects spoken by the mountaineers are very numerous and the language of the Tihama is quite unintelligible on the highland. Hamyaritic inscriptions have been found at Dhuofar (the Saphara of Ptolemy) 12 m. S.E. of Yem, and at Hima Ghorâb (the site of the ancient Cane) on the sea-coast, at Sana, and at Marib. Yemen has two great schools or universities, one at Zabid for Sunnites, and another at Damar for the Shâfi. The latter is the prevailing sect in Yemen.

as well as among the mountains N, the Bedowia round Mecca, and even the Sherif of Mecca himself, belonging to the heretical Zaidi. Our knowledge of this extensive country is too imperfect to justify any attempt at an estimate of its population.—(Voyageur, Description de l'Arabie, Cruttenfeld, Jour of the Gen. Sec. vol. vi.)

YEV-CHOW FOU, a N. China, prov. Chikang, at the confluence of the Hsueh-shan or Green River with the Tschang-king about 75° N. W. Hsueh-shan lat. 29° 37' 12" N. and lon. 119° 32' 47" E. It has walls fully 4 m. in circuit, and is otherwise fortified after the Chinese manner but does not seem to have much general commerce though a considerable trade is carried on in all the common necessities of life. It has also manufacturers of rough lacquered ware, which is sold much cheaper than in places nearer the sea. A little below the town are two handsome pagodas one of them called Kio-lung-ta situated on a curious conical hill. P. about 200,000

YENDU, one of the Fozuei is., S. Pacific Ocean, W. of Sandwood Bay in Vanua-Léon, lat. 18° 50' S. lon. 178° 14' 41' W. It is about 12 m. in circuit, and properly forms two islands, with a narrow channel allowing a boat to pass between them. On the S. of it is Porpoise Harbour.

YENGI HEMAS, a N. Chinese Turkistan, 85° W. N. W. Yarkand, on the route to Kashgar.

YENIMÉKE, a N. European Turkey Macedonia 64 m. E. by S. Monastir, near the site of ancient Pella the birthplace of Alexander the Great. Standing among groves of rich foliage, with white minarets, and the domes of one or two mosques rising in the midst, it looks pleasing at a distance, but has narrow streets, flanked with wooden houses, apparently occupied by peasants, goats, and buffaloes, as fully as by Turks or Greeks.—(Lea's Journal in Albania and Illyria.)

YENIKALE JERKULE or ENIKALE a N. Munda, Crimea, on the N. W. shore of the strait of same name which communicates between the Black Sea and Sea of Azov. 160 m. N. E. Berzopolis lat. 45° 28' 6" N. lon. 36° 59' 16" E. (v.) It consists of the town proper which is built along the shore, and has an magnificent appearance, and of a citadel in the form of a very irregular polygon, seated on an abrupt eminence. The chief buildings are a church, once a mosque, the governor's house, and a quarantine. The inhabitants are chiefly engaged in the fisheries which are important. There are also in the vicinity naphtha-wells which furnish a considerable export. Pop. about 1600.—The strait called also the Cimmeric Bosphorus, and the Strait of Kerch is about 15 m. long, and from 2½ m. to 8 m. broad but in some places is so shallow as to leave a channel of little more than two fathoms deep.

YENISEI, a river, Asia, formed by numerous streams from the mountain ranges bordering the Chinese and Russian empires enters Siberia, in the latter about lat. 52° N. lon. 92° 30' E. flows first circuitously and then almost directly N., and forms the long and wide estuary of the same name in the Arctic Ocean, after a course of about 2500 m. The area of its basin which bounds with that of the Lena on the E. and that of the Ob on the W. is estimated at about 1,000,000 sq. m. Its principal affluents, on the right, are the Abikan, Sile Elagui and united Baichua and Turuk, and on the left the three Tunguska, and the Tobolsk, the principal towns on its banks are Minusinsk Krasnoyarsk, Yeniseisk and Turukansk. It has sufficient depth to the last-named town for large vessels, being from 2 to 8 fathoms deep but owing to the rigour of the climate, and the nature of the countries through which it passes, its navigable capacities remain to be developed. It is well supplied with fish, furnishing the chief subsistence of the tribes dwelling on its banks and in the adjacent districts.

YENISEISK, or JENISEISK a gov. E. Siberia, between lat. 60° 20' and 78° 25' N., and lon. 77 and 112 E., and bounded N. by the Arctic Ocean, E. gov. Yakutsk and Irkutsk, S. Chinese Empire, and E. gov. Tomsk and Tobolsk; greatest length, N. to S., 1900 m.; breadth, about 800 m.; area, 757,928 sq. m. It lies almost wholly within the valley of the Yenisei, and though covered in the S. by the Altai Mountains slopes gradually N. with the course of the river to the Arctic Ocean where its N. extremity projecting considerably beyond the adjoining governments, forms the most N. point of the Asiatic continent. Besides the Yenisei and its important tributaries the Upper, Middle, and Lower Ten

gukes, the only rivers not tributaries of the Yenisei, and deserving of notice, are the Piasina and Khatanga, in the N. E. which carry their waters directly to the ocean; and the Vakh Tim, Ket and Toluina, in the W. belonging to the basin of the Ob. Of a number of lakes, the Piasina, situated in the N., is the largest. The only part properly mountainous is the S., but lofty hills appear both in the E. and W., and points between the different tributaries of the Yenisei giving to many parts of the gov. a finely diversified appearance. The climate admits of the general cultivation of cereals only in the less elevated parts of the S. Towards the N. the most valuable vegetable product is the Helian on which great numbers of reindeer are kept. Towards the centre the pastures become excellent, and maintain large herds of cattle. The rivers abound with sturgeon and various other kinds of fish, and are frequented by vast numbers of water-fowl. game also is abundant, and many of the inhabitants are hunters. The minerals of most value are iron and salt. The former is obtained from a clayey iron-ore, which is found in rich masses just below the surface, and is smelted in small self-constructed furnaces, to a very considerable extent. The latter is mostly obtained from rich brine-springs. The Russian population is composed chiefly of convicts, by whom the villages of the gov. are almost exclusively occupied. The annual increase of population by births is 1547 and by new convicts about 3500 Hence, taking the present pop. at 191,500 and assuming the same rate of increase, the population will, a century hence, amount to 956,000 of whom more than a half will consist of exiles and their posterity. The cap. of the gov. is Krasnoyarsk.

YENISEISK, or JENISEISK a N. E. Siberia, gov. of same name in an agreeable and fertile plain, 1 bank latitude 180 m. N. W. Krasnoyarsk. It was founded in 1618, is surrounded by an ad. rampart, and has four churches a monastery a gunnery a custom-house an extensive trade partition largely in furs and an annual fair which lasts more than three weeks, and attracts numerous dealers from the most distant quarters. It has extensive new fertile and well cultivated 1,8000

YENI (anc. Eponea) a N. Bardiina States div. Sey near the confluence of the Fion with the Rhene, 11 m. N. W. Chambers. It has a parish church once belonging to a Benedictine monastery, a large palace, now subdivided amongst several possessors and a convent. 100 2227

YUOMADONG mountains, Barmah. See YUOMADONG YEOU a N. and prov. Central Africa, Rumon. Therova 1 bank river a little above its mouth in Lake Tchad is of considerable size, well-walled, and mostly built of mud.—The river flows N. by E. for nearly 300 m. and falls into the W. shore of Lake Tchad. Where seen by Denham and Clapperton it was above 60 yds wide with nearly perpendicular banks a fine sandy bottom and a strong current of 3 m. or 3½ m. per hour.

YEOVIL, a market to and prov. England co. Somerset, near 1 bank Yeo, 83 m. S. S. W. Bath. It has several spacious streets, well-built freestone-houses, a fine cruciform church with a tower, Wesleyan Independent, Baptist, Quaker and Unitarian chapels grammar and national schools, a townhall several almshouses and other charities and a considerable manufactory of leather gloves, of which nearly 5000 dozen pairs are made weekly. Pop. (1841) 5965 Area of par 406½ ac. Pop. 7744

YEOVII TON par Eng. Somerset 1755 ac. P. 839 YEPES, a vil. Spain, New Castile, prov. Toledo, 84 m. S. Madrid with a townhouse, prison, two endowed elementary schools a parish church perhaps the finest in the province, not only for its beautiful architecture but the aged lines of its pictures, two monasteries, and two hospitals with churches. The ruins of Yebes are in much request. This is the site of the ancient Hippo, where the Caligulians defeated the Roman pretors C. Calpurnius and L. Quatinius, who had 5000 men slain. Pop. (agricultural) 2370

YERRESTON, par Wales, Pembroke 1274 ac. P. 158 YERES, a river, France rises in the E. of dep. Seine et-Marne near Villapagnon flows W., and joins a bank Seine at Villeneuve-St-Georges, after a course of nearly 60 m. Another river of same name rises S. of Fontenay, dep. Seine-et-Marne, and flows N. W. into the English Channel. Its course is about 30 m.

YERMA, or GEMMA, a market in Asiatic Turkey Anatolia, on an affluent of the Sakarra, 65 m. S. W. Angora. It has numerous remains of antiquity, and some mineral-springs

YERMALOFF, an Isl. Pacific. See **MORI**.
YESHILU, a river. See **MINOR**. See **JIKIL-IRMAK**.
YESU (Yasu) or **YAMAH**, an Isl. Japan, washed by the Sea of Okhotsk and the Strait of La Perouse which separates it from Hokkaido. It is by the Pacific; S the Strait of Bussan separating it from Honshu and W by the Sea of Japan. Between lat. 41° 24' and 45° 31' N. and lon. 159° 49' and 160° 7' E., estimated area 77,000 sq. m. It is of very irregular shape, consisting of a tolerably compact body and several remarkable projections. One of which forms a large peninsula in the N.E. between the Good Hope Bay on the S. and a larger bay on the N. partly occupied by the island of Kunashir while another peninsula is forced in the S. between Volcano and Strugor Bay. At the S.W. extremity of the latter peninsula, is the capital Matsmai from which the whole island is sometimes named. The interior though never explored, is understood to be very mountainous and to have many volcanic summits which rise 8000 ft. above sea level. The coast which is tolerably well known is for the most part high and rocky, indented with good harbours and peninsulas, with much black ash much volcanic scenery. The inhabitants consist of two distinct races — the N. Ainu or aborigines generally in a very miserable and barbarous condition and the S. Japanese, who have made considerable progress in civilization.

YASU (Yasu) or **YAMAH**, an Isl. Japan in the S.W. of Isl. Ise on the Bay of Matsai as formed by the cape of that name and Cape Adachi lat. 41° 30' N. lon. 139° 7' E. It is a small chiefly of wooden houses extending for a long space round the bay, is defended by a fort and has numerous temples, a theatre and various other edifices, usually painted white, commodious and well sheltered harbour, a considerable trade and well-cultivated environs. Pop. estimated at 10,000.

YASTA, a tr. Spain, Murcia, prov. and 47 m. S.W. Albacete. 1 bank. Murcia. It consists of three groups of houses separated from one another by two large mountain-torrents and contains a castle, in good preservation, a townhouse, a Latin and two elementary schools, a parish church, a chapel of ease, several hermitages and fountains. In the neighbourhood are various hamlets, in one of which are mineral waters, which are considered efficacious in gout, herpes, hysteria, &c. Agriculture is the chief occupation, but there are flour and tanning mills and manufactures of tannin and serges. P. 5626.

YAT-IEK, par. Brit. H. Kingston 6 m. by J.M. P. 1202.

YATHAN, a river Scotland. See **YATHAN**.

YATHAN (YATHAN and KIRK) a par. and two contiguous vills Scotland or Rosburgh. The vills communicating across a small stream by a good stone bridge 8 m. S.E. by S. 4 miles have large farms for sheep, cattle, horses, and wool, and the parish has been from time immemorial the headquarters of the largest body of weavers in Scotland. Pop. 1302.

YATHAN (YATHAN) a vil. par. England or Dorset near the Ivel 5 m. S.W. Salisbury. It has a large ancient church with a lofty embattled and pinnacled tower, an ancient school, limestone and building stone quarries. Area of par. 48.1 sq. Pop. 1333.

YEL, France. See **YEL**.

YEL, a tr. Persia, prov. Khorasan, cap. dist. of same name in a large sandy plain 240 m. E. Isfahan. It is about 5 m. in extent, consists of an old town, enclosed by a wall and ditch, defended by a citadel and entered by four gates, and of a much larger new town or suburb, which has risen up in a very straggled manner to meet the wants of the increasing population. Within the citadel are a palace, the principal mosque, several other public buildings, and the residences of the chief men of the district. The houses are spacious and well supplied, particularly with the staple manufactures of the town itself consisting of silk stuffs, velvets, cottons, coarse woollens, called *shamsa* and *shamsa* and *shamsa*. The position of Yel, on the edge of a desert, at the junction of the prin-

cipal caravan-routes makes it an important noncommercial entrepot for the surrounding countries. A large proportion of the inhabitants, estimated at about 50,000, are fire worshippers.

YEZDIKHAST, a tr. Persia, prov. Fars, on the S. frontiers of Irak Ajem, and a stream which shortly after leaving it, is lost in the desert, 85 m. S.E. Isfahan. It occupies an isolated rock about 600 yards long, and 50 wide, commanding the opening of a valley which enters like a deep

YEZDIKHAST — From French Description de l'Asie, in Persie.

figure into the plain. It is surrounded by a brick wall and has a singular castellated appearance, but is dirty in the extreme. It is famous for the excellence and whiteness of its bread. There is a caravansary outside the town, and much rice and cotton are raised in the vicinity. Pop. about 2000.

YEZO, Isl. Japan. See **Yezo**.

YIN-LIN-KAI, a large bay on the S. side of the island Hsienan China S.S., having good anchorage.

YI, a small Isl. of Japan, in the Strait of Cora, about 15 m. N. from the nearest point of the island Kiu-shu and 90 m. S.E. from the peninsula of Corea with the considerable island Tan-sha intervening. lat. 33° 47' N. lon. 129° 50' E.

YI (or **YI**) a small seaport in Bolivia, at the mouth of a stream of same name lat. 17° 37' S. lon. 71° 24' 45' W. It is a poor place, with about 300 inhabitants, but the roadstead is the best on the coast. The trade is chiefly in guano. One of the peaks of the Andes behind YI, is estimated by Meyan at 19,000 ft. to 20,000 ft. in height.

YI (or **YI**), one of the Philippine Isles, belonging to the Calamianes group, about 11 m. long N. to S., by 3 m. broad. It is separated on the N. from Limanjan by a narrow channel and is surrounded by numerous islets, which are connected in a S.W. direction to the N. part of prov. Palawan in the island of Palawan.

YIOPANGO, a lake Central America, state and 6 m. E. Salvador about 9 m. long E. to W., by 5 m. broad. It is very steep and rugged on the N. and E. sides, of great depth, and with all the appearance of an extinct crater. Its outlet is by a small stream called the Descargador, running through a dark and deep ravine. The water when at rest, is of an azure hue but when agitated assumes a pearly green colour and exhales a sulphurous odour. In this lake great quantities of fish, of indifferent quality but in high request at Salvador are taken, and yield a considerable profit to the adjoining proprietors, to whom by immemorial custom the exclusive right of fishing belongs.

YIST, or **YIST**, a tr. Holland prov. Friesland, 15 m. S.W. Leeuwarden with a trade in wood, bark, butter, cheese, cattle, &c. Inhabitants engaged in boat-building and farming. Pop. 1284.

YNDKPPENDENCIA, a bay Peru lat. 14° 25' S., lon. 76° 15' W. It is 15 m. long N.W. to S.E., and 2½ m. broad; is bounded W. by the islands Vieja and Santa-Rosa, and E. by the mainland, which is moderately high; and has two safe entrances with excellent anchorages, generally in 30 fathoms water.

YO-CHOU, a city China, prov. Hoonan, esp. dep., on the Yangtze-kiang where it connects with the large lake Tong-chang lat. 29° 25' N. lon. 112° 55' E. It stands in a very fertile district, abounding particularly in fruit; has a very ex-

trade, and is one of the most populous cities in the empire.

YOCALLA, a small to, Bolivia, dep. and 15 m W N W Potosí. The inhabitants, who are all Indian, cultivate potatoes and barley, and possess considerable flocks of llamas and sheep. — (Casieliano fl. 247)

YOKAITZ, a to Japan, Isl. Nippon, on Ovari Bay Pop. 4000

YOLA a to. Central Africa, exp. kingdom Adamawa or Fambala 23 m S by W Kouka, in a swampy plain, inundated during the rainy season by an inlet of the Benue or Bounou. It covers a large area about 1½ m. E. to W. by 1½ m. N. to S., and consists entirely of mud holes with the exception of the palaces and other houses of the sultan and his family. The trade is chiefly in slaves and ivory. — (Barth's Journey, 1851)

YULOMBO a to. New Grenada. dep. Cundinamarca, N N W Bogota Pop. 1000

YUMBER ISLAND one of the Bismarck, off W coast, Africa, 80 m S Bulama, and separated from the mainland by a dangerous channel 15 m wide.

YONI, a vil. W Africa, on Sherborough Island, 85 m. S.E. Sierra Leone.

YONNE, a vil. U States, America, state and 17 m N by E. New York, at the junction of the Nepperhan with the Hudson, and on the Hudson River railway. It has six churches, two academies, manufactures of hats and bedsteads, several mills, and an extensive transit trade. The Croton aqueduct passes through the vil. and many of the New York citizens have handsome seats in the vicinity. Pop. (1855), about 4000.

YONNE (also Jonnes) a river France, rises at the foot of Mount Beuvron, S.E. Chateau-Lunon, dep. Nivern. flows N N W past Clamecy, Auxerre, and Sens, and joins L. bank Seine at Montceau after a course of 190 m., of which 70 m., beginning at Auxerre, are navigable. By the canal of Nivernais it communicates with the Loire, and by that of Bourgogne with the Saône.

YONNE a dep. France bounded N by Seine-et-Marne, N.E. Aube E Côte-d'Or, S. Nivern. and W Loire, greatest length N W to S E 87 m. breadth 80 m., area, 3751 sq. m. The surface is generally intersected by low hills sometimes barren, but usually covered with fruitful vineyards. Between the hills lie beautiful and productive valleys. The most elevated land is in the S.W. forming the water-shed between the basins of the Loire and Seine. The small part belonging to the former is drained by the Veille. All the rest belongs to the latter which receives it chiefly by the navigable Yonne. The climate is temperate and the air pure and healthy, except in some W marshy spots. The minerals include iron ore and yellow ochre, building stone, lithographic-stone, pavement, and potter's clay. The manufactures are of coarse woollens, woollen covers, serge, glass &c. The trade is in corn, wine, vinegar, wood and charcoal, ship-timber, wool, cattle, iron, and ochre. It is divided into five arrondissements and 482 communes. Auxerre is the capital. Pop. (1857) 981,153

YOOMAUDUNG a mountain range, Further India, stretching nearly due N. from Cape Negrais, on lat. 15° through British Pegu and between Arakan and Ava to lat. 22° N. It is the S. continuation of a great mountain-chain, which commences in the S. of Assam, lat. 26° 30' N. and is nearly parallel to L. bank Irrawadi. Its loftiest summits situated in the N., are about 8000 ft. but it lowers rapidly towards the S.

YORE, or Ure a river England rises among the mountains between Westmoreland and Yorkshire flows S.E. through the latter co., forming part of the boundary between it and W. ridings, and at Aldborough unites with the Swale to form the Ouse

YORGAN LADIX, a to. Asiatic Turkey. See LADIX.

YORI or Yoma, a river, Roma, rises on the S. side of the Caucasus Mountains. flows S.E. and joins L. bank Araxes a little above its junction with the Kar after a course of about 700 m. The upper part of its course is through a very mountainous country, the lower through sandy wastes.

YORK, or Eboracæ, the largest co. of England, bounded N. by the Tees, separating it from co. Durham. E. the North Sea, S.E. on Lincoln, from which it is mostly separated by the Humber, S. co. Nottingham and Derby. S.W. a small projec-

tion of Cheshire and W. Lancashire and co. Westmoreland greatest length, E. to W. measured on the parallel of 54° N. 90 m. central breadth, 80 m., area, 9533 sq. m. The coast, from the mouth of the Tees to the marston and oblique of Flamborough Head, which rises 800 ft. above the sea, is bold and rocky but immediately beyond begins to descend and from Bridlington Bay to Spurn Head, has low and exposed to the constant ravages of the sea. The interior viewed generally consists of a long and wide central valley stretching S. N. E. from the N. frontiers of the county to the Humber and intersected both E. and W. by tracts of considerable elevation. On the E. side these tracts form in the N. black moorlands, rising often to a height of above 1000 ft. and sometimes above 1400 ft., and extending from 20 m. to 80 m. inland from the coast, on which their terminations are seen in the bold cliffs already referred to. In the S. part of the E. side, the heights here called Wolds become lower and instead of reaching to the coast recede so far from it as to leave a large alluvial tract known by the name of Holderness. On the W. side of the central valley the heights gradually increase, and ultimately become part of what is called the English Fensine chain. The loftiest points of which within the county are Wharfedale, near Ilkley, and Bowfield with the respective heights of 2384 ft., 2270 ft., 2861 ft. and 2011 ft. The central valley is both narrow and elevated in the N. but gradually widens out as it descends, and finally as it approaches the Humber, becomes a large and somewhat swampy flat. The Humber receives almost all the drainage of the county by the Ouse, and its tributaries are the Swale, Yore, Wharfe, Derwent, Aire, and Don. A small part of the W. is drained by the Ribbles, of the N. by the Tees and of the S. directly by the German Ocean. There are no lakes deserving of the name. The S.E. part of the county is covered with alluvial deposits. Immediately N. and W. the eroseous formation stretches in a curve, first from Flamborough Head westward and then S. through the Wolds to the Humber. The far greater part of the N. moorlands is so low, but a belt of hills, commencing a little N. of Whitby skirts the coast N. to Middlesbrough, and then takes a very circuitous direction first N.W. through Glusburgh to Northallerton, then S. past Thirsk to the valley of the Swale and finally a line so various as almost to baffles description through Easingwold, Loughborough, and Market-Wellington, where it comes into contact with the chalk. Outside and immediately N. and W. of the irregular belt of hills now described, the new red sandstone becomes largely developed, extending along the banks of the Tees then S. into the valley of the Swale and then widening out so as to cover a large part of the vale of the Ouse. The new red sandstone is succeeded by the magnesian limestone which stretches continuously through the county from N. to S. seldom, however, attaining a width of above 5 m. This limestone, in the S. of the county forms the E. edge of the great central coal field of England of which Yorkshire thus possesses a valuable portion extending N. from Sheffield to Leeds, and W. from Lonsdale to Huddersfield. The coal-field is underlain N. and W. by the millstone-grit which is succeeded throughout the W. by the mountain limestone of which all its loftiest summits are composed. The properties of the soil differ much according to locality. In the N., where many lands prevail, good arable land is almost entirely confined to a few well-shaded valleys, and the far greater part of the available surface is devoted to grass-husbandry for the rearing of stock particularly horses. The Wolds consist generally of a light friable calcareous loam well adapted for barley and turnips though perhaps more profitably employed in permanent pasture, as it is apt to deteriorate under the plough and cannot be maintained in fertility without heavy doses of manure. The central valley particularly where it widens out, contains rich tracts admirably fitted for any agricultural purpose. The alluvial tracts of Holderness and the banks of the Humber where thousands of acres have been raised by warping, are celebrated for their luxuriant crops of wheat, beans, and hay. Manufactures have made great progress, particularly in the W. and S., where some of the leading branches of national industry have long fixed their seat. Among others may be mentioned the woollens of Leeds, Bradford, Halifax, Huddersfield, and Wakefield, the flannels of Barnsley, the cast and malleable iron of Low Moor and other extensive iron-works, and the hardware, cutlery and

pleated goods of Sheffield. The following table shows the number of factories at work in 1861 with the spindles and power looms they contained, and the workers employed:—

Factories	Spindles	Power looms	Workers employed
Cotton	300	5,414,898	17,269
Woolen	926	1,566,120	11,000
Worsted	463	1,140,873	46,577
Har	0	172,372	1,662
Slit	5	182,953	6
Total	1734	8,166,946	76,414

Yorkshire is divided into three Ridings—N. E. and W. which have their common point of junction near the city of York and sends 57 members to Parliament. Its means of communication, though somewhat deficient in the N., owing to the difficult nature of the ground, are abundant in the S. where almost every important stream has been made the feeder of a canal and many engineering works of great magnitude and difficulty have been executed. The leading lines of railway are the London and North Western, the Midland, the Lancashire and Yorkshire, the Manchester and Sheffield, the Great Northern, the Stockton and Darlington, the York and North Midland and the York, Newcastle and Barwick railways. In consequence of the formation of these lines and accompanying branches the traffic of the county has greatly increased. Pop. 1,797,995.

YORK (British *Coar Effor* Latin. *Eboracum*) a city England cap. co. of same name 174 m. N. N. W. London, and 48 m. E. N. E. Manchester pleasantly situated in a wide and fertile vale at the confluence of the Foss with the Ouse which as here crossed by a splendid bridge, and at the junction of the main least and different branches of the York and N. Midland, and the York, Newcastle and Barwick railways. It consists of the city proper and of suburbs, situated chiefly across the Foss and communicating with it by several bridges. The city embracing a crescent of nearly 3 m. is inclosed by ancient walls, originally Roman, but restored by Edward I. and partly repaired in recent times is entered by four principal gates of imposing structure and is built for the most part in narrow irregular streets, often lined with houses of very antique appearance. The work of improvement however has been rapidly carried on and while many of the older parts of the city have been demolished, many handsome ranges of building have risen up, both within it and the suburbs. By far the finest quarter is near the centre, where a spacious thoroughfare, called Parliament Street is terminated at one extreme by Sampson Square, and at the other by the Pavement, in which the markets are held. Among public edifices, the great object of attraction is the Minster or Cathedral which dates from the 7th century but did not begin to assume its present form till 1171, and was not completed till 1472. It is built in the form of a cross, with a square massive tower rising from the intersection to the height of 235 ft. and two other lofty towers of graceful proportion 196 ft., flanking a gorgeous and richly decorated western front. This front is divided by pinnated buttresses into three compartments, of which that in the centre is chiefly occupied by a beautiful window and a splendid portal, forming the principal entrance. Men raved without the walls, the whole length from E. to W. is 524 ft. and the width across the transepts, N. to S. 222 ft. length from W. door to choir 264 ft. length of choir 162 ft., breadth of body and side aisles, 109 ft. The impression produced by the external building is fully sustained by the interior which consists chiefly of a lofty nave, separated from its sides by long ranges of finely clustered columns, a still loftier choir, lighted by a magnificent and beautifully painted window and a lady-chapel containing the choir, and containing some beautiful monuments. This noble ecclesiastical edifice, the largest and finest of which England can boast, recently sustained serious damage, and narrowly escaped total destruction from fire, caused in 1829

by an incendiary fanatic, and in 1840 by the negligence of a workman. The chapter-house, entered from the N. transept of the cathedral, is in the form of a richly decorated octagon, and near it is a fine old chapel, originally forming part of the old archiepiscopal palace and now appropriated to the library

YORK CATHEDRAL. West Front.—DRAWN BY J. L. WILKINS.

besides the cathedral York possesses many other churches some of which, if not eclipsed by it, might deserve special notice various dissenting chapels, and colleges, free grants near blue-coat gray-coat, and other schools. Other buildings and establishments of note are an ancient Gothic guildhall

ST. MARY'S ABBEY, YORK.—From Church's Historical Sketches of Yorkshire.

and spacious adjoining mansion-house the fine old ruins of St. Mary's abbey and near it the elegant rooms and valuable museum of the Yorkshire Philosophical Society; the shower and swimming baths in the same locality the castle, occupied as a scene-coorts and county-prison; a large modern saloon just a magnificent hall assembly-room, considered one of the finest in the kingdom, concert-room, theatre, lecture-hall, cemetery railway-station, lunatic and blind asylums, dispensary, county hospital, almshouses, and numerous other cha-

rides. The manufactures are not important, but include to some extent iron-ware, leather, combs, gloves, and confectionery very extensively. The trade though possessing unlimited means of communication partly by water but chiefly by rail is mostly local.

The origin of York is so ancient as to be almost lost in fable. Under the Romans it became the British metropolis, and, after their departure, so far retained its importance, as to become the capital of Northumbria, whose king Edwin, in 624 made it an archiepiscopal see. In the 8th century its diocesan school attracted students not only from all parts of the kingdom but from France and Germany and sent out scholars who afterwards acquired an European fame. In after-times it makes a distinguished figure in almost all the great events and events of English history. As a borough it is governed by a lord-mayor 12 aldermen and 35 councillors and sends two members to Parliament. Among its distinguished natives are the Roman emperor Constantine the Great, and Alcuin, the pupil of Bede, and later to the family of Charlemagne. Dr Porteus Bishop of London, Sir T. Herbert, the Oriental traveller Flaxman, the sculptor and William Pitt the painter Pop. 40,359.

YORK, several places U States.—1 A tn Pennsylvania, on Codorus creek at the junction of several important railways 65 m W Philadelphia. It is well built and has several churches with lofty spires a large granite courthouse resembling a Grecian temple, and considerable manufactures and trade. Pop. 1960.—2 A vil Maine N bank of York river or estuary, 40 m S S W Portland. It is regularly built; and has building yards, a commodious harbour admitting vessels of 250 tons and considerable shipping and trade. Pop. 7990.—3 A river Virginia, formed by the junction of the Pamunkey and Mattaponi, flows S E, and falls into Chesapeake Bay nearly opposite Cape Charles after a course of about 40 m. It is about 3 m wide at its mouth, and throughout is like a bay than a river.

YORK, a tn W Australia, on York on the Avon, about 60 m. E from Perth.

YORK (CAPE) Australia. See CAPE YORK.

YORK ISLAND AMATICA or AMAGATA in the S Pacific, between New Ireland and New Britain lat 4° 30' S lon 152° 22' E. It is about 10 m long S.W. to N.N.E. generally level, of beautiful appearance covered with lofty trees, generally of cocconut, and remarkably fertile. The houses of the natives standing apart and embosomed in groves add much to the beauty of the scene.

YORK ISLANDS a group of small isls N E coast Australia, in Torres Strait off Cape York lat 9° 45' S lon 148° 27' E. On the largest of the group, about 2 m long is a conspicuous flat-topped hill called Mount Adolphus.

YORK (NEW) a city U States. See NEW YORK.

YORK SOUND a very spacious bay N W coast of Australia, lat 15° S bounded by precipitous rocks from 100 ft to 200 ft in height.

YORKIE PENINSULA a peninsula, S Australia, between Spencer's Gulf and the Gulf of St. Vincent, and terminating S in Cape Spencer, lat 38° 18' S lon 136° 50' E (n). It measures about 50 m N to S with a breadth of about 20 m. It has generally low sandy shores rising inland to a moderately elevated level land tolerably well wooded.

YORKTOWN a tn U States Virginia, on bank York, about 11 m from its mouth, and 65 m. E. by S Richmond with a courthouse and a large counting house. The surrender of Lord Cornwallis took place here.

YORKVILLE a vil Canada West, on York about 2 m N Toronto, of which it may almost be considered a suburb. It has many good brick houses Episcopal Wesleyan, Primitive and New Connexion Methodist churches, several schools manufactures of fancy leather combs, cloth, earthenware repairs, hawkeries &c Pop about 1750.

YOUNGALLARRA, a par Ireland, Tipperary, 7790 ac. Pop. 1694.

YOUNGALL, a par and mnn. her seaport tn and par Ireland, on and 27 m E Cork lat 51° 57' N lon 7° 52' W (n), at the foot of a wooded hill on the W shore of

Youghall Harbour at the mouth of the Blackwater. The principal street is about 1 m long. The houses are irregularly built, and partly of respectable partly of mean and dilapidated appearance. A portion of the ancient wall remains in good preservation but the gates have all been removed except two. The chief objects of note are the now dilapidated collegiate church but once a fine specimen of the decorated English style, and still containing some ancient and interesting monuments a handsome R. Catholic and Independent Wesleyan, and Primitive Methodist chapels a manory national and other schools townhouse, assembly-rooms, court house, custom-house, fever and lying-in hospitals jail almshouse, barracks and the house of Sir Walter Raleigh, who was mayor here in 1688. The manufactures are bricks, a coarse kind of pottery crockery, and malt liquors. There are also an extensive rope-work, some potter and ale brewing and malting. The harbour is safe and commodious, but obstructed by a shallow bar. The trade is considerable, and consists chiefly of exports of agricultural produce, and imports of coal, culm timber tallow hemp, salt and colonial produce. Youghall sends one member to the House of Commons. Pop. (n) 7372. Area of par 4921 ac. Pop. 11,311.

YOUNGHEHEN Y a river U States rises in a branch of the Alleghenies, in the N of Virginia, flows circuitously N into Pennsylvania, and after a course of about 150 m, joins 1 bank Monongahela, 18 m. S.E. Pittsburgh. It is navigable for about 60 m. to the Ottoppe falls, which have a perpendicular descent of 20 ft.

YOUNG GERT AVE, par Eng Derby 12 200 ac. P 5784

YOUNG ZERAT a tn British British prov Pegu on the Irrawadi, 18 m S by W Prome.

YOUNANKA one of the Aijentan isls, lat 53° 45' N lon 170° 15' W about 15 m lon N E to S.W. with a high mountain in its centre.

YOUNG-WILLIAM, an isl group, S Florida, belonging to the Caroline Islands. See MONTROSE ISLAND and LEONARD.

YOUNGBENGA, a tn. British British prov Pegu, in the delta of the Irrawadi, on the main branch, 20 m S S E Hensada.

YOXFORD a vil and par England on Suffolk pleasantly situated 23 m N F Ipswich with a parish church and some good monuments. Area, 2734 ac. Pop. 1372.

YOXHALI a vil and par England, so named, pleasantly situated 7 m. N E. 1 mile, with a parish church Primitive Methodist and R. Catholic chapel, an endowed school and manufactures of tape. Area, 4313 ac. P 1406.

YPANE, or **IPANE** a river S America, Paraguay rises in the mountainous region in the centre of the state flows W and falls into the Paraguay about 10 m. S. Villa Real, total course, 90 m to 100 m.

YPERLE a river Belgium, rises at Zillebeke prov W Flanders flows N W W past Ypres, and joins r bank Yser at Fort Knokke.

YPERE (Flamish Yperen) a tn. Belgium prov W Flanders, in a plain on both sides of the Yperle, 28 m S.S.W. Bruges. It is regularly fortified and well built but the suburbs around made it so unhealthily that a Ypres has

THE CLOTH MILL YPRES.—From Deirgea Westwoudt at Ypres.

become proverbial for sickness. A great improvement in this respect has been effected by draining. Ypres was early one of the most important manufacturing towns of Flanders,

and in the 14th century had 204,000 inhabitants and employed 4000 looms. Its name d'Ypres is said to be the origin of our word *deeper*. Its manufacturing prosperity has long departed, but a striking monument of it remains in its cloth-hall, an immense pile erected in the 13th century, in the public square, in the form of an irregular trapezium and surrounded by a square tower or belfry with a clock and chimneys. One of its wings is now used as the *back-to-back*, and other parts are occupied by different public establishments and concert-rooms. Other buildings of note are the Gothic church of St. Martin, one of the most remarkable religious edifices in Belgium, with an altar of Carrara marble, a finely carved pulpit, a painting by Van Eyck and several interesting monuments; the church of St. Peter St. James, and St. Nicolas, all elegant and well proportioned buildings and the old castle-ward [*Châtellenie*] with a richly ornamented facade, two colleges, a school of design and architecture, boarding and numerous other schools, several hospitals, fine industry and cavalry barracks, &c. The manufactures are lace, woollen, linen and cotton goods, ribbons, hats, leather of soap, and tobacco. There are also mill works, dye works, breweries, and distilleries. Ypres in the 9th century when only a strong castle was destroyed by the Normans. It was rebuilt in 901 first walled in 1389. On different occasions dreadfully ravaged by the plague. It was made by Louis XIV. In 1688, one of the strongest fortresses of the Low Countries and in the great European wars seldom escaped a siege or bombardment. Jansen or Jansenius whose work *Augustinus*, originated the controversy in which Pascal's Provincial Letters appeared, was bishop of Ypres, and is buried in the church of St. Martin. Pop 15,762.

YPSIL 43° 11' N. U. States Michigan on the Huron and central railway 30 m. W. W. St. Detroit, with several churches, a state normal school and manufactures of woollens, iron &c. &c. Pop (1855) about 2500.

YPSIL 43° 11' N. U. States Calif. runs, on an affluent of the Sacramento about 500 m. N. San Francisco. Pop (1845) about 2500.

YRIELX Str. in France dep. Haute Vienne 1 bank 12 m. 25 m. L. Lamoignon with an ancient Gothic church formerly attached to an abbey, a lofty tower of the 11th century, and manufactures of porcelain and stone ware. Iron and thread a trade in porcelain earth skins hemp cattle and swine. Pop 3190.

YSALC 21° 10' N. Central America. See ISALC.

YSCIFILOG or Wales, Flint 5900 ac. Pop 2397.

YSEK a river rises in France, dep. Nord about 8 m. N. E. St. Omer, flows N. N. E. into the Belgian prov. W. Flanders, and at Fort Knucke receives the Yser. The united stream sweeps round N. N. E. to N. W. and at Nieuport falls into the German Ocean. A branch canal from Newport connects it with the great trunk canal of Ostend. It is navigable about 25 m.

YSELAY a seaport in Prussia. See ELAY.

YSPITYT par Wales, Denbigh 4700 ac. Pop. 502.

YSPITTYT par Wales, Cardigan 5544 ac. Pop. 719.

YSSIL river Holland. See ISSEL.—YSSILMOINE. See ISSELMOINE.—YSSILMOINE. See ISSELMOINE.—YSSILMOINE. See ISSELMOINE.

YSSILMOINE a la France dep. Haute-Loire, on a rugged hill 14 m. N. E. Le Puy. It is dull and irregularly built, but has some good houses, a handsome parish church, a communal college, manufactures of blond-lace and ribbons, silk and a trade in timber and cattle. Pop 2341.

YTTAL a seaport in Sweden the and 54 m. E. S. E. Malmö on the Baltic, near the N. extremity of the kingdom. It is well built and has a handsome market place, two churches, a town-house, barracks, manufactures of woollen and linen cloth, leather cords, soap, choultry waggons and prepared feathers, dye works, and a harbour with a considerable trade. Pop 4109.

YUEN KANG several pars. Wales—1, (Gwent), Brecon 21,344 ac. Pop. 3,708—2, (Oswestry) Shropshire, 1494 ac. Pop. 211—3, (Llangyfelach) Brecon, 19,025 ac. Pop. 711—4, (Llangyfelach) Brecon, 24,616 ac. Pop. 1090.

YUEN KANG a river Wales on Cardigan, rises 8 m. from Pwllheli, runs in an impetuous torrent first S. and then W. through a deep precipitous channel and finally through a more level country into Cardigan Bay, total course, 22 m.

YTHAN or YTHAN a river, Scotland, which rises in the district of Buchan in the N. of Aberdeen, 4 m. N. E. New Deer; flows first S. E. then S. E. past Ellon, and after a course of 30 m., widening out into a basin, which at high-water is about 500 yards wide falls into the German Ocean near Newburgh. It has a salmon and had once a pearl fishery. According to tradition the largest pearl in the Scottish crown was obtained from it.

YU KANG, a city China, prov. Hoanien, on bank of the Yu he lat. 33° 58' N. lon. 114° 30' E.

YU KANG a town China, prov. Chekiang, N. W. Ningpo on the river of that name. It is a walled town, possessing a large hill crowned with many Buddhist temples. Its suburbs which stretch along the banks of the river are larger than the town itself.

YUBA, a river California, formed by the junction of three branches, a N., Middle, and S. which rise at the foot of the Sierra Nevada in the valley of the Sacramento; flows S. W. and joins the Feather near Marysville. Many gold-diggers are located on its banks.

YUCA IAN [sometimes called MEXICA or CANCHANCY] a state, Mexican Confederation, constituting peninsula, washed E. by the Caribbean Sea. N. W. the channel of 13 miles, about 85 m. wide, separating it from the W. extremity of Cuba and N. and W. the Gulf of Mexico and bounded, S. by British Honduras and Guatemala, and S. W. Tabasco, between lat. 18° and 21° 40' N. lon. 87° 25' and 90° 30' W. length N. to S. about 250 m. mean breadth 200 m. estimated area, 29,947 sq. m. The coast is very little broken, except on the S. W. where it is indented by the extensive lagoon of Termolito and on the S. W. where the three bays of Puerto de Calamit, Bahía de Espíritu Santo, and Bahía de la Amargosa occur and has in general a very black and arid appearance, being not only destitute of any important river but presenting long tracts where not a spring of fresh-water can be found. Comparatively the only harbour of importance, is both shallow and insecure. The interior in the central parts, is occupied by a lofty ridge which has the characters of a desert, and often when the rain falls leaving the natives who inhabit it almost destitute of the means of subsistence, produces fearful mortality. As near the coast, and at some elevation above its sands, the appearance of the country greatly improves, becoming wooded with lofty forests and containing, both E. and W. many lofty and gently undulating tracts, on which maize, cotton, rice, tobacco, pepper and sugar cane are produced and cattle raised in such numbers as to furnish a considerable export of hides and salted meat to Havannah. After these the chief exports are salt, fish, dye wood, straw hats, wax, and honey, cocoa-nuts and other fruits, and a kind of hemp called *yucagura*, obtained from the fibres of the agave, and much used in making cordage, sackings and hammocks. About five-sixths of the inhabitants are of pure Indian race who speak the Yucan language, and appear to be genuine descendants of the Teuictecs. Their present civilization is very imperfect, and has greatly degenerated from what it must have been when the numerous towns and villages, now scattered in ruins over different parts of the country were built and occupied. These ruins which often display great architectural skill and exhibit in their ornaments a tolerably advanced state of art, have justly excited great antiquarian research, and give to the country a much more general interest than its geographical or political features afford. The chief towns are Merida (the capital) Campeche, and Progreso. After ceasing to be a Spanish colony in 1821 Yucatan resumed independent till 1824 when she joined the Mexican Confederation, to which she continued to adhere more or less closely till 1840, when she proclaimed herself to be an independent republic. She successfully resisted the attempts of Mexico to coerce her, but, in 1845, again joined the Confederation having secured peace on her own terms. In 1846 she declared herself independent a second time, but five or six years afterwards she resumed her place in the Mexican Confederation. Pop. 680,948.

YUEN KANG a river, China, prov. Hoanien formed by the junction of several streams, the best of which unites with it at Tehung-tseu, flows N. E. and after a course of 190 m., falls into the S. W. end of Lake Tong-shing.

YUEN SHAN a town, prov. Kiangsu, in a valley, 230 m. S. W. Ningpo. It is a small but flourishing place, advantageously situated on the highway from the black-sea

mountainous country. The Lesser Zab rises in the Lebzan valley lat. 34° 45' N. long. 45° 0' E. flows S.W. and joins the Tigris at Samarra about 45 m. below the junction of the Greater Zab, with which its course is nearly parallel.

ZABAKANO a town, Africa, lat. 11° 20' N. long. 3° 5' E. 250 m. N. by E. Albany, beautifully situated on a commanding height. It is alone and open with a market well supplied with native produce, particularly rice, native iron, and native armlets and bracelets, made in Bornou, sandals and slippers, manufactured by the townspeople, who excel in tanning and dyeing. P. about 9000. (Dunsmuir's Travels in W. Africa.)

ZABHARAGH a town, Burma, on bank Irrawaddy, 50 m. N. Amarapura. There are some ruby mines in the vicinity.

ZABLATOW a village, Galicia circle and 11 m. E. S. E. Koloszew, near a bank Frith with extensive flax-markets.

ZABLUDOW a town, Russia, gov. and 9 m. S. E. S. B. Bielzy stock with a castle belonging to Prince Radziwiłł. Pop. 1409.

ZACAPA a town, Central America, state and 70 m. N. E. Guatemala, near the Motagua. It is regularly built and has a handsome church and a convent. Pop. 3000.

ZACATEPECQUE a town, Central America, Guatemala, adjoining Guatemala Proper on the W. but separated from the sea-coast by a strip of the latter on the N. W. It has dep. Soledad, and on the N. Vera Cruz area, 1726 m. It is mountainous and has for the most part a mild and agreeable climate and a soil remarkably productive in maize and other grain fruits in great variety with almost every kind of culinary vegetables, these with poultry, hogs, &c., furnish an active trade with the capital. In the N. some cotton is grown.

ZACATECAN a town, Mexican Confederation cap. dep. of same name 290 m. N. W. Mexico, on the windings of a deep barranca or ravine, one side of which is formed by

ZADONSK, a town, Russia, gov. and 60 m. N. W. Voronezh 1 bank Don, at the confluence of the Tschowwa. It has a monastery and three annual fairs. Pop. 1600.

ZAFAR, a district, Arabia. See Dromedary.

ZAFARAN BOTA, a town, Asiatic Turkey Anatolia, 186 m. E. by N. Constantinople lat. 41° 18' N. long. 32° 53' E. It has some extensive suburbs, a tolerable market, four hand some mosques, a church, two large khans, public baths, and a trade in saffron, which is largely cultivated in the neighborhood, and has added greatly to its prosperity. Pop. (exclusive of the suburbs), 15,000.

ZAFFARANO a cape, on the N. coast of Sicily 10 m. E. Palermo, formed by a steep conical hill.

ZAFFARIN, or **ZAFFARIN**, three islands in the Mediterranean belonging to Spain, lying E. and W. in Melilla Bay, N. coast, Africa, about 1½ m. from the shore lat. 35° 11' N. long. 3° 25' 7' W. The W. island, the largest and highest, is about 1½ m. long and rises 400 ft. above sea-level.

ZAFFERABAD a town, Hindoostan, presid. Bengal dist. and 6 m. S. E. Jessore, on bank Gomty.

ZAFFRAN or **ZAFFRAN** a maritime town in Africa dom. and 240 m. E. E. Tripoli, on the Gulf of Sidra, lat. 31° 12' 10" N. long. 17° 0' E.

ZAFRA a town, Spain, Extremadura, prov. and 87 m. S. E. Badajoz, with some remains of its ancient walls, and an Arab castle in good preservation in the centre of which is the alcázar erected in 1437 and long inhabited by the dukes of Feria. The houses are generally two and three stories, and the streets spacious, straight, tolerably well paved and provided with sewers. This town is full of buildings begun in better times, and on a grand scale, but they have either remained unfinished or were gutted and destroyed by the French under Drouot, in 1811. The public buildings consist of a hospital, prison, various schools, three hospitals, three museums, a handsome Gothic collegiate church, besides the churches of the hospitals and convents, and several chapels. Near one of the gates is a little *alcázar*, and there is also a bull-ring. Agriculture is the chief source of employ ment, but there are a brandy distillery, 29 flour-mills, 13 oil presses, and 6 tanneries, in which about 8000 skins of sheep and goats and 4000 cow hides, are dressed annually but this trade is on the decline and eight other tanneries are closed. This very ancient city was the *Regula* of the Iberians, and the Julia *Rescripta* of the Romans. Pop. 5280.

ZAGAL ISLE, a town, Naples, above the Molveno, with a parish church. Valuable medicinal plants grow in the vicinity. Pop. 1100.

ZAGAROLO a town, Papal States, 20 m. E. S. E. Rome on the summit of a long and almost isolated neck of land. It consists of old houses, many of them of the 13th century, and has several churches decorated with marble columns and inscriptions and a fine palace. Pop. 8900.

ZAGUR, a village, Austria, Transylvania, co. Kokelberg, near the Kokel about 10 m. from Elisabethstadt, with a Protestant and a Greek church. Pop. 1483.

ZAGHA or **ZAGHAR** a village, Austria, Transylvania, co. Doboka, on the Oslina, an affluent of the Szamos, about 34 m. from Bistritz; within Greek and a R. Catholic church. P. 1000.

ZAGYVA a river, Hungary, formed by the junction of the Galga and Tarna, a little below Jank-Berény; flows S. E. and joins the bank Theiss near Kolozs.

ZAHARA, a town, Spain, Andalusia, prov. Cadix, on a lofty hill crowned by an old castle, with a church, courthouse, primary school, and several oil and flour mills. Pop. 1151.

ZAHNA, a town, Prussia, prov. Saxony, gov. Meissenberg circle and 6 m. E. M. E. Wittenberg. It has lofty walls, two churches, a hospital, manufacture of linen, and a trade in grain, prepared from corn. Pop. 2230.

THE CATHEDRAL AND PRINCIPAL SQUARE, ZACATECAS. — From Hotel, Voyageur Photographes de Mexico.

Mount La Bufa, with a chapel on its crest. It consists generally of dirty narrow streets, but has some fine houses in its public square, a busy market-place, and a great number of religious edifices, which rising above the other buildings, give it a very picturesque appearance at a distance. Pop. 25 000.

The city is bounded N. by dep. Coahuila, N. E. Nuevo-Leon, E. San Luis-Potosi, S. Guanajuato, W. Guadalajara, and N. W. Durango forms an irregular triangle about 200 m. long N. to S., by 160 m. wide, area, 30 507 sq. m. It belongs to the elevated Mexican plateau, is intersected by spurs of the cordillera, and is for the most part inhospitably arid though it has a valuable agricultural tract in the district of Arroyo-Culimite, and extensive pastures, on which vast herds of cattle are reared. Its chief source of wealth however, has been its mines, several of which long continued to be the most productive in the world. Pop. 256,024.

ZACATULA, a market town, confed. and dep. Mexico near the mouth of the river of same name, in the Pacific, 180 m. W. N. W. Acapulco.

ZACHAN a town, Prussia, prov. Pomerania, gov. Stettin in a meadow enclosed by the Kruschow 11 m. E. S. E. Stargard with a church, and a trade in horses and cattle. Pop. 1817.

ZACUALPAN, a village, confed. dep. and 65 m. S. E. W. Mexico. There are some silver-mines in the vicinity.

ZÄRRINGEN, a vil. Baden circle Upper Rhine, hall and 2 m. N. Freiburg, with a ruined castle, which was the cradle of the dukes of Zähringen. Pop. 797.

ZAI, a river, Russia, rises in the W of gov. Ormsburg flows N N W, and joins L. bank Kama near the junction of gov. Ormsburg, Votka, and Kama, after a course of 120 m.

ZAIRIE, a river, S.W. Africa. See Congo

ZAIKAI (LAKU) (Chinese, *Kong-ko-to*), a lake Chinese Turkestan, Gansu, lat. 47° 50' N., and between lon. 88° 15' and 84° 40' E. near the S. E. frontier of the Russian government Tomak length, E. to W. 65 m., breadth, 18 m. to 20 m. It receives numerous rivers, including the Irtysh, which enters at its E. extremity, and quits it on the S. side, near its centre.

ZAIENHAUSCH a market in Baden, circle Middle Rhine, hall Bretten. It has a church, and a mineral-spring Pop. 1008.

ZÄKLUCZYN a vil. Austria, Galicia, circle and 16 m. S.E. Bochna, on the Dunajec. On the opposite side of the river, on a rocky height, are the extensive ruins of the castle of Mistrzy.

ZAKOPANA, a vil. Austria, Galicia, in the valley of the Bialka, about 7 m. S.E. Neumark, on the frontiers of Hungary. It has iron-mines, which are extensively worked, and supply several blast-furnaces and other iron-works.

ZALAMBA, a tu. Spain, Extremadura, prov. and 65 m. S.E. Badajoz. It has a townhouse, prison, two primary schools, an hospital, two monasteries and a nunnery, all closed, a parish church with a tower, which is the most remarkable object in the place having belonged originally to a monument erected in A.D. 1193, in honour of the emperor

Franco, a sumptuous royal chapel, two hermitages, and an ancient castle, in the highest part of the town, manufactures of linen, baking-establishments, numerous flour-mills three oil-presses, and two brandy distilleries. An ancient mine of argentiferous lead is in operation; iron is also found in abundance, and heaps of socors, near old mines are frequently met with. This place supplies the neighbouring towns with bread for and shoes. The place was anciently called *Salpe*, and was a Roman municipium. It existed at the time of the first

Punic war. It was taken from the Moors by Pedro Yañez, sixth grand-master of Alcantara. Pop. 3508.

ZALAMBA LA REA, a tu. Spain, Andalucia, prov. Huelva, 36 m. N.W. Sevilla. It has irregular and unpaved streets, a townhouse, three fountains, two elementary schools, an almost ruinous granary, a poorhouse without revenues, and parish church and in the neighbourhood are millstone quarries, manufactures of leather, wax, common linen fabrics, beauty and soap. Pop. 3944.

ZALATINA, or **ZALAKA**, a tu. Austria, Transylvania, co. Ober Wolesenburg beautifully situated on the Ampoly, at the junction of the Morfar 48 m. S.S.W. Klausenburg. It consists of a small town and of extensive suburbs, has a Greek, a R. Catholic, and an Oriental church a smelting and refining establishment, and valuable masses of gold and silver. P. 5000.

ZALDIVIA a tu. Spain, Massey, prov. Guisnesco, on the side of Mount Aralar, about 15 m. from Tolosa, with a parish church, courthouse, and primary school, and a trade in corn and cattle. Pop. 1102.

ZALENI LOKOTA, a vil. Bohemia. See HUTTEBOREK.

ZALEZYOYKI a tu. Austria, Galicia, esp. circle Lortkow, L. bank Dniester, here crossed by a bridge of boats, 110 m. S.E. Lemberg. It is very poorly built and has a large market-place, a Protestant and a R. Catholic church, a courthouse, Russian monastery, high school, and an active trade. Pop. 5500, chiefly Jews.

ZALT BOONER, a tu. Holland, prov. Gelderland, 80 m. S.W. Arnhem, L. bank Waal. It is built in broad streets, and the houses being supplied with gardens, the place has a very pleasant appearance. It has a townhouse, barracks, two churches, a synagogue, several schools and hospitals an active trade in agricultural produce, a soap-work, four tanneries, some silk-weaving, manufactures of nails and iron, and of tobacco and cigar boxes. Pop. (1851), 3029.

ZAMBALSA, a prov. Philippines, on the W. of Luzon, forming a long and narrow belt, stretching about 90 m. between the Bay of Lingayen on the N. and that of Subic on the S., and bounded on the E. by provs. Pangasinan and Pampanga, from the latter of which it is separated by the mountain-chain of Mariveles. It is not fertile, and cultivation

is almost confined to a few places on the coast. The capital is Iba. Pop. 37,055.

ZAMBESI, two rivers of E. Africa. The one is formed by the junction of the Ararage and the Little Ararage, about lat. 12° 50' S. lon. 32° E., whence the stream flows in a scurvy course, first S.W. then E. and passes Lake and Sena, and under the name of Omo, falls into the Indian Ocean near Quilima, lat. 18° S., lon. 37° E. It is partially navigable to its lower course. The other Zambesi rises about lat. 11° 15' S. lon. 32° 15' E. It flows W. by S. turns N. E., receives the Lavret and several other affluents, and appears ultimately to fall into Lake Nyasa. The head waters of the two rivers Zambesi appear to be separated by a range of hills.

ZAMBOUR, a tu. Croatia. See NEAMBOUR.

ZAMOLLY a vil. Hungary Thither Danube, co. and 7 m. from Stuhlweissenburg with two churches an ancient ruin, with a round chapel a remarkable intermining spring, and a trade in wheat, wine, cattle and lumber. Pop. 3067.

ZAMORA a prov. Spain Leon bounded R. by Salamanca and W. by Leon L. by Valladolid S. by Zamora, and W. by Leon and Portugal, area, 2600 sq. m. It is favoured in general with a temperate and very healthy climate. With the exception of several effects from the nerves of Segurara and Calera in the N.W. this prov. is on the whole middle level, and next to the Duero the largest river which waters it, is the Tago, which descends from the mountains of Leon, and is mounted by the Coa, Orbigo, Tera and other tributaries. The banks of the Duero are pleasant and fertile. Corn, vegetables, wine, and fruits abound in the plains, game on the hills, and fish in the streams and there are mines of iron, antimony, and argentiferous lead but only those of the last two are in operation. Regular trade is much injured by smuggling from Portugal and manufacturing industry is in a very backward state. There are, indeed, some ironworks, as well as manufactures of hats, blankets, common cloths and linens, but they are all of inferior quality. This province holds a bad eminence in criminal statistics and education is in a very unsatisfactory state. Pop. 199,000.

ZAMORA a city Spain, Leon, esp. above prov. 140 m. N.W. Madrid r. bank Duero. It is surrounded by an irregular wall of no great thickness, some portions of which are very ancient and has a citadel, which is commanded from different points. The town, which is entered by seven gates, has one large and numerous small squares, a cathedral, a Gothic structure, but partially modernized in the Corinthian and Doric styles a spacious and substantial hospital, which can accommodate 200 patients a theological school, navy and infantry barracks, and prison. There are besides 20 parish churches, with a number of chapels of ease and hermitages, the episcopal palace, a normal school various public and private schools for primary education an institute for the higher branches, with 12 professorships a library of 7000 vols. and museum containing 114 pictures, collected from the various convents in the province, an hospital for women and several promiscuous. It has manufactures of linen, Quina, and lace but little, dye-works, and several mills and a considerable trade in wine and grain, and also some traffic in coarse cloths serges and linens of the country. In early history, Zamora was an important frontier town against Moorish invasions. It was recovered from the infidel in 748 by Almanzor. In July 999, it was besieged by Abd-el-Rahman, when a desperate battle was fought for its relief by Ramiro II. and the Moors were defeated. Zamora was then enclosed by seven lines of walls and the space between were defended by moats. 40,000 Moors are said to have been killed in these trenches. But in 965 it was taken and destroyed by the great Al Mansur. It was rebuilt by Ferdinand I. Zamora was the most proverbial strong city, which resisted even the 166 foot castle with the monarchy's deceptible. Yet the natural position remained most important and in vain did Sir John Moore urge the joints of Salamanca to repair the defences, and receive there his stores. Had Zamora been put into a state of defence, he would have fallen back on it instead of Coruna, and thus Portugal would have been spared the ravages of Bonit. Soon after Moore's manoeuvre it was taken by the French and sacked and has never since recovered. P. 8777.

ZAMORA—1 A tu. Mexican Confederation, dep. Michoacan, on the Rio-Grande, 75 m. W. W. Valladolid. It is well

built, and has numerous orchards and gardens, a parish church, and two convents.—2 A. in Ender on the l. bank, and near the source of the Zamora river, an affluent of the Amazon, 15 m. N.E. Loxa.

ZAMOSŁ, or Zamost, a tn. Russian Poland, volved and 4 m. N.E. Lublin, and 140 m. N.E. Warsaw. It is one of the strongest fortresses in Poland, resembles an Italian town, most of the houses being lined with arcades, and has a large and elegant castle, four churches a handsome townhouse, two monasteries, an hospital a gymnasium with a library and a theatre. Zamost was built in 1807, to form part of the line of the Vistula. Pop. 5700.

ZANA a lake, Abyssinia. See *DEMEVA*.

ZANAGUA a river Spain, rises near Alora, prov. Caceres, and flows S. for about 50 m. When in the neighbourhood of El Prolongo, it turns W. for 30 m. and lastly S.W. for about 24 m. when, after receiving the Ogüela, it joins the Guadiana. Total course, exclusive of windings, 114 m. Its principal tributaries are the San Roque and Iba.

ZANDVOORT, a vil. and com. Austrian Italy, prov. and 11 m. S. Bergamo, 1 bank Corno, on a height. It has a modern and several other churches, mineral springs, marble-quarries, and a trade in wine and silk. Pop. 929.

ZANDVOORT a vil. Belgium. See *SAINT-VAERT*.
ZANDVOORT a vil. Holland, prov. N. Holland, 4 m. W. by S. Haarlem, on the N. with a light-house, visible 8 m. off a two-masted, two churches, two schools and an elegant bath-house. Inhabitants mostly engaged in fishing. Pop. 1062.

ZANESVILLE, a tn. U. States, Ohio on the Muskingum opposite to the mouth of the Licking, 50 m. K. Columbus. It consists of the town proper and of a suburb on l. bank, and of two suburbs. N. and W. Zanesville on l. bank connected with it by two bridges and is a pleasant and thriving place, with about 15 churches, several of them large and handsome a commodious and jail a privately endowed school, occupying a fine brick edifice, an assementum, with a library of 8000 vols., a female seminary, several superior public schools, cotton and woolen factories, tins and brass foundries, glass-works, breweries, paper oil and saw mills, &c. and a considerable trade. Pop. (1850) about 9400.

ZANGELA a tn. Central Africa, Housa, about 40 m. S.E. Kano lat. 11° 45' N. lon. 10° E. It stands at the extremity of the Doobee range of hills, and appears from the extensive walls still remaining, to have been a very large place, but having been almost destroyed by the Fellatahs, who slaughtered the inhabitants or sold them as slaves, may be said now to consist of a number of thinly scattered villages. The district possesses fine plantations of cotton tobacco, and indigo, apart from one another by rows of date-trees, and the market is well supplied with beef, yams, sweet potatoes, &c.

ZANGUFBAR, a name frequently given by geographers to a long tract on the E. coast of Africa. The word Zangubar (properly Zangubar, with g hard) is equivalent to the Arab expression Bara zang, the land of the Zinj or Zeng being derived from Zinj or Zeng (Zinj Zeng or Zeng) the ancient Arabic name of the East African negro, and the Persian or Indian word Bar country. The name Zangubar or Zangubar belongs therefore to the language of the foreign traders from India, and the Persian Gulf and is still further modified by the Banyans of Bombay, who pronounce Zanzibar. Zangubar begins where the indigenous black population takes place of the wealthy Somali of beattie race, that is, at the S. side of the river Juba, near the equator and is originally extended S., doubtless as far as those who used the appellation were acquainted with the coast, that is, to Sofala, or perhaps Cape Corrientes. But the Portuguese, drawing a distinction between Zangubar and the coast which they claimed or occupied, fixed on S. Hott at Cape Delgado, so that the Zangubar of European geographers, about an extent of about 11° from the equator, is that the name is now obsolete. The Bara zang is now known as Es-sawdih, or the coast, and the semi-civilized nature, who have embraced Mahomedanism, repeat the appellation of Zangubar, or negroes, and call themselves 'awdih' as they pronounce it *Sawdih* that is, coast-people. (See *ZANZIBAR*).

ZANICA, a vil. and com. Italy Lombardy prov. and 5 m. R.B.W. Bergamo. It has a parish church the remains of an ancient tower which figured during the factions of the Guelphs and Ghibellines and a trade in corn and silk. Pop. 1058.

ZANIEMYSCHIL, a tn. Prussia, prov. Elbia, gov. and S.L. Posen with a church. Pop. 1520.

ZANJAW, a tn. Prussia, prov. Pomerania, gov. and 7 m. E.N. E. Ksiaz, on the slope of the Gollinberg with a church, an hospital, a saw and flour mill, and trade in cattle. 12 1846.

ZANJIKAH, an elevated ridge of Ladak or Middle Tibet, between lat. 33° and 34° N. and lon. 76° 30' and 77° 30' E. It is traversed S. to N.W. near its S. frontier, by a mountain-chain about 18 000 ft. high, here forming the water shed between the Umanak and the Indus, and is entered from the S.W. by a narrow rocky gorge in the chain, called the Hardar or Unnal Pass, leading along the side of an immense glacier into a wide valley surrounded by lofty precipitous of granite. This valley which is watered by the Zankar and its affluents is in the upper part almost entirely destitute of vegetation, but as the elevations diminish, begins to present fertile and well-cultivated spots chiefly along the banks of the streams, the surface in most other parts continuing to be of a very stony and steric nature. Still lower down, the valley widens out, so as to afford a larger extent of open country than found elsewhere in the basin of the Indus, and presents a series of alluvial platforms, so nearly level that no terracing is required for the purposes of irrigation. In this part of the valley villages are numerous and the climate being much milder than usual at the same elevation, allows cultivation to be carried on at unusual heights. The inhabitants in general, avast, manners, language, and religion, are the same as those of Ladak. Padum is considered the capital. — The river Zankar which waters the above valley rises in the N. side of the mountain not far from the Parnag Pass near lat. 32° 40' and lon. 78° E. flows N.W. for about 70 m. to Padum, where it is joined on the left by its chief affluent, and then flows N.E. to its junction with l. bank Indus, near lat. 34° 10' N. and lon. 77° 25' E. after a total course of about 140 m. During a great part of its course it is a deep, rapid, and muddy stream, inclosed by high banks of fine clay, occasionally rare, but more frequently terminated with fragments of black slaty rock. Where it joins the Indus, the elevation above sea-level is about 18 000 ft., and it rushes in with such violence as to cause a reflux current for several yards. — [Johnson's *Western Himalaya and Tibet*].

ZANJE, one of the Ionian Islands, Mediterranean, between 8 m. and 10 m. S. Cephalonia, and 15 m. from the nearest point of the Morea. It is about 24 m. long 12 m. broad, and 60 m. in circuit, has the form of an irregular oval, indented with a deep bay at its S. extremity. The coast exhibits steep limestone cliffs. The E. coast has a harbour, within which is situated the town of Zante. The greater part of the interior consists of an extensive plain which is extremely fertile, having the appearance of one continued vine yard, with a few patches under tillage or pasture. The sides of the hills bounding the plain are finely diversified. The prevailing rocks are calcareous, cypress appears in various parts, but the most remarkable mineral feature of Zante is its pitch-wells, situated about 10 m. from the town, and celebrated since the time of Herodotus. Earthquakes frequently occur. The most destructive on record took place on the night of December 29, 1820, when several houses were destroyed, and many persons killed or wounded. The staple export of Zante is currants, to the culture of which 6440 acres are appropriated. The other chief exports are oil, soap, and a little wine, pomegranates, melons, peaches, citrons, and other fruits are grown, but the corn raised scarcely supplies three months' consumption. The pasturage is trifling, and goats are the only live stock. Pop. (1851) 29 108.

ZANJE, a tn. Ionian Isles, esp. and on S.E. side of above island, at the head of a bay or harbour, on which it occupies a declivity sloping gently to the sea. The style of building is chiefly Italian, the houses, which are white, and seldom more than one story high, have iron bars and lattices of wooden framework attached to each window, which give them the appearance of prisons, but are somewhat softened by the grey green and vermillion painting of the shutters. The principal street is broad and handsome having a piazza on each side, with long ranges of shops, chiefly of jewellers; all the other streets are narrow, but tolerably clean. The market-place is spacious, and serves both for an exchange and a public promenade. The churches are numerous, generally substantial, and richly decorated within, but not otherwise remarkable.

A Lancasterian school is supported by voluntary contributions. The harbour is capacious, and provided with a commodious mole or jetty. Pop. 18,000 to 20,000.

ZANZIBAR, an isl. on the E. coast of Africa, belonging to the Sultan of Muscat. It is about 72 m. in length from Point Nangwi, lat. 3° 45' N. to the Kumbukha, lat. 6° 38' S. and with a general breadth of 15 m. or 18 m. the chief town on the W. side, in lat. 6° 10' S., being in lon. 39° 14' E. It is separated from the mainland by a strait about 25 m. wide, thickly beset with coral-reefs and islets, and lies opposite to a wide bay into which are discharged the waters of the Ruwa said to be a great river, the principal mouth of which is near the village of Kigundi (that is, at the bar). The name Zanzibar has been learned by Europeans from the Banyans of Bombay, and is a modification of Zingebur, which in the mercantile language of Malabar and the Persian Gulf, means Negroland, and was formerly applied to the coasts of the mainland (See ZANGUENAR). But at the present day the shores of the continent generally are called by the Arabic name Za-sawidh (which means the coasts) and the modified name Zanzibar is given only to the principal island adjacent to them, and is applied to it only by foreigners for the native name is Ujija (the very soft) or as it is vulgarly pronounced, Uguja.

The island of Zanzibar, like all the islands on this coast, is of coral-formation, and therefore comparatively low, but it has been raised above its original level and in some places attains a height, 550 ft., perhaps, which it is hard to account for. Its E. side presents a continuous and tolerably uniform wall of coral-reef, often 80 ft. or more above the sea and overhanging the waves. Coral-reefs on a distance of 1 m. or 2 m. protect the island. The great swell of the N. E. monsoon breaks on them with a tremendous surf, a little beyond the reefs this sea is unwholesome. On the W. side the shores are much lower and much more irregular, presenting many inlets and creeks, in which the mangrove grows luxuriantly, while the sheltered sea in front is dotted with small islands. The surface of the island is undulating, and the soil extremely rich, a stratum of guano probably lying between the coral-reef and the subsequent accumulations resulting from decomposed vegetation. It presents therefore an agreeable scene, the variety and luxuriance of the vegetation compensating for the monotony of the ground. The island is sufficiently watered, though the rivulets are small.

The greater part of the island is still in a state of nature, the mango, banana, papaw, plantain, and various Indian fruits growing wild, with several species of palm and the stately banyan or cotton-tree. The natives cultivate rice millet, which grows to a height of 10 ft. manioc batatas, &c. but the cultivated fields and gardens occupy only a small area. The labour of the fields is left chiefly to the women, who also make the pottery, are the stone-masons labourers and do all other drudgery. But the rural industry of Zanzibar is destined to make rapid progress. The island is now become a garden of the fine spices, the ancient plantations containing not less perhaps at present than 400,000 clove-trees, the produce of which is excellent. He has also planted nutmeg and cinnamon trees, and has directed his attention to the manufacture of sugar, obtaining workmen from Mauritius and Bourbon.

The animals of Zanzibar are few in number, wild hogs occupy uninclosed thickets in the middle of the island and a few oryxes, escaped from captivity lurk about the villages, wild birds also with the exception of guinea-hen are few, as well as insects, fish and poultry abound. The cattle of the island are small, and of the humped or Indian breed, the ass, here the chief beast of burden, is strong and hardy. Horses and camels are to be found in small number. The Sultan prides himself on his stud, but his horses, though well bred are generally in bad condition, owing to the imperfect husbandry of the island and the want of good green food.

The climate of Zanzibar has been always dreaded by Europeans, and not a few experienced seamen have denounced the water of Zanzibar as loaded with the seeds of fever. This accusation of unwholesomeness is shared with many coral-islands. The truth is, that being low and generally level, its drainage is imperfect, and as yet art has done nothing to supply this natural defect. The omnes which have conducted to the great fertility of the island—the decomposing animal matter within and upon the coral, the extreme rankness of a vegetation that falls to decay in heaps—are still in active operation, while

the careless habits of the people all favor the generation of malarial. The hyenas, which on the mainland cleanse the villages of all offal, are here wanting, and it is not uncommon to see the dead bodies of slaves or poor people lying unburied on the sea-side in front of the town. In short pestilence is easily generated in such a place as Zanzibar, while as yet no step whatever has been taken to prevent its generation.

The town of Zanzibar called Ujija or Beled-Zanzibar, now the residence of the Sultan of Muscat, stands in lat. 6° 10' occupying a small sandy peninsula on the W. side of the island. It was formerly insulated at high-water but now a low stone-bridge over the creek maintains at all times the communication between the town and country. From the sea, the town has a gay appearance, the white-washed buildings rising from among clustered palm trees, and extending about 1 m. along the shore. Some of the buildings, as the old palace called the Haram the castle, 900 ft. long with four towers, are of considerable size. The mosques, 6 or 10 in number are plain white-washed buildings. The streets are very narrow, and before the stranger goes far in discovery that the huts of bamboo covered with palm-leaves far outnumber the stone-houses. However they are not generally unvarnished but differ in quarters have different populations, Shunguti in the E., is chiefly inhabited by Arabs. Unguja, further S. contains the dwellings of all the more wealthy and respectable merchants. Habibi at the extreme S. is the small dealers quarter, and adjoining it is the Sukki Mahogo or cassava-market, Msimbazi, in the middle as given up to Hindoos not Banyans. Melinda, Guzuqui, and Nungu, in the N. are all inhabited by pagan African slaves, or destitute poor. The population of Zanzibar (this town) which is a place of great mercantile resort, varies much with the season and the winds. At times 100,000 slaves may be seen at anchor before the place, and in a few days previous they suddenly disappear. Its settled population cannot be less than 30,000.

There is another town in the island deserving mention and little known to Europeans. At the S. W. side of the island about 25 m. from the capital, and in lat. 6° 34' S. is a sandy point insulated at high water and in which stands the town of I (otherwise called Ujigwa-ud (Great Ujigwa). The mosque is the only stone-building in the town the dwellings being only frail though very neat huts, among once-out, mango and baobab trees. This town is interesting inasmuch as the people, wholly by the Maldivian, of the tribe who ruled the island anterior to the invasion from the Indian Gulf and Muscat. To the number of 15,000 they still cling to and obey their hereditary chief who retains great estates. In travelling through the country between these towns the stranger is agreeably surprised at finding the narrow roads everywhere neatly fenced, like garden-walks, with hedges of palm-Cattail, the cotton shrub or of a cropper called ngwira, which yields elastic gum. Pop. about 150,000 (See SIPP).

ZAPADNAYA KOSTA, river delta. See IZVOSHENKA.

ZAPARA an isl. and castle, Venezuela, 18 m. N. E. Maracaibo opposite the mouth of the lake of that name. Length about 12 m.

ZAPA GARA one of the largest islands of Lake Nicaragua, Central America. It has a mountainous surface nearly 700 ft. high and though uninhabited, seems to have portions susceptible of cultivation.

ZAPATONA (LAKI), a lake New Granada, 35 m. S. E. Mompox being an extension of the water before it joins the Magdalena.

ZARATONA (LAKI), a lake New Granada, 35 m. S. E. Mompox being an extension of the water before it joins the Magdalena. Length, about 25 m. breadth 22 m.

ZARA (anc. Zaira) a seaport in Austria, cap. of Dalmania, on an oval promontory which has been converted into an island by cutting through the narrow isthmus which formerly connected it with the mainland, 70 m. N. W. Spalatro. It is defended by fortifications, the ramparts of which partly planted form an excellent promenade. It entered by two gates, one from the sea called Porta Marina, and partly Roman, and the other from the land called Porta di Terra. From a fine work of the celebrated Bramante, it consists of several tolerably clean and well built, but steep and narrow streets and three squares, one of which, called the Piazza dei Signori is elegant and has an ancient and interesting cathedral, in the Lombard style, two other churches, one of them with a sunny attached, and both possessed of good paintings, a handsome Loggia, a lofty marble column, the solitary remains of a Roman temple, a lyceum, gymnasium, archiepiscopal

opened secondary normal and other schools, a museum, a civil and military hospital and a spacious but somewhat shallow harbor, admitting vessels of about 800 tons, and much frequented by coasters. The only manufacture of any consequence is rosoglio, and the trade, by no means important, is in imports of manufactures from Trieste, and exports of rosoglio, aniseed, almonds, and other products of the district. Zara has stood many sieges, particularly one in 1707, when, on the way to the Crusades, it was taken by the Venetians; again, in 1797, with the assistance of the French, and another in 1848, when it was taken by Marino Faliero, in the face of a large Hungarian army. Pop. about 7000.

ZARA a vil Asiatic Turkey on a plain of the same name, parh. and 40 m. N. E. Sivas, with a large mosque and a neat Armenian church. It contains about 300 families, half Muselman and half Armenian.

ZARA VECHIA [Hytrus, *Stara Zadar*, *anc. Hlandona*, or *Alba Mariana*] a vil Dalmatia, circle and 17 m. S. E. Zara. It was once an important place, and the residence of the Croat kings, but was ruined during the wars of the Venetians with the kings of Hungary and is now an insignificant place with a tolerable harbor. Pop. about 500.

ZARAGUZA a tn. Spain. See **SARAGOSSA**.

ZARAND a market in Hungary Thither Theiss, on and 23 m. N. E. Arad, where the Langer joins the White Korus. It has a ruined castle a distillery a mill, and a trade in fruit, cattle, wax and honey. Pop. 2837.

ZARAI Z, a tn. Meise, Hungary, prov. Gumpson, on the Bay of Bucury 3 m. W. St. Sebastian. It has a parish church with a tower a saw-mill a handsome townhouse, parished with garden, primary school and a trade in cattle and hides. P. 1369.

ZARDAM a tn. Holland See **ZAANDAM**.

ZAREWO-SASTRICHNOE, a tn. Russia, gov. and 183 m. S. W. Viatka, on the Malo-Kokshaga with a trade in agricultural produce. Pop. 3130.

ZAREWOKUCHAISK, a tn. Russia, gov. and 73 m. N. W. Kazan on the Malo-Kokshaga with three churches, and a trade in agricultural produce. Pop. 3138.

ZARIZTA a tn. Russia, gov. barony at the confluence of the Zaritsa with the Volga, 110 m. S. S. W. Kamyshin. It is surrounded by walls and ditches, and otherwise defended, and has two churches, baths, a brewery and a considerable trade in cattle and fruit. Pop. (1842) 47,48.

ZARKI a tn. Russian Poland, walled Graeow 27 m. N. W. Olkusz with three churches, a synagogue, a monastery a blast furnace, foundry and other iron-works, and a considerable trade. Pop. 2300.

ZARNALI, a ruined city Persian Koordistan, 63 m. S. W. Kermanshab. The foundations of buildings now nearly levelled with the surface of the ground, extend over a space of about 2 m. in circuit.

ZARNAH a lake, Afghanistan. See **DURRA**.

ZARREN a vil and own Belgium, prov. W. Flanders, 1st m. S. W. Brugue with a church, townhouse, school, distillery four breweries, and several flour-mills. Pop. 2389.

ZARREN a vil. Mecklenburg-Schwerin on the S. W. shore of Lake Stahel, 20 m. S. W. Schwerin with a parish church. Pop. 1067.

ZARREK-SATO a tn. Russia. See **SORITA** (St.).

ZARLINA a tn. Ecuador, dep. Azuay 25 m. N. W. Loja on Loma on the Tumbes, W. locality, Andes, about 4500 ft. above sea-level. The rich mines, to which it owes its prosperity are widely and nearly exhausted. P. about 6000.

ZARLA, several places, Spain Extremadura—1, (*de Juba*) A tn., prov. and 80 m. from Badajoz, on the Gujuz, with a parish church, courthouse, primary school, and a considerable trade. Pop. 1829—3 (*de Grandilla*) A tn. prov. (across, on a low plain, poorly built, with a parish church, courthouse, and primary school manufactures of linen and a trade in corn and cattle. Pop. 1252—3, (*de Montevideo*) A tn. prov. and about 20 m. from Caesura with a parish church, courthouse, primary school and manufactures of woolen and linen cloths, and woolen-works. Pop. 1815—4 (*de de-Ande-Alago*) A tn., prov. and 35 m. W. Badajoz, on the skirts of the Sierra de Calvezo. It has a townhouse, prison, granary fresh market, four elementary schools a parish church and hermange, an oil and five flour mills, two brandy distilleries, three manufactures of soft soap and one of coarse linen. Pop. 2410—3 (*de Mayor*), A tn., prov. and 35 m.

N. W. Caesura, in a marshy valley. It has a townhouse, a large and substantial prison, two elementary schools, a parish church, and custom-house. Some are employed in tillage, but the proximity of the town to the Portuguese frontier, by giving facilities for smuggling prevents the inhabitants from cultivating the useful arts. This place is commonly called *Zarna Quemada*, on account of its having been burned twice by the Portuguese, at the end of the 16th century and again in 1708, when it remained uninhabited till 1718. Pop. 6760.

ZARZISS, a maritime tn. and castle, Tunis, on the frontier of Tripoli 16 m. S. E. the island Jerba.

ZASLAW, a tn. Russia, gov. Volhynia, on the Horyn, 89 m. W. Jitomir with five churches, a synagogue, a monastery, and a considerable general trade. Pop. 6000.

ZASMUK, a tn. Bohemia, circle Kaurian with a deanery church, two castles a Franciscan monastery, manufactures of potash and beet-root sugar, and a trade in cattle. P. 1567.

ZAUDITZ, SUPSON, or SAUMON a tn. Prussia, prov. Silesia, gov. Oppeln, circle and 9 m. S. W. Ratibor, with a church, dyo-works, mills, and a trade in cattle. Pop. 1035.

ZAVANASCO, a vil and com. Italy Lombardy, prov. and 9 m. N. Pavia, on the Pavia canal. Pop. 1188.

ZAVATAI (Lila) a tn. Italy Piedmont dist. Genoa, prov. and 10 m. N. W. Bobbio with a court of justice, an old castle, a parish church, and a school. Pop. 1720.

ZAZHIVA a vil Hungary co. Arva, on the Rucka, 9 m. N. W. Kabin with a R. Catholic church, manufactures of wooden articles, and a trade in agricultural produce. P. 2696.

ZBARAZ, a tn. Austria, Galicia, circle and 13 m. N. E. Tarnopol, on the Ikwa with a parish and two R. Catholic churches a gymnasium a Bernardine convent, and an ancient castle. Pop. 5650.

ZHRAZLAWITZ, a market in Bohemia, circle and 15 m. S. W. Casan with a church, synagogue, old castle, townhouse, school potash refinery, brewery, &c. Pop. 1058.

ZDUNY a tn. Russia, prov. and 30 m. S. E. Posen with a Protestant and a R. Catholic church, a synagogue, a superior burgher-school, and manufactures of woolen and linen cloth, leather and tobacco. Pop. 821.

ZEA [anc. Zey], an vil (town) Archipelago, belonging to the group of the N. (Zeyland) 13 m. E. Cape (Alona, greatest length, N. N. E. to S. W. W. 13 m. central breadth, 9 m. (at Mount St. Elias) 37 37 18" N., lon. 24 21 45" E. (n.) It is of a very compact and somewhat oval form. Behind the coast, which are generally low the ground rises in fine terraces towards the centre, where it culminates in Mount St. Elias. The prevailing rock is limestone. The climate is sub-tropical, and the soil both fertile and well cultivated, producing in abundance barley cotton, wine, and figs. The pastures also feed great numbers of cattle, and much attention is paid to the rearing of silk worms. Pop. 9000—ZEA, the capital, occupies the site of the ancient Lartion, on a small stream, about 3 m. from the N. W. shore. It is built on an eminence, in the form of terraces, the roofs of one range of houses forming the street of the range above. It is entered by a narrow pass completely commanded by the citadel. Many of the houses are of massive structure, but the streets are very dirty. The harbour, 3 m. distant from the town, admits the largest vessels, and is well frequented.

ZEAL MONACHOM, par. Eng. Devon. S84ac. P. 578

ZEALAND Isl. Denmark. See **ZEALAND**.

ZEALAND (New) See **NEW ZEALAND**.

ZEBAYE, a group of islands in the S. of the Red Sea, about lat. 15° N. and lon. 42 E. It consists of Jubel-Zebayor, the most S. and largest, about 8 m. long N. to S., 8 m. in circuit, and 600 ft. high, and with three remarkable hills, one of them in the form of a cone, Sabu, N. W. by W. of the former, about 4 m. in diameter, and nearly round, consisting of a sandy plain, with two remarkable hills, both of which have craters; Connected island, a most extraordinary high rugged-topped rock, joined to Sabu by a reef, Sadid, 2 miles long, high, and of moderate height; and Jubel Teer 24 m. N. W. of Jubel-Zebayor, nearly of a circular shape, about 1½ m. in diameter rising gradually from the shore, and terminating in a range of volcanic peaks.

ZEBID, a tn. Arabia, Yemen, 58 m. N. by E. Mocha lat. 14° 12' N. The Wadi Zebid in which it stands, has the reputation of being the largest and most fruitful valley of the

Tobago; the occasional stream which waters it sometimes becomes an impassable river. The town itself has a gloomy appearance owing to the dark colour of the bricks and the ubiquity of the algae. The walls of Zebid are a league in diameter, but the inland space is not all covered. Numerous towers along the walls, with loopholes for musketry, render the place strong against an enemy not provided with artillery. The principal mosque is large, and distinguished by an octagonal minaret of very elegant appearance. Zebid is deeply engaged in the coffee trade. Pop. 9000, exclusive of the Turkish garrison which is rarely under 3000.

ZEBU, or **Zebu**, an island, prov. Philippine Isles separated on the W from the Isle of Negros by the Strait of Tabon and lying on the E. the dependent isles of Matan and Bobol, between lat. 9° 20' and 11° N and lon. 123 and 124° E. The island, forming a long and comparatively narrow belt, stretching NNE and SSW, has a sandy and somewhat stony soil, not so well adapted to culture as most of the other Philippine Isles and suffers much from want of water as rain seldom falls, and when it does fall is quickly absorbed. It has, notwithstanding many fertile valleys, which yield good crops of rice, sugar, cotton, tobacco, millet, and the best cacao in the Philippines, and extensive pasture on which great numbers of cattle, sheep and goats are fed. The climate is remarkably pleasant, the excessive heat being tempered by an evening and morning breeze. — The town situated near the centre of the E. shore, opposite to the island of Manan is divided by a stream into two parts, one of which is occupied entirely by *moses* is delimited by a small fort, consists generally of large houses built of stone and has a fine cathedral, a handsome episcopal palace, a hospital, and an important trade, chiefly with Manila. Pop. including pueblo, 8305. — The provinces, which include in addition to Zebu, the isles of Matan, Bantayan, Siquin, Bohol and Camotes, forms 41 pueblos. 1 pop. 206,803.

ZEDLIGHYM a vil and com. Heligum prov. W. Friesland, 7 m. S.W. Bruges with a primary school and linen manufactures, and a trade in timber and bark. Pop. 3807.

ZELAND (Zeeland) a prov. Holland bounded N by prov. S. Holland, E. by N. Holland, S. the kingdom of Belgium, and W. the North Sea, long and broad, about 35 m. across, 433 sq. m. It consists of a low lying tract of land on the frontiers of Belgium and on the S. shore of the estuary of the Scheldt, and of the islands of Walcheren, H. and S. Beveland, Schouwen, Tholen &c., separated from each other and from the mainland by arms of the Scheldt, from which and from the North Sea, it is protected by dikes. As a whole, the province is flat and fertile, producing excellent crops of the ordinary cereals a considerable quantity of clover, rape, and madder and a superabundance of excellent fruit. The grasslands also are rich and extensive, and support a tolerable cattle, and sheep which make fine mutton. Fish, crabs, and wild fowl are very abundant. The climate is rather moist but comparatively healthy though in former times it was deemed eminently insalubrious. This improvement has arisen from the filling up of sluggish waters, which rendered the islands more numerous in former times than now, the draining of marshes and pools and the great decrease in the cultivation of flax, which being at one time in great quantities steeped in the canals round the towns and villages, sent forth a most pernicious smell. Large tracts, partially covered by the sea, are at present (1855) in process of being reclaimed. The manufactures of Zeeland are moon, sardines. Middelburg is the capital besides which it has the towns Zierikzee, Flushing, Goes, Tholen, Sittich, and Axel. Pop. (1851), 160,140.

ZEGWAARD, a vil. Holland, prov. S. Holland, 8 m. E. by S. the Hague with two churches and a school. Pop. (agrilment), 1282.

ZEHEN a tn. Prussia prov. Brandenburg gov. and 27 m. N.W. Frankfurt-on-the-Oder with a church and a trade in wool, cattle, &c. Pop. 1530.

ZEHENICK, a tn. Prussia, prov. Brandenburg gov. Potsdam 35 m. Berlin r. bank Havel. It has two churches, an hospital, and a Protestant female institute manufactures of woollen and linen cloth and tobacco, potash-works, building-yards, and some trade. Pop. 3209.

ZEHREK, a tn. Heligolander, prov. Jhalawan, cap. dist. of same name, lat. 25° N lon. 60° 34' E. It is sur-

rounded by a mud-wall and is described by Pottinger as containing from 3000 to 5000 houses, though that is probably an over estimate. — The *maritime* being less elevated, is warmer than that of Kaitai, and being watered by numerous streams, and naturally tolerably fertile, produces good crops of grain, pulses, and vegetables.

ZELID-N, or **KERTENKLOW** a market in Austria, Transylvania 7 m. N.W. Kronstadt with a Protestant church surrounded by walls and a ditch a Greek church, a ruined castle crowning a height, and extensive manufactures of mixed linen and cotton goods. Pop. 2310.

ZELIST, Zentr or Zaver a vil. Holland, prov. and 6 m. E. Utrecht with two churches, a Moravian establishment, and several schools and manufactures of soap, candles, vinegar &c. Pop. 3845.

ZELL, a tn. Bavaria, Lower Franconia, r. bank Main, 34 m. NE. Würzburg with a church, a castle, porphyrus manufactures of paper and potash raw and other mills. P. 1810.

ZELIKAM a vil. Bavaria, Palatinate, am. Germersheim with a parish church a mill and a trade in garden produce. Pop. 1509.

ZELITUN Zerrony or Mulo (Gulch) [anc. Melasus (Gulch)] an inlet, E. coast Greece, Livadia, across the mouth of which lies the N.W. and of S.E. Negropont, from which it extends about 16 m. inland with a breadth of 5 m., and a depth of 10 to 15 fathoms. On the S.W. side of the gulf lies the I. of Thermopylae.

ZELITUN a tn. Greece. See I AMIA.

ZELTZ, a tn. Prussia prov. Maxony gov. and 22 m. S.E. Merseburg 1 bank White Elster, now crossed by a stone-bridge. It has walls with six gates an old and a new castle, four churches a gymnasium literary orphan hospital lunatic asylum, and porcelain, manufactures of calico, merino, casimere, bombazine, leather, hosiery gloves, and ribbons, several printworks pottery brassware and distilleries, and a trade in corn. 1 pop. 12,394.

ZELADA a vil and com. Italy Lowhardy prov. and 8 m. N.W. Pavia, 1 bank Ticino, and the canal of Brese garbio. It has a parish church. Pop. 1140.

ZELANDZ, a tn. Austria See KANAUZ.

ZELAYLA a tn. Mexico See OZAYLA.

ZELI, a tn. and com. Belgium, prov. Flanders, 4 m. N.W. Brussels with a church, hospital and several schools manufactures of calicoes, coarse cottons, sock and all cloth tobacco, soap, and salt, distilleries, breweries and thread, oil, mustard, meal, malt, and flour mills. Pop. 11,061.

ZELI, two places, Switzerland. — 1. A vil and par. can. and 15 m. N.E. Zürich near the Töss with several cotton-mills and textile stores. Pop. 1685. — 2. A vil and par. can. and 18 m. N.W. Luzern with a new church and a picturesque annual pageant. 1 pop. 1102.

ZELI, numerous places, Germany. — 1. A tn. Rhenish Prussia, prov. and 29 m. S.W. Coblenz, r. bank Moselle it has walls flanked with towers, two churches numerous mills, and a trade in wine, bark, wood, and hazel nuts. Pop. 3135. — 2. A tn. Baden circle Upper Rhine on the Wies, 20 m. S. Freiburg with a church baths manufactures of calicoes and cotton goods, tile-works, a glassfield, and several mills 1 pop. 1207. — 3. [anc. Haversbach] A tn. Baden circle Middle Rhine, on the Kuang 10 m. S.E. Odenburg. It has walls with two gates contains a parish church, and a chapel to which pilgrimages are made. It was once an imperial free-town. Pop. 690.

ZELI, (St. BLAND) a tn. Saxo-Coburg on the Gomsbach, 19 m. S.W. Gotha, with two churches, manufactures of firearms and tinware a powder saw and several polishing mills and a trade in cattle. Pop. 1942.

ZELLERPHALD, or **OSLAUMBERG**, a tn. Hanover on the Zellorbach, opposite to Knausthal. It is well built, in the form of a square, with spacious streets, some of them lined with trees, and has a church and a gymnasium. There are extensive mines in the vicinity. Pop. 4546.

ZELI, a tn. Prussia, prov. Brandenburg, gov. and 23 m. N.W. Frankfurt, r. bank Oder. Pop. 1820.

ZELLINI, or **ZELINIA** a river, Italy Venetia rises in Mount Mauro, in the N. of Prov. Friuli flows circuitously S.E. past the town of Monfalcone, and a little below is lost in extensive swamps. It again appears a little N.E. Fardoneuse, but bears the name of Meduna.

ZELLINGEN a vil. Bavaria, Lower Franconia, 1 bank
Main 9 m. N W Würzburg with a church, and a trade
in wine and fruit. Pop. 1935

ZELLINGEN a vil Rhonish Prussia, gov and NE
Trevon, r bank Moselle with a R. Catholic church, and a
trade in wine. Pop. 1477

ΔΕΛΒΑ, or **ΔΕΛΒΙΑ**, a tn. Russia, gov. and 52 m. S.E. Gdudno on river of its name with two Greek and two R. Catholic churches, a monastery, and an important annual fair —The river flows N., and after a course of about 70 m joins the bank Niemen.

ZFLAATTE, a vil. and com. Belgium, prov. E. Flandre, 12 m. N by E Ghent with three breweries, a starch-factory, several oil and corn mills and a trade in grain and cattle. Pop. 8194

ZSF 11F a vil and com Italy Piedmont div Novara, prov
Lombardia, about 8 m from Mortara. It is an ancient place
with a parish church and a charitable endowment. [Mus. 1871]

ZEMPEL BURG a tn P'tsda, prov W Prussia, gov and 61 m. W S W Marienwerder, on a small lake of same name with two churches, a synagogue, manufactures of woollen and linen cloth, and a trade in horses and cattle. Pop. 3589

ZEMPLIN, a co Hungary Either Thence bounded, N by Galicia E. co. Ungvár and Szabolcs B. Szabolcs and W. Barosd. Abnagvár and Saros length, N 1/2 E to N W 100 m. mean breadth 20 m. The surface in the S is traversed by the Carpathians which send out low ramifications, one of which towards the S, forms the Kiscyall, on whose slopes the famous Lokay wine is grown. The chief rivers are the Theiss, which bounds the co. for a great part of the S the Hernad, in the N W, and the Bodrog and its tributaries in the interior. The climate is cold in the N and mild in the S. The valleys are fertile in corn, tobacco, hemp and the hills are generally covered with vineyards and the mountains are wooded with oak, as well as in the mountains, particularly iron, alum, petroleum, and sulphate. (Lithely in the country). Pop. 253,000.

ZEMLEN a market in Hungary. Hither Ticks, co of
new name, r bank Budrog 99 m 4 E. Kasehan with an
old castle, and a trade in wine, which is grown in the district.
ZEMEN a vil anicem liab Predmetn div Novara,
prov Lomellina, near Lava and l bank l c, from whose in
undulations it often suffers. It consists of an old and a new
quarter and has a parish church. Pop 3367

ZENDRAI O ZERBADOOD, or ZAYKENDI RIVER a river Persia, rises in Mount Zark, Irak-Ajemi about 40 m. W N W Isfahan flows past that city and about 150 m E.S.E. after entering Khorasan is lost in the sands of the desert

Zr NOG, or PEZZY [Latin *Sagum*] a seaport in Austria, Military Croatia, on the Adriatic, at the opening of a wild ravine in front of the ist of Veglia, 32 m N.E. Fiume. It has two tolerably well-built squares, a handsome cathedral, an episcopal seminary, a castle, an institute for supernumerated priests, a high and a girls' school, and a trade in corn, wood, tobacco, salt, oil and fish. Pop. 3102.

7/ENIZA or SIKETIZA, str. European Turkey Bosnia,
 approx. and 80 mi N W Nova-Pazar Pop. 2000
 8/ANJAN ZAGHAN or ZAGULIAN str. Persia. prov. Irak

Ayons, on the Doubs, an affluent of the Rhine (Ouzon, 128 m) by E Hamaden. In the midst of orchards famous for their fruit. It has old walls, a handsome palace, a large unique, extensive hamlet, and an active trade in carpets, woollen cloths, arms, food and sawdust. Pop. about 15,000.

ZENON, par Eng. Cornwall 4229 ac 1 op. 918.
ZENONE (VAN) a vil Italy Lombardy prov and 12 co.
E.N.E. Pavia, on the Olona, here crossed by a stone bridge,
a little above its confluence with the I.c. Pua. 1100

ZENTEN a m. Hungary. See **HAENTA**.
ZENTENEN a vil. and com. Belgium, prov. Limburg,
 9 m. N.W. Hasselt with several breweries, a distillery, a
 flour-mill and a trade in agricultural produce. Pop. 1833

ЗХР АҮҮҢАА ХОНХ, БОГД, or KUAN DAMA, a RIVER
Bokhara, formed by several streams from the mountains on
the E. frontier. Flows nearly due E. past Bamandrud, to the
town of Bokhara, then in a diminished stream S.W. and
N.E. discharging itself into a lake of the desert, about 18 m
from the head of the Amou or Oxus, after a course of about 260 m
it is much used for irrigation and contributes greatly to the
fertility of the vale of some towns through which it flows.

ZILHAI or **WALTHERS** a market in America, Transylvania, co. Solonok, beautifully situated at the foot of Mount Meese, near the source of the Zilah, 46 m. N W Klausenburg. It has a Protestant church and Protestant gymnasium. Pop. 8440 Magyars, and almost all Protestants.

ZILLESBEEK a vil and com. Belgium, prov. W. Flandrs, 80 m. S. S. W. Brussels with two breweries, two flour-mills, and a trade in agricultural produce. Pop. 1494.

ZILLEH (anc. Zela), a tn. Asiatic Turkey pass. Euxus or Roum, on a small stream, 39 m. W of S Tokat. It is built on a black hill, which gives it a singular and insulated appearance, consists of about 3000 houses, almost entirely occupied by Turks, and has a modern castle built on the site of an old Byzantine fortress several large khans and manufactures of cotton cloths. In the vicinity Pharusians was defeated by Julius Caesar.

ZILLESCHAL, a valley of the Tyrol, on the r bank of the Inn, which receives the Zeller, by which it is watered about 24 m. below Innsbruck. The S. and S. W. sides of the valley are bordered by glaciers, but towards the N it becomes less precipitous and more fertile, and possesses fine alpine meadows and pastures. The inhabitants about 14,000, have fine physical forms, and are still more distinguished by their moral qualities being active industrious, cheerful, hospitable, and so strongly attached to their native mountains, that when

Vol. II.

at a distance from them, they often pine away. This has tended to heighten the indignation which was felt throughout Protestant Europe, at the barbarous treatment to which a large body of these simple mountaineers were subjected, even in the present century for no other crime than that of holding the principles of the Reformation, and standing proof against all the means that were employed to seduce them from their faith. After both persecution and persecution had failed, they were plainly told, that the only alternative left them, were poverty or exile. They nobly chose the latter, and emigrated in a body (in 1837) to Prussian Sillesia, where the Government to its honour has given them an asylum.

ZIMHO, a promontory Brazil, prov. Santa-Catharina, 40 m. N. Desterro. It projects a long way into the sea, retaining nearly throughout the same breadth of about 4 m., and terminates in three points.

ZIMMERBORN (Grose) a tn Hesse-Darmstadt, prov. Starkenburg r bank Gersprenz, 7 m. E. Darmstadt; with a Protestant and a R. Catholic church and manufactures of linen leather earthenware, and tobacco. Pop. 2440

ZUFFENHAUSEN a vil. Württemberg circle Neckar hall and 6 m. from Ludwigsburg, with a church. Pop. 1653

ZUG a central com. Switzerland, bounded N by Uri, Uri, K. and S. Schwyz S. W. Luzern, and W. Aargau greatest length, 8 E. to N W, 16 m., greatest breadth, 12 m. area, 85 sq. m. The surface, mountainous in the S E, and S. where the Roseberg occupies the frontier slopes more or less gradually N and W, still it becomes comparatively flat. The drainage goes wholly to the basin of the Aar, which receives it partly by the Sihl, but chiefly by the Reuss. The only lakes deserving the name are the Zug and Egert. The climate, rigorous in the mountainous districts, is so mild on the lower S slopes, that the chestnut thrives upon them, and even the fig-tree matures its fruit. Mists frequently rise from the lakes and rivers, and injure the blossom. The strata belong generally to the more recent sandstone formation, which in many parts, particularly on the shores of the Lake of Zug, is covered with immense boulders of granite. The soil is fertile and the pasture on the highlands are excellent. Fruit is abundant, and the lower slopes with S exposure, are generally appropriated to the vine. Wood consists chiefly of pine and beech, with an intermixture of oak. Fish particularly large carp and pike, abound in Lake Zug. The trade, confined to exports of butter, cheese, young cattle dried fruit, and honey is important. The inhabitants are almost all R. Catholics and speak German. The government is strongly democratic. Zug ranks as the eighth canton of the Swiss Confederation. Pop. (1850) 17,455

ZUG a tn. Swiss land esp. above can, beautifully situated at the foot of a hill, on its N E. corner, 13 m. N E. Lucerne. It has old massive walls, flanked with towers two churches one of them with a lofty tower a portal surmounted by statues, a fine altar and some good paintings a Capuchin monastery with a painting by Flemings a handsome gymnasium, townhouse, arsenal, and large fruit-magazine. In 1455, from some unascertained cause, a whole street nearest the lake sunk into it killing about 80 persons, and destroying 25 houses, together with part of the walls and towers. In 1584 nine houses were destroyed in the same way. P 8702

ZUG (**LAKEN**) or **ZUGENSTADT**, a lake, Switzerland, chiefly in can. Zug but partly also in Luzern and Schwyz. It is 1840 ft. above sea-level, 12 m. long N to S, and varies in breadth from 1 m. at the center, where the land projecting on each side makes it narrowest, to 3 m. The shores are low in all directions, except the S. and S E. In the former direction the Right, with Mount Pilatus towering behind it, and in the latter the Rindberg or Roseberg, rise in abrupt and lofty precipices, presenting scenery of the grandest description. At the foot of the Roseberg the depth of the lake is not less than 1200 ft. There is not much traffic upon it but the fishing, principally pike and carp is very productive.

ZUHEROS, a vil. Spain, Andalusia, prov and 33 m. S. E. Cordova. It has a townhouse, prison, granary two endowed elementary schools, parish church, two hermitages, several fountains, and a promenade planted with olives and almond-trees all oil a soap-works, and a number of looms for woollen fabrics, but this last handicraft is on the decline. Pop. (agricultural), 3024.

ZUIDER-Zee (South Sea) a gulf of the North Sea, on the coast of Holland, between provs. Friesland, Overijssel, Gel-

Merland, Utrecht, and N Holland, 80 m. long, 40 m. greatest breadth, but only 10 m. broad between Eekhuizen and Stavoren. The islands Texel, Vlieland, Terhelling, Ameland, &c., separate it from the North Sea, with which it communicates by the channels Hollandsche but west the Heider and Texel the chief entrance, Westvliedings, Oostvliedings, and Amelandings, between the Texel and Vlieland, Vlieland and Terhelling, and the latter and Ameland. It contains the islands of Woeromgen Marken, Urk, and Schokland, and numerous sandbanks especially in its N portion has on its shores numerous towns, and receives the waters of the IJ, IJssel, Yecht, Eem, Kelder, &c. but is generally shallow and only navigable by vessels of small draught. Oysters and fishes are plentiful. It has been proposed to dam up and drain the Heider-Zee as has been done with the Lake of Haarlem. ZUIDHOORN a vil Holland, prov and 6 m. W N W Groningen with two churches and a school. Pop. (agricultural) 548.

ZUIDLAND a vil Holland, prov S. Holland, 8 m. S.E. Brielle with a spacious market-place, a church, and a school. Pop. (agricultural) 1338.

ZUIDAREN a pleasant prosperous vil Holland, prov Drenthe, 9 m. E.N.E. Assen with a church, a school, many factories of cheese and oil saw and corn mills. Inhabitants engaged in agriculture and cattle rearing. Pop. 960.

ZUIDLAND, a vil Holland, prov Zealand 15 m. S.W. Middelburg with a church. Pop. (agricultural) 597.

ZUJAB a vil Spain Andalusia, prov and 52 m. N.E. Granada, 1 bank Barbata. It has a townhouse, prison, two elementary schools, numerous fountains, a parish church and four hermitages flour and oil mills. Pop. (agricultural) 2803.

ZULIA a dep. Venezuela lat. 8° to 12° N lon 68° to 73° W comprehending the country which includes the Lake of Maracaybo, the N. declivity of the E. Andes included. It contains the provinces of Maracaybo, Trujillo, Coro, and Merida area, 89 000 sq. m. Pop. 154,000.

ZULLICHHAU a town Prussia prov Brandenburg, gov and 51 m. S.E. E. Frankfurt, on a fertile plain. It consists of a town proper with walls and ditches, and of four suburbs and has two churches, a pedagogical castle, courthouses, orphan hospital, manufacture of woollen and linen cloth, furriers, hats, leather, starch and vinegar and a trade in cloth, wool, hops, wine, and fruit. Pop. (1857) 5593.

ZULI PICH [anc. Tablacum] a walled town Rhinisch Prussia, gov and 16 m. S.W. Cologne on a height, in a fertile district. It has a parish church with a crypt, manufacture of woollen cloth and leather. Züllich is famous on the scene of the signal victory gained in 496, by Clovis, over the Alemanni. P. 1864.

ZULTE, a vil and com. Belgium, prov E Flanders 16 m. S.W. Ghent with a church, two schools, three distilleries, a brewery and various oil and flour mills. Pop. 2042.

ZULU, a nation of S. Africa, of Indian race with the Bechuanas and the maritime tribes called Kafirs, and occupy the elevated country S.W. of Delagoa Bay about the sources of the Maputa and St. Lucia rivers. Their territory lies wholly between the mountains and the sea, and are separated from Natal by the river Tugela. The word Zulu signifies high or sublime (in the sky), thence comes the personal noun Mbulu, in the plural Amabulu. The Amabulu are a handsome race well featured, with brown complexion, and figures melting strength and activity. Their country well watered, abounds in excellent pastures, and yields Kafir corn (sorgho) and millet in profusion. It is therefore rich in cattle and comparatively well peopled. The Amabulu, now famous for their warlike propensities, are said to have come from the N. in the beginning of the present century. Chaka, their chief, extended his conquests down the coast to the river Umzimvubu (Hippopotami), which now forms the S. limit of Natal. He was assassinated, and succeeded by his half brother Dingaan, who drove off into the interior, Mbulubaba, the tyrant of the western plains. A band of his warriors seized the Portuguese factory in Delagoa Bay and put to death the governor who had offended Dingaan but they did no further injury to person or property. Dingaan received the missionaries, and with Dr. A. Smith on the part of the British Government, he made a treaty having for its object the encouragement of trade. But his attempt to destroy the elephants wholesale with his bullets, cost the lives of many of his warriors, and procured but a temporary and inadequate

abundance of ivory. At length Dingaan ventured to anticipate the treachery which he expected of the emigrant Boers, by butchering about 500 of them, who were encamped in his country confiding in his hospitality. This deed was avenged by the surviving emigrants, and Dingaan obliged to fly from his burning town. Ukungulongo (the Great Elephant), was soon after murdered by the natives, and when he sought refuge, He was succeeded by Panda, the brother of Chaka, and ally of the Boers, who built a new capital on the banks of the Umshlopo. The most striking particular observable among the Amabulu, is their military organization. Their regiments of 1000 men each, and distinguished by the colour of the skin-covered shield, are well equipped and trained, but are deficient in arms, using only the spear. With the acquisition of firearms, they would soon become formidable. They are said to muster 25 000 men, besides 15 000 Amabulu or youthful warriors. The king's cattle are also divided into regiments of different colours, of 1000 each and are trained to join in the general dance—(Capt. Gardner's Narrative of his Mission, Voy. a l'Afrique Australe, par A. Delagorgue, 1847. Schröder Grammar of the Zulu (in Swedish).

ZULU, or BLAZO, a town Prussia, prov Silesia, gov and 25 m. S.W. Oppeln. It has walls with two gates; a church, two chapels, a synagogue, townhouse, castle, and hospital, manufacture of lace, tile-works, and mills. Pop. 2829.

ZUMABAGA a town Spain Biscay, prov Guipuzcoa 7 bank Bidasoa, born crossed by a bridge opposite Villaverde 21 m. W. St. Sebastian. It has a parish church, townhouse, primary school, manufacture of linen, brick and tile works, and several mills. Pop. 1057.

ZUNDERT (Gnoort) a vil Holland prov N. Brabant, 10 m. S.W. Breda with Reformed and N. Catholic churches, an hospital and a school, two horses and two cattle fairs. Pop. (agricultural) 1217.

ZUNGOTTI a town Naples, prov Principato-Ultra, dist. and 7 m. S.E. Arzano, on a hill with a collegiate church. P. 1806.

ZULVI an Indian town, U. States, New Mexico, on a small alluvial of the Chisnito-Colonado with houses generally of three stories, built of stone, plastered with mud, and entered from the outside by ladders, and a R. Catholic church built of adobe. Pop. about 2000 engaged to some extent in agriculture, but chiefly in rearing sheep and horses.

ZURGENA, a town Spain Andalusia, prov and 40 m. N.E. Almeria, on the Almanzor. It has narrow and unpaved streets, a townhouse and prison, granary, primary school and a parish church. Tillage and cattle-rearing, the manufacture of household linen, woollen coverlets, and horse cloths, 10 flour and four oil mills, a saltpetre-works, and five baking-establishments, occupy the inhabitants. Eggs are exported to Valencia and Granada and oil and grain imported. Pop. 12 836.

ZÜRICH a town Switzerland, bounded N. by Schaffhausen and grand duchy of Baden, W. Aargau, S. Zug and Schwyz and E. St. Gall and Thurgau greatest length S. to N., 31 m. greatest breadth, 25 m. area, 687 sq. m. Though not properly mountainous, it has on its S. and S.E. frontiers several lofty ridges, remarkable for their parallelism. Except the Lägern and adjoining heights they have their longer axis from S.E. to N.W., and form a succession of terraces, rising gradually toward the N. The most elevated points are the summits of the Hornli and the Schanenberg both in the N. Of the valleys between the ridges the largest is that which in its upper portion has the name of the Gruendelsee thal, and in its lower that of the Glatt-thal. The general slope is towards the bank of the Rhine, which descends part of it directly, and part indirectly, by the Thur, Töss, Glatt, and Limmat. Of the lakes about 40 in. all, the most important are those of Zürich, Greifensee, Pfäfersen Tüfelen and Ketzen. The climate is on the whole very temperate, but mists are very prevalent, particularly on the lower grounds. In some parts the prevailing rock is the Jura limestone, but a more recent formation, consisting chiefly of sand and sandstone in almost horizontal strata, is still more largely developed. One remarkable feature is the immense number and magnitude of the granite-boulders which cover the surface. The minerals are few and of little value. The soil, with the exception of a few favoured spots, is far from fertile and hence, though the arable land is comparatively large and carefully cultivated the corn produced falls far short of the consumption. In some districts a wine of tolerable quality is produced. Wood seldom

forms forests, but occupies many scattered patches and hedgerows. Game is scarce; fish almost as plentiful. In no canton have manufactures made more progress. The great staples are silk and cotton goods. The inhabitants are almost all Protestants, and education is very generally diffused. The government, formerly aristocratic, became decidedly democratic in 1801. The great council forming the legislative body and composed of 213 members, is almost entirely chosen by the male adults of 19 years of age. The executive is exercised by 19 members of the great council. Zürich holds the first place in the Swiss Confederation, to which it furnishes a contingent of 3355 men. Pop. (1850) 250 124.

ZÜRICH (anc. Turicum or Turisum, a town in Switzerland, cap above can beautifully situated at the N.E. extremity of the lake of the same name, where the Limmat issues from it, and connected by railway with most of the towns of northern Switzerland. It is divided by the Limmat into two unequal parts, forming the upper and the lower town, which are connected with their suburbs and with each other by three bridges admitting carriages, besides three open to foot passengers only, one of the former serving also as a vegetable market. The upper town is built wholly on the slopes of an acclivity on the r. bank of the river the lower occupies flatter but still very broken ground on the l. The streets in all the oldest quarters are narrow crooked and dark but considerable improvements have recently been made especially by levelling the old ramparts and thus obtaining a large space for an excellent promenade. The buildings most deserving of notice are the cathedral or Grossmünster on a hill near the r. bank of the Limmat, a heavy massive structure of the

ZÜRICH.—From Richardson's Sketches in Italy Switzerland, &c.

10th or 11th century, in the early Gothic or Byzantine style with two large towers surmounted by spires, and interesting as the place where the doctrines of the Reformation were first boldly and successfully preached by Zwingli the Fraumünster on the l. bank of the river in which is the grave of Hans Waldman the hero of Morat; St. Peter's church, with a fine tower and clock, the townhouse a large massive building, with numerous stone bents above the windows, and the place of meeting of the Swiss diet when it met at Zürich the town library containing 50 000 printed volumes, 3000 MSS and many other objects of interest, the museum with a collection of home and foreign productions, and a rich library. Four arsenals, containing the arms and the trophies of Zürich including a cross-bow said to be the one which Tell used when he shot the apple on his son's head the university occupying the site of an old Augustine convent the new Swiss Polytechnic school, a magnificent structure, on an eminence commanding the city and neighbourhood the theatre and the post-offices. Two public promenades add to the attractions of the city besides a botanical garden and many smaller parks and walks connected with a variety of institutions public and private. Zürich is one of the capitals of Switzerland the Diet or Federal holding its sittings here for two years alternately with Bern and Lucerne and possesses a number of important public establishments. In no Swiss town is a spirit of industry and enterprise more strikingly manifest, the

manufactures of silk and cotton, including dyeing and calico-printing are particularly extensive and successful those of candles, soap, tobacco, paper, leather and machinery are also considerable. Education is amply provided by the university and the Polytechnic school already mentioned, schools of medicine and of arts, secondary and elementary schools of all kinds, deaf and dumb and blind asylums, orphan and several other hospitals. Learned and popular accounts of various descriptions abound. A large number of men are met in philo-sophy, science and art have been connected with the city by birth or residence among others scarcely less celebrated, Bodmer, Bullinger the three Oetters, Lavater, Nägeli, Orelli, Pestalozzi, Balzer and Zwinger. Zürich is of great antiquity and early became a Roman station. In 1219 it was declared a free Imperial city. It was admitted into the Helvetic Confederation in 1801 and again in 1846 after ten years alliance with Austria. The preaching of Zwingli in the cathedral made it the centre of the Swiss Reformation here, during the reign of Queen Mary many English Protestants found a safe retreat, and here Miles Coverdale translated and carried through the press the first English version of the Bible ever printed. In a desperate battle in the neighbourhood in 1445 the Swiss defeated the Austrians; and here also in 1799 the Russians were met and defeated by the troops of the French republic. Population, in 1850 10 768.

ZÜRICH (LAKES) or ZÜRICHSEEN one of the principal lakes of Switzerland, situated in can Zurich, but partly also in Schwyz. It forms a long irregular curve, bending round from S.E. to N.W. convex on the S. and concave on the N. side; greatest length about 27 m.; greatest breadth not exceeding 5 m. greatest depth 600 ft. Its scenery is distinguished not so much for grandeur as for beauty. The mountains around, nowhere exceeding 1700 ft. above the lake, commence in wooded heights and descend to the water's edge in gentle slopes covered with vineyards orchards, gardens, cultivated fields, and verdant meadows, and studded over with country-seats and small villages. A considerable traffic is carried on upon the lake by means of small vessels, and a steamer regularly plies upon it. It is well supplied with fish. Its chief feeder is the Limn, issuing from the south, and the Waldegg, issuing from the north. It discharges itself at the town of Zurich into the Limmat.

ZURYDORF or ZURBACH a vil Hungary on Wieselburg on the Laytha, here crossed by a bridge, 34 m. N.E. Vienna with a chapel surmounted by a tower several schools a saltpetre-refinery, and a trade in corn cattle timber, wax and honey 1 m. 1267

ZURBAH a lake, Afghanistan. See DURAI.
ZURRIKULO a vil Western Africa, horizon, 170 m. W. Katsina. It was once a large place but suffered so much during a revolt, in which it vainly endeavored to throw off the yoke of the Rhaika of Bornu that it has ever since been decaying and is now half deserted. The neighbourhood has in consequence become full of wild animals and the roaring of the lion is frequently heard. The only defence of Zurrikulo is a dilapidated wall.

ZURZACH, a vil and par Switzerland, cant. Aargau 18 m. N.E. Aarau with two churches, a townhouse market-house, and hospital, and two of the most important fairs in Switzerland each lasting 10 days. Pop. 904.

ZURAM a river, Germany rises in S.W. of Bavaria flows circuitously N. past Wertingen and after a course of 40 m. joins the Danube opposite to Dillingen.

ZUTPHEN, a vil and irregularly fortified fortress, Holland prov. Gelderland, 37 m. N.E. Arnhem, r. bank Rhine, where it is joined by the Berkel. It is entered by five gates and the ramparts are planted with trees. It has several spacious market-places a tasteful townhouse, a weigh house, still watch house, barracks, two Reformed churches, and Baptist, Lutheran, and Jesuit churches a synagogue two orphan hospitals, an hospital for old men and one for old women, and numerous benevolent and religious associations, a Latin, a drawing a town, a poor and several other schools,

and societies for the promotion of mules and the natural sciences. Zutphen was at one time a member of the Hanseatic league, and had a considerable foreign trade, which has now ceased to exist. But she still has an active home trade, more especially in sending timber both rough and prepared down the IJssel. The trade in grain and other agricultural produce is likewise considerable and increasing. The only manufactures worth notice are leather. There are also some linens, a pottery-work, and oil and corn mills. Steamers ply on the IJssel. Pop. (1851), 12,223.

ZUUBRAAK, a vil. Cape Colony dist. Zwellendam 140 m. E. Cape Town, on the Beaufort. It is a station of the London Missionary Society and has a mission-house, chapel, school-house, &c.

ZUUDER-KAR, a sea, Holland. See **ZUIDER-KAR**.

ZUZWEIL, a vil and par Switzerland, can. and 11 m. N W N St Gall, with an old parish church and the remains of an old castle. The district around is very fertile, produces much corn, fruit, and wine. Pop. 1069.

ZVENIGORODKU a to Russia, gov and 90 m. S. by E. Kiev cap circle of same name, on the Tzitzak. It has two churches, a parish school and two charitable endowments, and contains 7000 inhabitants. There are sulphur springs within the circle.

ZYORNE a to Turkey in Europe Romsa, 1 bank Drin, on the W frontiers of Servia, 51 m. N. E. Bozsa-Berai and 72 m. N. W. Belgrade. It is surrounded by walls and defended by a citadel has several mosques Greek and E. Catholic churches, two castles and contains 16 000 inhabitants, mostly Serbs who carry on an extensive trade with Memin in wood for fuel and timber. In the vicinity there are mines of lead, and in an extensive valley lying immediately to the N. W., a place called Iusta is occupied by 4000 to 5000 R. Catholicists.

ZWALLUW (LOWEN) a vil Holland prov N Brabant, 7 m. N. W. Breda with a school and church. It is a cultivated place, and contains a number of good houses. Pop. 1240.

ZWAI LEUW (LEZEN) a vil Holland, prov N Brabant, 3 m. N. W. Breda with a town-hall, a school, and a saw-work. Pop. 1340.

ZWART-BERG or **BLACK MOUNTAIN**, a range, Cape Colony which breaking off from the Bokkeveld, stretches E. between divs. Worcester and Beaufort on the N. and Zeebarend and George on the S. forming the basement of the Great Karoo. In some places it rises to the height of 4000 ft.

ZWARTESLUIS, a vil Holland prov Overijssel 9 m. N. Zwolle, on the Zwartewater. It has two churches, and a good trade in turf. Its inhabitants engaged most in seafaring and ship-building. Pop. 1270.

ZWARTSWAL, a vil Holland, prov S. Holland, 3 m. S. Breda, on the Nieuwe-Maas. It is a pretty pleasant place with a church and an annual fair. Inhabitants engaged in fishing. Pop. 1006.

ZWARTKOP a river Cape Colony formed by several streams from the Roggeveld Mountains flows W. R. W. and joins the Great Draken at a point of about 100 m.

ZWILBRUCKEN (Lutz, Apollonia, French, Dusseldorf) a to. Bavaria, Palatinat, pleasantly situated among woody heights, on the Elbe, near its confluence with the Berre 34 m. W. by N. Lander. It owes its name to the two wooden bridges across the Elbe, as well-built, and has a cathedral, and two other Protestant churches a R. Catholic church, in a part of the ancient palace belonging to the dukes of Zweibrücken, a gymnasium and several other schools, a house of correction an orphan and other hospitals, manufactures of woollen and cotton cloth hardware, cutlery, oil and leather, and a trade in corn and cattle. The edition of the classics known by the name of Bipont, was published here in 1779. Pop. 5800.

ZWILSIMMEN, a vil and par Switzerland can. and 27 m. S. W. Bern agreeably situated in a valley at the junction of the Great and Little Simmen with an old church school-house hospital and prison. Pop. 1970.

ZWI LEVDAM or **BWELLEDAM**, a vil and par Cape Colony. The village, on the hilly and verdant district of the Great Veld, on a small stream called the Gersdams, about 3 m. above its junction with the Breede, 119 m. E. by S. Cape Town consists of about 450 neat white houses, partly in Dutch and partly in Dutch style, interspersed with cross and

gardens, and has a church a commodious school house, a library, reading-room and prison. Pop. about 2000.—The **SWIMMERS**, bounded N. by the Great Zwartkops separating it from Worcester, W. Worcester and Oudekops S. the ocean and E. the Gourits, and its tributary Gansba separating it from George area about 6000 sq. m. The coast possesses in Cape Agulhas the most S. point of the African continent, and in Port Beaufort a tolerable harbour which admits vessels drawing 10 ft. and at which there is a considerable export of wool alone, skins hides, feathers, &c. to Great Britain, and of grain butter cattle, mules, &c. to the Mauritius, Table Bay, and Algoa Bay. The interior which is mountainous in the N. and slopes gradually toward the coast is traversed centrally N. W. to S. E. by the Breede, and has much good pasture-land, on which stock thrives well, but often suffers severely from drought in summer.

ZWENKAU a to. Saxony circle and 10 m. S. S. W. Leipzig r. bank of the Elster. It is the seat of a district-court, and has a trade in shoemaking, basket making, manu- factures of woollen fabrics and of saltpetre, extensive tile fields, and in the neighbourhood powder-mills. Many of the inhabitants are engaged in agriculture. Pop. 3121.

ZWESTEN a vil. Hesse-Cassel. Near Hassenlopple Fritslar on the W. Elbe, with a parish church and several mills. Pop. 1185.

ZWETTL, a to. Lower Austria, at the confluence of the Great Kamp and Zwetzel, 24 m. N. W. Krems. It has a Cistercian abbey with a fine old Gothic church and a library rich in MSS. an educational institute, an hospital and a theatre manufactures of woollen, linen and cotton goods and a trade in hemp, flax provisions, and wood. Pop. 2150.

ZWIKAU a to. Saxony, 69 m. N. S. W. Dresden, 1 bank Mulde, cap circle of its own name and connected by railway with Dresden, Leipzig and Ostara.—The town stands in a beautiful valley watered by the Mulde, here crossed by three bridges, and between the two hills Windberg and Brückenberg. It is the seat of several district courts, has a town-school a townhouse a beautiful church with tower 314 ft. high and the largest bell in Saxony a fine general infirmary gymnasium with library, a training school for the education of officials for coal-mining, three houses of correction and workhouses classical manufactures, coal-burning machine-building iron founding wheel-spinning cloth-making, weaving, paper oil, walk and flour mills, manufactures of porcelain and glass, &c. It lies in the centre of a rich coal-district and in its vicinity are about 200 furnaces for the burning of coke. Pop. (1864) 23,432.—The **CINCLA** forms the S. W. portion of the kingdom. Its surface is very uneven. Though partly fertile, the extent of agriculture carried on is unimportant. But all the more important are the mining operations and the manufactures of cotton, lace, glass, enamel and woodwork. Pop. (1861), 827,245.

ZWICKAU or **ZWIK**, a to. Bohemia, circle and N. W. Bautzen near Bautzstadt with a church a townhouse, numerous cotton-mills and manufactures of glass beads. Pop. 3538.

ZWIESSEL, a market to. Lower Bavaria, on the Black Rogen 31 m. N. W. Passau with two churches a town house, manufactures of articles in wood numerous breweries, and a trade in cattle. Pop. 1245.

ZWIJNDRECHT a vil. Holland prov S. Holland, 10 m. S. E. Rotterdam, on the Maas, opposite Dordrecht, with two churches, three boat-building yards a brewery saltpetre, and several mills. Inhabitants chiefly engaged in gardening. Large quantities of vegetables are sent over to Dordrecht and exported to passing vessels. Pop. 2016.

ZWIINGHBERG a to. Hesse-Darmstadt, on the Bergstrasse, and on the Main and Neckar railways 10 m. S. Dusseldorf. It is immediately under the woody Melibokus, which is usually ascended from it. Pop. 1445.

ZWITTAU, or **ZWITAWA** a to. and river, Austria, Moravia. The town, circle and 38 m. W. N. W. Olmütz prettily situated near the source of the river is surrounded by walls and ditches, well built and has three churches, and extensive manufactures of woollen and linen cloth. Pop. 8599.—The river flows S. to Brinn, and joins the Lahn Schwarzau after a course of about 60 m.

ZWOLLE, a to. Holland, prov Overijssel, 61 m. S. E. S. Amsterdam, on the Vecht, and communicating by a canal with the IJssel. It was formerly a fortified but is now an open town,

the last remains of its walls having been levelled in 1843, and the whole converted into pleasant walks. The town is surrounded by a broad ditch filled with clear fresh water and it is intersected by three canals, across which are numerous bridges of wood and stone. It has several open places called market-places, of which the Groote-markt, in the centre of the town is not only the finest but one of the most beautiful in Holland, surrounded as it is with elegant houses. It possesses a beautiful town-hall, a government-house, court of justice, prison, weigh-house, watch-house, three Reformed and eight other churches, orphan, female and general hospitals, Latin, industrial drawing, poor, and numerous other schools, a geographical and historical, two literary, and several benevolent and religious societies. Zwolle has a considerable transit trade, for which its position and means of communication in all directions render it well suited. It likewise has three boat-building yards, four taneries, two salt-works, seven rope works, two breweries, dye-works, and print-works with manufactures of soap, vinegar, calico stockings, hats, needles &c. It is the birth-place of Turberv the painter. Thomas à Kempis resided 64 years and died in 1471 in the convent of St. Agnes, outside one of the town-gates. Pop. (1861), 18,028.

ZWÜNITZ, a tn. Saxony, circle Zwickau, on the Zwiltau, 12 m S W Chemnitz. It is the seat of a local court, and has machine cotton-spinning, paper making, weav-

ing, stocking-working, very excellent lace-working, a forge, and tile-work. Pop. (1864) 2617.

ZWYNDRICHT, a vil and com. Belgium, prov. E. Flanders, 3 m. W Antwerp; with three breweries, two building-yards, and a flour-mill. Inhabitants chiefly engaged in cattle rearing. Pop. 1992.

ZYDAGZOW a tn. Austria, Galizia, circle and 15 m. W E. Bory on a river of same name. It is surrounded towards the N. by extensive forests and has two Greek churches.

ZYFEN a vil. Switzerland, cant. Basle in the Liesthal, a narrow valley extending from Mount Wasserfallen to Bubendorf. It has a church finely situated on a steeped height. Its inhabitants are engaged extensively in ribbon weaving in agriculture, and in the cultivation of the vine. Near it, and situated on a rock in a lateral valley, is the fine castle of Wildenstein. Pop. 910.

ZYGHUR, or **JAYGURA**, a tn. Hindustan, prov. Bejapoor dist. Concan, about 14 m. above the mouth of a river in the bay of same name, 118 m. S by E. Bombay. The river at its entrance about 1 m. broad, is defended by a fort, and lined by straggling villages up to the town which is a place of considerable size and also defended by a fort. On the bay at the entrance of the river there is a haven inside which vessels of large size may be completely sheltered at all seasons.

ZYTOMIE a tn. Russia. See JZOMIE.

ZYWIECZ, a tn. Austria. See BAYWICZ.

SUPPLEMENT

TO

THE IMPERIAL GAZETTEER.

JABLONICA

JABLONKA, a town in Austrian empire Hungary on Upper Kuzna 6 m. S.W. Bradka, at the confluence of the Rava with the Myra. It contains a castle, several mills, and a trade in hemp and flax. A battle was fought here in 1702 between Rákóczi and the Imperialists. Pop 1950.

JABLONOW, a town in Austrian empire Galicia, circle and 7 m. N. Gortkow, with fine gardens, a large manufacture of sal-ammoniac, and 1530 inhabitants.

JABODAH, a town in India, Malabar cap of a small native state of same name, 93 m. N. E. Maroda. It is beautifully situated in a valley at the E. base of a range of hills and is surrounded by a mud wall with circular bastions of masonry. To the S. of the town on the bank of a fine lake stands the rajah's palace. His small territory, bounded N. by Rana-warra N. E. Holkar's Dominion, S. E. Angaharra, S. Alor Malpore, and W. Sondia's Dominion and Dohad, has an area of 1348 sq. m. a revenue of £14 458 and a pop of 134 104.

JACKSON three places U. States.—1. A town in cap state Mississippi on bank Pearl River at the junction of the Southern Mississippi and the New Orleans Jackson and Great Northern railways 40 m. E. Vicksburg. It stands on a flat irregularly built, and contains 10 churches, an elegant state-house, a court house and county buildings, a state lunatic asylum, a state-prison and asylums for the deaf and dumb and for the blind. By the Pearl, which is here navigable, about 40 000 bales of cotton used to be annually shipped. Pop (1860) 8199.—2. A village, Louisiana, on the S. side of Thompson's Creek 25 m. N. Baton Rouge. It contains the state lunatic asylum and a seminary college, which belongs to the Methodists, and has 9 professors, 95 students and a library of 200 vols. Pop about 1000.—3. A town in Michigan cap of Jackson, near the source of the Grand River and at the junction of the Jackson branch of the N. Michigan and the S. Indiana with the Michigan Central railway 76 m. W. Detroit. It contains 10 churches and the state penitentiary and possesses, among its industrial establishments woolen, soap and candle agricultural implement and carriage factories, a machine-shop, a foundry, a tannery, a brewery and plating and flour mills. There are seams of bituminous coal in the vicinity. Pop 4799.

JACKSONVILLE, a town in Illinois cap of Morgan pleasantly situated in a rolling fertile prairie, on the Great Western line of railways, 200 m. S.W. Chicago. It is of pleasing appearance, and contains six churches, a college with 7 professors and 70 students, a Methodist female seminary, three other academies, a mechanics institute and the state-asylum for the deaf and dumb the blind and the insane. The manufactures consist of cotton, yarn, all leather ploughs and iron castings. There are also several flour and saw mills. Pop 5698.

JADRIN, or **JADRIN**, a town in Russia gov. and 92 m. Kazan, cap. circle of same name, on the Sura, close to the E. frontier of Nijne Novgorod. It has three churches, a circle-school and two charitable institutions, and contains 2078 inhabitants.

JAFENPATAM or **JAFNA** [add. a district, island, and town Ceylon].—The district consists of an island or rather peninsula, which forms the N. extremity of Ceylon, North Lat. 6° 45'—10° 11'.

JAFENPATAM

and may be more properly said to be connected with it than separated from it by an extensive and bank on which the water is so shallow that it is usual to ride across on horse back. This peninsula is of very irregular shape, but bears some resemblance to a right-angled triangle, of which the base faces the N., another side the E., and the hypothenuse the S.W. Among its distinguishing features are the two long and narrow lagoons by which it is penetrated and the uniform flatness of the surface, unbroken by a single hill and scarcely varied by an undulation of more than a very few feet. In common with the W. coast of Ceylon, it has been undergoing a gradual upheaval and extensive fields of madrepore and limestones have at no distant period been elevated in close proximity to the shore. In the shallow estuaries thus formed great quantities of the finest salt are deposited, and constitute one of the chief riches of the district. Another production, which rivals this one in value and possesses far higher attractions, is the palmyra which grows in such profusion as to form the characteristic of the landscape, extending for miles in great tops and forests. The appearance and growth of the beautiful tree are thus described by Sir J. E. Tennant: 'Unlike the coconuts palm, whose softer and more spongy wood bends under the weight of its crown of leaves and fruit, the timber of the palmyra is compact and hard, so that the tree rises vertically to its full altitude without a curve or deviation and no object in vegetable nature presents an aspect of greater luxuriance than this majestic palm when laden with its huge clusters of fruit, each the size of an ostrich egg, of a rich brown tint fading into bright golden at its base. Its afterwards gives a calculation by Mr. Kerrison the government surveyor who, taking the area of the peninsula at 700 sq. m. and assuming that 1/4th of the land is devoted to palmyra finds that at the rate of 200 trees to an acre, which is far below the ordinary rates, the number of palms in the district alone must be close upon 7 000 000 the edible product of which supplies one fourth of the food of 320 000 inhabitants. Mingled with palm-trees the forests present the usual undergrowth of jungle brushwood, umbrellas, mustard trees &c. The soil is naturally poor and the difficulties of culture are greatly increased by the water which can only be obtained from wells. The industry of the inhabitants, however, was not to be baffled and by means of skilful and laborious irrigation a large quantity of rice is grown while gardens, formed of artificial mould produce mangoes, oranges, citrons, tamarinds, and all the ordinary fruits of the climate. Black cattle also are pastured in large numbers and the finest sheep in Ceylon are reared on the dry plains overlying the limestones and coral rock on the N. and W. coast. The grand staple of the district for export is tobacco which bears a high name and is now sent almost exclusively to Travancore, the rajah of which employs a resident agent to purchase the produce from the growers. This crop it is said is the staple of Jaffna agriculture, maimoon as on its breadth and success the extent and excellence of all other crops mainly depend. It cannot be raised without high preparation; but therefore these less exhausting crops are obtained in succession without additional manuring.—The town of Jaffna, of the above district, situated on the W. shore of the peninsula, is thoroughly

Dutch in its aspect and architecture. The houses consist of a single story but are large and commodious, with broad verandahs, lofty ceilings, and spacious apartments. Every building inside and out is as clean and showy as whitewash, paint, bright red tiles, and brick floors can make it. Most of the houses stand detached in inclosed gardens filled with fruit trees and flowering shrubs. The streets are broad and regular and are lined with surra trees, whose leaves and yellow flowers afford a beautiful and agreeable shade. The fort a panagion built of blocks of white coral, and surrounded by a moat is the most perfect little military work in Ceylon.

It contains a residence for the commandant an old church in the form of a Greek cross, and several other excellent buildings. The native town is occupied almost exclusively by Tamils and Moors, who as tradesmen and dealers are distinguished by intelligence and industry. The weavers manufacture a substantial cotton cloth which is dyed and ornamented by calico-printers and the goldsmiths make chains and rings as perfect in execution as tasteful in design though they possess only a few rude tools. Another flourishing branch of industry is the crushing of the coco-nut for its oil by a very primitive process. Every person in Jaffna appears to be more or less busy. The basins are full of activity and stocked with a greater variety of fruits and vegetables than is seen in any other town in the island. At the season when labour is not in demand at home numbers go off to trade in the interior in carry struffs, betel-leaves, and other produce, or resort annually to the south where they find lucrative employment in repairing the village tanks, a species of labour in which they are peculiarly expert. With all this industry the habits of the natives are licentious and disgusting in the extreme.

JAGIELNICA is in Austrian empire, Galicia, circle and S.W. 4 versts east of same name with manufacture of tobacco and a general trade. Pop. 2,718.

JAJTSA is in Turkey in Europe, Roumelia, in the valley of the Verban, 60 m. N.W. Thessa Serai. It is a place of considerable strength, and was once the residence of the Verban kays. It contains 2000 inhabitants chiefly engaged in the manufacture of saltpetre.

JAJHPUR, is in India Nagpootana state (Indo-poor or Mewar) 194 m. S.W. Agra. It consists of a town which is a large well built and fortified and possesses a well-supplied bazaar and a considerable trade. It is situated on a mountain overlooking the lake and is enclosed by two concentric ramparts, each with a good ditch and a number of round bastions. Thus fort guards the entrance of an important pass into Mewar from the lowlands of Bundee.

JAKOBSHAVN is a dist. Greenland W coast lat 69° N in the northern isopetorate. It stretches along the coast for about 30 m. and inland to the permanent ice about 10 m and is intersected by branches of the Ice Fiord and by other two small fiords. There are very few islands on the coast. The colour of Jakobshavn lies about a mile from the mouth of the Ice Fiord, fanned from the turbulent tides for the plentiful supply it contains of marine animals, which renders it a never-failing ladder for a relatively large number of inhabitants. The commercial buildings lie upon a small narrow harbour in a position very much closed in but from the church and other dwellings a view is obtained over Disko Bay. Jakobshavn may be said to be the pleasant abode in North Greenland, partly on account of its position and remarkable environs partly because it lies on the road along which almost continual traffic takes place between the other colonies and partly because here the largest number of Danish families is gathered together. The colony was founded in 1741 by a merchant named Jakob Severin, who had a monopoly of the Greenland trade. There is only a little whale-fishery carried on. Pop. 314. The district likewise contains the following inhabited localities—Samernek, Pakinok, and Kiskomak. (Grønland geographisk og statistisk beskrivelse over Aftenen 1854.)

JALNA or **GALNA** is in India, presid. Bombay, Can. delish, 150 m. N.E. Bombay is a small place, deriving all its importance from its fort situated on an isolated hill, which, though not lofty, is rocky and precipitous. The summit of the hill is fortified all round, and on the side towards the town, where the ascent is least difficult in some parts two and in others three walls of great masonry furnish additional defence.

This place was besieged by a British force in 1804, and was on the point of being stormed, when it was found that the garrison had evacuated it.

JALOUN is a dist. India Bundelcund, between lat. 25° 35' and 26° 25' N, lon 78° 45' and 79° 35' E. It is bounded N. by Seeloda a Dominions and dist. Etawah N.E. Cawnpore S.E. Humeerpore S. Jhansi and Tahera, and W and N.W. the territories of Duttas, Sampror, and Gwalior; greatest length N. to S. 70 m. breadth 60 m., area, 1878 sq. m. When it came into British possession it was in a wretched condition and a large portion of it seemed fast returning to a state of nature, but considerable improvement has since taken place, and little land left for cultivation now remains unoccupied. Pop. 248,297. The town, of same name, cap. of the dist., is 110 m. S.E. Agra.

JAMAICA [add.] Exports have been made in recent years to grow cotton in the island, but the great difficulties to be contended against are the uncertainty of the seasons, and an inability owing to the inactive habits of the population to procure the requisite labour at a moderate cost and at the moment it is required. The latter constitutes the great obstacle to all undertakings requiring the prompt application of adequate labour which can only be secured by paying excessive wages so much beyond the ordinary rates as to make the undertakings unremunerative. Some progress has been made in the cultivation of the simchona tree. Sugar however continues to be the principal staple produce. The cultivation of coffee by the peasantry and small proprietors has been diminished by high prices, and during the first half of 1863 the export nearly doubled that of the same period of 1862. The value of the chief articles of export is shown in the following figures for the years 1860-2—

	1860	1861	1862
Coffee	£ 2	£	£
Ginger	112,945	1,195	126,41
Pineapple	1,411	1,206	28,14
Rum	38,961	52,114	98,123
Sugar	20,486	110,000	164,537
Logwood	140,383	163,184	675,414
	21,383	2,000	41,910

The total value of the imports and exports in the same years was this—

	1860	1861	1862
Imports	£179,855	£1,080,364	£1,141,061
Exports	1,225,6	1,24,014	1,124,412

The shipping trade of the island is shown in the following table of the vessels entered and cleared at the various ports in the year 1862—

Ports	Entered		Cleared	
	Vessels	Tons	Vessels	Tons
Kingston	311	29,000	214	48,016
Montpelier	—	—	1	20
Port Antonio	—	—	9	5,001
Port Maria	—	—	1	1,700
Port Royal	10	2,400	28	1,603
St. Ann's Bay	—	—	13	2,831
Rio Bueno	3	944	21	5,411
Spanish Town	11	21,500	11	2,100
Montego Bay	41	7,400	42	7,156
London	—	—	8	1,019
St. Vincent's	21	4,600	43	31,297
Black River	10	1,000	10	17,004
Black Harbour	14	5,971	23	7,928
Port Antonio	1	260	—	—
Total	476	114,848	221	114,474

The public revenue and expenditure in each of the three years 1860-2 were as follows—

	1860	1861	1862
Revenue	£208,180	£207,007	£201,088
Expenditure	200,200	274,007	202,402

The public debt amounted in 1862 to £766,182 on which £20,000 was paid for interest.

The religious and educational condition of the island now gathered from the following figures for the year 1862—

	No. of Catholics (Ch), etc.	No. of Mission.	Accep- tation- dollar.	Admission.	Scholar- ship.
Church of England	24	46	48,074	21,490	8,112
Western Mission	2	24	33,840	31,110	8,171
Unit. Methodist Free Ch.	1	6	3,000	1,300	40
Anglican Episcopal Union	57	4	27,940	26,120	9,430
Methodist Wesleyan	10	8	3,140	1,50	1,5
London Mission Society	1	4	7,30	6,20	1,14
Nonconformist	1	14	10,60	1,650	1,650
Roman Catholic	7	3	2,570	1,000	100
Jewish Synagogue	1	1	12	100	20
United Presbyterian	1	1	12	100	20
American Mission	6	6	1,800	1,000	21
	374	214	120,643	127,970	28,61

In 1862, 2000 immigrant coolies from Calcutta, and 800 Africans, mostly from St. Helena, were landed in the island.

In October 1885 an insurrectionary rising of the natives occurred at Mount Bay and was supposed to be a premature outbreak of a wide-spread conspiracy. Great atrocities were perpetrated but the movement was speedily and energetically suppressed by the authorities. Area, 6400 sq m pop. (1881) males 218 511 females 227 743 total 441 254.

JAMBANANGO, a town 8 W Africa, Kambundu country, territory Gambia; lat 14 25 S lon 18 E. It stands on a wide plain embosomed among lofty mountains, is surrounded by a palisade and a ditch, and contains 8000 inhabitants, who are chiefly from the Nyemba-Gambella country and are employed in agriculture and grazing.

JAMBI [Jamb.] a state, river and town in the N.E. of Sumatra in the Indian Archipelago. The state which lies wholly within the alluvial plain extending from the central mountain-chain to the Straits of Malacca, is bounded N.E. by the sea, having as front the group of islands which nearly block up the S.E. entrance into the strait; N.W. the state of Indragiri, E. the state of Komatik and Muntakaber and S.E. the forests thickly populated by the wild race of the Kabu. The surface towards the sea-east is low swampy and subject to inundation but as it recedes from it rises in an inclined plain towards the great central chain, and becomes proportionally elevated and dry. The swampy portion, extending nearly 80 m into the interior is uninhabited and uninhabitable and hence, during an ascent of the river for 50 m, only 12 villages were counted, containing in the whole 118 houses and thus indicating an aggregate pop. of not more than 700 souls. In the higher ground the population is believed to increase in density but very little is known of it.

The river, formed by numerous streams which turn their courses in the mountain-chain running parallel with the W coast of the island before it is 50 m from the sea, and enters it by two mouths. The more easterly and larger of the two which is in lat 1° 30' S, has a shallow entrance, the more westerly though much smaller is deeper and better adapted for navigation. The river which meanders by the W branch of the river is about 100 m above its mouth extends nearly three-quarters of a mile along both banks the natives occupying the whole of the right bank, while the Arabs and other settlers confine themselves to a portion of the left. Many of the houses, especially in the Arab quarter are neatly kned and partitioned with planks and either roofed with tiles of excellent mass feature, or thatched with gounts which is very durable. The far greater part of the dwellings are mere huts of mats and palm-leaf leaves erected on posts in the usual Malay style. Besides the kinds of houses already described there is a third description erected on rafts composed of trunks of trees clumsily put together. During the periodical inundations these rafts, with the houses upon them, are movable, and rise or fall with the level of the river; but in the dry season are usually lodged on a muddy flat and become stationary. At the town the river even in the dry season has a depth of 8 fathoms and a width of 450 yards. The only interruption to the navigation is at a short distance below where the depth is only 8 feet. Were the channel here deepened there would be free access to and from the sea with a clear depth of 12 to 15 ft.

JAMES, a tn. W Africa, Gold Coast, lat 5 50' N lon. 16° W. It consists of a fort situated on the rocky promon-

tory of Accra, and of a town, which, spreading to the N.E. and S.W. contains some good houses belonging to British merchants, and a considerable number of native huts forming several narrow streets. The principal export is gold brought from the interior of Ashantee immediately to the F. of the fort are the ruins of the Dutch fort of Greavesburg, picturesquely situated on a cliff about 50 ft high and about 3 m farther in the same direction as the Danish castle of Christiansborg.

JAMES an isl. 8 America, Ecuador belonging to the Galapagos group, situated in the Pacific, on the equator about 600 m W of the continent, is like the rest of the islands of volcanic formation, and is, with the exception of some portions of granite and sandstone, entirely composed of lava.

It is more fertile than most of the other islands and was in consequence a favourite resort of the buccanniers. On the W side at the foot of a remarkable conical peak which is its culminating point, and rises to the height of 1200 ft there is good anchorage in 14 fathoms, a little inland there is an old crater filled with salt-water, from which salt is easily obtained.

JAMES [Jamb.] a river U States, which formed near the centre of Virginia by the junction of the Jackson and Cowpasture rivers successively S.E. and E. to the Blue Ridge, forces a passage through it and resuming its first direction, retains it till it reaches Lynchburg. Here it bends sharply round to the N.E. and then changes to the S.E.

It has still this direction when it arrives at Richmond where its channel becomes obstructed by rapids and numerous small islands. After leaving Richmond it pursues a somewhat devious course which it however in the main S.E. and finally falls by a broad estuary into the N part of Chesapeake Bay between Wolloughby Point on the one side and Old Point Comfort on the other. Its whole length is about 430 m. A stretch of 130 tons navigable to the head of the tide-water, 120 m from the sea. It is the largest river of Virginia which has its course wholly within the limits of the state.

JAMNJI a river India, which rises in the N. of the Saurashtra and Nerbada territory flows N into Bhundeloud and Sindhia's Dominions, and after forming part of the boundary between the two, joins the Betwa on its right bank. The whole course is about 90 m.

JAMOU a tn. India, Ghilghat Singh a Dominion, near the Punjab frontier among the mountains of the S range of the Himalaya, 90 m. N.E. Lahore. It occupies both sides of an alluvial of the Chenab, the town and palace standing on the W and the fort on an elevated height on the E bank. A beautiful and extensive pleasure-ground, and the lofty and whitened walls of the palace and fort, give the place at a distance a very striking appearance. The town consists of numerous streets, and has a large wall built and well-supplied beneath the palace at once spacious and handsome; the fort, though great labour and cost have evidently been expended upon it, is more ornamental than available for defence, as an adjacent height of easy access commands it. There are several extensive ruins in the vicinity. Pop. 1860 7703.

JANESVILLE a tn. U States, Wisconsin esp. on Rock on both sides of the Rock River and on the Milwaukee and Mississippi, and the Chicago and North Western railways, 32 m S.E. Madison. It stands partly on a height, and partly on a flat between it and the river, and contains a worthy house overlooking the height, nine churches an academy a female seminary and the state-eyrth for the blind. The chief industrial establishments are planning flour and saw mills, a brewery carriage factories and machine shops and the trade greatly developed since the construction of the railways is important. Pop. 1860 7703.

JANOSH AZA a tn. Austrian empire, Hungary, co. Eisenburg 26 m S.E. E. Steinmanger with an important trade in poultry, clostrum, and agricultural produce, and 2744 inhabitants, mostly R. Catholics.

JANOW a tn. Austrian empire, Galicia, circle and 10 m. N.W. Lemberg esp. dist. of same name, on a lake, was once the favourite residence of the Polish king John Sobieski. There are remarkable caverns in the vicinity. Pop. 1100.

JANOW a tn. Austrian empire, Galicia, circle and 24 m.

S.E.E. Tarnopol on the Bored with a baronial castle a polish refinery and 2052 inhabitants

JAOI, a seaport in Western Africa state Bar-an, situated at 4 m. N W of Port Bahrat, and about 26 m S E of Gurea. The bay which here under the coast is so shallow that ships drawing more than 8 ft. of water cannot approach the land nearer than 3 miles. The principal exports are gum resin rice ground nuts in small quantities, honey cattle, hides ivory

JARMERITA, a tn Austrian empire, Moravia, circle and 16 m N W Zaany on a stream of same name with a palace belonging to the prince of Hainitz, with fine gardens a library picture gallery and theatre one of the finest parish churches in Moravia and four annual fairs and cattle markets. Pop. 8173

JARUSIAV [add] a tn Austrian empire Galicia, circle and 18 m. N by W Przemysl, cap dist of same name in a beautiful and fertile country, 1 bank San was once strongly fortified is the seat of several important public offices, has a handsome church a high and an ordinary school a Dominican and a Franciscan monastery an infirmary founded in 1498, manufactures of linen cloth rascogio and wax candles and an active trade in honey wax linen yarn Hungarian wine and corn The yearly markets, once very important have fallen off considerably Pop. 8774

JARVIS, an Isl Pacific Ocean lat. 0° 23' S lon 159° 57' W is about 2 m long by 1 m wide stretching E and W, and containing about 10 m. N. of it is another Isl 17 1/2 ft. from reef or shore platform 900 ft. wide, and from 12 to 28 ft high. The land slopes gently from all sides towards the centre, which is only 7 or 8 ft above the sea level There are considerable deposits of guano, but the island affords no fresh water

JARYZOW (Old and New) two places, Austrian empire Galicia, circle and 13 m N E. Lemberg They form a single parish lying on a stream of same name between extensive moors and contain 2750 inhabitants, employed in manufacturing woollen cloth and carpets

JARENA, a tn Austrian empire Banat Military Province 78 m. E. S. E. Karlska 1 bank Save opposite to the mouth of the Lina It has a R Catholic and a Greek church, bad live yards, and a large trade with Bosnia, and contains 2410 inhabitants

JASLOVIL, a tn Austrian empire Galicia circle and S W Cortkow cap dist of same name with a cold water cure establishment and the picturesque ruins of a strong castle. The Tartars were defeated here in 1084 P. 2234

JASRI [add] a tn Turkey in Europe, cap Moldavia, on the Balkan about 10 m N. of r bank Frutis lat 47° 5' N lon 27° 40' E It stands partly on the slope of a hill and partly on a plain, which though fertile, is rendered unhealthy by swamps and stagnant ponds and is irregularly built, consisting for the most part of narrow and crooked streets in which large and splendid mansions, looking like palaces stand side by side with mean houses and wretched huts In the upper part of the town in particular and else where many of the houses have large courts and gardens attached to them Successive conflagrations in 1783, 1827 and 1841 having laid the town in ashes, destroying all the wooden houses and leaving only 300 built of stone standing several long and spacious streets have been formed. Most of them however are either half paved or not paved at all and the consequence is, that floods of dirt in summer and deep mire in winter render them in a great measure impassable at least on foot, and wheeled carriages of some kind are indispensable for locomotion The principal public buildings and establishments are the palace of the prince an extensive pile, containing not only his residence, but the municipal bureau and barracks seventy Greek churches among which only the cathedral and the church of Three Saints so called because dedicated to St Basil, St. Chrysostom and St. Gregory Theodosius, deserve particular notice a Protestant a R. Catholic, and an Armenian church a number of synagogues ten monasteries, several palaces of the grandees or boyars the public library the museum the normal school the St. Michael's academy the gymnasium the industrial school, the infirmary, the national theatre, and several hospitals military Jewish, and fowling. The shops kept principally by Jews, and situated for the most part in

the principal street, are large and well stocked with articles of foreign manufactures, woollen cotton and silks and hard ware and cutlery, fiery goods &c The town itself seems almost totally devoid of important manufacturing establishments. The environs of Jassy, laid out chiefly in vineyards and gardens, and dotted with villas some of them with fine parks, are very beautiful. Pop. 70,000, of whom 30,000 are Jews

JASWINY a tn Austrian empire Galicia, circle and about 20 m E N W Tarnow with a parish church a baronial castle and a model farm 1 sq. 1800

JASZENA, a tn Austrian empire, Hungary co. and about 20 m N E Neusohl on a stream of same name, with mineral springs, valuable from mines with extensive iron works, and 1000 R Catholic inhabitants

JAUI NAIL a tn India Mysore a Dominion, prov. Assamlat 200 m E N E Bombay It consists of a town and a cantonment—The town situated on the Jamnah opposite to Khaderabad though an old and decayed place has still a pop. of 10,000, of whom about a fifth are Mahomedans, and possesses, among its houses, many built of brown stone three or four stories high, and provided with verandas and balconies. The streets are for the most part very narrow The manufactures are almost confined to silks which are chiefly exported to the upper Mahratta country; the trade in grain since extensive is now limited—The cantonment situated on a gentle slope, and bounded on one side by the Goolacampus has accommodations for a troop of European horse artillery a regiment of native cavalry and three regiments of native infantry The climate is well adapted for horticulture Pige grapes peaches and straw berries are all excellent in their season, and most European vegetables grow in great perfection

JEBEL-AMOUN a mountain range N Africa Algeria, which, continuing that of the 1 led Bidi Shekhi, with which it becomes linked near the village of Bin Allem stretches N E as far as Fati Brand and the Jebel Ghesh el Ashi with a length of about 17 m and an average breadth of 7 m. Its culminating point Jebel Gaila, has a height of about 5300 ft. Partly in the inner valleys, and partly from the N W and S E slopes, issue numerous springs which maintain so luxuriant a vegetation of plants and trees, that all the slopes and valleys are densely clad in green. Many parts of the valleys are laid out in beautiful gardens, vineyards, and corn-fields, the produce of which usually suffices to meet the wants of the inhabitants though in years of great drought they are compelled to obtain dates from the south and corn from the Tell The Meizi at 1 ed Baidi the largest river of Algeria, has its source in the N W slope of this range near the village of Baidi the S. slope furnishes the sources of the Yorra and the Grisha, which by their junction, form the Jedd the most important river of S. Algeria, though its bed in the hot season becomes partially dry The inhabitants of Jebel Amour belong to the tribe 1 led Amoor, which has no fewer than seven subdivisions, and are partly stationary partly nomadic the number of each subdivision, understood to be nearly equal, is about 13,000 In war they can raise a force of 2000 foot and 600 horse their wealth consists in herds of sheep horned cattle, and camels. They are of pure Arab blood and speak Arabic, and speak genuine Arabic

JEBEL-BAHARI a mountain range N Africa, Algeria is an E continuation of the Jebel Amour, and stretches along the Solgha Zahrez and Hodna with a regular descent till it approaches the town of Biskra Though several roads pass over the range, it remained till recently almost unexplored It has, however, many claims to notice Its higher slopes and valleys are finely clothed with forest trees, and on its plateaux are seen not only well-cultivated corn fields, but productive gardens well stocked with fruit-trees, among which the fig is conspicuous. Everywhere numerous springs and fountains water into the valleys, and occasions of richly leaping down in cascades, contribute to form a very picturesque scenery Among the heights many Roman remains lie scattered, showing how well the masters of the world could appreciate the beauties and resources of the Jebel-Bahari. The inhabitants belong to the Arab tribe of Uled Kayl and are estimated at 20,000 souls.

JEDDO in Japan. See YKO

JEFFERSON CITY [add], a tn U States, cap. state

MISSOURI On the right bank of the Missouri River and on the Pacific railway 100 m W St Louis. It has an elevated but somewhat unvaried site, commanding a fine view of the river and of the cedar covered cliffs on the opposite shore, and contains a handsome stone-house built of stone, a governor's residence, various churches and a state-penitentiary. The manufactures consist of wooden and iron ware, flour, carriages &c. Pop. 18800. 2082

JEFFERSONVILLE, a tn U States, Indiana on the Jeffersonville and Indianapolis railway and at the head of the Falls of the Ohio, nearly opposite Louisville to Kentucky. It occupies the elevated site of old Fort Steuben commanding a magnificent view and contains the state-prison. The Ohio Falls which descend 22 ft. in two miles, give an unlimited supply of water-power. Advantage has been taken of it to establish various mills and manufactures. Among the latter are agricultural implements carriages steam-engines, and brass and iron castings. Pop. 18800. 4020

JEFFREY or **EVREY**, a tn Russia gov and 80 m N S E Tula. esp. cereals of same name, on the Krasnovodsk. It contains six churches, a circle and a parish school, a charitable endowment, several manufactures, and a large annual fair. Pop. 7057

JELAK a tn Western Africa. Hausa states, prov. Kebbiri on a supposed affluent of the Niger 70 m S W Sokoto. Though greatly declined from the importance which it possessed when the empire of Gando was flourishing it continues to be the great entrepot for a coarse kind of coloured silk which is imported from the north and not withstanding its very inferior character is in great demand by the natives for adorning their leather work. Its weekly market is well frequented.

JELHO or **FEHO**, a tn China, prov. Pecheli near the Great Wall on the frontiers of Chinese Tartary 110 m N E Pekin. It stands in the centre of the famous hunting grounds to which the emperor annually resorts, is surrounded by walls which are upwards of 4 m in circuit, and contains a fine imperial palace and several temples. Among the latter is one of great magnificence, built on the model of one near Lhasa, and adorned with 500 gilded statues of deceased lamas.

JELIRUM a tn Persia, prov. Fars 83 m S W by S Shiraz. It is surrounded by walls of recent and substantial construction about 3 m in circuit. Many of the houses of which there are more without the walls than within possess turret towers or places of defence. The staple trade is tobacco for which Isfahan is a principal mart. The other articles are British and India cottons imported from Teheran, groceries and spices also imported, dates, and rice. Fruit is abundant and cheap, and a considerable quantity of raisins is exported to India. Pop. about 1500

JELI, **JALI** or **JALIKUM**, a tn India, presid. Bengal dist. and 45 m S Midnapore 1 bank Suoalee. Its only office of any consequence is an ancient mosque. On the opposite bank of the river there is a ruined fortress of great extent but no construction.

JELINGHUR, a river India, presid. Bengal, which parting at the town of same name from the Jodai or great E branch of the Ganges, flows very sinuously S W for about 95 m and at the town of Noddee unites with the Bhag river in forming the Moolgity.

JENNO (Jen), a tn Austrian empire Hungary co and 26 m N by E Arad on the White Koros cap dist. of same name with a court of justice, an infirmary, several handsome buildings, and a distillery. Pop. 3008

JENKINS, a tn India, Burdwan dist. Talou 70 m S E Calcutta. It contains a large Hindoo temple, which is in good repair and was possessed of great wealth till it was pillaged by the Dacoits or gang robbers.

JEPHAN or **JEPIAN**, a tn Russia gov and 45 m S E Tula, esp. cereals of same name on a height above bank Don. It has four churches, a circle and a parish school, a benevolent institute, and several manufactures. At Kolkhor within the circle, was fought, in 1850, the celebrated battle in which the Grand prince Dmitri Iversnovich of the Don defeated the Mongols under Mamai. A monument commemorates the event. Pop. 1124

JEQUELCHACAN, a tn N America, Yucatan, 30 m N E Campeachy. It is a large and well built place, with a

handsome church several schools, and a courthouse. Its market is important. Pop. 4912

JERSEY CITY [adj] a tn 1 States New Jersey, 1 bank Hudson at its mouth in New York Bay not more than a mile from New York. It stands on a peninsula, is well laid out in broad regular streets and spacious squares, and possesses many private residences, which, even in the best parts of New York are not surpassed. Its public buildings, however are meagre, almost the only one deserving of notice being the spacious railway station recently erected for the accommodation of a number of lines which have their common centre here and communicate with all parts of the country. Five other principal buildings and institutions are twenty churches a good high school and a number of common schools. The manufactures consist chiefly of crucibles of a quality so excellent that they are used in the mints of Europe as well as in America, fire-arms pottery soap starch cement locomotives, machinery cast-steel iron ware and fireworks. As the terminus of the Morris canal Jersey is an extensive coal mart as well as the depot of the pig iron made on the banks of the canal. It is also one of the depots of the Cunard steamship line between Great Britain and the United States and the starting point of the smaller vessels of this company which ply between New York, Halifax and the West India Islands. It has moreover a considerable fleet of schooners, engaged in bay and river fishing and in the southern coasting trade. Pop. (1850) 99 220

JESOREK [adj] a dist and tn India presid. Bengal The dist. between lat. 23° 26' and 23° 46' N, lon. 84° 41' and 80° 57' E is bounded N E by Fulia, E by Dacca, Jalapora and Backergunge S the Sunderbunds, and W Baraset and Muddes, length 8 E to N W 100 m breadth 48 m. The surface almost throughout is a low monotonous flat, varied only by the interchanges of dry and swampy ground and is traversed by numerous streams and affluents from the Ganges. The soil is famed for its exuberant fertility, the decay, vegetation of the woody tanks and water courses and for an aquatic prevail at all times but especially at the close of summer. The soil is generally fertile the only exception being in the N, where there is a considerable admixture of sand and clay. The principal crops are rice, grain and other pulse indigo oil seeds sugar and tobacco. Lately the mulberry to rear silk worms has been extensively planted. The principal exports are indigo rice sugar ram silk cotton and areca nut betel sulphur, and hides. Among the wild animals are the tiger leopard panther bear and jackal. Numbers of alligators infest the waters. The towns cap of the above dist. 77 m N E Calcutta, is an unimportant place, and was long reputed unhealthy. Lately however sanitary measures have made an important improvement in this respect. The principal buildings are those belonging to the civil establishment, a large jail capable of receiving 1000 prisoners and a public school accommodated in a handsome structure and situated by about 1200 pupils who are instructed in English, Persian and Bengalee.

JESUIT MI [adj] a state India the most western in Baluchistan, situated between lat. 26° 8' and 25° 29' N lon. 70° 4' and 72° 11' E and bounded N by Bikaner, N W by Bikaner, S E by Soodpour and W by Sindh, area, 12 282 sq m. It forms a large expanse of sandy desert, flat upon the whole, but varied particularly in the E by ridges of hills, insulated rocks, and occasional snows, producing pastures in sufficient abundance to feed large herds of cattle. In the N, where the true character of the desert is more completely developed, the surface is so uniform and monotonous that travellers in crossing it have no landmarks and guide their course by the stars. There are no perennial streams but by damming up water courses and ravines during the periodical rains temporary seas or lakes of salt water are formed. These, when the summer heat has evaporated them leave the spaces they occupied covered with a crust, from which considerable quantities of salt are made. Pure drinking water is obtained only by sinking and hoing so far below the surface that the wells are in some places 800 ft deep. For most domestic purposes tanks, formed where the soil is free from saline ingredients and filled during the rains, suffice; but when these fail as they sometimes do, numbers both of human beings and of cattle perish from thirst. The climate is extreme, and the range of the thermometer is very great.

In the N near the Bikaner frontier, Bulson found the thermometer on 7th February as low as 33° and saw the ponds covered with a coating of ice. On the 4th of March, within the course of one month, the temperature in his tent was 106° and in the sun 119°. The natural vegetation of Jessulmeer lies within narrow limits, and consists of a few broomy shrubs, which sometimes overtop the ground so as to form a kind of jungle, and of some stunted trees. The only wild animals which can be said to be numerous are snakes. The principal domestic animals are dromedaries, horses, kine, and sheep. The last are said to be so abundant, that three of them may be bought for about four shillings. The inhabitants are composed principally of Bhatti Rajpoots, with a considerable immixture of Brahmin Jats and Jains. The only manufactures of any importance are coarse and fine woollens. The trade is chiefly transit between Marwar and W. Hindustan on the one side and Sindh and Afghanistan on the other. This traffic gives employment to a great number of men and to thousands of camels. The revenue of the state amounts only to 25500 and of this nearly a half is obtained from transit duties. Estimated pop. 4 (40)

JESSULMEER [add] cap. of the above state, lat. 26° 56' N., lon. 70° 53' E. stands at the base of the N. extremity of a rocky ridge, and is surrounded by ramparts of an emmental stone, flanked by bastions squarely constructed, but of a westerly height. The whole area enclosed is about 23 m. in extent, and access is given to it by four regular gateways. Within the ramparts in the N. part of the town is the citadel seated on an isolated eminence, scarped all round and faced with masonry to the height of 20 ft. Higher up the ramparts commence and are carried round the hill. Though formidable in appearance they are of little strength as an adjoining ridge completely commands them. Within the citadel the principal buildings are the palace, a wall mile surrounded by a huge umbrella, which is said to indicate the ruler a high Rajput descent and six temples three Jain, one Hindu and three Jain. The latter are ancient stone structures, elaborately carved and surmounted by lofty gilt spires. The town contains nearly 8000 houses, many of them solidly built of stone, and of two stories the lower with a terraced front raised 4 ft. above the level of the street and usually painted red and the upper provided with a projecting balcony of stone carefully carved.

JHAI SATHAL a in Mexico, dep and 140 m W. N. W. Chihuahua, in the Sierra Madre, on the head-waters of the Rio Mayo and near the frontier of Sonora. Its mines of silver and gold continued in the same vein—the former constituting the large mass of the precious metal and the latter existing only in limited quantity in combination with it—were long regarded as the richest in N. America, and yielded immense wealth. Though their productiveness has ceased they are still frequented by numerous miners, who though often earning a scanty subsistence, still cling to the spot, in the hope that the discovery of some rich and still unworked vein may reward their perseverance. Speculators on a large scale have also made their appearance, but as yet almost all the trials that have been made, whether by public companies or by individuals, have ended in disappointment. Joss Maria, however, still continued to retain a considerable population, till the discovery of the gold-fields in California caused it to be almost deserted.

JFYPOOR [add] a state India, in the E of Rajpootana between lat 26 40' and 27 37' N. lon. 75° 8' and 77 20' E. length N. to W. about 150 m. breadth 140 m. area, 18,291 sq. m. It consists generally of an extensive plain with isolated peaks and clusters of rugged hills particularly in the W. and N. W. rising here and there above the general level. The hills are composed of quartz and granitic rocks intermixed with a white limestone or marble and occasionally with mica. To the S. of them is a level expanse of fine white and nearly level soil of vegetation, and bounded on the S. E. by a low rocky ridge, which passes the city of Jeypoor at some distance to the W. and is continued N. E. to the mountains of Alwar. The S. of the territory is mostly a sandy plain rendered cultivable only by means of incessant irrigation with water drawn from innumerable wells. In some parts under these disadvantageous circumstances, good crops of grain, pulse, cotton and tobacco are raised but grazing is

found to be the most profitable mode of employing the soil and the chief wealth of the inhabitants is in their cattle. The population is composed of Rajpoots who are the dominant class; the Minas, who are supposed to be the aborigines, and the Jats, who are extensive holders of land, and most industrious and skilful agriculturists. The Rajpoots belong chiefly to the Kachwaha tribe, and though far outnumbered by the Minas and Jats, are said to be able to muster 30 000 armed men. The revenue amounts to nearly half a million sterling, subject to a deduction of £40,000 payable as tribute to the British government. Pop. roughly estimated at 1 500 000.

JEYPOOR [add] cap. of the above state, 127 m. W. by S. Aggra, lies in a small plain or basin, thought to have once been the bed of a lake, and enclosed on all sides except the S. by barren story hills many of them crowned with forts. One of these situated N. of the town on a hill which rises several hundred feet above it, is the citadel. The town about 2 m. long from E. to W. and 1 m. broad is surrounded by two low walls of masonry an outer one embellished at the top and loopholed for musketry, and an inner one with lofty towers and seven well protected gateways. This inner wall though evidently intended to be the principal defence, is so low that in some parts the accumulation of drifted sand nearly as high as the parapets, so thin that even field artillery could break it. The interior is not surpassed in point of regularity and elegance by any native Indian town. The main streets, forty yards in width intersect each other at right angles and form at each point of intersection a *chok* or market-square. These main streets are in their turn crossed by others of a minor description so that the whole place is partitioned out into a series of rectangular blocks. Of these the central block about half a mile long is entirely occupied by the palace garden and royal premises. The palace is a lofty structure of seven or eight stories and has at each extremity a lofty tower crowned with a dome. The gardens, surrounded by an unbelieved wall terraced at top and clustered below are full of fountains, cypress, palm and flowering shrubs with a succession of terraces and alcoves, which as a whole are extremely rich and striking though none of them taken singly is unexceptionable in point of taste. The houses in the principal streets are in general well built of stone and not a few of the mosques and temples have considerable architectural merit. One of the most interesting edifices is the huge observatory constructed by the celebrated Jyoti Singh. It is still in good preservation and contains besides dark azimuth circles, altitude pillars, and other bulky instruments of masonry some brass altitude circles of enormous size. In the arched terrace is a furnace for casting and machinery for boring guns.

JEZILZANY a in Austrian empire Calcia circle and 12 m. S. S. P. Carltown with a pulish refinery, an old castle and 2444 inhabitants.

JE/UPOL, a in Austrian empire Gabeln circle and 4 m. N. Stannitz with a Dominican monastery. A strong castle which stood here, was repeatedly besieged by the Tartars, but is now only a ruin. Pop. 2143.

JHAILLOD a in India Scindus Dumnonia, 108 m. N. E. Morala. It was once cap. of a pergunnah in Gujarat containing seventeen towns and is still a considerable place, with some well built houses two stones high a mosque a small temple and a bazaar.

JHAI RA PATUN a in India, Rajpootana, state Kotah 90 m. E. Neemuch. It is a well built handsome place, which was framed by Zulim Singh, rajah of Kotah on the model of Jeypoor and is nearly in the form of a square surrounded by a substantial wall and bastions. Two main streets in the direction of the cardinal points intersect each other and are opened into by smaller streets. At the point of intersection, on a broad terrace, is a lofty temple dedicated to Vishnoo, and at the termination of one of the main streets another temple dedicated to Krishna. There is also a Jain temple of great antiquity but modernized by recent repairs and embellishments. Close to the town is a large tank or lake about a mile square, and well supplied with water throughout the year. Jhalra Patun owes its present prosperity to Zulim Singh who not only rebuilt it as already mentioned, when it was old and decayed, but secured many privileges upon the inhabitants, exempting them from forced contributions,

and making them liable to only half the transit duties usually paid in other parts of the country. This favoured it and has become the grand mart for N. India and S.E. Disputations.

JHANSI a territory India, Bundelkhand formerly forming a native state, but annexed to the British territory in 1864, on an alleged failure of heirs. It lies between lat. 24° 55' and 25° 48' N, lon 77° 55' and 79° 21' E, and consists of two parts, a W and an E separated by a belt of land belonging to the rajah of Tehree. The W division is bounded N by Gwalior and Datia, E. Tehree and S. and W Gwalior. The E division is bounded N.W. by Jaloun, E. Jhamsour and S. and S.W. Tehree. Length of both divisions, E to W about 100 m., breadth 60 m., area about 2922 sq. m., estimated pop. 488,000. These numbers apply not so much to its present condition as to the past when it was a native state.

JHANSI, a. in India, cap. of the above territory, 125 m. S. by E. Agra. It is pleasantly situated amid tanks and groves of fine timber trees, is surrounded by a fortified and massive wall from 6 to 12 ft. thick, and from 18 to 20 ft. high, with numerous flanking bastions mounted as batteries with ordnance and with loopholes for musketry. Within the town which has a circuit of about 4½ m., and surrounded by it on all sides except the W. and part of the E. stands the fort on an elevated rock, completely commanding the town and the surrounding country. Its natural strength has been so much increased by art as to make its capture even by regular siege a task of no small difficulty. Its walls, composed of granite and therefore difficult to breach, vary in thickness from 16 to 20 ft. Its extensive and elaborate networks are of the same solid construction with front and flanking embrasures for artillery and loopholes of which in some places there are five tiers. An additional means of defence the towers of the fort, one especially higher than the rest, and distinguished by the name of the White Tower are armed with heavy ordnance. Outside the walls are a summer-palace several temples and the ruined British cantonments. During the late mutiny Jhansi acquired an infamous notoriety. The sepoys stationed there having mutinied most of their officers and the other European residents succeeded in gaining the fort. Here they defended themselves with the utmost courage, till the rains of Jhansi which had never before known the British government for some time, took upon them with the untimely and rendered further defence impossible. As a last resource terms of surrender were proposed, and the brave defenders, after an assurance of safety and protection solemnly swore to agree to quit the fort. No sooner however were they without the gate than the whole of them including a number of helpless women and children were seized and dementally butchered. This atrocity, perpetrated in the beginning of June, 1857 was fully avenged on 24 April 1858, when the place was stormed by the British forces under Sir Hugh Rose, and 5000 of the rebels were slain. The name evoked at the time, but on the 10th of June following, was slain before Gwalior while leading the rebels in vain attack with a courage and resolution worthy of a better cause.

JHEMEND a petty native state and town India.—The **STATE**, which from being intermingled with others, is of very irregular shape and ill defined limits, has a computed area of 376 sq. m. and a revenue of £30,000. The soil is naturally fertile, but from the neglect of proper cultivation, is much overrun with jungle. The triple security of slave dealing, opium, and indigo, which once prevailed here, has been suppressed by British interference. Pop. 66,000.—The town, situated 70 m. N.E. Delhi on Feroz Shah's canal which occupies the channel of the Chittang, here crossed by a bridge is a considerable place with a palace and a good bazar.

JHUJHUR a native state and town India.—The **STATE**, between lat. 27° 55' and 28° 35' N lon 75° 55' and 76° 58' E is bounded N. by Hurettan and Bahlik, N.E. Delhi, N.W. and S. Gwalior and Alwar and W. Sikawatty and Loharo, area 1290 sq. m. revenue about £60,000. The surface, which has an average height of about 830 ft. above the sea is intersected by numerous water-courses which carry the drainage to the Jumna, and is nearly flat, with a very gentle declivity except in the N.W. where it is broken by several low rocky ranges. pop. 110,700.—The town

cap. of above state 35 m. W. Delhi, was assigned by the Maharajah to the adventurer George Thomas, and was for some time the seat of his short lived government.

JHUJHUR, a river, India, which rises in dist. Gorkh-pore about lat. 27° 5' N lon 84° 8' E. flows N., and joins the Gogra on its left bank, after a course of about 130 m.

JINNA a. in Western Africa, towards the S.E. at extremity of Bornou, prov. Logone 125 m. S.S.E. Katsina. It is a considerable place standing in a plain richly clothed with trees, enclosed with a wall of high reeds for its fine maiting and lettuce work, and an important market for ivory. **JIPICAJIPA** a. in S. America, Ecuador prov. Manabí coast, east of same name, on a beautiful plain 75 m. S.W. Guayaquil. It is a handsome place, with wide regular streets and a number of good houses, a few of them covered with zinc, several with tiles, and a greater number with a species of thatch. There are also two public schools, the one for boys and the other for girls. The principal manufacture is straw hats of which great numbers are exported. In the neighbourhood there is a thermal sulphurous spring.

JISTED VILIZ, a. in Austrian empire, Bohemia circle and on N.W. Rabor with a parish church a two-house an hospital for the poor a brewery and two mills.

JOANNA a. in lat. in the Coral Sea belonging to the Louisiade Archipelago to the P. of New Guinea. It lies off the N.W. extremity of Good-east Island is 11 m. long by 1½ to 3 m. broad and is traversed nearly throughout its whole length by a high ridge of hills which rise most abruptly from the S. shore, and descend gradually to the N.W. Mount Asp, the culminating point of the ridge, is 1104 ft. above the sea. The island is well wooded, has numerous groves of coconut trees near the sea and seems generally fertile. The natives, many of whom are converted to a large village crowning a hill on the S.W. side are warlike and treacherous.

JOBELI a. in Western Africa, on the route from Agades to Fokoko, 140 m. N.E. of the latter. It stands near the N. frontiers of Ada, to which it belongs, and is a considerable place. The Kelgeros use it as their market. The language spoken is a dialect of Songhay.

JOBLA a. in Arabian Yemen 100 m. S. by W. Sana. It contains about 1200 houses, for the most part lofty and well built, and ranged in well paved streets, and has extensive manufactures of soap.

JOJALAWA a. in Austrian empire (Gallizia circle) and about 12 m. N.W. Jalu, with 2489 inhabitants almost all linen weavers.

JOHANNS (Mr.) a. in Austrian empire chiefly and 35 m. S. Salzburg on the Salzach with an infirmary a millery and 1000 inhabitants.

JOHANNA or **AKOUAK** [add] one of the four isles which form the Comaru group nearly equidistant from the E. coast of Africa and the N.W. coast of Madagascar. It is of a triangular shape, about 24 m. long by 18 m. broad and has a finely diversified surface consisting of a plain from which finely wooded heights rise gradually into mountains from 3000 to nearly 4000 ft. above sea-level and are at the same time intersected by verdant and fertile valleys. Along the coast are several commodious roadsteads of various sizes while the interior is so productive as to maintain a pop. of about 20,000 souls. The principal products are rice, arrow root, beans and harvots in great variety, sugar cane, tamarind, lemons, oranges, coconuts and bananas. Most of the inhabitants are scattered in hamlets and villages over the island but there are two localities in which they are congregated in greater numbers. The one of these is Makhotan situated on the N. about half a mile from the roadstead where the European vessels usually anchor. It is surrounded by walls about 15 ft. high, flanked with square towers, and has a pop. of about 3000. The other Johanna situated on a beautiful bay on the E. shore of the island consists of a broad narrow that it is difficult to pass along them and of houses which, though substantially built of stone have a very gloomy appearance as their gate of entrance is the only opening to the street. The principal buildings are the castle the sultan's palace, distinguished from the other houses only by being a little larger and four mosques in which no taste whatever is displayed. The inhabitants, like those of the island generally are a mixed race of Arabs and negroes, all Mahomedans. Their number is about 2000.

JOHILA a div India, which has its source near those of the Nerabada and Bone, flows N W for about 90 m., then N E, and joins the bank Bone.

JOHN (Rr.), two rivers, British American: 1. St. John, Canada East, rises in a mountainous dist. in co. Grand, flows E, and falls later on one of the spurs of the latter at the town of Douglas. At its entrance, which is between two points of mud, there is often in spring a depth of 9 ft. and within, though the channel is narrow, the depth is 12 ft. but at 2 m. above, the navigation ceases in consequence of a number of islands, between which the water is shallow and rapid. 2. St. John, Labrador, has its mouth on the N shore of the Gulf of St. Lawrence opposite to the Parquette, the westernmost of the Mingan group. At its entrance between clay cliffs on the W and a sandy point on the E. it is 300 yards wide and within it increases to the width of nearly half a mile, but again decreases gradually to about 200 yards. For 6 m. the limit of the tide, it may be ascended with a depth of 1 to 3 fathoms at low water, but beyond becomes so rapid as to be navigable only by canoe or flat-bottomed boats. Half a mile outside its entrance there is an extensive bar of mud, which shifts with every gale of wind, and has seldom more than 3 or 4 ft. over it at low water.

JOHNSBURY (Rr.) a tn U States, Vermont, cap. co. Caledonia, r bank Passumpsic, 57 m N E. Montpelier. The Connecticut and Passumpsic railway passes through it, and it has nine churches, an academy, a high-school several foundries, machine shops, and other factories. Pop. 5469.

JOINT a tn U States, Illinois, cap. co. Will on both sides of the Des Plaines, and at the junction of the Chicago and Rock Island with two other railways, 33 m S.W. Chicago. It stands in a rich agricultural district, is well situated and well built: contains six churches, two handsome school-houses, the city hall, and the state-prison and carries on an active trade in flour and lumber. Pop. 7104.

LONGA PÁNZLA a tn S Africa, near the S.W. frontier of the Bechuanaland colony lat. 10° 28' S. lon. 30° 18' E. It is a small place embowered in lofty evergreen trees hung round with fine festoons of creepers. The inhabitants, a crafty rapacious race, opposed so many obstacles to Dr. Livingstone's further progress towards Louisa, that the necessity of desisting from the prosecution of the enterprise when the Portuguese frontiers were at hand and all other obstacles promised to give way was seriously mooted. The Dr. however plainly telling his attendants that if they went back he would go forward alone.

JOHUBUL, a protected hill state, India, between lat. 8° 49' and 81° 9' N. lon. 77° 29' and 77° 24' E. bounded N. by Pondicherry and Bannabur E. by Coimbatore and Gurmal S. by Rannur and W. by Mirnour and Dulian estimated area, 320 sq m., revenue, £1412. It has an elevated and mountainous surface, one granite peak on the S.W. frontier rising to the height of 12 149 ft. and another in the N 10 000 ft. The N portion belongs to the valley of the Pahr and stretches along its r bank; the S portion to the valley of the Beelwa, a tributary of the Tomsa. Both valleys are very beautiful, particularly that of the Pahr, which rises with gentle slope, and is furrowed into numerous terraces, on which rice and other grains are grown. The inhabitants are remarkably handsome, and some of them nearly as fair as Europeans. The capital is Dahn. Pop. 15,000.

JOODPOOR, or **MARWAN** (add.), a state, India, in the S.W. of Rajpootana, and the largest of the Rajpoot states, lies between lat. 24° 26' and 37° 49' N. lon. 70° 4' and 75° 33' E, and is bounded N. by Bikaner and Bheekawatia, E. by Jeypoor, Kishangur, Ajmer, and Mewar S. by Mewar and Berohee, W. the Khan of Cutch and Soohda, and N.W. Jeypoor. Length, N. E. to S.W. 220 m., breadth, 160 m.; area, 36,673 sq m.; revenue, £175,592. It consists of two distinct portions, separated by the Looma, which rising on the E. frontier traverses it in a S.W. direction and nearly bisects it. The portion on the S.E. or I. bank is fertile, that on the N.W. or r bank is a continuation of the great desert of Soohda and a more desolate waste. On the E. frontier the surface wells upwards to the Aravalli range, which rises boldly to the height of 8000 to 4000 ft. in the S. where a succession of rugged hills crown, the prevailing rock is porphyry. Salt abounds in the territory and is largely manufactured by means of evaporation from its partially

worked on the borders of Gujrat, Kunkar or micaceous conglomerates is much burned for lime; and in some places the limestone assumes the form of marble, of which there are some fine quarries at Mukrana, 120 m N. E. of the town of Jeypoor. A hard red sandstone, well adapted for building, is also abundant. The best soil consists of a fat black earth, on which the principal crops are wheat and cotton. The latter however is extremely precarious in consequence of the prevalence of frost, by which in a single night every bud has sometimes been nipped. In the other soils sand more or less predominates, and is particularly adapted for millet which along with a kind of pulse called moth forms the principal food of the inhabitants. In the S. where the torrents from the Aravalli Hills furnish ample means of irrigation almost every kind of grain is successfully grown. The wild animals include leopards, tigers, wolves, hyenas, jackals, myriads, antelope, and wild asses. Snakes are so common that the inhabitants as a protection against them, wear a kind of thick leggings or gaiters. The principal domestic animals are camels, horses, kine and sheep. The flocks of the last are extensively manufactured into coarse cloths and blankets. The inhabitants have a remarkable turn for commerce, and not only carry on a large trade at home, but have overpassed the neighboring countries, and obtained the management of their most important trading concerns. According to the statistics of the census, chiefly Jains, constitute nine-tenths of the bankers and commercial men of India. 1. pop. 1,783,600.

JOODPOOR (add.) a tn India, cap. of the above state, lat. 26° 19' N. lon. 75° 8' E., 800 m S.W. Delhi occupies a striking site at the S. extremity of a rocky ridge which rises from 200 to 400 ft. above the average level of the plain. It is enclosed by a rampart 5 m. in circuit and slopes somewhat irregularly towards the ridge on the top of which the citadel commanding a magnificent view is seated. Much of the rampart, though solidly built of stone, is in a dilapidated state. In many places the parapet has fallen, and in some places access could easily be gained to the interior through gaps in the wall itself. In the whole circuit the number of bastions is 101, and of gates 70. The streets are somewhat uneven owing to the inequalities of the site, but are laid out with considerable regularity and lined with houses, many of which are substantially built of freestone and are handsome, though a greater number are said to be mean and badly constructed. The freestone used is of a red colour but not a few of the houses built of it are covered over with a fine white plaster. The contrast of colours thus produced, together with the lively group of shady trees which line several of the streets and the banks of numerous tanks has a pleasing effect, and gives the whole place a gay look. The principal edifices are the royal palaces and attached buildings, which occupy about two-fifths of the whole area of the citadel, and tower high above all the other houses; and numerous fine temples. Notice is also due to the tombs, several of which are of great extent and finely built of stone throughout and to the walls, one of which, of immense size cut to the depth of 90 ft. in the solid rock as provided with three flights of steps leading down to the water, while the fourth side remains perpendicular to allow of the working of the Persian wheel. Outside the walls, and about a cannon-shot from the N.E. angle, is a suburb enclosed by a thin stone wall with battlements and bastions, and forming a distinct town of about 1000 houses. It takes its name of Mahumand from its great temple, which confers the right of sanctuary, is conspicuous from afar by its lofty whitewashed spire and possesses among its rich internal decorations a canopy of silver in the form of an umbrella. Five miles to the N. are the striking ruins of Mandor which was capital of Marwar till it was supplanted by the founding of Jeypoor in 1459. This place has long been famous for its currency particularly of ivory, and for various articles of handicraft. The pop. of Jeypoor, including suburbs, has been variously estimated at 150,000, 139,150, and 80,000. Even the last seems to be an exaggeration.

JOONER, or **JUNJA**, a tn. India, British Decan, settles terrace Poonah, about 90 m. N.E. Bombay; lat. 19° 18' N. lon. 74° 18' E. It lies at the foot of a steep and rugged basaltic hill crowned by a fort. Around the town in every direction the hills are pierced with caves containing Buddhist sculptures, others of monasteries, hermitages, venerated reer-

rooms and tanks with stone beaches. At a hill fort in the vicinity the celebrated Sivaya was born. Pop. about 8000.

JOSE (San) [add.], a m Central America, cap. of state Costa Rica, in a mountain valley between two streams, at the height of 4500 ft above the sea; about lat $9^{\circ} 45' N$, lon. $83^{\circ} 45' W$. It stands nearly in the centre of the state, equidistant from the Caribbean Sea on the E. and the Pacific Ocean on the W., is laid out with almost mathematical precision, in straight streets intersecting at right angles, and consists generally of houses of only a single story. The principal buildings are the governor's residence, the guard house, the custom-house, the cathedral, the churches of Merced and Carmen, the university, the episcopal palace, and the theatre. Most of the streets are paved and well shaded with trees. The trade is active, and coffee is largely grown in the vicinity. Pop. about 13,000.

JOSEPH (St.), familiarly known as St. Joe, a tn U States, Missouri, cap. co. Buchanan 150 m. N W Jefferson City on the railway from the Kansas frontier to Hannibal in Mississippi. It is a quaint curious town, the most commercial and populous in Western Missouri, and is surrounded by an extremely fertile district, in which wheat, tobacco, and hemp are cultivated. It has seven churches

chiefly by the temple and the pilgrims who lodge here on their way to it.

JOUNPOOR or JUANPOOR, a dist. and tn. N W Provinces.—The town, between lat $35^{\circ} 21'$ and $36^{\circ} 12' N$, lon. $62^{\circ} 12'$ and $63^{\circ} 10' E$, is bounded N W by Onda, N E by Asingur, E. Ghasegar, and S. and S. W. by Bhatia and Allahabad; length, E. to W. 90 m.; breadth, 55 m.; area, 1650 sq. m. It is a remarkably level tract, with a gentle slope probably averaging not more than 6 inches per mile from N W to S E and is watered by numerous streams, of which the Gomutur is the most important. The soil is peculiarly adapted for the sugar-cane, the cultivation of which is said to occupy 23,155 acres. Pop. 798,505.—The town cap. of the dist. 17 m. N W by Bhatia, stands on the Gomutur, which is here navigable, and divides it into two unequal parts, the larger on the l and the smaller on the r bank, communicating by a bridge, which is considered a favourable specimen of Indian architecture. The town and its vicinity abound in ruins which attest the former magnificence of the place, but the few edifices of note which at now possesses are the fort, a massive stone structure in the form of a quadrangle, about half a mile in perimeter with a highly ornamental gateway, and a large mosque in very bad repair but surrounded by colonnades and surmounted by three lofty domes. The military cantonment is on the l bank of the river at the E end of the town. The civil establishment contains the usual buildings. Pop. 16,177.

JOWKA a tn. India, Malwa, on the Paria, a small stream here crossed by a handsome bridge of porphyry 61 m S S E of Meerut. It stands at the height of 1487 ft. above the sea, contains a pop. of about 10,000 and is cap. of a small territory of same name, which has an area of 675 sq. m., a revenue of £80,000, and a pop. of 64,456.

JUAN (San), an island Western N America, chief but second in size of the Haro Archipelago between Vancouver Island and the mainland. It is about 11 m. long and on an average 8 m wide and has a large extent of land available for agriculture and pasture; the Hudson Bay Company having a large sheep farm upon a beautiful grassy at the S E end of the island, 140 ft. above the sea, with several outlying stations. San Juan was brought into prominent public notice during the boundary dispute between England and the U States in 1859 when Gen. Harvey with a body of American troops took armed possession of it.

Its importance lies not in its intrinsic value, but in its commanding the Haro Channel and therefore the right of way to Vancouver Island. (See HARO ARCHIPELAGO see Supp.)

JUAN DE FUCA a strait between Vancouver Island and the mainland of the American Continent. The breadth of the strait at its entrance between Cape Flattery is 8 point on American territory and Bonilla Point in Vancouver Island, is 18 m. It narrows south to 11 m and continues this breadth in an E and N E direction for 50 m. to the Race Islands. The coasts are remarkably free from danger, and may as a rule be approached closely, and have several convenient anchorages on either side, the shores are also well lighted. Upon the N side from the shore of Vancouver Island, densely wooded hills rise gradually to a considerable height while on the S or American shore, the rugged outline of the Olympian range of snow-capped mountains extends for many miles, varying in elevation from 4000 to 7000 ft., and with breaks in which beautiful country may be seen. As the strait is ascended the tides and currents, which at its junction with the Pacific are of little strength, become embarrassing, and often dangerous to the navigator, and where the strait, near the Race Islands, turning S E E, meets the waters of the Gulf of Georgia, the tidal irregularities are very baffling. At all seasons the wind blows up or down the strait. At the Race Islands the strait terminates and opens into a large expanse of water.

JUAUYA an Indian vil Central America, state and 38 m W Salvador. It stands in a mountainous district to the E of Mount Apooce, and is inhabited by 1500 Indians, who

ST. JOSEPH, from the Kansas side.—After a photograph.

a convent, a large female seminary a courthouse, steam, flour, and saw mills, manufactures of bagging, &c., and a considerable trade and though an outlying place, its hotels afford as good entertainment as can be found in many of the great hotels of the large cities of the east. It is the eastern terminus of the various routes of the American Pony Express by which rapid communication is maintained between the far-distant territories of the American Union on both sides of the Rocky Mountains and is the point of arrival and departure of the trains of waggon going and returning by the overland route to California and Oregon. The town was founded in 1843, and became the capital of the county in 1845. Pop. (1860) 9343.

JOSEPH (St.), a river U States, which rises in the S. of Michigan, and after flowing E. into Indiana, bends round to the N and again entering Michigan discharges itself into the lake of its name on its S E shore at the village of St. Joseph. Its total course is 250 m., of which 120 m., reaching to Constantinople, is navigable by small steamers.

JOSEPHIMATH, a tn India, Kutch, l. bank Aikhunda, here formed by the junction of the Bhogwara and the Dhotia or Lota; lat $22^{\circ} 53' N$; lon. $70^{\circ} 27' E$. It stands in a hollow recess sheltered on every side by a circular ridge, at the height of 4165 ft. above the sea, and is approached by a steep path cut into steps. The houses only 115 are neatly built of gray stone and roofed with shingles. Among the number is the residence of the royal or high-priest of Bhad, which, who lives here for six months, while the approaches to his temple are barred in snow. The inhabitants live

St. Joe. GAZ.—Vol. II

are well civilized, and possess extensive cattle plantations. In the vicinity the Rio Grande or Sacramento forms a magnificent waterfall, descending by two extensive leaps, each 300 feet high.

JURBULPOOR, a to. India, territory Banger and Norbada, cap. dist. of same name, 200 m. S.W. Alibabad. It stands at the base of a rocky eminence about 1 m. from the L. bank of the Norbada, and is a large well-built thriving place, well situated for trade, and containing a school of industry which has been brought to a state of great efficiency. In a limestone ridge in the vicinity of the town a number of large fossil remains have been found.—The dist. has an area of 5337 sq. m. and a pop. of 443,771.

JUDENBURG (anc. *Monsieur Cestre*) [old], a to. Austrian empire, duchy Styria, circle Bruck, cap. dist. of same name, romantically situated in the upper basin of the Mur 29 m. W N W Gratz, at the height of 2277 ft. above the sea. It consists of the town proper, surrounded by walls, and of two suburbs, and has a handsome square with a statue of St. John of Nepomuk, a strong castle, two churches, one of them with beautiful stained glass and the other a large edifice with a square tower and an excellent organ; barracks, and in the vicinity the ruins of an old feudal castle, with one of the finest churches in Lower Styria. Pop. 20,000.

JUGGIAI ETTAH a to. India, prov. Madras dist. Marathipatan near the Nizam's frontier. It was built by a late commander has already become the third town in the district. It is inhabited by many rich Marwari and Telugu merchants, and carries on an extensive trade, chiefly in cotton, silk and cotton cloths, opium, and tobacco.

JUJUY a prov. of the Argentine Confederation, South America, lying between 22 and 24° S. lat., extending about 50 German leagues from N to S., and of the same breadth from E to W. It lies immediately under the tropic, but for the most part stretching up the slope of the great Cordillera range so that its climate is not so hot as might be expected from its geographical position. The low lying districts around Oran and the Chaco exhibit all the luxuriant pomp of a tropical vegetation. The province is divided into nine departments, which are named, Yavi, Misiones, Cuchucos, Santa Catalina, Humahuaca, Tumbaya, Jujuy Rio Negro, and Funes. Watered by innumerable streams, the soil gives forth its fruit in abundance, and yields the pomegranate, citron, orange, walnut, apricot, buckwheat, rice, cotton, maize, indigo, tobacco and the sugar-cane. Self sufficiency in considerable quantities on the plant; horses congregate in immense herds, and millions of oxen are reared on the breeding estates. Silver mines are found in the departments of Humahuaca and Tumbaya. Pop. upwards of 50,000.

JUJUY, a to. and river, South America, Argentine Confederation.—The river, cap. above prov., is situated on the river Jujuy, 80 m. N N E. of Salta. It was founded in 1680. Owing to its position in the line of transit between Buenos Ayres and Upper Peru it is a place of some importance, and recent travellers speak of it as a very flourishing condition.—The river Jujuy rises in the W. declivity of the Chilian Andes, and receiving several tributary streams flows in a N E. direction to join the Turia below Oran, and forms with it the Yacaré. It is also known as the Lavaya, Rio Grande, San Salvador, or Rio Dulce. Course, 800 st.

JULIA a to. S.W. Africa, Kinsbunda country, territory Balforda, on the E. slope of the Ling-Ling near one of the sources of the Kopo. It has its site in a fruitful valley is surrounded by a strong wall and is the residence of an independent chief. Pop. about 3500.

JULIANSHAAB, or **JULIANSHAAB**, a district, Greenland, southern part, extends lat. 50° to 51° N., stretching from the adjoining district of Frederikshavn on the N W to Cape

Farwell, a distance of above 150 m. In the southern portion the distance from the outermost islands that line the coast to the head of the fjords is 30 to 40 miles, but in the northern it does not exceed 50 miles. It is split up into six great peninsulas separated from each other by seven fjords, and eight or ten smaller peninsulas, which separate the northern bays, and along its coast are 30 larger and above 100 smaller islands. The district consists chiefly of unfertile hills covered with perpetual snow and ice, partly inaccessible and partly uninhabited by human beings. The islands and

JULIANSHAAB, GREENLAND.—proposed station of North Atlantic Telegraph.

landscapes even in summer are continually beset with drift ice, the cold mist retards the thawing of the snow and choked vegetation so that the appearance of the exterior coast is made to resemble that of North Greenland, while not far off the vegetation on the inner fjords and narrow valleys of the land attains the highest state of luxuriance permitted by the climate of this latitude. The chief trade is in seal-oil, fivers, fox and bear skins, and silver down. Pop. (1855) 2609 of whom 28 were Europeans.—The COLONY of Julianshaab lies on the outer portion of the peninsula which separates the fjords of Iglikto and Tunneelilik, upon whose east or inner portion lay the former town of Hattfield. The centre of this peninsula forms a sharp saw topped mountain chain of 4000 to 5000 ft. high. The houses, which stand in a valley tolerably well closed in, and are erected on both sides of a stream here crossed by a bridge, consist of an oil-burning house, a blacker-house, the manse-house, church, school &c., and the dwellings of the natives. In the harbour a small schooner is stationed which is chiefly employed in visiting Narsarsuaik and other trading places for the exchange of goods. Julianshaab has been proposed as the Greenland station of the submarine telegraph which, proceeding from the northern shores of Scotland by the Orkney, Shetland, and Faroe Islands, Island Greenland and Newfoundland, is intended to unite Europe and America. For this purpose the Iglikto fjord is admirably adapted, having a bottom of sand, and a depth of water so great that the cable once laid will be in no danger from icebergs. The other hamlets in the district are Iglikto, on the foot of same name, Upernivik, Iqilavik, Iqililik, Fardilik, Igloermark, Incessarsik, Igloermark, Neopinkalik, &c. In the district there exist the ruins of several places formerly of more or less interest, among which Hattfield, already mentioned, is of chief interest, because it has been ascertained that an expedition of Scandinavians who sailed from about A.D. 1000, in the time of Eric the Red, made the first discovery of America. Having sailed in the W and S. they reached the shores of the continent, and landed immediately on two spots, the one of which, containing good arable land, they called Markland, and the other, yielding abundance of wild grapes, they called Vinland. After wintering in America, and leaving some settlers, who came

to have been destroyed by the natives, they set sail on the following summer and returned safely to Bristol with cargoes of timber.—(*Geological geographical and statistical description from Anders son, Esq.*)

JUMMULMADOOGOO a tn. India, presid Madras, dist. and 56 m. N.W. Ondipah, 1 bank Pennar a few miles E. of the Gundlota Hills. It consists of houses built of brick masonry, in some instances thatched with straw but for the most part with flat roofs covered with earth. A small fort adjoins the bazar. In the vicinity are the palace of the Gundlota Petau governors, the tomb of a brother of one of the nabobs and a temple said to have been erected four centuries ago. The inhabitants cultivate jowars or sorghum, cotton, tobacco, and turmeric, and manufacture dye and print cotton cloths. Pop. about 8000.

JUNIATA, a river, U. States, formed near the centre of Pennsylvania by the Little Juniata and the Frankstown from the Alleghany Mountains, flows easterly E. through a picturesque and mountainous country and joins the Susquehanna 14 m. above Harrisburg. Its course, including that of the Frankstown, is about 150 m. It is not navigable, but this defect is supplied by the Pennsylvania canal which follows its banks throughout its whole course.

JUQUILA, a tn. Mexico, state and 70 m. S.S.W. Oajaca. It has a parish church, with a wonder-working image

held in such repute that it annually attracts from 70,000 to 80,000 pilgrims. Pop. 800.

SUTEGALPA, a tn. Central America, Honduras, esp. dep. Olancha on a stream of same name, an affluent of the Guayape, at the height of 4800 ft. above the sea lat. 11° 12' N., lon. 85° 25' W. It is finely situated in a valley overlooking a splendid landscape, and is indebted for its importance to the destruction of Olancha, the ancient capital of the province. Previous to that event it was an unimportant village, whereas it has now become the commercial centre of eastern Honduras. The revolutions of the country have however greatly injured its prosperity. The town is but indifferently built. Its streets are narrow and ill paved and the houses are almost all of a single story with red tiled roofs. The whitewashing of the walls, which has generally a pleasing effect, becomes annoying from the excessive glare which it produces, while a scorching sun operating upon open drains and ill-cleaned lanes produces effluvia at once offensive and pestiferous. The principal building is the parish church, which has a portico in front, and possesses bells whose deep and mellow tone is assisted by the inhabitants to the large quantities of gold and silver which at the time of the census were thrown into the furnace as voluntary offerings. The population, at one time 8000 has dwindled down to half that number.

K

KABANIA a tn. S.W. Africa, Kimpunda own ry territory Hako, on the Kusanga an affluent of the Cuana. Its inhabitants divide their time between agriculture and fishing. The fish which are caught in great quantities, are dried, made up into bundles of ten pieces each and sent to market, where they form a considerable article of trade. Pop. about 3000.

KABARA, a tn. W. Africa, on a slope above 1 bank Niger, 12 m. S. Timbuktoo. It consists of huts used for residence, and clay buildings employed chiefly as storerooms and has two small market-places. The authorities are Fellahs, but almost all the inhabitants, amounting to about 2000, are Songhay. Kabara is the port of Timbuktoo.

KABERE, a tn. S. Africa, esp. kingdom of Molwa, about lat. 8° S. and lon. 35° 45' E. It stands in a gently undulating plain, watered by several beautiful streams and including a number of villages which encompass it on every side. The streets of the town proper are tolerably regular intersecting each other at right angles; they are also spacious, and occasionally planted with fine trees, towards the interior are several market places where well-supplied markets are regularly held, and even articles of European manufacture may be purchased. The houses are for the most part well built, and carefully thatched with straw. Those appropriated to the prince are conspicuous, their lofty roof, supported on pillars, making them look as if they were of more than one story. In many of them the walls are hung and the floors carpeted with various-coloured mats. The principal staples of trade are slaves and ivory wax, also, at one time was collected, and sold in large quantities, but the dealers, finding that the expense of transport nearly annihilated their profits, have ceased to purchase it. In their industrial products, consisting chiefly of cotton goods, dyed various colours, the mats used by the richer classes as wall hangings and carpets, and various ornamental articles, in which copper, ivory and pearls are employed, they have attained much excellence and display a high degree of taste. The chief agricultural products are mashes and excellent tobacco, but many valuable products are given them gratuitously without culture. Among these may be mentioned dates, bananas, and amans. Pop. 50,000.

KABOWA, a vil. W. Africa, Bornoe, 130 m. W. by N. Katsina. It is a large place with a well-frequented market in which the staple articles exposed for sale are natives, silk,

the fruit of the date palm, cattle and a cloth for female dress made in Kano, and called *tubek*.

KACONDA a territory fort, and vil. S.W. Africa, Kimpunda country.—The territory situated between lat. 13° and 14° S. and lon. 15° 50' and 17° E., bounded N. by Katsina and Hambo E. Sancho and Salanga S. the land of the Lanches and Nyemba Gampalla, and W. by large tracts of desert, area about 4500 sq. m. It lies high and being watered by numerous streams, of which the Kanoe with its tributary Kala, and the Kopard with its tributary Kurodo, are the largest, has a cool and healthy climate. Both tropical and European fruits thrive well, and wheat has been successfully cultivated by some strangers from Europe. The principal crops of the natives however are maize, manioc, beans, potatoes, and tobacco. Considerable numbers of cattle and sheep are reared on the rich pastures, swine and poultry are also numerous. The trade carried on by exchanging European wares obtained at the factories for ivory wax and cattle brought from the interior, is important.—The fort, a small portion of Kaconda was about a century ago taken possession of by the Portuguese, who erected a fort upon it, which was mounted with cannon and garrisoned by a company of regular infantry. The factory owing to the healthiness of the situation and the large profits obtained by the trade in slaves attracted a number of Europeans, and became flourishing. It still exists, but since the abolition of the slave-trade has rapidly declined. The fort or presidio, situated between the streams Shukula and Kallapa, about lat. 14° 25' S., lon. 16° E., is enclosed by a palisade and an earthen rampart mounting eight cannon. Its influence, and that of the factory connected with it, do not at present extend over a circuit of more than 8 m.—The villages consisting of huts formed by driving posts into the ground, and thatching the whole with straw, in a very strong style, and, in climbing the environs, numbers about 5000 souls, almost all population born in the country and blacks, who though they call themselves Christians, retain many of their original superstitions and have not yet abandoned their predatory habits.

KADIRI See KUDIRI.

KADORE, or KADU [add.] a prov. Java, bounded N. by Pakelang and Semarang E. by Jora, S. by Mataram, and W. by Engles and Bantam, area, 681 sq. m. It consists of a valley, lying between the mountains of Merapi and Baboon on the

K. and Sumbing and Sunda on the W. Marapi, an active volcano, but the lowest of these mountains, in 1930, Sumbing, the highest, is 11,600 ft. above the sea. The principal products are rice and tobacco, both important articles of export. To these the Dutch have recently added coffee, indigo and tea. Mr. Crawford, who had charge of this province when it was delivered over to the British government in 1813 observed in his *Descriptive Dictionary of the Indian Islands*, "Although down to that time it had never been subject to any other than native rule, I can safely say that I have never since seen, although I have visited the plains of Belgium and Lombardy so luxuriant a scene of cultivation—the result of a soil of wonderful fertility of long-continued irrigation as all seasons, and of near sixty years of uninterrupted peace." In the Buddhist or Jain temple of Borobodor Kado possesses the largest and most perfect of the ancient monuments of Java. By the census of 1945 the pop was 457,035, or 724 to the sq. m. probably the largest rural pop. of any country of Asia, except some parts of China. Pop. (1950) 400,057.

KAFAR, a vil N Arabia, situated between the Aga and the Salma chains, about 12 m. S.W. Hail, is the largest and most thriving place in that part of the country. Its inhabitants, belonging exclusively to the tribe of Banu Tamim, number about 500 families.

KAFORU, a river, Central Africa, rising E. of the Great Albert Nyanza Lake, and flowing N.E. into the Somarut River, or Victoria Nla. At the point of junction it was perfectly dead water at the season (Feb.) that Mr. Baker first crossed it, about 80 yds wide, including the beds of pyramids on each side. At a point about 60 m. higher up, the stream is in the centre of a marsh and although deep was so covered with thickly matted water-grass and other aquatic plants that a natural floating bridge was established by a matting of weeds two feet thick, upon which men walked across.

KAGOSIMA or **KAGOSIMA** [old.] a town and seaport Japan, in the S. of Kjusiu Island, near the head of a land-locked harbour about 40 m. long 10 to 12 m. wide at the upper part, and 4 to 5 m. at the entrance is one of the finest harbours in Japan. It is entirely under the control of the feudal Prince of Satsuma, the most powerful daimio or noble in Japan, with his head-quarters at the town, which is strongly fortified with heavy ordnance in the batteries. Here is a manufactory of arms and ammunition after the European model for the equipment and supply of the private army of retainers, who owe allegiance to him independent of the Tycoon or

central government at Yedo. Communication by electric telegraph is established between Kagosima and other portions of the prince's domains in Kjusiu. At anchor in port may be seen four or five armed steamers of large tonnage and horse-power purchased from the English and Americans. The batteries protecting the town were bombarded by a British squadron under Admiral Kuper in August, 1863, in retribution for the murder of an Englishman named Richardson by the retainers of Shimadzu Saburo, the prince's father, who refused to give up the murderers, or pay compensation to the relatives of the murdered man. During the engagement three of the enemy's steamers were sunk, their magazines exploded, and the town set on fire while a typhoon was blowing which reduced its hull-wooden fortifications to ashes. This brought the Prince of Satsuma to a satisfactory understanding with the British, whose demands he complied with. Since then the town has been rebuilt, the batteries repaired, and the manufactories of ordnance, shot, and shell restored, with an increasing fleet of steamships. — (*M.S. Notes; Japan Herald; Blue Books on Japan.*)

KAHU a to N.W. Africa Kumbunda Land Upper Mupunda, 140 m. N.W. Benguela. It lies at the foot of the Hama range and is the residence of an independent chief. At some distance from Kahi there is a remarkable waterfall of the same name. It is formed by the Munging, an affluent of the Longa, which, breaking through the mountain chain of Hama, and after descending 1150 ft. in a foaming cataract, pours its water in one mass over a precipice of another 150 ft. The sound is heard nearly 20 m. off. Kahi contains 2500 inhabitants who are industrious cultivators.

KAI-CHU FU, a town, China, near the N.W. coast of the Gulf of Lian tung, about lat. 40° 30' N. lon. 124° 25' E. It stands about 10 m. inland, consists of low and ill built houses thickly inhabited, and carries on an extensive trade.

KAIKUI a river Central Africa, rising in a marsh in the Unyoro country, about lat. 1° 55' N. lon. 32° E. and flowing W. into the Albert Nyanza Lake into which it empties itself in a splendid volume of water and by a magnificent fall of about 1000 ft. from the mountains at the E. side of the lake. The neighbourhood of this outfall is very beautiful.

KAIKUAN, or **KAIKUDAN** [old.] [anc. *Vinea Angustior* French, *Karawen*] an important town, regency of and about 60 m. S. by W. Tana. Its site is a military point of view as well chosen, being on a height which commands an immense plain

KAIKUAN looking north, from the Chateau of Toulon-les-Bains. Chateau, Agence Toulon, de la Région de Toulon.

and the routes leading to the N. of the regency, the town towards the E. and the *Fort de la Toulon* (Barricade) and it is further more excellently adapted for being the military centre of a power whose chief force consists of cavalry. The town, which is surrounded by a rammed wall in good preservation, is well

built, and contains some elegant buildings and a profusion of mosques and tombs of noblemen. The great mosque, which covers almost the whole of one of the quarters, comprises 515 columns of the Roman period, brought from Thyrsus, Hadramout, and Aphrodisium. It is gradually disappearing

under the weight of ages, and of hallowed surroundings of the Arabs for the preservation of ancient monuments. Near one of the gates to the S. is a vast open square of Saracenic origin, called by the Arabs the square of Ibrahim ben-Aghib, an early Saracen in the Moslem records. It is a polygon of 84 sides of about 6 yards each and is one of the most important structures of the kind in the regency and serves as a setting pond for the salt-water it receives.

Kalva is one of the three holy Mahometan towns, and was formerly the centre of the political and religious power of the Arabs in Northern Africa. The financial spirit of the population renders access to it difficult. No Christian or Jewish merchant may there take up his residence. Christian travellers even when protected by the Tunisian government, cannot journey there without being exposed to insult, if not to serious danger. After Mecca it is the town which at the present day Mahometans most seek to preserve with the greatest rigour from the contamination of other creeds. Its population, which at one time, according to Arab historians, was at least 80,000, does not now exceed 10,000 to 12,000. (Charlevoix *Apres l'Algerie de la Regence de Tunis* 1849.)

KAKA, a town in Central Africa 1 bank White Nile, cap. of the small independent Sultanate about lat. 11° N., lon. 23° E. It is surrounded by sand and desert, and is a town entirely of mud huts, and being the only place in the country where strangers are permitted to settle, possesses some commercial importance. The inhabitants, a fine tall well-made race, perfectly black, and with short woolly hair but with well formed features neither flat noses nor thick lips occurring among them are of predatory habits, but are ruled by a single chief or chief of whom they appear to stand in great awe. Though he levies no direct taxes his revenue is considerable, consisting of the sale of all the elephants slain by his subjects, and of a third part of the entire produce of their plundering excursions.

KAKAMAS a town in Austria, Hungary, county, Szabolcs, not far from the Tisza, with 2465 inhabitants, who grow excellent tobacco.

KAKINGI, or KIRANDA a territory S.W. Africa, Kimbundu country between lat. 13° 35' and 14° S. lon. 17° 30' and 19° E. bounded N. by Bahr, E. the Congo, S. Dababani and Kibombo, and W. the Kibango and Samboze; area about 9000 sq. miles. It is a fertile and healthy country, and its surface a temperate and healthy climate and a number of beautiful and fertile valleys alternating with black marshy tracts. The forests are extensive, and furnish haunts to numerous wild animals, including lions, leopards, hyenas, and several species of antelope, wild dogs, and monkeys. The inhabitants belong chiefly to the Ganguela tribes, are mild and industrious, and taking full advantage of the numerous streams which water and fertilize the territory raise good crops of tobacco, rice, maize, and rear numerous herds of horned cattle and sheep. The cannibals promised by their neighbours they are said to hold in abhorrence. Till lately Kakingi was parcelled out among a number of petty chiefs, whose feuds and divisions made them an easy prey to the marauders of Bahr and Bantambo. Their sufferings have taught them a better policy, and they now recognize the supremacy of a single chief who by concentrating the formerly scattered forces of the country, has shown himself able to defend it against all invaders and marauders. Thus protected, the inhabitants devote themselves to trade, of which the three staple articles are ivory, wax, and cattle. Pop. about 130,000.

KALA, a town in Austria, Hungary, Military Frontier, Lofon district, about 60 m. S. Karlova, with a R. Catholic and a Greek non-union church, and the ruins of two Turkish castles. Peter Erpi defeated the Turks here in 1651. Pop. 1960.

KALA, a town in Africa, Horn of Africa, about 100 m. S.E. Kukuwa, and 80 m. from Lake Chad. It is enclosed by high clay walls which start forth from a beautiful grove of fig-trees, is entered by a gate so narrow that an unladen camel can scarcely pass through it, and consists of spacious oblong houses of considerable elevation. As usual in this part of the country, the place everywhere showed signs of decay, but the pop. is still estimated at 1000, and cotton is extensively cultivated in the district.

KALA BAGH, a town in India, on bank Indus, at the point where it forces its way through the Bal range which stretches from Afghanistan into the Punjab, lat. 33° 37' N.

lon. 71° 35' E. The river which has here a width of 350 yds., flows between steep and lofty banks. Along these the road formed by cutting a gallery in the cliff, proceeds, and is so narrow as not to allow a loaded camel to pass. The site of the town, perched upon the precipice overlooking the road and the river, is very picturesque. The chief manufactures are salt and alum, the effluvia from which in the process of manufacture, make the town at once a disagreeable and an unhealthy residence. Pop. about 3000.

KALAFAT, a town in Little Walachia, cap. dist. and on a plain of same name, 1 bank Danube about 1° E. Widdin on the opposite bank, and 370 m. N.W. Constantiaople. It is surrounded with walls consists of about 3000 houses, and has three churches, a townhall, custom-house, quarantine, and cavalry barracks. It is a strong military position, the Turks having (1862-4) thrown up formidable redoubts and other works partly on two high hills in its plain, while awaiting the attack of the Russians.

KALAHARI DESERT, a region S. Africa, extending from the Orange River lat. 29° S., N. to Lake Ngami, and from lon. 24° E. nearly to the W. coast. It is called a desert simply because it contains no running water, and very little water in wells. It is by no means destitute of vegetation and inhabitants. Besides a covering of grass, and of creeping plants in great variety, there are large patches of bushes and even trees, prodigious herds of certain antelope, which require little or no water roam over its plains, and on the game thus bountifully provided, as well as on the vegetable products, particularly water melons, and large tubers of a very remarkable description a great number of human beings, Bushmen and Bakaishari subsist. The surface of Kalahari is remarkably flat and is intersected in different parts by the beds of ancient rivers. The soil is in general a light-coloured soft sand but in the ancient river-beds there is a good deal of alluvium which when baked hard, becomes so retentive that in some cases pools formed by the rain contain water for several months in the year.

KALAMANCH, a town in Austria, Hungary, county Somogy about 20 m. S.W. Kaposvar with a church and a monastery and a trade in tobacco and maize. There are large oak forests in the vicinity. Pop. 900.

KALAMAZOO, a river U. States, which rises in the Hillsdale in the S. of Michigan, flows easterly, W.N.W. and falls into Lake Michigan. Its direct course is only 98 m. its indirect nearly 300 m. It is from 800 to 400 ft. wide at its mouth and is navigable at all seasons for 38 m. by vessels of 50 tons.

KALAMAZOO, a town U. States, Michigan cap. co. and 1 bank river of same name, and on the Michigan and Chicago railway 100 m. N.E. Chicago. It stands in a beautiful and fertile country and has a very attractive appearance, being regularly built in spacious streets which are shaded by the oak trees. Its principal buildings and institutions are an orphanage, a college for both sexes, a female seminary, and a state lunatic asylum. The industrial establishments are soap and candle works, an iron foundry, a machine shop, a sawmill, flour and planing mills, and factories in which pump-forges and agricultural implements are made. Pop. (1880) about 6070.

KALAMITA BAY Black Sea, on the S.W. of the Crimea, commences at Cape Eupatoria and trends round, and E.N. to the town of that name, and then S.E. by a gentle curve to its termination at Cape Likni or Likul near the mouth of the Alma. Near the centre of the bay the average depth is about 20 fathoms, but on nearing the coast diminishes to 10 and ultimately to 5 fathoms. The only proper roadstead is that of Kozlov or Eupatoria, which however has exposed to storms from all points of the compass except the N. where the town and strong ground give it shelter.

KALANY, a river Capia, which rises among the mountains to the E. of Adam Peak, flows successively and circuitously W.N.W. S.W. and W. and falls into the sea at Arde N. of Colombo, after a course of 84 m. It drains a basin of 892 sq. m.

KALABASH, a town Turkey in Europe, Walachia, cap. dist. Yalowitz, on an arm of the Danube, 32 m. S.E. Banat. It is the seat of a civil and criminal court, and has a church, a normal school, an infirmary, and a quarantine establishment. Pop. about 3000.

KALAWEVA or **KALAWAT**, a tank or lake, Ceylon, which the king Dharm Sena, about the year 400, endeavored to form between Annapoorna and Dambod, about 80 m. N by W. The project commenced by digging an embankment across the river Kalawa, which flows N.W. and enters the sea at Colombo, and one conceived on the gradient impassible scale, the area submerged being more than 40 m. In circuit, the embankment 13 m. long and the spill-water of hammer granite, one of the most stupendous works in the island. Unfortunately the levels had not been properly taken, and the superfluous water, after the tank had been filled to the brim, instead of flowing over the spill-water, accumulated in a different direction, broke down the embankment, and caused a fearful inundation. Enough of the embankment still remains to show what an amount of human labour must have been misapplied in raising it, but the area of the tank itself has for ages formed part of the forest.

KALKANDELEN a tn. Turkey in Europe, in the N.W. of Macedonia, capital and 35 m. W. Ushak. It contains 5000 inhabitants of mixed races—Serbs, Bulgarians, Turks, and Albanians.

KALKINI a tn. N. America, Yukon in the highland to Kootenai, from which it is distant 80 m. S.E. It possesses a courthouse, a church, school, and a Franciscan monastery. The last, which is in a dilapidated state, though a few monks reside in it was put in a state of defence during the Mexican war and has its walls loopholed for musketry. In its whole appearance it resembles a fort much more than a building intended for any religious purpose.

KALLEE, or **BLAKE**, the name of three rivers, India.—1. *East Kallee* rises in dist. Moornirangur in the Dech in lat 29° 19' N. lon 77° 51' E. flows S. to Masur, where it receives the Khodas Malak, which crosses the British dominions, then proceeds to Booterah where it returns to the S.E. and returns it to its junction with the Ganges on its R. bank about 4 m. below Gangy or Kumy. Its whole length is 210 m.—2. *West Kallee* rises in the Dech, in dist. Saharaspore, flows successively S. and S.W., and joins the Hindon on its left after a course of about 70 m.—3. *Kallee* third, a river Malak which, rising on the S. slope of the Vindhya range flows generally N., receiving the Lakshmi and the united Alno and Amgar at Gaggroo. Immediately thereafter it turns its way through the Malabar range, and winding along through most romantic scenery reaches the more depressed tract of the route and finally joins the Chambal on the right, after a course of 225 m.

KALLEBWAN, a river, Chinese empire, island of Formosa. It has its mouth on the N.E. coast, opposite to a steep island, rendered conspicuous by a sharp conical peak which rises to the height of 1300 ft. Though the surf breaks heavily on the beach, and there are only 3 ft. on the bar at low-water it is much frequented by junks, whose high bulwarks and great buoyancy enable them to enter with comparative ease. The entrance to the river is 3 m. wide, but the channel immediately narrows to 700 yards, and continues to decrease, so that at 4 m. up the width is only 80 yards, with a general depth of 5 to 6 ft. At 7 m. the depth is only 3 to 4 ft., and the channel so narrow as scarcely to allow the passage of small boats, which had ascended so far, to use the river.

KALLNA, a tn. Austrian empire, Bohemia, circle and 12 m. N.E. Glatz, with a parish church, saw and other mills, and 1500 inhabitants.

KALOUA, an isl. in the N. of the Coral Sea, belonging to the Loyalties Archipelago, to the E. of New Guinea, 5 m. long from N. to S.W. by 3 m. broad, and is traversed by two ridges of hills, one of which has a height of 962 ft., and the other of 780 ft. Between the ridges is a valley opening into a bay on the S. coast. The island is well wooded, and has a large village on its N. point.

KALOWA, a vil. W. Africa, Bornu, 180 m. W. Katsina. It consists of about 300 huts, every one with its courtyard shaded by a henna or blue tree (*Solanum*), and presents a pleasing appearance of industry and comfort. Among the occupations are the spinning and cleaning of cotton, weaving, and the making of mud-bricks.

KALUOYA a river, Ceylon, which rises in a mountain

district near the R. frontier of the W. Province, flows successively E., and falls into the sea near Calcutta, after a course of 72 m. The area of its basin is 1144 sq. m.

KAMARA, or **KUMASARA**, a river, Manchuria, which rises in a mountainous but well-wooded district, about lat. 38° 40' N. lon. 123° E., and flows first E. and then S.E., pursuing a course nearly parallel to that of the Amoor, which it joins on its S. bank in lat. 51° 30' N., lon. 128° 50' E. The forests near its source supply the Chinese arsenal of Argumut, and the country along its banks abounds in moose-deer, wild geese, snails, and squirrels.

KAMBA, a kingdom, S. Africa, between lat. 16 and 17° S. and lon. 20° 25 and 31° 25' E. It is bounded N. by the kingdom of Motoko, E. by the river Kumsu, S. by the land of the Hamli, and W. by the sandy desert of A.S. Its inhabitants live not in towns and villages, but in detached and scattered dwellings. They belong to the negro stock of Minyanika, and speak the same language. This little kingdom appears like a true oasis in the desert. It has a very hot climate, and being abundantly but not excessively watered by the Kumsu, is of great fertility, produces manioc in abundance, and some tobacco. Unfortunately the habits of the people are more predatory than industrious, and they are almost constantly at war with their neighbors. Pop. estimated at 15,000.—(Yule's *Arabian Voyages*.)

KAMBASA a tn. W. Africa, Hausa States near Kabbu, a little W. of Gando, and 60 m. S.W. Sokoto. It lies on the N. side of a large swamp, offering excellent ground for the cultivation of rice, and has, in addition to the wall which encloses the whole town, a separate wall which interests it, and divides it into two distinct quarters. The greatest obstacle to an increase of prosperity is the troubled state of the surrounding country.

KAMBUITE a tn. S.W. Africa, Kimbundu country territory Kibala, near a bank Lempa, 160 m. S.E. Loanda. Its inhabitants, about 2000, employ themselves in agriculture and fishing.

KAMENGHAB, a tn. Turkey in Europe, in the N.W. of Bosnia, 30 m. W.N.W. Banjaluka. It possesses extensive mines of iron and silver and contains about 8000 inhabitants, who are chiefly employed in casting and working iron.

KAMENSKAIA a tn. Russia, gov. Novosibirsk, capital and R. bank Donets, 65 m. R. Novo-Tobolsk with two small fairs, and 10,565 inhabitants.

KAMERA, a tn. S.W. Africa, Kimbundu country territory Kibala, 50 m. E. by N. Benguela. It occupies the top of a hill overlooking several romantic valleys and contains about 1500 inhabitants, whose chief employment is in making slaps things or lace, which they dispose of in considerable quantities to the European factories on the coast.

KAMESZNICA, a tn. Austrian empire, Galicia, circle Wadowice, about 40 m. S.W. Cracow with a paper and a powder mill, and iron mines.

KAMIENICA a tn. Austrian empire Galicia, circle Lublin, about 14 m. S.W. New Sander; with a paper-mill and glass-works, and 1900 inhabitants.

KAMIESCH BAY, Black Sea, in the S. of the Crimea, about 1 m. E. Cape Kikias, properly consists of two distinct indentations, forming a common sheet of water at the entrance, but afterwards separated by an isthmus about 700 yards broad. The more E. is properly called Kamiesch, and the W. Kamiesch or Fanny Bay. The greatest depth, from 8 to 10 fathoms, gradually decreases to 2 fathoms.

KAMINISTIGLLA, a riv. British America, which issues from Great Dog Lake, flows in a very tortuous channel, first S., then E., and falls by three mouths into the W. side of Thunder Bay, on Lake Superior, at Fort William. Within half a mile of its mouth the water flows rapidly, and on the bar is only from 24 to 24 ft. deep, but immediately afterwards a depth of 12 to 14 ft. is maintained. The river, however, is totally unfit for navigation in consequence of rapids and falls. The principal of these, called the Grand or Kakabala Falls, 17 m. of direct, and 30 of indirect distance from the mouth, have a sheer descent of 105 ft. over a sharp ledge, into a narrow and profound gorge. The surrounding scenery is very beautiful.—(Hed.)

KAMLOOPS, a fort or station and lake, British Columbia. The fort, belonging to the Hudson's Bay Company, is situated on the S. bank of the Thompson, a few

hundred yards below the junction of the N with the S. branch, 50 m. N.E. Lytton. The Shashwan branch of the Thompson Lake, and flows in the same direction to Kamloops, below which the waters are rendered muddy by the siltation of the northern branch. Seven miles below the river expands into Lake Kamloops, and issues from it again clear and pellucid. Around Kamloops rolling hills, covered with bunch-grass and scattered places, rise in every direction. The pasturage is very rich and extensive and large bands of horses, herds of cattle and flocks of sheep, are kept here by the Hudson's Bay Company. The Shashwan Indians occupy the surrounding country.

KAMMANE, a tn. W. Africa, Hausa States, 50 m. S. Sokoto. It presents a pleasing interior, all dom-pains starting up between the several granite mounds which here rise to some height, and form a postlier feature in the scenery both of the town and the surrounding country. The inhabitants are very industrious, and manufacture cotton goods, particularly shirting which are celebrated both for the strength of the fabric and the lustre of the dye. The chief agricultural products are rice, sorghum cotton and indigo. The number of the inhabitants can only be guessed at, but must be large if there is any foundation for their own statement that they can bring 5000 arabs into the field.

KAMOURASKA, a tn. British America, Canada East, 600 m. S. of St. Lawrence, 70 m. N.E. Quebec. It possesses a R. Catholic church, a court house, where the criminal superior and circuit courts are held; a gal, an academy of the Frères de la Doctrine Chrétienne, machine works, and some general trade. Pop. about 2600.

KAMPAR, a native state, Indian Archipelago, on the N.E. side of the island of Sumatra, is bounded on the N and N.W. by Batak, to which it is tributary, W. Menangkabo, S. and E.E. Indragiri and E. the Straits of Malacca. A river of some name traverses it throughout from E. to W. but is of no navigable importance, being shallow full of sandbanks, and subject to a dangerous bore. The surface was covered with forests when the Portuguese first visited it, and still contains in the same state. The inhabitants, described as simple and peaceable, are chiefly employed in cultivating the sugar palm. A small quantity of tin and gold is produced within the province. The Malays are the dominant class, but the great bulk of them, though they speak a Malay jargon, seem to be distinct from them.

KAMPTEL, a British cantonment India, territory and 10 m. N.N.E. Nagpore. It stretches for 4½ m. along the r. or E. bank of the Kanna. The officers' houses, situated for the most part close to the river are large and commodious, and have spacious compounds with excellent gardens attached to them. In the centre of the cantonment are the Purse shops, and a little to the S. the Sadler bazar which has houses and shops of all descriptions, containing everything that can be required by natives or Europeans. At the W. end of the lines are large ranges of barracks for the European infantry and the horse and foot artillery. The other most conspicuous buildings are a commodious church, and the different European and native hospitals. The climate is remarkable for its extremes of both heat and cold and is subject to sudden changes which are trying to constitutions previously debilitated. In April, with the thermometer ranging at 100, severe hailstorms sometimes occur.

KAMUJI a tn. and fort, India, presid. Madras, dist. and 40 m. S.S.E. Madras, on the Kamber. The tn. occupies part of both sides of the river, having on the N. side a wide street with a Hindu temple in its centre, and on the S. side a number of streets generally narrow and crooked and lined with low mud huts, almost the only exception being a grand terraced house belonging to a native, and standing out in strong contrast to the others. The fort, seated on elevated rocky ground on the N. side, and commanding a most extensive and beautiful prospect, is small but of some strength being built of stone in a circular form, and enclosed by double walls of great height and thickness flanked with bastions. Kamur is noted for its long cloths of fine quality, and has among its inhabitants a number of wealthy merchants, who trade largely in cotton, which is grown here in greater abundance than any other part of the district. At the market, which is held every Tuesday, and is attended by crowds of

people from the surrounding districts, a good number of cattle are sold.

KANAGAWA, a tn. and seaport, Japan, Isl. of Nippon, N. side of a bay in Yedo harbour 16 m. S.W. of that city. It is a long narrow town, stretching for two or three miles along the bay, having one main street only. The houses are built of wood, the shops large and well supplied. The streets of the bay are very beautiful, and covered with villages, while the view inland is bounded by the magnificent cone of Fuji-yama. The American consul and the governor of Yokohama reside at Kanagawa, while the consuls and vice-consuls of the European powers reside at Yokohama. Yokohama, which is the port open to foreigners, and about 8 m. lower down, was built by the Japanese government expressly for the exigencies of the European trade. Two small streams flow into the bay between these two places and several dykes along their banks show that much land has been reclaimed and converted into rice-fields. There are several pretty temples in the vicinity and many large blank wooden buildings, store houses, and depots of the government. The street of the town is part of the tokeido or great highway of the island, from the capital to the N. and S. extremities.

Between Kanagawa and Yedo the road is as wide and well made as any country road in Europe, being formed of coarse gravel, well packed and levelled. Along the whole distance the roadside is more or less occupied by tea-houses, small shops, and dwellings of different kinds. Where these intervals, the road is bounded by quick-set hedges and trees as in Great Britain, with ditches on either side to drain it, and bridges across the streams that flow into the bay. According to the custom of the country this is the "official" road, along which the gentry and nobles travel to and from Yedo, with large bodies of armed retainers. On such occasions foreigners are warned not to appear, which happened on one occasion near Kanagawa, when an Englishman named Richardson was cut down and killed, a circumstance that led to the bombardment of Kagasaki. In the Elgin treaty with Japan Kanagawa is named as one of the open ports and thither the British and other treaty powers went in 1858-9 but the anchorage was found to be so shallow and the place so inconvenient for residence and trade, that the merchants, seconded by the Japanese, persuaded the consuls to remove the port to Yokohama, a small fishing village on the S. side of the bay (See YOKOHAMA).—(M.S. Notes. Blue Book on Japan.)

KANARA, a tn. Abyssinia, cap. dist. Kedara, lat. 14° 10' N., lon. 80° 50' E. It is a large place, which was at one time a great entrepôt for the trade between Abyssinia and Soudan. That trade having found a different channel, Kanara has greatly declined and has at present a scantily supplied market, in which the principal articles exposed for sale are rice, sugar, tobacco, cotton, Turkish shoes, and German sword-blades. The surrounding district is populous and well cultivated.

KANZUGA, a tn. Austria empire, Galicia, cradle and about 24 m. E. by S. Rimnow with 1850 inhabitants chiefly employed on working in wire and making earthenware. It was once a place of importance and was taken and burned by the Turks in 1498.

KANDUMBA, a tn. S.W. Africa Kintundu country, near the centre of territory Bambo, lat. 12° 50' S., lon. 17° 15' E. It has along the ridge of a hill rising with a gentle acclivity is enclosed by a palisade and a ditch and its inhabitants are industrious cultivators and traders. The Kumbas have its source in a marsh in the vicinity. Pop. 2500.

KANGKAO or **KANGKAT**, a tn. Cambodia, near the mouth of a river of same name, in the China Sea, lat. 10° 14' N., lon. 104° 55' E. It is a place of considerable trade, inhabited chiefly by great numbers of Chinese, whose principal market is in Singapore, to which they export large quantities of rice and silk. The great drawback was the shallowness of the harbour but this has been in a great measure removed by opening an old canal which communicates with the Mekong. Kangkiao occupies the site of an older town which was a great emporium for the whole Cambodian trade, and well known to Europeans under the name of Pon-bee-ma and Potal-mat. The Siamese, carrying the rapid growth and prosperity of this place, destroyed it in 1717.

KANGROA, a vi. Assam, dist. Raiti, 1½ m. Koleyda,

about above the junction of the Pee-Khyung. The houses are large, in groups of three and four, inclosed in bamboo palisades, with narrow paths winding between them, and all buried in a dense grove of mangos, jackes, betel-nuts, guavas, plantains, coconuts, and pine-apples. The inhabitants, though Manchunas, have heavy Jewish features, and wear huge turbans.

KANHAN, a river India, which rises in the Deogarh Mountains, tributary Bangor and Harbada, possesses a very tortuous course, generally S.E., crosses the British cantonment at Kanchan, and about 45 m. below joins the Wainganga on its right, in lat. 21° 5' N., lon. 79° 39' E. Its whole course is 175 m. At Kanchan it has a channel 500 yards wide. The chief use made of it is in floating down timber.

KANIEL, a river Central Africa, a tributary of the Sobat, rising among the Madi Mountains. It has its source in a beautiful valley, well wooded, and about 5 m. broad, in the heart of the mountains, about lat. 4° 30' N., lon. 35° 40' E. It first flows W for about 60 m. and then bends to the N and N.E., and ending with the Chol in lat. 5° 40' N. and with other affluents of the Sobat runs into that river. The stream is rapid, and a considerable volume of water is carried by it to the Sobat during the rains.

KANITZA (Turkmen) is an Austrian empire, Banat, circle and 40 m. N.W. Timarova, cap. dist. of same name, on the Theiss; with a castle with a fine park, a trade in wine, tobacco, sheep, and cattle, and 2211 inhabitants.

KANITZA (Czech) and] is an Austrian empire, Hungary, on the Zala, cap. dist. and a river of same name, 24 m. S.E.E. Kala Egermoss. It occupies a marshy site, in the east of a district court, and several public offices, contains a Franciscan college, an order-gymnasium, a high-school, a Franciscan monastery, a savings bank, two hospitals, one of them for Jews, a Jewish synagogue for children, manufactures of leopards, a brewery (the works), and a steam-mill. Kanizsa is the principal market for the Slavonian salt cattle. P 11732.

KANAGHERRY is a town, Nassau, Dominica, 45 m. N.W. Bellary. It is situated about 400 houses is surrounded by a fort, and carries on a considerable trade in grain. The numerous mango, rice, and sculptures around the town, prove that it must at one time have been a place of great use and importance.

KANNEA or CANNEA a vill. in the N.E. of Cayton, Eastern Province, 5 m. N.W. Trincomalee, possesses hot springs, which are in high repute for their medicinal qualities, and have a peculiar saccharine in the eyes of the Tamils, from bearing the name of the mother of Kannea. It is hence customary to resort to them on the thirteenth day after the death of any of their own kindred or friends, to perform certain funeral rites, and distribute alms. The ruins of a temple to Ganum can still be traced but the masonry and conduits which unlose the springs, and convey the water, appear to be the work of the Dutch.

KANO [add.] is a town in Western Africa, Hausa States, cap. prov. of same name, 220 m. S.E.E. Sokoto; lat. 12° N., lon. 8° 20' E. It stands within an area of an irregular pentagonal form, inclosed by a wall 30 ft. high, with a ditch on either side of it, and is entered by fourteen gates made of wood, and closed with stout iron. The circuit of the walls is at least 15 m. but of the open within there are not more than a third part, situated towards the S.E., is inhabited. This part has at its N. extremely a steep rocky eminence, called Mount Dala, about 130 ft. high, from which the whole city is seen as in a panorama. An object of a low agreeable description is seen towards the centre, where a yabara or deep stagnant pool intercepts a portion of the city from E. to W. and becoming the common receptacle of its sewage, renders the air almost pestiferous. Of the different quarters into which Kano is divided, Dala is the most ancient, and may thus be regarded as its original nucleus. This distinction is undoubtedly due to its natural strength, and is still so far retains its pre-eminence by surrounding to be the residence of almost all the wealthy Arab and Berber merchants. The other quarters N. of the yabara are inhabited by people of the Hausa race. Among the other quarters is one called Yala, which is considered as the court-yard of the city, and possesses an additional interest from having given its name to the modern capital of Adamawa. Nothing can be more irregular than the ground-plan of Kano. In every quarter city houses and

boats, with thatched conical roofs are mingled together without any regard to uniformity. In Dala, where Arab influence prevails, and it might be inferred from the wealth of the occupants that the houses would be superior, the reverse is the case. They are indeed built of clay, but in the most uncomfortable form that only objects accomplished being the greatest degree of privacy for domestic life. This has often been secured by means of small courtyards and apartments from which fresh air and light are systematically excluded, and hence, in this respect, the houses of Kano are very inferior to those of Agades and Timbuktu. The inhabitants are very industrious, and have the merit of carrying on an extensive trade in the produce of their own manufactures. Of these the principal articles are cotton cloth, woven and dyed in the form of robes, *indian*, or the oblong piece of dress, of dark blue colour, worn by the women; the *ammi*, or plaid of various colors; the *remmed* *hala*, or black *hala*; various articles in leather as sandals and shoes, bags, plain and ornamented, bridles, *tamand* *hala*, and *red* *sheepskin*.

The great advantage of Kano says Dr Barth 'is, that commerce and manufactures go hand in hand, and that almost every family has its share in them. There is really something grand in this kind of industry which spreads to the N. as far as Mourouk, Ghat, and even Tripoli; to the W. not only to Timbuktu, but even as far as the shores of the Atlantic the very inhabitants of Arguin drawing in the cloth woven and dyed in Kano, to the E. all over Barotsi, although there it comes in contact with the native industry of the country; and to the S. it maintains a rivalry with the native industry of Igboira and Uba, while towards the S.E. it pervades the whole of Adamawa, and is only limited by the nakedness of the pagan *ama-ndul* who do not wear clothing. In addition to this trade in native produce, Kano has an important transit trade, confined chiefly to two great staples. The one is the *guro* or kola nut which has become to the natives what coffee and tea are to the English, the other unfortunately is slaves. Salt and cotton also deserve to be mentioned. Of the former at least 30,000 loads, carried by pack, mules, camels, horses and asses pass annually through the Kano market, of the latter which is almost all consumed in the province, 3000 camel-loads. Ivory does not at present form an important item. The principal European goods exposed in the market of Kano are bleached and unbleached calicoes and cotton prints from Manchester French silks and sugar, red cloth from Saxony and other parts of Europe, beads from Venice and Trieste, a very coarse kind of silk also from Trieste common paper with the sign of three moons sword blades from Solingen razors from Flory. A vast increase, as well as a complete revolution in the import trade of Kano would be produced by opening the navigation of the Niger. The inhabitants, composed chiefly of Kanuri or Bornu people, Hausa, Fulbe or Follah, and Nyfwa or Nye, with a considerable sprinkling of Arabs are roughly estimated at 80,000 inhabitants of a large floating population, which, during the busy season, may nearly double the number.

KANPOO, a town, China, prov. Chekiang, about 25 m. E. Hang-chow-tse. It is an ancient place, supposed to be the same as mentioned by Marco Polo under the name of Kanfoe. At that time it was the resort of Hang-chow, and frequented by ships from India and other regions but the sea and the alluvial deposits of the Yang-tse-kiang have so increased that it is now an insignificant inland town, with a few passage junk, which keep up a communication with the opposite shore, and convey principally Chinese passengers and pig.—(Fortune's *Revue*, 1858-6.)

KANSAS, a U. States Missouri & bank Missouri not quite a mile below the confluence of the Kansas, and at the terminus of the railway from St. Louis, 125 m. W. N. W. Jefferson. It stands on high ground, consists of spacious streets and substantial houses, mostly of brick, and contains seven churches, two female seminaries, a high-school, a German free-school and various other schools. The manufactures consist chiefly of leather boots and shoes, iron castings, and brick, and the trade has for its staple articles pork and leather. Pop. (1860) 4418.

KANSAS, a state, U. States, between lat. 37° and 40° N., lon. 94° 40' and 100° 50' W. bounded N. by the territory of Nebraska, E. Missouri, S. the Indian territory and New Mexico, and W. New Mexico and Utah. With the exception

of the N. E. corner where the boundary line follows the course of the Missouri, its shape is nearly that of a parallelogram greatest length E. to W 650, breadth 200 m. area, 114,798 sq. m., of which about one-fourth is unfit for cultivation. The surface in the E. is generally undulating, with an occasional elevation of considerable height; in the centre it is more level and in the W. it is rugged and mountainous, spurs of the Rocky Mountains penetrating it for nearly 100 m. E. of the Utah-Idaho line. The prevailing rock, though sandstone abounds in various localities, and granite, quartz, porphyry and feldspar are not uncommon. The principal river and the only one which is navigable within the territory is the Kansas, which formed by two branches from the Rocky Mountains, flows E., and with its affluents, which join it on its L. bank, waters a large portion of the N. and centre. The W. and E. are watered mainly by the Arkansas. The most important mineral products are gypsum, limestone, and coal, the last occurring in a prolongation of the Missouri coal-fields. Some gold also has been found, particularly in Pike's Peak, the loftiest summit of the Rocky Mountains in Kansas. The soil is nearly barren over a large part of the centre where there is a desert tract, extending into N. Mexico but elsewhere and particularly in the E. it is rich and deep, consisting of a black loam raised sometimes with sand and sometimes with decomposed limestone. The climate is, on the whole, mild, agreeable and healthy though sudden changes of temperature and fierce winds prevail in the spring months, and the thermometer occasionally rises in summer to 115°. Tracts of forest occur chiefly in the W., among the spurs of the Rocky Mountains, in other directions their growth has been checked by the fires which often sweep over the prairies and the trees are in consequence so stunted that they are seldom suitable for being cut into planks, or for building purposes. The wild animals include the buffalo, elk, deer, antelope, prairie-dog, squirrel, horned frog, porcupine, wild turkey, wild goose, &c. Besides the white settlers there is a large number of Indians, partly wild and partly or wholly domesticated, for whom reservations of territory has been made to the amount in all of rather more than 8,000,000 acres. In framing the constitution of Kansas with a view to its admission into the Union, the question of free soil or slavery was so keenly agitated that the contending parties, after attempting to outnumber each other by the introduction of new settlers, came to blows, and a civil war ensued. For administrative purposes the state has been divided into thirty-one counties, which, according to the returns of 1880, contained a pop. of 107,206.

KANUM, a m. in India, Buxar, on dist Koonwar on the declivity of a recent embankment among lofty mountains, at the height of 9896 ft. above the sea, lat. 31° 40' N. lon. 72° 30' E. The slope is formed into terraces by means of rough and massive stone embankments the larger of these terraces are overlaid with earth and cultivated the narrower form the sites of houses, which rise above each other in such a manner that the flat roofs of a lower tier serve as platforms to the tier immediately above them. The houses are not numerous but as the whole extent of the district must be supplied in a great measure from domestic sources, each contains more than the usual proportion of inmates. As the inhabitants have a strong turn for trade a dwelling is scarcely deemed complete if it has not a small warehouse attached to it. Kanum possesses a celebrated Buddhist temple, with a library of books printed in the Tibetan tongue. Its lama, elected by the other lamas of the district, takes precedence of them all, but is subordinate to the lama of Ladakh.

KANYENNI, a m. in Western Africa, near the E. extremity of the mountains of Kong 270 m. N. of the Ivory Coast lat. 9° 50' N. lon. 4° 55' W. It is a large place, situated on a water course, and has the most important market in that part of the country. The inhabitants, Mandingoes, are partly Mahomedans, partly idolaters.

KAPALLA, a m. S.W. Africa, Kimberley country, territory Bechuanaland lat. 15° 25' S. lon. 16° 25' E. It stands on a mountainous slope of the Limpopo range, is surrounded by a dry stone-wall, and contains 3500 inhabitants whose predatory habits make them the terror of the passing caravans.

KARITZ, or **KARAT** [add.], an island, New Zealand, Cook Strait, off the S. E. coast of North Island or Ulster. It is 3 m. long from the S. E. and 1½ m. wide, lies nearly parallel with New Zealand—p. 11.

to the main island, from which it is only 3 m. distant, and is wooded and mountainous, its highest peak rising to the height of 1780 ft. On the W. the hills rise steep and precipitous from the sea, on the E. they descend in gentle slopes, and are intersected by deep ravines. Entry Anchorage, at its S.E. extremity, is formed by three small conical-shaped islets, which with the rocks extending from them, afford good shelter from the S.E. while Kagit itself protects it from the N.W. The depth of water is from 18 to 17 fathoms. There were formerly extensive whaling establishments on the island, and whalers have ridden out the whole winter gales at this anchorage.

KAPSDORF a m. Austrian empire, Hungary, co. Zips, about 8 m. W.S.W. Leutobach with saw and flour mills. Beautiful carnallians are found in the vicinity. Pop. 1400.

KAFUKA, a m. S.W. Africa, Kimberley country in the N.E. of territory Namibia; about lat. 12° 40' S. lon. 17° 30' E. It is fortified by a palisade and a ditch and has a pop. of about 1300. The Kalahanga a large river, runs in its vicinity.

KARA HISSAR [add.] a m. Turkey in Asia, push River, 86 m. S.W. Trebizond, at the height of 3600 ft. above sea level. It is an ancient place which under Turkish rule has fallen greatly into decay though a number of new houses, some of them four stories high, seem to indicate that it has begun to make progress. The principal buildings are the mosque, the castle, and the bazaar. The military importance of the place depended on its castle, which, from the commanding height on which it stands might well be deemed all but impregnable but now that it is no longer kept up, and does little more than serve to furnish the governor with a residence, Kara-Hissar has little to depend upon for present or future prosperity except its mines of alum, copper, and silver. The first, by far the most valuable of the three are extensively worked, and furnish raw material to four large alum factories in the vicinity. The inhabitants, chiefly Armenians and a few Greeks almost entirely monopolize the business and the trade connected with it. The Turks, though the dominant race, form a small minority confine themselves to agriculture and a few handicrafts.

KARAKAL a m. Turkey in Europe, Walachia, cap. circle Romanetz in a beautiful valley 90 m. W.S.W. Buclarescu. It is the seat of a court of primary jurisdiction and has a church and a normal school. An obstinate battle was fought here between the Turks and the Russians on the 30th of May 1854 when the latter were defeated. Pop. 1600.

KARANOVAZ, a m. Turkey in Europe, Scutaria, circle Thessalon, on the Ther river its confluence with the Morava 73 m. S. by E. Belgrade. It is the residence of the bishop of Lohista, and has a church and a school, and a much-frequented yearly market. Pop. 1000.

KARASU a chain of lakes, European Turkey Dobrusha, nearly in the line of Trajan's wall 22 m. W. Kustendil. The area covered by them was originally a valley which being lower than the waters of the Danube when swollen, received the surplus and was thus transformed into a chain of lakes, communicating with that river by a outlet 3 m. long, while they themselves extend eastward for 13 m. more. The proposal of forming a navigable canal, which commencing at the E. extremity of the lakes should be continued to the Black Sea at Kustendil derived all its plausibility from the assumption now proved to be erroneous that the Danube, instead of merely forming the lakes by its back water at one time flowed through them, and had one of its mouths near the E. terminus of the proposed canal.

KARATOVA, a m. Turkey in Europe in the N. of Macedonia, ryetel and 40 m. E. Uskub, in a mountain basin open only toward the W. It is watered by three mountain streams, and contains three small mosques and a church. At a short distance there are mines of lead, so rich in silver that there is a farmstead for extracting it. Pop. about 6000.

KARZAG, a m. Austrian empire Hungary co. Steierwiesenburg, on the Hortobagy arm of the Theiss and on the railway from Pesth to Debreczen with 12,669 inhabitants, who mostly belong to the Reformed church, and are employed in cultivating the ground rearing cattle, and growing wine and molasses.

KARIGMAWA, a m. Western Africa, Bornu, 180 m. N.E. Kano. It is an open struggling place, lying out of the

caution break and probably indebted to its sequestered position for a degree of comfort and prosperity rarely seen in the neighboring districts. According to Dr Barth, it displayed a most animated and cheerful picture of a wealthy and industrious little community, the men sitting in the shade of some fine acacia-trees, some of them busy making mats, others weaving, while the women were carrying water or setting the pot upon the fire for the evening repast. Oxen, goats, and fowl roved about in considerable quantities.

KARKENNA or **KARKENNA**, a group of islands, N Africa, Tunis, off the N.E. coast of the Gulf of Gabes, opposite to the town of Bizet. The largest of the islands about 18 m long between N.E. and S.W. was called by the ancients *Cosima* and has given its name to the whole group. The inhabitants are very industrious, and weave articles in carpets to such an extent as to form an important branch of trade. They also engage in the sponge and other fisheries, and with the produce of these and their date-trees, which yield far more than they are able to consume, supply themselves with many necessities and comforts. One was the Tumulous marks of the Karkenna Lakes is to employ them as a penal settlement for families.

KARNAK LOGON or **LOON BIKI**, a town Western Africa, Bornu, cap prov Logon, on the Logon, an affluent of the Sher 70 m S from Lake Chad. It is divided by the river into two parts. The part on the N.W. or 1 bank has only one gate, which is so narrow that a loaded camel cannot pass it. Nor is the interior attractive. The cottages evidently belong to the poorer classes, and nothing worthy of notice is seen till the principal street is reached, where the palace of the sultan occupies one side of it, and the palace of the Kegbama or Ishlaghwan the other. The former enclosed by a wall 14 ft high covers a large space, which is occupied chiefly by large courtyards separated from each other by covered apartments, the walls a grained dwellings, and the public court of audience, with a raised platform on which a rough kind of seat, painted red, serves for a throne. The latter which was assigned to Dr Barth as his quarters surprised him not a little by the superior and even grand style of its architecture, and is thus described by him. This very spacious palace consists of a number of wings enclosing small quadrangular courtyards, and having an upper story of extensive apartments. The only part which did not correspond with the appearance of the rest of the building was the staircase, which was rather dark and inconvenient. My own apartment was not less than 35 ft long by 15 ft wide and as many high, and received sufficient light from two semi-circular windows, which of course had no glass, but could be closed by means of a shutter of reed. The ceiling was gable-shaped—rather a remarkable phenomenon in these countries; it was filled out with thatchwork. The chief branches of industry are weaving and dyeing; in the former the people are very expert and make excellent shirtings, in the latter owing to the inferiority of their indigo, they do not succeed so well. The principal crops of the environs and whole province are sorghum millet, and cotton, the last in great quantity.

KARWIN a town in Western Africa, Senegal, dist. Fatick, about 38 m S.E. of Fatick with a castle, coal mines and 1000 inhabitants.

KASURU a town in Western Africa, Haoma, Senegal, cap dist. of same name, 40 m N.E. Kono. It stands in a rocky district, much of which remains in a state of nature, densely covered with wood is surrounded by a clay-wall, and has a weekly market. The space it occupies is but thinly inhabited.

KASHA EL-HAMRA a vil N Africa Sahara, Oasis of Tasi, dist. Angaiter, lat. 20° N; lon. 1° 30' W. It is a vastness situated at the point where several caravan routes meet; and consists of about 150 houses, grouped in the middle of well-stocked gardens and date plantations. Mad-dar banana, and excellent tobacco are grown in the vicinity. **KASSEM** (Upper and Lower), a prov Central Arabia, Yajid.—Upper Kassem is an elevated plateau of granite, and forms part of a long ridge of which crosses the southern half of the peninsula. Its surface is generally covered with grass in spring and summer, and with shrubs and brushwood at all times, and thus affords excellent pasture for sheep and camels. Sometimes the plain sinks far miles

into a shallow irregular basin, where streams pour down and water collects in the rainy season, leaving pools not entirely dried up even in the autumn. Here the alluvial soil produces a more vigorous crop of shrubs. Increasing the plateau at an acute angle, are occasional long and broad valleys of light soil, half alkali half sand, furnishing water wherever wells are sunk. Adjacent to the wells rise the villages of Upper Kassem numbering about forty and containing populations varying from 500 to 8000. Every hamlet is surrounded by palm-groves, gardens, and fields.—Lower Kassem, about 120 m long and 80 m broad, and 200 ft below the level of the uplands, stretches out in an immense plain, studded with towns and villages, towns and groves, showing everywhere life, wealth, and activity. Fifty or more good-sized villages, and four or five large towns, form the commercial and agricultural centers of the province, and its surface is moreover thickly strewn with smaller hamlets, isolated wells and gardens, and traversed in all directions by a network of tracks. A series of high water-lowers affords the inhabitants a means of descending the approach of luxury or invasion. The soil red or yellow wherever irrigated, bears a copious and varied vegetation. The staple article of cultivation is the date-palm which is often the entire support of the poor townsmen or villagers. Corn fields also and fields of maize, millet, vetches, and the like, surround the villages, and afford a plentiful harvest, besides melons and pot-herbs. Another produce is that of the cotton plant, but the quantity grown only supplies the home wants. The inhabitants are possessed of commercial and industrial talent, and are cheerful and vivacious. In religion a long-continued intercourse with Mecca has given them a tinge of modern Islamism, a very low standard of morality prevails. Upon the rise of the practically independent kingdom of Ubeid Shamer Upper Kassem revolted from the Wahabite tyranny of Najed and annexed itself to the new kingdom by universal consent. The pop. of Upper Kassem is estimated at 25,000 or 30,000.—(Pulgron.)

KASHIMMA a town in Western Africa, Bornu about 78 m W Kuka. It has a fine healthy site on the top of a sandy swell, which rises about 800 ft above the valley. It is without defence and though consisting entirely of huts made of reed-stalks and reeds, is large and populous. The district around is watered by the Komadugu Wadi, the main stream of Bornu, is beautiful, and the fertile native land has allowed its banks to be converted into an almost impenetrable jungle, the elephant has taken possession.

KASHIN, a town Russia, gov and 75 m N.E. Tyar, cap circle of same name, on the Kaelinka, about 8 m above its confluence with the Volga. It has 23 churches, a monastery, two religious and two secular schools, a distillery and a brewery, a wax-smelting establishment, candle-works, tile-works, &c. and two annual fairs, at which are sold great quantities of glass and stone-ware, hardware, linen cloth, yarn, horses, &c. Within the circle great quantities of leather and paper are manufactured. Pop. 4947.

KASHIPOOR a town India N.W. Province, dist. and 30 m N Moradabad, in a marshy plain overtopped with tall grass and jungle. It is famous as a place of pilgrimage contains several temples, and possesses a tank of peculiar sanctity in which pilgrims usually bathe on their way to Badrinath. A raised foot occupies a height a little to the S.E. An active transit trade is carried on here between Russian and Chinese factories on the one hand and the more southern parts of Hindustan on the other. Some of the traders are said to have accumulated great wealth.

KASHIRA a town Russia, gov and 50 m N.E. Tula, cap circle of same name, r bank Oka. It contains six churches, a circle and a parish school, and manufactures chiefly of woollen cloth. The environs are covered with gardens. Pop. 2185.

KASHINA, **CASHINA**, **KACHINA**, or **KATHINA**, a town Western Africa, cap princip. of same name (which, though now only a province, was once an independent kingdom), 85 m N. W. Kano, lat. 12° 59' N; lon. 8° 59' E. It is surrounded by clay walls, and is a very extensive space of which not more than one-tenth is built upon, the rest being laid out in fields or covered with wood. Most of the houses are in ruins, in consequence of the preference given to Kano since the Fellatah

conquest. The governor's house, about $\frac{1}{2}$ m. E of the other buildings, resembles a large village. The main houses are chiefly painted bullock hides and various articles in leather, and the trade, though greatly decayed, is still considerable. The inhabited houses number about 700. Though it has now lost the appearance of a city, and consists chiefly of a large number of light detached cottages, its importance is still indicated by the immense mass of its wall, which in the lower part measures not less than 80 ft. In height, the vast area which it incloses having an estimated circuit of 18 m. Probably the whole of this space was never covered with buildings, but if only half was so, its pop. must have been at least 100,000. Among the fruits ascribed in its markets are hives of tolerably large size, and the beautiful large fruit of the gondo (*Carice papaya*). The ravine of Katsina is one of the finest parts of Negroland and being situated just at the watershed between the basins of the Chari and the Kware or Niger at an average elevation of 1900 to 2500 ft. has the advantage of being at once well watered and well drained so that its climate is less insalubrious than that of some other adjoining regions. Dr. Barth giving a bare list of the chief places in the prov. says that not less than fifty of them have each 4000 inhabitants.

KASLIJSKOI, a Russian empire gov. Oranburg on the E. slope of the Ural Mountains, 250 m. S.E. from Yek. Its churches and other large buildings, with their green domes and golden crosses sparkling in the sun give it a grand and imposing appearance; while its Zavon or iron works, situated on the margin of Lake Balash, are famous for the superior quality of their castings. Among these are tables performed in ivory and foliage of most delicate execution, chairs of a similar pattern, small boxes, baskets, and card dishes in beautiful open work, animals, paper weights, &c. (Atkinson *Oriental and Western Siberia*).

KASH-EL-JEBEL, a fort (genoa and 75 m. S.W. Tripoli, in a mountainous district, on the very edge of steep rocky cliffs, with an extensive view over the plain. It was garrisoned at the time of Dr. Barth's visit with 400 men, and was a chief instrument in the hands of the Turks for over-awing the mountains, to whom it owes its name, meaning 'the oppressor's stronghold.' So much importance was then attached to it that the *Ismaelians* or governor ranked as the second person in the regency and ruled over a very extensive tract of country towards the S.E. and S.W.

KASTORIA or KAZANI, a Turkish city in Europe, eyelet Runi II, on an affluent of the Karama or Beyron, 21 m. N. of Monastir. It is advantageously situated on a lake of same name, where several important roads meet leading both in land and toward the coast, is the seat of a Turkish governor, has many handsome houses of two stories, and carries on a very extensive transit trade. Pop. from 8000 to 9000 chiefly Greeks and Turks, with Albanians, Bulgarians, and Jews.

KASTRON, a town Greece, nomarch Cyclades, cap. of Milos. It rises in the form of terraces on the loftiest mountain of the island near its N. coast, and has both a picturesque and a healthy site. Its houses are built partly in the Venetian and partly in the Turkish taste, and it has justice of peace court, a hospital, a school, and a parish school. Northward towards the coast lie the remains of the ancient Milos. Pop. about 800.

KATAR, a prov. E. Arabia, a dependency of Oman on the Persian Gulf. It is formed of a great extent of barren hills, almost entirely devoid of trees and vegetation and is bordered by a muddy beach $\frac{1}{2}$ m. in breadth. Inland, beyond the hills, are downs offering very little pasture and dotted with clusters of wretched cottages and huts, all well fortified against marauding Bedouins. The wealth of the province however consists in the pearl-fishery which at the best and most expensive in the Persian Gulf, hence the real homes of the inhabitants are in the countless boats which line the shore. The climate of Katar is remarkably dry and the sea-air loses all trace of humidity a few miles inland. The soil is poor, gravel and marl mixed with sand. The gardens are small and unproductive, and the air probably owing to the stagnant pools of sea-water that border the shore, is said to be unhealthy. — (*Palgrave*).

KATQILA, a river, Russia gov. Tver, in the S.W. of the Crimea, is formed by several streams from the Tala Mountains; flows W. N.W. between and nearly parallel to the

Alma and Belbek, collecting its waters from numerous valleys and hollow glens, and lastly passing through a fine open and fertile country interspersed with villages and embellished with orchards, falls into the Black Sea about 7 m. N. of Yevryopol. In summer it is only a shallow brook, but in winter and spring often becomes a swollen and dangerous torrent.

KATHERIN, a town, Austrian empire, N. Nile, dist. and at a short distance from Tropas on the Egyptian frontier with a large seam of gypsum, and 3500 inhabitants.

KATONGO a town S. Africa, Makololo country, about 10 m. E. of the Loambya or Zambezi, lat. 10° 16' 38" S. and long. about 28° 30' E. It stands embosomed among trees on a ridge which there bounds the valley of the River. At this point summits the lands which are never inundated and which rising gently from a dead level greatly resemble the edge of the forest in the valley of the Nile. The Banyati inhabitants, who are industrious and skilful cultivators have fine gardens and raise large quantities of maize, millet and native corn (*Holcus sorghum*) large m. grain, and beautifully white. They grow also yams, sugar cane, Egyptian cotton, sweet potato, mamee or orange of two kinds pumpkins, melons, and ground-nuts. The view from the ridge, embracing the broad river glancing out at different points, the valley dotted over with villages and cattle stations, and the cattle quietly grazing in large herds while hundreds of *leches* (antelope) feed securely beside them, is truly wondrous. There is however a serious drawback to all this beauty. No part of the district is free from fever even the natives suffer by it. Dr. Livingstone, though he tells almost nothing of the town declares it to be the best place he has yet seen on his journey to Loanda.

KATSEHA, see KAMBA, on *Shipp.*

KATTYWAR, a prov. India, comprehending the whole of the peninsula of Gujarat. It lies between lat. 20° 45' and 25° 10' N. lon. 69° 5' and 73° 14' E. and is bounded W. and N.W. by the Ruin and the Gulf of Cutch S.W. and S. the Arabian Sea, and E. the Gulf of Cambay and dist. Ahmedabad area, 18,800 sq. m. It is divided into 10 districts called *talukas*, of which again are subdivided into about 210 petty territories, held by chiefs as tributaries either of the British government or of the Gujowar. Their aggregate revenue is estimated at £450,172 of which £104,798 is payable as tribute. The surface is generally undulating but rises occasionally into a number of ridges, which attain their greatest height near the centre, where most of the streams have their sources. Collecting the drainage as they descend they carry it to the ocean directly or indirectly through the Ruin the Gulf of Cutch and the Gulf of Cambay. In the latter there is a wide tract full of canals, rivers, and other fastnesses and with a climate so deadly that none but the Scudon, a race of African descent, can encounter it with impunity. The grains most cultivated are bajra or millet sor or maize and wheat. Cotton is the principal commercial crop. The soil being generally sandy cannot be maintained in a state of fertility without constant irrigation. The principal domestic animals are the horses once celebrated but now greatly deteriorated kind, of which one breed called *desoon* is much prized. The buffaloes are also excellent, but the camels are few small sized and little valued. Among the wild animals are lions, leopards, shikhs or hunting leopards, wolves, jackals, wild asses, antelope, and porcupine. None of these, however, are so destructive as a species of migratory rat, about twice the size of the common rat, which makes their appearance at intervals, and moves across the country ravaging it to such an extent that in 1814 they actually produced a famine. Whence they come, and whether they go, are points which have not yet been ascertained. Pop. 1,485,900.

KATUBU, an island of the Niger, W. Africa, 800 m. S.E. Timbuktu. It is almost entirely occupied by a vil. of the same name which is adorned by two beautiful tamarind trees, and has a pop. of about 1200 living in about 250 huts.

KATUMBELA, a town S.W. Africa, on both sides of the river of same name, 30 m. N. Benguela. It consists of about 100 houses, among which those of the Portuguese commandant and some private individuals have a handsome exterior; the others are mere huts thatched with cane. On the E. bank of the river stands the fort, comprising a circular hill, and provided with six guns to guard the passage; and advance the predatory hordes of the neighbourhood. The inhabitants,

chiefly Munduche, pure and mixed, live especially by trade, for which the caravan passing here gives great facilities. They also cultivate the soil, raising maize, potatoes, manioc, bananas, and annons.—The river Kaumbela, which is tolerably broad and deep, rises in the S.E. among the mountains of Kinta, descends rapidly from its lofty source, and receives a number of mountain torrents, which, in the rainy season, cause it to overflow its banks. While pursuing its course to the N.W. it forms several waterfalls. Having now become a tolerably sized river it flows W. in a deep and rocky bed separating the Independent Ganda and Kisanthah tribes from the Portuguese possessions, forms another beautiful waterfall called Ups, and dividing into several branches reaches the ocean. Owing to bars at its mouth, and falls and cataracts in other parts of its course it is nowhere navigable.

KAUMBERG a tn. Austrian empire, Lower Austria, circle Upper Wiesnwald, 23 m. S.W. Vienna, with several saw-mills, and a considerable trade in fruit which is grown abundantly in the district. Pop. 1230.

KAYALLA a tn. Turkey in Europe, syria and 75 m. N.E. Salonic on a bay of the Archipelago, partly formed on the S.E. by the island of Thess. It was once a notorious resort of pirates and in the birth-place of the celebrated Mahomet Ali who erected a Turco-Greek school here in 1846, and endowed it with property belonging to him in the island of Thess. Pop. about 5000.

KAWAU an isl. New Zealand near the W. shore of the Gulf of Hauraki, on the N.E. of North Island or later. It is 5½ m. long from N. to S. and nearly the same in breadth from E. to W. It has an average height of 500 to 600 ft. is hilly and well wooded, and on Bon Accord harbour on its W. side affords good anchorage for the largest vessels. On the S.W. there is a copper mine in course of being worked and a large smelting establishment.

KAZAN a tn. European Turkey 35 m. S.S.W. Shumla, in a kind of mountainous plain one of the most inaccessible valleys of the Balkans. It is the chief, second largest post-office, and two schools, are the principal public buildings. It is an industrial place and carries on extensive manufactures of coarse cloth, and is said to owe its prosperity to its municipal government, which gives a degree of freedom and independence action unusual in Turkey. The schools of Kazan are said to supply the best popular teachers in Bulgaria.

KAZANKA a tn. N.W. Africa, Kumbunda Land dist. Mapinda, is situated at the N.E. extremity of a lake of same name, about 12 m. E. of the Atlantic, and N. by E. Benguela, is the residence of an independent chief and has a pop. of 2000 who are famous hunters of elephants and hippopotami.

KAZIMIERA a tn. Russian Poland, gov. Lublin, named after its founder Casimir the Great, stands in a pleasant valley on the bank of the Vistula, has three churches, one of them a very ancient and beautiful structure, numerous corn magazines, and a large trade in corn and other produce. An obstinately contested battle was fought here between the Poles and Russians on 16th April, 1831. The town contains 2735 inhabitants of whom the majority are Jews.

KEBBE, or **KEBBI** a tn. W. Africa, Massou Hadou, cap. dist. of same name, 70 m. S.W. Sokoto. It stands on a slope about 250 ft. above the *savanna* or large grassy valley which intersects the whole province from E.N.E. to W.S.W., and where the country more secure would by its extraordinary fertility richly reward the labours of the cultivator. Though walled, well built, and rather densely populated, the almost total want of trees gives it a dull look. About a mile from the present town stood an old town, to which the name of *Birni-n-Kebbe* is properly applied, on a beautiful and most commanding site. It was founded by the dynasty of Kenna when the rival Songhay empire was broken up, and became the centre of a considerable trade till it was in its turn destroyed by the Follahs. Its wall, and some ruins still remain to show where it stood.

KEBILLI a tn. Africa, regency and 225 m. S.W. Tunis, cap. dist. Neftma. It possesses five mosques, and sends out several direct caravans, but at present is only recovering from the slaughter inflicted upon it by the bey, who, in 1837, to punish it for harbouring a celebrated rebel from Tripoli, of the name of Rhocne, brought a force against it and

laid great part of it to ruins. The inhabitants are distinguished for industry and intelligence, and have fair complexion.

KECHIDUNIYA a tn. W. Africa, Bornou 180 m. N.E. Kano. It is a comfortable and populous little place, surrounded by a stockade, and has a well-frequented market, in which four-milk ground-nuts, grain, sorghum, young cotton, &c. are sold. Soap is also sold.

KE-CHOW, or **Ke-chow** a tn. China, prov. Hoop, 1. bank Yang-tse-kiang, 60 m. S.E. Wooding. It is surrounded by walls, crowning a bluff which overhangs the river, and defended by a circular stone fort or martello tower, rising from the midst of the channel. The number of junks shows that the trade is extensive.

KECEA a tn. Austrian empire, Banat, about 20 m. W.S.W. Temeswar; with 3779 inhabitants, who grow excellent maize and oats, and rear great numbers of sheep and cattle.

KEIJEREE a tn. India, presid. Bengal, 46 m. S.W. Calcutta, on the E. shore of the estuary of the Hooghly, and on the most westerly channel. This channel, having formerly a depth of 6 or 7 fathoms, was that chiefly used by shipping destined for Calcutta, but in consequence of a sand-bank which has been allowed to accumulate, the depth does not now exceed 3½ fathoms at low water. The first section of telegraphic communication in India was laid between Keijeree and the capital.

KEENE a tn. U. States, New Hampshire, cap. co. Cheshire, 1 bank Achamok, of the junction of the Cheshire and Concord Rivers, railways, 77 m. N.W. Boston. It is pleasantly situated, regularly laid out, and well built, the principal streets radiating from a central square on which a handsome court-house is built. The other public buildings are three churches, a high-school, and a town hall. The manufactures include woollens, machinery and doors, sashes, and blinds, for export to California and Australia. P. 4320.

KEELE (Aix and Klee), two places. Austrian empire, Banat, circle Neusatz.—*All or Old Keel*, about 12 m. N. Neusatz, contains 6421 inhabitants chiefly employed in agriculture and the raising of cattle.—*Klee or Little Keel*, about 4 m. N. of the former, contains 2503 inhabitants, who trade in agricultural produce, chiefly butter and hemp, and in cattle.

KEEFF (see *Seon* or *Seon Terece*) a tn. regency of and 86 m. W.S.W. Tunis. It is built on an elevated plateau, in the midst of mountains about 27 m. from the frontier of the Algerian province of Constantine and in almost the same latitude with that city. Its position renders it the most important military point of the regency. In the centre of the town are the remains of a remarkable Roman wall the only antiquity existing in the place. The inhabitants consist chiefly of warlike mountaineers, of a remarkably independent spirit, of which they have often given proof in times past in their intercourse with neighbouring Arab tribes, and even the boys of 12 have met with resistance from them and refused to pay tribute. From the mountains of Keef are obtained the horses called Djahils, which form the chief part of the mounts of the Turkish cavalry. Keef is surrounded by forests of cedar and chestnut, which attain in the locality a larger size than in other parts of the regency. The pop. of Keef is 5000 to 6000.—(Chamisso, *Aperçu Historique de la Régence de Tunis*.)

KEHNU a tn. Persia, prov. Kerman about 70 m. N. of the Straits of Ormuz. It consists of about 800 huts clustering round the bottom of a ruined fort, built partly of stone and partly of earth. The ruin of the fort is attributed to earthquakes, which are said to be of frequent occurrence. The inhabitants, a mixed race of blacks, or the descendants of Baluchians, are almost all slaves belonging to the chief of the place. The chief products of the district are barley, wheat, rice, indigo cotton, and dates.

KEHDANA, a tn. Russia, gov. and 84 m. N.W. Kars, circle Rostov, on the Western, and a Reformed church, a synagogue, and a pop. of 3728.

KEIMES (see *Fricomina*), a tn. Turkey in Asia, Anatolia, 75 m. S.E. Constantinople. It stands on the side of a brook, whose banks are well planted with plum and apple trees, and contains the remains of ancient buildings, which have been much employed in modern erections, such more especially in the mosque, where, among other objects of interest,

there is a large arthropod. The inhabitants raise crops of barley and wheat in the surrounding district, which, however, is by no means fertile, and among their other live-stock possess some Angus cows.

KELENO a narrow lake, W Africa, near the N.W. extremity of Senegal, on the frontiers of prov. Muniyo and Zinder. It is situated in a hollow at the foot of a rocky escarpment which rises out of a plain not far from a village called Maghaya. All round the lake, and in striking contrast with its snow white surface, is a border of luxuriant vegetation formed by well-kept cotton grounds and kitchen gardens. On the lake itself, which has a current of 1 1/2 m there is a current of natteron receding on a black boggy soil, and varying in thickness according to the season, being scarcely an inch thick in the hot season, and considerably more at the end of the rains.

KEELING is an Austrian empire, Transylvania circle and about 26 m N.W. Hermannstadt, with an old castle, a trade in wine, and 1190 inhabitants.

KEELY a harbour S America, Chile in the N.E. corner of the Gulf of Penas between San Estevan Gulf and Chetop Channel lat. (N point) 45° 58' S. lon 74° 5' W. It is 2 m wide at its entrance stretches for about 8 m in a N.E. direction, and possesses the advantages of sufficient depth, complete shelter and abundance of wood and water. It is described, however as dull, damp, and dreary. Its shores are high and rugged, a peak on its S side rising to the height of 1640 ft., while some of the hills immediately beyond have heights varying from 1400 to 1800 ft. One of the most remarkable features in the scenery is an extensive glacier stretching northwards into the country for many miles. There are no human inhabitants, and apparently the only representatives of animal life are a few birds and hair-seals.

KEELUNG an island, harbour, and town Chinese empire, in the N. of the island of Formosa. The island standing in the middle of an extensive bay 22 m wide into which the N.E. monsoon rolls a heavy sea, is a remarkable mass of black rock, rising precipitously on all sides to the height of 580 ft., and terminating in a rather flat summit. It is important as an excellent landmark guiding to the harbour the entrance to which bears S.W. from it, and is 2 m distant. The entrance is formed by Pala Island on the E. and Inaga Point on the W. Within the shelter is complete, and the depth sufficient for the largest vessels.—The town situated near the bottom of the harbour is described as a haggard collection of wooden huts occupied by a very poor and wretched population of Chinese extraction. The trade, however is extensive, and is carried on chiefly with the river Min Chichoa, Amoy and Tongking. To the last named there is a considerable export of coal which is worked to some extent a mile E.S.E. of Keelung to the others the exports are rice, ground-nut oil, camphor and camphor-wood.

KEMPTVILLE is in British America Canada West, on Grenville on a branch of the Rideau canal and on the Ottawa and Prescott railway, 106 m W.S.W. Montreal, with six churches, a grammar and a ladies school, sawmills, foundry, and a large trade in flour and lumber. Pop about 1650.

KENAMOU a river Labrador, enters Hamilton or Esquimaux Inlet from the S, 80 m from the coast. It is a succession of rapids, and scarcely admits of navigation even by canoe. Its source is said to be in the lakes and marshes which occupy the table-land of the peninsula.

KENDAL a river Western Africa, on a small in the Niger 85 m S.E. Timbukto. It is of considerable size, the river covering the whole surface of the island while the river scenery in its vicinity is of the most romantic description. Immediately opposite to it is the rocky cone of Warha, which is seen from a considerable distance, and forms a conspicuous object to the surrounding country and immediately above and below the channel is so completely covered with woody islands as to seem at first sight to oppose a complete barrier to navigation. Indeed, between Kendal and the Cove of island and the opposite bank two passages remain, apparently free from any serious obstruction. The inhabitants are of Senegambian extraction, but the Felleth, the dominant race, were settled in the neighbourhood, and possess large herds of sheep and cattle.

KENNEBEC (add.), a river, U States, which, deriving its principal source in Moosehead Lake in the central part of Maine, receives the Dead on its R. bank, and then flows nearly due S on the meridian of 70° On approaching Norridgewood it turns E., but after flowing 12 m. resumes its original direction and rejoins it to its mouth in Sheepscot Bay, an irregular indentation of the Atlantic coast studded with numerous islands. Its chief affluent is the Androscoggin, which joins it on the right 18 m from the sea. In its whole length of 150 m, the Kennebec has a descent of 1000 ft. Large ships ascend it 42 m to Biddeford, steamboats 40 m to Hallowell and small craft 54 m to Waterville. The tide ascends 42 m to Augusta, and to improve the navigation above that point, and at the same time obtain an increase of water-power a dam with locks has been constructed at the expense of \$50,000. Below Bath the river is always open except in seasons of unusual severity, but at Hallowell it is closed by ice from the middle of December to the beginning of April.

KENNEBUNK [add.] two places, U States.—1. A town and port of entry, Maine, on the Kennebec, at its mouth in the ocean 22 m S by W Portland. It contains six churches, 14 public schools, a yarn factory and several saw mills. Ship-building is the chief branch of industry. The inhabitants were formerly much engaged in the West India trade and own about 50 vessels. Pop. 2078.—2. Kennebec Port, also in Maine, and at the opposite side of the mouth of the river contains seven churches, 18 schools, a brass-foundry, and several saw and flour mills. The harbour, which is excellent, has building-yards and is occasionally used for shipping lumber, but most of the vessels owned by the inhabitants are employed in coasting and fishing. Pop. 1668.

KEOKUK a town U States Iowa, at the S.E. corner of the state, at the foot of the lower rapids of the Mississippi 2 m above the confluence of the Des Moines, and on the Keokuk Port Des Moines and Minnesota railway 205 m above St. Louis. It is built partly at the foot and partly on the summit of a limestone bluff about 150 ft. high, and has broad regular streets with many handsome houses. Its public buildings are 12 churches a public school occupying a very handsome edifice, a medical college, a female seminary and a number of academies. The industrial establishments number about 50, and the trade, chiefly in flour and lumber, is very active. Pop. about 8189.

KEHANGORE a small stream which joins the Belg 10° 10' S, lon 17° 30' E. Its inhabitants are almost all employed in working and smelting the iron ores of mines in the vicinity or in making various articles of smith work, particularly hoes, for which there is a great demand in the adjoining countries, where they form a kind of currency. Pop. about 4000.

KEROWLEE a petty state India, Rajpootana, between lat 25° 58' and 26° 48' N, lon 76° 45' and 77° 15' E, and bounded N by Bhujpore E by Dholpore S by the Channel separating it from Beluchistan Dholpore W the Hoonas, separating it from Jeypore and N.W. Jeypore area, 1878 sq. m. aggregate revenue, \$50,000. Scarcely anything is known either as to its physical features or cultivation. Pop. roughly estimated at 187,600.

KEROWLEE, cap. of the above state 75 m S.W. Agre lies in a country rendered almost impassable by the number of ravines which intersect it, is surrounded by a wall of masonry and defended by five forts and consists of narrow filthy streets lined with houses of which some are substantially built of brick faced with stone. One of the forts contains the rajah's palace, is described as a fine structure, faced inside and outside with red stone, and surrounded by lofty towers.

KERZ a town Austrian empire, Transylvania circle and 18 m S.E. Hermannstadt, with the picturesque ruins of a Cistercian abbey which King Matthias suppressed in 1497 on account of the dissolute lives of the inmates. Pop. 560.

KESSIL-BACK NOOR, a lake, Chinese Tartary among the Sym-Shan Mountains, about lat. 43° N, lon 57° E. It is about 70 m long and 18 m broad and is bordered by hills on the N.E. but on the S.W. has flat shores extensively covered with reeds, and in some parts affording good pastures.

KEVE, or Koro, or Koro, a river S.W. Africa, Benguela, which rises in the plateau of Ganguku, some N.W., separating Hambo on the W from Kambo on the E, traverses the N.E. portion of Namibia, and terminates the mountainous districts Kibala and Amhara, where its channel is obstructed by cataracts. On approaching the sea it forms several deep lakes, in which crocodiles and hippopotami abound, and then flowing smoothly in its deep bed, falls into the Bay of Old Benguela, in the Atlantic, in lat. 11° S. During the rains it has a great extent of country under water.

KEW-HSEN, or Kew Hsen, a ts. China, prov. Ngantse, picturesque situated under a range of hills skirting the E. bank of the Yangtze River, about 80 m. above Kankin. Having fallen into the hands of the insurgents, and been afterwards recaptured from them it is now half in ruins, and presents few traces of its former importance. It is, however, gradually recovering since the suppression of the Taiping rebellion in 1864.

KEW KIANG or Kiu Kiang, a tn and port, China, on the E. bank of the Yangtze River, 590 m. by its course from Shanghai, and a few miles above the N. extremity of Lake Poyang. It is one of the open ports under the regulations of the treaty of Tientsin ratified in 1860 at Peking, which gave the foreigners, who were the subjects of various lands from the inhabitants for a settlement. This has been chosen on the river frontage where the ground is laid out as a commodious wharf, with a good depth of water for shipping. The residents are formed into a council for municipal purposes, and streets have been laid out at right angles, where substantial warehouses and residences have been erected. A vice-consul is stationed here and a branch of the foreign maritime customs, with a staff of 21 officers. At the back of the settlement lies the walled town of Kew Kiang which takes its name from the name given to the fort on the adjacent hills which form the western head at the entrance of the Poyang Lake. It was on account of this central position, and its reputation as the entrepot of trade from the province of Kiang-see through the lake, that Lord Elgin fixed upon it as a treaty port as the nearest outlet for the green-tea districts. This has formed the staple article of export in 1864 the value of it, including about one-fifth black tea, amounted to £1,350,862. The imports consisted of Manchester goods, sugar, rice, opium and edibles, wine amounting to £1,043,317 the balance of trade being made up in copper, silk and Mexican dollars. The shipping imports comprised 477 ships, in the aggregate 332,467 tons, and onwards a fraction less, as they were chiefly steamers that carried the produce to Shanghai for shipment to British and other foreign ports. This will give the total value of the trade for 1864 as £3,401,109 against £3,456,319 in 1863, showing a falling off of about 30 per cent. The import, export and coast trade duties, together with the tonnage dues, amounted to £209,778, against £237,938 in 1863. Kew Kiang was once a thriving and populous city surrounded by a wall from 3 to 6 m. in circuit, but, having fallen into the hands of the rebels, suffered much from a long siege by which the Imperialists ultimately effected its recapture. The consequence was that little more was left standing within the walls than a single dilapidated street containing only a few mean shops. The only building possessed of any interest is a temple which the emperor has caused to be built since his authority was restored and in which is a tablet erected by a minister of state who has found a Tartar general who fell during the siege. In the suburbs, without the walls, is a street more substantial and with better shops than the one within them. There is also in the same locality an ethnographical garden. (R. Molesworth a MS. Notes, Reports Chinese Maritime Customs.)

KEYHAULOU, a ts. India, Orissa, in a fertile country 120 m. N.E. W. Berda. It is a considerable place, with 12,000 inhabitants, who are extensively engaged in manuf. factories.

KEY WEST is a U. States, Florida, cap. of Monroe, on the island of same name in Florida Bay lat. 24° 25' N. lon. 81° 45' W. Being the key to the best entrance to the Gulf of Mexico, it is strongly fortified, especially by Fort Taylor, which is built on an artificial island within the main entrance to the harbor. The streets of the town are spacious, and the houses, generally of the cottage style, are often

embosomed among trees. The principal buildings are three churches, large and commodious barracks forming three sides of a quadrangle, a marine hospital, a court-house, and a custom-house. The principal employment of the island is what is called "wrecking," but deserves a better name as it is conducted not in the lawless manner which that name implies, but according to strict rules for the mutual benefit of all parties concerned. The vessels of the wreckers, generally sloops or schooners, averaging 50 tons, and having each a crew of eight or ten persons, are regularly licensed by the judge of the district, and the amount of salvage is determined by the admiralty court. In 1868 the number of vessels licensed as wreckers at Key West was 47. Their operations are usually occupied in fishing, but the extent of their special employment may be inferred from the fact that the number of wrecks in that year for which salvage was obtained was 52, and that the value of the cargoes and vessels exceeded three millions sterling. Pop. (1860) 3633.

KEY WEST (Spanish Cape Suro, or Boca Key), the most westerly of the group of Pine Islands, which lie off the coast of Florida, U. States, about 55 m. S.W. Cape Sable. It is about 6 m. long by 2 m. broad, of coral formation with a sandy sterile surface, which nowhere rises more than 15 ft. above the sea. It is so dangerous to mariners that no less than four lighthouses have been erected upon it or in its vicinity. Notwithstanding these precautions disastrous shipwrecks frequently occur.

KHABAROKKA, a tn Russian empire, Manchouria, on bank Amur, at the junction of the Ussuri. It stands on a picturesque eminence, is the head-quarters of the fifth bat-talion of the line and has a church with paintings executed by some Russian officers while stationed here. It was founded only in 1856 but is so advantageously situated that it has rapidly fallen to become a place of importance. There are daily below the town the U. States of America is one of the most fertile prairie for 100 m.

KHACHROD a tn India, Beluchistan, Daman, 70 m. S. by E. N. N. It is a large open town, according to the census of 1871, 10,000 houses, and is famous for its tobacco.

KHADEJA a tn Western Africa, Bornu cap. dist. of same name, 120 m. N.E. Kano. It is a large and populous place surrounded by a very strong double clay wall. The inhabitants, engaged by warlike expeditions, have no industry except that of dyeing which is carried on to a limited extent.

KHADEHABAD, a tn India, Nizam's Dominions, prov. and 30 m. E. Anuragah, on the Ghodla, opposite to Jaulnah. It is surrounded by a stone wall and the inhabitants are chiefly engaged in weaving saris, hongs, kumars, bands, coarse muslins, and the coarser kinds of cotton cloth. A beautiful description of saris is prepared here, and sent to Bombay where it is much prized for the brilliancy of its colour. The cotton raised in the neighbourhood is of superior quality, but mostly retained for home consumption. Within the last half century the silk and cotton manufactures of Khaderabad and Jaulnah were famous and employed from 4000 to 5000 weavers. Owing partly to British competition, and partly to excessive taxation this source of prosperity has been in a great measure destroyed, and the beautiful fabrics of silk and muslin have disappeared to make way for the coarser articles above mentioned. Pop. 7000.

KHALLEE a tn India, Jammu at the confluence of the Tense with the Jamma, 120 m. N. by E. Delhi. It was formerly more considerable than at present, but is still defended by a fort, and continues to be an entrepot for the traffic between the plains and the highlands of the N. A copper-mine was once worked in its vicinity.

KHARTOOM, or KHARTUM (add.), a tn. N. Africa, Upper Nubia, near the confluence of the White and Blue Nile, and at the height of 1450 ft. above the sea, lies chiefly on the E. bank of the Blue River from which, however, it is partially separated by gardens, and is at the same time on near the White River that the foundations of an irregularly shaped earthen wall by which the place is surrounded. When approached from the White River the town presents an appearance by no means attractive. In front is seen a sterile sandy plain, without an abundance of any kind, and without either trees or bushes, and in the midst of it a large

dirty grey mass of houses, overtopped only by a single minaret, and tacitly devoid of everything that might break the dull monotony of the scene. The town is entered by a long narrow street, stretching from W to E, and terminating in the market. It is dirty in the extreme, and has on each side a row of mud houses, which, as there is seldom any exterior opening in them except the doors, only form two lines of dead wall. In the other parts of the town there is not the least semblance of regularity. Every inhabitant has apparently been permitted to exercise his own discretion in

and beyond, in succession, markets for corn, tobacco, and butter. Among the chief attractions of Khartoum are the large and beautiful gardens along the banks of the Nile Nile. These produce vegetables and fruits in great variety and of excellent quality, with the exception of dates, the date-palms having here reached its southern limit, and ceased fully to ripen at this point, though, as a tree, it still continues to grow vigorously. The government is nominally Turkish but the real sovereignty is the Pasha of Egypt, the governor being under the control of a governor-general with despotic power. There are consuls for France, Austria, and America.

KHARTOUM.—From a view by N. Steinhilber

selecting a site and building upon it, and the consequence is, that the houses are of all shapes and sizes, and the streets are more labyrinthine in which a stranger threads his way with the utmost difficulty. But though the houses are thus huddled together in the most disorderly manner there are many open spaces so large that they are not only used as gardens but cultivated as corn-fields. So far as this occupied these spaces may be considered as contributing at once to the beauty and the salubrity of the place. Unfortunately there are other open spaces of a very different description. These are low hollow flats which becoming inundated during the rainy season retain the water which flowed into them, and form large tanks and standing pools which fill the air with pestilential miasma, and are tenanted by myriads of frogs whose loud and incessant croaking throughout the night makes peaceful slumber almost impossible. The long and narrow street already mentioned, poor though it is by far the best which Khartoum possesses. It contains the governor's residence, the government offices, and a number of tolerably spacious mansions, belonging to Turks, Copts, or wealthy Arabs. With these exceptions all the houses both here and throughout the town are of the most petty description often consisting only of four walls of sun-dried clay roofed over with alms, or plastered with a coating of mud, chaff, and cow-dung as a protection against the effects of the rain. In the market place the only mosque, built of brick and surrounded by a minaret, the bazaar, the coffee houses, bread shops, and other places of entertainment, are situated. In addition to those already mentioned the only public buildings are a Coptic and a R. Catholic chapel a R. Catholic school, a law-office or infirmary a jail and barracks. The market-place is well provided with the requisite accommodation, and at certain hours presents a very busy scene. It has two principal market-halls both divided by pathways, which lead across them, and are lined on both sides with shops, where, on open and slightly elevated platforms, the goods are exposed. Many of the shops have signs containing the owner's name, and not unfrequently some pithy proverb from the Koran, in large ornamental characters others are adorned with painted figures of lions, horses, or other animals. Between the market-halls is the bread-market, where the baker if an Egyptian, exhibits his loaves of the finest wheat, or, if a native of Senegal supplies his customers, generally of the poorer class, with rolls and cakes of maize. Immediately adjoining is the milk, fruit, and vegetable market, with the very singular appearance of a galloway in its centre

trade is the support of Khartoum, and without this traffic upon the White Nile, the place would almost cease to exist. The export ivory trade not exceeding an annual value of £40,000. The population, estimated at about 25,000, is of a very mixed character and includes Europeans (chiefly British and French) Greeks, Turks, Egyptians, Nubians, Nondanese, Abyssinians, Gallas, and four or five different negro races.

KHERSONESE, or CHIRONOMES a cape Russia, forming the S.W. extremity of the Crimea. It terminates a peninsula on which the ancient town of Chersonesus is believed to have stood and after reaching the water's edge is surrounded by a reef. On the highest point of the cape, a light-house 170 ft. high has been erected presenting a conspicuous mark by day, and furnishing by night a light which is clear weather is visible at the distance of 17 m.

KHODAGANJ a town in India, N.W. Provinces dist. and about 16 m. S. Farrukhabad on the N. bank of the R. Kalkee. It is crossed by a suspension bridge. It possesses a large serai for travellers, and a well-supplied bazar.

KHOORUK a river, Asia, which rising on the S.E. slope of the Sulaiman Koh range of mountains, in lat. 33° 28' N. lon. 69° 27' E. flows E. for 65 m. through Afghanistan, enters the Punjab through a gorge in the Sulaiman Mountains shortly afterwards changes its direction to E.S. and after flowing for 100 m. through the valley of Bannoo joins the Indus on its r. bank at the town of Kafir-Kote, in lat. 33° 30' N. lon. 71° 20' E.

KHORO or KASUO a river, Russian empire Manabooria, rises in a mountain range, flows N. N.W. for 250 m., joins the Lena on its r. bank, entering it by five mouths. It flows in a very rapid current, carrying along with its immense volume of water large masses of stone and trunks of trees.

KHOTIN, or CHOCHEV [said] a town Russia, gov. Belarussia, cap. circle of same name on the frontiers of Poland, 20 m. S.E.W. Kamenetz. It is a place of some strength, contains four churches, a school and a Lazarist school, and has a variety of manufactures, and a pop. of about 12,300.

KHYZPOOR, a town India, Bhawalpoor, about a mile from 1 bank Suleib or Ghara, lat. 22° 55' N. lon. 72° 12' E. The soil is of the Tharr or great sandy desert, are encroaching so fast on the town, that, though they were only a few years ago 3 m. distant, they have already reached the extremities of the streets, and are threatening the whole place with destruction. The houses, though built only of unburnt brick, are sufficiently durable, as rain seldom falls. The only buildings of

any note are the muscows, which are conspicuous by their round domes, while the principal one is embellished with variegated tiles of various colours. The house contains 400 sheep, and a considerable trade is done in supplying the carlin or caravans of the desert.

KIAHTZ, a town, prov. and 435 m. E.S.E. Canton near the mouth of a stream which falls into the China Sea. It stands about 2 m. from Cuyohi Point, a rugged promontory, crowned by a dilapidated fort, is surrounded by walls, and contains a complete garrison. The entrance to the river which has a bar with 9 ft. at low water is defended by a fort and a masonry tower.

KIAKKA, a dist. S.W. Africa, Benguela, between lat. 13° and 18° S. lon. 15° and 18° E. and bounded N. by Bailundo, W. by the extensive forest of Dambo-olo-Moon separating it from Kwaandahli B. by Kibala and Kakonda and E. by the Lupti-Lingi range which separates it from Hambo. The people are in general well-made, but arrogant, blood-thirsty, and very warlike. In action with their neighbours they are able to number several thousand armed men. Accordingly they make frequent forays into the southern district, and after warring all with fire and sword, return home laden with plundered cattle and slaves. Their religion is nothing but a superstitious fetishism though they have an idea of a supreme being whom they call Nku, their worst abomination is cannibalism which they practise not only on the flesh of prisoners taken in war, mixed with that of cattle and dogs, but on the children of their neighbours, whom they steal for the purpose, and on the aged among themselves whenever they become sick. The men, too much given to plunder to settle down to agricultural employment, leave these in many other parts of Africa, to the women, who displaying equal skill and industry raise large crops of maize, manioc, potatoes, beans and tobacco. The domestic animals are cattle in limited number and in greater number sheep, goats, oxen, and poultry with animals are very numerous on the mountains and forests. Iron the only mineral known to exist, is worked to a considerable extent. The pop. is estimated at 76,000, who live under a prince or sovereign power as absolute.

KIANG-HUNG the capital of a Shan state, r. bank Cambodia, 155 m. E. Ava. Though nominally tributary to Ava, its proximity to China brings it more immediately under the influence of the Chinese who keep a body of officials within it and levy a regular revenue. The town situated W. of the Mekong on the side of a low range of hills, has neither walls nor fort, but can boast of several public buildings, of which the most prominent is the palace, substantially built, roofed with highly glazed tiles, and adorned with carving and gilding in the Chinese style. Kiang-Hung lying on the route of caravans, is much visited by Chinese traders. Curiously enough one of the imports into China is tea. Pop. about 2000.

KIANG-TUNG [old] a town Burmah, cap. Shan state of some name, about midway between the Salween on the W. and the Mekong on the E., 127 m. E.R.E. Ava. It stands on low undulating hills, surrounded by an extensive and irregular wall of brick and mud, about 15 ft. high, fenced on the outside either by swamps or by an artificial ditch, and contains about 600 or 700 houses, widely scattered and of a mean description. The palace, situated in the centre of the town has a shabby exterior but is internally handsome and richly adorned having a throne and other royal insignia on the Ava model. The tax-exempt or prince levies no taxes on his own account, but derives his revenue from his own domains, from trade and from presents given by his feudatories and by the people generally. He also receives part of the fines exacted from criminals. The whole force of the state, including the hill tribes, is said to amount to 96,000; the contingent for Ava is 5000. (Tule, *Geography of Burmah*.)

KIANG-YIN a town China, prov. Kiangsu, r. bank Yangtze-Kiang 80 m. N.W. Shanghai. The river here narrows considerably, and the shore rising into hills behind the town presents a somewhat picturesque character. Two batteries command the pass, but so unskillfully that their thick muzzles could be turned. One of the hills is crowned with a temple, the novel construction of which is the town in its tall pagoda. The great number of junks crowding the

reach leading to Kiangsu shows that it must have an extensive trade.

KIBARA, a town S.W. Africa, Kibundu country, in the N.E. of the Kaping territory between the Kibundu and the Congo, lat. 13° 40' S. lon. 18° 16' E. It is surrounded by incense-trees of great size and age, is well fertilized, and contains about 4000 inhabitants, who belong to the Tsangalla stock, and carry on a considerable trade in honey and wax.

KIBALALA, a territory S.W. Africa, Kibundu country between lat. 10° 30' and 12° W. and lon. 16° and 18° E. bounded N. by Haka, E. and S. by Bailundo, S. Kwaandahli, S.W. Salla, and W. Ambundu area, about 8000 sq. m. Though claiming independence and governed by two chiefs, it is tributary to Bailundo. Much of the territory is hilly and covered with large forests, but the cultivable portions are well watered, particularly by the Kape, which traverses it essentially in a N.W. direction, and the Longa, which flows from E. to W. near its N. frontier. The woods abound with bees, from which a great deal of wax is obtained and disposed of to the factories on the coast. The only mineral known as iron, which is found of excellent quality almost everywhere throughout the territory. Pop. about 85,000.

KIBANDA, a dist. S.W. Africa, Kibundu country, territory Bailundo, on the W. slope of the Lingi Lingi range, about lat. 13° 10' S. lon. 15° 46' E. It is the largest district in Bailundo, and contains about 500 villages or hamlets. Its chief exercises absolute power and though nominally subject to the chief of Bailundo, recognizes his authority only so far as he deems it his interest to do so. Thus without consulting any superior he unites with other minor chiefs and with a host of plunderers, often to the number of several thousands makes devastating incursions into distant districts. Under such leadership the very name of the Munano, by which the inhabitants of Bailundo are designated, excites feelings of dread and hatred over a large extent of S. Africa. In the western part of the district surrounded by lofty wooded precipices are the hot sulphur springs of Kibanga.

KIDZI a lake Russian empire, Manchuria, formed by the expansion of a branch of the Amur. It measures 25 m. in length and 12 m. in breadth and has an area of 93 sq. m. It consists of two portions, connected by a strait about half a mile wide and contains two islets, one of which is held sacred by the Gilyaks, who assemble on it from time to time to practise their Shaman rites. Kidzi lake is 15 m. from Cassine Bay but the ground between is somewhat elevated.

KIKOBOE or **DIKOROE**, a territory S. Africa, between lat. 10° and 13° S. and lon. 22° 25' and 24° 25' E. bounded N. by the Saindjeche, or according to Livingstonia Chinga or Basinga, and the Manana Molwa territory E. Lalal, S. the Bunda or Latschad Land, and W. the Olivibenda forests. The surface is hilly and even mountainous attaining its greatest height to the W. and thence descending toward the E. where it is but a few miles almost flat. A large part of it is still in a state of nature covered with dense forests, but it is so abundantly watered by the Kamahl and its numerous affluents that the parts under culture yield most productive returns. The climate is more temperate in the summer months than might be supposed, and during the night in dry winter weather a thermometer placed in the open air sometimes sinks to the freezing-point. There are no towns, properly so called, the inhabitants generally living in detached dwellings or small clusters of huts in the vicinity of their chief, but their number is so great that Kikoboe is said to be as densely peopled as any region in inner Africa. Wax, said to be the best in S. Africa, is the staple article of trade. The only other articles deserving notice is iron, which seems to be the only mineral of value, and is said to be of excellent quality.

KIKOMBO a river, Portuguese territory, and natives in S.W. Africa Kibundu country.—The river, called also Ambundu rises in the Mountains of Bailundo, flows W. through Kwaandahli and Salla, and falls into the Atlantic at the mouth of Novo-Redondo. The current, situated on the S. bank of the river near its mouth, where a tolerably good harbour is formed, has lost any importance it ever possessed, and consists only of a few steam boats, whose inhabitants, introduced from the shorewards, are obliged to content themselves with dealing only in wax, gum copal, and credit

Owing to its low site, the factory is periodically laid under water and is very unhealthy. The factory, situated on the S. bank of the river, about 6 m. above the factory, stands surrounded by lofty granite precipices. Its inhabitants employ themselves in agriculture, grazing, and fishing. In following the hut they are said to display remarkable skill in swimming, often going far out to sea with nothing to support them but a piece of bamboo cane. They are not on good terms with the Portuguese, but it is generally believed that the latter are most in fault. Pop. 1700.

KILAKARAI or **KELAKARAI** is a town, presid. Madras, dist. Madras, on the Gulf of Mannar 10 m. S. by W. Ramanad. It is about 2½ m. in circuit, and having a number of houses and granaries finely built along the shore presents a beautiful appearance when approached from the sea. The appearance, however, is much better than the reality. The numerous streets are narrow and ill-formed and the great majority of the houses are mere huts with thatched roofs. The principal buildings are 11 mosques mostly erected over the tombs of wealthy Mussulmans who have died here. Some of them are elegant structures; and one of them is rendered particularly conspicuous by its cupola, which is gilded or covered with gold. Near the E. skirts of the town, and contiguous to the ruins of a Dutch factory is a small R. Catholic church. The manufactures consist of long cloths fine and coarse, and a sweet beverage called *palissade*, extracted from the palm-tree, of which there are thick groves in the vicinity. The inhabitants are industrious, active, and enterprising and readily engage in any branch of trade which promises to yield a profit. Upwards of 100 boats belong to the port.

KILANDI is a S. W. Africa Kimbunda country territory. Ballundo, lat. 12° 28' S., lon. 16° 28' E. It stands on a height on the E. side of the Damba range and contains 2000 inhabitants who have the reputation of being bold and fearless warriors.

KILIA, a town. Turkey in Europe. Moldavia, on an arm of the Danube of same name 21 m. N. E. Ismail. It is a place of strength, and has a valuable fishery (at which a great deal of eel is prepared) and a trade in cattle, hides, wax, and honey. It is one of the places ceded by Russia in 1856. Pop. 6400.

KIMBAZI or **DUMBAZI** is a territory S. W. Africa, bounded W. by the Coanza which separates it from Bibé; N. by the land of the Mamongo; E. by the extensive unhabited forests of Okavango and S. by the territories belonging to the tribes of Bungo Akamka. The surface is generally hilly, rising toward the E. where it becomes densely covered with wood. The principal river is the Kuiba, which, after receiving a number of affluents from the S. and E., flows W. and joins the Coanza on its E. bank. The land where fertile is composed of a mixture of clay and sand of a dark red colour. Its capital, Kijo, is seated on a commanding height above the E. bank of the Coanza, and has a much-frequented ferry. Other places of importance are Karioune where the caravan going eastward lay in their stock of provisions; N. Ganda in the centre of a fertile plain near the fork formed by the junction of the Kuiba and Coanza; and Angolika or Angura, on the Coanza, with a ferry, where the caravan from the N. of Bibé usually crosses. The inhabitants are industrious and produce large quantities of manioc and a species of sorghum called *masengo*. They are rich in cattle, sheep, goats, and swine. They are still, however, in a very savage state, and addicted to cannibalism, with many of the most absurd and barbarous practices. The staple article of trade is wax, next to it are ivory and slaves. (Lushai Magazine).

KIMBOLENGE, a town S. W. Africa, Kimbunda country, territory Ballundo, on the W. edge of the Bulwa-Bulu Steppes and the caravan route to Bibé. It is abated by lofty wooded areas, and contains about 2000 inhabitants who carry on an active trade, greatly facilitated by the caravan.

KIMBUNDA, a country, S. W. Africa, inhabited by a people of same name, who, on account both of their numbers and the extent of their territory as well as their distinguished qualities physical and moral form one of the most remarkable and most powerful races in the quarter of the African continent. Their territory embraces nearly five degrees of latitude and five degrees of longitude; thus forming a vast area nearly four times as large as the British Empire.

of a square form, which extends from lat. 8° to 14° S., and from lon. 13° 30' to 18° E., washed by the Atlantic on the W., and bounded on the N. and E. by the Coanza, which in the former direction separates it from the Portuguese possessions, and in the latter from the Mamongo and Kimbundi; the S. boundary as little or nothing is known of the country beyond it cannot well be defined. According to the limits above assigned to Kimbunda, it is obviously nothing more than the northern and better-known portion of the immense region which figures on the map under the name of Benguela. The only unity which it possesses consists in its physical features and its population: the former being very much alike throughout its whole length and the latter all deriving their origin from a common Kimbunda stock. But there is no political unity. Instead of forming one great state, it is broken up into a number of territories, all independent of each other—and not only so, but not infrequently a single territory is again subdivided and forms several petty independencies, each under a chief who acknowledges no authority but his own absolute will. For an account of the government and customs prevalent in the Kimbunda country reference is made to the articles in which its various states or territories are described. As a guide to the references it may be necessary to mention that the names of these territories, taken from N. to S. in the order in which they lie along the coast of the Atlantic in the centre of the country and along its eastern frontier are as follows:—On the coast, Kikwa, Kuyunda, Samba, and Yundombe; in the centre, Labella, Hako, Ballundo, Ambina, Kibela, Andullo, Solita, Kikandadi, Ganda, Kikaka, Hambo, Sambo, and Caconda; on the E. frontier, Mamongo, Bibé, Kikangi, and Galangue.

KIMPOLUNG is a town in Turkey in Europe, Walachia, cap. circle Mauthalo in a mountain district, 80 m. N. W. B. on an affluent of the Argha. It is the seat of a court of primary jurisdiction and standing on the road which leads across the mountains of Krasnodar, is an important traffic between Sibienburg and Wladimir. Pop. 8395.

KINDUMBA, a town S. W. Africa, Kimbunda country, territory Galangue lat. 14° S. lon. 16° E. It lies on the Kibango in which it has a harbour much used by the inhabitants of E. Gangualla, and contains 1500 inhabitants, whose chief employment is fishing.

KINEMA, a town, Russia, gov. and c. of S. F. Krasnodar, cap. circle and at the confluence of a river of same name with the Volga. It has 11 churches, a circle and a parish school, a benevolent institution, and an extensive trade. Within the circle much linen and cotton cloth and large numbers of bark-aloes are made. Pop. 2454.

KING AQUA and **KING BEIL**, the names of two towns W. Africa, on the S. side of the estuary of the Cameroons, near its mouth in the Bight of Biafra, opposite to the island of Fernando Po. The towns, separated only by a small stream, are of great extent, and consist of houses mostly built of bamboo and arranged in wide regular streets. Much of the adjoining space being occupied by plantain and cocoa-nut trees, it is difficult to form an estimate of the number of the inhabitants. There can be no doubt, however, that they form a large and important community who by their long intercourse with Europeans have made great progress in civilization. The trade, chiefly in palm-oil is very extensive.

KING-CHU-FU is a town, China, about 20 m. above the mouth of a river of same name which falls into the head of the Gulf of Lee-tung. Nothing more is known of it than that it is a place of considerable trade.

KINGKA, KENKA, or KIKKA, a lake, Manchouria, on the boundary between the Russian and the Chinese empires, between lat. 48° 38' and 45° N. lon. 138° and 138° 40' E. It is about 60 m. long by 40 wide, is fed by the Gata and several streams from the S. and S. W. and discharges its waters by the Sungpan an affluent of the Loutou. Its S. and W. shores are level, and swampy tracts extend to the mouths of its feeders. It abounds in fish, and the neighbouring mountains in game. About ten villages lie scattered along its shores.

KINGO is a town S. W. Africa, Kimbunda country, territory Kibela, on a lofty rugged hill, not far from the N. or E. bank of the Kupe. Pop. 1200.

KINGSTON [adj] a n. British America, Canada. Work, cap. on. Frontenac, Lennox, and Addington, at the head of the St. Lawrence, where it issues from Lake Ontario, on the Rideau canal and the Grand Trunk railway 135 m. E.N.E. Toronto. It is regularly laid out in streets which cross at right angles, and are lined with houses, the most of which are substantially built of a blue limestone quarried in the vicinity. The public buildings and institutions are numerous, and include among others a large and elegant city hall, a court-house and jail, 13 churches, a Presbyterian and a R. Catholic college each endowed by government, a mechanic's institute, an hospital for orphans ayum, and a provincial penitentiary. The manufactures consist chiefly of steam engines, locomotives, boilers, agricultural implements, iron work, soap and candles, and leather. There are also several breweries and distilleries, and various establishments connected with ship-building, which, though said to have somewhat declined in consequence of the diminution of the lake trade by railway competition, may still be considered as the staple industry of Kingston. The harbour, which is guarded at its entrance by Wolfe Island and Garden Island, is a beautiful bay about 2 m. in width, provided with commodious wharves, and deep enough to float the largest vessels. Part of it, situated on the E. between Point Frederick and Point Henry, is occupied as a naval dockyard. Both of these points, but more especially the latter is covered with fortifications which command and defend the town and harbour. For additional defence a number of martello towers have been erected, and as a military post Kingston was made next to Quebec. Pop. 13,000.

KINGSFORD a n. State, New York, cap. on Ulster R. bank Hudson, at the terminus of the Hudson and Delaware canal, 90 m. N. New York. It contains 16 churches, a court-house, and schools, and has a large trade in coal, stone, and ice. The first constitution of the state of New York was framed at Kingston. Pop. 16,640.

KING TE-CHING a n. China, prov. Kiangpoo, on one of the fenders of Lake Poyang 63 m. E.S.E. Nan-tchang-fow. It is an open town very irregularly built, but of vast dimensions. The inhabitants are almost all employed directly or indirectly in the manufacture of china, which has here its central and most important locality. All day long clouds of smoke and columns of flame ascend from its chimneys, and at night the whole place, seen from a distance, assumes the appearance of a vast conflagration. Thousands of furnaces and more than 500 factories are constantly at work upon china wares, each of which it is said, owing to the minute division of labour passed, before it is completed through the hands of fifty different workmen. Pop. upwards of 500,000.

KINBERG a n. Austrian empire, Bohemia, circle and 4 m. S. Eger with a church, a shaped an old castle, a brewery, and two mills, and 1000 inhabitants.

KINSHIAN on Golden Island, prov. Kiangsu, on the Yangtze-kang, about 50 m. below Nankin. It once was as its name implies, an island, but is no longer. The channel separating it from the river bank, and marked on charts as having a depth of 4 fathoms, has been silted up, and is now covered with kitchen gardens. Thus converted from an island into a peninsula it has lost some of its picturesque beauty; but still it is the head of the lake. It has been in the hands of the rebels, and subjected to their devastation. Speaking of its former state, its splendour and the ornamental roofs of its temples and other buildings, Sir John Davis says it looked like a fairy creation rising out of the waters, and was celebrated all over China. Now says Mr. Oliphant, 'with the exception of the dilapidated pagoda, there is not one stone left upon another. Recent as the work of destruction has been, the rock-cut steps are worn and crumbling, and the ruins generally look as if centuries had passed since their erection.'

KINYANDA a n. S.W. Africa, Kintanda country territory, Helles, on the Kintanda, which flows W. and falls into the sea at Egyptian, lat. 15° 30' S. It is the residence of a native chief who claims to be independent. Pop. 1800, who cultivate the ground and collect gum-opal.

KIOTO or **MIYAO** a n. Japan, in the S.W. of the island of Nippon, on the Jodogawa or Sadogawa, which has

in source in Lake Oki and is here navigable by large boats, 20 m. W.N.W. Otsuwa. It has been styled the Rome of Japan because it is the residence of the spiritual emperor, and the permanent seat of the Dairi—an enormous ecclesiastical court by whom he is virtually controlled. It contains the most magnificent temples of which Japan can boast, and the tomb of Taiko Sama, the most famous of its temporal emperors. It is also said to be its most important manufacturing town. The peculiar carelessness attached to this place is shown by the third article of the Japanese treaty which stipulates that British subjects may go for 55 m. from any of the opened ports in any direction, except that of Kioto, which they must not approach nearer than 25 m. Pop. estimated at 500,000.

KIOINDIA a n. Austrian empire, Hungary, co. and 22 m. E.N.E. Arad, in a mountainous district. It is a struggling place with a trade in deals and brandy. Pop. 2111.

KIPANDA, a n. S.W. Africa, Kintanda country, territory Helles on a height above the Kikombo 85 m. N.E. Benguela. It is defended by a strong wall constructed of stones without cement. The inhabitants, less given to plunder than those of the adjoining districts, cultivate the ground, rear cattle, collect gum-opal, make dogs lace, and carry on some trade. Pop. 3000.

KIRCHDORF a n. Austrian empire, Hungary, co. Epa, about 8 m. E.S.E. Lantman. It is one of the sixteen Epa royal towns, and has a high-school, a convent of the sisters of charity, an hospital, and a trade in flax. Pop. 3425.

KIRCHHEIM a n. Austrian empire on the frontiers of Carinthia, 22 m. N.E. Gorz, with several public offices and some trade.

KIRINDI, a river Ceylon which rises in the Central Province, near the S. outlet of the magnificent pass of Ella flows first nearly due S. then directly S.E. and falls into the sea on the S.E. shore of the island, about 5 m. S.W. from the town of its own name. Its whole course is 63 m. Area of basin 334 sq. m. Of these only 34 sq. m. belong to the mountain area, the rest lies within the lowlands.

KIRIRA an isl. Central Africa, near the middle of the W. shore of Lake Tanganyika, 50 m. S.S.W. Ujiji. It is a low, irregular mass of primary formation, projecting like a headland or promontory from the mainland, where it is scarcely 2 m. distant. Its length from E. to W. is 5 m. its breadth from S. to N. is 3 m. It rises from the shore partly in dwarf terraces and partly in abrupt and thickly wooded slopes to a point in the centre, where it attains its greatest height, and commands an extensive view of the lake. It is inhabited and has at least two villages surrounded by cultivated fields, in which grain, pulses and manioc are grown. The usual male dress is a diminutive apron of monkey's skin. A stranger approaching Kirira is challenged by a watch boat. If the answer is satisfactory permission is given him to enter the long deep bay in which lies the island or station. About 5 m. due S. of Kirira is the islet Kabura. It is well wooded, and, though only half a mile in extent, is inhabited, and grows holms, manioc, sweet potatoes, and beans. Another islet, Kasego, about 7 m. S.W. of Kirira, and 3 m. due W. of Kabura, lies at the mouth of a deep bay lat. 9° 44' S. It is a narrow block of high ground about 2 m. long, destitute of trees, but clothed with grass, well peopled, and deemed of such importance as to have its own garrison. The Arab merchants have establishments upon it, where they collect the surplus supply of slaves from Ugniba, Uruwira, and Marungu.

KIRKILISSA, a n. Turkey in Europe, eyalet and 32 m. E. Edirnek or Adrianople, cap. Iva or dist. of same name. It contains six mosques, several Greek churches, and a bazaar with numerous shops. Its trade is chiefly in cotton, for which it is famous; and in butter and cheese, which are brought thither by the Bulgarians, and disposed of to Jews, who carry them to Constantinople. Pop. 15,000.

KIRK KELLISA or **KIRK-KILLISA**, a n. European Turkey 33 m. E. Adrianople, in a district producing much corn and wine. The Russian ware and the Slavians connected with them have destroyed its prosperity, and reduced its inhabitants from 15,000 to half that number.

KIRCHSLAG, a n. Austrian empire, Lower Austria, cap. circle of same name, on the Danube near the frontiers of Hungary, 48 m. S. Vienna. It contains a palace

belonging to Prince Puff, a handsome Gothic church an old castle, a town hospital, and a trade in flax, which is extensively grown in the district. Pop. 900

KISHENGURH, a petty state and to India, Rajpootana, between lat. 25 50' and 26° 50' N lon. 74° 50' and 75° 10' E, and bounded N W and N by Jodhpur E Jaypore and Ajmer, and S. and S.W. Ajmer area, 734 sq. m. Near the center a rocky ridge extends across the state from S.W. to N.E. In most other quarters the surface is tolerably level. The general appearance, however, is by no means attractive. The soil in many parts is nearly barren. Cultivation is confined within very narrow limits, and those tracts which consist in a state of nature are either bare or covered with stunted shrubs and jungle. Pop. about 70,000.—The town cap. of the above state, 30 m N E Nussrah, stands on the S.W. side of a range of gnass and granite hills and is surrounded by a high and thick rampart of masonry, and defended by a fort containing the residence of the raja—a structure of large dimensions but rude architecture. The town, once considerable, is now in many places ruinous.

KISHNUGUR, a tu India, presid Bengal cap dist. Nadua, 64 m N Calcutta, on the Jellinghee, which is here navigable, and joins the Hooghly about 10 m below. It is the seat of one of the government colleges, and is noted for its mualia, which though extremely dear and printed only in a single colour, still keep the market in spite of British competition.

KISH-CHIAO, the largest of a group in the Gulf of Siam, to which the name of Dutch Islands has been given. It possesses a harbour, which as it affords complete shelter and great facilities for watering, has been recommended as a naval station. The inhabitants cultivate chiefly maize, and to a less extent yams and sweet potatoes. The whole islands of the group are famous for the edible hard nuts, the taste for which once confined to the Chinese, has now extended to European gourmands. They are built by the swallow (Hirundo asiatica) the eaves of the immense rocks of which the islands seem to be generally composed.

KISSAMA, a duk. S.W. Africa, Kimbundu country, bounded N by the Portuguese settlements, W the Atlantic, S. the Longa separating it from Nupinda and E. Libollo, area about 9000 sq. m. It is divided into two parts, an Upper and a Lower, each with its own independent chief.—Lower Kissama lies along the coast of the Atlantic, and consists partly of a sandy flat and partly of a rugged hilly land. The climate is hot and dry, springs are few and stunted, and the periodical rains so often fall, that the inhabitants are driven by the severe drought to exchange their usual abodes for the banks of the Cosma and Longa. In this quarter the fields are well cultivated, and produce manioc, maize, beans &c. The chief towns is Demba besides which there are about 300 villages or hamlets.—Upper Kissama is traversed from N to S. by mountains, which give it a much more temperate climate than Lower Kissama. The soil, which consists of a red clay, being well watered by the periodical rains, is fruitful, while throughout the year a growth of vegetation is maintained in the valleys by numerous copious springs, and lofty forests climb the dunes and cover the tops of the mountains. Of the villages or hamlets amounting to about 400, the largest is Kital Kamaschingi. The Portuguese, tempted by the proximity of Kissama, and annoyed and irritated at the almost daily forays of its wild inhabitants, attempted to subjugate it but managed the matter so bunglingly that only a few of the troops returned to tell how nearly all the others, deprived of water, because the enemy took the precaution to tap their stores of hollowed bamboo-trees had perished of thirst. Pop. about 85,000.

KISSANDSHI a country, S.W. Africa, Benguela, which is inhabited by an independent tribe of same name, and extends from N to S along a series of mountain ridges, about 80 m. E from the Atlantic, between lat 19° and 18° S. and lon 14° 50' and 15° 30' E. Ganda bounding it on the S. and Namibia on the N.W. as the inhabitants belong to the same stock, though they have their own chiefs are usually included. The whole three have an estimated pop. of 125,000. The Kamaschings are of predatory habits, and often make forays into the neighbouring districts, causing great devastation. They have been permitted even the Portuguese settlements to escape, but have more than once wasted them with

fire and sword and then retired to their mountain fastnesses, whether it is impossible to follow them. The Portuguese, to put an end to this fearful scourge have tried both force and conciliation, but hitherto without effect. The climate on the mountains of Kissandshi is healthy, and many of the valleys have a fertile soil, on which good crops of corn, beans, and a variety of fruits and vegetables are grown. The domestic animals are cattle, sheep, and swine; the wild animals—leopards, otters, jackals, elephants, buffaloes, gazelles, &c. The valleys and mountains, constituting a distinct vegetation would afford a rich field to the botanist.

KISSENDI a to S.W. Africa, Kimbundu country, cap. territory of same name, near the Kunyene an affluent of the Cosma; lat. 10° 20' S, lon 17° 30' E. It lies on a plain, and contains 3000 inhabitants, engaged chiefly in agriculture and trade.

KISTANAPURAM a tu. India, presid Madras, dist. Travancore, about 8 m E. of one of the lagoons which stretch along the coast of Malabar and 56 m. S. by E. Cochin. It is a plain of some extent, containing a large pop. chiefly Nairs, and possesses an extensive fort, nearly in the form of a regular square, surrounded for greater security with a strong bamboo hedge, and containing within it a modern citadel or palace, a powder-magazine and granaries. The greater part of the inhabitants reside on the E. of the fort. In the same locality is a pagoda, the annual festival of which lasts thirty days. This is one of the five principal coast stations.

KITANGULE a river, Central Africa supposed to rise among the M'fumbira Mountains about lat. 3° N and flowing in a N.W. direction to fall into the Victoria Nyansa about lat. 1° N lon 31° 50' E. It is the principal feeder of the lake from the W. Where it was crossed by Speke and Grant about 40 m from its entrance into the lake it was about 80 yards broad, and was sunk down a considerable depth below the surface of the land into a huge canal, and so deep that it could be pulled by the canoe men; its velocity was from three to four knots an hour.

KITTANING a tu. U. States, Pennsylvania, cap. up Armstrong I bank Allegheny on a flat where an Indian village of same name stood 25 m N.E. Pittsburg. The chief buildings are six churches, a university, a town-hall and an academy, and the industrial establishments are blast furnaces and other large iron works, coal oil factories and a flour-mill. Coal iron ore limestone good building stone and fire-clay are extensively worked in the vicinity. Pop. (1850) 1695.

KITIEL-KAMASCHINGI a vil. S.W. Africa, Kimbundu country 80 m. S.S.E. Luanda. It stands on a rugged height, contains the residence of the chief of Upper Kissama, and has a pop. of 1500 some of whom dwell in caverns among the rocks.

KIUNG-CHOW, or KIUNG CHAU PU [add] a city of the first order and a seaport China the capital of Hainan Island, off E. coast prov. Quang-tung, situated on a narrow spit of land between a river and a bay. On the S. bank is a 15-storied pagoda, the streets are flagged with large stone slabs and some are 1½ mile long. The inhabitants are civil and the authorities kind to shipwrecked people, in consequence of the many wrecks that occur on the rocky coast, which is infested by wreckers and pirates. This place was inserted in the treaty of Tientsin as one of the ports to be opened to foreign trade, because it stands at the southern extremity of the empire, but scarcely anything was known of its capabilities at that time. On examination, and consultation with the merchants at Canton and Hongkong, the British authorities deemed it not advisable to send a consular there, or claim the privilege of forming a settlement. These powers remain in abeyance, and the port may yet be opened, when, in all probability, the resources of this tropical region would be greatly developed. There is a considerable native trade with Macao and Canton in the products of the island, the principal of which are coconuts, betel nut, preserved fruits, sugar, cotton, silk, varnish, bees wax, tanned hides, rice for export, gold, silver, pearls, opium wood and other articles used by the Chinese in manufactures.—(Williams' Chinese Colonial Guide.)

KIYENGO a tu. S.W. Africa, Kimbundu country, Kaling territory lat 18° 30' S lon 16° 25' E. It occupies

the centre of an extensive plain close to a number of marshy pools; it was shaded by deciduous-trees, and well fortified. Pop. about 8000.

KLADNO (old), a town in Austrian empire, Bohemia, circle and 14 m. N.W. Prague, with which it communicates by railway. It consists of the town proper, partly surrounded by a ruined wall, and of three suburbs. It has a parish church and chapel, a castle, tile-works, a brewery distillery and a potash refinery. In the vicinity coal and ironstone are extensively worked. Pop. 5600.

KLAR, a town in Austrian empire, Banat, about 22 m. W. S.W. Temesvár; with a large trade in sheep and cattle and 2216 inhabitants.

KLINCU, a town in Banat, prov. and about 70 m. N.E. Temesvár, circle Serej, near the Ipatz. It stands on a sandy plain surrounded by forests, consists of spacious streets and handsome stone houses, and contains five churches, and a remarkable wooden bell, which is 168 ft. high and was erected by a trader in the town without any professional assistance. The manufactures consist chiefly of woollen cloth and woollen stockings. Of the latter 50,000 dozens of pairs are made annually.

KLOSTER, a town in Austrian empire, Bohemia circle and 9 m. S.E. E. Caschau; with a parish church, a castle, a town-house, an hospital, a brewery, and a mill. Pop. including that of the adjoining village of Wilimow 1600.

KLUKNAU, a town in Austrian empire, Hungary, co. Zips, on the Hornad N. of Kaschau; with a castle, smelting for silver and tin, and 1000 inhabitants.

KNIN (Nag), a town in Austrian empire, Bohemia, circle and 17 m. S.W. Prague to the left of the Moldau. It contains a church, a chapel, a school, a brewery and distillery. There was once a gold mine in the vicinity. Pop. 1200.

KNOXVILLE, a town in Tennessee, cap. co. Knox, on a height above R. Bank Holston, at the junction of the E. Tennessee and Georgia, and the E. Tennessee and Virginia railways, 160 m. E. S.E. Nashville. It is the chief commercial place of E. Tennessee, and is rapidly increasing in size and importance, having within ten years more than doubled its population. It contains eight churches, a university several academies the state asylum for the deaf and dumb, glass-works, and a large ear factory. Pop. (1860) about 8000.

KOCSE, a town in Austrian empire, Hungary co. and 16 m. S.W. Gran, cap. dist. of same name; with 3005 inhabitants who belong for the most part to the Reformed church and are chiefly engaged in weaving.

KOKELAI, a lake or lagoon on the N.E. of Ceylon. It is about 20 m. in circuit, and is believed to have been at one time a rich and fertile plain covered with rice fields which were irrigated by the common reservoir of Padavi, situated about 16 m. to the S.W. The sluices of the reservoir having become decayed the embankments gave way and the immense body of water rushing into the plain completely inundated it, and then burst its way to the sea. Kokelai was thus converted into a lake, bounded on its E. side by a long and narrow belt with an opening in it, through which the tide regularly flows and ebbs. Though its bottom is never wholly dry the deepest spots are not more than 6 or 7 ft. During the S.W. monsoon, when the rains are light and the waters low the surf forms a bar of sand which closes the entrance. Were advantage taken of the circumstances it might be possible to exclude the sea permanently, and thus restore the plain to its original state. At present the bar disappears with the change of the monsoon, and the communication is restored. On the N. side of the channel stands the Tamil village of Kokelai, possessing extensive pastures, on which numerous herds of fine cattle are grazed. The woods bordering the lake abound with par-fowl and game, and its shores are frequented by vast numbers of wild animals—buffaloes and deer with hogs, jackals &c.

KOKEMA, a river in Africa, which rises in the Balkun-Bala River on the W. frontier of Bihá, flows N.N.E. dividing the territory of Bihá into two unequal parts, and having become a considerable stream, in consequence of the junction of several tributaries, particularly the Kalah or Bihá, and the Kirta, continues its N. course somewhat easterly, and joins the Omba on its E. bank, near the village of Fekela. It overruns with crocodiles and hippopotami.

KONE-AR, a town in Chinese empire, in the country of Thian Shan, Shensi, on the Chandra, in lat. 37° 45' N. lon. 75° 0' E.

It is situated in the famous wool producing district, and would become the centre of communication between Kashgar and Nurpur Umthar and Kooliana, if good bridges were at the point thrown across the Chandra. The only transit across the river is for foot passengers, by means of a bridge of twigs, which is thus described—Pendant between two ropes of birch twigs, which stretch across the stream from rude poles erected on either bank, hang transverse, a continuous bundle of the stems of will material, attached to the ropes above by a sort of open basket work. This is the footway and the ropes above serve as balustrade. The footway is further supported by two or three smaller birch ropes laid side by side beneath it, and stretching across the stream in the same manner as the two upper ropes. As much a bridge is not available for beasts of burden they have to swim the river, a proceeding rendered very dangerous by the force of the current.

KOLA, a town in W. Africa, Hausa States, prov. Kebbi, 80 m. S.W. Sokoto. It occupies a very strong position overlooking a rocky eminence, and commands the passage of the valley or *fundoshi*, which interests the whole province. Owing to its strategic importance it is not only well protected, but provided with a small garrison. The governor who commands it and its district has a large house or palace somewhat in decay.

KOLACZYCE, a town in Austrian empire, Galicia, circle and 6 m. N.W. Jaslo, with extensive bleaching and manufacturing of earthenware. In the vicinity in a beautiful valley are the ruins of an old castle, with a fine park and a mineral spring. Pop. 1900.

KOLAPOOR or KOLAPUR, a native state India, between lat. 15° 58' and 17° 17' N. lon. 74° 47' and 74° 46' E., and bounded N. and N.E. by Sattara, E. and S. by Belgaum and W. by Savant Warde and Rutnagerry; length, S.E. to N.W. 95 m., breadth, 65 m., area, 5445 m. It lies from the culminating ridge of the W. Ghats forming the W. boundary towards the eastern plains, which have still on its E. frontier an elevation of 1500 to 1800 ft. In the W. some summits of the Ghats within its limits rise from 2000 to 4000 ft. The frontier is by the Kistna directly and through its tributary Warna and numerous mountain torrents. The soil composed for the most part of disintegrated trap rocks and laterite is very fertile. The rulers of Kolapoor trace their descent from Sivaji the celebrated founder of the Marhatta empire. Pop. 500,000.

The town cap. of above state, 185 m. S.E. Bombay, stands in a secluded tract, which has not been much visited by Europeans, is surrounded by a rampart, and provided with other defensive works, and was till lately an unconquered and unhealthy place. A series of sanitary measures undertaken by the British government have greatly improved it.

KOLBASZOW, a town in Austrian empire, Galicia, circle and 40 m. N.E. Tarnow. It consists of two distinct places, an Upper and a Lower and in the vicinity are the ruins of a castle destroyed by the confederates Poles in 1760. It contains 3700 inhabitants, whose chief employment is in making cabinet and other articles of wooden ware.

KOLEAH, a town in Africa, Algeria, prov. and 18 m. W. S.W. Algiers, pleasantly situated on a E. slope. It is composed of a native and a European town the latter formed of two spacious streets and contains a handsome mosque, a barracks and a military hospital. For defence it has two towers seated on the hill above it. Its industrial establishments are a brewery oil and flour mills, and limestone quarries. Part of the environs are laid out in gardens and a fine orangery with walks, forming a delightful promenade. The old town was almost entirely destroyed by an earthquake in 1825, and it is only since the French made a permanent settlement at it in 1830 that it has again begun to assume importance. Numerous Roman remains are found in the vicinity. Pop. 3713.

KOLLO, or COZZO, a town in Africa, Algeria, prov. and 48 m. N. Constantine, on a bay of the Mediterranean, at the foot of Cape Buglaren. It occupies the site of the ancient *Collops Magnus*, in a picturesque, well wooded, and fertile district, and at an early period became an important shipping

place to several of the maritime states of Europe. The Venetians and Genoese had factories here as early as the 12th century and were followed by the Flemings and the French. The chief articles of export were then as now wool, leather, wax, honey oil, and fruit. Pop. 9000.

KOLOGRIV, a tn. Russia, gov and 140 m N E. Kootenai, cap. circle of same name, on the Unika. It contains three churches, a circle and a parish school, and a benevolent endowment. The inhabitants of the circle are closely employed in sailing timber and in aiding the traffic on the river. Pop. 1471.

KOLOMEA [add] a tn. Austrian empire, Galicia, cap. circle of same name, on the Frath, 108 m. S E. E. Lemberg. It is the seat of several important public offices, and has a high-school, a fund established in 1857 for making loans to industrious persons, an infirmary, a Jewish hospital, numerous gutters and several yearly markets. It had once a strong castle, but was notwithstanding pillaged by the Turks in 1689. Pop. 14,889.—The circle, bounded S. by Chortkiv, E. Bukowina, S. Hungary and W. Stanislau, has an area of 1835 sq. m. and a pop. of 281,781. All United Greeks, except 1801 Protestants 1546 Armenians. 24,139 E. Catholics, and 31,108 Jews.

KOLYVAN a tn. Russian empire W. Siberia, gov and 115 m. S W. Tomsk, at the confluence of the Bergha with the Ob. It once ranked as the principal town of W. Siberia, and though supplanted in this respect, is still celebrated for its polishing works, which have furnished the Hermitage of St. Petersburg with some of its finest ornaments. The articles, consisting of vase columns, pedestals, &c. are often on a gigantic scale. When Atkinson visited the Zavod about 1700 workmen were employed. Many he says were engaged cutting dark purple jasper columns 14 ft. in height, others were at work on vases of dark green jasper, both the design and material were exceedingly beautiful, and in some the foliage was equal to any I have ever seen either ancient or modern. The workmen, at that time, were made to work for 12 to 24 months.

KOMANOVA, a tn. Turkey in Europe, in the N. of Macedonia, cyclist and 17 m. E. N. E. Lahn, at the foot of a mountain slope on the Valtia Raka. It is surrounded by a mud wall, and contains 8000 inhabitants, mostly Bulgarians who have extensive well-watered and well managed kitchen gardens.

KOMARNO a tn. Austrian empire, Galicia, circle and 22 m. N E. Sember on an affluent of the Dniester. It has a monument commemorative of victories over the Turks in 1694 and 1695 and contains 9889 inhabitants, who are chiefly employed in weaving linen.

KOMBALA AN BAILUNDO, a tn. S W. Africa. Kimbunda country cap. Bailundo, nearly equidistant from the Kyalata on the E. and the Lupo on the W. lat. 11° 35' S. lon. 18° 25' E. It is built in the form of a semicircle, on a slope to an extensive and gently undulating plain, is inclosed by a thick wall of stones piled one upon another without cement and consists of narrow tortuous clay paved streets. A stream intersecting the lower supplies the water and would doubtless greatly contribute to its security in the event of a siege. The inhabitants are chiefly the office-bearers and body-guards of the prince. His residence differs little from the other houses except in its extent, consisting of a great number of bits of smaller or larger dimensions, shaded with straw and set down without any regard to order or beauty. In these huts the prince finds accommodation for himself and his many wives. Pop. about 5000.

KOMBALA AN BHE, a tn. S W. Africa, cap. territory of Bhe, in the fork formed by the Kabama and Kachibali. Kuba about lat. 11° 50' S. lon. 17° E. It is surrounded by a strong palisade and a ditch, enclosing a large area, and entered by several gates. Immediately within the principal entrance is a great pit, about 170 yards wide, and shaded with fine trees; beyond are narrow crooked dirty streets, lined with houses of very indifferent appearance, shaded with straw, and huddled together without any order. Further within the town a small stream with swampy banks intersects it from E. to W. As there is no bridge over it there is no means of crossing but by wading. Beyond the stream is a spacious place of a polygonal shape planted with trees and lined with trenches, indicating that it is the jambo or chief

place of resort and business. Here the streets become broader, and an ascent leads to the royal palace, which occupies a commanding eminence. The approach to it is through a small square lined with wooden benches, and strangely ornamented with human heads some of them converted into mere skulls by long exposure to the air but others showing by their comparatively fresh state that they must have been recently stuck up. Passing through a spacious gate the foreground of which is thus hideously ornamented a narrow lane, lined partly with houses and partly with wooden pilings, but so tortuous as to form a kind of labyrinth, a square building by a high wall is reached. In one corner of it stands a handsome square building called the royal chapel, and in its centre, under a leafy guajaz-tree an arm-chair covered with a lion's skin serves for the royal throne. There is nothing particularly noticeable in the palace but its extent of which some idea may be formed from the fact that the prince's wives and sometimes exceeding 300 in number are accommodated within it. Pop. about 4000.

KOMBALA AN DUMBA a tn. S W. Africa, Kumbunda country near the centre of Galangue, of which it is the capital lat. 14° S. lon. 17° 20' E. It stands on an elevated plain strongly fortified by palisades and ditches, and has about 3000 inhabitants, chiefly officials and soldiers of the prince. They live mostly by plunder, and on occasional festivals eat human flesh.

KOMBALA AN KAMBERE a tn. S W. Africa Kimbunda country cap. territory Mamongo, on a small stream of same name, an affluent of the Kombe, lat. 9° 40' S. lon. 17° 40' E. It is the seat of an independent chief. It is defended by a strong palisade possesses a school of some celebrity in which a kind of code, remarkable for the rigor and cruelty of its laws, and known by the name of Kesi or Quizelles is taught, and contains about 4000 inhabitants, notorious for robbery and superstition.

KOMBALA AN KIRABA a tn. S W. Africa, Kimbunda country cap. territory Kikangi lat. 18° S. lon. 18° E. It stands surrounded by beautiful Kumbunda trees on the bank of the Kutuy an affluent of the Kombe. It is well fortified by palisades and ditches that it has successfully resisted several assaults. The residence of the prince is built somewhat in the European style and the other houses though not handsome, look clean and comfortable. Pop. about 4000.

KOMBALA AN KIHANDA a tn. S W. Africa, Kumbunda country territory Bailundo about lat. 12° 10' S. lon. 15° 45' E. It is the chief place in the district of Kihanda, and the residence of a powerful chief who is all but nominally independent. Its naturally strong position, at the foot of a steep rocky eminence, has been improved by inclosing it with a stone wall built as usual in Bailundo without cement. The inhabitants, about 4000 are notorious plunderers.

KOMBALA AN KIKALA, a tn. S W. Africa, Kimbunda country territory Angolo, lat. 10° 45' S. lon. 17° E. It lies on the Balé, inclosed with a palisade and a ditch, and contains about 3000 inhabitants, who employ themselves partly in collecting ostrich from ponds in the vicinity.

KOMMADAGU or **KOMMADAGU** WARUA, a water-course, W. Africa, which, commencing in the S.W. of Bornou intersects it to a N. E. direction and finally reaches the E. shore of Lake Chad, 40 m. N. Kuka. In the dry season the water in it is limited to detached pools of stagnant water but it begins to form a continuous stream towards the end of July and thereafter runs seaward with a rapid current till February pouring a considerable volume of water into the lake. In this state it overflows its banks, and lays an extensive tract on either side of them under water. As the dry season returns nothing can exceed the incumbrance and beauty of the vegetation. A good deal of the tract is cultivated, but the possession is disputed, particularly in those quarters where extensive swamps and thickets have formed a regular jungle, and elephants, antelopes wild dogs, partridges, and guinea-fowl abound. The tract from which the inhabitants of Bornou have allowed themselves to be ousted by the lower animals is the most fertile in the country and was once covered with towns and villages. One of these towns was Gashara which was the favourite resort of the kings of Bornou during the most flourishing period of their empire, and of which all that now remains is a few ruins scattered almost inaccessible by the thickness of the forest.

KONAI, a river India, a large offset of the Brahmaputra, which throws off at Malsindurga, dist. Myanmaing, in lat. 25° 10' N., lon. 95° 45' E., flows first S. for 100 m. and then, after some meandering by a considerable branch with the Ganges, turns E.W. and remains this direction till it again joins the main stream in lat. 25° 15', lon. 90° 32'. In the lower part of its course it takes the name of the Dulacra.

KONCHA, a tn. W. Africa, Ashawia, 90 m. S.W. Yala. It is a large place, divided into three quarters, occupied respectively by the Falasha, the Kanuri and Fagen tribes. All the dwellings, except the governor's, which is built of clay are round conical huts. To the east of the town a lofty mountain is seen. The wild sugar-cane is said to grow here in great abundance. The wealth of the district seems to be in slaves of whom the governor possesses about 10,000.

KONG, a tn. W. Africa, 250 m. N. of the Gold Coast. It is a large place with houses entirely of clay. The inhabitants, Mandingoes or Wangars, are mostly employed in weaving, and manufacture an excellent cotton cloth of which a kind in red and black stripes is particularly celebrated.

KONGONE, one of the mouths or branches of the Zambezi, S.E. Africa about lat. 16° 56' E. lon. 38° 15' E. It is 5 m. S. of the Milambe or western branch, and 7 m. N. from Ena Lusho, which again is 5 m. from the Timbwa. The first 20 m. are straight and deep, and in closed with mangrove jungle then a small and rather tortuous natural sand bank off to the right, and after about 5 m. ends in the broad Zambezi. The rest of the Kongone branch comes out of the main stream considerably higher up as the outgoing branch called Doto. The channel is probably of recent formation and very variable. Mr. Livingstone states that during his acquaintance with it about 80 yards were washed away on one side, and deposited on the other: a navigable channel by Nyanza was quite filled up, and Pangi Island nearly all washed away. As nothing is done to preserve the channel it will soon be as shallow as the Milambe, and entirely useless for navigation.

KONIGSDORF, a tn. Austrian empire, Hungary co. Eisenburg, on the Lafnitz; with a trade in excellent flax and hemp, and 1100 inhabitants.

KONIGSFELD, or Kntousof (old), a tn. Austrian empire, Moravia, circle and about 2 m. N. Bräun. It possesses a handsome church a castle, barracks which were once a Carthusian convent, an archbishop's villa, and manufactures of best-wool. It is a great resort of the inhabitants of Bräun, and contains numerous villas and country seats. Pop. 2491.

KONIGSWARTH, a tn. Austrian empire, Bohemia, circle and about 16 m. E.N.E. Eggr cap dist. of same name. It has a parish church a townhouse, mineral springs with a bathing establishment, a brewery and manufactures of honory and receipt. The castle of Königswarth is situated in a park, and iron and tin are worked in the vicinity. Pop. 7494.

KONITZA, a tn. Turkey in Europe, Herzegovina, in the valley of the Neretva, which here forms the boundary between Herzegovina and Bosnia, 63 m. N. Ragusa. It is a poor Turkish town, separated by a bridge from another still more insignificant, which takes its name from the river. The only thing remarkable about these is the great change of vegetation which is observable on passing from the one to the other. In the valley on the side of Herzegovina a southern climate and vegetation prevail, and the vine, fig, and pomegranate are common fruits, whereas on the Bosnian side the principal fruits are those of the north—apples, pears, and plums.

KONYITZA, a tn. Turkey in Europe, Herzegovina on the Neretva, on the road between Mostar and Bona-Sarra, and nearly equidistant from them. The river which crosses the town, is spanned near its centre by a fine bridge of six arches. The inhabitants, about 6000 were formerly notorious for their pillaging propensities.

KOJAREK, or Kojari, a river India, which rises in Bonk's Dogmunda, about 60 m. S.W. Gwalior, flows easterly N.W. & N.E. and E. pursuing nearly a semicircular course, and joins the Betwa on its L. bank in lat. 26° 30' N. lon. 79° 14' E. Its total length is about 186 m.

KOONA, or Kovana, a river India, which rises in Orissa, about lat. 27° 22' N. lon. 82° 11' E., flows S.E. to the fron-

tier, where it forms part of the boundary between Orissa and dist. Guntakpore, thence continues in the S.E. direction somewhat easterly and joins the Gogra on its L. bank, after a course of 185 m. It might be navigated by canoes at all times, and by large boats during the rainy season but no commercial use appears to be made of it.

KOPAL, a fort, Russian empire, in the country belonging to the Great Horde of the Khirghiz, nearly equidistant from Lake Tenghis on the N.W. and the Chinese town of Kaila on the S.E.; lat. 45° N., lon. 83° E. It is the most southerly fort which Russia has erected in this region and is evidently intended first to overawe, and finally to furnish means for the subjugation of the native tribes. It is one of the most desolate spots imaginable, without a tree and with a soil composed of rough gravel and sand on which there is scarcely any vegetation. The error committed in selecting it was greatly aggravated by the arrival of 500 Cosacks with their families to form a permanent settlement, and of 200 more, who were to remain for three years to aid in carrying on the works. Much suffering and great mortality ensued. By dint of perseverance, however, the necessary works have been completed and a town has grown up which already contains 11,000 inhabitants, and has become the centre of a large and rapidly increasing trade.

KOPIS, a tn. Russia, gov. and 85 m. N. Mohilev, on the Dnieper, with a church, two charitable endowments, and a pop. of 2686.

KOPRILI, a tn. Turkey in Europe Macedonia circle and 26 m. S. by E. Ushak, on the Yardir which divides it into two parts, and is here crossed by a long bridge. It is poorly built, and consists of streets which are ill formed and very filthy. Koprili is the ancient capital of Byzantium in Paonia. Pop. 25,000.

KOPYZYNCE, a tn. Austrian empire, Galicia, circle and 5 m. N.E. Gorlice cap dist. of same name, with an establishment for the poor. A bloody battle was fought here in 1650 between the Cosacks and the Poles. Pop. 4958.

KORA or KORAKO, a tn. Greece, nomarch Cyclades, on the S.W. of the island Amorgos, near the mountain and cape of its own name with a parish school and a pop. of 2000.

KORALAY, a mountain, E. Africa, in the Somali country rising up from the rugged plateau which borders the Marer Piarie on the E. 60 m. E.N.E. Harar. Its name equivalent to our middle-belt exactly describes its shape two large granite boulders forming the pommel and crupper and a depression between them the seat. The summit commands a good view of the surrounding country. On all sides, says Burton except the north-west and north-east, was a sombre mass of granite hill the course of the valleys between the several ranges was denuded by a lively green, and the plains scattered in patches over the landscape those with dull yellow the effect of clay and stonable, whilst a light mist enshrouded the prospect in a carpet of blue and silver. The mountain is said to be much frequented by lions, and Burton thought he saw but one, had full proof of the fact when he came upon den with one lioness, and, having by a fresh hunt that the tenants had lately killed them.

KORAT, a frontier tn. on the boundaries of Siam and Cambodia in lat. 16° 20' N., lon. 103° 40' E., is the centre of a neutral territory of the same name, governed by an independent prince. The town, encircled with walls, is situated on an elevated plateau, which on all sides overlooks the surrounding country but to reach it the traveller must ascend a thickly wooded steep, named the *Dory Pape-Fat*, or Forest of the King of Fire, a gloomy region not unworthy of its mysterious name and rendered terrible in many places by the deadly fumes of its atmosphere. The inhabitants of Korat are chiefly engaged in the neighbouring copper mines and manufactures of sugar. Pop. of the kingdom about 60,000; of the town, 7000.

KORCZYNA, a tn. Austrian empire, Galicia, circle and 16 m. E. Jaslo with 8760 inhabitants, almost all linen weavers.

KORITSA, a tn. Turkey in Europe, in the S.W. of Macedonia, surrounded on all sides by lofty mountains, 33 m. S.W. Monastir. The advantageous position of the place, at the point where several important roads meet, and communicates with Yambou on the N. Berat on the W., Ochrida on the N. and Monastir on the S.E., give it a considerable trade.

It contains 10 000 inhabitants, of whom not more than 1000 are Turks, all the rest belonging to the Greek church.

KORITSHAN is in Austrian empire, Moravia, circle and 19 m W Hradisch. In a beautiful valley with a parish church, a synagogue, a castle with fine gardens and a picturesque gallery, a posthouse, and manufactures of glass, liquors, and so on. There is a tunnel spring in the vicinity P 2620.

KORNEGALLE or **KUNINGALLA** [add] one of the ancient capitals of Ceylon 55 m. E.N.E. Colombo. It is beautifully situated within the shade of an enormous rock of pines 600 ft. high and worn by time into the form of a couch and elephant. Nothing of the ancient town now remains except fragments of columns and carved stones belonging to the palace, on the site of which the principal civil officer of the district has his residence. The modern town consists of the bungalows of the European officials, each surrounded by its garden two or three streets inhabited by Dutch descendants and Moors, and a native hamlet, in which the principal articles exposed for sale are rice and curry stuffs and cooking chatties of brass or burnt clay. The district suffers occasionally from severe drought during which there is sometimes such a total destruction of surface water that alligators, bears, and other wild animals, make their way into the town to drink at the wells. Under ordinary circumstances, however the soil is prolific in the extreme. Rice, cotton and dry grain are largely cultivated, every cottage has its garden of coconuts around yak fruit, and coffee, the slopes are covered with luxuriant vegetation, and dense forests, in which deer and elephants abound, are seen on every side as far as the eye can reach. Kornegalle is much visited by Buddhists, who come from the remotest parts of Ceylon to visit an ancient temple on the summit of the great rock where the chief object of veneration is Buddha's footprint hollowed in the rock in a manner similar to that on Adam's Peak, the summit of which though 44 m. N.E. is here visible.

KOROND, a in Austrian empire Transylvania, circle and 37 m E by S Maros-Vasarehely on a small stream of same name; with several salt springs a bathing establishment and 2380 inhabitants.

KOROFIEC a in Austrian empire, Galicia circle and about 30 m E Stanislaw in a beautiful district on the Balaster with an elegant heronial castle. A bloody battle was fought here with the Turks in 1649. Pop. 2600.

KOROBKO, a in. Ruben, on the Nile, lat. 27° 55' N. To the S of this place lies the great desert of Koroko which for the

(though dislocations caused by earthquakes may be traced in the valleys of erosion), but are formed by horizontal irregular strata of different density, some only slightly kinked, but others united by argillaceous-ferruginous cement, and more capable of resisting the destructive effects of the atmosphere. The upper layers are those that seem less hard but none of these are very homogeneous. From this geological formation there result the most picturesque effects the sands are driven along the bottom of the valleys which they fill up horizontally to a certain height, leaving exposed only the tops of the hills. These hills disappear abruptly about twenty hours march to the south of Koroko, where their boundary is sharply defined in a direction from E.N.E. to W.N.W. — (Trommsdorff *Voyage au Soudan Oriental*, etc.)

KOBITION or **ANO-KASTRO**, a in Greece, nomarch Cyclades, island and 6 m S town of Andros on a bay of same name. It has a justice of peace court, a custom-house, a quarantine establishment, a Hallmark and two parish schools. Pop. 1500.

KORYNALUR, a in India, Gujerat, dist. Baruch, on the bay, about 2 m. above its mouth in the ocean, on the S. of the peninsula of Katiyar 200 m N.W. Haroda. It is defended by a fort, and possesses a temple of Krishna, which at certain times attracts large numbers of pilgrims. Its harbour is indifferent, and has little trade.

KOSARATZ, a in Turkey in Europe, in the N.W. of Bosnia, 22 m N.W. Banjaluka, on the Sava, an affluent of the Unna; has a castle built in the form of a square, and enclosed by a fosse.

KONHI a territory, Central Africa, lying on the W of the Nile, at the N end of the Albert Nympha. The Nile is navigable from its exit from the lake for a considerable distance, having the Koshi country on its W side, and Madu on the E.

KOSILLA or **Kosi** river, India, which rises in Kananak among the mountains of the Central Himalayas, in lat. 30° 52' N, lon 79° 54' E flows first S, then W., descending from the mountains through a gorge remarkable for picturesque beauty and grandeur resumes its original S direction, and returns it to its junction with the W. Kamanga, about 11 m below Rampoor. It has a total length of nearly 160 m and in the lower part of its course a channel 500 yards wide but carries little water except in the rainy season, when also it ceases to be fordable.

KOSMANOS, a in Austrian empire, Bohemia, circle and 3 m. E. Suralan with a parish church, a beautiful castle, a calico printmill and 2021 inhabitants.

KOSMODUMIANSK a in Russia, gov. and 100 m N.W. Kasan, cap. circle of same name, on the Volga. It has five churches, a circle school and a charitable facilities, and contains 4407 inhabitants.

KOSSEIR, or **Kosma** [add] a seaport, Upper Egypt, E. coast of the Red Sea, 30 m E.N.E. Tishbe, lat. 26° 7' N lon 34° 31' 50" E. It stands on a sandy beach at the E. extremity of the eastern route across the desert from Egypt towards Mecca. The whole neighbourhood is exceedingly bleak and arid, the only green plants seen being confined in two or three gardens, with a few date-trees of stately appearance. The principal buildings are, a square cluster of the houses, agreeably seated on a small quay near the water's edge; and the bazaar which is well provided with the ordinary produce of the valley of the Nile. The climate, tempered by the sea breeze, is not so scorching hot as in the interior but the advantage is overbalanced by the want of water, which is brought slowly by Bedouins from mountain reservoirs at the distance of several days' journey, and sold

QUART DISTRICT OF KOSSEIR.—Trommsdorff, *Voyage au Soudan Oriental*

space of two days' journey before reaching the plains called *desert* without water and sea of sand, is covered with remarkable conical hills, among which winds the path of the traveller. On the slopes of these hills lie moving sand, liable to be displaced by every storm, the winds disperse them generally on the slopes opposed to their course. These hills are formed of a granitic sandstone, which gradually becomes less solid in the composition as we advance towards the south. They are not due to upheavals or convulsions of the earth's crust

at a high price. The harbour counts only of a long wooden pier, running out about 100 yards into the sea. The protection of the town, and a small hill, make it safe during northerly and westerly winds, but in gales from other quarters there is no security and shipwrecks are frequent. The chief exports are grain, and white and printed calicoes the imports—rice, coffee, opium, and gambier. Kossel, however, is far less indebted for its prosperity to the general traffic than to the crowds of Mecca pilgrims who arrive at it, and for the conveyance of whom across the sea, in vessels so crowded that they resemble slavers rather than ordinary passenger ships, 25 per head is charged.—Besides the Kossel above described, there was another situated about 4 m. N., and now distinguished from it by the name of Old Kossel. The only interest it possesses is in its ruins, which prove its former importance. Off the coast great numbers of lobsters and other excellent fish are caught. Pop. about 2000.—(Ferdinand)

KOSSETZ, a tn. Austrian empire Hungary co. and 12 m. N.E. Trenčín on the Waag, here crossed by a stone bridge with a castle, manufacturers of cloth, a brewery a trade in corn, and 1000 R. Catholic inhabitants.

KOSSOGOL, or **BANAR DALAI**, a lake, Chinese empire, Mongolia, near the Russian frontier, to the E. of the Blackish Mountain, between lat. 49° 5' and 51° 34' N. lon 100° 32' and 101° 30' E., length, N. to S. 168 miles mean breadth about 22 m. It is in the shape of a long and comparatively narrow oblong tapering gradually towards the S. till it terminates nearly in a point, is fed by numerous streams from the mountains surrounding it on the N.E. and W. and discharges itself at its S. extremity by the Ege, an affluent of the Kobi-ga. Its depth is reported to be great, but has not been ascertained. A little to the S. of its centre is an island of a somewhat circular shape called Dalu Kulma, which is densely wooded with larches, Siberian cedars, and white fir, and said to abound with foxes, hares, goats, and deer. The lake teems with fish, which are caught in great numbers in spring and harvest, at the mouths of the streams. With the exception of a few marshy spots the banks are high and precipitous. The prevailing rocks are limestones clay-slate gneiss, quartz, red and gray granite, syenite, gneiss, and lava. Near the N. extremity is a large and thickly-wooded island, frequented by the Kalpas, who come to it in winter to hunt, and near its centre is another island of conical shape, and apparently volcanic origin. The shores are inhabited chiefly by Uryankai, who possess large herds of cattle. Near the N. shore is a Buddhist dargah or monastery containing three principal temples and numerous chapels. The largest of the temples is very spacious, and has numerous images of large dimensions, many of them glittering with gold and precious stones, and others clad in rich Chinese silks. The number of priests, or lamas is about 150. The Russian traveller Ferriani, who visited the lake in 1857, and lived for some days in the monastery saw fifty of its inmates actually employed on one occasion in conducting the service.

KOSTENDIL, or **GIVERNITZ**, [add] a tn. Turkey in Europe eyalet and 90 m. S.E. E. Asia, on the Strymon. It lies on the N. slope of a black mountain chain, and is the seat of the hakimians. The manufactures consist of arms and articles in iron and steel. In the vicinity are hot mineral springs. It contains 8000 inhabitants, whose chief employment is in the gold and silver mines.

KOSTVILAN (Gazak) a tn. Austrian empire Hungary co. Upper Austria, on the Dultvach, 12 m. N.E. Tyrnau, with a synagogue and 1360 inhabitants.

KOTAH, a native state in N. India, Rajpootana, between lat. 24° 30' and 25° 55' N., lon. 75° 35' and 76° 50' E. bounded N.E. and E. by Jhalowar, Gwalior and Chhapra, N.W. the Chumbul, separating it from Bomdree; N. a detached part of Gwalior; and S. a detached part of Holkar's Domdome and Jhalowar, length, N. to S., about 90 m., breadth 50 m. area, 4250 sq. m. It forms part of the high table-land of Malwa, and slopes gently westward towards the Chumbul which divides it directly, and by its affluent the Kala Shida, Korni, and Parbet. It is generally fertile and highly cultivated, but has a very indolent climate, being subject to scorching heat and hot winds in summer and becoming exceedingly unhealthy during the periodical rains. Pop. 453,900.—The towns cap. of the above state, & bank

(Chumbul, here crossed by a ferry 190 m. S.W. Agre, is inundated by a dry ditch and a rampart with bastions, and is defended by a fort situated at its S. extremity. It is a place of considerable size, and contains many temples, several mosques, and two palaces belonging to the rajah the one situated within the fort, and surrounded by numerous cupolas and slender minarets, and the other, on an inlet of the Chumbul, of very florid architecture and made by the rajah as a summer residence. The trade both domestic and transit, is important.

KOTAUR, or **KOPAR**, a tn. India, prand Madras, dist. Travancore, 9 m. N.W. Ope India. It is a large and somewhat straggling place, stretching about 1½ m. from N. to S. in streets which are generally narrow and irregular. The best part of the town is that occupied by the Brahmins, whose houses are of a better description, and arranged with some degree of neatness. The principal buildings are granaries, a large tobacco warehouse, a pagoda, and a free school founded by the late rajah for the instruction of the native youth in English and Tamil. Kotaur is much resorted to by merchants, as it is the principal mart in the E. of India for exchange in articles of trade and money. About a mile to the N. is Hagerool, which was once the seat of the Travancore government, and is now the station of the S. E. L. railway, as well as the residence of two missionaries of the London Missionary Society.

KOTHIKHADE a small territory and in India.—The **TRAVANCORE**, intersected centrally by the parallel of 31° N., and the meridian of 77° 30' E., is bounded N. by Bussahr and Kandooch, E. Bussahr and Tarrooch, S. Poonder and W. Bussahr and Kandooch, length, N. to S., about 12 m. breadth, 6 m. It lies between the Bussahr and the Tora, and forms part of a valley which penetrates the great mountain range extending from Warr on the N. to the Chaur on the S. It is mostly composed of strata of granite and red and white quartz, is well wooded, particularly on its E. side, and has much grand scenery.—The **TOWNS** cap. of the above territory, picturesque situated on the Gires, in lat. 21° 7' N. lon 77° 36' E. contains two remarkable masses of building, both perched on lofty rocky promontories. The one belongs to one of the principal mahadars, the other the residence of the rana, or ruler of the rana, on the territory is now British is of three stories and very imposing appearance. A story is yeting beyond the one beneath, while the whole is crowned by two handsome Chinese towers adorned with beautiful wood carving.

KOT KUMALIA, a tn. India Punjab r. bank Ravi, 105 m. S.W. Lahore. It is an ancient place, built of burnt bricks; possesses a fort and a bazar and has been conjectured to be the place where Alexander the Great in attempting a rash assault was wounded.

KOTOKO, a prov. Western Africa, forming the E. frontier of Bornou, and bounded N. by Lake Chad, W. Gambia, S. Lagos, and E. the Shari, which separates it from Baghirim. It has a surface so flat that a large portion of it is inundated during the rainy season. Immediately afterwards these flats, which have a black argillaceous soil are converted into one vast field of cultivation, on which great quantities of sorghum or holcus are grown. Among the vegetable productions the most remarkable are arborescent Euphorbiae, some of them attaining the extraordinary height of 30 to 35 ft. and presenting, in their succulent, luxuriant, and acacia-like leaves, a striking contrast to the monotonous and dry vegetation of the immense arid. The inhabitants at least of the villages, consist chiefly of the Kano and the Shawa. Some Arabs, mostly of the Belmont tribe, are settled in the provinces.

KOTROV a tn. Russia, gov. and 40 m. E.N.E. Vladimir, cap. circles of same name, on the Khama. It has two churches and a charitable endowment. In the N. of the circle there is a lake with a floating island. Many of the inhabitants are employed in making shoes and gloves out of hair. Pop. 1844.

KOWLOON, *See* CANTON in Supp. **KOYAM** a dist. Western Africa, Bornou, bounding on the E. with that of the capital Kuka, and on the N. with the celebrated Bornou Kommande Wauke. It is well peopled and well cultivated, and has extensive forests of middle-sized timbers, affording food to the numerous herds of camels

which constitutes the wealth of the inhabitants, a tribe originally from Kamen where they led a nomadic life.

KRAKOWIEC, a tn. Austrian empire, Galicia, circle and N.E. Przemysl, cap. dist. of same name with a baronial castle with fine gardens, an infirmary and 1700 inhabitants.

KRALJEVA, a tn. Austrian empire, Military Frontier, dist. Gradiska, on an island of the Fekra about 18 m. W by N. Hay Gradiska. It is of great antiquity, and was once a large and important place, but now contains only 980 inhabitants, and some beautiful ruins indicative of former splendor.

KRAPINA, a tn. Austrian empire, kingdom of Croatia and Slavonia, co. and 25 m. S.W. Warradio cap. circle and on a small stream of same name with a Franciscan monastery, a hospital, thermal baths, and pottery. The summit of a steep rock in the vicinity is crowned by the ruins of an old castle, once the residence of Louis the Great and Matthew Corvino. Pop. 1050

KRASNOI YAR, a tn. Russia, gov. and 30 m. E.N.E. Astracan, cap. circle of same name on the Aktsba, an arm of the Volga. It was founded by Alexia Mikhailovitch as a check on the Kirgizs and Kalmaiks, contains two churches, a circle and a parish school, a charitable endowment, and a trade in furs and otters. Immediately in front of the town is a hill from which salt-petre is obtained. Pop. 3785

KRASNO PRIMEK, a tn. Russia, gov. and 110 m. S.E. Perm, cap. circle of same name, bank Ufa. It contains a church, a circle school, and a charitable endowment. Large numbers of beehives are kept in the circle, and there are two sulphur springs. Pop. 2607

KILAU, isthmus and vi. Siam connecting Malay peninsula with the continent lat 10° 30' N lon 99° E. The peninsula, lying between the Pak Chan River which separates the Tenasserim provinces from Siam, on the W, and the Gulf of Siam on the E, is about 45 m. wide, level and intersected with water-courses. The proposal to construct a railway across it for the trade from Europe and India to China and Japan, gives it much geographical and commercial importance as it would lessen greatly the time, expense, and difficulty of the passage through the Straits of Malacca. The village stands upon the Kamau, a small branch of the Pak-cha and contains about fifty houses, occupied by Chinese, &c.

KRAYOVA (add.) a tn. Turkey in Asia, cap. Little Walachia, advantageously situated near the Rhyt at the junction of three roads which lead S from the Carpathians, 114 m. W by S Bucharest. It is the seat of an appeal court, as well as a court of primary jurisdiction, contains a gymnasium, a normal and a central school, and has a considerable transit trade. Though once a fine town, its chief attraction at present is a handsome park. Pop. 25,000

KRECHOW, a tn. Austrian empire, Galicia, circle and 7 m. W Zolkiew, with a Basilian monastery, founded and richly endowed by Peter the Great in 1630, and containing a valuable library and cabinet of antiquities. The only manufacture is paper. Pop. 980

KREIBITZ, three nearly contiguous places, Austrian empire, Bohemia, circle and 26 m. N.E. Leitmeritz, on a stream of same name. Kriebitz proper has a parish church, a town-house, an hospital, a brewery and a glass refinery. Pop. 1600. Lower Kriebitz has several glasshouses and mills, contains 1700 inhabitants, who are mostly linen weavers or glass makers. Upper Kriebitz has one of the oldest glass-works in Bohemia, manufactures of linen and cotton a mill, and 900 inhabitants.

KREMSIER (add.) a tn. Austrian empire, Moravia, circle and 10 m. N.E. Kremsier in the fertile valley of the Hanna, on the March, which is here crossed by a long chain bridge. It consists of the town proper and four suburbs, and has a large market-place, surrounded with trees and adorned with a statue, a collegiate church, built in 1269, mostly in the old German style, two other churches a beautiful summer palace of the Archbishop of Olmitz, a Piarist college an institute of the Sisters of Mercy, an ecclesiastical seminary, an open gymnasium, a high and a common school, and an infirmary. The manufactures consist chiefly of linen, and there are several important glass works, mostly for flint, bottles, and earthenware. Pop. 8110.

KREUTZ, a tn. Austrian empire, duchy Carinthia, about 26 m. W. Klagenfurt, with mines of lead and zinc, and 2602 inhabitants.

See: Aust. Stat. - Vol. II

KREUTZ, a tn. Austrian empire, kingdom of Croatia and Slavonia, co. and 22 m. S.E. Warradio, cap. dist. of same name, in a plain on the Glavovics. It is the seat of a Greek bishop, and of an episcopal consistory, is governed by its own magistrates as a royal free town, and has two churches, a high-school and silk spinning mills. Pop. 2100.

KREUZ (Dorren) a tn. Austrian empire, Hungary, co. and 6 m. S.E. Csakmery with a fine castle, a mineral spring, and 2686 inhabitants.

KRIEBA, a tn. Austrian empire, Transylvania circle and about 13 m. W Kronstadt, with the ruined castle of Haidenburg on a lofty height, and 1820 inhabitants.

KROLOVETZ, a tn. Russia, gov. and 100 m. E. Tcher uigor cap. circle of same name. It has six churches, a circle school, a benevolent endowment, and a famous yearly market which lasts from the 14th to the 16th of November and sees a large amount of business. Pop. 6317

KROMPACH, a tn. Austrian empire, Hungary co. Zips on the Hernad, in a romantic valley 16 m. S.E. Lomnachen, with a beautiful castle and garden, manufactures of linen, a trade in honey iron-works, and iron, silver, and copper mines. Pop. 2011

KRONAU, a tn. Austrian empire, duchy Carinthia, on the Save, and a slope of the Schneebach, not far from the frontiers of Carinthia, with 1000 inhabitants.

KROYAU, a tn. Austrian empire, Moravia, circle Brunn with a beautiful parish church, and a pop. of 1000

KROCEVENTO, a tn. Austrian empire, Galicia, circle and 10 m. S.W. hew Sande with mineral springs and an old mountain castle in which St. Knnegunda and her nuns found an asylum during an invasion of the Tartars. Pop. 1150

KROYU, OF AK HIRBAN a tn. Turkey in Europe Albania, eyalet Rumi li 40 m. S.E. Sostari. It consists of the town proper and a castral the latter which dates from 1398 surrounded by a wall fortified with towers and the former containing 8000 inhabitants, chiefly Musulmans.

KRUMBACH, a tn. Austrian empire, Lower Austria 47 m. S Vienna has an old parish church and chapel and hospital mills, and various industrial establishments. Pop. 2120

KRSHEVATZ, a tn. Turkey in Europe Servia, cap. circle of same name near the Raima, a little above its confluence with the Morava, 90 m. S.E. Belgrade. It is the seat of a court of justice and various public offices, and has a church, a school and a much frequented yearly market. Pop. 2000

KRYNICA, a tn. Austrian empire, Galicia, circle and about 20 m. S.E. New Bauden, in a pleasing valley with chalybeate springs, and a much frequented bathing establishment. Pop. 1250

KRYSTYKOPEL or KRYSTANTPOL, a tn. Austrian empire, Galicia, circle Zolkiew, on an affluent of the Bug 42 m. N.W. Lubarg with a large baronial castle, a Bar nardine and a Basilian monastery and important manufacture of linen. Pop. 2384

KREZSOWICE, a tn. Austrian empire, Galicia, circle and 6 m. N.W. Cracow, cap. dist. of same name, on the Cracow railway with a modern parish church in the Gothic style, an imposing castle, manufactures of paper, and mineral springs. Pop. 1200

KUBANGO, or OUBANGO, a river, S.W. Africa, which rises in the Klamanda country on the borders of the Bechuanaland, where the Cango also has its source, flows southwards, forming several cataracts, then E. separating Gaborone, Nyasina, Randu, Kafira, Ovampu, Kongoal, and Minkuru on the right, from Kaping, Dalenhuah, Klorombo, Masena, Dapabab, Sambo Inditiko, and Lulu on the left, near Inditiko receives the Kuito, and is understood finally to join the Chobe or Zambezi, an affluent of the Limpopo or Zambesi, which empties its waters in the Indian Ocean.

KUBO, a tn. Western Africa, prov. Delta, 210 m. S.E. Timbuctoo, is a place of some importance, surrounded by a stockade and several ponds. The houses made of clay, are well built, and have usually a tolerably large courtyard. At the W. end of the place is a suburb inhabited by Fulah cattle-lifters. Turkeys are very common.

KUDJWA, or KUPROSA, a tn. India, N.W. Frontier, dist. and 20 m. N.W. Pothohar. It was destroyed by Aurang-zeeb.

aid, to commemorate a victory which he gained here over his brother Shale, and was once a place of some importance, with a fine canal. At present it has a well-supplied bazaar.

KUDSIR, a tn. American empire, Transylvanian, divided and E. Bazaar, with important iron, copper, and 5000 inhabitants.

KULHORA, a petty hill state, India, among the ranges of the sub-Himalayas, lies between lat. 31° 15' and 31° 25' N; lon. 77° 27' and 77° 55' E. and is bounded N by the Sutlej separating it from the Punjab, E the petty states of Mungul and Bhagel B. Hindoor, and W Sikkim area about 150 sq. m. revenue, 211,000. The surface is elevated, but in general not so elevated as to be unfit for cultivation, while along the banks of the Sutlej there are several alluvial tracts of some extent. The inhabitants are industrious cultivators and by means of terraces, which run like the steps of a magnificent amphitheatre, and are carried up to the very mountain-tops, have secured a series of fertile fields, on which are grown rice, maize, millet, wheat, pulse, oil-seeds, ginger, opium, and tobacco. The fruits are numerous, and include peaches, apricots, walnuts, apples, pears, pomgranates, raspberries, gooseberries and strawberries. Pop. 32,350.—The small town of Kulhara through it gives its name to the state is not the capital, the rajah having fixed his residence at the larger town of Bahadur.

KUKAWA a tn. Western Africa, cap. Borno, about lat. 12° 30' N, lon. 12° 15' E; about 30 m. W from the E. W. shores of Lake Chad. It consists of two distinct towns, each surrounded by a white clay wall, and separated from the other by a space about half a mile broad. The E. town, called Kuka Gedda, occupied chiefly by the wealthy contains very large establishments while the W. town called Kuka Fata, consists of crowded dwellings huddled together in narrow winding lanes. In regard to the W. town, how ever an exception must be made of the principal thoroughfare, which traverses it from W. to E., forms the great promenade, and is constantly crowded by persons on foot or on horseback. The space between the towns consists partly of a wide open road connecting them. The rest of it is built upon and so irregularly, as to present to the eye a more medley of large clay buildings and small thatched huts, massive clay walls inclosing numerous yards and light fences of reeds. Around both towns are small villages or clusters of huts, and large detached farms. The buildings of great note are the sheikh's palace and an adjoining mosque with a minaret, in the dorsal or principal street of the W. town; the sheikh's palace in the E. town, and the palace of his son his brother and the vizier. In the great market, situated immediately W. of the W. town, a large fair is held every Monday, and presents an interesting spectacle. 'It calls together says Dr Barth 'the inhabitants of all the eastern parts of Borno the Shawa and the Koyra, with their corn and butter, the former (the Shawa) though of Arab origin and still preserving in purity his nomadic character always carrying the merchandise on the back of oxen, the women mounted upon the top of it, while the African Koyra employs the camel or not exclusively at least with a decided preference for the Koyra with their butter and dried fish, the inhabitants of Maki with their tobacco (the kore-bani) from Badama, or rather Yedina, are very often seen in the market, selling wares made from the skin of the hippopotamus, or sometimes even hippopotamus meat or dried fish, and attract the notice of the spectator by their slender figures, their small beehive houses, unadorned by any incisions, the men generally wearing a short black skirt and a small straw hat, and women, their neck adorned with several strings of luscious or shells, while the women are profusely ornamented with strings of glass beads, and wear their hair in a very remarkable way.' The collected articles for sale are maize, and other materials for the light buildings common throughout the country; corn exposed in long rows of leathern bags; cattle, often a hundred or more; numbers of horses; textile fabrics, including the 'amagot', or robe from Ufa, and the hard or velvet, the 'fakam', and the 'misham' shawls, shirts, turbans, heads of all sizes and colors, leather-work, colored beads of every shape and size very neatly made of ox-hide, and little boxes made of the bark of the fruit of the date-tree. Last of all must be mentioned slaves, for the sale of whom a special place in the market is assigned. The number of persons attending the market often amounts to 12,000 or 15,000.

KUKLAENA, a tn. Turkey in Europe, Bosphorus, A. W. Philippopolis, at the foot of Mount Rhodope. It contains 3000 inhabitants, partly Christians, partly Turks. The famous ancient Greek school, erected at the expense of a Greek native of the place.

KULAT ISHER-SUKIF, a magnificent but deserted fortress, Palestine, 17 m. S.E. Sidon, on a high cliff, 1 bank Lity which presents its towers 1500 ft. below. It figured much in the wars of the Crusades, to whom it was known by the name of Beyfort, and indebted for extensive repairs. The ancient portion probably not of earlier date than the Roman dominion in Syria, is built with bevelled stones and contains several square towers. The chief work of the Crusaders, still existing, is a fine Latin chapel. The castle, overshadowed by the Jebel Liban only on the N and N.E. is visible at a great distance from all other directions, and forms a conspicuous object.

KULFEIA a tn. Western Africa, cap. prov. Mosi, 400 m. N of the Gold Coast. It is said to be more important than all the other towns in the province and has a well frequented market. The inhabitants are celebrated for their skill in archery.

KULINJYRA or KANJA a tn. India, Rajpootana, state Bikaner, 139 m. N.E. Bikaner. It is a fine town, but has been chiefly by Jains, and was a place of considerable wealth and trade till it was ruined by Mahatta extortion, and became almost deserted. The chief evidence of its former prosperity is furnished by a Jain temple, a large and complicated structure crowded with images, embellished with elaborate carving and surmounted by numerous domes and pyramids.

KULLANG a river India, which rises on the S. frontier of the Toolee Ram Napatana country in lat. 20° 4' N; lon. 83° 3' E; flows southeasterly N and N.W. and joins the Brahmaputra in lat. 20° 15' N, lon. 91° 55' E, after a course of about 125 m.

KULOFCHA a tn. European Turkey 15 m. E.S.E. Shamba. Here, in 1829 the Turks, under the Grand Vizier having with more courage than prudence, quitted their defensive position and given battle to the Russians under Marshal Diebitzsch sustained a signal defeat. The town was in consequence destroyed but has since been rebuilt.

KUMADAU, a lake, S. Africa, on the N. frontiers of the Kabinen Desert. It is about 15 m. long by 4 m. broad, receives the water of the Zouga, the principal outlet of Lake Ngami and, though the lowest level of the great depression which occurs in that part of the country, has an absolute height of 2700 ft. The extent of the depression may be inferred from the fact that the lake is 1800 ft. lower than Kolobeng, situated 230 m. to the south.

KUMHRA a tn. S.W. Africa, Kimbunda country, territory Bailando on a rugged mountain belonging to the Ling-Ling range, near the N. frontier of Kakka, to which it once belonged; lat. 18° 30' S; lon. 15° 50' E. Its inhabitants are notorious for their predatory habits. In the country another place of the same name was recently formed by settlers chiefly from Benguela. This settlement, founded under the auspices of a rich widow, has hitherto given no umbrage to the original inhabitants, and promises to be prosperous, having already some extent of cultivated land, and numerous cattle. Pop. 3000.

KUMPI Y, a tn. India, presid. Madras, dist. and 27 m. N.W. Bellary, r. bank Tocombdra. It consists of nearly 3000 houses, occupied chiefly by Hindoo shopkeepers and cultivators, with a considerable mixture of Mussulmans, contains many pagodas and mosques, and was once defended by a strong fort upon its ruins. There is here an important ferry across the river between the ceded districts and the Nizam's Dominions.

KUNHER, a river, India, presid. Bengal, which rises on the frontier of dist. Birgoora, about lat. 23° 15' N; lon. 88° 29' E, flows N with a slight inclination westward and joins the Ganges on the right bank, after a course of about 130 m.

KUNOWITZ, a tn. Austrian empire, Moravia, circle Hradisch, on the Olmütz, with a very ancient parish church, and 3374 inhabitants.

KUPAROL, KUDARUOLLA, or Rio San Francisco, a river, S.W. Africa, Benguela, which, rising in the mountains

of Khatia, flows W. through the parched and stony tract of Hanyu, receives on its left bank the Kalunga, and several other affluents, waters the fertile plains of Dumbu, and after descending its way through a narrow mountain pass, falls into the Atlantic near Cape Luno.

KURAYE is a W. Africa, Hausa States prov. Katsina, 20 m N W Kano. It is a walled town of considerable size. The wall, provided with loopholes for archers, and pierced with three gates, is in good repair. The houses are all thatched huts without any clay buildings. The market is indifferently supplied, and the cultivation of the surrounding district is almost entirely confined to millet. The walls are 8 Sabun deep. Pop. 5000 to 7000.

KURGOODE, a tn India, presid Madras, dist. and 18 m N by W Bellary. It was formerly a large place, and now consists about 500 houses and several temples one of which is a large pagoda with a colossal figure of the bull Nandi 13 ft high cut from a single block of granite.

KURNALI, a river Asia, which rises in Tibet, in lat 30° 43' N lon 80° 47' E, flows S.E. for 75 m to Angash, on the frontiers of Koutou, enters that state, and proceeding from it, first in a S.E., and then in a S.W. direction, waters Oude when it again turns S.E. and joins the Gogra. Its total length is about 325 m.

KURNOOL (add.), a tn India, presid Madras, 250 m N N W Madras cap dist. of same name, is the fort formed by the junction of the Hindry with the Toombudra. It consists of a petiah, or native town, and a fort. The town occupying the E. extremity of the fort, where the rivers actually meet, is about 2½ m in circuit, and inclosed by a thick and a wall 10 ft high. The streets are narrow and badly drained and the houses, about 2000, are mostly built. The bazar however is good and the river supply excellent drinking water. The fort, which joins the petiah on the N.W. is about 550 yards long from N. to S., and 690 broad from E. to W. It is surrounded by a wall of limestone and sandstone 17 ft high and 9 feet thick and flanked with circular bastions. On the N and E where it is washed by the Toombudra, no other defence has been deemed necessary but on the W and S.W. there is a deep and broad ditch. It is entered by three gateways. The interior of the fort is inhabited chiefly by the relatives of the late nabob the governor, most officials, and the officers of the native regiments stationed here. The principal buildings are the palace bar, arsenal, and hospital. The cantenary is situated to the S. on the opposite side of the Hindry. The regimental lines, with a postbag parade ground, are on a plain about 800 yards from the W. gate of the fort and cover an area 371 yards long by 170 broad. The streets are wide and the houses good, but the drainage is defective. Between the lines and the Toombudra a new village, called the Nova-petiah, has sprung up, and has a pop. of about 2000 exclusive of the persons connected with the military bazar and amounting to about 2000 more. The climate of Kurnool is a bad one. Small pox and fever prevail and cholera is seldom long absent. Pop. 23 000.

KURRAH, or KARRA, a tn India, cap. pergunnah of same name, b. bank Ganges, 40 m N W Allahabad. It is about a mile along the river and was a place of great importance till the emperor Akbar commenced its ruin by removing the civil establishment to Allahabad, and Aash Dowlat, Nabob of Oude, completed it by pulling down many of its finest buildings, and carrying off the materials to employ them in building and embellishing Lucknow.

KURREFI, or KOLFI, a tn W Africa, Hausa States, prov. and 10 m S S W Katsina, bespeaks the troubled state of the country. As a means of defence the inhabitants have thrown up a number of outworks in front of the town, in addition to a double moat and triple wall which previously existed. Pop. 5000.

KURUDAN, or LARTAKO, a tn S Africa, near the S. borders of the Kalahari Desert, 650 m N E Cape Town. It is the furthest inland station of the London Missionary Society N. of the Cape, and has thus acquired a degree of interest and importance which mere population could not give it. "The mission-houses and church are built of stone. The gardens, irrigated by the Kuruma river, are well stocked with fruit trees and vines, and yield European vegetables and grain readily. The pleasantness of the place is an

hanced by the cool air it presents to the surrounding country and the fact that it owes all its beauty to the manual labour of the missionaries. Externally, it presents a picture of civilised comfort to the adjacent tribes, and by its printing-press, worked by the original founders of the mission, and also by several younger men who have entered into their labours, the light of Christianity is gradually diffused in the surrounding region. Knowing the importance of commerce as a means of civilisation the missionaries got permission from the government for a trader to reside at Kuruma, and a considerable trade has been the result. The permanence of the station depends on its perennial fountain which issues from beneath trap rock, and having a temperature of 78°, probably comes from the old miocene sediments forming the bottom of the great primeval valley of the continent. It is less copious than when the missionaries first settled here, and there is some reason to suspect that this diminished supply is connected with a general denudation which is taking place over a wide extent of country.

KUSABAT a vil N Africa regency and a few m S E Tripoli. At the N. extremity in the old castle of Masalia, built with square stones from old ruins, but scarcely capable of defence, though provided with a Turkish garrison. The vil., containing from 800 to 4000 houses, built of stone along a gentle slope, has a mosque situated on a lofty eminence.

KUSADA, a tn W Africa, Hausa States, 40 m N W Kano. It is an important place, with a wall which is in tolerable repair, and inclosed an area which is rich in trees, and gives the town a cheerful and comfortable appearance. Most of the huts have clay walls and a thatched roof, a mode of construction well adapted to the climate and the nature of the country. The country around has a delightful park-like appearance. Indigo and tobacco are extensively cultivated. Honey is an important article of produce. The rich warm-water basins, growing everywhere, furnish the bees with abundance of food and the natives obtain their honey by providing them with hives formed of thick hollow logs, which they fasten to the branches of the colossal ka-trees.

KUSHYN, a tn and fort India, Buzahr near a considerable feeder of the Fabur in lat. 31° 11' N lon 77° 43' E. The site, from being completely hemmed in by mountains, is not extensive, but the houses are mostly built on well covered with slate. Close to the town are mounds of specular iron ore embedded in mica slate. The ore is both smelted here and converted into malleable iron.

KUSSOOR, a tn India, Punjab, 40 m S by E Lahore. It is a very ancient place, inclosed not only by a common wall, but consisting of several divisions, each of which has its own separate wall and entrance. Among the public buildings are several mosques and palaces. The environs are covered with gardens.

KUSSOWLEE, a sanitary station India, Dagburt, 15 m S S W Shula. It consists of a hill about 5 m. in circuit, and considerably detached from the mountain range to which it belongs. Its height above the sea is about 7000 ft. The ascent from the plains is sudden, and the face of the hill clothed by ravines in which strata of clay slate at high angle are exposed, has rather a forbidding aspect. The N. side is less abrupt, and becomes flatter with the range that slopes to the river Gunbar. The summit is an undulating flat. The soil overlying the rock is light and porous, quickly parting with any superabundant moisture that may fall upon it, the air is dry and bracing, and the general salubrity of the station may be considered as well established, notwithstanding a visitation of cholera has shown that it is not beyond the reach of that frightful scourge. The principal disadvantage is the want of water which during the spring and early part of summer, must be brought on mules and bullocks from springs 13 m. distant, and 845 ft. below the level of the garden ground.

KUSTENDJI (anc. Comenche) a tn Turkey in Europe Bulgaria, synal, and 69 m E N E. Silesia, on a promontory which projects half a mile S.E. into the Black sea. It has a harbour which is much visited in summer by vessels loading with corn. The roadstead though sheltered by the promontory from N. winds, lies open from N.E. to S., but small vessels, by approaching the shore nearer than large vessels could venture, obtain anchorage. It is a good town the town itself protects them from the E. Trojan's wall extended

from Mbandaka to Chetavode, and as this is nearly the shortest distance between the coast and the Douba, it was proposed to construct a navigable canal between the two places. By this means about 180 m. of intricate navigation would have been avoided. An actual survey, however, has proved that the channel level to be passed over is 2 m. from the Black Sea, is 164 ft. above it, and that the limestone hills, through which the canal would pass, cannot furnish the water necessary to flood it. The idea of a canal has, therefore, been abandoned, but a railway has been constructed. Pop. 2000.

KUTATU, a river S.W. Africa, which has its source in the plateau of Bambo, near the S.E. extremity of the Djenne range, flows nearly due N., separating Mallando from Bida, and the head of Mungoya or Malamba, and after passing over nearly four degrees of lat., joins the Congo on the left bank, nearly opposite to Pango Andongo. To distinguish it from several other rivers of the same name, it is usually called Kutatan-Mungoya.

KUTNO, a tn. Russian Poland, gov. and 70 m. W. Warsaw, with a church, a circle and an elementary school, some manufactures, and 1038 inhabitants, mostly Jews.

KUTTUNGEE, a tn. India, N.W. Province, territory Sagar and Nerbuda, 89 m. S.E. Sagar. It possesses a large and well-supplied bazar and has long been famous for the manufacture of gun-barrels, which are largely exported.

KYAU-CHU is a tn. China, prov. Shantung, about lat. 36° 17' N., lon. 118° 12' E. It stands at the N.W. part of the head of a delta bay, is bounded by a peninsula on the E., has a spacious harbour and is the principalemporium of the province.

KYE-SCHER, a tn. Turkey in Asia, Sivas, 810 m. S.E. Constantinople. It stands in a rich and fertile valley and consists of about 1200 houses, partly grouped together and partly scattered, the one forming the body of the town,

and the other a kind of suburb, almost buried among plantations. The most conspicuous public edifice is the madrasah or rather a large pile of building, part of which forms a madrasah. It has a richly adorned portal, with a row of twisted pillars, and a tall and slender minaret, which would be of great beauty if it had not unfortunately lost its top. Part of the building is now used as a military magazine. The market is large and much frequented.

KYTHUL, a tn. India, Sindh, in a flat and fertile district, lat. 28° 45' N., lon. 76° 38' E. It is irregularly but substantially built of brick and possesses a lofty palace which overlooks a fine grove of trees overhanging a large sheet of water. Great quantities of sal-ammoniac are mined and exported here.

KWEI or **Koon**, a tn. China, prov. Kiangsi, 1 bank Yang-tze-king, 200 m. W. by N. Wu-chang-foo. It is a small place, consisting of about 100 houses within its walls, and 80 houses outside. About 2 m. above its coal of indifferent quality is obtained by digging into the side of a hill. It is not used in its natural state, but mixed with water and shaped into bricks of which large quantities are sent by water to Ichang.

KWEI-LIANG, or **QUEI-LING**, a tn. China, imp. prov. Quansung, in a mountainous dist. near the source of a river of same name. Though the capital of the province, it is said to be poorly built, and to have little or no trade the river on which it stands flowing through narrow valleys in a channel so encumbered by rocks and shelves as to be navigable.

KWESHAN, a group of islands, China of the N.E. coast of prov. Chekiang. They are 11 m. number the largest, only 3 m. long and 1½ m. broad, so deeply indented that at two places it is not more than 250 yards across, and its coast line presents a range of steep and lofty cliffs. The whole group is occupied by a dense population living chiefly on fish

L

LABO, a tn. Philippine Isles, prov. Camarines Norte, in the lat. of Lason, stands in a fertile and well-watered valley at the foot of a lofty mountain, whose summit is in lat. 18° 45' N., lon. 123° 45' E., and consists of 400 houses. The valley produces rice, maize, sugar-cane, indigo, and abounds and has the advantage of being protected both from the S.W. and from the N.E. monsoons—from the former by the central cordillera of Camarines, and from the latter by the sierra of Ragay. Pop. 2400.

LABRADOR [adj.] The vast peninsula which commonly bears the name of Labrador, a term more strictly applied to the N.E. portion of it, occupies an area between the Atlantic and Hudson's Bay, lying between lat. 46° and 66° N., and lon. 55° and 79° W. The Gulf of St. Lawrence, the North Atlantic, Hudson's Straits and Bay, are its boundaries on three sides; Rupert's River, the Miramichi, and the Bonaventure form its approximate limits on the S.W. From the mouth of Rupert's River on Hudson's Bay to the mouth of the Bonaventure on the Gulf of St. Lawrence, the distance is about 470 m.; and from Cape Wollaston, the northernmost point of the country, to the Straits of Belle Isle, it is 1169 m. Northwards from the Hudson's Bay Company's post at Bonaventure, is a direct line to Ungava Bay, the distance is about 850 m., and to Cape Wollaston, in the N. not less than 1500 m. The area is about 480,000 sq. m. The whole of this immense country is inhabited by civilized men, except a few settlements on the St. Lawrence and N. Atlantic coasts, and some scattered ports of the Hudson's Bay Company. It is also thinly peopled by nomadic bands of Montagnais, Keweenaw, Micmacs, and Swampy Cree Indians, and by wandering Esquimaux on the N. coast. As a whole, it is unfit for human habitation, and is now in many parts almost a desert. The fisheries on its

coasts give it its principal importance. In the absence of definite boundaries, the entire peninsula is divided into three parts, supposed to be separate watersheds. The area draining into the gulf and river of St. Lawrence belongs to Canada, that supposed to be drained by rivers flowing into the Atlantic is called Labrador and is under the jurisdiction of Newfoundland; the remaining part, drained by rivers flowing into Hudson's Bay is named East Main. The longest river tributary to the Gulf of St. Lawrence is the Molok, which has its source in some of the lakes and swamps of the high table-land of E. Canada, and after a course of more than 250 m., with a fall of more than 1200 ft., descends in lon. 66° 10' W. about 18 m. E. of the Bay of Seven Islands. The St. John, Mingan, Ouanan, or Romain, Katakagan and other rivers, all as large perhaps but not so long as the Molok, also fall into the gulf. The character of the country drained by them is very mountainous, even 100 m. from the coast, forming ridges running and winding in all directions and lakes, some of very considerable size, are innumerable. Passing this rugged part towards the interior the country becomes more level the lakes are of far greater magnitude, well stocked with fish of every description from the trout of 60 lbs. to the smallest species. Hamilton or Esquimaux Bay is the most important outlet on the E. coast. The Ashuanipi or Hamilton River rising in the table-land near the head-waters of the Molok, is the great river of Labrador and falls into the head of the bay. The Kanamot cutting through the Mealy Mountains from the S. and the Esquimaux River, N. of the Hamilton, are likewise important tributaries of Hamilton Bay. The country near the inlet is extremely rugged and hilly though the S. is more level and better wooded than the N. side. The rivers falling into Ungava Bay are the

Kakabek or South River Gogaba River, White River, and a few other minor streams. The lakes of this northern watershed are not many or large. Lake Caniquanque, the headwater of South River, occupies a central part of the peninsula, equivalent about 850 m. from the St. Lawrence and Ungava, and Hamilton Bays, and is about 70 m long and 15 to 20 m. broad. The country drained by the river tributary to Ungava Bay is, W. of South River, entirely bare, white black and barren rocks distinguish the sea-coast. The western division of the country is drained by the Little and Great White rivers, discharging themselves into Hudson's Bay, and the East Main and Rupert's rivers flowing into James Bay. The latter river brings down the water of the vast Mistassini Lake, which lies between lon 71 and 74° W. In the neighborhood of Hudson's Bay and Lake Mistassini the country is occupied by thousands of lakes and enormous rocks piled one on the top of another and is treeless and sterile.

Since the extinction of the exclusive rights of the Hudson's Bay Company, many fishing posts and villages have been established on the Labrador coast and N shore of the gulf. The houses of the settlers are mostly of wood, generally, because most easily and cheaply, procured from Quebec. On the coast, between the Straits of Belle Isle and Cape Whittia, the climate is very severe, with prevailing fogs, in the interior it is much better and the seasons are in advance of those on the coast. The scenery is wild, barren and gloomy, the mountains being generally about 500 ft above the sea. From Cape Whittia to Nasauquon Point the granitic hills add on an average 900 ft, the banks of the coast between this point and the Mingan Islands are very important as fisheries. The Atlantic coast is all of it mountains, and the faces of the hills which front the sea are generally bare rocks. Inland there is less desolation, and in some parts fine and spruce and birches occupy the valleys and sheltered localities. The lakes of the interior are frozen and the surface of the country covered with snow, for the greatest part of the year. There is little annual ice, and the chief of the fur-bearing species the hunting of which forms the main occupation and support of the few tribes of Indians that maintain an existence upon the peninsula. Three Roman Catholic missions upon the shores and several of the English Church have been recently established in the new fishing settlements, the first English church having been consecrated at St. Francis harbour by the Bishop of Newfoundland, on July 10, 1853. The Moravians also have missionary stations on the coast. With a coast line of 1000 m Labrador is said to have a population during the fishing season of about 80 000 who import all the provisions they consume, and export fish to the amount of £200 000 to £1 000 000 annually. The permanent population of the Canadian shore was, in 1853 4418.

LACHENABE, a co. British America, Canada East, co. L. Ascension on the James a small affluent of the St. Lawrence, 16 m from Montreal with a R Catholic chapel, some general trade, and a pop. of about 1200.

L.A. CHINE, a co. British America, Canada East, co. Jacques Cartier, on the S.E. shore of the St. Lawrence, 9 m from the city of Montreal. It possesses a Protestant and a R Catholic church, and several schools, and carries on a considerable trade in lumber. Pop. about 2000.

LACISE, a co. Italy Venetia, prov and 12 m. W N W Verona, close upon Lake Garda. It is surrounded by terraced walls, and has a parish church a spacious haven, many factories of sail-cloth, and a considerable trade in fish. Pop. 2637.

LADINHO-POLE a la Russa, gov Olenets, cap. circle of same name on an elevated spot above the Syr 86 m. S.W. St. Petroszodak. It has two churches, but derives any interest which it possesses from its docks, which were constructed by Peter the Great. On the site of the palace which he occupied a monument was erected in 1833. Pop. 1408.

LAFAYETTE, a co. U States, Indiana, cap. co. Tippecanoe, at the head of navigation of the Wabash, on the Wabash and Erie canal, and at the junction of three railways, 40 m. N W Indianapolis. It contains fifteen churches, several public and private schools, a number of good hotels, paper mills, and flour mills, agricultural implement, woollen, and soap and candle factories, foundries, tanneries, breweries, and

distilleries. Its ample means of transport by water and rail enable it to command the trade of the surrounding country. Pop. (1850) 9887.

LAFETE or **LAFITE**, a mountain E Africa, in the Latoka country, lat. 4° 33' N lon. 32° 48' E. It is the highest peak of the range that forms the northern side of the broad valley of Latoka, and rises abruptly to an elevation of about 8000 ft.

LAGES, a co. Brazil prov Santa Catharina, on the shores of the same, near the sources of the Uruguay, 105 m. W N W Desterro. It lies in a deep hollow among the mountains and has two or three hamlets, with several others of a very indifferent appearance. Most of the houses are severely of compressed earth and have no place in the windows. Within the town the number of the inhabitants does not exceed 500 but the municipal district, which is of considerable extent, and well adapted both for agriculture and the raising of cattle, has a pop. of about 9000.

LAGHOUAT, or **EL-Aghwat** a vil N Africa, Algerian Sahara, on the Jeddil 200 S. by W Algiers. It forms at present the most advanced spot of the French towards the S and is the principal market for the inhabitants of the Jeddil valley. It has some manufactures of woollen stuffs and articles made of camel's hair. After a memorable siege it was definitively occupied by the French army in 1852. Pop. 2367.

LAGONUY a tn. Philippines Isles, on a spacious bay of same name on the E coast of Luzon lat. 18 14 30' N, lon. 122° 22' E. The bay formed by a large indentation in the mainland, and another in the island of Luzon, is too much exposed, to give safe shelter to shipping. The district in the vicinity produces rice, sugar cane, coconuts, and abaca. Pop. 7922.

LAGOS, two places Mexico, state Jalisco —1 San Juan de los Lagos, 80 m N E Guadalajara at the height of 6000 ft, above the sea is a large place of very indifferent appearance consisting almost entirely of mud huts, and possessing no public building worth notice except a handsome church. It is famous however for its fair which is held from 6th to 13th December, and attracts numerous dealers and pleasure-seekers, particularly from Vera Cruz and Tampico. Pop. about 6000 —2, Lagos, about 16 m E of the former with a splendid cathedral and a very large flour mill, which is said to have been erected, fitted up, and supplied with water-power brought from a distance of 10 m. It contains 9000 inhabitants, who are chiefly employed in agriculture, and in the manufacture of cotton and woollen goods.

LAGUNA a tn. Brazil prov Santa Catharina, on a lagoon which gives it its name, near the mouth of the Tubaro in the Atlantic, 60 m. S S W Desterro. It is a small place but has a large square, on which an elegant church stands, and at least one handsome street, stretching along the beach. The harbour having only a depth of 8 ft. of water on the bar, cannot admit large vessels. It is, however much frequented and forms the port for a considerable district. Trade and fishing are the chief employments. On the banks of the Tubaro coal has been found. No fewer than twenty-sevens are counted, some of these it is said, from 12 to 14 ft. thick. The working of them, which has already been commenced, promises to be easy. Pop. 1000. —(L. d'Almeida)

LAGUNA [add.] a lake and prov Philippines Isles, in the S W of the island of Luzon —*Laguna de Bay*, so called from a town of same name at its S extremity, is the largest collection of fresh water in the Philippines. Its greatest length is 36 m but its breadth, owing to the interruption of two peninsulas, is very irregular. Its height above the sea is 56 ft., its depth, in some places shallow, in others so deep that no bottom can be found, may average from 15 to 18 fathoms. It has no fewer than fifteen feeders but only one outlet, the Paang by which it sends its waters to the Bay of Manila. Of the islands which it embraces, the largest is Talim, which is about 9 m long by 3 m. broad. Another near its S end contains a lake which has all the appearance of an ancient crater and towers with summits. On the fertile shores of the Laguna twenty-five towns are counted.

The **TAUAGUIN** (Province de Laguna) is bounded N. by provs. Tondo and Bulua, W. Cavite, S. Tayabas and Batangas, and E the ocean, area, including the above lake, 760, or excluding it, 559 geo sq m. Its principal products are

rice, sugar-cane, indigo, and sika-pala, the produce of the last being used to distil a spirit, which, from the quantity consumed, yields a considerable revenue. The capital is Pag-saen situated on the E. shore of the lake. Pop. 127,863, or to the rate of 217 to the sq. m.

LAHAULA, a vil. Western Africa, most picturesque situated in a natural amphitheatre formed by steep recess in the Wadala Mountains, 140 m. E. by W. Kala. It is approached on the E. side by a narrow passage along the cliffs, leading to a strong stockade which guards the entrance to the amphitheatre. Its great strength makes it a secure asylum and hence it is of considerable extent, containing about 500 huts, and having an estimated pop. of 3000.

LAKE OF THE WOODS on the E. frontier of British America, partly within the U. States territory, 270 m. W. of Lake Superior, and 377 E. above its level; is broken up by a long promontory into three distinct portions, of which only the N. is designated the Lake of the Woods, while the E. bears the name of White Fish Lake and the S. that of the Lake of the Dead Hills. Taken as one whole, the lake has an estimated length and breadth of 75 m. each and a circuit measured by canal route, of 400 m. At five miles from land its depth was ascertained by soundings to be 5 fathoms. The shore on the E. is occupied by a number of sand-hills which give that part of the lake a peculiar character. The bottom is rocky, and even precipitous. Its surface is covered by numerous islands, many of which are well-wooded, and, particularly toward the N. W. furnish scenery of the most lovely description presenting in constantly recurring succession every variety of bare precipitous rock abrupt timbered hills gentle wooded slopes, and open grassy areas. One remarkable feature of the lake is the colour of its water. About four miles from land it becomes tinged with green which farther out becomes in intensity till the whole lake looks like a vast expanse of dirty green mud. This colour is owing to an immense quantity of minute tubular, needle-shaped conifers sometimes detached, and sometimes clustered together in the form of small spherical stars varying from a quarter to half an inch in diameter. Rainy River the principal feeder of the lake, enters it at its E. extremity its discharge is at the N. by the Winnipeg. It abounds with sturgeon, which in calm weather may be seen lying on the bottom in deep water and at the approach of evening are often seen leaping out of the water in their gambols.

LAKE OF TWO MOUNTAINS, a vil. British America, Canada East, on Two Mountains 25 m. W. Montreal. It is occupied almost entirely by Indians whose chief employment is bustling with a view to the fur trade. They also make canoes, axe-handles, baskets, moccasins, mittens, purses, and various fancy articles. The E. Catholics have here a church = school of Christian brothers with a model farm attached, and a female school taught by nuns. Pop. about 1250.

LA LAJA a picturesque lake, Chili, prov. Concepcion, lat. 37° S. It lies on the frontier of the Argentine E. public at the height of 4900 ft. above sea-level, near the E. river of Arica, surrounded by its highest black conical and fed by the snowy peaks of Cerro Bellido. It is of a crescent shape, with steep nearly five miles apart, and discharged its surplus water over a cliff into a stream of same name, till a recent eruption of lava spread across the cliff and completely blocked up the outlet. It is now accumulating its waters, and threatening, when it shall burst its barriers, to send devastation over the surrounding country.

LALQAL a river India, which rising on the N. frontier of the native state of Jeypor in Orissa, flows successively S. and E. E., and after a course of 125 m. falls into the Bay of Bengal at lat. 19° 12' N. lon. 94° E.

LAMBANGA or **LAMBANG**, a prov. Philippines lies, forms the S.W. extremity of the island of Mindanao, and also includes the island of Basilan, one of the largest in the Sooloo Archipelago. Its area seems never to have been properly ascertained, the greater part of the territory being still inhabited by wild tribes. The soil is described as naturally fertile and well watered, and the climate, though hot is said to be healthy regular land and sea breezes tempering the air. One other advantage it has. It is beyond the region of typhoons, and is, strictly speaking, the only part of the Spanish Philippines that is wholly so. One main object

in forming this province, and fortifying its capital, was to keep the pirates of Mindanao and Sooloo in check, and thus afford some protection to the northern islands, which were constantly suffering from their ravages. The inhabitants, subject to Spanish rule, amount to no more than 5581. (For an account of the capital, which bears the same name see *Gazetteer*, article **BANAGUANA**.)

LAMIA or **LAVRION**, an Greece, pop. somewhat 12000 and Phokis, on the Almazan, W. of the Gulf of Salamis, 90 m. N.W. Athens. It is the seat of an archbishop, and of a court of primary jurisdiction, and has a gymnasium, a Hall of Justice and a parish school and a pop. of 4000, who cultivate rice, oil, and tobacco, and carry on a considerable trade.

LAM YIT, or **SOON** SW on the coast of China, Formosa Channel lat. 25° 14' N. lon. 119° 55' E. the largest of the group called the Yiu. It is about 15 m. in circuit, fringed a muddy creek dividing it nearly into two, and is bounded by a sandy beach and rocks running into the sea. Ranges of hills occur on both sides, chiefly formed, as on the opposite coast of China, of disintegrated granite. Natural vegetation is extremely scanty and not a tree occurs on the island except stunted peach or wild pear. The natives carry on some agriculture and raise good crops of rice and groundnuts, but they seem to depend for sustenance chiefly on the sea, and though occasionally fishermen are in reality pirates. — (*Swinhoe's Korea*, *Choo Ching-yeung*.)

LANCASTER (add.) two places, U. States.—1 A town in Pennsylvania, esp. co. of same name, on the Pennsylvania Central railway 56 m. W. Philadelphia. It consists of streets which cross at right angles, and are generally well paved, and of houses substantially built of brick, and, when recent, often both commodious and elegant. The most imposing public buildings are the court house, which is endowed by a dome, and the county prison a large castellated edifice of old red sandstone, with a lofty tower. The other principal buildings are twenty churches, a college, and numerous schools. Next to cotton yarn and cotton cloth for which there are three large factories, the chief manufactures is rifles, for which Lancaster has long been celebrated. Its extensive locomotive works have been suspended but several iron foundries and a blast furnace are still in operation. Pop. (1860) 17,805.—2 A in Ohio, esp. co. Fairfield, on the Mooking River and Hooking canal communicating with the Ohio, and on the Cincinnati, Wilmington and Zanesville railway, 86 m. S. E. Columbus. It is well built in wide and handsome streets, contains nice churches, and has a pop. of 4303, actively engaged in manufactures and trade.

LANCZYN, a in Austrian empire Galicia circle and about 34 m. S. E. Rzesin in a beautiful district on the Pruth, with salt refineries, a considerable trade in salt, and 2563 in habitants.

LANDOUR, a sanitary station, India, dist. Dehra Doon, at the height of 7500 ft. above the sea, 75 m. S. E. Simla. It is situated on a ridge of the Dehra Doon valley, 8 m. E. of the sanitary station of Mussoorie, with which it is connected by intermediate straggling buildings. It contains a number of private residences, a club-house, a post-office, a library, a hospital, a large hotel, officers' houses and barracks. The rugged ridges and slopes form wild and varied scenery rendered more striking by magnificent views of the Himalaya.

LANDSHUT, a in Austrian empire, Moravia, circle and about 30 m. S. E. Brunn on a sandy plain near the Hungarian frontier. Pop. 2372.

LANGENAU (UPPER, MIDDLE, and LOWER) three nearly contiguous places, Austrian empire Bohemia, circle Glatz, on the Little Elbe with a parish church, an hospital, a paper mill, a bleaching establishment, and an aggregate pop. of 5300.

LANGKAT, a native state, Indian Archipelago on the N. E. side of Sumatra. It is part of the great alluvial plain which extends along the whole of the N. E. shore of the island, and is watered by a river of same name, which, though 800 yards wide at its mouth, is navigable only by large boats, in consequence of a bar with only a fathom of water upon it. The chief produce of Langkat is black pepper, of which large quantities are annually exported. This state is the N. limit of the Malay nation in Sumatra. The Aborigines occupying them on the N. and the Babi on the W. and inland.

LANGKAWI, or **LANKAWA**, an Id. Indian Archipelago,

off the W coast of the peninsula of Malacca. It belongs together with a group of contiguous islands called the Ladas, to the territory of Quenda, and included with them lies between lat. 6° and 7° N; and lon 99° and 100° E. Its length E. to W. is about 25 m, and its breadth N. to S. about 10 m. Its surface, composed chiefly of granite and mountain limestone, is at once high and level. It is inhabited by Malays.

LANGLEY a fort or station British Columbia, on the S bank of the Fraser River 15 m. above New Westminster. The river becomes so shallow above this point that the steamers from Victoria have to transfer their cargoes to other vessels, more adapted to ascend the swift and shallow stream.

LANGKAT, a tn. British America, Canada East, co. Bonaventure, 8 m. S. Lawrence 28 m. N. N. E. Montreal with a E. Catholic church several schools, a machine shop, institute, and a trade in flour and lumber. Pop. about 7400.

LANGING a tn U. States, cap. state Michigan on Grand River, and on the Amboy Lansing, and Traverse Bay rail way, 77 m. W. N. W. Detroit. It contains ten churches, a large and handsome state-house on a height above the river a house of correction for juvenile offenders, a female college, and an agricultural college, to which a farm of 700 acres is attached. It has also extensive factories, tanneries, breweries and flour planting and saw mills. Pop. (1890) 3074.

LA PAZ a tn. U. States, cap. Lower California, near the S. E. extremity of the peninsula and on a bay in the Gulf of California, lat. 24° 8' N lon. 110° 10' W. It stands near the mouth of the fertile valley of Todos Santos, which with its tropical vegetation forms a rich and beautiful landscape, and consists of regular streets which cross each other at right angles and tastefully built houses, the whole forming an exact square, with a plaza in its centre, lined with trees and adorned with a fountain. The principal buildings are the cathedral, bishop's palace and seminary, the town house, government buildings, and elementary schools. The harbor, being by far the best in the gulf, the trade is considerable, and wants nothing to secure its larger development except a government guided by enlightened and liberal principles. At present, owing to the frequent changes in the duties exacted, and to official extortion vessels arriving in the harbor with cargoes sometimes quit it without unloading to seek better treatment in other ports. Pop. 10,000.

LA POINTE a tn U. States Wisconsin near the S. extremity of Madeline the largest in the group of the Apostle Islands, situated in the W. of Lake Superior off the Wisconsin coast. It is greatly situated among the woods, with which the whole group is clothed and was long a central station for the fur trade of the North West Company. They were not, however, the first occupiers, for in 1660 a Jesuit missionary landed upon it and had considerable success among its Chippeway inhabitants. In recent times La Pointe has lost its former importance. Its fishery, however, is productive and valuable.

LA PORTE, a tn U. States, Indiana, cap. co. of same name, at the junction of the Cincinnati, Peck and Chicago with the S. Michigan and V. Indiana railway 12 m. from Lake Michigan. It contains eleven churches, a tannery, an iron foundry a manufactory of agricultural implements, and a planing, a flour and a saw mill and carries on an active trade. Pop. (1890) 5628.

LA PRAIRIE, a tn. British America, Canada East cap. co. of same name, 8 m. S. Lawrence, between the Lac Seul Rapids and the Victoria bridge 9 m. from Montreal. It possesses a Protestant and a E. Catholic church, a nursery, several schools, and some trade in grain and lumber. Pop. about 1800.

LA SALLE, a tn. U. States, Illinois at the head of navigation of Illinois River on the Illinois and Michigan canal, and at the junction of the Illinois Central and Rock Island railways, 58 m. W. S. W. Chicago. It occupies an elevated and healthy site and contains five churches, several academies, zinc-works, and soap and candle works, a foundry and machine shop, breweries, lime kilns, brickyards, and planing and flour mills. Immediately adjoining La Salle on the W., and separated only by an imaginary line, is the town of Peoria. Coal mines employing about 1000 men are in operation in the vicinity. The Illinois which is here 300 yards wide, is crossed by a railway bridge of 80 arches. Pop. (1890) 3993.

LASKI a tn. Austrian empire Galicia, circa and about 17 m. N. N. E. Przemysl; with a convent of the Sisters of Mercy and 2030 inhabitants.

LASSOMPTION a tn. British America, Canada East, cap. co. and on a peninsula formed by the river of same name 23 m. N. N. E. Montreal. It is the seat of a circuit court, and has a E. Catholic church and college, a seminary, a tannery, and some general trade. Pop. about 1200.

LATOMÉ, a tn. E. Africa, one of the principal places of the Lado country, at the S. W. foot of Mount Latet, lat. 4° 30' N lon. 35° 45' E. It is strongly palisaded.

LA FOLLE a country E. Africa, lying between the rivers Kanem and Chob, and in lat. 4° 30' N; lon. 31° 40' E. Its exact limits are undefined but it occupies a valley enclosed by the Lafof range on the N. and another lofty range, rising 6000 or 7000 ft. on the S. the extreme E. and being blocked by a noble isolated mountain of about 8000 ft. The course of the valley is from N. W. to S. E. about 40 m. long and 18 m. wide the flat bottom diversified by woods, thick jungles, open plains and the heath tree, which in some places gives the appearance of forest. The river Kanem which rises at its E. extremity skirts its S. side and a parallel tributary, having its source in the same region, runs along the N. side. The inhabitants, the Latomes, are an unusually fine race of swarthy tall, muscular and well proportioned, unlike the other tribes of the White Nile, they have high foreheads, large eyes, well-shaped mouths with rather full lips, high cheek-bones, and altogether a very pleasing count of countenance. They are so rich in cattle the wealth of the country, that 10,000 or 12,000 head are housed in every large town. Their houses are generally half-circular, while some are like extinguishers 25 ft. high the thatch rests upon a circular wall about 4 ft. high with overlapping eaves, the doorways are about 3 ft. 4 in. high, and there are no windows. The interior though necessarily dark, is remarkably clean. The Latomes are a warlike race, and their weapons consist of a lance, an iron-headed mace, a long-bladed knife or sword and an iron bracelet armed with knife-blades about 4 in. long, and shields made of hide. The women are of unusual stature and great strength without the prepossessing features of the men. The men are entirely nude, the women nearly so. The peculiarity of the head dress of the men is remarkable. Sir S. W. Baker thus describes it. The costume of a man requires a period of from eight to ten years. The Latomes wear most exquisite helmets formed of their own hair. The thick crisp wool is woven with fine twine formed from the bark of a tree until it presents a thick network of felt. As the hair grows through this matted substance it is subjected to the same process until in the course of years a compact substance is formed like a strong felt, about an inch and a half thick framed into the form of a helmet. A strong run, about two inches deep, is formed by sewing it together with thread and the front part of the helmet is protected by a piece of polished copper while a piece of the same metal shaped like the half of a bishop's mitre, and about a foot in length, forms the crest. The framework of the helmet being at length completed, it must be perfected by an arrangement of beads, should the owner of the head be sufficiently rich to indulge in the coveted distinction. The beads most in fashion are the red and the blue porcelain, about the size of small peas. These are sewn on the surface of the felt, and so beautifully arranged in sections of blue and red, that the entire helmet appears to be formed of beads and the head some crest of polished copper surmounted by ostrich plumes, gives a most dignified and martial appearance to the elaborate head-dress. No helmet is supposed to be complete without a row of cowrie shells stretched around the rim so as to form a solid edge. Tarrangolite is the chief town.

LAULUM or **FALETTRETTA** a tn. India, presid. Madras, dist. Travancore, on the bank of a fine navigable stream 35 m. S. E. Cochin. It is a tolerably large place, with some houses and is inhabited almost entirely by Christians, many of whom are merchants in the spice-trade and, exporting considerable quantities, and obtaining in return coarse corn, and cloth of various textures, from grain &c. In the vicinity there is a small pulsed fort, with a citadel and other wooden buildings.

LAURENTIDES (Tuk), N. America, a name given by recent geographers to a mountainous district of remarkable

geological formation, bordering on the W side of Lake Superior, Canada, and Hudson's Bay and receiving its popular appellation from the river St. Lawrence, on whose banks it commences. The Laurentian range is about 900 m. in breadth. It forms the N shore of the St. Lawrence, from the gulf as far as Cape Tourmente, near Quebec, from which point it leaves the river, and while following its general direction northward and farther west, will soon intersect it 30 m. from its bank. Proceeding westward, the range follows the line of the Ottawa, and crosses this river near the Lac des Chats, 150 m. from Montreal. Thence, taking a southward direction, it reaches the St. Lawrence near the outlet of Lake Ontario, and from this point strikes across to Lake Huron, which it touches at Matchedash Bay and forms the eastern shore of the lake as far as 47° N. lat. where quitting this lake, it joins Lake Superior and extends in a N.W. direction to the Arctic Sea. The average height of the hills is from 2000 to 3000 ft., and the rocks of this formation are the most ancient known on the American continent. Two-thirds of its area are covered with ponds, lakes, and marshes, which the cold of winter solidifies into a network of ice. The Laurentian cannot therefore be made available for agricultural purposes or for settlement. They abound, however, in the heavier minerals, and the northern shores of the great lakes are now the scene of very considerable mining operations.

LAUTERACH is an Austrian empire, Vorarlberg, vierte and not far from Bregenz with a paper mill a bathing establishment, and 1100 inhabitants.

LAWRENCE, two places, U. States.—1. A in Mass. situated, on both sides of the Merrimack, here crossed by two bridges, and at the junction of the Concord, Manchester and Lawrence with the Boston and Maine, the Lowell and Lawrence, and the Essex railways, 23 m. N. Boston. The principal public buildings and institutions are the city hall 14 churches a high-school and other schools—grammar primary middle, and mixed a savings-bank a provident a library and a young men's Christian association. The cotton manufactory is the staple industry and is carried on in several large mills for which water power has been obtained by means of a dam across the Merrimack, constructed at the expense of \$250,000. The other industrial establishments are a machine shop and foundry and paper flour, and saw mills. Pop. (1880) 17,639.—2. A in Kansas, esp. co. Douglas, 7 bank Kansas 23 m. of direct distance above its mouth. It stands on a slope, and consists of about 400 houses, of which only a portion are of brick or stone. The principal buildings are four churches, the state university an academy, and several schools. The industrial establishments are saw and grist mills, a woolen shop, a tannery a brewery and distillery, and coach and wagon and rope and candle factories. Lawrence was founded in 1854 by the Massachusetts Aid Society, and settled by the opponents of slavery. During several ensuing years it was the scene of violent contests between this party and the Border Ruffians. Pop. (1880) 1645.

LAWRENCEBURG is a U. States, Indiana, esp. co. Dearborn, on the Ohio, 23 m. below Cincinnati, the White-water canal, and the Ohio and Mississippi, and the Indianapolis and Cincinnati railways. It has 6 churches, 10 schools, 12 grist mills, 3 distilleries, and 2 breweries. Pop. (1880), 5000.

LAWRENCE, CANALS (See) a series of canals in Canada, between the cities of Kingston and Montreal, constructed in steps perpendicular to the banks of the river St. Lawrence, for the purpose of facilitating the navigation between Montreal and Lake Ontario, which is impeded by numerous rapids in the river, available for vessels of from four to five hundred tons burden. The length of the canals, including lockages, is as follows: viz. at St. Charles Rapids, 2 m., with 1 lock and a descent of 5 ft.; at Point Jacques, 3 m., with 1 lock and a descent of 5 ft.; at Rapids Des, 4 m., with 1 lock and a descent of 1 1/2 ft.; at River's Point, 2 m., with 1 lock and a descent of 4 ft.; the Canal de Lachine, at the Long Point Rapids, 1 1/2 m., with 7 locks, and a descent of 46 ft.; the Beauharnois canal, 1 1/2 m., with 9 locks, and a descent of 87 ft.; the Lachine canal, 2 1/2 m., with 5 locks, and a descent of 44 ft. Total length of canals 41 m., with 17 locks, and a descent of 304 ft. Each lock is 300 ft. long by 45 ft. wide, with a depth of water on the upper side

of 9 feet. Fully 8000 vessels, of 700,000 tons, run through this long chain of canals in the course of the year.

LAZARUS or **VINIZURE**, a port, China, on the E. coast of Corea, situated in the N. part of Yungking Day, and sheltered on the E. by Nakhoof or Boesook Peninsula. It is 2 miles wide at its entrance, and trends N. with a breadth varying from 1 1/2 m. to 3 1/2 m. Its depth of water is from 7 to 10 fathoms over a mud bottom. The river Daugun, which falls into the N.W. part of the port, divides near its mouth into several channels. The bar has 16 ft. at low water and the depth within increases gradually for 6 m. to 5 fathoms. The land around the port is populous and well cultivated particularly at the river's mouth.

LEAVENWORTH, a town U. States, Kansas, esp. co. Leavenworth, beautifully situated on a bank Missouri, 2 m. below Fort Leavenworth lat. 39° 10' N., lon. 95° W. It is the largest city and the commercial emporium of the state, and is surrounded by one of the richest agricultural regions of the valley of the Missouri. The river flows here with a swift deep current, and is bordered on the Kansas side by a natural levee of rock extending along the entire river front of the city. The city is laid out in regular streets, which cross at right angles, and contains 17 churches and several schools, soap and candle, mash and blind cord and wagon factories, and numerous saw mills and lumber yards. A firm engaged as government contractors in the carrier line, have here an immense establishment, which employs 6000 teamsters and 45,000 oxen. Leavenworth was founded in 1854. Pop. (1880) 1429 (1850), 18,000.

LEBANON (add) two places, U. States.—1. A in Penn.sylvania, esp. co. of same name, on Quittapah Creek the Union canal, and the Lebanon Valley railway 24 m. N.E. Harrisburg. It is regularly and substantially built, the houses consisting mostly of brick or stone, and possesses several schools, a library, and manufactures chiefly of iron, malt liquors, leather and earthenware. The surrounding district is rich in iron ore, which is smelted by several large furnaces in the vicinity of Lebanon. Pop. (1880) 4448.—2. A in Missouri, esp. co. Marion, on Harlan's Creek, and at the terminus of the Lebanon branch of the Louisville and Nash ville railway, 56 m. S.W. Frankfort. It possesses 6 churches, a R. Catholic college with 115 students, an academy and a female seminary. Pop. (1880) 953.—3. A in Tennessee, esp. co. Wilson, on a branch of Cumberland River, 33 m. E. Nashville with several churches, a Presbyterian university, with 11 professors 163 students and a library of 4000 vols., and several other educational institutions. The manufactures are chiefly cotton and woollen goods. Pop. about 2000.—4. A in Ohio cap. co. Warren, on Turin Creek, a branch of the Little Miami, and on the Little Miami railway and Warren County canal, 87 m. N.N.R. Cincinnati. It possesses 7 churches, a normal school, a public library and four saw mills. Pop. (1880), 2489.—5. A in Illinois, on the Ohio and Mississippi railway 20 m. E. St. Louis. It is pleasantly situated, and is the seat of a Methodist college, with 6 professors, 83 students and a library of 5880 vols. Pop. (1880), 1861.

LECOMPTON is a U. States, Kansas, on the Kansas River about midway between Topeka and Lawrence, and 30 m. above its mouth. Congress, before the civil war appropriated 210,000 for the erection of government buildings in it, with the purpose of making it the state capital. Pop. (1880) 917.

LEDENICZE, an Austrian empire, Military Frontier, Croatia, dist. Ogulin, about 45 m. S.W. Karlovac, on the Strait of Morlana, in the Adriatic, with a small haven and the ruins of a castle on a steep height. Pop. 1820.

LEIDZATSE, a town Austrian empire, Galizia, circle and 23 m. N.E. Kosow, esp. dist. of same name, with a Roman Catholic abbey, white church, square, and the altar-piece and fresco is supposed to be the work of Titian. The inhabitants are chiefly employed in dyeing wool, weaving woollen and linen cloth and trading in fruit. Pop. 4200.

LEEDS, a town British America, Ontario West, co. Niagara, on the Grand Trunk railway, 40 m. E. Quebec with a Church of England, a Free, a Baptist, and a R. Catholic church, several schools, and a considerable trade in flour and lumber. Two coal mines are situated in the dist., and a copper mine has recently been opened with prospects of success.

the Greenville railway; lat. 36° 2' N.; lon. 84° 28' W. It stands in a flat of surprising beauty, laid out with great regularity in well-defined streets, one of which is upwards of a mile long, and possesses 12 churches, a university which in 1850 had 6 professors and only 25 students, a court-house, a city hospital, a state lunatic asylum, an orphan asylum, and 2 libraries, one a city library of 6000 vols., and the other belonging to the university, of 15,000 vols. The whole place is well paved and lighted with gas, and at the west end of its main street there is a beautiful cemetery. About 100 stores and shops supply the demands of a very extensive retail and general trade, and 80 establishments are employed in manufactures, among which that of hemp holds the first place. Lexington suffered in the unhappy war between the Northern and Southern States. Pop. (1850), 9531.—4. A tn. Missouri, cap. of Lafayette, finely situated 1 bank Missouri, 23 m. N.W. Jefferson City. It has 7 churches and a number of flour-mills. Pop. (1880) 4122.

LEYDEN, an isl. in Paké Strait, off the N.W. coast of Ceylon, 5 m. S.W. of Jaffna. It is of an irregular but somewhat triangular shape, about 10 m. in length from N.W. to S.E. and with a maximum breadth of about 5 m. and has, next to it, extremely a small port, which bears the name of Kayia or Oya, a corruption of the Portuguese word *caia* or *caia*, meaning a wharf; thus being the utmost limit of navigation of a sea-going vessel with a cargo for Jaffna. It thus formed, and to some extent continues to form, the port of Jaffna, though this harbor is now possessed, at least in an equal degree, by Point Pedro.

LIBA, or LOMBA, a river S. Africa, which issuing from an unknown source about lat. 11° S., flows S.E. through a valley, which on the east of it bank seems to be confined by lofty and well-wooded mountains and on the S. bank to spread out into a wide marshy plain almost level. The name of Kayia or Oya, a corruption of the Portuguese word *caia* or *caia*, meaning a wharf; thus being the utmost limit of navigation of a sea-going vessel with a cargo for Jaffna. It thus formed, and to some extent continues to form, the port of Jaffna, though this harbor is now possessed, at least in an equal degree, by Point Pedro.

LIRANFALVA, a tn. Austrian empire, Transylvania, circle and about 38 m. S.E. Bistritz, with a Latin & Greek Catholic, and a Greek non-united church. Pop. 1450.

LIRCHOWITZ, a tn. Austrian empire, Bohemia circle and 8 m. S.W. Leitmeritz, on the Elbe, with a parish church, a synagogue, a fine castle, a town-house, an hospital, a brewery and mineral springs, a small port, which bears the name of Kayia or Oya, a corruption of the Portuguese word *caia* or *caia*, meaning a wharf; thus being the utmost limit of navigation of a sea-going vessel with a cargo for Jaffna. It thus formed, and to some extent continues to form, the port of Jaffna, though this harbor is now possessed, at least in an equal degree, by Point Pedro.

LIRBOLLO territory S.W. Africa, Kibundu country between lat. 9° 15' and 10° 20' S., and lon. 14° 35' and 15° 20' E., bounded N. by the Coanza, which separates it from the Portuguese settlements; W. Kibundu, S. Ambuim, and E. Makoto and Kibala, area about 2000 sq. m. It is covered by steep and rugged mountains, with several intervening valleys, which are well watered by affluents of the Coanza and the Longa. The climate is healthy, and the inhabitants, owing to their proximity to the Portuguese settlements, have made considerable progress in civilization. They are generally disposed hospitable to strangers, and industrious. One of their chief employments is in weaving cotton goods called *ampas* and *ambas*, which are well known, and in considerable demand in the interior. Pop. about 40,000.

LIRBONTA, a tn. S. Africa, Makololo country; bank Lianhye or Zambesi lat. 15° 50' S. It is the last town which the Makololo possess on their V frontiers and, like all other places in the Barotsi Valley stands on an artificial mound, imperfectly protected against inundation. The town belongs, or belonged, to two of the chief wives of a former chief.

LIRBANKO a prov. Western Africa, nominally belonging to Gambia, is bounded by Tagga and Moss on the S. Ari binds on the W., and some independent tribes on the E., which interpose between it and the Niger. The surface has a rocky appearance, granite, which covers in large boulders, as well as in rocks alternating with granite and mica slate. The vegetation is varied, and the forest loses much of the monotonous character which the prevalence of any one species of tree is apt to give. Further west, however, the trees become smaller and the soil more and more fertile. Lirbanko is celebrated for a fine breed of horses. The prevalence of internal discord—fierce chiefs contending with each other, and producing a kind of anarchy—is the greatest obstacle to its prosperity.

LIRBUSA, a tn. Austrian empire, Galicia, circle and 12 m. S.W. Jaske, 1 bank Ropa. It is an ancient place, of which mention is made as early as 1407, and contains 1100 inhabitants, a large proportion of whom are skilled workmen.

LICHTENSTADT a tn. Austrian empire, Bohemia, circle and 27 m. N.E. Eger, on the Wistritz, with a parish church, a synagogue, an hospital, a brewery three mills, and 1000 inhabitants, half of them Jews.

LICHVIN a tn. Russia, gov. and 25 m. S. Kaluga, cap. circle of same name, 1 bank Oka. It has five churches, a circle and a parish school, a charitable institute, and several industrial establishments. Pop. 2699.

LICHWE (Urums and Lowas) two adjacent places Austrian empire, Bohemia, circle Chrasim on the Adlar with a parish church, a castle two mills, and 2000 inhabitants.

LIDA, a tn. Russia, gov. and 54 m. S. Vilna, cap. circle of same name, on the Lithua. It has three churches, a circle and a parish school and two charitable institutions, and contains 4094 inhabitants.

LIEBENSTEIN, a tn. Austrian empire, Bohemia circle and 7 m. W.W. Eger, in a valley enclosed by wooded mountains, with a parish church, an inn, and a castle situated on a rocky height, a brewery two mills, 700 inhabitants.

LIEBENSTADT, a tn. Austrian empire, Bohemia circle Glinchin, on both sides of the Woloschka, on the Fürstentum-Reichenberg railway, with a Catholic parish church, a reformed Protestant church, corn and saw mills, and 1000 inhabitants.

LIEVFLY a port Greenland on an island of same name, immediately off the S.W. coast of Disco Island and at the N.W. entrance of Disco Bay. It is a most perfect landlocked and safe anchorage, with depths varying from 6 to 24 fathoms. In the adjoining town of Lively a Danish governor resides and the vicinity is a shaly wood-land, which burns well, and retains its heat when mixed with other coal is found.

LIEVKA, a tn. Austrian empire, Hungary, co. Lip-tau about 28 m. N. by E. Nemesd in the vicinity are the ruins of a castle, built on Mount Choe by Matthew Corvinus. It has 1800 R. Catholic inhabitants.

LIEPFELD, a tn. Austrian empire Lower Austria circle Upper Wieselwald on the Traisen in a beautiful valley with saw and other mills, a quarry of gray and red marble, and some of lignite, marble, and slate to some extent. The old Cistercian abbey situated here, and founded by Leopold VII. in 1202, has a handsome church and chapel with the tomb of the founder a library, a cabinet of natural history and a botanical garden. Pop. 1700.

LILDOETT a river lake, and in British Columbia.—The arven runs S.E. through fine pasture land occupied to some extent by settlers, into the upper end of the lake of its name which is surrounded by high mountains, generally very steep to the water's edge.—The lake is one of the chain of lakes along which lies the route from the lower to the upper Fraser and the gold-fields.—The river stands at the N. end of this route, at its junction with the Fraser, on a plateau upon the S. bank of the river. It has grown into some importance owing to its position on the great route to the interior gold-fields.

LILMAN a vil. Persia, prov. Azerbajan, about 30 m. S.E. Tabreez, and at some distance to the E. of Lake Urmiah. It is one of the highest inhabited places in the Saharat mountain chain, which rises 4000 ft. above the level of the lake, and 6400 ft. above that of the Black Sea. It has hot springs, to which the natives attribute miraculous virtues, and a large and apparently thriving population engaged in cultivating the gardens, meadows, and fertile fields of the environs.

LINARES a tn. Chili, prov. Maule, on a plain between the rivers Maule and Longavi, 180 m. S.E. Valparaiso. It was laid out on a plan far more extensive than it has been found possible to execute; and hence, though the population does not exceed 2500 it has, besides numerous other squares, a vast plain, an alameda planted with four rows of trees for nearly a third of a mile, and 12 spacious but unoccupied streets. The chief buildings are a handsome church and a large market-house.

LINDER, a tn. Western Africa, cap. prov. of same name, which comprises the N.W. extremity of Bornoe,

125 m N.N.W. Kono. It stands in a dirt wash broken by rocks of basalt and intersected by numerous small water-courses, and is isolated by a ditch and a low earthen rampart nearly of a circular form. Its commercial importance, for which it is mainly indebted to its position, is so great, that it has been called 'the gate of Boudan.' Still with all the bustle of its streets and the traffic which centres in it, it has no manufactures of the least importance, its only industrial establishments being indigo dye-works. Estimated pop. 1700.

LINDSAY a tn. British America, Canada West, co. Peterborough 57 m N.E. Toronto. It possesses five churches—five Wesleyan a Church of England, a United Presbyterian, and a B. Catholic, and communicating with Port Hope, on Lake Ontario, by the Port Hope and Lindsay railway. It carries on some trade in lumber. Pop. about 1100.

LINGAH, Lingaw, or Lanza a tn. and port, near the mouth of a small stream, N.E. side of Persian Gulf upon a strip of territory belonging to prov. Oman of Arabia lat. 25° 47' N., lon. 54° 59' E. The town lies along the water's edge, with a narrow intervening beach of white dry sand. The old town is small and compact, having room for 4000 or 5000 inhabitants, nearly half of it consists of market-places, coffee-houses, and similar establishments, besides a large mosque by the sea-side. The houses in it are solidly built—partly of stone and partly of brick—and whitewashed. Carved wood work about the doors, windows, and balconies bespeaks some degree of Persian taste. Low walls mesh domes, surround this quarter of Lingah. The new part remains E and W along the bay or reaching inland, occupy a considerable extent. Near the middle of the quay is a small dock, partly dry, but capable of containing sixty to eighty Arab vessels, and protected in front by a high sea wall with a breakwater on either side. The harbour is sheltered to the W by Cape Roostah, E. by a corresponding promontory and the island of Khidm on the N stretch the isolated and mountainous of Parau, and only the S side is at all exposed. Opposite the dock rises a rock, the only one hereabouts, crowned by an old castle tower. Eastward is the palace of the Oman governor, forming a large square, and four stories high. Further on are subdividing yards in active operation. On either side and behind the town are gardens; but the soil is poor and water scarce. So scarce is water that the main supply is from huge cisterns of stone, 30 to 60 ft in diameter and dome-roofed, which collect the overflow of the winter torrents and store it to last the remainder of the year. Lingah is a very busy place by sea and land, and frequented by many races in commercial pursuits. The bulk of the trade is with the maritime Arab ports, to which goods from Bombay and Kurrachee are conveyed in small coasting craft, spiced pearls, and a little salt fish forming the return cargoes. And it is a pretty place, with its white houses along the shore, overhanging by palm-trees, and the large glittering cupolas of its reservoirs and crowded markets, and clear air, and bright sun. Pop. 8000 to 10,000.—(Purgrave, &c.)

LINGEHI a sand river S. Africa near r. bank Zambesi lat. 17° 34' S. lon. 31° E. When Dr. Livingstone reached it, it was in flood 60 or 70 yards wide, and went deep, but the kind of stream to which the name has been given is no singular that the Doctor must be allowed to explain it in his own words. Like all those sand rivers, it is for the most part dry but by digging down a few feet water is to be found which is percolating along the bed on a stratum of clay. This is the phenomenon which is signified by the name of a river flowing underground. In trying to find this, I felt the warmth of particles of coarse sand striking my legs, and the slight disturbance of our foot-steps caused deep holes to be made in the bed. The water which is almost always very rapid dug out the sand beneath our feet in a second or two, and we were all sinking by that means so deep that we were glad to relinquish the attempt to find it before we were half way over. The oxen were hurried away down into the Zambesi. These sand rivers remove vast masses of disintegrated rock before it is too enough to form soil. The man who preceded us was only thigh deep, but the disturbance caused by his feet made it breast-deep for us. The shower of particles and gravel which struck against my legs gave me the idea that the

amount of matter removed by every flood must be very great. In most rivers where much wearing is going on, a person diving to the bottom may hear literally thousands of stones knocking against each other. This motion being carried on for hundreds of miles in different rivers, must have an effect greater than if all the parties and mortars and mills of the world were grinding and wearing away the rocks. The pounding to which I refer may be heard most distinctly in the Vael River when it is slightly in flood. It was there I first heard it.

LINGHOTV, a group of islands, N Pacific to the S. W. of the lake of Japan extending between lat. 26° 45' and 30° 43' N. and lon. 129° and 130° 17' E. They are numerous and elevated but for the most part of small dimensions. Three of them—Suwa-ama, Terab-ama, and Iujaga-sima—have active volcanoes, which respectively attain the heights of 2305, 2057 and 2345 ft.

LINYANFI a tn. S. Africa, cap. of the Makololo; lat. 18° 17' 20" S. lon. 28° 30' 5" E. It stands on the Chobe, at a height of 3500 ft. above sea-level, and carries on a considerable trade in ivory. The forests around both the town and the district are infested by the poisonous tsetse. Pop. 6000 to 7000.

LIPKA, a tn. Austrian empire, Bohemia, circle and 44 m. E by S. Kladsko, on the frontiers of Moravia. It is a long straggling place, with two chapels, two mills, limekilns, limestone quarries and 1800 inhabitants.

LIPPTHAL a tn. Austrian empire, Moravia, circle Southbohemia 32 m. S.E. Olomitz, with a castle reformed, and a B. Catholic parish church and 1200 inhabitants, who are mostly Protestants.

LIRA a tribe and dist. of the Mali country E. Africa, lying E. of the N. and Albert Nyamias lat. 2° 30' N. lon. 23° E. The district is described as extremely fertile and rich in ivory. The inhabitants are of the same type as the Mali, but wear their hair woven into a thick felt, and covering the shoulders like a full bottom wig. The Lira tribe are governed by a chief with little real authority.

LISBURN a cape a headland on the coast of Russian America, Arctic Ocean lat. 68° 55' N. lon. 160° 5' W. 160 geo. m. N. by E. Cape Francis of Wales, the most western point of North America. It is of limestones formation and from 800 to 900 ft in height, of a conical shape, and presents its bold aspect and greatest elevation at its southern extremity. To the eastward of the cape extends a range of hills surmounted by a mass of loose gray scoria and separated from each other by ravines the sides of which are clothed with a certain amount of verdure. It was visited in 1850 by E. M. S. Pease, on the expedition in search of Sir John Franklin.—(Armstrong's Narrative of Discovery of F. W. Pease.)

LISBAGORA, a tn. Austrian empire, Gallaia, circle and 8 m. N.E. Tarso. It is a straggling place with 1900 inhabitants, a large proportion of whom are employed in making wooden and earthen ware.

LISLET a tn. British America, Canada East, cap. of some towns r. bank St. Lawrence, 40 m. N.E. Quebec, with a B. Catholic chapel, small-dock, court, town-square, and several large general stores. Pop. about 3700.

LISBA [old], a tn. Austrian empire, Dalmatia, circle Spalatro on the N.E. side of the island of same name to the Adriatic, at the foot of a mountain ridge which incloses an extensive bay and forms one of the best and most spacious harbours in Dalmatia. It has a Minorite monastery, and an important cordage factory and contains 1300 inhabitants.

LITCHFIELD, a vil. U. States, Connecticut, cap. co. of same name, on the Housatonic, 28 m. N.W. New Haven. It is pleasantly situated on a height with a beautiful view, and contains four churches, two academies, a court-house and jail, and a private lunatic asylum. It has lately become a favourite summer resort. Pop. 5200.

LETIN, a tn. Russia, gov. Podolia, on the Bzura of Zara, an affluent of the S. Bug. It has five churches, a circle school and contains 5882 inhabitants.

LITSCHAU a tn. Austrian empire, Lower Austria, circle Upper Mähren, on a dist. of same name, near the Bohemian frontier, 76 m. N.W. Vienna. It has an old walled fort, a castle with an extensive park, and numerous farms employed in weaving flax and cotton goods. Pop. 1480.

LITTAU, a town in Austria, Moravia, about 100 m. N. W. Olmitz, on the river March, and on the Olmitz and Prague railway; is the seat of several public offices, and has three churches, a town-house surrounded by a tower, an hospital for the poor, extensive manufactures of woollen cloth, a paper mill, and flax, yarn, cattle, and other markets. In the vicinity is the burning site of Prince Liechtenstein, one of the finest in the empire. Pop. 2,115.

LITTLE SOURIS, or **MOINEAUX**, N. America, an affluent of the Assiniboine, runs within the British territory, in a prolongation of the plateau of the Coteau de Missouri, about lat. 49° 30' N., lon. 104° 30' W., flows first S.E., and crossing the British frontier about lon. 103° proceeds S. as far as lat. 46° where it makes a large circular bend, and changes its direction to N. W. On again entering the British territory, about lon. 101° it flows easterly N. E. and joins the Assiniboine on its E. bank about lat. 45° 45' N., lon. 99° 30' W. As its mouth it is 121 ft. broad, has a mean depth of 3 ft. 4 in., and flows at the rate of half a mile an hour. It contains sturgeon and various other kinds of fish. The country to the W. of the Souris is an open, treeless, and undulating prairie, but to the E. rise into picturesque hills, clothed on their sides and summits with aspen. One of the greatest obstacles to settlements on the banks of the Souris, and the adjoining districts, is a species of grasshopper which infests it. At the mouth of the Souris, says Mr. Hind the grasshoppers were in countless numbers, and so voracious as to attack and destroy every article of clothing left for a few minutes on the ground. Saddles, girths, leather bags, and clothing of every description were devoured without distinction. The only way to protect our property from the depredations was to pile it on the wagons and carts out of reach.

LITURABURA or **LEPELOLE**, a tn. S. Africa, cap. of the Bechuanaland, on the slope of a mountain range, 200 m. N. E. Karmanna. Its former name of Lepelole was given it from a cave in its vicinity which no one ventured to enter because it was believed to be the habitation of the devil, and it was said that every one who went in remained there for ever. When Dr. Livingston accompanied by the chief Sebele who with many of his people were converted to Christianity undertook what seemed to many of the natives, if not the mission, at least the most hazardous task of examining it, he found it to be only an open cave, with an entrance about 10 ft. square, which after contracting into two water-courses, entered the cave in round openings, through which the water once flowed. The only inhabitants it seems ever to have had were baboons. The mountains, which is the prevailing rock at Liturabura, seems to extend over a vast area. It is found in Angola, and forms the underlying rock all the way from Kaimbo to Laputa.

LIUBINYE, a tn. Turkey in Europe, Bosnia, 26 m. N. Ragusa. Like all the towns of the Herzegovina, it has a beautiful site, standing at the foot of a mountain, in the middle of a long and narrow valley but is one of the most wretched places imaginable, consisting of 180 Mahometan houses, many of them in a ruinous state, occupied by 287 inhabitants, and 12 Christian houses, of a better description, with 23 inhabitants. The Turks, forming at once the dominant class and the great majority make a tyrannical use of their power and keep the Christians in a kind of bondage.

LIUTZIN a town, Russia, gov. and 180 m. N. W. Vitepsk, on the Great and Little Looza with two churches, a charitable institute, and a pop. of 4063.

LIVERPOOL [add.] a port and municipal borough and aspect of England, co. of Lancashire on the bank of the Mersey, about 4 m. from its confluence with the Irish Sea; 185 m. N. W. from London. Ext. of the observatory on the Waterloo dock, westward, 58° 24' 47" N. lon. 0° 12m. 07.11. W. A new observatory is in process of erection at Bidston, on the E. bank of the Mersey; lat. 53° 34' 04" N.; lon. 0° 12m. 17s. W. Liverpool stands partly on flat ground along the margin of the river but chiefly on the slopes of a series of moderate eminences, whose summits are within the limits of the borough, and the highest of which is about 280 ft. above the level of the quay-wall of the river. Its greatest length from N. to S. is about 5 m. and its greatest breadth from W. to E. is about 2½ m. its area, exclusive of the docks, is 5,002 a. Its irregularity had out; in the lower parts of the town the streets are narrow and crowded, with courts, but in the more modern por-

tions the streets are wider and more regular. It is singularly deficient in open places and squares. Of the latter there are only two of any pretensions, Abercromby Square and Falkner Square. The town is well lighted with gas, and supplied with water partly from wells sunk in the new red sandstone, among the towns it built, but chiefly from the lofty district near Elvington, 24 m. distant. The water from the wells is raised by pumping, and that from Elvington is delivered by gravitation into reservoirs, situated nearly on the summits of the eminences before mentioned, and from these reservoirs a portion is raised into elevated cisterns, as to supply the highest houses in the town. At Elvington the collecting reservoirs form vast lakes of the aggregate length of 6 m., and from these the water, after being filtered, is conveyed to the distributing reservoirs in town by iron pipes 44 in. diameter. On the pipe line there are two relieving reservoirs, and from the second of these, situated about 9 m. from Liverpool, there is a double line of pipes. From the reservoir in the town the water is distributed under high pressure, and there being an abundance of hydrants on the mains through the streets, especially in the warehouse districts, fires are readily extinguished by hose and jet. The result is that serious destruction of property by fire once so common, is now much less frequent. The quantity of water distributed daily is 12,000,000 gallons, a quantity much too small for the present wants of the town and the corporation are (1867) seeking for some more extensive source of supply.

The most important public buildings are the town-hall, St. George's Hall exchange buildings, revenue buildings, and the free public library and museum. The town hall is an elegant structure. A handsome dome, surrounded by an open gallery, runs from the centre of the building. Within are a grand staircase, saloon, drawing-rooms, ball-rooms, banqueting rooms, and refectory, forming a superb suite of entertaining rooms, and also the council hall and various public offices connected with the municipal business and affairs of the corporation. The first hall was erected in the same site in 1573, rebuilt in 1749, destroyed by fire in 1795 and restored and finally brought to its present condition in 1803 and 1811. There is at present (1867) in course of erection an immense pile of buildings, to serve as public offices, in which will be concentrated the municipal offices, as well as those connected with the lighting, paving, sewerage, water supply, sanitation, gas and meter testing, smoke inspection, and the department of the medical officer of health. The revenue buildings, which comprise accommodation for the offices of inland revenue of the Mersey dock and harbour board, and of the post-office, cover an area of 8700 sq. yds. and have an extreme length of 467 ft. and a total height of 67 ft. lofty porticoes, each of eight Ionic columns, adorn the centre, and east and west fronts the centre is surmounted by a dome lighted with sixteen windows, and ornamented with the same number of pilasters. St. George's Hall, which contains a large hall for public meetings, concerts, &c. a smaller concert-room, capable of accommodating 1800 auditors, and the auditorium is a stupendous building in the Corinthian style externally and internally. The E. front is 430 ft. long, with a colonnade of sixteen columns 200 ft. long, but from the S. portico to the N. apse, which contains the small concert-room, the building is 500 ft. long. The free public library and museum is a handsome building of the Corinthian order, occupying an area of 4785 sq. yds. The right, or E. wing, is occupied by the library; the W. wing by the valuable museum of natural history presented to the corporation by the Earl of Derby. A central hall between the two, devoted to stationary and works of art, is 98 ft. long by 58 ft. wide, and 66 feet high; the public reading-room is 109 ft. long, 56 ft. wide, and 48 ft. high; the library has an upper and lower room, each 78 ft. long and 37 ft. wide, with galleries round. There are also a commodious students' room, a room for Biblical illustrations, a room for patents and parchment papers, a board room, several class-rooms, and a lecture-room capable of containing an audience of about 400. This building was opened on the 15th October, 1860, and the corporation are now about to extend it by adding a picture gallery. In connection with this central library there are two leading libraries, one at the N. and the other at the S. end of the town. The expense of maintaining the library, museum, and reading libraries is defrayed by a rate on the inhabitants. The ex-

change buildings form three sides of a square, of which the town-hall forms the fourth side. These buildings are now (1887) in course of reconstruction. The other structures, adjuncts of the churches, deserving notice, are the borough jail at Walton the work-houses and offices, the industrial schools, the infirmary, the sailors home, the gymnasium, the Royal bank buildings the Commercial bank, the bank of England, and the other banks the Royal Insurance buildings and the buildings of the London and Liverpool insurance, the Falmouth club the almshouse, the lyceum the correspondence the Albany and indeed all the palatial offices which have been erected so often within the last few years and which line the streets in the neighbourhood of the exchange.

Few towns are so well supplied with markets and market-places as Liverpool. The markets are spacious airy covered buildings, and are four in number. St. John's, St. James, St. Martin's, and the fish market. St. John's is the largest and most important. It is 650 ft. long and 185 ft. wide. They are all well supplied with provisions. The Haymarket is an area of about 15,000 superficial yds; nearly half of which has been roofed over to form a drill-shed for the volun-

teer corps. This market is also used as a wholesale market for perishable produce.

There are altogether 183 places of worship in Liverpool of these sixty-five belong to the Church of England, twenty to the B. Catholics, twenty-two to the Wesleyans, twelve to the Independents, five to the Primitive Methodists, eight to the Calvinists Methodists, ten to the Baptists, fourteen to the synod of the Presbyterian church in England, four to the United Presbyterians, two to the Church of Scotland four to the Unitarians, two to the Society of Friends, two to the Jews and the remaining thirteen to other denominations; and to the greater number of these places of worship schools are attached. Many of the churches and chapels are very handsome buildings. Among these are St. George's, St. Catherine's, St. Michael's, St. Nicolas, St. Luke's, the church for the blind Great George Street chapel Hope Street Unitarian chapel St. Francis Xavier's and St. Mary's B. Catholic chapels, and St. Andrew's Scotch church.

Liverpool is remarkable for the number of its charitable and benevolent institutions, and for the splendour of the buildings devoted to these purposes. There are the royal

THE PUBLIC LIBRARY AND MUSEUM LIVERPOOL.

infirmary lock-hospital, children's infirmary northern and southern hospitals, lying-in institutions, dispensaries—in all twelve establishments for the cure or mitigation of disease. And in connection with these may be mentioned the northern and southern public disinfecting apparatus, for gratuitously disinfecting by means of dry heat, the clothes bedding, &c., of persons attacked by contagious or infectious diseases; and also, as directly connected with the health of the people, the public baths, of which there are: St. George's, on the pier-head, supplied with filtered salt water and Cornwallis Street, Margaret Street, and Paul Street: supplied with pure fresh water. The last-named has a public wash-house attached to it, and there is another public wash-house in Upper Frederick Street. There are a blue-coat hospital a male and female orphan hospital, a B. Catholic male and female orphanage, two penitentiaries, refuge for the destitute, Magdalen Institute, a central relief society, Church and religious societies shipwrecked mariners' cottages, town mission, four B. Catholic convents—altogether irrespective of the infirmaries and hospitals, eighty charitable institutions and religious societies.

The educational establishments of Liverpool not connected with charities are the royal institution the mechanics institute, and queen's college, the collegiate institute and the medical schools. The schools attached to the various churches and chapels have been already noticed. There are also the corporation school, the national infant industrial and ragged schools, and those attached to the blue-coat hospital, orphan, and other asylums. The principal places of amusement are the theatre-royal the Prince of Wales theatre, the royal amphitheatre, the Adelphi theatre, the Varieties, the Wellington rooms for assemblies and balls, the George

Street assembly rooms, the St. James hall concert-room the Alhambra, the philharmonic hall (a concert-room of colossal dimensions, and unsurpassed in this country in the requisites of hearing and seeing) and many minor concert-rooms. There is also a race-course at Aintree where meetings are held in spring summer and autumn.

In addition to the Prince's park, and the botanic gardens and Wavertree park, already in existence the corporation are now forming three new parks: the largest, the Sefton park at the south end of the town but beyond its limits, will contain 370 acres. The Newnham park, at the east side of the town, will contain about 185 acres, and the Stanley park on the north will contain 90 acres. The corporation too are about to erect public abattoirs in connection with the cattle-market, and situated on a line of railway which will admit of all the cattle landed at the docks being carried in place of being driven through the crowded streets in the markets and slaughter.

The public cemeteries are nine in number—Anfield, St. James St. Mary's parochial at Roe Lane, Birchdown Lane, menopolis the Catholic the Friends and the Jews burying-place.

But the most remarkable feature of this great seaport is its docks and basins. These extend along the Mersey for 5 m. There are thirty wet-docks and half-tide docks, among the largest of which are the Brunswick, the Queen's, King's, George's, Prince's, Huskisson, Canada, and New North. The docks have an aggregate water area of 253 acres, 3548 yds., and quay space of nearly 19 m. in extent. There are, besides, twenty graving-docks, with a bottom length of 16,176 ft., and seven griddings, with an aggregate length of 1129 ft. 6 in.

In 1786 the number of vessels which entered the docks was 1906, and the dock duties paid by them amounted to £3616, 8s. 3d. and in 1866, just one hundred years later the number of vessels was 21,730, and the duties amounted to £241,687, 16s. 6d., nearly a quarter of a million sterling. The following table shows the progression in vessels, tonnage, and duties, in ten-yearly periods, from 1806 to 1866—

Year.	No. of Vessels.	Aggregate Tonnage.	Amount of Duties.
1806	4,076	542,925	£44,669 7 8
1816	5,155	774,509	55,705 6 1
1826	6,061	1,226,918	60,431 9 11
1836	14,949	1,667,619	97,647 10 10
1846	16,641	2,108,444	104,769 11 8
1856	20,585	4,559,618	1,4,336 14 5
1866	21,730	5,841,232	241,687 16 6

The manufactures of Liverpool consist chiefly of ship-building, hemp and wire rope making, self-making, iron-forging, anchor and chain-cable making, iron and brass foundry, the making of steam-engines, sugar-mills, and large engineering works, sugar-refining, soap-making, alkali making &c. The manufacture of watches, chronometers, and watch movements is extensively carried on. There are many large steam-mills for grinding corn, rice, colza, dye-woods, &c. But it owes its great importance to its being a great seat of foreign export and import trade, and the main outlet for the manufactures of Lancashire, West Yorkshire, and Staffordshire and through it the principal part of the trade with Australia and America is carried on.

The cotton trade forms one of the most important branches of its general commerce. In 1740 the total imports of that article amounted to 5 bales; in 1811 they had increased to 96,752 bales; in 1841 to 1,164,939 bales. The following table shows the amount of cotton in bales and whence shipped, from 1846 to 1866 and it also shows the fluctuations caused by the American war—

Year	U. States.	Brazil.	Egypt.	S. India.	E. India.	China and Japan.	Turkey & Greece.	Total.
1846	1,726,263	121,861	113,111	11,928	423,168			2,405,231
1847	1,461,717	101,945	8,258	11,467	469,458			2,053,845
1848	1,859,240	106,280	101,405	4,467	264,378			2,435,768
1849	2,806,241	144,647	99,678	8,838	529,695			3,588,100
1850	3,250,545	165,000	109,000	9,068	542,515			3,986,128
1851	5,429,610	20,129	97,260	10,800	577,680			6,035,480
1852	5,249	325,307	146,430	21,480	1,071,888			1,645,930
1853	151,955	107,265	294,179	67,436	1,346,576			1,967,411
1854	389,119	303,130	364,260	68,581	1,364,805	210,460	61,530	2,321,775
1855	609,269	381,006	333,331	113,238	1,002,444	136,871	78,677	2,559,798
1856	1,156,180	464,848	367,481	90,874	1,544,876	12,968	83,882	3,669,090

The total imports into Great Britain in 1856 was 3,749,041 bales, and of this rather more than 90 per cent. was imported into Liverpool. The total weight of all the cotton imported into the United Kingdom in 1856 was 1,250,992,640 lbs. into Liverpool, 1,254,637,995 lbs. the average weight per bale 862½ lbs.

The grain, &c., imported through Liverpool forms another important branch of trade, as also does the timber, as the following table shows—

	1863.	1864.	1865.	1866.
Produce of E. & W. America—				
Wheat and Barley, of all sorts, in bulk	4,861,500	7,949,000	5,064,500	1,864,000
Wheat and New York Oak, Ash, Elm, and Hardwood, in bulk	963,000	1,091,500	1,064,000	1,060,200
Quebec Lumber, Fir, Spruce, and Boards, in bulk	7,346	54,818	64,611	66,473
Lathwood in bulk, in bulk	675	864	1,079	614
Quebec Staves in bulk, in bulk	303	472	215	329
—, in bulk	281	1,37	835	926
Produce of the North of Europe—				
Danish, Swedish, &c. Timber in bulk	951,500	612,000	414,000	514,000
Wheat and Barley in bulk	1,064	2,361	1,410	2,660
Wheat and Barley in bulk	300	1,180	180	1,000
Lathwood in bulk, in bulk	300	300	300	300
Barley, in bulk	41	54	5	70
Produce of other Countries—				
Molasses in bulk	28,000	96,000	17,000	30,000
Cocoa in bulk	1,000	840	5,000	5,000
Pepper in bulk	8,000	3,500	10,000	10,210
Wheat in bulk	10,000	10,000	10,000	10,000
Wheat in bulk	221,500	25,000	225,000	25,000

The returns are made to the 1st of February in each year.

In 1850 568 ships, of from 1500 to 3000 tons, carried from this port 174,187 passengers, of whom 154,789 were steerage passengers, and 193,109 emigrants to the U. States of America. In 1863 the number of ships was 622, carrying 187,903 passengers, of whom 154,693 were steerage passengers, and 109,598 emigrants to the U. States.

The emigration from Liverpool in 1848 was as follows—

United States	90,428
Central and South America	1,797
British North America	8,765
West India	517
East India, China, and Java	68
Western Africa, Mexico, Australia, Colombia	18,001
Total	101,100

The total number of emigrants to all places from England, Scotland, and Ireland, during the same year was

England	165,420 or of the whole emigration, 4,212 per cent.
Scotland	15,328, 7,28
Ireland	50,009 18,00

And from Liverpool the amount was 57,784 per cent. of the whole emigration or nearly 78 per cent. of the emigration from all the ports of England and Wales.

Of the 121,109 emigrants who sailed from Liverpool the percentage, according to nationalities was as follows—

English	39
Scottish	29
Irish	45,25
Foreigners	20,1
Not distinguished	1,5
Total	100

By railway Liverpool is connected with all the principal towns and ports in the kingdom. The London and North western Lancashire and Yorkshire, Manchester, Sheffield, and Lincolnshire railways all have access and station accommodation there and it is proposed to unite the railways of the opposite shores of the Mersey by a tunnel underneath the river. It is connected also by road with the great seats of manufacturing and mining industry. It has regular communication by steam packets with Glasgow and the ports on the W. of Scotland with Dublin, Limerick, Cork, Waterford, Westport, Drogheda, Dundalk, Newry, Belfast, and Londonderry, and with numerous places in England and Wales, and

with the Isle of Man with steam-ships it is in direct communication with France, the Mediterranean, the Levant African New York Boston, Halifax, Central America, and by auxiliary screw-steamers with Australia, &c. Irrespective of these latter, as fleet of ocean steamers was constituted in 1855 to have an aggregate tonnage of 264,000 tons, and a nominal horsepower of 46,000 horses.

The suburbs of Liverpool are very extensive, and are rapidly becoming covered with rows of neat houses and handsome villas. Within the parliamentary and municipal boroughs, which are co-extensive, are included the parish of Liverpool, which formerly was the municipal borough the town ship of Kirkdale and Everton, part of the township of West Derby, and of the extra-parochial parish of Tunstall Park. The opposite side of the Mersey is connected with Liverpool by a fleet of ferry steamers, which start from two

points on the Liverpool side, to and from the farms of Westman, New Ferry, Rock Ferry, Transmere, Mocksberry Woodside, Seacombe, Egremont, and New Brighton. The boats are admirably managed, and besides accommodating the immense multitudes whose daily avocations require them to cross the river they afford facilities to the thousands carrying on business in Liverpool to reside in Cheshire.

The town is divided into sixteen wards, which send each three councillors to the council. There are thus forty-eight councillors, there are also sixteen aldermen, elected by the council and a mayor. The corporation revenues were formerly very large. In 1836 the income derived from the town dues alone amounted to £49,332 in 1849 to £102,596, 18s 8d, but in 1859 the corporation was deprived of the conservancy of the Mersey and of the town dues, which were handed over to a new board, called the Mersey Dock and Harbour Board. Nevertheless, from real property and from the compensation received for the taking away the town dues, the council have still a large income to meet their obligatory and ordinary expenditure, and to carry out great improvements in the town without imposing taxes for the purpose. The cost of lighting of the town, too, is defrayed out of the surplus municipal revenue.

Liverpool is the most densely crowded town in England, and as a vast number of its inhabitants are unskilled labourers, who resort thither for precarious and fluctuating labour connected with the docks, which subjects them to periods of poverty and distress and renders them ready victims to disease it is not to be wondered at that the town is liable to visitations of epidemic disorders. Sanitary measures, as sewerage, house-drainage, improved paving and cleansing, the regulation of common lodging-houses and slaughter-houses, and closing unhealthy cellars, &c., have done much to mitigate the severity of visitations, and to reduce the rate of mortality. In 1844 the death-rate was 36 in the 1000—in 1868, at the outbreak of an attack of epidemic cholera, it was 29 in the 1000.

Great as Liverpool now is, it is of but comparatively recent growth and has therefore little or no history. In 1644 it was a small fishing town surrounded by a high mud wall. In that year it was besieged and taken by Prince Rupert, and shortly after retaken by the parliamentary forces under Sir John Meldrum. Seven years later a visitation of the plague carried off 300 inhabitants. In 1709 a wet-dock was constructed not only the first in Liverpool, but also in the kingdom. From this event may be dated the rapid extension of the commerce and population, though, as evidenced by the following table, the great increase of population has taken place since the beginning of the present century.

Year	Population.
1700	4,000
1790	30,000
1801	77,638
1831	112,973
1841	234,964
1861	315,960
1891	645,968

The petit retable value of the borough in 1866 was £3,150 13s. Liverpool has quarter and petty sessions, courts of record and requests, and is the seat of assizes for the hundred of W. Derby. Its port jurisdiction comprises the whole estuary of the Mersey. It is the birthplace of Mrs. Hemans, Roscoe the historian, Dr. Currie the biographer of Burns, and the Rev. Leigh Richmond. It sends two members to the House of Commons.

LLANQUIHUE, a lake Chili, in the E. of prov. Valdivia, at the W. foot of the volcanic mountain Osorno and Calbuco. It is of an irregularly triangular shape, about 30 m. long from N. to S., with an average breadth of about 20 m. It discharges its waters through the river Maullin to the Gulf of Reloncavi, in the Pacific, from which it is only 8 m. distant.

LLANQUIHUE [adj.] a territory of the republic of Chili, lying between lat. 40° 50' and 41° 45' S., and bounded E. by the line of the Andes N. by the river Las Damas W. by a line which sets out from its N. boundary, strikes across to the peninsula of the river Bahre and Negro, following the course of the latter as far as the village of Manle, and stretches from thence S.E. to Toloucan Sound. The district

thus indicated comprises the N.E. portion of the ancient province of Chiloé, and the E. of that of Valdivia. It has recently been colonized by a body of German emigrants, under the patronage of the Chilean government, who have already founded a town of 15,000 inhabitants, named Puerto Montt, and developed the natural resources of this fertile and interesting country. The whole of the district may be described as a regular and extensive plain, sheltered on the W. by the slopes of the Andes, and nowhere rising more than 50 ft. above the sea-level. It is covered with vast forests, but in the open spaces the soil has been rendered so rich by successive deposits of volcanic matter that it needs no manure, and yields the most abundant crops. To the N. of Puerto Montt a large coal-field has been discovered, adding vastly to the resources of the colony. Roads are being opened in the interior which will enable the settler to carry his products to the sea-coast. Timber of various kinds here, and several varieties of the potato, which are considered to surpass those grown in England. Ocean crops, and even wheat, flourish. Numerous lakes and tributary streams provide the farmer with means of irrigation. The whole area is parcelled out into square lots, so designed that one side of each lot shall touch upon a public road, and the utmost sagacity appears to have superintended all the arrangements of this new and prosperous colony.—(Oftis, *per Peruv. Reales Provisas de Regal Cogen Soc.*)

LOANDA, or St. PAUL DE LOANDA [adj.] a in S.W. Africa, Portuguese settlement, cap. prov. Angola, lat. 8° 48' S. lon. 13° 8' E. It was at one time a considerable city, but is now greatly decayed. Standing partly on a height above the Atlantic, embosomed among trees, it presents an imposing appearance from the sea, is defended by three forts in good repair, and has many large stone houses together with a greater number formed of wattle and daub. As the see of a bishop, it has a cathedral which has few claims to notice, and is but a poor substitute for two magnificent churches, which once adorned Loanda, but are now miserable ruins; the remnant of the one, which belonged to the Jesuits, being used as a workshop, and that of the other as a bazaar. The other principal buildings are the governor's palace and government offices—commodious structures—and the custom house, the business of which is said to be extremely well managed. The harbour lies between the town on the mainland and a low sandy island called the Loanda, and though once deep enough to float the largest ships close to the custom house is in course of being gradually curtailed in its dimensions, and silted up partly by the large quantities of soil washed down into it during the rainy season and partly by the sand which is driven into it during a high S.W. wind by the dashing of the waves. The island—a narrow sandy flat, about 18 m. long by 3 broad—has about 1500 inhabitants, the half of whom are native fishermen, by whom the town is abundantly supplied with fish. It is not so well situated in respect of water, almost the whole of which is brought from the Bengo by means of lumbines, as the walls within the city are slightly brackish. The exports, which include those of the whole province of Angola, have an annual value of about £104,000, and consist chiefly of ivory to nearly a half of the whole value, cereals, palm oil, bees wax, gum coffee and hides the customs produce annually about £33,000. Loanda is somewhat of the nature of a penal settlement. Those Europeans who go to it voluntarily do so in the hope of returning rich in the course of a few years. Nearly all the European soldiers sent out are convicts. These may be said to have the place at their mercy, as they are the only persons who have arms in their hands but, contrary to what might have been suspected they behave remarkably well. Pop. not more than 12,000, most of them people of colour.

LOCHOWITZ [adj.] a in Austrian empire, Bohemia, cirals and 23 m S.W. Prague, on the Litavka, here crossed by a long wooden bridge. It has a Jesuit church, a castle, a brewery, a building establishment, a cotton and several saw and flour mills. Pop. 2450.

LOCKPORT a vil U. States, New York, cap. co. Niagara, on the Erie canal, which is here crossed by a via duct of the Rochester Lockport, and Niagara Falls railway, 500 ft. long and 60 ft. above the water. It contains thirteen churches, a large educational institute attended by above 600

pagila, and two savings-banks. The manufacturing establishments include numerous flour and saw mills, tanneries, foundries, machine shops, glass works, and factories for agricultural implements, sewing machines, and steam engines. Pop. (1860), 12,355.

LOGON, a poor W. Africa, forming the S.E. extremity of Bornoe, is bounded N. by Kutab, E. by the Schari which separates it from Baghimai, and S. by Adamawa. Its W. boundary is not well defined. It possesses many advantages. Water is abundantly supplied by the Logon or Koo, a considerable stream which traverses its E. portion, and joins the Schari before the latter quits its frontier. The soil is of a rich and fertile character, producing much grain and cotton, and the forests, by the variety and luxuriant foliage of the trees, give a charming appearance to the whole country. One of the greatest drawbacks is the superabundance of water during the rainy season, and the consequent conversion of considerable tracts into unproductive and unhealthy swamps. From its position on the frontiers of Bornoe and Baghimai, Logon is to some extent obliged to serve two masters, and suffers accordingly. The inhabitants, besides growing cotton to a considerable extent, also weave it into various articles, some of which are of excellent quality and in great demand.

LOJA, a t. S. America, Ecuador dist. Azuay, cap. prov. of same name, in a beautiful valley between the Malacote and the Zamora, 100 m. S. by Guayaquil. It consists of straight streets and noble houses, many of them of two stories and handsome, and contains a parish church, Dominican Priory and a large seminary, a college in which Latin, Spanish and philosophy are taught, various primary schools, and an hospital. Within the town itself machinery on a small scale has been found, and in the neighborhood gold and silver and various metals. Some attention is also paid to the production of cochineal.

LOLL BAZAR, a t. India, territory Cochin Behar, 26 m. N. Rampoor. It is an inconsiderable place and deserves notice only on account of the ruined city of Komotapoor situated in its vicinity on the E. bank of the Uthra. Every thing connected with this city appears to have been on the greatest scale. It was of an oblong form, 19 m. in extent and enclosed, except where the river was probably deemed a sufficient defence, by a outer ditch 350 ft. wide and a rampart which is still 30 ft. high, with indications of its having once been much higher and 180 ft. in breadth. In the centre stood the citadel or palace of the rajah, surrounded by a wall of brick, with a ditch outside of it, and beyond both an earthen rampart. The defensive works display little engineering skill, and the ruined buildings are more remarkable for magnitude than for architectural merit.

LONDON [add]. The period elapsed since the account in the text was written, has been attended by changes in the position of London, and in the appearance of many of its districts, such as perhaps, have not been exceeded in importance in any capital city excepting Paris. It is true that these have left many things to be attained that are essential to comfortable and healthful residence and to the proper transference of business, but the growth of the population, and the extension of the inhabited area, have been so great and rapid, that it has been impossible for the metropolitan local-management, however improved, to keep pace, or even to get rid of old areas of neglect. Still with the passing of the Metropolitan Management Act of 1855 was inaugurated what appears to be a new era, of which we must now (February, 1897) speak in part prospectively, and so much because to treat of the future, however probably prolific of works, mixes at all into the plan of this Gazetteer, as because there are works and measures of the last ten years in the metropolis, which, the most important for their present results of any that we could name are on the other hand to be regarded as imperfect, because in some of their devices incomplete. Yet it should be here mentioned that the profound future may be of great importance to the sanitary state and the appearance of the metropolis, or whatever the chief consider of the act is regarded, and the governing body appointed under it, the Metropolitan Board of Works, is adequately provided with funds. Meanwhile, a gigantic operation, the sewerage of London, has been very nearly completed; the embankment of the Thames is far advanced, and two or three important lines of streets,

long previously projected, have been opened. Contemporaneously with these measures, great progress has been made in the supply of communication between the heart of the metropolis and the suburbs, by railway and passenger transport, and through the same sort of agency as to those between different parts of the thickly populated area itself. The rail way-works, however have not yet helped so much to provide the poor immediately with decent, comfortable, and economical dwellings, as to effect dialogues entailing a large amount of misery. In the decorative aspect of London there is to be observed a greatly increased use of the members of styles of architecture, and abundant evidence of movement of some kind or other in taste. But good resultant effect is confined to individual structures at considerable distances apart, and many of which are of the public-building class, excepting as to one or two suburban quarters, and as to the City. In the City of London the increase in quantity of architectural decoration has been, during the last ten years, exceedingly great: the quality of the architecture also is there much improved, and stone has almost displaced stone as the vehicle of effect. The decorative and ornamental expression of the streets about Lombard Street and the Strand and in a certain extent in other parts of the City was till very recently fostered by the growth of numerous banking and insurance companies. By them no spot of ground has been deemed too costly and no amount of architectural enrichment has been thought excessive and for some time a sort of rivalry has been apparent in which the older banking-houses have participated. The architectural expression is, however, subject to two adverse influences—the one the narrowness of the streets, and the other the smoke-mist which prevails in London, but slightly diminished since the acts of 1855 and 1856, excepting on summer, when the atmosphere is often clear and beautiful. Some of the best of the London prospects, however—those from the bridges—have been greatly deteriorated by the erection of gigantic sheds of railway terminal-stations in the City and at Charing Cross.

Population and increase.—The limits of London are now very difficult of definition. The entire area under the jurisdiction of the Metropolitan Board of Works takes in Bow Street, Clapton, Hammersmith, part of Highgate Hampstead, parts of Kilburn and Kensal Green, Acton and Hanwell, north of the Thames and Putney, Molesey, Twickenham, Teddington, Brentford, the site of the Crystal Palace, Epsom, Wokingham, and Farnham, south. But beyond most of these districts, important suburbs and sometimes thickly populated quarters have grown up. In some of them, as on the left bank of the Lea, the sites are such as should never have been built upon, with regard to health, whilst the buildings bear evidence of being out of the limits of the Building Act, of which the last measure bearing the name was passed in 1855, though it has been since amended in some details. In several directions there are lines of houses differing from those of the central quarters only in having gardens in front of them and in being detached or semi-detached all the way from the town itself, to what were little more than a dozen years ago suburban villages or distinct towns. Thus, a complete line of houses may be traversed from London to the town of Croydon, passing by such populous places as Forest Hill and Sydenham. This which is the modern characteristic of towns, but is markedly the feature of London, and is connected with the improved provision of railroad-communication makes it exceedingly difficult to give any correct statement of the population. The day-population of the City and the neighbourhood have become two extremes of the scale. The last statement of the registrar-general, however, makes the estimated population of London in the middle of 1886, amount to 3,087,538, or very nearly equal to that of the cities of Edinburgh, Glasgow, Dublin, Manchester, and Bristol, and the boroughs of Belfast, Birmingham, Liverpool, Sheffield, Leeds, Hull, and Newcastle-on-Tyne all put together. The actual returns of the year 1861 made the population 2,806,829. Then, the houses were 774,451, during the ten years elapsed since 1851, when the numbers, as given in p. 511 vol. II., were 3,087,538. The area, in the same table, was given as 21,868 acres. It is now stated by the registrar-general as being 77,997. Of the population in 1861, 2,806,824 belonged to the metropolitan part of Middlesex, whilst 578,748 belonged to Surrey, and 198,437 to

Kent. The average of the three divisions, —32,456 acres belonging to Middlesex, 23,901 to Surrey and 22,591 to Kent,—when compared with the figures for population, may serve to indicate the varying density through. In parts of Lambeth, Southwark, Bermondsey, Deptford, Greenwich, and West Wick, the density is far greater than would be expected. It should be observed that none of these figures take any account of Essex,—which includes Canning Town near the Victoria Dock (the district already referred to) and Stratford and West Ham. Now are there considered numerous suburbs and suburban towns that have become attached to London, as before stated and which send some of their residents to increase the population of the City and of the West End in the day-time. Croydon alone at the end of 1886 had a population of 55,000, and the number is increasing rapidly. Of the more central districts that of the largest population in 1861 was St. Pancras with 196,793 inhabitants. Kensington contained 185,060; Lambeth 162,044; Marylebone, 161,850, and Islington, 155,841. Shoreditch contained 129,864 inhabitants on an area of 840 ac. whilst Bethnal Green had 105,101 on 760 ac. and mostly huddled together in houses of the smallest size. The population of the City of London was set down as 46,555 for the area of 424 acres, but the figures, being obtained at night, are admitted to be quite fallacious for any sort of judgment of the City in business hours.

Some of the facts that have been mentioned, or alluded to make it easy to apprehend comparative statements of the mortality. The general health of London, in fact, cannot be regarded as having greatly improved even after leaving out of consideration mortality due to the cholera in 1866 and to the diminished supply of food caused by the cattle-plague of that year and the year previous, and it can no longer be considered to present advantageous contrast with the mortality of Paris,—in which capital consequently upon the striction afforded by numerous new and greatly extended thoroughfares the mortality has been much reduced. The mortality of London for 1886 was 26.47 per thousand of the inhabitants. That for 1885, 24.65, was improved from that for 1884 which was 26.58; but that for 1883 had been 26.47 when there had been a regular increase since 1860. The mean of five years, 1880-4, was 24.06; whilst that of the preceding five years was 25.08. The districts are divided into five groups and the figures for the districts in the north (23.95 deaths to the thousand persons living) are the most healthy and the east and central districts (the last-named having 25.99 as the figure) are the least. The City proper however appears to be healthy.

London House Streets and the Thames Embankment.—Amongst the street-improvements of late years have been the lines of Cannon Street,—which afforded a needed route for the traffic from St. Paul's to London Bridge, relieving Cheapside, the line northwards to Clerkenwell from Farringdon Street and that of Victoria Street, Westminster. The two last-named lines are still bordered more or less by vacant ground. Under the management of the Metropolitan Board there has been opened the new Southwark Street. It is of great importance to the traffic from Westminster to the London Bridge railway terminus, for which the shortest route is crossing the river. Prior to this the Board had opened a very short but important street, now Gerrard Street, near Covent Garden in which their first experiment was made of the construction of a subway to open into the water and gas-pipes and telegraph-wires, as well as to afford access to the sewerage and so render unnecessary repeated tearing up of pavements and blocking-up of the streets. A subway was afterwards constructed in the formation of Southwark Street, and another is built in the Thames Embankment, but the gas-companies have thus far (March, 1887) been able to resist the efforts of the Metropolitan Board to compel use of the subway; and the pavement of Southwark Street, which had been exceedingly well laid with a view to permanence, was actually taken up by a company in spite of the Board, now after it had been finished. The gas companies' ground their opposition upon experience that there has been (as in Paris) of explosions consequent upon sections of gas in subways, or channels of an analogous description; which objection, and the formation of an explosive substance in certain parts of the subway they argue it is more for Gas.—Vol. II.

impossible to prevent. At present there is considerable leakage, but into the earth. This waste of gas seems to be considered inevitable; but, the saturation of the earth with gas, if not one of the minor causes of the pollution of the atmosphere of London, is unquestionably a frequent cause of pollution of the water. The present proposition of the Thames Embankment, after years of planning and action, is due to the necessity that there was in 1881 for immediate decision as to the course that was to be taken by one particular line of the sewerage of London. This line, the Low level line of the northern side of the Thames, had been designed for the position which it has at length obtained, but so many difficulties were offered to the action of the Metropolitan Board, that their engineer was obliged to contemplate taking the sewer along the Strand and Fleet Street. The prospect of interference with the traffic was too serious for even the British government and parliament and at length, in 1883 after some opposition from lessees of the Crown an act passed which allowed the Board before the end of the year to mature the main portion of their scheme. This was completed in so much of the embankment of the Middlesex side of the Thames as extends between Westminster Bridge and Whitehall. That portion now consists of ground reclaimed for a roadway of 100 ft. in width, with a granite retaining wall surmounted by a moulded parapet broken by pedestals, for lamps, to which are to be attached heads of lions cast in metal—these last holding mooring-rings for the craft. The coal barges that formed previously the foreground of London viewed from the Fleet highway are mostly got rid of—partly through the circumstance that a large proportion of the coal burned in London now comes by railway. With this length of the Embankment will be connected several important lines of communication with Whitehall and Charing Cross with the Strand near Waterloo Bridge, and with the heart of the City. Eastward the embankment roadway will be continued though not altogether on the principle of a solid embankment, as far as Blackfriars Bridge, whence there will be a direct line of street opened to the Mansion House. Within the embankment there will be a railway as part of the girdle-line generally distinguished as the Inner Circle and in great part underground, of which 'turbis the Metropolitan Railway from Farringdon Road to Fiddling's Hall' constituted the original portion. The diversion of the Embankment, as a system of as at present in hand and which at this time of writing may be considered all but complete, passes from Westminster Bridge under the Charing Cross Railway Bridge and Waterloo Bridge, and past the front of Somerset House to opposite the east side of the Temple. The inn-yard opposite the Adelphi is cut off and a large unsightly area of mud at low water is got rid of. The original intention as to 'reclaimed spaces of this kind was to appropriate them as recreation-ground, but this account can scarcely describe the ultimate appearance of the Embankment in all respects, as much of what is decorative, rather than structural, is not even designed. In place of the latest arrangements of dumb-bell and flying-bridges at the stopping-places of the steamboats, there are well contrived landing-stages in recesses—namely one at Westminster Bridge, two at the Charing-Cross Railway Bridge (above and below the bridge) two at Waterloo Bridge (above and below) and one at the end of Essex Street for the Temple. This last will have combined with it landing-stages, and there will be landing-stages opposite the Adelphi, and in the middle of the distance between Westminster and Charing-Cross Bridges. Each of these several features of the Embankment is made highly ornamental by balustrades, pedestals for sculpture and other features. At the landing-stages between Westminster and Charing-Cross Bridges will be placed (re-created) the well-known 'York Bairs,' once celebrated with the residences of that Duke of Buckingham whose names and titles are preserved in the designations of several streets near the Adelphi. In the adjustment of the line of this embankment, the aim has been to equalise the breadth of the river and to increase the scour and so prevent the continued formation of mud-banks and within the pastification of the stream. The embankment of the same side of the Thames above the Westminster Palace, has been sometimes complete at Millbank, and onwards past Chelsea Hospital, and a length that is just above the Palace may soon be undertaken.

Ultimately and within very few years, there will be a line of way from Chelsea to the Bank of England. An embankment of the Surrey side is in hand, as yet, only as regards the length between Westminster Bridge and Chesham Road, Vauxhall Bridge. West Westminster Bridge is the site for a new building for St. Thomas's Hospital, the building near the London Bridge station having been displaced in the course of the recent extension of the line of the South-Eastern Company. In connection with this embankment some important street-improvements are in hand. Besides the improvement of the street-communitions on the banks of the Thames, there has been some improvement of those between the districts on the opposite banks. This, however, has been chiefly in the provision of bridges devoted to foot-traffic, or to foot-traffic and railways together, or to railways alone. Works under the hand of bridges over the Thames, however, will be noticed further on.

One long projected improvement, that of the substitution of a level-line for Holborn Hill and the corresponding incline on the other side, is in process of realisation. It includes a bridge, and considerable alterations in the adjacent buildings. The latter is involved in formation of the incline requisite for connection between the upper and lower levels.

Railways and Stations.—Of lines of railway devoted specially to the service of London, and of the service of country-lines in quarters that are central, the number is considerably increased. There are at least two routes between the north and south of England, by which the traveller may pass through the metropolis in a railway-carriage—and two others are in process of construction. This condition of things involves the acceptance of principles once stoutly contested. When the metropolis was first provided with railway-communication to the country a central location for a railway terminus was deemed somewhat objectionable; or, at least, it was not obtained excepting in the case of the Greenwiche, Blackwall, and Great Western Lines. Up to a period later than the date of the first publication of the *Quarterly*, the only railways available for communication with the suburban districts were lines having their stations at London Bridge, Fenchurch Street, and Waterloo Bridge. Now there are two terminal stations, side by side, in Finsbury, for many places in western, south-western, southern and south-eastern London: there are several lines added from London Bridge: there are district routes to northern and north-western London, and to the south-east of England, in connection with numerous metropolitan stations.—Of which the chief is at Ludgate Hill: there is a terminus near Broad Street, City with a line to the north of London and the north-west of England; and there are added lines going eastward and north-eastward; with which again there is about being connected a terminus not far from the Bank, or near Finsbury Circus, for the Great Eastern line. But the most important of new terminal stations in the very heart of London, are those at Charing Cross and Cannon Street. These serve not only the communication with Bermondsey, Greenwich, and Woolwich, and that part of England which is of the South-Eastern railway system, but a new source of traffic between the City and the west of London, or crossing the river twice by new bridges. At each of these stations the several lines, with the arrival and departure platforms, are covered over with a single span of iron roof. One of this is formed by the looking-offices, on the ground-story and rooms of a large hotel over them. The front in each case is set back a considerable distance from the street, in a forecourt having gates and loggias, and the whole has a highly-decorative character: the change in the aspect of the quarter of London is great. The hotel at Charing Cross extends for some distance along one side of the terminus: the pavilions or towers of its angles are surmounted by high French-lion roofs; and in the centre of the forecourt is an ideal restoration (by the architect of the hotel, Mr. E. M. Barry A.R.A.) of the Cross of Charing, which stood some distance westward. The hotel and station occupy the site of Madderford Market, which was reached by a narrow street from the Strand. Several houses in the Strand are improved. A similar clearance has been made for the other station, called the City Terminus. The platforms in this latter case are opposite of 700 ft. in length; and space is allotted for more than 500 railway-carriages, besides street-cars. The

several stations named and others which there are in the extreme west of London, are attached to lines that give the metropolis, or connect one part of it with another so as to be of use every day to the mass persons, that is to say, the railway-traffic is so the substituted for the omnibus. Thus there is communication between the City and the western part of London, by many routes, whilst the southern districts are especially well-served though advantage of railways have been retarded by delays on journeys. A line that has been only alluded to above, but which is perhaps the most important of the omnibus-lines, is the Metropolitan or 'Underground railway. Its importance arises from the method of its construction, as well as from its effects upon the London railway-system. It is in great part what its popular designation implies or underground, and so also are several of its stations. It is carried in part of its length, or from King's Cross to near the Edgeware Road, along the line of 'the northern line' of London, in what has the appearance of a tunnel, though, the crown of the vault being immediately beneath the street-pavement, the construction was different from that of other railroad-tunnels. The greatest care was required in passing the numerous mains and pipes of the gas and water services, and in getting right at the different stations, and ventilation everywhere. The engines are specially constructed so as to pass from one end of each underground portion of the line giving off as little steam and noxious effluvia as possible. The carriages are lighted by gas. This line has a station near to Finsbury Circus; one in Aldersgate Street, one in Farringdon Road,—where the line is joined by that from the south of England, and south of London of the London, Chatham, and Dover Company, and one at King's Cross where it serves the Great Northern railway to the north of England and north of London. Then come four stations, from one of which there is a similar underground line to St. John's Wood, and both these in a junction with the Great Western line, at the Paddington Terminus, whence there is railway-communication with Hammer-smith and other western districts. The Metropolitan Railway is to be regarded as the first instalment of the 'Inner Circle—a girde-line of which one portion will be in the Thames Embankment and which passes by Kensington and Brompton in the west of London and Tower Hill in the east. Chief stations of this Inner Circle are fixed as close as possible to the terminal stations of the grand trunk-lines: thus there is a station exactly opposite the Finsbury station before mentioned there is one close to Cannon Street Station, and so on. The trains will keep circling all day round London,—each always running in one direction, and so timed that passengers need not wait more than five minutes for a train, or be troubled by time-tables. By this system of the girde-line, expense of ground for sidings and turn-tables is in great measure avoided. One of the stations will be at Westminster Bridge; and for communication with it and the steam boat landing-stage, an underground passage has been formed from the Westminster Palace. One of the lines crossing London will connect the South-Eastern line from Charing Cross, with the London and North Western line. It will be, in part, constructed similarly to the Metropolitan Railway, which it will intersect, at a lower level. Another line crossing the metropolis, the East London, appropriates the Thames Tunnel. In some portions of the suburbs, as of the town, the appearance of the locality is greatly changed by railways. Between Battersea Park, and Wandsworth and Clapham, there is a network of lines, which it is hard to disengage even on a map. There are four or five companies having stations in communication with one another at Clapham Junction, where the whole number of trains each day amounts to many hundreds. Some of the railways include work of great importance as engineering-construction—but most of them have added to the streets of London deformity instead of beauty. This is particularly noticeable along the line from Charing Cross to the London Bridge Station, or especially in the bridges close to this station. A considerable alteration in the appearance of Bridge Street (Blackfriars), Farringdon Street, and Ludgate Hill has been produced by the line of the London, Chatham, and Dover Company, which crosses Ludgate Hill by an iron bridge. Much opposition was raised to the great size of the bridge, on the score of anticipated destruction

of the view of St. Paul's Cathedral. The bridge is made somewhat ornamental, whilst it includes a very useful feature—namely footways for infirm persons and others wishing to cross the street without danger. Accidents to pedestrians in the London streets had become numerous, and not the least important of improvements in the streets are the resting-places, guarded by posts, and each furnished with a large lamp, in the middle of the roadways, which have been established at many dangerous crossings. Some of the smaller stations of the London, Chatham and Dover line are of superior architectural character but the larger stations, and especially the Ludgate Hill Station (in Bridge Street) are much the reverse.

Sewerage.—The sewerage of London, the primary duty with which the Metropolitan Board was charged, is at this time of writing nearly complete. Indeed its formal inauguration took place on the 4th April, 1885. The system consists of how of sewer intersecting and intercepting the old lines which ran into the Thames, and whilst retaining the old outlets for service on occasions of heavy rainfall, conveying the ordinary rainfall and sewage to outfalls, five to seven miles distant, where the sewage discharged into the Thames becomes largely diluted, and where moreover, with the help of arrangements for storage, the discharges take place at time of ebb-tide,—so that it is supposed impossible there can be any return to that part of the river which is within the thickly populated quarters of London. The system for the northern side of the Thames comprises three principal lines, each with branches, and called respectively High level, Middle level, and Low-level Sewer. The Middle-level Sewer is upwards of twelve miles in length. Part of its length includes the whole line of Oxford Street and the Baywater Road. At the northern end of Bedford Row it is joined by an important branch from Lincoln's Inn Fields and Finsbury. The Middle-level and the High level Sewers come together on the western bank of the Lea, where there is an elaborately contrived system of water closets connected to the outfall of clean waters into the Lea. Under ordinary circumstances the sewage flows on, crossing over the Lea by iron ducts, to Abbey Mills, where the line of the Low-level Sewer arrives at a pumping-station. Here the sewage of the Low-level districts (which extend as far up the river as Hammersmith) is pumped to the higher level, whence the whole sewage of London on the northern side of the Thames, flows in three parallel brick-outlets, built in an embankment which is upwards of five miles in length, on to the Northern Outfall and reservoir. The reservoir is divided into four compartments, each served over. It occupies an area of about 10 acres. The sewerage works in the Thames Embankment alone comprise much elaborate construction, as for interception of the sewage, formerly flowing into the river by numerous outlets, and for the utilization of the larger of the old outlets under exceptional circumstances that have been alluded to. The system of the southern side of the Thames is divided into High-level and Low-level. The low level sewage is pumped to the higher level at Deptford, whence the whole flows, under Greenwich and New Cross, to near Greenhithe, about 7½ miles from the Deptford Pumping Station. Here the whole of the sewage of that side of the Thames has to be pumped and reaccumulated during the hours that may be required by the state of the tide. The reservoir is similar in construction to that of the northern outfall, but the arrangements in connection with the reservoir are much more elaborate. The pumps are capable of lifting 56,000 gallons per minute from the sewer into the reservoir. The engine-house and a lofty chimney of ornamental brickwork are conspicuous features of that part of the river. Everywhere throughout the system, the construction has been most skilfully devised by Mr. Bazalgette, the engineer to the Board, and the work, which is now nearly all concealed from the eye, has probably nothing to be compared with it, unless amongst works of the Romans. The total length of the sewers is 83 m., and the area drained is about 117 sq. m. When complete, the whole system will have cost about £4,300,000. As may have been understood, the area does not include Croydon or Beckenham, and many other portions of what is really part of London. It should be observed, that the making use of the river again as outfall, however unavoidable in the absence of satisfactory proposals for the utilization or disposal other-

wise of the sewage of London, is also in the actual state of knowledge, is regarded as temporary only at least for a considerable portion of the sewage. There is a scheme, which the Board believe will prove successful, for the appropriation of all or part of the northern sewage, to fertilization of the Maplin sands, on the Essex coast, which are to be 'reclaimed.' About the year 1854 the ordinary daily sewage discharged into the Thames was estimated as 1,437,000 cubic ft. for the south side, and for the north side considerably more than double that amount; but in January, 1867 the average daily quantity pumped at the Southern Outfall Works, at Greenhithe, was found to be 57,965,859 gallons, or what would appear to be equivalent to not less than 9,385,902 cubic ft. A return some weeks later made the quantity 44,666,189 gallons.

Water-Supply.—The metropolitan water supply is considerably augmented from what was the condition of things as stated in the original issue of the *Gleaner*. None of the companies drawing their supply from the Thames at present take the water from any place as low down the river as between Westminster and Waterloo bridges, or even so low as Kew; and the quantity supplied by the companies together has more than doubled. At the end of 1866 the quantity averaged about 54,000,000 gallons daily, to 438,398 houses, or over 330 gallons, in place of 164 for each house and nearly 41 gallons to each person. A more recent statement makes the quantity as much as 108,000,000 gallons. A large number of townships, however, are, practically speaking, not supplied. Great portion of the water that is drawn from the sources is wasted, whilst much is spoiled by storage, and in distaste or butts that are exposed to the action of every kind of impurity. The largest quantity 21,631,000 gallons, was supplied by the New River Company; and, including this, rather more than half the total supply was drawn from other sources than the Thames. By an Act passed in 1863 after a season had been leased from the contract during the prevalence of cholera, the results in two districts, one supplied by the Lambeth Company and the other by the Southwark and Vauxhall Company,—the supply of the former being drawn from the river at Thames-Diton, and the latter being at the rate of 87 per 1000, whilst that of the latter was drawn from the Thames at Battersea, and the deaths were 150 per 1000,—all the companies making use of the Thames were obliged to draw from above Teddington Lock, that is, above the limit of the tidal flow. The Act contained other stipulations: following class, the reservoirs of the New River Company and others, from which, till then, the supply had been made without filtration, were disused or covered over. The Thames Companies now draw their supply from Thames Ditton, Kingston and Hampton. But, by the chief sanitary authorities, the Act was regarded as a compromise with the companies. Now even above Teddington Lock, the source of supply is become greatly polluted by the sewage of numerous populous towns, and by the drainage of richly-manured land. Moreover as to water from other sources: in 1864, on the prevalence of cholera, a quarter of London supplied by the East London Company which water, that there was reason to suspect of impurity derived from its place of storage, and that had been drawn from the Lea, suffered severely. Water used for drinking being regarded as the main agent of diffusion of the cholera-poison, it is supposed that the smallest impregnation (as by the effluents of cholera-patients in Windsor or Reading) of the sewage, and then of the water supplied would endanger the health of London. Again, a quantity of water is taken from the Thames which seems to be as great as to interfere with the navigation in the upper part of the river. From these and other reasons, including hundreds of the water the question has reverted to much the same position, compared with the waste of London as it was in 1853. Rival schemes have been put forward for the supply from different mountain-districts, as in Westmoreland and Wales; and a Royal Commission is engaged (March, 1867) on the consideration of the entire subject. The water has, however, this advantage over that supplied before 1863. It is abstracted through layers of gravel and sand before entering the mains. Besides the seven older companies, there is now the East Waterworks Company supplying the Greenwich and Woolwich district. One of the present projects would bring water a distance of 184 m.; and another would bring it 240 m.

It is universally admitted that the water of the London pumps is greatly polluted.

Cemeteries. The paragraph under this head, now regular occurrence. The cemeteries, as those in Bromley, Kentish Green, Highgate, Abney Park, the Tower Hamlets, Bethnal Green, Nethurst, and Norwood, are the only 'intemperate' places in which interments are permitted,—excepting, as in the case of interments in St. Paul's and Westminster Abbey and some of the cemeteries named would now be closed were they not provided with their special Acts. Several of the parishes now send their dead to cemeteries situated at places that are distant from the thickly inhabited quarters of the metropolis, where each body is provided with a decent grave for a period of ten years. These arrangements are in pursuance of the Act passed in the year 1850. A large cemetery has been formed near Woking in Surrey, by a company. The bodies, with the mourners, are conveyed by railway-trains, separate from the ordinary traffic, on the South-Western line, from a distinct station to the Westminster Bridge Road and by a branch line into the cemetery itself. Where the whole of the Woking ground, amounting to rather more than 2000 acres, is brought into use, the Company estimate that allowing as a general rule a man-and-a-half interval of ten years before reusing a grave their cemetery would afford provision for the entire mortality of the metropolis for many years to come. At the Woking Cemetery the poor of several of the London parishes are buried, but some of the parishes, as Marylebone and St. Pancras, and Paddington have their own cemeteries. The City of London Cemetery is at Ilford, in Essex. The Great Northern Cemetery near Colney Hatch is similar in its arrangements to the Woking Cemetery. The bodies are taken by the Great Northern Railway.

Bridges.—Considerable change has taken place in the bridge-construction since the Thames. London Bridge and Waterloo and Vauxhall bridges, indeed, are as they were, but an important service is now rendered by Blackfriars Bridge, which is free of toll, a new bridge has been built on the site of old Westminster Bridge, and one is at present in progress on the site of Blackfriars Bridge; whilst new bridges for pedestrians and carriage-traffic have been erected at Lambeth and Chelsea, and there are six new railway-bridges,—counting as two the bridge at Finsbury, that appear as one, and including the bridge of the West London Extension Railway—the line that connects Kingston and Chelsea with Charing Cross Junction. One of the railway bridges, the Charing Cross, has duplicated the Hungerford Suspension Bridge, making use, however, of its two spans of brick, whilst adding other spans intermediate, that take the form of iron cylinders. This bridge has a footway on each side, so that the original communication is preserved. Another bridge, belonging to the same line of railway the line between Charing Cross and Cannon Street, City is similarly provided with footways. The two bridges at Finsbury, appearing like one (but built at different times, and on different systems of construction as to the foundations) belong to the London, Brighton and South Coast Railway Company, and the London, Chatham, and Dover Railway Company. The latter company are owners of a bridge which is close to the works of the new Blackfriars Bridge. Between the railway-bridge and the site of the new Blackfriars Bridge is at present a temporary bridge of timber. This last has a strange appearance, from the arrangement of different levels for the foot-traffic and the carriage-traffic—the former being carried across at a considerable elevation above the latter, or the carriage-road level. Limited space between the two bridges rendered the arrangement necessary. Another bridge, to connect Charing Wall, Chelsea, with Battersea Park, is in progress, at also is a line crossing under the river near the Charing Cross Bridge, the Waterloo and Whitehall Railway which will be on the pneumatic principle. These new communications leave the carriage-traffic still inadequately provided for. In each of the nine or ten new bridges that have been named, from one or other of its adaptations has been used for the superstructure. Thus, as in the case of Westminster Bridge the number of arches and obstructing piers has been lessened and so also in Blackfriars Bridge, of which the foundations are advanced. But the material from also is used in the foundations of nearly all these recently-constructed bridges, or even those where the piers above water are of granite or stone and

to this material, and to the systems whereby coffer-dams are dispensed with, credit is attributed the rapid execution as compared with what was formerly the duration of works in hand. Taking the bridges in the order of their execution the Chelsea Bridge was completed in the year 1858. Its first cost was £265,819. It is a suspension or chain bridge, with a strengthening truss to the roadway somewhat after the principle of that of the Hungerford Suspension-bridge, only all in iron. There are two piers in the water, and the centre span is 247 feet. The foundations, along with portions of the piers above water, are constructed of timber-piles and concrete in an outer casing of iron. Mr. Thomas Pugh was the architect. Following some time after this was the new Westminster Bridge, also by Mr. Pugh, and having the same system of construction in the foundations, though with stone or granite for the piers above low water level. This bridge has seven elliptical arches of wrought- and cast-iron. The centre-arch has a span of 190 feet. The bridge 916 ft. in length has the ample width of 85 ft. The two footways are each 15 ft., and there are two tramways for heavy traffic. Westminster Bridge has been very generally admired for the form of the arches though there is an effect of weakness in the crown of the arch. The distance raised from the roadway is as to be hardly for the eye. The decorative details are of Gothic character. The railway-bridge of the London, Brighton and South Coast Railway Company and the railway-bridge above Battersea, are somewhat similar structures, of iron girders and stone piers. In the construction of the first-mentioned of these two the foundations were laid, on the old system, in coffer-dams; but in the bridge of the London, Chatham, and Dover line finished in 1866, which tones the other (so that the two structures are generally regarded as one,—as indeed they are one as to the upper arches) the coffer-system of foundations was used. The Charing Cross Railway Bridge was the first of the Thames bridges in which each cylinder, filled with brickwork and concrete, was used for the foundations; as also they are there, above water for the new piers. Each span of the superstructure is constructed with transverse girders, which are suspended from trusses formed with diagonal cross-lacing: these latter are of great strength—as required by the breadth of the bridge, for the number of lanes, and from the necessity for there being no checks to the yampan of truss from one line to another. Indeed, the bridge may be regarded as a portion of the railway superstructure, and at the southern end it spreads out, in the shape of a fan, to the width of the station proper. Altogether the bridge is one of the most remarkable of modern efforts in railway engineering; though it is not altogether aptly, despite of gilding. Mr. Hawkshaw was the architect. The chains from the suspension-bridge are now used in the bridge at Clifton, near Bristol. The Lambeth Bridge at the Horseferry is a combination of the suspension and truss-girder principles, and was really the first attempt to give the girder, or beam, in combination with suspending chains for more than sustaining that is for positive support of the roadway. Another peculiarity of the bridge is that the chains are formed of twisted strands of iron wire. This bridge is 53 ft. in width. It was opened in 1862. It cost something less than £20,000. Mr. W. H. Barlow was the architect. The bridge of the London, Chatham, and Dover Railway resembles the Charing Cross Railway Bridge in the principle of construction, both of the foundations and the superstructure, but the piers, formed of clustered iron-chests with stone bases, and the abutments, are more decorative in character; whilst the trusses are much lighter and there is a line of truss along the middle of the roadway as well as on the outside. The bridge attached to the Cannon Street station, or 'City Terminus' of the South-Eastern Railway, is similar to the Charing Cross bridge in its connection with a great railway-terminus, and in its construction with cylinders as the piers, sunk deep into the river-bed without aid of coffer-dams, and in the beam- or girder-principle of the superstructure. But, decoratively, the bridges are very different. The several cylinders in place of a pier of the old system of construction are Doric columns; whilst there is a floor to the external girders, composed of cast-iron, a scumel, and an ornamental parapet. The new Blackfriars Bridge, of which the first stone was laid July 10, 1865, will have five segmental arches of iron, springing from granite piers, instead of three stone arches as in the old bridge.

The centre arch will be of 165 ft. span. The breadth between the piers will be 75 ft., or 28 ft. more than the dimension of the old bridge. The details will be of Gothic character, and as the face of each pier, will be a column having a shaft of polished red granite. The foundations are being laid in iron caissons, from which the water is pumped out. The system resembles both that adopted in Westminster Bridge and that of those bridges in which cylinders are used. The only important differences are that the pier will be of the ordinary form, and that the caissons, when put together, are of the same form as the future pier. The pier is built within them, as in the case of use of the coffer-dam. Messrs Joseph Cubitt and Henry Carr are the architects. Several proposals have been made for crossing the Thames below London Bridge, by high level bridges, and one or more of these are likely to be carried into effect.

Docks.—Additions have been made to some of the older docks; but they are small works compared with the formation of the Victoria Docks. These are situated near Plaistow, below Blackwall, and occupy about 200 acres of the marshland. The basin is about 90 acres in area, and the wharves is more than a mile in length. The Victoria Docks were opened in 1855. Mr. Riddler was the engineer. Besides

these, there are the Millwall Docks, in the Isle of Dogs, approaching completion, and an extension of the West India Docks. Docks also are being formed at Dagenham below Barking Creek. The Commercial Docks, south of the river towards Deptford now extend over 160 acres; and the ponds will float 50,000 loads of timber.

Public Buildings.—The Palace at Westminster has received some additions to the internal decoration, in the shape of paintings in fresco and the mosaic glass windows; and in that of statues as of great statemen, and a statue of the architect has been placed on the staircase leading up to the council-chamber. The crypt of St. Stephen's Chapel has been restored and enriched with elaborate coloured decorations. All the houses on the south side of Bridge Street have been removed; and New Palace Yard has been enclosed, though not by building correspondingly with the east side of the yard as Sir Charles Barry designed, thus the base of the Clock Tower has been modified decoratively to suit the new arrangement. The footway, before referred to, is being carried under the roadway to the pier and the site of the intended railway-station, for the convenience of Members of Parliament. In Old Palace Yard is an equestrian statue of Richard Coeur de Lion by Baron Marochetti after a medal that was in Hyde Park in

THE NEW FOREIGN OFFICE AND INDIA OFFICE, FROM St. James's Park.
Designed and engraved by J. L. Whitman.

1851. An extensive pile of government-offices, for the India Board and the Foreign Office, has been erected in Downing Street. The style is Italian, and the building exhibits a large amount of decorative detail part of it in red and other coloured marbles and granites. Mr. G. G. Scott is the architect of the whole exterior and of the interior of the Foreign Office, Mr. M. D. Wyatt is the architect of the court, and the interior generally, of that part of the building appropriated to the India Board. The old India House in Leadenhall Street is removed, and the site occupied by city-offices. On the Lambeth side of the river or between Charing Cross and Westminster Bridge, there is now a large building for stores connected with the India Board. Somerset House has now a front towards Wellington Street which has been designed exactly in the manner of the rest of the building. Mr. Pensonhorne was the architect. A long range of buildings has been erected as barracks for the Guards, at Chelsea, near the suspension-bridge.

In the City the most important public work is the restoration of Guildhall. The hall itself is now covered with an open timber-roof of the decorative character of roofs of the 'perpendicular' Gothic period, whilst the old front has been removed and replaced by a new Gothic, but different to the Gothic of the old front, which last was erected when features of the mediæval styles were not well known to architects, and when

restoration was less in fashion than now. Mr. Horace Jones was the architect of the restoration. Some of the City Companies, however, have remodelled or rebuilt their Halls. Of these the Clothworkers Company have produced the most elaborate street-façade it cannot, however, be duly appreciated where it is in Mining Lane, one of the many narrow streets in which much of the good architecture of the City lately produced is situated. Almost the only considerable fault of that architecture is that it is not designed for its situation. Features intended to contribute to effect and costly carving, are placed where either they cannot be seen at all, or where they give pain to any one looking at them. The front of Clothworkers' Hall of which the late Mr. S. Angell was the architect is in the Cinque-cento Italian style. Several of the Great Companies, and others, have found the value of ground an inducement to giving up much of it as sites for warehouses or offices. Of these are the Merchant Tailors, and the Haberdashers. The Saddlers Company have thus produced a conspicuous front in Chancery, combining with it an entrance-way to their hall at the back. But the most important buildings architecturally are the banks, and the insurance companies' premises, to be found in the streets surrounding the Exchange and the Bank of England, and in and about Lombard Street, as well as westward in Leadenhall Street and about Fenchurch Street, and west-

used in Chancery Lane. The demand for upper-story offices has become great, especially with the taste for having the place of residence out of town, that hitherto a company has gained through purchase of a freehold, and after having actually leased its location on the front of a building. The peak of 1866 may have brought to an end what has been of the nature of success; but numerous good buildings will be left as evidence of what has decidedly been an important period in the architecture of London, although the evidence is to be looked for in one quarter, rather than in the metropolis generally. Amongst the new banks, that of Messrs. Roberts, Lambold, & Co., in Lombard Street, of which Mr. F. C. Hardwick was the architect, may be reckoned as an exception to the mistaken system of extensive ornamentation of upper-stories in narrow streets. In this building, moreover regarded as a bank, the embellishment of the lower story is an almost solitary instance of treatment altogether correct. Another building, in the same street, at the corner of Clements's Lane, which is occupied by the Royal Insurance Company's office, whilst not possessing the meritorious quality of the other is remarkable for details of ornamentation and for a very elaborate and effective doorway. In this, as elsewhere, in the building good use is made of incised ornament. Here also may be observed the substitution of polished red granite, a material that has come largely into use chiefly for the shafts of columns. Mr. Belslar was the architect of the building here mentioned. Amongst the other important new buildings in the same street are the banks of Messrs. Barclay, Bevan, & Co. and Messrs. Alexander Canale & Co. The former is by Mr. F. C. Hardwick; the latter Gothic, by Mr. Waterhouse. Also noteworthy is the London and County Bank. In Cornhill are several elaborate, if not effective, architectural compositions; and here we may mention, there is a porch, Italian in style, added to the church of St. Michael, by Mr. G. G. Scott. At each end of King William Street are good buildings, as those by Mr. J. Anson to the west, and one by Mr. Robert Kerr the National Provident Institution, in Gracechurch Street, at the east. But it is impossible here to give even the names of all the good new buildings that there are within a short distance of the Exchange and the Bank. There are three or four spots where several of them come into the field of view very effectively. Such points are the western end of King William Street; one of the crossing-places in the middle of the street, opposite the Mansion House; either end of Bartholomew Lane, by the Bank; the north-eastern angle of the Exchange, looking in any direction; and the eastern end of Cornhill. From the last-mentioned point is seen the National Provident Bank of England a building by Mr. John Gibson. The banking-room is the largest, and at the same time the most effectively treated room of the kind in the metropolis. In Lendenhall Street, in a building of very superior architecture, by Mr. Henry Curvey, are the offices of the Peninsular and Oriental Steam Navigation Company. In the same street is a building erected for the St. Andrew's Bank Company's office. On the north side of the Bank, in Tokenhouse Yard, there is a new building for the Auction Mart; Mr. G. Somers Clarke is the architect. At the entrance of the Yard and in Lenthbury is a building that is remarkable, not only as a reproduction of the Venetian Gothic, but as an illustration of what is a constant difficulty in the city of London, namely from the interference with light to adjoining properties. This building, completed with the front wall of the height intended, was arrested in progress, by injunction from the Court of Chancery; the side-walls could not be continued to the height of the front, and the roof had to be put on at the height which had been intended to be that of one of the floors. An alteration, involving a slight addition of height, has been made in the centre of the front of the Bank of England. The architectural effects from the different points referred to would be much superior to what they are, were not many of the older buildings, as the New Fire Office, and even later works, unaccountably discoloured by the London smoke.

In the western part of London, one of the most important buildings of late years is the Freemasons' Hall, in Great Queen Street, which is by Mr. F. P. Cockenell. Whilst height of the front is somewhat diminished in effect by the position of the chief horizontal lines, the details are most

of them remarkable for their freshness of study, along with cleanliness. In western London at Liffingdon, there is the Agricultural Hall, built chiefly for the accommodation of the Christmas cattle-show of the Smithfield Club, and used for other exhibitions, and for public meetings. The area of the hall is by far the largest covered space in London, or not counting the Crystal Palace. It is divided by iron columns, which carry the roof and galleries.

Theatre and places of public amusement.—During the last ten years some important additions have been made to the number of buildings for purposes of public amusement. The Covent Garden Theatre, erected in 1800 and remodelled internally about forty years afterwards, was burnt down in March, 1856, on the occasion of a masquerade. The present building was completed and opened on the 15th May 1856 having occupied but six months in the erection. It is capable of accommodating about 8000 auditors. On one side of the building is an iron and glass structure called the Focal Hall which was originally intended as a flower-market, and as an adjunct of the theatre on opera-nights. Mr. E. M. Barry was the architect of both buildings. Also belonging to the last ten years are the New Adelphi Theatre of the year 1838; the Pavilion Theatre, Whitehall, and the British Theatre, Hoxton; the Surrey Theatre, opened Dec. 26, 1855, on its completion (the old theatre was destroyed by fire on January 30, 1856) and the Holborn Theatre. The Britannia Theatre is remarkable for its plan, which is oval or elliptical, with the longer axis of the oval parallel with the proceedings and for the great dimensions of its gallery which will accommodate about 1000 persons. The Strand Theatre, and some others have been much altered internally. Some of the most important buildings used for purposes of public amusement are connected with a class of amusements not altogether theatrical. These are the reading-halls, of which the chief is the Athenaeum Palace (at present so called) in Leicester Square. The building was originally erected as the Panopticon Gallery of Science and Art and was one of many results of the Exhibition of 1851. It was designed as a reproduction of Saracenic architecture. Its most remarkable feature is a dome of 97 ft. diameter, covering a rotunda. There are two tiers of galleries to the rotunda, excepting where there is a recess, where now is the stage for performances. When first opened, the building was remarkable for the beauty of its unadorned decoration; these have been exchanged for very inferior work; but the building must always be regarded as an important one structurally. Mr. T. H. Levy was the architect. Since the change of purpose, needed improvements have been made in the staircases and exits, such as are still wanted in most of the London places of public amusement. A building in the Strand and Catherine Street, erected as the Strand Music Hall, is the most conspicuous of the new structures provided for the class of amusements which are in a certain extent antagonistic to those of the theatre. It is Gothic and very peculiar, not to say whimsical in some of the details though, internally, many of the details have merit. The interior was originally intended to be lighted on the exclusive principle or by gas-jets placed above a ceiling of glass. St. James's Hall, remarkable almost entirely for its interior is chiefly devoted to musical entertainments of a high class. It was completed and opened in March, 1856. The great hall is 136 ft. long 60 ft. wide, and of proportionate height. It is arched over with semicircular ribs of iron; and the construction is covered internally, and paneled, by rich decoration in colour and gold, arranged in a peculiar frame-work of lines, which intersect the ceiling diagonally, springing from slender shafts at the sides where the windows are. The building is lighted at night from star-shaped pannels; and the whole interior has a peculiar, but a highly satisfactory effect. Mr. Owen Jones was the architect. Following this building were other works by Mr. Jones, however, remarkable for the ceiling-decoration. This decoration in the London Crystal Palace Bazaar includes reproduction of one feature of the Moorish bath, namely admission of the light through star-shaped apertures in the ceiling. Of the public gardens mentioned in the previous pages both Vauxhall and the Surrey Zoological have come to an end. In the Surrey Gardens was erected, recently, a building of considerable importance, as a smoke-hall. After it had been injured by fire, it was

take and put in order for temporary occupation, by the governors of St. Thomas's Hospital—deposited of their building near the London Bridge Station.

Museum and Galleries.—The original text under this head now requires to be supplemented and corrected. To the British Museum has been added a noble reading-room. It is a circle of 140 ft. diameter, or 3 ft. less than the Pantheon at Rome. The space is covered by a domical vault, 160 ft. in internal height, this is constructed of great ribs and cross-ribs of iron, and filling in of brick and tile-work, all concealed. The dome is carried on piers of iron, thus the largest amount of space is left for books. The whole forms one of the most remarkable works of the class. The original suggestion of a building for the Reading-room within the central court of the Museum, was made by the late Mr. Hoare, architect; but his proposal was not for a circular room. Mr. Sydney Smirke, R.A. was the architect of the actual room. Of late years the collections the antiquities especially have received most important additions. These will extend a considerable extension of the Museum. Amongst them are sculptures from the celebrated Mausoleum, of Halicarnassus. In many respects equal in importance with the British Museum, is the South Kensington Museum at Brompton, in connection with which are the schools and head-quarters of the Department of Science and Art. This department was formed soon after 1851 and established at Marlborough House, whence it was removed in 1854 to Brompton, where at present are located the modern pictures of the national collections. Neither for its modern pictures, or others, does the National Gallery now deserve to be regarded as unimportant for number of the works contained in it, or for the excellences of them. Some large bequests, and many purchases, have been made. The former include an immense collection of paintings and drawings by Turner. Thus, the building in Trafalgar Square is to be remodelled or rebuilt, ground, partly occupied by the St. Martin's Workhouse, at the back of the present building has been purchased, designs have been obtained from several architects, and before these lines are in the reader's hands, a decision will probably have been arrived at. Burlington House, with an added wing and building at the back, will be the future home of the Royal Academy, whilst the ground attached will provide sites for buildings for the University of London, and for various scientific societies. The South Kensington Museum houses collections of several different kinds. There is a collection of educational appliances, a museum of inventions (this under control of the Commissioners of Patents) a collection of animal-products, collections of seeds of ornament, and one of the most valuable museums of furniture, and of other objects of decorative art, that there is in the world besides an art-library. These were some time housed in an iron structure, ugly, and discreditable to the Department, but considerable progress has been made with the erection of a more important group of buildings. Externally in the new building, much use is made of terra-cotta.

Near these buildings is a large area of ground that was purchased with proceeds of the Exhibition of 1861. Part of it is occupied by the gardens of the Horticultural Society. These gardens are enclosed by a screen of trees in ornamental brick work and terra-cotta, and at the northern end of the ground, are terrace a very cleverly designed conservatory by the late Captain Fowke, and a monument to commemorate the Exhibition of 1851, of which the chief feature is a statue of the Prince Consort. Part of the ground belonging to the Commissioners was in 1863 the scene of one of the most important events of the period we are considering. That was the International Exhibition of 1863. The building now cleared away (for with the exception of rooms looking out on the gardens which were the retirement rooms, and have been used for exhibitions of pictures, for a small museum and other purposes) covered about 25 acres, including the annexes which ran parallel with the side-walks of the gardens. The main building, or buildings, occupied 14½ acres. Skirting the Cromwell Road was the principal front, 1150 ft. in length of a brick building containing in the upper floor picture-gallery 50 ft. in width. This portion at least, of the building was intended to be permanent. Behind the outer inclosure were glass-roofed courts, and a nave 800 ft. in length, 75 ft. in width, and 100 ft. in

height, with transepts at the ends where there were glass domes of 180 ft. diameter and 250 ft. height from the ground to the top of the spires. The nave was lighted by clerestory-windows, it was spanned by arches the carrying the ceiling, and it was richly decorated with colors under Mr. Goss's direction. The museum was little more than a shed. The late Captain Fowke has generally been stated to be the designer; but he is known to have been largely assisted as by Mr. Messon in the iron-work. The picture-gallery has been quoted as models for those of the intended National Gallery, though they were dark even on fine days. The chief defect in the building was absence of all planning subsequent to the circulation of crowds, whereby there was so much confusion, that the advantages accruing from the Exhibition were greatly abridged.

This may be the fitting place to mention the Crystal Palace at Sydenham, which grew out of the Exhibition of 1851 and the decision as to the non-reconstruction of the 1851 building. The materials of the building in Hyde Park, removed, served for a considerable portion of the Sydenham structure. It was commenced in August, 1852 and was completed and opened on the 10th June, 1854. The most difference between the later building and the earlier, is in the adoption of the arched form of roof for the nave, combined with the projection of columns at regular distances for the support of the principal of the roof. There are three transepts, however in place of one whilst the centre transept is made of great width (180 ft.) moreover there are the new features of the terraces and fountains, the wings and the water-towers, besides the extensive grounds containing numerous objects of interest. The building is 1608 ft. in length or rather shorter than its predecessor. The height of the centre-transept is 184 ft. The Sydenham Crystal Palace was originally designed as a great educational museum of art and natural history and ethnology; and its gardens and fountains were to rival or surpass those of Versailles. This intention in the matter of art, was carried into effect by the provision of the finest collection of casts of architectural ornament and sculpture that there was in the world. These were brought together mostly by Mr. Owen Jones and Mr. D. B. Fry, who designed the principal 'sculpture'—Egyptian, Greek, Roman, Alabaster, Byzantine, Medieval, Renaissance, and Italian—and arranged the specimens in them. The Pompeian house was produced under the general direction of Mr. Wyatt, and the Assyrian court under that of Mr. Lyster and Mr. Ferguson. The paintings in the Pompeian house were produced under Signor Albani's direction. Mr. Bonomi assisted in the Egyptian court. Mr. Waterhouse Hawkins produced the various figures of extinct animals in the grounds. No expense was spared to secure accuracy. The courts appropriated to manufactures were designed by various architects. The principal objects of interest in the Palace are described in a valuable series of handbooks, by Messrs. Owen Jones, Wyatt and Waring, Schuff and others. Of late years music has taken an important place in the arrangements of the Palace, and an orchestra, extending over the entire breadth of the centre transept, was constructed previous to 1863, for the great Handel Festival of that year. Of late, however, entertainments of merely amusing character have been largely introduced. But at the same time lectures and classes have been instituted there has been an excellent library and reading-room, and the exhibition of objects of interest has been sedulously attended to, and thus the Palace has been so much appreciated as to have been a chief cause of the growth of the suburban district connecting London and Croydon, and which is comprised of Sydenham, Norwood, Anerley, Forest Hill, Dulwich, and other places. On Sunday the 30th December, 1858, a fire was discovered in the north end of the building called the tropical department, and in a few hours the whole of that portion northward of, and including, the north transept became a heap of ruins, the Alabaster and Byzantine courts were seriously injured, and the library, the Indian museum, and other collections, and the more valuable zoological specimens, were destroyed, and thus notwithstanding the vicinity of the water-works of the Palace.

Whatever the satisfaction of shareholders, with their property, the example of the Crystal Palace has been sufficient to induce the erection of a somewhat similar building on the

northern side of London, with its railway leading to it. This latter building is the Alexandra Palace, at Muswell Hill. The materials of the Exhibition building of 1862 have been turned to account in it, under the hands of the architect, Messrs. Alfred Watson and John Johnson. Like the Sydenham building, the Alexandra Palace consists of a nave and three transepts, but in other respects it is very different, and its entire length is not more than 900 ft. At the intersection of the nave and cross-transsept is one of the domes of the 1862-building. The different parts have more architectural character than have the bare and glass fronts of the Sydenham Palace. It is said to be far more elegant (March, 1867) but may not be so good as 1862.

Markets.—With these requisites of a town, London remains ill-supplied, and each description of food is subject to great addition to its price in the passage through the hands of the retailer to those of the consumer. For some reason not apparent, the few markets that there are apart from the localities of Newgate, Billingsgate, Leadenhall, and Covent Garden have been but partially successful and one, Hungerford Market, has been extinguished altogether. Newgate and Leadenhall Markets are so much out of sight, and are so inconvenient, that by the bulk of the people non-resident in the City they are never resorted to directly. Some steps to improvement, however, have been taken in the City. Newgate Meat Market is about to be removed to Smithfield, where it will occupy a portion of the ground that was occupied by the Cattle Market, before the latter was removed to the Caledonian Road. The site of the new Meat Market extends over the line of the Metropolitan Railway. Meat is now brought to London in large quantities by railway. Trucks from the Great Western Great Northern, and other lines will pass under openings in the floor of the market, and their contents will be raised. Mr. Horace Jones is the architect of the new building. The market in the Caledonian Road was designed by the late Mr. J. B. Bunning, City Architect, and prosecuted by Mr. Jones. It was opened in 1855, cost nearly £600,000 and occupies 74 acres.

Prisons.—Considerable improvements have been made in the interior of Newgate; and Giltspur Street Compter has been removed. Changes in the law have led to the closure of some of the debtors' prisons including the Queen's Bench; whilst the Fleet Prison has been pulled down. A new City Prison, a structure of castellated character, was erected at Holloway in 1853-5, Mr. Bunning being the architect. It provides for 400 criminals. Brixton Prison at Brixton Hill provides for female criminals.

Hospitals.—Important additions have been made to some of these, as Westminster St. George's, and the Royal Free Hospital; and several new buildings have been erected. The latter include a new King's College Hospital; St. Mary's Hospital, Paddington; the Great Northern Hospital, in the Caledonian Road; the Cancer Hospital, in the Finsbury Road; the German Hospital, Dalston; and the Small-pox Hospital, Highgate Hill, but each of them will be of far less importance than the new St. Thomas's Hospital, before referred to as commenced on ground reclaimed from the river on the Lambeth side opposite the Houses of Parliament. It will consist of several buildings or pavilions, 125 ft. apart, buildings connected nearly by a corridor of communication, and is likely to be the most important example in England of the pavilion-principle of hospital-arrangement, and one the more remarkable from the circumstances of the outlay advisedly made in obtaining ground of the extensive area required. The old site of the hospital, and the buildings, were purchased by the Great Northern Railway Company for £250,000.

Courts of Law.—Although no improvement in these has been carried into effect, the measures commenced are of great importance. It has been determined to remove the courts from Westminster Hall, and to concentrate the whole of the courts on ground near Temple Bar, bounded on the south by that part of the line of the Strand which is called Fickett Place, and on the north by Carey Street. The group of buildings will exceed in dimensions that of the Palace at Westminster, and is likely to occupy many years in the erection. The principal floor of the courts is to be reached from the Temple by a bridge, substituted for Temple Bar, and from Lincoln's Inn by a bridge across Carey Street. Designs have been received from several architects, and publicly ex-

hibited, and an amount of pains altogether unprecedented has been taken towards insuring that the building may be complete in every respect.

Places of Worship.—Additions to the churches of London have been so many in the last ten years, especially in the suburbs that they cannot be here enumerated. Nearly all, if not all, these buildings are Gothic in the character of their architecture; but many of them exemplify changes that have taken place in the models studied by architects. Especially there is an infusion of the continental Gothic in their general forms and details. They also exemplify what is progress made in the treatment of different materials of building and decoration with regard to their physical properties. Were it allowable to single out one of the new buildings, the church of All Saints, Margaret Street, should be named as one of the most costly whilst in great part built of red brick. It was commenced, however, in 1850; though it was consecrated only in 1859. The cost was upwards of £60,000. Mr. Butterfield was the architect. The church built for Miss Burdett Coutts (Mr. Farrey architect) in Rochester Row, Westminster, is more English in character but is also remarkable for its internal decorations. Of later churches, and built of brick in a decorative and costly manner may be mentioned the church of St. James the Less, in Garden Street, Westminster by Mr. Street, and the church in Baldwin's Gardens, Gray's Inn Lane by Mr. Butterfield. A commencement has been made with coloured decoration of St. Paul's Cathedral, and the area beneath the dome is now periodically appropriated for services for large congregations. Of the places of worship not belonging to the Established Church the most important is the Apostolic (or Irvingite) church in Gordon Square, which can only be compared with an Early English Gothic cathedral for its plan, its dimensions, its character, and its amount of decoration. It was designed by Mr. Raphael Brandon. Each of the denominations has been active. Gothic is usually the style of architecture, but in the chapels erected by the Baptists are exceptions. One of the earliest of their buildings which may be here necessary to notice, was the Bloomsbury Chapel by Mr. Gibson. It has two towers and spires, and is in the Etruscan or Lombard-Romanesque style. Regent's Park Chapel constructed in the building which was occupied by the Duchess in Regent's Park, is Byzantine whilst the Tabernacle Newton Buzs, erected for the Rev. C. H. Spurgeon, at a cost of about £20,000 and said to be capable of accommodating 5000 persons or more, has a classical portico.

Schools.—These would require an extended description as the churches. The most noteworthy building of the class is that of the St. Giles's Parochial School, in Endell Street, by Mr. E. M. Barry. The St. Martin's School, in Castle Street, by Mr. Wylid, are Moorish in style, and of brick.

Hotels.—Amongst the conspicuous buildings lately erected in London are some of these. Two of the hotels in connection with railway stations have been already mentioned. Also connected in some manner with railways, are the Great Western Hotel, at Paddington; the Great Northern Hotel, at King's Cross; the Grosvenor Hotel at Finsbury; and the International Hotel at the London Bridge Station. Besides these, there are the Langham Hotel at the south end of Portland Place, the Westminster Palace Hotel in Victoria Street; and the Salisbury Hotel, in Salisbury Square, Fleet Street. The Grosvenor, the Westminster Palace, and the Langham, are the most important architecturally. The Grosvenor Hotel, of which Mr. J. T. Knowles was architect, is remarkable for internal as well as external decorative effect,—a fine staircase and entrance-hall being a feature. There is a similar feature in the Westminster Palace Hotel. Each one of the new structures has a considerable number of stories; and to avoid fatigue of ascent to upper rooms, a baggage-lift and an elevator room, worked by water-power, are provided, in addition to the staircase. There are also numerous lifts for the service, and other contrivances not before introduced in hotels in this country.

Private Houses.—Perhaps the most important private residences erected in London of late years, is the house of Mr. Holford in Park Lane, of which Mr. Villanue was architect. In Finsbury several houses conspicuous for their architecture have been built, commencing with the residence of the late Mr. H. T. Hope, which was designed by a French

architect. The number of later works includes the house of Baron Rothschild, by Messrs. Wilson and Jones, and an adjoining house by Mr. J. F. Cole. Each of these is of one or other version of Italian architecture and stone-fronted, and the last-mentioned of the number is remarkable for the careful study of its details. In Whitehall a large mansion has been built on the site of Montagu House, by the Duke of Bedford. Mr. Burn is the architect. The architectural features in French-Italian. The Gothic decorative character, for residences, is chiefly to be seen in small houses in the suburbs of London but it has been adopted in the immediate neighbourhood of Westminster Abbey, as by Mr. G. G. Scott R.A. During the year 1866, and in that in which we write, there has been going on the reconstruction of the entire quarter extending with hardly a break, from St. George's Hospital to the Victoria Station. The ground forms part of the property of the Marquis of Westminster. The houses are on a greatly increased scale, as compared with those displaced since it is no longer the vehicle of attempted decoration and in general style and character wherein the influence of French models is obvious the buildings form the largest and the best contribution to London domestic-architecture that has been made in any similar space of time.

The working-classes of London, and the very poor remain most inadequately provided with places of residence, though several groups of combined dwellings have been erected by private individuals, trustees and companies. The most extensive of these are due to Miss Burdett Coutts and to the action of the trustees of the munificence of Mr. Peabody, an American citizen. But the most important recent steps towards actual solution of the difficulty under which more than any other London labourers may be attributed to Mr. Alderman Waterhouse his formation of the Industrial Dwellings Company. By this company several blocks of buildings have been erected on the same plan. The front doors of the tenements of each story open from an external gallery, the upper galleries being reached by a common staircase. All that has been yet done, however, goes but a short distance in provision proportionate with the need.

Squares and Monuments.—Some additions have been made to the public statues of the metropolis besides the statue of Richard I. already noticed. A statue of Sir Charles J. Napier and that of Henry Havelock have been placed in Trafalgar Square, but it cannot be said that either work is creditable to the country. A seated figure of Dr. Jenner which was for some time in the Square, is now removed to Kensington Gardens. The Nelson Monument has been completed by the addition of the four couchant lions, cast in bronze, from models by Sir Edwin Landseer. In Waterloo Place a mammal has been erected to the Guards who fell in the Crimea. It takes the form of victory crowning the heroes—three-dimensionally modelled figures at the base. In Waterloo Place also is a statue of Sir John Franklin, the Arctic explorer. Some progress has been made with the erection in Hyde Park of a national testament to the late Prince Consort. It will be Italian-Gothic in character, and will be profusely enriched with sculpture and ornamentation, the best that the state of the arts in this country can accomplish. A monument to Sir Hugh Middleton, who brought the New River water to London, has been erected on Islington Green, and there may be other commemorative erections, belonging to the last ten years, in the metropolis. Amongst them is the Westminster German Memorial, in the open space at the western end of the Abbey. During the same time a great number of drinking fountains have been erected. All of them attempt decorative character but usually the opportunity is lost.

Of the London events of late years, the International Exhibition of 1862 has been already alluded to. In June, 1861 occurred, at Finsbury Street, the largest fire that there had been in London since the Great Fire of 1666. The property destroyed was valued at a million and a half sterling; and the ruins were still smouldering seven weeks after the fire commenced. In 1864, on October 1, there was a great explosion of gunpowder in the City Marshes, which blew into the river about 120 ft. of the embankment by which the Thames is kept from flowing over the land; and portions of the low lying districts of south-eastern London were for a time placed in some jeopardy. Fortunately the tide was low; every

appliance of labour was at hand,—including the men of the sewerage-works, and the military at Whitehall, and the danger was averted but in a manner that was very remarkable.

LONDON [add.], a town, British America, Canada West, cap. of Middlesex, on the Thames, here crossed by several bridges, and on the Great Western railway 103 m. W. & W. Toronto. It is regularly laid out in wide streets intersecting each other at right angles and is remarkably well built. Among its public edifices, several of which are handsome, may be noticed the English church a Gothic structure with a chime of bells. There are ten other churches, one of them a R. Catholic cathedral and several superior schools. The manufactory mainly agricultural implements, carriages, pumps soap, leather &c.; and the trade is extensive, particularly in wheat and other agricultural produce. Pop. about 16,000.

LONG ISLAND, West Indies, Bahamas, intersected by the tropic of Cancer forms a long and narrow belt stretching 67 m. between S. E. by S. and N. W. by W. but where broadest is only 24 m., and in several places scarcely 1 m. in width. Its inhabitants amounted in 1857 to 1600. Of these about 140 reside at Clarence Settlement, which is situated on the E. shore and has a harbour which admits vessels drawing 13 ft. but is imperfectly sheltered.

LONG ISLAND [add.], U. States forming a part or dependency of New York, derives its name from its shape, which stretches from E. to W. for about 130 m. and has an average breadth of not more than 14 m. On the E. and S. it lies open to the surges of the Atlantic on the N. it is washed by Long Island Sound which separates it from the S. shore of Connecticut, and on the N. W. and W. it is washed by East River, New York Bay, and the Narrows contributing with them and the opposite coasts to form the splendid harbour of New York. Its coast is deeply indented by numerous bays and inlets abounding with shell and other fish, and has been provided with an excellent system of lighthouses on the track of the vast commerce which passes along its shores. Its surface, though nowhere elevated is much diversified. A ridge, which has its highest point in Harbottle Hill at the head of Hempstead Harbour, stretches obliquely across the island from N. to E. and sends out a number of spurs on either side.

To the N. the descent is generally rugged and steep, but to the S. is so gentle and gradual as to have all the appearance of a plain. Much of the level tract is of a sterile character and so ill rewards those who attempt to cultivate it that 16,000 acres of it, having only a covering of coarse grass, are used as common. A still larger tract, forming nearly a half of the whole area is still occupied by the primeval forest. The only stream of any consequence is the Peconic which has a course of about 10 m., and furnishes water-power to numerous mills. In these localities where the soil is fertile, it is generally under high cultivation, and yields profitable returns as market gardens for the supply of New York. For administrative purposes Long Island is divided into three counties, one of which King's co. has for its cap. Brooklyn, with a pop. of 266,681, while the other two, Queens co. and Suffolk co. have towns with populations varying from 6000 to 10,000 each. The inhabitants not only possess ample means of communication with the opposite mainland, from their proximity to the sea, but have been provided with a railway which passes through nearly the entire length of the island, and a series of branch lines, giving easy access to every locality within its limits of any importance or interest.

LONG POINT, a town, British America, Canada East, cap. of Hochelaga, 1 bank St. Lawrence, 6 m. N. W. Montreal, with a R. Catholic church and some lumber trade. Pop. about 1000.

LONGUEUIL, a town, British America, Canada East, co. Champlain, 1 bank St. Lawrence, 8 m. from Montreal, on the Grand Trunk railway. It possesses a small-ship court, a R. Catholic church, academy and convent, and carries on some trade, partly general, but chiefly in firewood. Pop. about 8000.

LONIGO [add.], a town, Italy, Venetia, prov. and 14 m. S. E. W. Vicenza, on the Go. It is surrounded with walls, at the seat of a court of justice and several public edifices, has five churches several palaces built by Palladio and Scamozzi, an institute of the Sisters of Mercy, an hospital, a theatre, and a printing-office. Pop. 7902.

LOO-CHOO, or Loo-Kiu (Guzar), the largest of the group of islands of same name in the N. Pacific, intersected nearly in its center by the parallel of 35° 30' N. and the meridian of 131° E. It is about 56 m. long, by 10 or 12 broad and is of very irregular shape, considering mainly of four peninsulas.

LOODIANA a dist. India, Cis-Satlej territories, between lat. 20° 34' and 31° 2' N., lon. 70° 25' and 77° E.; is bounded N. by the Jullunder Doab, from which it is separated by the Setlej E. Umballa, B. the native state Patiala, and other petty protected states; and W. by Ferozepore area, 724 sq. m. pop. 121,000. Both area and pop. have given though officially returned, are believed to be greatly understated.

LOODIANA, the cap. of the above dist., 125 m. N. W. Delhi, stands on the W. brow of an abrupt bluff, about 80 ft. above a salina which becomes a considerable stream in the rainy season, and discharges itself into the Setlej about 15 m. below. It is poorly built, has no wall and is only defended by a fort of no great strength, though its position, on one of the great routes from Delhi to the Panjab, makes it strategically important. A large proportion of the inhabitants are Mahomedans but there is not a single mosque deserving of notice. The most to be owing rather to indifference than to poverty, since many of them are wealthy capitalists and bankers with connections in many of the leading towns of India. The manufactures are important, and consist chiefly of fine shawls, made to imitate those of Cashmere, and, though far inferior to them, commanding a ready sale from their greater cheapness, and of a coarse and very strong cotton cloth much used for clothing by the poorer classes, and suitable also for tent-cloths. Loodiana has also a very extensive transit trade. The majority of the inhabitants is said to be at the lowest possible ebb. Pop. 20,000.

LOONEN, or Loun a river, India, which rises in a marshy tract W. of Peshwar in Affgha, about lat. 33° 37' N., lon. 74° 48' E. flows S. W., nearly parallel to the base of the Aravalli range, which feeds it by numerous torrents, passes through Jodhpur and after a course of about 300 m., falls into the Bann of Cutch by two mouths.

LOPATZ a m. Austrian empire, Galicia, circle Zlensow cap. dist. of same name, pleasantly situated N. W. Brody. It is an ancient but thriving place, was once fortified and has a fine baronial castle. Pop. 1500.

LORD HOWE, an isl. Australia, about 550 m. E. of Port Macquarie in New South Wales, lat. (Mount Gower) 31° 20' 30" S., lon. 159° 5' 12" E. It is the southernmost of the outlying islands and reefs off the E. coast of Australia, and forms an irregular curve about 5 1/2 m. long by 3 to 1 1/2 m. broad. It is of volcanic origin, and has a mountainous surface, which rises abruptly to Mount Gower its culminating point to the height of 2524 ft., but is well wooded, and has a good deal of fertile low land. In 1854 it was inhabited by between thirty and forty persons, who had settled upon it, and gained a good living by bartering their produce, chiefly pigs, goats, poultry and vegetables, with whalers and vessels bound to and from California.

LORETE a m. S. America, Ecuador, on a beautiful plain above the basin of the Sarac, on west of the Napo, 103 m. E. S. E. Quito. It was formerly a city of some consequence, but has dwindled down into a comparatively insignificant village, inhabited by about 250 families of Indians.

LORETO a m. Mexico Lower California on the E. shore of the Gulf; lat. 28° N., lon. 111° 20' W. It was founded in the beginning of the eighteenth century, and from the possession of a wonder-working image, soon became the most celebrated place of pilgrimage on the peninsula. The fame of the wealth accumulated in its church subjected it to a visit from Buccaneers, who, after pillaging it of its treasures left it in ruins. It seems however, to have preserved the wonder-working image of the Virgin and the church, a long and narrow but lofty structure, in the form of a cross, has its walls covered with the votive offerings of pilgrims.

LORETTTE, a m. British America, Canada East, co. and about 6 m. from Quebec, with a R. Catholic church, several schools, and a considerable trade in paper, sugar, and lumber. Of the pop. forty families are Indians, who have their own church, and employ themselves in making moccasins and snow-shoes. Pop. 2300.

LOS RANOS, a m. Philippine Isles, prov. Laguna, in the island of Luzon, near the S. shore of the Laguna de Bay, and at the skirt of Mount Marigaling. It takes its name from the hot springs which were first brought into notice by Franciscan monks, who built a convent and an hospital in their vicinity. The town has a pop. of about 1800, who subsist chiefly by fishing, the ground around being so barren that the grain used must be imported.

LOSING (GEMAR), a m. Austrian empire, Hungary, co. and about 12 m. S. E. Oedenburg; with an old castle, a trade in wine, and 1280 inhabitants.

LOSNITZA a m. Turkey in Europe Servia, cap. circle Pehtria, on the Drina, 59 m. S. W. Belgrade. It is protected by a palisade, a species of palisade formed by trunks of oak-trees, is the seat of a court of justice, and has a church, a school, and important yearly markets. P. 1500.

LOSONETZ, a m. Austrian empire Hungary, co. Neograd, 25 m. N. E. Balassa Gyarvath. It is an ancient place, which was once walled in the seat of a district court, and several public offices, contains a chalybeate spring with baths, chemical and vinegar works, a tannery much-frequented yearly markets, and 3399 Magyar inhabitants.

LOTHIERIE, a m. British America, Canada East, cap. co. of same name, 1 h. back St. Lawrence, 30 m. N. W. Quebec. It possesses a R. Catholic church a foundry, and several tanneries, and a manufacture of superior kitchen and other stoves, and carries on a considerable trade in flour and lumber. Pop. about 3700.

LOUIS (SAINT) [add.] a m. U. States, Missouri on r. bank Mississippi, 50 m. below the point where the Missouri joins it. It occupies an elevated site, defended from the floods of the river by a bench of limestone, and is built on two terraces, the lower one rising abruptly, and the other by a gradual ascent, after which it spreads out into a wide and beautiful plain. It is laid out with considerable regularity the lower terrace on the lower terrace running parallel to the curve of the river while elsewhere they form straight lines, and are intersected by others at right angles. Levee Street, fronting the river, is 100 feet wide, most of the others are 60 ft. The houses generally and more especially the warehouses and public buildings, are substantially built of brick or stone. The principal public buildings are the city-hall the court-house, the custom house, and post-office, 70 churches, among which are a fine cathedral, and some other handsome structures; the L. States arsenal a large and imposing edifice surrounded with fine grounds, the merchants exchange, the mercantile library hall the city hospital, the marine hospital, the St. Louis university under the direction of the Jesuits, with 38 professors and 184 students; the Washington university the commercial and medical college, the normal high and other schools. The industrial establishments include numerous saw mills, sugar refineries, oil-mills, distilleries, chemical works, iron-smelting works, foundries, machine works, tobacco, rope, and haggling factories. The staple articles of trade, in addition to those furnished by the above establishments, are fur, bird, beef, and other provisions, chiefly pork, which in 1880 was shipped to the amount of 100,000 barrels, 19,000 salt and beef-cakes, and 700,000 pieces. The position of St. Louis on the Mississippi, as well as numerous railways connecting it with all parts of the country make it a most important general entrepot, not only for Missouri and the adjoining states, but for the gold region of Colorado, with Utah, Nevada, and California. The first brick house in St. Louis was built in 1815, and a steamer reached it for the first time in 1817. When it received its charter of incorporation in 1822, it had scarcely 5000 inhabitants, in 1830 it had 190,773, of whom 1542 were slaves.

LOUISVILLE [add.] a m. U. States, Kentucky co. Jefferson, at the Falls of the Ohio, and on several railways which give ready means of communication with all parts of the country. lat. 38° 15' N.; lon. 85° 48' W. It occupies an extensive flat about 75 ft. above low-water mark, and consists of wide well-wooded streets, which cross at right angles, and are lighted with gas. The main street is about 3 m. long and remarkably handsome throughout. The streets occupied as private dwellings are, for the most part, lined with shady trees. The principal public buildings are a fine court-house which cost above \$200,000, a city-hall, a jail,

a custom house, 80 churches and 2 synagogues, 12 very handsome public schools, a blind asylum, 23 marine and 8 orphan asylums, a house of refuge, and 4 spacious market houses.

The literary and scientific institutions are numerous. Among which, as the most important, it will be sufficient to enumerate tobacco and cigars, which employ above 1000 hands, and require, for storing and sale, three immense warehouses, capable of containing 7000 hogheads, and are annually disposed of to the value of half a million sterling; machinery, in which above 800 hands are employed, lumber, which is prepared by 12 planing and saw mills stove and hollow ware, leather, and leather articles, as saddlery, harness, and trunks ropes and cordage, soap and candles, marble and stone cutting, agricultural implements, cotton and woolen cloth, brass and iron castings, pianofortes, beer flour &c. The commerce, of which the estimated annual value exceeds £20 000 000, comprises among its exports every species of western produce and manufactures, and more especially pork and other products of the hog, for the preparation of which there are 9 pork-packing establishments, employing 1200 hands and a capital of over £400,000. Lourenville, which was founded in 1780 received its name in honour of Louis XVI. who was then aiding the Americans in their struggle for independence. For nearly twenty years it was almost proverbial for unhealthiness but a different opinion now prevails, and American writers speak of it as now 'perhaps the healthiest city of its size in the world' Pop. (1860), 69 083

LOURENÇO MARQUES a Portuguese settlement, E. Africa, Delagoa Bay, on the N bank of the English River at the foot of the high red cliff forming the S and E face of Point Barbin; lat. 26° S lon 33° 30' E. It is a miserable-looking place, filthy in its streets, defended by a worthless fort, and consisting of a square of equally-looking houses surrounded by native huts, the dwellings of slaves. It is very unhealthy. Lourenço Marques is the S. limit of the Portuguese possessions.

LOVÁSZ-FATONA a tn Austrian empire Hungary, co and about 22 m N W Vasvár, with a castellated mansion, and a trade in sheep, wheat, wine, and wood. Pop. 1640

LOVATZ, a tn Turkey in Europe, Doljina, eyalet and 95 m, S.E. Widin, on the Danube, which is here crossed by a covered bridge. It contains 16,000 inhabitants partly Christian, partly Muselman.

LOVETZ, a tn Austrian empire, Transylvania, circle and about 80 m. N N E Udvarhely with ironworks on a rather limited scale a mineral spring and a bathing establishment. Pop. 2277

LUBANG, an isl Philippines Isles, is the largest of a group about equidistant from the S W shore of Luzon and the N W shore of Mindoro. The interior is mountainous, but the soil, formed apparently by the disintegration of volcanic rocks is fertile and produces in abundance rice, cacao, coffee, and pepper. The coast is much frequented by turtles. Lubang contains a town of same name, with a pop. of 6040. Ambul, an inlet of the group, is an active volcano.

L. BATSCROWITZ, a tn Austrian empire, Moravia, circle and 12 m N E Hradisch on a slope of the Carpathians, with a parish church a castle, and a mineral spring the water of which strongly resembles that of Seltzer, and attracts numerous visitors. The ruins of the old castle of Swintau stand on a height in the vicinity. Pop. 1000

LUBEN (Gazak), a tn Austrian empire Galicia, circle and 18 m. S. Lemberg with a fine castle, much-frequented sulphur baths, and 1800 inhabitants

LUBLÁ (Oto and New), two places Austrian empire, Hungary, co Eper-Art or Old Lublow one of the Eper royal towns situated 18 m. N by E Leutschau contains 2000 inhabitants, is the seat of a court of justice, and has a high school and an active trade to Poland and Silesia. -New Lublow, about 3 m from the former has 1000 inhabitants 2 mineral springs, and a much frequented bath.

LUCHMUNGU, a tn British India -1, A. tn. Rajpootana, Ulwar 70 m S W Delhi. It is defended by a fort, which makes an important figure in the early Indian wars, and in particular stood a siege which Nujee Khan who conducted it, was compelled to raise -3 A. tn also Rajpootana, terr-

tory Shikawatie, 154 m. S.W. Delhi. It is a handsome town, built on the model of Jajpore and possesses a fort, which is perched on a lofty eminence, and forms a conspicuous object over the country.

LUH LE-HEEN, a vil China, prov Chekiang, about 3 m. from Keesoo at the terminus of a canal connected with those which ramify all over the plain of the Yang-tse-kiang. It is a small bustling place, with a good deal of transit trade, and is chiefly remarkable for the number of tea-shops and other houses of refreshment which it contains.

LUHWANG an isl on the E. coast of China, the largest in the S W part of the Chinese Archipelago, is 84 m. long between N W and S.E. and 6 m. broad at its widest part. In the S.E. there is a central bare hill which rises to the height of 505 ft. and in the S.W. are five high peaks, one of which is 910 ft. above the sea, but otherwise it is not much elevated. On its S. face are two deep indentations with sandy bays the access to which is unobscured by a reef. The surface is well cultivated and maintains a large population.

LUKOS, or Et. Kos [add] a river, N Africa, Morocco, rises in the N W of the state, on the slopes of the Little Atlas, flows W through a beautiful valley and after a course of about 100 m falls into a small bay of the Atlantic, near the town of El Arach. The bar at its mouth has only 5 or 6 ft. at low water, but the tide having a rise of 9 to 12 ft. enables vessels of a moderate size to enter thence the navigation for a considerable distance is easy the depth within the bar increasing at once to 24 ft.

LUKOYANOV a tn Russia, gov and 90 m S by E. Rygel Novgorod cap circle of same name on the Tash. It has two churches, a circle school a charitable endowment, and manufactures of polish and of articles from haiden bark. Pop. 8560

LUNAWAURA a small state India in the Rewa Canna division of Gujarat lies between lat 22° 50' and 23° 16' N lon 73° 21' and 73° 47' E. and is bounded N by the Mhye Causta territory N. South and Barroth, S Godrah, and S.W. W. Balasore length and breadth each nearly 20 m. It is a continuation of the mountain tract which forms the N.E. boundary of Gujarat has mainly along the N. face of the Mhye, and is adjacent to some important passes. Its revenues derived chiefly from land falls about of £10 000 and of this amount a fifth is payable as tribute, chiefly to Koodah, but partly also to the Gulowar and the Rajah of Balasore.

LUNAWAURA, cap. of the above state situated in the fork formed by the junction of the Panam with the Mhye, 55 m. N by E. Baroda. covers an area about 8 m in circuit, is surrounded by a wall and defended by other works, and is the entrepot for a considerable transit trade between Malwa and the interior of Gujarat. Many of the inhabitants are artisans of repeated skill in their particular trades.

LUNDA, or MALINDA, a tn S.W. Africa, Kibundu country, territory Labollo, about 120 m S.E. Loanda. It crowns a rocky height, whose base is washed by a mountain torrent is the seat of an independent chief, and contains 1500 inhabitants who suffer much from the incursions of their more barbarous neighbours in Kibela and Balundo.

LUNGA, a tn. S.W. Africa, Kibundu country territory Ganda, a little above the confluence of the Omamini with the Katumbela. It crowns a lofty height, is surrounded with a dry stone-wall and contains 1900 inhabitants who were not employed in plundering, collect a little gum-resin from the trees which grow abundantly in the surrounding forests.

LUNY KE, a river China which is said to have its sources in prov Nganchoo in the far west, near Teh mudi-shan, the highest mountain of this part of China, and flows E. to Hoo-chow-foo, where it is a wide and deep river and apparently empties itself into the network of canals which cover its extensive plain. On all the flat lands on its banks, on a higher level than the rice fields, military plantations form the staple crop. Lun-ke is navigable by large boats for 20 m above Hoo-chow-foo.

LUPATA a range of hills, E Africa, Portuguese settlements on the Zambezi, about lat. 16° 34' S., lon 27° 51' E. Portuguese writers used to speak of it as a mountain chain chiefly composed of marble, and so lofty as to be partly

covered with perpetual snow. The truth is that its height above the plain where it is cut off by the Zambezi, is under 1800 ft., and the rock is compact siliceous schist of a reddish color and in thin strata. The W. side, which is the most abrupt, rises up perpendicularly from the water 800 or 700 ft. the E. side, which is much less precipitous, has its slope covered with brush. From the Zambezi the rugged strata rise to a considerable way into the Mangoch country, and then bending round terminate in Mount Morumbah, opposite Sena. On the S. side of the river the range reappears, and following a more direct line than on the N. side is said to terminate in Mount Gorongosa. The rocky precipices overhanging the Zambezi, where it seems to leave out its way through the range, is known by the name of the gorge of Luyana. It is somewhat barren, and from 500 to 500 yards wide.

LUBIANA a tn. Italy Veneto, prov. and 16 m. N. E. Venice, with a parish church, extensive manufactures of Venetian straw-hats, of which it is the principal seat, and 3673 inhabitants.

LUNSEKE-GANGUELLA, a small territory S. W. Africa, about lat. 11° S. and lon. 17° E., situated immediately beyond the S. frontiers of the Kimberley country and inhabited by a people of the same name. The area is estimated at nearly 6000 sq. m. Nearly the whole consists of fertile plains watered by the river, which traverses it from N. to S. The people, who are peacefully disposed, supply themselves in cultivating the ground, rearing cattle, and collecting bees wax, which is furnished in abundance by the wild bees of the forests. They are governed by several independent chieftains, of whom the two most powerful rulers respectively at Lunseke on the Kamea, containing 1500 and at Lebenda, containing 2000 inhabitants. Pop. 120,000.

LUTA N'ZIGE, or **ALBERT NYAKA**, a lake E. Africa, the head-water of the western branch of the Nile (Sudd-el-Arab or White Nile) (see immediately) between lat. 2° S. & 3° S., and with its N. extremity in about lon. 31° 30' E., and its S. W. end in about lon. 28° E. Its general direction is from N. E. to S. W., its length about 400 m., and its greatest breadth 100 m. 2448 ft. above the level of the sea. It was discovered in March, 1864 by Mr. (now Sir S. W.) Baker who came upon its W. side near the village of Yacoba about lat. 1° 18' N. lon. 30° 50' E., from that point, about 1600 ft. above it, the lake presented a vast expanse of water with a bareness barren on the E. and S. W. and on the W. at 50 or 60 m. distance, blue mountain ranges rose to a height of 7000 ft. above its level and appeared to spring abruptly from the water. The western shore is completed in the great kingdom of Malaga, the people of which cross the lake in large canoes at its narrowest part and S. of Malaga is a country named Yeti, beyond which nothing is known. The eastern shores of the lake are occupied from N. to S. by Chapi Unyoro Uganda, Utumbi, and Kangwé. From the last locality, in about lat. 2° S., the lake is said to turn suddenly to the W., and to continue in that direction for an unaccounted distance. N. of Malaga on the W. side of it, is a small country called M'Caroti, then Kaka on the W. side of the Nile, at its exit from the lake, and on the E. side of the Nile is Maki, opposite to Kaka. The lake is a vast depression far below the general level of the country surrounded by precipitous cliffs, and bounded on the W. and S. W. by great ranges of mountains. Receiving as it does the drainage of these high lands—Mr. Baker distinguished two waterfalls which must have been large streams in the western hills—its apparently most important affluent is the Somarat River or Victoria Nile, from the E. which issues from the Elgon Falls, at the N. end of the Victoria Nyanza of Speke and after a N. W. course to the Kanyas Falls, about lat. 3° 15' N., turns W. and from this point runs east a series of rapids and cascades, with a total descent of 1276 ft. In rather more than 60 m., and falls into the lake near its N. E. end, at lat. 3° 13' N.; lon. 31° 50' E. and only 80 m. from the point at which the Nile issues. Thus draining, as it appears to do, the Victoria Nyanza and all the country W. of it, the Luta N'zige seems to be the true head water of the W. branch or White Nile.

The shore or that part of it near by Mr. Baker, consists in some places of bits of mud and beach, perhaps a mile in breadth from the water to the base of the cliffs; at others

steepens heights of 1800 ft. ascend sharply from the water. These precipitous cliffs are all primitive, frequently of granite and gneiss, and capped in many places with red porphyry. In the cliffs are beautiful overhangs of every description, including great amphitheatres, and by every rivulet or spring from the wild data. For its N. extremity the lake narrows to 15 or 20 m. across, and the appearance of the country to the N. of it is that of a delta. The shores on either side are choked with vast banks of reeds, though the water is deep, no bottom being touched at 20 ft. hills of about 4000 ft. rise above this part of the lake on the W., a continuation of the more southerly chain, but they decrease in height towards the N., in which direction the lake terminates in a broad valley of reeds. At the embouchure of the Somarat River there is the most accumulation of floating reeds bounding the channel, here half a mile broad, and with a very sluggish stream; the last cataract occurring at a considerable distance up the river. As seen from the village of Malaga, at an elevation of about 250 ft. above the mouth of the Somarat the course of the Nile in its exit from the lake was easily distinguished by the valley of green reeds that marks its course. This valley, from 4 to 8 m. broad, is bounded on the W. by a continuation of the chain of hills which forms the W. boundary of the lake. Canoes navigate the Nile in its course from the lake to the Madi country, as there are no obstacles in that distance but beyond this point rapids commence and prevent navigation.

The lake abounds with fish and crocodiles and hippopotami. Infant its shores the country bordering it also is much frequented by elephants. There are several varieties of fish of very large size, some exceeding 200 lbs. in weight. The method of taking the larger kinds by the natives is ingenious. They arrange rows of tall bamboos, the ends being stuck firmly in the bottom, in a depth of about 6 ft. of water, and about 5 or 10 yards apart. On the top of each is a lamp of cotton wick 10 m. in diameter, around this wick a strong line, and a small hole being made in this float it is lightly fixed on the point of the bamboo, to which the line is securely affixed; and the hook, baited with a live fish, is thrown to some distance. When a large fish takes the bait the attachment float falls from the point of the bamboo and revolving upon the water pays out the line, then by its buoyancy it is sufficient to check and exhaust the fish.

LUTZK or **LOCK**, a tn. Erie, co. Polynia, esp. circle of same name on the Star, 145 m. N. W. Zimonia, is the see of a R. Catholic bishop, and has two churches, a R. Catholic seminary, several monasteries, a college and a parish school, and four charitable endowments. Pop. 6434.

LYZSNA, a tn. Austrian empire, Hungary, co. Liptau, 8 m. S. E. Rosenberg, with a municipal spring. At a short distance eastward, at the foot of Mount Lathorica, are mines yielding gold silver and antimony. Pop. 1640.

LYNCHBURG a tn. U. States, Virginia, on the James River, the Kanawha canal, and the Virginia and Tennessee, the South Side, and the Orange and Alexandria railways, 90 m. W. S. W. Richmond. It occupies a steep acclivity which rises from the river, and breaks away into hills, whose terraced walks and villages give the place a pleasing and picturesque appearance. In the background about 50 m. off, but full in view rises the Blue Ridge with the celebrated peaks of Otter. The principal buildings and institutions are nine churches, a Methodist college, and a flourishing female academy. The staple manufacture is tobacco, which employs about seventy factories and steamers and a capital of £200,000. The other industrial establishments are four foundries and three flour-mills. Standing in the centre of a magnificent country and in the neighbourhood of large fields of coal and iron ore, Lynchburg is advantageously situated both for manufactures and trade. As yet, however, its resources are very imperfectly developed. For (1860), 6853.

LYNN, a tn. U. States, Massachusetts, on the Western railway, 9 m. N. E. Boston. It contains eighteen churches, a high-school various other schools, grammar, intermediate, and primary, a library association, and two savings-banks. The manufacture for which the place has long been celebrated, and which still forms its staple, is boots and shoes, chiefly those of women and children. According to an approximate estimate of the extent of this manufacture, the number of boots annually made is about three million, and

of about six million pairs, and the aggregate value is little short of a million sterling. In connection with the manufacture are numerous leather-carrying works. The annual value of leathers alone is £3000. Pop. (1850), 18,063.

LYONH, a vil. U. States, New York, cap. co. Wayne on the Erie canal and the New York Central railway, 169 m. W. by N. Albany. It contains seven churches, a union school with 800 to 900 scholars, and a variety of manufactures, among which by far the most important is that of essential oils, chiefly peppermint. The annual quantity produced is about 10,000 lbs., or one-ninth of all that is made in the U. States. Pop. 5078.

LYSIEG a tn. Austrian empire, Galicia dist. and 8 m. N. W. Skalitz, formed with two adjoining villages a parish containing 3726 inhabitants, and has a handsome church, an elegant castle, and several fine villas belonging to Armenian merchants, who have settled here, and carry on a considerable trade.

LYTTELTON a tn. New Zealand, S. Island, or New

Munster, situated on the small bay of Port Cooper, new Victoria, on the N. E. coast of prov. Canterbury, is a small town, built with considerable regularity and in a better style than usual in the settlements of a new land. It is surrounded by a belt of rough precipitous hills, beyond which, toward the interior the Canterbury Plains stretch in almost boundless expanse and furnish nearly 3,000,000 acres of grassy pastures. The harbour of Port Victoria, a fine land-locked ocean inlet, furnishes it with ample facilities for the export of wool and other produce. A railway connects it with Christchurch, the capital.

LYTTON a tn. or settlement, British Columbia, at the junction of the Thompson with the Fraser, 169 m. from the mouth of the latter. Capt. Mayne describes it as existing at the time of his visit as an irregular row of wooden huts, a drinking-saloon, a large courthouse then unfinished, and two small buildings near the river, occupied by the district magistrate. It derives its importance from its situation at the mouth of the Thompson adjacent to the gold-fields.

M

MAAN, a tn. N. Arabia, 270 m. E. Cairo, on the route of the Syrian pilgrims to Mecca. It contains about 900 families of seven different clans, or *fouad*, mixed up with emigrants from other villages in Syria who are said to be able to raise from 150 to 200 brave and well-armed men to keep the Bedawies in check, and resist their extortionate demands. The inhabitants depend much on two great fairs of two days each, which are held within it, the one when the Syrian pilgrims, en route to Mecca, and the other in returning. The pilgrims, combining business with devotion, bring from Damascus cloth and other European manufactures for which they find a good market throughout Arabia, and from Mecca coffee and spices, aloes from Bagdad, Persian caps, and Indian swords and daggers. These they exchange for provisions, fodder, or other necessities, with the inhabitants of Maan, to whom the traffic is so profitable that the four days of the fair furnish the means of subsistence to their families during the rest of the year.

MABIANI or **URU MABIANI**, a tn. Western Africa, Bornou in the Gambia country, 70 m. S. S. W. Kikwa. It belongs to the district of Lijé, one of the finest in Bornou. It is finely situated on a hill, not only covering its whole top but descending its S. slope, and stretching along its foot till it reaches another hill. The houses indicate some degree of ease and wealth, and testimony is borne to the industry of the inhabitants by the state of agriculture, a dyeing establishment, and the market-places containing nearly 200 stalls. Pop. 8000 to 10,000.

MABOX, a vil. British America, on the N. shore of a river of same name, which in falling into the sea on the W. coast of Cape Breton Island forms a kind of mountain lake, about three-quarters of a mile wide and 8 fathoms deep. It stands among beautiful scenery the mountains rising immediately from the shore to the height of 870 ft. contains a church, and is surrounded by flourishing settlements, chiefly of Scotch Highlanders. The coast to the N. E. is lofty and precipitous, and attains its culminating point in Mabox High land, which is 1800 ft. above the sea.

MACAO [old.], a seaport in the Portuguese colony in China, the earliest foreign settlement there. The barrier wall and Chinese guard-houses erected on the narrow isthmus of the peninsula in 1573, to prevent foreigners going into the interior, have been removed and all restrictions abandoned. In 1844 Governor Pinto entered into more satisfactory arrangements with the Chinese government than previously subsisted, he was allowed to erect a new fort, and permission was given to the Portuguese merchants to trade with the free open ports on the E. coast of the mainland. In November 1845, Macao was declared by decree of the queen of Portugal

an open port to all foreigners, while the Chinese were still subject to the old tariff. Governor Assaré in 1848 declared the port free to all traders, and swept the customs away. However, as a compensation for the loss of Chinese duties which were the chief source of revenue he levied a tax on all native houses. This had the effect of driving the Chinese away and trade gradually declined until 1854, when it began to revive. The total value of the external trade in the year ended July, 1855 amounted to £1,477,058 of which \$582,566 was for exports chiefly tea, rice, sugar, and opium, and imports, £717,595 comprising opium, cotton, and silk. The government at Macao does not depend on tax legitimate trade for the prosperity of the town and port for its commerce has again been declining since the opening of the Yang-tze and northern ports by the treaty of Tientsin, which affected Canton in a similar manner. It draws a large revenue from licensing and fostering gambling and immorality among the Chinese, who contribute also towards the population. An approximate calculation in 1854 gave the natives at 56,500, and Portuguese and other foreigners at 5500. There is, however a large proportion of the population half-caste, whom, from the natural complexion and hair being the same as the Chinese it is difficult to distinguish from natives. Besides the revenue derived from the tax on gambling-houses and other places of bad repute there is a considerable traffic in opium smuggled from which further means are derived to enrich the treasury. This traffic equals the cruelty of the old slave-trade in Africa, the natives are kidnapped under the pretence of going abroad as free labourers with good wages, while they are shipped off to the guano islands of Fern, or the sugar plantations of Cuba. The largest proportion of the so-called emigrants are villagers of the interior who are lured by professional crimps to Macao, where they are forced, sometimes under torture, to sign a contract, which consigns them to a kind of "voluntary slavery." In twelve years ended 1852 upwards of 155,000 were shipped of whom only 1100 were women and children. During 1855 it was estimated that from 15,000 to 20,000 left in this cruel manner, and few, if any, ever return to their native country. There is no doubt that the Chinese authorities are aware of the traffic, and overlook its harshness as it helps to drain the country of its surplus population. Still the government does not grant the Portuguese the same privileges at Macao as it does to the English and other foreigners at the other ports. It compels them to pay the tribute annually stipulated for in the first settlement of the island. In 1853 Governor Graham went to Peking to have it rescinded, and a new treaty was drawn up, but it has not been ratified, from what cause does not appear.—(M.S. Notes, Hongkong Daily Press, &c.)

MADARAS (MADAR), a tn. Austrian empire, Transylvania, circle Erd 9 m. N N E. Marcs Vasshelyi year a tolerably large lake with a general aspect. There was a remarkable fall of meteorites here on 4th Sept. 1869 Pop. 1860

MAISON (MAY), three places, America—1, A. vil. Georgia cap. on the margin, on the Georgia railway 100 m. W Augusta, in the midst of a fertile district. It possesses a Methodist female college, a Baptist collegiate institute, and a high school, and carries on an active trade. Pop. 5618.—2, A tn. Indiana, pop. on Jefferson on a height above the Ohio, and on the Madison and Indianapolis railway 60 m. S W Cincinnati. It is beautifully situated in a valley inclosed on the N by hills 400 ft. high, consists of regular streets and substantial brick houses, and possesses a fine courthouse, eighteen churches, a number of schools, two large markets, wooden and cotton factories, five large flour-mills, tanneries and several extensive pack-packing and provision establishments. Pop. (1860) 8126.—3, A tn., the capital of Wisconsin, on the Milwaukee and Milwaukee railway lat. 43° 5' N, lon. 89° 28' W. 69 m. W Milwaukee. In point of situation and scenery, it is the most beautiful city of the far west, occupying a peninsula between Lake Michigan and Wisconsin, and possessing wide, straight, and regular streets with many beautiful buildings. The capital stands in the centre of a square park of 14 acres, wooded with trees of the original forest; but, though a substantial building of limestone, it has been deemed insufficient and a new capitol is in course of erection at an estimated expense of \$20,000. The other chief buildings are eight churches, five banks, the state university situated on an unknown, within a park bordering on Lake Michigan, provided with seven professors, and attended by 176 students, a commercial college, a public high-school, and the state lunatic asylum. The manufactures consist chiefly of bricks, flour and beer waggons and carriages, ironware, clothing and agricultural implements. Pop. (1860) 6611

MADRE, a group of islands S America, off the coast of Chili, open to the Pacific on the W, and between the islands of Haveron on the E and Wellington on the N. From the latter it is separated by the Gulf of Trinidad. The most conspicuous summits of the group seen on approaching the coast are April Peak, Tower Rock, and Cape Three Peaks, the last forming the S.W. extremity of the gulf, and terminating in serrated ridges, with three peaks, the highest of which is nearly 3000 ft. high. About 3 m. N E. of this cape is Port Henry with anchorages in 9 to 10 fathoms, on a sandy bottom.

MADUWARI a tn. Western Africa Senegal, near the W shores of Lake Chad and about 8 m. N E. Kukawa, has a noteworthy interest attached to it as the place where the African traveller Mr Overweg died, in the 50th year of his age.

MAFFERDORF, a tn. Austrian empire, Bohemia, circle Bzenau, on the Mosau 4 m. S E. Reichenberg, with a parish church, a manufacture of carpets, a yarn-spinning mill and 2104 inhabitants.

MAGALIESBERG or **KAMAH MOUNTAINS**, a range, S Africa, in the S.W. of the Transvaal Republic, rising abruptly out of a plain to the height of at least 600 ft. above its level, and stretching for 30 m. in the general direction of E and W. Viewed from below the range towards the E. presents a high unbroken ridge, little varying in height, with a precipitous red soil, believed to be quartz. This ridge, which is at a considerable height, extending from end to end, near its crest is surmounted by a series of slender spires, but relatively of less height. The lower part of the mountain, composed apparently of dolomite, is swept out into thickly wooded gullies. Towards the W the range reaches peak after peak. One of these attracts notice at the distance of at least 12 m. by an immense projecting white rock, which looks as if it were suspended on the steep slope near the summit. The range gives rise to several streams, most if not all of which belong to the basin of the Limpopo. Much of the scenery of the Magaliesberg is magnificent. The wider ravines are filled with large timber in great variety, and the narrower chasms with tree-ferns, having stems from 15 to 20 ft. high. The walls of these ravines and chasms, says J. Sanderson, were draped with curtains of delicate ferns, such as glaucous, trailing their slender fronds, a dense

or twenty feet long, over the mouth of some dark crevices, while, high up, aloft, euphorbia, and other mountain plants in great variety, filled every crevice. The district has the reputation of producing fine fruit in great quantity. It would seem however, that almost all kinds of fruit-trees are subject to a rust or blight, and that the fruit of those which escape is destroyed by a kind of wasp. Grapes and figs are less frequently visited by these insects.

MAGDALEN (MAG.), a group of islands British America, in the Gulf of St. Lawrence, 15 m. N.W. of Cape Breton. They extend in an irregular curve from S.E. to N.W. for 35 m. They consist chiefly of the islands of Amherst, Oriskany, Alburgh, Grose, and Coffin, and a considerable number of islets, and in their central parts rise into hills, generally of trap rocks, with rounded and frequently dome-shaped summits, varying in height from 280 to 580 ft. Around and on the flanks of these hills, are stratified deposits of sandstone and calcareous clays, with gypsum in the hollows and basins, and occasionally in veins. The islands are partially wooded mainly with small trees of spruce, juniper, birch and Canadian poplar. Where not wooded they afford good pasturage for cattle and sheep. The soil is very infertile, being even when of good quality, only a few inches in depth with a siliceous and ferruginous subsoil. The climate, though neither so cold in winter as Quebec nor so warm in summer, is severe. Rain, and especially fog, are extremely frequent. Viewed from sea in a bright summer day, the cliffs of various colours, chiefly different shades of red, and the yellow of the sands, contrasted with the green of the pastures and spruce-trees, and the blue of the sea and sky have a beautiful effect, and distinguish the Magdalen group from any other view in the Gulf of St. Lawrence. The inhabitants are mostly of French extraction, and chiefly employed in the cod, herring and seal fisheries. Some gypsum is exported and some valuable ochreous pigments have been found. None of the islands possesses any harbour for large ships. Pop. (1860) about 1100.

MAGDALEN a river, British America, Canada East, which rises in a mountainous district in co. Glasp flows N.E., and falls into the estuary of the St. Lawrence, on the N.W. side of a sandy bay, also under a rocky cape of same name. At its entrance though only 80 yards wide, it has a depth of 2 ft. which within is increased for a very short distance to 10 ft., over a clean bottom of fine sand. At springs 13 ft. water can be carried in. Being thus navigable, it is occasionally visited by schooners of 30 to 80 tons, which warp in when the sea is smooth and the weather fine.

MAGDALENA (SANTA) a tn. Mexico state Sonora, in the beautiful fertile and well-cultivated valley, and near the bank of the Rio Ignacio, 80 m. N.W. Ures. It has an annual fair which attracts crowds from the neighbouring districts. Maize, wheat, beans, and fruit are extensively cultivated, and tobacco, rice, and cotton thrive well in the valley.

MAGIEROW a tn. Austrian empire, Galicia, circle Zolkow, about 24 m. N.W. Lemberg. It is memorable for the defeat of Prince Rakowsky by the Poles under Cossacki. Pop. 2117.

MAGILL, a group of islands, S. America, in Melville Sound, at the entrance of the Barbara Channel, in Magellan Strait, N of Terra-del-Fuego. One of them called Skyring, has a mountain of some name which rises in a peak to the height of 8000 ft. and has been very useful during the astronomical surveys in connecting the triangulation of the strait with that of the outer coast. Part Ten, on the S.E. side of this island, has good anchorages and is well sheltered, except from the violent squalls which are frequent everywhere among the coasts of Terra-del-Fuego. Fry the central island of the group, though affording only a wild anchorage, with little shelter and bad ground, is much frequented by sailing vessels.

MAGLAI, a tn. Turkey in Europe, Banat, on the Danube, 55 m. N by W Bozna Baral. It contains a large mosque and an old castle.

MAGOMERO, a vil. S Africa, upon a small stream of the same name, about 15 m. W of the S. end of Lake Shiraz lat. 18° 30' S, lon. 30° 24' E. The spot is a pleasant one, surrounded by neatly, shaly hills, and derives its interest from having been chosen by James Mackenzie as the first residence of the Oxford and Cambridge mission, which ended

acrossed in the death of the bishop and several of his subjects from fever.

MAGWE, a tn. Burmah, 1 bank Irrawadi, about 35 m. above Prome, is the first place of any consideration on the east bank of the Irrawadi beyond the British frontier. Its population is estimated at about 8000.

MAGYARAT is a tn. Austrian empire, Hungary, co. and 19 m. N. E. Anz, with 2700 inhabitants, who grow excellent wine, and raise good ear corn.

MAHA OYA, or KATHUL, a river Ceylon, which rises in a mountainous dist. S. E. of Kandy flows W. forming the boundary between the N. W. and W. Provinces and after a course of 55 m. falls into the sea to the N. of Negambo. Its basin has an area of 453 sq m.

MAHAKAJAPOOR, two places, India.—1 A tn. Scindia's Domains, 15 m. N. W. Gwalior famous for the battle fought in its vicinity on 29th December 1843, between the British under Sir Hugh Gough and the Mahattas, when the latter were defeated but not until they had inflicted a heavy loss on the victors.—2, A tn N. W. Provinces, dist and 13 m. S. E. Cawnpore with a well supplied bazar.

MAHAWELLI-GANGA, or **MAHAWELLI-GUNGA** [add], the largest and most important river of Ceylon which rises near Adam's Peak, flows N. to Kandy then almost in a southeasterly, with its confluents northwards, E. to Bintenne then again southerly due N. and divides into several branches, of which the principal one, still continuing the same direction, has its mouth on the S. shore of the Bay of Trincomalee 2 m. W. of Ceylon. Its whole course is 134 m. and the area of its basin 4022 sq m. of which 1789 are in the mountain zone, and 2230 in the low country. Its principal affluent is the Amban ganga, which joins it on the left. In the first part of its course it has all the character of a mountain torrent and even in the vicinity of Kandy, at a point where it is crossed by a bridge of a single arch above 200 ft in span and nearly 70 ft above the stream, rushes through a narrow channel in which it has been known to rise 50 ft above its ordinary level, hurrying along the trunk of trees and the carcasses of buffaloes, elephants, and deer. As Bintenne it is, when swollen by rains, as broad as the Thames at London, and at all times sufficiently deep to be navigated by small vessels. Thenceforward it sweeps through luxuriant solitudes, past wide expanses of rich land now lying waste, and under the shade of forests whose timber and cabinet woods alone would give wealth to an industrious people. About 40 m. before it enters the sea it separates into two branches. The principal one, called Koorogol-gunga, continues the N. course already described, the other called the Vernal ar. diverging almost at right angles, flows N. E., subdividing into new channels, and enters the sea by several mouths, N. and E. of Armutura, or 'the island of elephants.' A survey of the river made by order of government goes to prove that notwithstanding its length, and the volume of water which it carries, it is not available for navigation. Even in the first 32 m. from the sea the boats employed though mere canoes, often failed to find in the channel the few inches of water necessary to float them. Higher up, where the navigation is impeded by rapids, an upset would be perilous, owing not merely to the strength of the current, but to the multitude of coral-reefs with which the river swarms. For the first 80 m. the chief obstructions are sand-banks and drift wood, which it might be perhaps possible to remove. Higher up the sand disappears, and the river bed is formed of rocks of granite.

MAHEDIAH (see *Aphrodite*), a seacoast in regency of and 100 m. S. E. of Timb, built on Cape Africa on which there is a height containing caverns remarkable for their size and for the perfect state of their preservation, and forming subterranean reservoirs of considerable extent. A large rectangular basin, now dry and blocked up, whose outline cut out in the rock is still traceable, formed the port for the galleys. A distal command Mahediah and all the peninsula on which it stands, and another square fortress at one of the town entrances defends it towards the N. and W. This latter fortress dates from the Spanish occupation three centuries ago. The date of the foundation of the town goes as far back as the dynasty of the Fatimites.—(Oliverson, *Afrique du Timb*.)

MAIAR, a tn. Russia gov. Orenburg, on a river of same name, which rises in the Oural Mountains, on the watershed

between Europe and Asia, and belongs to the basin of the Old 270 m. R. Kisteneburg. It is at the centre of the gold region in the S. Oural and contains a large edifice, with all the offices necessary for the administration of the mines, buildings in which gold is washed both in winter and summer, warehouses and other structures, and many good dwellings—houses. A lake running up among the hills and the mountains rimas-low range along to the town on the E. side of the river, makes the site at once beautiful and picturesque.

MAIDZEINA, a tn. Austrian empire, duchy Bukowina dist and 8 W. Czernowicz, with large seams of gypsum and 9470 inhabitants.

MAI GOVA a vil. Ahyelina, Jalya, 120 m. W. Anz. It stands on the edge of a plain in the midst of cultivated fields, 15 m. S. of the Bah el Hamra, and consists partly of square houses built of mud and partly of round conical-roofed huts formed of a framework of poles filled in with boughs, and thatched. Pop about 3000.

MAIBERG, a tn. Austrian empire, Lower Austria circle Lower Marchfeld. It contains a palace with the gardens, and has a considerable trade in fruit and wine. The latter in particular bears a high name, and is considered among the best grown in Austria. Pop 1190.

MAI MA CHIN [add] a tn. Chinese empire on the N. frontier of Chinese Tartary 170 m. S. E. Irkutsk, and so close to the territory of Russia that Kiachin, belonging to the latter is only a few hundred yards to the N. and separated from it merely by a door in a wooden barricade. It stands on the edge of a plain terminating towards the S. in a chain of wooded hills, and is composed entirely of wooden houses, enclosed by a wooden palisade with two gates. One of these faces Kiachin, as already mentioned the other faces the S. a narrow street about 600 yards long leading in a straight line between the two. Other streets, running either parallel or at right angles to this, divide the whole place into numerous blocks. Where the two principal streets intersect there is a square edifice resting on four pillars, which allow the traffic to pass beneath it and consisting of three stories which are gradually narrowed as in a pagoda. In each of the upper stories there are openings filled in with highly decorated trellis work; the walls painted red, are singularly ornamented with green monsters and other allegorical figures. A little beyond this building is the residence of the *sarpooteh* or Chinese governor, which, like all the other dwellings, is only one story high, and is entered through a pair of sliding-doors leading into a gallery or colonnade. To the right of the *sarpooteh's* residence stands the temple of Fe and to the left the court of justice. The temple is a small quadrangular building with an opening in the centre giving a view into the interior where are seen four statues, the size of life, painted so as to look more like demons than gods musical instruments hanging on the walls, and flags and banners suspended from the roof, and forming a canopy of the most brilliant colours. The court of justice, with a red flag fluttering over it, is chiefly remarkable for the various implements of torture suspended or piled upon its walls. The weather merchants, who have their abodes along the line of the principal streets, have generally a show-room decorated with silk and Chinese paintings, and arranged so as to show off their choicest wares. Among these are silks of great variety and heavily embroidered *kamls*, jackets, and various other articles of costume, porcelain vases of exquisite workmanship, dinner and tea services, ornaments in jade, groups of flowers formed in various coloured stones, window screens some of them most minutely carved in ebony and some other remarkable specimens of wood-carving. The great staples of trade, however are tea, of which Russia is said to import six millions of lbs annually and rhubarb, of which 800 000 lbs are said to pass through Mai-ma-chin every year. These articles are not disposed of in Mai-ma-chin but in Trolka-nai, a Russian town situated among the hills about 3 m. to the N., where the custom house is situated, and where all merchandise, whether from Russia or China, must be deposited previously to its being sold or bartered.—(Atkinson's *Upper and Lower Anz*.)

MAINDO, a river E. Africa, one of the smaller branches by which the Zambesi pours its waters into the Indian Ocean; lat. 15° 55' S; lon. 35° 12' E. It used to be one of the principal stations for shipping slaves, and is still, there is

in several localities. Its fertility is much diminished by a predominance either of retentive clay or of sand. The principal crops are rice, wheat, barley, circumlocution plants, pulses, and indigo. Many parts of the surface are covered with magnificent banyan-trees and mango groves. The mulberry is extensively planted. The principal manufactures are coarse cotton and coarse silk fabrics. Pop. 481,000.

MALDAH cap. of the above dist., situated 1 hour Mahananda, at the mouth with an effect of the Ganges, 170 m. N by W Calcutta, is a wretched place consisting of narrow irregular streets and about 3000 houses, many of them in a ruinous condition. The only public buildings of any note are several mosques and a large serai. The manufactures, on which the prosperity of the place depended, have been almost destroyed by British competition.

MALIGRADAC a tn. Austrian empire, Banat Military Frontier, about 80 m. E.S.E. Karlovitz, with a German trivial school. — *Vidzava* in the vicinity contains two Greek non-united churches. — Pop. 1000.

MALMEKURUG, a tn. Austrian empire, Transylvania, circle and about 84 m. N.E. Hermannstadt, has a Protestant church, and on a height opposite to it a chapel with some interesting monuments. Pop. 1180.

MALO-JANOLAYETZ, a tn. Russia, gov. and 40 m. N. Kaluga, cap. circle of same name. It stands on a height at the confluence of the Luga and the Jaroslavlka, and has five churches, a monastery, a circle and a parish school, two charitable institutions, manufacturers of woollens, and a trade in horses. A battle was fought here between the Russians and the French on the 24th October, 1813. Pop. 2050.

MALOWN a fort, India, Hindoo, on the summit of a ridge which rises over the bank of the Sutlej and has an elevation of 4446 ft., in lat. 31° 12' N. lon. 76° 52' E. It is strongly built of masonry, and in 1815 became the last refuge of Umeer Singh and the Ghorokas, when Uchtelek had by his military movements dislodged them from all their other posts in the west. A stout resistance was anticipated but when a breaching battery armed with movable labour within 400 yards was about to open, a capitulation was entered into, and terminated the Nepalese war.

MALPELO, or **BALDWIN** a detached island of the N. Pacific, nearly in the track of vessels entering the Bay of Panama from the S lat. 3° 40' N., lon. 81° 40' W. It is barren and precipitous, bears a resemblance in its summit to several points of view, to the crown of a head, and rising to the height of 1200 ft. becomes visible at sea in clear weather at the distance of 40 m. With the tides which surround it, it extends about 10 m. from N. to S. It has never been surveyed, the officer who visited it for this purpose in 1847 having failed to find a landing. Owing to the strong currents in the vicinity there is an appearance of breakers; but it is believed to be steep to as a depth of 40 fathoms was found alongside, and of 110 fathoms at the distance of a quarter of a mile.

MALULLA, a vd Palestine pschahlik and 45 m. N.N.E. Damascus, romantically situated near the foot of a towering cliff, at the entrance of a magnificent gorge. It is remarkable as one of the three villages in which Syria is still spoken.

MAMBANI a tn. S.W. Africa, not far from Biko where they live under an Amboina chief and about 500 m. S.W. Angola. They are slave-traders, and before this trade was interdicted by Portugal they carried it on to a vast extent, buying their victims in exchange for goods, and not scrupling to steal them, and carry them off by force, whenever they found an opportunity. They now profess to use slaves only for domestic purposes, but there is reason to suspect that their old habits still cling to them. They are some enterprising merchants that the whole extent of the coast from W. to E. may be said to be their market. There is something else very singular in their mode of dealing.

When they mean to trade with a town they deliberately begin by building huts, as if aware that little is to be effected without an ample allowance of time for palaver. They bring the cotton plants of Manchester into the very heart of Africa. When the Malokolo first saw these goods, they could hardly believe them to be the work of mortal hands. Aware how much their trade might suffer from the rivalry of the white man, the Mambani are ever on the alert to prevent the settler from having any direct dealings with them. They have

thus been successful in establishing a monopoly in their own hands.

MANA a tn. India, Khasoon, on the Sarawati at an elevation of 10,492 ft. in lat. 30° 46' N. lon. 75° 31' E. The houses are built of stone, two stories high, and covered with planks. The inhabitants are of the Mongolian type and are in nothing so remarkable as in the profusion of gold and silver ornaments with which they overload their persons, hanging them around their necks, wrists, and ankles, and inserting them in their ears and noses. The wealth thus indicated is obtained by the extensive traffic they carry on between India and Chinese Tartary through the Mana Pass, which though 18,000 ft. high is one of the easiest across the N. frontier because the ascent following the course of the Sarawati is rather regular and gradual. In conveying the merchandise of this traffic yaks, goats, and sheep are employed. Pop. 1600.

MANAMA, a tn. Arabia, on the N. shore of the island of Bahrein, in an arm of the Persian Gulf. It is a large and populous place, more regularly built than most towns in the Gulf possesses well stocked houses, and carries on an extensive trade, principally coasting. About 150 vessels belong to its port, and it also sends a great number of boats to the pearl-fishery. Its pop. is roughly guessed rather than estimated, by some at 40,000, by others at only 5000.

MANANGKABU [add] an inland country Indian Archipelago, Sumatra about 60 m. long by 50 m. broad and containing an area of 8000 sq. m. It extends generally from the equator in a degree S. of it, and consists of a series of alpine valleys isolated by lofty mountains. Among them are the active volcanoes of Tulang and Marapi the former 10,750 and the latter 9800 ft. above the sea. The geological formation is partly volcanic, partly plutonic and sedimentary. The valleys being naturally fertile and well supplied with water are highly cultivated, productive, and populous. Sir Stamford Raffles thus speaks, from personal observation—

As far as the eye could distinctly trace was one continued course of cultivation, interspersed with innumerable towns and villages, shaded by the cocoanut and other fruit trees. I may safely say that this view equalled anything I ever saw in Java. The country is more majestic and grand proportions equally dense, cultivation equally rich. No details of the early history of Manangkabo exist, or of the mode in which its inhabitants were induced to embrace Islamism. When the Portuguese visited it, it furnished some gold, and was famous for the manufacture of arms. Its reputation in the latter respect it still maintains.

MANARUDI a tn. India, presid. Madras, dist. and 22 m. E.S.E. Tanjore. It is a place to which the natives attach importance from the number of Brahmins and Pandurams residing at it. Its pagoda, which is very large, has a gopuram 150 ft. high. The manufactures are cotton and silk goods.

MANAYUNK a tn. U. States, Pennsylvania, 1 hour Schuylkill and on the Philadelphia and Norristown railway. Though 7 m. from the state house of Philadelphia it lies within the charter limits of this city, and must therefore be regarded as one of its suburbs. It contains six Protestant and two B. Catholic churches, and has extensive manufactures of cottons, jeans, and woollens. Pop. 6128.

MANCHESTER [add] Manchester is situated almost at the S.E. extremity of the county of Lancashire, and has always been the centre of the cotton manufacture. It may fairly be described as the metropolis of the northern division of England.

The public institutions of Manchester include the Cathedral, an ancient and interesting building in the Perpendicular style of architecture, with a tower at the west end, 120 ft. in height. It consists of a nave, chancel and lady chapel at the east end, with apsidal aisles, and seven other chapels. Though greatly disfigured by galleries in the nave as a whole the effect may be described as picturesque. The only buildings at all like it in England are Chester cathedral, and St. Michael's, Coventry. The choir is by far the most beautiful part, the roof is exquisite, and the carving of the work over the stalls is unsurpassed by any collected in England. Some of the woodwork above the rugges which the soldiers of the Commonwealth were too fond of committing. Under some of the miscreants may be seen proofs of their at-

tempted to set fire to the building at the time they turned it into a stable.

The original parish church of Manchester was of wood, but in the year 1421 the manse of Thomas de la Warre, the then lord of the manor, obtained a charter constituting it a collegiate church and in connexion with it a college, consisting of eight fellows, four clerics, and six chorists. Many of the wardens who succeeded Lord de la Warre were men of considerable note; amongst the most celebrated of whom may be mentioned Dr. Dugdale, who, in the time of Elizabeth, was described by Halliwell as a very learned man, a perfect master of mathematical studies. He was very sober just, temperate in his studies, yet, an observer of public and private devotions, but was too much addicted to some over-curious and uncertain arts, as astrology or the like. Although relieved by Elizabeth from the unjust suspicion of being a necromancer and recovered by her at court, he was so persecuted in other ways that he was compelled to leave the country, and his library consisting of 4000 volumes and 700 MSS., was confiscated. In the year 1647 an act was passed establishing the Collegiate of Manchester, and constituting the collegiate church a cathedral. A charter, dated 29th March, 1663, subsequently constituted the municipal and parliamentary borough of Manchester a city. Since that time the cathedral has been restored, and a great part of it rebuilt. There are in Manchester 239 churches and chapels, belonging to various denominations, viz. sixty-eight churches, thirteen E. Catholic, thirty-two Independent, thirty-one Wesleyan, eight Methodist Free churches, eleven Baptist, and sixty-nine of various other denominations. Some of the worthy of notice for their architectural pretensions—St. Mary's, St. George's, St. Philip, Hulme, St. James Burch, St. Matthew's, St. Andrew's, in Manchester and St. Luke's, Chetham's Hill St. John's E. Catholic cathedral, Salford, and Cavendish Street Independent chapel, being the most perfect.

Chetham's Hospital is a noble institution, founded by a merchant of Manchester in 1651. The buildings themselves are interesting, as being the former residence of the lords of the manor and subsequently of the ecclesiastical community connected with the collegiate church. Its present use is for the education of upwards of 100 boys, a preference being given to orphans, the children of honest parents; their dress is somewhat similar to that worn at Christ's Hospital, London. The library is probably the most valuable theological one in England, containing many MSS., together with one of the original copies of the Pentateuch, seven of which only are known to be in existence. It contains nearly 30,000 volumes, some of them rare and curious, which with the manuscripts are also of great interest.

The *Free Grammar School* was founded by Hugh Oldham, Bishop of Exeter in 1515 who endowed it with certain lands and other property. Other benefactors have since added scholarships and exhibitions at the universities of Oxford and Cambridge.

Owens College, a modern institution, founded under the will of Mr. John Owens who died in 1840, for providing or aiding the instruction or improvement of young persons over the age of 14 years in such branches of learning and science as are now or may hereafter be taught in England. The only restriction being that no religious tests shall be applied for admission to the benefits of this college, and no theological instruction or discussion be allowed which can be reasonably offensive to any student. It is now affiliated to the University of London. A very large subscription has (1867) been commenced to provide new buildings and further endowments, in the hope that, before long, it may form the nucleus of an independent university for the Northern Counties of England.

The *Free Library* mainly owes its origin to the late Sir John Pritty who during his minority in 1851 purchased a building for that purpose. The original cost of its establishment was defrayed by public subscriptions of about £13,000, its subsequent maintenance being provided for under the Public Libraries Act of 1850. The chief library is divided into two departments, reference and lending, there being four branches besides the principal one. The number of volumes in the reference library is 38,426; in the lending and branch libraries 30,818. The issues are as follows, for the year ending September 1866—

Reference Library	50,444
Lending	84,132
"	74,130
"	40,258
"	75,496

The Assize Courts.—Owing to the rapid increase in the population of the Salford Hundred, Manchester was recently constituted an assize town, and it therefore devolved upon the county magistrates acting in the Hundred of Salford to provide suitable accommodation for the purpose. This has been done in such a way as to surpass any building for judicial purposes in any part of Great Britain. The architect whose design was selected, and who has carried out the work is Mr. Alfred Waterhouse, residing and carrying on his profession in his native place, Manchester. The style may be described as Anglo-Gothic, of about the time of Edward III. The principal front faces the S.W., and is 250 ft. in length, the judges lodgings being separate, but having an internal communication with the courts, and adding greatly to the effect of the whole. In point of ventilation and arrangement the whole building is almost perfect in its planning whilst no expense has been spared to render the effect both imposing and picturesque. The cost was about £130,000 the site of a large prison in course of erection immediately behind the courts.

First among the ornaments of which Manchester can boast is the Albert Memorial, which has been erected in a square about to be formed in front of the site of the new town-hall. The cost, including the statue was nearly £7000. The statue itself is by Noble of Eidian marble, and represents the prince in the robes of the order of the Garter; the canopy being in a style of corresponding richness. The other statues in Manchester are those opposite the Royal Infirmary of the Duke of Wellington, Sir Robert Peel, Dr. Dalton and James Watt—one of Richard Cobden is also in course of erection in Peel Park, Salford, are those of the Queen, Prince Consort, Mr. Robert Peel, and Joseph Brotherton, the first representative of that borough in Parliament—a position which he retained for twenty-four years.

The other public institutions include the town-hall and the exchange, both of which have become too small for their respective purposes. Acts of parliament were obtained in the session of 1855, giving the necessary powers for providing new buildings, which it is expected will be of a character such as to do credit to the city.

The Royal Infirmary is one of the largest hospitals supported by voluntary contributions in the country, and possesses in connection with it a thriving medical school. There are various other hospitals in the town.

The Free-trade hall is an imposing building, erected on the site of the hall in which the mass meetings in aid of the free trade movement were held.

Many of the warehouses are large, lofty ornate buildings, with considerable pretensions to architectural elegance, and form a striking feature in the general aspect of the city which although much improved in recent years by many broad handsome thoroughfares taking the place of narrow streets, cannot be described as very prepossessing in appearance.

The trade of Manchester was originally almost entirely dependent on the manufacture and sale of cotton goods, but it has now become the centre of a large district extending some 40 m. around and embraces the various productions employed in the manufacturing industry of England. Hence it arose that during the cotton famine the distress was much more lightly felt here than in any purely manufacturing town as the producers of machinery and other employers of skilled labour have to a great extent taken the place of the mere manufacturers of cotton goods. The following table, being an extract from the mill return for the city of Manchester, for 25th July, 1865 will give an idea of the extent and variety of the manufactures carried on:—

Classification.	No. of Mills.	No. of Hands Employed.
Cotton Mills,	79	32,417
Wool Mills,	19	4,993
Wool-linen Mills,	27	4,597
Wool-cloth Mills,	1	514
Dyeworks,	81	3,504
Wool-carding,	48	7,488
Wool-spinning,	30	4,507
Total,	264	47,964

In early history it is mentioned as one of the most important of the Roman settlements. In the year 78 Agricola successfully brought the northern tribes under the rule of the Caesars, and Mancunium formerly a British stronghold, was possessed by the Romans. Forts were established, of which traces can still be discerned at Hyde Wood, near Castle Irwell in Lower Brumfield; at Cuckoo Hill, near Slingluff Brook; at Raine's How on Kernal Moor; and at a spot a little above the Goose Inn, Bury New Road—and various military roads to

the surrounding districts were formed, the conquered Britons in the meantime settling themselves in the Aldport or old town, the site of which is still recalled by the name of Aldport Town in Deansgate.

Four hundred years, however, had barely passed when, notwithstanding the erection of a formidable stone fortress in Castle Field, the Saxons, invited by the Britons, bore away the stronghold of Manchester from the possession of the Romans, and the year 488 finds them dispossessed from this

THE ALBERT DOCK, MANCHESTER.—From a stage photograph by Eustace Mansfield.

point as their headquarters to the whole country lying between the Humber and the Mersey. The command of the fortress was given to one Tarquin or Torquise in the old chronicles of Manchester written by Hollingworth may be found the following legend—

'It is said that Sir Tarquin, a stout ensign of King Arthur kept the castle, and sate to the ford in Medlock, about Mablehouse, hung a baize, on which baize whosoever did strike Sir Tarquin or some of his company would come forth and fight with him; and that Sir Laurence of du Lake, a knight of King Arthur's Round Table, did baize upon the baize, fought with Tarquin, killed him, and possessed himself of the castle and loosed the prisoners.

The old ballad of 'Sir Tarquin also commemorates the achievement.—

Within this ancient British land
In Lancashire I understand
Near Manchester there lived a knight of fame,
Of a prodigious strength and might,
Who vanquished many a worthy knight
A giant great, and Tarquin was his name.

On a ceiling in the Chesham hospital an institution of which an account will be found in another part of this article, a rude carving may be seen representing Tarquin with the legs of an infant sprawling out of his mouth, the fable being that he devoured each day a child for his breakfast.

The name of the town which, during the time of the Romans, was changed from Mancunium into Manometum, became under the Saxons Manliggester or Manchoester by which it has ever since been known. For 180 years it remained under the domination of the Saxons, but after that period Canute, on his march to Cumberland took possession of it, leaving as a memento a mill, which he built close by the castle, the place where it stood still bearing the name of Knute or Knot Mill.

Of the history of Manchester from this period up to the beginning of the thirteenth century little is known, but we then find it a thriving mercantile town, in which the Flemish

manufactures and the woollen trade were being successfully carried on. This was the foundation of the wealth of the southern division of the county of Lancashire. Possessing as it does an energetic population, and the advantage of an ample iron coal and water supply, the manufacture of cotton goods has spread itself throughout the whole of the surrounding towns, and has led to the development of Liverpool as the port for the trade of the district.

The natural enthusiasm of the inhabitants has led them into political excesses of various kinds. The Reformation was violently opposed there. Collier the warden of the college of the Blessed Virgin, Penelobury and Bradford taking a notorious part, the latter dying a martyr for his support of it. In Ancoats Lane one of the Martin Margrethe presses was established, and its publications issued from thence.

The Great Rebellion finds Manchester greatly excited, and an encounter between some of the inhabitants and the followers of Lord Strange afterwards the unfortunate Earl of Derby was reported in London as 'the beginning of civil war in England, or terrible news from the north; Lord Strange being afterwards impeached by the lower house for his share in the affair. Under the commonwealth Manchester had its representative in parliament, and was made a centre of one of the classical divisions of the presbyterians.

At another period Manchester supported the Chevalier St. George and five of the principal inhabitants were executed in the town.

In 1745 young Prince Charles's cause was warmly espoused. Not only were the plans of his invasion concocted there, but before publicly appearing in Scotland he was privately entertained for a considerable time at Ancoats Hall, by Sir Oswald Mosley the lord of the manor and at another visit he made his headquarters at an inn which bore the name of the Palace Inn; in consequence, until it was recently pulled down. A regiment was raised locally, the last occasion in which it took part being the defence of Castle, at the surrender of which the leaders were decapitated,

their hands being set for exhibition on the top of the Manchester exchange.

The American revolution and the French war enabled the inhabitants to testify their loyalty by making several regiments of volunteers, as well as contributing their money most liberally one from alone, Paul & Yates, the head of which was the first Sir Robert Peel, voluntarily contributing £410,000 for the defence of the country.

The agitators for "reform, and subsequently 'free trade,' were mainly supported by associations formed in Manchester which has led to the term of the "Manchester school," as applied to the extreme section of the liberal party.

The most recent efforts which are worthy of record have, however, been directed to the spread of education, and at the present time a bill initiated by the Manchester Education Aid society in under the consideration of parliament, and it is hoped, may be the means of furthering a system of compulsory education.

The population of Manchester has increased at an extraordinary rate as in 1801 it was 94,876, and, including Salford, in 1861 460,918. Owing, however, to the encroachments during the past few years of warehouses, and public and private undertakings, the next census will record a decrease, as the waste in the suburbs and the increase in the working population to roads beyond the limits of the borough.

MANCHESTER [adj.] a in U States, New Hampshire, on the Merrimack, at the Amherst Falls, and at the terminus of the Merrimack and Connecticut, and the Manchester and Lawrence railways, 52 m. N. W. Boston. It is regularly laid out in streets and squares, the former crossing at right angles, and three of the latter with ornamental ponds in their centre. The main street, which is 100 ft. wide and above a mile long is planted on each side with elm. The principal buildings and institutions are 14 churches, 40 public schools including 1 high-school, 2 grammar 1 intermediate 15 normal 8 middle, and 15 primary; an academy under the care of the Sisters of Mercy an almshouse, and a reformatory for juvenile and female offenders. The main features having the advantage of an unlimited supply of water-power from the falls of the Merrimack, are very important, and are carried on chiefly by chartered companies. The chief articles manufactured are cottons and woollens, locomotives and other engines, axes, saws, and other tools, cutlery, scales, and paper. The cottons and woollens, which must be considered in the great staples of the place, consist of shirtings, sheetings, drillings, de laines, broads, prints, Persian cloths, and cambrics. Pop. (1860), 90,107.

MARDHAR, a territory Indian Archipelago, forming the W portion of the main body or nucleus of the island of Celebes, and terminating to the S.W. in a cape of same name, is lat. 2° 35' S., lon. 119° E. Though hilly it has no mountains of considerable elevation. The soil is very indifferent, not producing rice, but only maize, coconuts, and cotton. Its exports are cotton cloth, coconuts, and coconut oil. The inhabitants are a distinct nation and have a language peculiar to themselves.

MANDUK, or TUKANDUK, a in. on the W side of Borneo, cap. dist. of same name about 16 m. N. of the equator. It stands on an affluence of the Kapurue, which falls into the main river Pontanah, and is a principal station of the Chinese gold-diggers.

MANGA a prov W Africa, Borneo, stretching from E. to W along the S frontier of the Twarek for a considerable length with a comparatively narrow breadth. The surface is undulating in downs of red sand, famous for the production of ground-nuts and tobacco. Both of these, constituting a large portion of the food of the inhabitants, are sown on the same field along with millet. The remarkable acacia, which forms a singular feature in Hama, but are unknown in Borneo proper are in common use in Manga. Other marks of distinction appear "The Kamari borromen, or the Koyan camel-breeder was here, says Dr Barth, 'supplanted by the Manna footman, with his leather apron, his bow and arrow, and his battle-axe, while the more slender Manga girl, narrowly passing forth from under her black veil with which she beautifully hid her face, had succeeded to the Bornean female, with her square figure, her broad forehead, and her open or ill-curved breast. The Manga are their origin to a mixture of tribes.

MANGALAGHERRY, a tn. India, presid. Madras, dist. and 18 m. N. E. Guntur. It stands on the great northern road, about 6 m. W of the Kistna, and has a considerable trade in the white and red cloths worn by Mahomedans and the natives generally. They are sent chiefly to Hyderabad and Junnah.

MANGALIA, or MARGALIA, a tn Turkey in Europe, Bulgaria, ayast and 68 m. E. S. E. Silistria, on the W coast of the Black Sea. Its roadstead, besides being exposed to the E. wind, is frequently visited by mista, which make the navigation uncertain and dangerous. Large vessels, however, can anchor abreast of the town about 1 m. from the shore in 84 fathoms, and small vessels at only 300 yards from the shore in 4 fathoms. Pop. 7000.

MANGALORE [adj.] a in India, presid. and 870 m. W Madras, cap. prov. Canara, on the Malabar coast. It stands behind a backwater formed by the junction of the Belore with the Nalkavutti, and when viewed either from the sea or the adjoining heights has a rather picturesque appearance. The houses, however, are for the most part meanly built, and form not so much one single town as a number of distinct villages. It has no public buildings entitled to special notice. The harbour was much frequented in early times, and became under Hyder Ali and Tipu Sultan a great naval arsenal, where a fleet of ships was built with the intention of rivaling those of Europe. After this preposterous idea was abandoned, the works were allowed to go to ruin, and the harbour which had been previously protected against the encroachment of the sea, became in a great measure silted up, so that even native craft find access difficult. The trade, however, is still considerable, the chief exports consisting of rice, betel-nut, black pepper, sandal-wood, cassia, and turmeric, and the imports of salt, raw silk, sugar, oil, and glass. The sacredness of the place on a gentle slope on the N side of the town. The principal buildings are St. Paul's church, the mission-house and seminary of the Evangelical Mission of Basle, a large jail calculated to receive 600 prisoners, an hospital and a dispensary. Within the town the R. Catholics have a bishop's chapel, and three churches, with a school attached to each. Their congregations consist mostly of persons of Portuguese descent, or the descendants of natives, who, during the Portuguese supremacy, were forced to profess Christianity. The latter though retaining many of their native customs, are extremely observant of the Jewish rites and customs. Pop. 16,981.

MANGANJA, a tribe of natives, S Africa, inhabiting the country S of Lake Kuyasa and Shire, between these lakes and the Zambesi and on the Shire. The Manganja follow the pursuits of spinning, weaving, smelting iron, and cultivating the soil. They are an industrious race, and all the people—men, women and children—work in the fields. Large crops of the maize (*Zoëa arizonæ*) are raised with millet, beans, and ground-nuts; as well as yams, rice, pumpkins, cucumbers, cassava, sweet potatoes, tobacco, and hemp. Maize is grown all the year round. Three varieties of cotton have been found in the country—two foreign and one native. The foreign species or foreign cotton, is of excellent quality nearly equal to the best New Orleans. It is perennial, but requires replanting once in three years. A considerable amount of this variety is grown in the Upper and Lower Shire valleys. The indigenous cotton is of shorter staple, and feels like wool, it makes strong cloth. Iron ore is dug in the hills, and each village has its smelting-house and good axes, spears, needles, arrow-heads, bracelets, and knives are made very cheaply. In the villages near Lake Shire the inhabitants largely manufacture pottery for cooking and other purposes, ornamenting it with paintings found in the hills. Fishing nets and buckets are also made, and exchanged with the fishermen on the river or lakes for dried fish or salt. Many of the men are intelligent-looking, with well-shaped heads, pleasing faces, and high foreheads; they take great pride in arranging their hair in a variety of ways, and adorn their bodies with a superabundance of rings upon the neck, arms, fingers, and legs. The women have a most remarkable fashion in the use of the pike or lip-stick. The middle of the upper lip is pierced in youth close to the gum, and a small pin inserted in the perforation, afterwards a larger pin is put into it, and so on, the size of the pin being increased until a ring of two inches in diameter can easily be introduced.

The poorer classes make the pelvis of hollow or solid bamboo, and the wealthier of ivory or tin. The Mangrola are not a soldier people, while villages devoting themselves to the occupation of beer for days together, with much revelry. They believe in the existence of a Bygone Being, called *Mumbé* or *Morongo*, and in a future state. Formerly all the Mangrola were united under the government of their great chief *Udi*, whose empire extended from Lake *Udi* to the river *Loangwa*, but after *Udi*'s death it fell to pieces, and a large portion of it on the *Zambesi* was absorbed by the powerful southern people the *Banyal*. The tribe are much addicted to the slave-trade in connection with the Portuguese and had themselves suffered so much from it as the hands of the stronger tribe of the *Ajawa*, that at the period of Dr *Livingstone*'s journey they were being rapidly lessened in both power and numbers.

MANGROL, a *tu* India, Gujarat peninsula of *Kattywar*, on its S W coast. It is a populous place with a mosque, which is considered the finest in the peninsula; and merges on an extensive, though its harbor is very indifferent. There is another place of some note in the Rajpoot state of *Kotah*, where, on 1st Sept. 1821 *Zahur Singh*, then minister of *Kotah*, aided by the British, defeated the hereditary prince, *Kashan Singh*.

MANICA, a mountainous tract, S. Africa furnishing the sources of several of the S affluents of the *Zambesi* about lat. 18° S, lon 33° E. It is the richest gold field in this part of Africa, long furnished the Portuguese with their chief supplies of gold, and still attracts numerous natives to its rich veins. The gold often as large as grains of wheat, is collected by the natives in gossamers, for each of which they expect to receive 24 yards of cotton. At *Sofala*, the nearest port to *Manica*, pieces of wrought gold have been dug up, and towns, supposed to have belonged to ancient buildings have been found. On such evidences and inferences from the Scripture narrative, some have concluded that *Manica* was the *Ophe* of *Solomon*, and *Sofala* the place where its gold was shipped.

MANIKPOOR, a *tu* India, *Oude*, L bank *Ganges*, 35 m N W Allahabad. It extends about 5 m. along the river but is a desolate plain, except for a few scattered lowly houses interspersed with ruins of handsome edifices which were pulled down for the embellishment of *Lucknow*. It still possesses an extensive brick fort, and a large and well supplied bazaar. The principal traders are money changers and dealers in grain, cloth, and hardware. On the N W of the town is a large structure called *Shahabad*, which stands in the midst of a garden stocked with beet-root and fruit trees, and is still occupied by a descendant of the man who built it, and was at the time some part of a large part of S. *Oude*. Pop. about 50,000.—There is another *Manikpoor* dist *Dacca*, 44 m S W *Bareilly*.

MANITOBAH [add] a lake, British America, between lat. 50° 25' and 51° 50' N and lon. 98° and 100° W. It is of very irregular shape, and by means of deep indentations near its centre is divided into two nearly equal portions. Of these the southern is somewhat elliptical and the northern is again subdivided by a neck of land, the E. side of which is washed by a part of the lake lying very close N. while its W side is washed by a still larger part lying S. W. The whole length from S. E. to N. W. is 120 m. and the breadth, where widest is about 25 m. The depth within 100 yards of *Steeple Rock Point*, on the N. E. shore was found by soundings to be 84 fathoms. In many places large boulders are piled up high upon the beach, with a swamp behind them. In other places horizontal beds of Devonian limestone of a pale buff color stand close to the water's edge, and is worn into caves; and in not a few localities the beach is composed of water-worn pebbles strewn over a bank of sand. The str. of these, which gives the lake its name, and is situated near its centre where it is narrowed, is about 600 yards long by 200 broad. A perpendicular limestone cliff on its N. side contains a number of caverns. Neither these nor the other caverns on the islands and the shore are ever visited by the native Indians, because they believe them to be the abodes of evil spirits. The origin of this appellation in relation to *Manitoba* Island, says Mr *Blind* is due to the sounds produced by the waves as they beat upon the beach

at the foot of the cliffs near its northern extremity. During the night-time, when a gentle breeze is blowing from the N., the various sounds heard on the island are quite sufficient to strike awe into the minds of the superstitious Indians. These sounds frequently resemble the ringing of distant church bells, or some muffled in this resemblance that several times during the night I awoke with the impression that I was listening to chimes. When the breeze abated, and the waves played gently on the beach, a low whiling sound would be heard at our camping place about 300 yards from the cliffs where the noise was produced. At night it was peculiarly impressive, and as we lay on the most-covered rock it was very easy to comprehend the objection which uneducated Indians, naturally of a fanciful and superstitious turn of mind have to land or remain on this "fairy" island. On the southern and south western shores of the lake a series of splendid prairies commences, and stretches far back into the interior and at its S W extremity where its principal feeder, *White Mud River*, enters it, there is a fishery, where great numbers of white fish are caught. Lake *Manitoba* communicates on the N W with the *Winnipegosis* by the *Red River* and discharges itself on the N. E. by the *Fairfax* *Croft River* carrying its waters into Lake *Winnipeg*, from which they are forthwith transmitted to Lake *Winnipeg*. On the W. side of Lake *Manitoba* the Hudson's Bay Company have a station called *Manitoba House*. The R. Catholic mission at the same place has been abandoned.

MANITOU a river British America, which has its mouth on the N. shore of the estuary of the *St. Lawrence* to the N W of *Antwerp*. The channel at its entrance is 60 yards wide, with a depth of 5 ft. at low water 9 ft. in spring and 13 ft. in spring tides. The depth within increases gradually for 1 m to 5 fathoms. Here the first rapid occurs, and makes further navigation impracticable. Half a mile farther up the *Manitou* plunges in one unbroken sheet of water over a precipice of granite and porphyry 113 ft. high forming one of the most beautiful cascades to be found in Lower Canada.

MANITOWOC, a *tu* U States, Wisconsin, on the W shore of Lake *Michigan* at the mouth of the river of the same name in lat. 44° N. It is of very recent origin, but has already acquired an important trade, and is rapidly rising into importance. A large proportion of its inhabitants are Germans. Pop. (1860) 8055.

MANJERA, a river India, which rises in lat. 13° 44' N, lon 75° 50' E. flows S. E. through the *Vizian* Dominions, and joins the *Godavari* on its bank near the town of *Shungum* after a course of about 170 m.

MANIKORE on *MANIKORE*, a *tu* India, *Bengal* dist and 33 m N W *Burdwan*. It is a considerable mart for the rice which is extensively grown in its neighbourhood and has a pop. of 8862.

MANPOOR, a *tu* India, *Rajpootana*, state and about 56 m. N. E. *Jaypur*, on the *Hau* or *Banganga* a water course which becomes a large stream during the rains. It is surrounded by a ditch and by a mud rampart 12 to 16 ft. high, with eight good semicircular bastions, and has a population of about 6000.

MANFIELD a *vil* U States, Connecticut, on the *Newburg River*, and on the *New London* *Wilmington* and *Palmers* railway 24 m. E. *Hartford*. It is noted chiefly for its production of silk, which gives employment to several factories. The other industrial establishments are one woolen factory two for cotton, three tanneries, four flour and five saw mills. Pop. (1860) 1697.

MANTA, a *tu* S America, Ecuador prov *Manabí*, 110 m N W *Guayaquil*. It is the principal port of the province, and notwithstanding a considerable swell has a good landing. The only danger is from patches of shoal which extend about three-quarters of a mile from the shore. The principal exports are straw hats and hammocks.

MANTTSCHSKAIA, a *tu* Russia, gov. *Dou Cosmaka*, circle *Nova-Topherat*, L bank *Mantychi*, with three yearly markets and 5048 inhabitants.

MAPATIZIA, a small stream S. Africa, a tributary of the *Zambesi*, which is joined on its L bank, about 90 m. E. of the *Victoria Falls*. In its bed is much calcareous sand, and the *Tetta* gray sandstone which usually overlie coal.

MARAND on MERRAND, a m. *Paria*, prov. of *Astur*, about 35 m. N. W. of *Salamanca*, was once a flourishing and important place, and though almost of 140 ancient glaciers, still contains upwards of one thousand houses. A garden is maintained here, on account of its proximity to the *Roman* frontier.

MARAPI, the name of two native villages in the *Tuluan Archipelago*. The one, situated on the S. W. of *Samar*, about 37 m. S. of the equator, has an estimated height of 3000 ft.; the other, situated near the centre of *Java*, about 50 m. S. *Samarang*, has a height of 5350 ft. Though evidently in a state of activity, there is no record of any great eruption, and hence the sides are in many parts cultivated two-thirds of their height.

MARAR, *VEN RAR* or *FRAMES* or, a plain of the *Samuel* country *E. Africa*, stretching from N to S. between the altitudes of a rugged plateau on the S., and a range of rocks called *Guray*, shooting off from the highlands of *Hazar* on the W. Its breadth is about 27 m., its precise length is scarcely known. The N. portion of it belongs to the *Rena*, the S. to the *Habr Awal* tribes. Its surface is gently rolling ground, with a soil of black earth which proves its natural productivity by the tall waving grass which grows upon it. It is broken by frequent ridges or water-courses, which can easily be traced even at a distance by their border of dense thickets of scrub and thorn trees and the rich verdure of the grass. Thus fertile, which wants nothing but cultivation to cover it with fruitful cornfields, remains uncultivated mainly because it would be exposed to incessant invasions, once on it, as neutral ground, the *Rena*, *Dartel*, and *Habr Awal* meet to plunder unhappy travellers. It would seem that at one time cultivation had been attempted, for on its outer edge there are frequent vestiges of deserted farms.

MARBLEHEAD, a m. U. States, Massachusetts, on a peninsula which projects into *Masachusetts Bay* and on a railway which connects it with Boston, from which it is 16 m. N. E. It has a deep and convenient harbour and was noted from the first settlement of New England for the enterprise of its inhabitants in the fisheries. Of late years, however, these have been comparatively neglected, and the manufacture of boots and shoes has become the staple employment, which is carried on to a very great extent. The other chief articles produced are glass, ship-plank, and oakum. Many of the original settlers of *Marblehead* were from *Jersey* and *Guernsey* in the English Channel and left such traces of their native speech behind them among their descendants as almost to constitute a peculiar dialect. During the war with Great Britain in 1812 a great number of privates were fitted out here, and hence when peace was concluded no fewer than 500 of the citizens were found to be prisoners in England. Pop. (1860), 7545.

MAREH [add] a river *Abyssinia*, which rises in Mount *Dora*, near *Ade Bara*, on the plains of *Hannau*, about lat. 12° 20' N. lon. 38° 50' E. flows first easterly S. W., then N. W., and is finally lost in the marshes of *Fikik*, about 40 m. N. *Kassala*. In the province of *Taka* it takes the name of *Bahr* or *Chor-At*, and towards the end of the hot season becoming dry leaves only a number of swampy pools, the shade of crocodiles and hippopotamuses.

MARIA (Sister) a m. *Austrian* empire, Hungary, co. *Liptau* on the *Wag*; with a church, which is said to be the first that was erected after the introduction of Christianity into the country and the ruins of a castle which originally belonged to the *Thompsons*, and was demolished by the *Roman* Catholics in 1548.

MARIAMPOI, a m. *Austrian* empire, Galicia, circle and 12 m. N. E. *Kras*, a l. bank *Dniester*, nearly opposite to the confluence of the *Strizna*, with a convent of the order of *Mercy*, an old castle once a place of strength, an infirmary, and an hospital for the poor. Pop. 1860.

MARIA-NOSTRA, a vil. *Austrian* empire, Hungary, co. *South*, about 10 m. S. E. *Ipoly-Seg*; with an old *Pauline* monastery and a female penitentiary and house of correction large enough to receive 600 convicts.

MARIA POOL, a m. *Austrian* empire, Hungary, co. *Sebolcs*, 50 m. N. N. E. *Debrecen*; with a *Pauline* monastery and a chapel, in which numerous pilgrimages are made. Pop. 1860.

MARIA THERESIOPOL, a m. *Austrian* empire,

Bohat, circle and 35 m. N. E. *Kombar*, on *Lake Fellech*, near the frontier of Hungary. It contains a royal free town and 16 suburbs and has several churches, of which the high church and a handsome Greek church are particularly deserving of notice; a *Franciscan* monastery, with a fine church, a gymnasium for which handsome buildings have been provided, a townhouse, large barracks, a town-hospital, extensive manufactures of linen and boots and shoes, tanneries, dyeworks, four yarns markets, and an extensive trade in horses, turned cattle, sheep, raw hides, and wool. Pop. 35,499.

MARIENBURG a m. *Austrian* empire, Transylvania, circle and 12 m. W. *Kronstadt*, cap. dist. of same name, with the ruins of an old castle built by the *Teutonic* knights. In the vicinity the *Siebenbürgen* were defeated by the *Moldavian* wolf Peter in 1529. Pop. 1900.

MARIETTA [add] a m. U. States, Ohio, cap. co. *Washington* at the confluence of the *Muskingum*, and at the terminus of the *Marion* and *Commonwealth* railway, 80 m. S. E. *Columbus*. It consists of wide streets and neatly built houses, and contains a court-house and jail twelve churches, a college, with 5 professors, 50 students, and a library of 25,000 volumes; a lyceum, a women's institute, founded by the *Universities*, two academies, and a union academy of *Marion*, which was settled in 1788, and named in honour of *Maria Antonette*, is the oldest town in the state, and most occupy the site of a place so ancient that no record of it remains, though the spot of its existence is placed beyond a doubt by a group of ancient works consisting of two large irregular squares with a covered way and sundry mounds and truncated pyramids. Pop. (1860) 4333.

MARIQUANA, an isl. *West Indies*, situated among the E. portion of the *Bahamas*, is 25 m. long from E. to W. 6 m. broad at its W. end, about 4 m. at its E. end, but not 2 m. across at its centre. Its general height above the sea does not exceed 80 ft. but near its centre there is a hill which rises to the height of 100 ft., and behind its E. end, there is a long flat ridge 90 ft. high. Its inhabitants who in 1857 amounted only to 20, reside at *Delley Bay* near the W. extremity. Its W. side is so bold that soundings do not reach more than 200 yards from the shore. The anchorages, of which there are several, are fit only for coasters of light draught. Good water is found, and wood abounds on the island.

MARINEK, a m. *Russian* empire, *Manchuria*, on the branch of the *Amur* which communicates with *Lake Kien*; lat. 51° 40' N. lon. 140° 30' E. It was founded in 1851 to serve as a trading post of the *Russo-American* Company, and in 1855 extended for some distance along the river, and was defended by two batteries. The intention was to make it the chief settlement on the river, but owing to the insufficient depth of water this intention was abandoned. The batteries have in consequence been dismantled, and the government establishments have been removed to the newly founded town of *Boyskay*. A road leads from *Marinek* along the N. shore of the lake to *Cassins Bay*.

MARILE, a river *Africa*, a branch of the *Lambya*, which, quitting it by its l. bank in lat. 15° 15' 48' S. flows S., and by again uniting with the main stream converts the whole of the intervening country into an island. Dr. *Living* stone, who sailed down this branch from its departure to its reunion with the *Lambya*, found it to be a fine deep stream, about 60 yards wide.

MARIADUQUE [add], an island *Indian Archipelago*, belonging to the *Philippines*. It forms part of the prov. *Mindoro*, lying between this island on the N. W. and *Laon* on the E. It is about 33 m. long by 30 m. broad, and has an area of 578 sq. m. Its soil, naturally fertile, is much improved by irrigation, and produces rice in such abundance as to leave a considerable surplus for export. *Maing*, on its S. coast, affords a safe and commodious haven for coasters. Pop. about 30,000.

MARINE, a group of islands, *S. America*, *Chili*, in the Gulf of *Cape Tres Montes*, lying in lat. 46° 58' 53' S. lon. 75° 37' 50' W. It was so named by *Byron*, because his perukes had voluntarily resumed the wreck of the *Wager*. On one of the islands a mountain called the *Sugar Loaf* rises to the height of 1846 ft. and forming a very conspicuous object,

was seen by him the day before his shipwreck. To another equally remarkable mountain, situated upon the mainland, about 6 m. from the Roger's Reef, and 2284 ft. high, he gave the name of the Dome of St. Paul. The Gulf of Cape Tres Montes, in which the group lies, occupies a space of 16 m. by 12 m., and the cape itself forming the S. extremity of the peninsula of Tayate is a bold and remarkable headland which rises from the sea to the height of 3000 ft. and being free from all outlying dangers, is one of the safest and easiest of landfalls.

MARION, a vill U States, Alabama cap on Perry near the Cahawba River and on the Alabama and Mississippi railway, 198 m. N.W. Mobile. It has five churches, a Baptist college, an academy, two large female seminaries and a number of flourishing private schools. Pop. (1860), 1406.

MARIVELES, a tn. Philippine Isles, on the peninsula which forms the W. side of the Bay of Manila, in the island of Luzon. It is situated between two small rivers, which fall into its harbour and consists of 388 houses. The chief productions of the vicinity are rice, maize, sugar-cane, cotton, and the abaca banana. Pop. 1407 mostly employed in fishing.

MARJA (Kun), a tn. Austrian empire, Hungary co. B. Bihar, 14 m. N.W. Grosswarden, with the ruins of an old castle and weekly and yearly markets. Pop. 1900.

MAREHAM, a tn. British America, Canada West, co. York, 14 m. N.N.E. Toronto. It stands on the Rouge, a fine stream rising in the ridges of Whitechurch, and falling into Lake Ontario; and possesses five churches and several schools, a foundry and machine works, tanneries and manufactures of agricultural implements, carriages, &c. Pop. about 1000.

MARCOVCHA, a vill European Turkey, 15 m. S.E. Shumla. It is a flourishing place, with larger houses than usual, all of them neatly tiled and some of them of two stories. Within it are two Roman fountains.

MARTECHELLEN, a tn. Austrian empire, Transylvania, circle and 17 m. N. Hermannstadt, cap. dist. of same name with a large trade in wine, and 1360 inhabitants.

MARLBOROUGH, a prov. New Zealand, forming the N.E. portion of South Island or New Munster, is bounded N. and E. by Cook's Strait and the ocean, and S. and W. by Nelson, extreme length, 140 m.; extreme breadth, 60 m. area, 2,500,000 ac. The S.E. portion consists mainly of the Waikato plains one of the finest sheep districts in New Zealand, the N. is rugged and densely wooded, and has its coast indented with narrow creeks and bays of every size and shape. Queen Charlotte's Sound, situated near its centre, and about 35 m. long, forms a boundless ocean capable of receiving the whole British navy. Palmer's Sound is still more spacious and embraces about 250 m. of shore and beach. From the edge of the water behind these creeks and bays the mountains rise at once so abruptly as scarcely to leave any margin whatever available for cultivation. Pictorial the capital, though still unimproved, is so advantageously situated on a deep sea harbour formed by an arm of Queen Charlotte Sound, that it can hardly fail sooner or later to rise into importance.

MARLING, a tn. Austrian empire, Tyrol, circle Brann with an infirmary and a posthouse. In the beautiful surrounding district there is a much-frequented bathing establishment. Pop. 1200.

MARSHALL, a tn. U. States, Michigan, cap. co. Calhoun, on Kalamazoo River and the Michigan Central railway 70 m. E. Lake Michigan. It possesses ten churches several schools, and a number of mills and manufacturing establishments. Pop. (1860) 8788.

MARTE, a tn. Western Africa, Bornu near the S.W. extremity of Lake Chad, 40 m. E. Kukwa. It has a clay wall in good repair, with two gates leading to the market, and one gate in each of the other sides; and contains for the most part of clay buildings lying narrow lanes. Besides the town proper there is a suburb of large conical thatched huts. Pop. estimated at 4000.

MARTELLAGO, a tn. Italy prov. and 10 m. N.W. Vercelli, with a parish church, and 2659 inhabitants.

MARTIN, a tn. U. States, separated from the mainland by Vineyard Sound. It has a length of 21 and an average breadth of 6 m. and a surface generally level and tolerably well wooded. It forms the principal part of so Duke, containing the three towns of Edgartown, Chilmark, and Tisbury, and contains 4401 inhabitants, whose chief employment is fishing.

MARTIN GARCIA, an isl. B. America, La Plata, situated at the head of the Rio de la Plata, about 30 m. S. Buenos Ayres. It is composed chiefly of granite, and possesses some military importance from its being supposed to command the only navigable entrance of the Parana and the Uruguay. This has since been ascertained to be a mistake, as other channels besides that of Martin Garcia are known to exist; but on the assumption of its security Britain, France, and the United States, in concluding a treaty in 1858 for the free navigation of the Parana and Uruguay inserted a clause in which they agreed 'to use their influence to prevent the possession of the said island (Martin Garcia) from being retained or held by any state of the River Plate, or its co-fluents, which shall not have given its adhesion to the principle of their free navigation.'

MARTINSBURG, [add.] a tn. Austrian empire, Hungary co. and 10 m. S. Buda, cap. dist. and at the same time of same name. It is the seat of a court of justice and has a trade in corn and wine. On three embankments on the mountain stands a Benedictine abbey founded by St. Stephen with a beautiful church containing objects of art brought from the East and an ivory altar. There is also a library with a cabinet of coins and other curiosities. Pop. 2639.

MARTSCHANNE, a tn. Turkey in Asia Karamania, 30 m. W. Kassarab. It is properly a Troglodytic village. The houses or rather caverns, which the inhabitants occupy number about 225 and are all in possession of Moians. It was otherwise in early times, when the Christians fleeing from persecution, here found an asylum, and hence one of the most interesting of the structures is a chapel or church on which a good deal of architectural skill and labour has been bestowed. In front is a row of pillars bound together by iron rods the interior which has the altar centre and the walls covered with frescoes in tolerable preservation, is so spacious as to be well adapted for a place of worship. The dwellings of the early Christians are of course of ancient date but many of the excavations are evidently modern having been made to meet the wants of an increasing population.

MARUNGU, a territory Central Africa, washed on the N. by the Tanganyika Lake its other boundaries are not defined. According to the Arabs it is a hilly country like Ujiji and Uvira, though the heights bordering the lake have less elevation than these districts. The inhabitants bear a bad name, but Arab merchants have often visited them without sustaining any injury. They are a dark and uncivilized race, and of a surly and stubborn temper which makes them little valued as slaves. They are almost constantly at war with their neighbours. A river which, passing through their country, bears the same name, is said to be one of the most important feeders of Lake Tanganyika, which receives its waters as its S.W. extremity. At present nothing more is known of it.

MARYSVILLE, a tn. United States, California, cap. co. Yuba, on the Yuba, a mile above its junction with the Feather 110 m. N.N.E. San Francisco. It contains Epist. copal, Presbyterian, Methodist, Baptist and R. Catholic churches. The population is largely increased by the influx of miners during the rainy season when they are obliged to discontinue operations. Pop. 4740.

MARZDORF, a tn. Austrian empire, Bohemia, circle Königgrätz near the frontiers of Silesia, with a church and three mills. At the W. end of the place there is a remarkable rock, with a natural passage through it called the Stone Door.

MARAYA, a tn. Central America, Nicaragua, 12 m. N.W. Granada. It stands in the centre of a very fertile district, and the inhabitants, chiefly Indians, are distinguished for their general industry, and the manufacture of hats, and the hammocks, cordage, &c. In the vicinity is a lake of same name, in the N.W. border of which the volcanic mountain of Maraya rises to the height of 5300 ft. As its last eruption took place in 1870, it was supposed to be extinct, but within

the last few years it has begun to show signs of activity, and in 1880 sent out great volumes of smoke, which at night were illuminated from below with a lurid glare like a furnace. Pop. 18,000

MABATE [add.], an Isl. Buluan Archipelago, belonging to the Philippines, and situated between Lavea on the S.E. Sumar on the E. and Pampay on the S.W., area, 1344 sq. m. It is traversed throughout by a crescent-shaped mountain chain, and has apparently a sterile soil without natural facilities for irrigation. A considerable quantity of gold is washed from its sands. Mabate along with the smaller island of Tessa, forms one of the Philippine provinces. Its capital, San Joaquin, situated on the latter island, has a good harbour. Pop. 2648, or only 2-3 to the square mile.

MASCHISCHI KUTU, a vil. S.W. Africa, territory and about 20 m. S.W. Komsabon-Bind on a river and in a beautiful valley of the same name. It consists of houses constructed of poles with clay between them, and thatched with cane. To each house one, and sometimes two, well-fenced courts are attached and throughout there is a general appearance of neatness and comfort. Ladislaus Magyar, the African traveller has made this village his home.

MABOUCHIE, a in British America, Canada East, co. L. Assumption, 1 bank St. Lawrence, 20 m. N. Montreal; with a R. Catholic church and college, and a considerable trade in petash, flour and lumber. Pop. about 5000

MABEBA, a in the Amara district, 100 m. A.E. Lake Chad and 200 m. S.E. Kufawa. The wall which is in a state of great decay has a circuit of about 7 m. but not more than half of the area thus inclosed is inhabited. There are nine gates, most of these on the S. side, and not a single one on the N., because in this quarter it is overgrown with jungle. The houses, some of them of clay and more of mud and straw are generally well constructed, and thatched with cane and sometimes. The streets are very irregularly formed; indeed from the narrowness of the site it could hardly be otherwise. A deep trench, his deepness increases the town from E. to W. and becoming during the dry and the rainy season alternately clothed with verdure and dried with water renders the air almost pestiferous. To add to the miasma, all the sewage of the place finds its receptacle in this trough or fosse, as it is called. On its S. side stand all the principal buildings, including among others the sultan's palace, built of baked bricks, and inclosed by a wall 18 ft. high and 10 ft. thick, the residences of the principal officials, and a mosque with a minaret. There is no appearance of industry, and the market which is of limited dimensions, is indifferently supplied. The principal articles exported in it are grain, beads, ground-nuts, salt, cotton, milk and butter, turbanes from Kano, honey, and red pepper retailed in small parcels by Bornou traders. The most important article from Europe is beads, especially the small red ones, which are sold in large quantities to be carried to other countries. Ivory is sold in the markets, but in the houses of the traders; the same rule being followed in regard to slaves, it is impossible to form any estimate of the number sold.

MABEBA, a in Central Africa, Bornou cap. dist. of same name, 150 m. N.E. Kano. It occupies the S. slope of a height crowned with a rocky crest, is inclosed by a ditch, a thorny fence, and a clay wall. It has not the least sign of industry; the government being too weak to protect the rights of property, or punish the constant depredations of its own officials. The greatest ornament of the district is the tamarind-tree. Pop. at least 10,000.

MASKINONGE, a in British America, Canada East, cap. co. of same name 1 bank St. Lawrence, 25 m. N. Montreal; with a R. Catholic church, several tanneries, a saw, grist, carding, and filling mill, and a general trade. Pop. about 4000

MASABANGAO, a in S.W. Africa, Portuguese Settlements, prov. Angola, at the confluence of the Lomama with the Cooran, 110 m. S.E. Loanda. It is situated on a tongue of rather high land between the river, composed of calcareous tufa with great numbers of fossil shells, and is surrounded by a fort of small dimensions, but in good repair, and containing some very ancient guns which were looted from the bush. In two churches, two convents, and hospital are noted relics, and there is now neither priest nor schoolmaster in the town. The district is well adapted for sugar and rice, and the Cooran,

which is a noble stream about 250 yards wide, notwithstanding a bar at its mouth, is navigable by large canoes, of which ten or twelve laden with country produce pass here daily. Masabangao was a very important town when the Dutch held possession of Loanda, but on their expulsion in 1648 was allowed to slack to its present decay. Pop. of it 1000, of dist. 28,000

MABILLON a in U. States, Ohio, on the Tuscarawas, the Ohio canal, and the Pittsburgh, Fort Wayne, and Chicago railway 180 m. N.E. Cincinnati. It possesses seven churches a woolen factory, three machine shops, three foundries and carries on an active trade in grain, flour and wool. Pop. 16,000, 2819

MABONGGHO, or KREMBID, a territory S.W. Africa, Kintshunda country, between lat. 17° 30' and 11° 30' lon. 17° 30' and 18° E., bounded N. and E. by the Camero, S. Bida, and W. Andole and Baidande, area about 4500 sq. m. It consists of finely undulating plains, on which large forests alternate with still larger grassy prairies, is well watered and produces much manioc, maize, and wax, which find a market at Porto-Andango. The inhabitants are a thievish, stiff-necked and superstitious race. Pop. 100,000

MABULIFATAM [add.] a in India, presid. and 220 m. N.N.E. Madras, on a low flat on the Bay of Bengal, near one of the mouths of the Kistnah. It consists of the petash or native town, the fort, and the cantonment. In the petash which extends about 5 m., the houses of a better description are built of brick or mud of a convenient height, with good sized doors and small windows, while those of the poorer classes are wretched huts of a conical form, and constructed of bamboo thatched with palm-leaf leaves, and possessing a single entrance which better deserves the name of a hole than of a door. The fort, situated about a mile to the S.E., stands in the middle of a swamp, and is reached from the town by means of a causeway. It is in the form of a rectangle, 800 yards long by 600 broad, inclosed by high walls and a wide but shallow ditch. Within it are the arsenal, powder-magazine, garrison hospital barracks for a European regiment, a Protestant and a R. Catholic church, and residences for several of the European officers, who, however, seldom occupy them. The cantonment, which adjoins the petash, is about 4½ m. long by 1 m. broad. It is irregularly laid out, and has many inequalities, which becoming filled with water during the rains, remain as stagnant pools, till the air evaporates or the light sandy soil absorbs them. The public buildings within the cantonment are the provincial and miltary courts, the collector's cutcherry, the jail, the barracks for a native regiment, the lines for a company of artillery, and a chapel. Religious ordinances and instruction are further provided for, in addition to the churches already mentioned, by a Protestant and a R. Catholic church within the petash and by three ordained missionaries, a catechist, and two assistant schoolmasters belonging to the Church Missionary Society. The manufactures consist chiefly of cotton goods, plain or printed including towels, table-linens, tartans, gingham, and shintzes. These about half a century ago were carried on to such an extent, that the trade to the Furum Ghat amounted in value to about half a million sterling. In consequence of British competition it has dwindled down to about 250,000. In the heart of the petash the French possess a patch of ground about 800 yards square. It is called France Petash, and being excluded from the jurisdiction of the British authorities, is an favorite rendezvous, being full of toddy-shops and manglers. Pop. 27,884.

MATAGORDA a in U. States, Texas, cap. co and near a bay of same name, 30 m. S.W. Galveston. It stands on a high prairie, contains two churches, an academy, and a number of stores and, as an outpost for the produce of the fertile Colorado valley, carries on a considerable trade in cotton, sugar, rice, and corn. In 1854 it was nearly destroyed by a great storm, which blew down most of the houses, but it has since been rebuilt in an improved form. White pop. 1300

MATAMORAS, a in Mexico, cap. Tamaulipas, 1 bank Rio Grande del Norte, about 10 m. above its mouth in the Gulf of Mexico. It consists of houses, which, at least in the interior of the town, are built of brick but the streets are unpaved, except on the sides, where there is a brick pavement for foot passengers. The best part is the public square. Here stand the church a handsome structure, the town-house,

and the custom house, with a number of private dwellings of elegant appearance. The site of Matamoros is unfortunate. On these sides it is surrounded by lagoons, and at the same time the Rio Grande embraces its northern and southern sides nearly in a semicircle. The consequence is that during the rainy season it is so flooded that many of the lower streets become impassable, and during the dry season the swamps left by the inundations become almost pestiferous. Agriculture and the rearing of horses and cattle are the chief occupations. Pop. about 7000.

MATAN, a river, British America, Canada East, formed by a N.E. and a S.E. branch, the latter of which is said to issue from a lake of considerable dimensions, flows almost equely N.W., and falls into the St. Lawrence, on its S. bank, in co. Rimouki. Its course, calculated from its most distant source, is supposed to be about 60 m. Its bar which is sometimes shifting in gales of wind, has usually a depth of 4 ft. at low water, and of 15 ft. at high water springs. Inside the bar the entrance is not more than 60 yards wide, and the channel is encumbered by large boulders, which, diminishing the depth, become extremely dangerous when there is any swell.

MATAN a tn. on the W side of Borneo, cap. state of same name, about 1° 15' S. lon. 110° 30' E. It stands at a considerable way up a river of same name, which owing to a bar, is navigable only for boats, and consists of about 800 houses, inhabited almost exclusively by Malays. The state is at present isolated in one of the Dutch provinces.

MATANÉ, a tn. British America, Canada East, on Rimouski, r. bank St. Lawrence, 240 m. N.E. Quebec, with a R. Catholic church several schools a small debt court a laundry a trade in lumber and an important fishery. Pop. about 1800.

MATAQUITO a river, Chili which bounds prov. Talca and Culegueta, and is formed by the junction of the Lonche and the Temo the former of which has its source near the centre of the Andes, in the snowy Cerro del Medio. From the point of junction the Mataquito flows nearly due W., and falls into the Pacific on lat. 34° 28' S.

MATARA a tn. La Plata prov. and 100 m. E. Santiago del Estero r. bank Salado. It has a central position, and was once a place of some consequence, though its population does not now exceed 500. This declension is mainly owing to the abandonment of extensive and the removal of families to other parts, in consequence of the frequent forays of the Indians, who, crossing the Salado by night, descend suddenly upon the country drive off horses and cattle kill all who oppose them, and before dawn have disappeared in the wilds of the Chaco.

MATARAM, a prov. Indian Archipelago Java, situated nearly in the centre of the island is bounded N. by Kadu, E. by Pang S. the sea, and W. by Pegu. The mountains of Merapi and Sumbing to the N. of it, send down perennial streams, which, giving ample facilities for irrigation, have made nearly the whole of it one ample sheet of luxuriant cultivation. Mataram forms the principal part of the domains of the sultan, who bears the title of sultan, and is said to have about 850,000 subjects.

MATARAM, a tn. Indian Archipelago, situated on the W. side of the island of Lombok, about 8 m. inland consists of regular streets which cross at right angles, and of houses of mud thatched with the palm-leaf. It is surrounded by a hedge of bamboo, and a barriade resembling a chevaux-de-frise, and contains one or more two palaces belonging to the sultan, who has made it his capital. A well constructed road, with an avenue of fig trees leads to Ampenan, which is its port. The inhabitants are chiefly Balinese.

MATAURA, a river, New Zealand, which rises in the R. of Middle Island or Munster, and flows nearly due S. into Tokoroa Bay, in Foreman Straits. It drains a large extent of valuable country but as it approaches the sea overflows a considerable tract of flat land. The depth on its bar at low water is only 2 ft.

MATCHIN or **MAHIN** a tn. Turkey in Europe, in the N.E. of Bulgaria, sited at 83 m. N.E. Salutar, on the r. bank of the Danube, nearly opposite to the place where the numerous branches into which the river had previously divided again unite. It is defended by two bad castles, and was taken by the Russians successively in 1809 1828, and 1854.

Its importance as a strategic position in former times was its proximity to Braila, which served as a *de facto* port to it, and by means of which the Turks toward Wallachia, penetrated into Moldavia and commanded the whole of the lower Danube. Pop. 8000.

MATELLE, a tn. Ceylon, Central Province, cap. dist. of same name, petrologically situated in a valley enclosed by magnificent hills partly covered with forest, and petrologically as on the plain, 15 m. N. Kandy. It figures much in the early history of Ceylon, having been one of the red dens of its kings 90 years before the Christian era. Though not possessed of any architectural antiquities to attest its former importance, several of the wealthiest of the Kandyan chiefs still select it for their residences, and traces of ancient luxury may still be discovered in the occupations of the inhabitants. They excel in carving ivory and in chasing the elaborately ornamented knives and swords formerly worn at the Kandyan court. They wear a delicate matting for covering coats, and by means of a peculiar lacquer, prepared by mixing the colours with a rancous excretion obtained from a shrub (*Croton lacciferus*), paint and ornament the covers of books walking sticks, the shafts of spears, and the handles of fans for the priesthood. About 2 m. N. of Matelle the road passes within sight of the Alu Wihara, the temple in which, a century before the Christian era, ascetics employed by the Ch. ghahee king reduced to writing the doctrines of Buddha, which had previously been preserved by tradition alone.

MATIAMVO a tn. S.W. Africa in the country of the Balonda, about lat. 8° 30' S. lon. 23° 30' E. It is the residence of Matiamvo, who gives it its name, and is the paramount chief of all the Balonda but very little is known of it. The surrounding country is said to be well peopled. The inhabitants, however, possess no cattle and the trade is very limited, consisting chiefly of ivory and slaves, bartered for calico, salt, gunpowder, coarse cottonware and beads. Though Matiamvo's power is absolute, his rule is said to be mild.

MATTABONG a tn. Bism. cap. prov. and on both sides of a river of same name, in the centre of a large plain, about lat. 13° 10' S. lon. 104° E. The country for nearly 100 m. around it is flooded soon after the commencement of the rains, travelling becomes impossible, except in boats, and the wild animals take refuge among the mountains. The Mattabong River augmented by the Klabun and the Tasawal, is one of the chief feeders of King's Lake, or Tala Sab situated to the N.E.

MATTIGHOFEN a tn. Austrian empire, Upper Austria, circle of the Inn, cap. dist. of same name, in a romantic neighbourhood 58 m. W.S.W. Linz. It is the seat of several public offices, and has an imposing parish church an old castle, several Roman antiquities a porch-house a female seminary, and various manufactures, and contains 1300 inhabitants.

MATUCONG, an isl. on the W. coast of Africa, 60 m. N. Sierra Leone. It is separated from the mainland by a channel which is not more than three-quarters of a mile wide, is chiefly composed of lava capped with two large pieces of granite, and though only a mile long and surrounded in all directions by rocks and mud-banks, is remarkable for the beauty of its appearance. This beauty consists in its gentle slopes, which are in striking contrast to the low swampy tract opposite, in the luxuriance of the trees, and the rich verdure of those spots which have been cleared. The island is the property of a merchant of Sierra Leone, who rears great numbers of cattle upon it.

MATUMMA, or **EL MATZEMMA** a tn. N. Africa, Kabilia, cap. dist. of same name, 1. bank Nile, 80 m. N.N.E. Khartoum, lat. 18° 28' N. lon. 28° 18' E. It is a place of some importance, with a garrison of Turkish irregular cavalry, or Bashi Bazooki and consists partly of houses of sun-dried bricks, and partly of round huts made of the gourds or wattle, each with a round conical thatched. Property speaking there are no streets, such inhabitants erecting his own house or hut wherever he pleases. All appearance of regularity and symmetry is thus lost, except toward the centre, where there is a large open space on which an important weekly market is held. Matumma is celebrated for the manufacture of coarse cotton bark, with blue or red borders, the common dress of both sexes in Sudan. —(Puffer.)

MAUCH CHUNG, a tn. U. States, Pennsylvania, cap.

to Ochoyes, on the Lohuag, at the mouth of Mauch Chuch Creek, 70 m. N. W. Philadelphia. It is built chiefly on the creek, is a spot so bounded in by the Mahoning and Sharp Mountains that there is no room for gardens to the houses, and it derives all its importance from the coal and iron mines in its vicinity. Both are extensively worked, and supply material to several blast-furnaces, of which two of large dimensions are close to the town. Pop. (1880), 4908.

MAULE, a prov. Chili, bounded N. by the river of the same name, E. by the State and province of Nuble, E. by the Andes, and W. by the Pacific Ocean about 150 m. long, and 60 broad. The River Maule, one of the largest in Chili, traverses it in its whole extent, and rises from the slopes of the great mountains Combarbaro and Duenho, and in its course westward receives many tributaries, some of no small note, such as the Malaga, the Longomilla, Fichaman and Ralco, which raise it at last to the dignity of a great river. It falls ultimately into the Pacific, forming a bar at its mouth difficult at all seasons and sometimes dangerous to it, however navigable by vessels of 300 tons as far as its confluence with the Longomilla. The Maule was the limit of the Peruvian conquest under the Incas prior to the arrival of the Spaniards, and here also the latter had to encounter the onslaught of the three Pissacunas, who occupied the southern bank of the river and for a time successfully disputed its passage. The land is everywhere of the richest description; it yields its fruit with a bountiful hand and with little labour. It produces maize, pulse wheat, barley timber excellent cheese, wine, cattle, and milk, large supplies of which find their way to other provinces, and particularly to Valparaiso, being conveyed down the Maule as far as the port of Constitución, and thence conveyed to the northern parts of Chili. The country abounds in timber remarkable for strength and durability, and therefore well suited for shipbuilding, a branch of industry which has for some years engaged the attention of the inhabitants, and seems on the increase. It also possesses good washings, but not of any great value. The chief town of the province is Cauquenes, situated in a narrow valley near the Andes, and with a pop. of 3191. The hot springs of this place have long enjoyed great and deserved celebrity in Chili, and are much frequented by invalids from every part of the country. Some of the springs have a very high temperature, making very powerful in rheumatic and cutaneous diseases. The scenery of the rivers is of the most romantic and attractive kind, and the climate eminently salubrious. Pop. 118,908.—(*Guía de Chili, Repertorio Nacional*.)

MAUNGAMAKA, a river New Zealand, in the N. of North Island or Ulster, though only a tributary of the Hakepapa, is of considerable importance, being navigable for 8 m. at low water for vessels drawing under 12 ft., and also much used in floating down timber.

MAUTERN a tn. Austrum tempus, Lower Austria, 7 km. Danube, opposite to Stara with which it communicates by a bridge, 37 m. W. W. Vienna. It is the seat of several public offices, occupies the site of the Roman Muturn, and has a church with an ancient tower, a castle, an hospital and a trade in wine which is produced to a large extent in the district.

MAU-AL-EK-KARRAY, a tn. India, presid. Madras, dist. Travancore, 52 m. S.E. Cochin. It consists chiefly of a large and regular fort, of a square form, about 2 m. in circuit, and surrounded by a wall of red stone and mud, with 24 bastions, and a gateway on each side. The interior is laid out in neat streets, which cross at right angles, and are lined with compounds and houses belonging to Nairs, who form the great body of the population. In the centre is an ancient temple on the R. side a spacious palace, where some of the royal's relatives reside, and on the E. side several public offices. Outside the fort there is a long street inhabited by native Christians, who have a neat church.

MAWO a tn. Western Africa, Kamerun, of which it is considered the capital, 50 m. N.E. of Lake Chad. It is surrounded by a wall with a much more ample circuit than the present population requires, and is adorned with a great number of date-trees. Owing to the essential state of the country the weekly market has lost its importance, and it is even difficult to say where the power of government resides. This rival state Wadai and Bornou both claim it, and hence there

are generally two Khalifs or governors in the place, the one actually in power, and the other on the watch for an opportunity to expel him. The inhabitants seem to belong to a peculiar race. Near Mawo are several fenced villages, where the date-tree grows in greater or less abundance. The most famous of these is the large valley of Karafa. Pop. about 4000.

MAYON, an active volcano, Philippines Isles, in the S.E. of the island of Luzon. It forms part of the great Cordillera which traverses the island, and has its crater in lat. 18° 14' 40" N. lon. 118° 24' 50" E. Repeated eruptions have occurred since the first arrival of the Spaniards. On Jan. 1768 destroyed the town of Malinao, and did great injury to Albay the capital of the province, and four other towns; another in 1814 destroyed the entire town of Albay.

MAYOR, or **TURUA**, an isl. New Zealand, in the Bay of Islands on the N.E. coast of North Island or Ulster about 14 m. from the mainland, from which it is separated by a channel from 40 to 50 fathoms deep. It is 2½ m. long by 1½ m. broad, has a circuit of 7 m. and rises in its N. peak to the height of 1100 ft. Its centre is an extinct crater with a stagnation of water in its bottom, the W. face is covered with blocks of obsidian which give it a remarkably dazzling appearance when reflecting the sun's rays near its S.E. extremity is a pali, strongly defended by a deep and partly artificial cut through which assailants must approach, as the other sides have steep cliffs down to the water. Immediately W. of the pali is a bay with anchorage over a sandy bottom.

MAYSVILLE a tn. United States, Kentucky cap. co. Mason, on the Ohio 60 m. E. K. Cincinnati. It is built along a bend of the river, and has a background of hills, which give it a very attractive appearance. It contains county buildings, a handsome city hall and several churches, many schools, and an hospital and is extensively engaged in the manufacture of cotton and hempen fabric. It has moreover several iron foundries, a large coal-oil refinery and a large bagging factory. Its hemp market is the most extensive in the United States. Pop. (1860) 6106.

MAZATLAN [add] a seaport in Mexico, dep. Chinaloa, on a bay of the Pacific, lat. 23° 11' 48" N. lon. 108° 23' 45" W. It has a very picturesque appearance, built on sand and land, all the houses being either whitewashed or painted in light colors. Part of the houses are built on the rocks immediately beneath some detached rocky hills of a conical shape which are situated on the N. side and project so far as to be washed by the sea, but the best portion of the town occupies a lower level, facing either the harbour or the roadstead. Both of these are well protected on the S. by some rocky islands, but when the S.W. wind blows, large vessels which from the shallowness of the harbour are obliged to anchor in the roadstead, are completely exposed. Though the streets are rather narrow Mazatlan is on the whole regular and substantially built, many of the houses, particularly the street leading from the plaza to the roadstead, being built either in the old Castilian style, with short columns, Moorish capitals and ornaments, or in a style of elegance and comfort more in accordance with modern taste. The plaza, on which most of the public buildings are situated, is a fine large square, planted all round with orange-trees, and inclosed by iron railings and stone benches. The shops are generally well supplied, and there is a large wholesale and general trade carried on mostly by foreigners. The principal exports are silver dollars, Brazil or Luma wood, and pepper in regular quantities, gulchivars, provisions, British crockery and hardware, French and German dry goods, tea, sugar, and machinery. The government monopoly of tobacco and cigars, owing to the universal consumption, produces a large revenue. The pop. estimated from 13,000 to 15,000, is much mixed, consisting of Spaniards, Old Aztec Mexicans, Indians, and negroes.

MAZITE, or **MAZRU**, a tribe of natives, S. Africa, occupying the country W. of the northern part of Lake Nyassa, about lat. 11° 30' S., lon. 85° E. They live in the highlands, and are Kafir who came originally from the south coast of Swahili and Inhambane, and in the same family as those on the Koshah. At the time of Dr. Livingstone's exploration they were spreading themselves over the adjacent country, murdering and enslaving the inhabitants, and burning their villages. The population had all been swept away.

ruined villages, broken steatite, and human skeletons, met with at every turn, told a sad tale. Dr. Idington himself is reported to have fallen a victim to the ferocity of this tribe, and to have been murdered by them, with the most of his party about August, 1866. But there is yet (May, 1867) room to hope that this report is untrue.

MBUTUDI, a vil. Western Africa, Adamawa, in a mountainous district, 185 m S by W. Kakawa. It encloses a mass of granite which rises to the height of about 800 ft. above a plain covered with rich herbage and flowers, among which the violet is conspicuous. The mountain at its base has a circumference of about 600 yards, and at one time the village, encircling it on all sides, formed a kind of natural citadel, which defied the Fulbe. The ascendancy of this tribe has all but ruined Mbutudi which has now little to boast of beyond its picturesque landscape.

MEADVILLE, a tn U States, Pennsylvania, cap co Crawford, 1 bank French Creek, an affluent of the Allegheny, 75 m N by W Pittsburg. It contains eight churches, a band some court-house, a state arsenal, and a Methodist Episcopal college finely seated on an adjoining height, with 6 professors, 104 students and 8600 vols. Standing in a fertile district, for which it is the principal market, Meadville carries on an extensive trade. Pop. (1860), 3709.

MECCATINA an isl and cape, British America, on the coast of Labrador, S W from the Straits of Belle Isle. The island, called Great Meccatina to distinguish it from another of less dimensions and about 2 m. distant from the mainland, is about $\frac{1}{2}$ m. long, and rises near its centre to the height of 600 ft. Its granite hills are fissured in a remarkable manner by empty basaltic dykes which traverse it from side to side, N. E. to S. W. On its N. E. shore there is a cove a mile deep and about 400 yards wide, where the water securely winds by a cluster of small islands and rocks lying off its mouth but leaving a safe passage between them. Another and better harbour, small but safe, with good anchorage in 6 to 7 fathoms, is formed between the island and the mainland.

—The cove, a long and remarkable promontory situated on the coast about 4 m W W of the island, rises directly in the rear of Meccatina harbour not less than 700 ft. above the sea, and is the highest land on this part of the coast. Its granite is traversed by enormous basaltic dykes similar to those on the island. They cut completely through the cape into Foul Bay according again on the E. side of the latter till they are lost to view beyond the summits of the hills.

MEDINA (Es) [add.] The following description of this famous city so little visited by Europeans is condensed from the *Fuṭuḥ* to *El Medinah* and *Mecca*, by Lieutenant (now Captain) R. F. Burton.—El Medinah consists of three parts—a town, a fort, and a suburb little smaller than the body of the place. The town itself is about one-third larger than Bana, or about half the size of Mecca. It is a walled inclosure forming an irregular oval with four gates. The Bab el Shamal, or Syrian Gate, on the north-west side of the enclosure leads towards Jebel Obod Hamzah a burial place, and the mountains. In the eastern wall the Bab el Jumrah, or Friday Gate, opens upon the Hajd road and the cemetery El Bakia between the Shamal and the Jumrah gates, towards the north, is the Bab el Ziyah (of Hospitality) and westward the Bab el Mieri (Egyptian) opens upon the plain called the Barr el Munkabih. The eastern and the Egyptian gates are fine massive buildings with double towers close together, painted with broad bands of red, yellow, and other colours not unlike that old entrance of the Cairo citadel which opens upon the Rumsayyah plain. In their shady and well-watered interiors, where fine rooms to keep guard camel-men disputes, and numerous idlers congregate, to enjoy the luxuries of coolness and companionship. Beyond this gate, in the street leading to the mosque, is the great bazaar. Outside it lies the Suk el Khawariyah, or green-grocers' market, and the Suk el Hababab, or the grain bazaar with a fair sprinkling of coffee-houses. These markets are long masses of palm-leaf huts, blackened in the sun and wind, of a mean and squalid appearance, descending greatly from the

appearance of the gate. Amongst them there is a little domed and whitewashed building, which I was told is a shrine or public fountain. In the days of the Prophet the town was not walled. Even in El Edrisi's time (twelfth cent.), and as late as Barutma's (eighteenth cent.) the fortifications were walls of earth, built by order of Kham el Daulat al Ghori who repopulated the town and provided for its inhabitants. Now, the enclosures is in excellent condition. The walls are well built of granite and lava blocks, in regular layers, cemented with lime; they are provided with "machulis" (or machulis, long loopholes, and slanted or trefoil-shaped openings in order to secure a flanking fire, semicircular towers, also loopholed and crenelated are disposed in the curtain at short and irregular intervals. Inside, the streets are what they always should be in these torrid lands, deep, dark, and

EL MEDINAH.—After drawing by Lieutenant Burton.

narrow in places paved—a thing to be depressed—and generally covered with black earth well watered and trodden to hardness. The most considerable lines radiate towards the mosques. There are few public buildings. The principal wakalahs are four in number; one is the Wakalat Bab Shamal near the Haram, another the Wakalat Jehari, and two are inside the Mieri Gate they all belong to Arab citizens. These wakalahs are principally used as stores rarely for dwellings—places like those of Cairo. Travellers therefore must hire houses at a considerable expense, or pitch tents to the detriment of health and to their extreme discomfort. The other public buildings are a few mean coffee-houses and an excellent bath in the Harat Zarawan, made the town it is far superior to the unclean establishments of Cairo, and borrows something of the luxury of Stamboul. The houses are well built for the East, flat-roofed and double-storied; the materials generally used are a basaltic scoria, burned brick and palm wood. The best of them include spacious court yards and small gardens with wells, where water basins and date trees gladden the owners eyes. The latticed balconies are here common, and the windows are mere apertures in the walls, garnished as usual in Arab cities with a shutter of planking. El Medinah fell rapidly under the Wahabees, but after their retreat, it soon rose again and now it is probably as comfortable and flourishing a little city as any to be found in the East. It contains between fifty and sixty streets, including the alleys and cuts de sac. There is about the same number of bars or quarters, but I have nothing to relate of them save their names. Within the town few houses are in a dilapidated condition. The best authorities estimate the number of habitations at about 1500 within the enclosure, and those in the suburb at 1000. I consider both accounts exaggerated; the former might contain 800 and the Munkabih perhaps 500 at the same time I must confess not to have counted them, and Captain Sedler (in A. p. 1819) declares that the Turks, who had just made a kind of census, reckoned 6000 houses and a population of 60000 souls. Assuming the population to be 16,000 (Burckhardt estimates it as high as 20,000) of which 9000 occupy the city, and 7000 the suburbs and fort, this would give little more than 12 inhabitants to

each house (taking the total number at 1800), a fair estimate for an Arab town, where the abodes are large and close abated.

The outlet joins on to the N W angle of the city enclosure, and the wall of its eastern outwork is planned for a communication between the Munkash Bahari, through a court strewn with green and warlike apparatus, and the Bah-Pal Shami, or the Syrian Gate. The outer wall resembles that of the city, only its towers are more solid, and the outlet appears better calculated for work. Inside a sonfe built upon a rock, barely grown enough the banner of the crescent and the star, its white-washed walls make it a conspicuous object and mark points in all directions, especially upon the town, project from their embrasures.

The suburbs lie to the S. and W. of the town. Southwards they are separated from the enclosure by a wide road, called the Darb el Jannah the Road of Eden, so called because the purpose of certain reclamations, who may not pass through the city are carried this way to their peculiar cemetery near the Bab el Jannah, or Eastern Gate. Westwards between El Medinah and its suburbs, lies the plain of El Munkash, about ½ m. long by 900 yards broad. The straggling suburbs occupy more ground than the city; straggling the enclosures they are without walls, towards the west, where open country lies, they are inclosed by mud or raw brick ramparts, with little round towers, all falling to decay. A number of small gates lead from the suburb into the country. The only large one, a poor copy of the Bab el Nair at Cairo is the Ambari or western entrance, through which we passed into El Medinah. The suburb contains no buildings of any consequence, except the Khaskish, an official residence of the Mahkda (governor), a plain building near the Bab el Munkash, and the Khemash Mansaf, or the Fira Mosque, which every Zair is expected to visit.

The suburbs to the S. of El Medinah are a collection of walled villages, with plantations and gardens between. They are laid out in the form called here as in Egypt, Moth—courtyards with single-storied buildings opening into them. These enclosures contain the cattle of the mahakdars; they have strong wooden doors, shut at night to prevent "killing," and are capable of being easily defended. The mahakdars of the suburb are for the most part Bedouin settlers and a few of reclimants. Beyond these suburbs, to the S., as well as to the N. and N.E. in gardens and extensive plantations of palm-trees.

MEDINET EL-FAYOUM [add.] a to Central Egypt, cap. dist. Fayoum, 49 m. S.E.W. Cairo. It is situated on a channel which here divides into a number of branches, and is crossed by five bridges, is built with materials obtained partly from the ruins of the ancient Crocodopolis, for which Phoeny in honour of his sister substituted the name of Aïnes. The town has embraced among plantations of olive, fig, and date trees, from amid which the measure of its measure are seen to rise, and produce, at least at a distance, a very imposing effect; but the interior consists of narrow winding streets and very indifferent houses. It contains five Coptic churches, several mosques and schools or madrasahs, and has manufactures of cotton, woollen stuffs, and carpets. The banner is less extensive than might be expected from its population, but the market is abundantly supplied with fruit, which is grown in the extensive gardens of the vicinity and being of excellent quality finds a ready sale in Cairo. The rose-garden, for which this place was so long celebrated, and from which the most costly of all perfumes was manufactured, no longer exist, other modes of employing the ground having proved more profitable. The Mahakdars at one time took refuge here. Pop. about 10,800.

MEDJERDA, a riv. in Africa, the ancient Bagradas, which rises in the Great Atlas, in the S.E. of the prov. of Constantine, forms part of the boundary between it and Tunis, enters the latter, and after a course of about 300 m., in the sea N.E. falls into the Mediterranean on the W. shore of the Gulf of Tunis. Notwithstanding its length, it is nowhere navigable, and owing to the lofty banks within which it flows, is seldom available for irrigation.

MEDYKA, a riv. in Asiatic empire, Galicia, flows and N.E. Przemysl; with a fine barbed castle, and 1400 inhabitants.

MEERUT [add.] a dist. India, N.W. Provinces, between

lat. 26° 32' and 29° 17' N. lon. 77° 19' and 78° 14' E. is bounded N. by Meerutpur, S. by Meerut, and Moradabad, S. by Meerutpur and W. by Meerut and Delhi, length E. to W. 57 m., breadth, 46 m. area, 2823 sq. m. It forms part of the Doab, and extends across it, being washed by the Ganges on the E. and the Jumna on the W. The surface consists of a ridge of considerable height, traversing it centrally, and a slope on either side descending gradually towards the rivers. The soil, though in some places light and sandy, is on the whole fertile, retaining its verdure even in the hot season, and displaying a luxuriant vegetation during the rains. One of the principal crops is sugar-cane, which is cultivated on about 28,523 acres. The principal fruits are strawberries, apples, peaches, and mangoes. Grapes ripen, but are only of indifferent quality. The weather is for five months, from November to March, delightfully cool and invigorating. In April the hot westerly winds commence, and are both arid and sultry. The latter part of June, before the setting in of the rains and September, when they terminate, are the only unhealthy parts of the year. Pop. 560,736.

MEERUT [add.] cap. of the Meerut district, and situated in its centre, nearly equidistant from the Jumna and the Ganges, 56 m. N.E. Delhi about 3 m. E. of the Kallee Nadda, is surrounded by a dilapidated wall enclosing a large area, which is occupied for the most part by narrow, dirty streets and wretchedly built houses. Home of the mosques and pagodas possess any merit, and not a few of them are in ruins. The building most deserving of notice is the church which is one of the largest in India, possesses an excellent organ, and is surmounted by a lofty and handsome spire, though the main body of the structure is somewhat dilapidated, consisting of brick with a facing of stone. The British cantonment, situated 3 m. N. of the town, is divided into two parts by a small branch of the Kallee Nadda, which is crossed by two handsome bridges. On the N. side of the stream are, or rather were, lines for a brigade of horse-artillery a corps of European cavalry and a regiment of European Infantry in front a fine parade ground, 1 m. wide and 4 m. long; and on the opposite side of the stream the lands of the native Infantry Meherat has acquired a melancholy celebrity as the scene of the first great outbreak among the Sepoys in 1857, and of the gross mismanagement which allowed them first to spend a whole night in pillage and murder and then proceed unmolested to make themselves masters of Delhi. Pop. about 80,000.

MEGALO an isl., the largest of the Petal group, which belongs to Greece, and lies off the S.W. extremity of Negropont. It is about 13 m. long from N. to S. by 3 m. broad, attains near its centre a height of 1800 ft. and is covered particularly on its S. and W. sides, with brushwood, consisting for the most part of wild olive. Oaks at one time abounded, but most of them having been cut down and exported to Attica, they are now found only on the higher and least accessible summits of the island. The soil, though cultivated only to a limited extent, is very fertile, and produces barley, maize, wheat, an excellent wine, cotton, figs, olives, and almonds. The roadstead, sheltered by the other islands of the Petal group, is one of the best in the Archipelago.

MEGARA, a to. Greece, near Attica and Boeotia, on a height on the S.E. side of the Isthmus of Corinth, 31 m. W. N.W. Athens. It was the birthplace of Eschylus, the founder of the Megarian school, has the remains of an ancient castle, and contains 2394 inhabitants.

MEGYARZO, a to. Austrian empire, Hungary co. Zemplin 36 m. S. by W. Kereken; with a trade in woollen wine, and 3411 inhabitants.

MEHLPOOR a to. India, Holkar's Dominions, 53 m. N. Indore. It is situated in the angle formed by the junction of a small affluent with the Sogera, and gives name to a decisive victory gained in 1817 by the British commanded by Sir Thomas Munro, over the army of Holkar, who was in consequence obliged to submit to the terms of peace to him. **MEHUM**, or Meum a to. India, N.W. Provinces, dist. Rohilk, 55 m. N.W. Delhi. It was once a large commercial town, but is now greatly decayed. The chief objects of interest within are its excellent bazaar and a remarkably fine wall, which is 130 ft. deep, and has flights of stone stairs leading down to the water. Pop. 5000.

MELACCO-SIMA a group of islands, forming the westernmost portion of a chain of islands extending E. and N. E. from Formosa to the S. extremity of the Isles of Japan. It lies between lat. 24° and 25° S. and 129° 25' and 129° 30' E., and forms two divisions—a W. consisting of ten and an E. consisting of five islands. Of the islands of the W. division five only are at all mountainous; the others are flat and belted with reefs, like the coral islands in the Pacific. Kurei, belonging to this division, is composed of coralline limestone, and is a steep escarp on all its heights with brush wood and trees, of which none but the pine tree attains any size. It contains four villages, the principal of which situated on the N. has a port which is much frequented by junks but has an entrance so narrow and shallow that both spring tides and very smooth water are necessary for ingress or egress. Pa-Chung-San also of this division, and the largest island in it, has on its W. side Port Hsiching, which would shelter a large fleet, but through an coral patcher rising suddenly almost to the surface from 10 or 12 fathoms. Kaiden San, situated to the W. between it and Kurei, has a fine stream, which has its mouth at its S.W. angle in Seymour Bay where the water is so deep close to the shore that vessels might, by means of the hose, with Haeble's pumps obtain water without the intervention of boats and caeks. Tai-Fu San, the principal island of the E. division is surrounded by an extensive chain of coral reefs, on one of which, situated to the N.W., H.M.S. *Porpoise* was lost in 1797.

MEIKHEE, a town in China on the E. frontier of the prov. Ngankot, about 65 m. W. Hoo-chow foo. It stands on the Lan-tai, where the tide ceases to flow and navigation by boats terminates, and stretches for a considerable distance along the banks of the stream. It has a considerable trade in hill productions, which are brought down to it to be conveyed on boats to the towns in the plains. Its district appears to be the W. boundary of the great silk country large quantities of rice and other grains here taking the place of the mulberry which has been cultivated to some extent.

MELJED-ANAFI, a vil. Palestine, on the road between and nearly equidistant from, Damascus and Beyrout. It is beautifully situated occupying the top of a hill which looks N. along the magnificent valley of the Bekaa or Cotes-Syria, with Anti Lebanon on the right, and the still loftier snow-capped peaks of Lebanon on the W. The chief object of interest is one of the finest antique temples now existing 'simple, massive, and beautiful' says Dr. Robinson 'and obviously of a severer and earlier type than those of Baalbek.' To the N.E. of Meljed is Anzer, containing the ruined walls and towers of an ancient fortified city or castle supposed to be the Chalcis in Lebanon where Agrippa had his capital before he was transferred to more S. territories.

MEKLONG a. to Saum near the mouth of a river of same name, in the Gulf of Siam, to the W. of the Menam. It is accessible only by small boats, but many of the inhabitants are employed in the manufacture of salt, which is obtained by evaporation, and besides supplying great part of Saum is largely exported. The rice communities with the Menam, and hence are sometimes been erroneously supposed to be only a branch of that river. The soil along its bank is extremely fertile, producing rice, sugar, sesamum and fruit in abundance.

MEKONG, or **MEKONG** [add], a river, Asia, which rises in the Chinese prov. Yunnan near the frontiers of Szechuan in the S.E. of Tibet, in lat. 27° 30' N., flows S.E. through Yunnan, under the successive names of Lan-tai and Kew-lung-kiang, or Nine Dragon River enters the Late Country and empties its S.E. E. direction skirting the W. frontiers of Anam or Cochinchina. On reaching lat. 16°, and assuming its own name, it curves round to the E. then winds through Anam describing nearly the arc of an enormous circle, and finally falls into the China Sea by three mouths about lat. 9° 34' N. Its course thus extends over nearly 18° of latitude. Though comprehended in many places by rocks, straits, shifting banks, and shallows few rivers of the same length have an equal extent of navigable channels. Even before it quits Yunnan many flourishing cities are situated on it for their principal means of transport and both in Laos and Anam a large proportion of the inhabitants are settled on its banks, its waters are engaged in cultivating the magnificent and fertile valley. Its delta lying in extent with those of the

Yang-tze-kiang and of Hong-kho, there might be reason to apprehend that the vast quantity of alluvium deposited, and the channels into which it divides in course of a way for itself across it, would destroy its navigable importance. This is the case with the other large rivers in the same region but in this respect the Mekong is singularly favoured. While they are obstructed by bars, it has none, so that there is a depth of 28 ft in its entrance. The importance of this river has hitherto been little appreciated but now that the French government have taken possession of its mouth, and established themselves at Saigon, it can scarcely be doubted that the Mekong will attract far more attention from Europe, and become a much more important commercial thoroughfare than formerly.

MELBOURNE [add] cap. of Victoria, Australia. The progress of this city in both size and commercial importance has been astonishingly rapid, the population, which was 25 143 in 1851 having risen to more than five times that number in 1855. It is also not a favourable one the mouth of the Yarra, about 9 m. above which the city lies, being obstructed by a bar and it is so low that it is liable to be flooded by the overflowing of the river in the wet season. Nevertheless it is a noble city with crowded wharves, and sometimes 1000 vessels lying off the mouth of the river. As first laid out Melbourne consisted of several wide straight streets, crossing each other at right angles. Flinders, Collins, Bourke, and La Trobe Streets run E. and W. and among these intersecting them may be mentioned Elizabeth and Swansons Streets. Collins Street presents a handsome specimen of street architecture, with superior shops, banks, and public buildings. But the city has expanded beyond this rectangular district, and now includes what were formerly the detached districts of Collingwood, Richmond, and North Melbourne. Altogether it now forms a splendid town and its streets present a scene of constant bustle and activity especially in the old part, which still monopolizes the chief shops, banks, and places of business. Of public buildings the parliament-house demands special notice. It contains two chambers one for the assembly the other for the council the former modestly decorated, but the latter of profuse and elegant ornamentation. It stands in the highest part of the city from which the whole of the town and suburbs, with the harbour of Port Phillip in the distance lie in view. Forward lies the great mass of buildings with numerous church spires and other prominent edifices. Northwards the Collingwood portion stretches down to the banks of the Yarra where the heights are dotted with villas and gardens. There is the suburb also of South Yarra and Prashan, with the botanical gardens in between, between which and the botanical gardens the river winds and is crossed by half a dozen bridges. Beyond to the S. lies St. Kilda on the bay the favorite resort of the townspeople for recreation. Besides numerous churches and chapels, Melbourne has a large number of public institutions for secular and benevolent purposes. Water works have been constructed at an enormous expense for the supply of the city. Owing to the obstructions of the Yarra, Warrambool, lower down, has been made the port and is connected with Melbourne by a railway. There are also railways from Melbourne to Geelong, Ballarat, and Sandhurst, at the Bendigo gold fields. Steamships ply between it and the other great city ports of Australia, and its shipping trade is carried on with Great Britain and other European and foreign countries. The trade of Melbourne represents very nearly that of the whole colony of Victoria. In 1858 there entered the port 1758 vessels of 618,051 tons and cleared 1787 vessels of 618,053 tons. The value of the imports in the same year was £14,118,757 and of the exports £19,508,296. The produce of the gold fields amounted to £14,100,068 in 1859 in 1855 to £11,177,361; and in 1856 to £11,942,768; from the last-named year there was a gradual decrease, to £6,635,192 in 1859. The exports of gold and gold speels in 1861-3 were as follows:—

	1861	1860	1859
Gold	67,000,728	67,244,192	66,236,837
Gold Speels	1,210,598	1,194,990	1,194,471

The other principal article of export was wool, which amounted to £2,049,491 in 1858.

The population of Melbourne, which, as before stated, was

22,148 in 1861 was 185,920 in 1881 in 1885, including the suburbs. It was estimated at 140,000.

MELBOURNE, a to British America, Canada East, co. Richmond, on the St. Francis, opposite to Richmond, with which it is connected by a covered bridge, 75 m. E.N.E. Montreal. The two, with the addition of a third place, called the Gurs, form one township, and added by the support of government, have united in founding the College of St. Francis, which has its site in Richmond. There is also a mechanics' institute and literary association. The streams furnishing a large amount of water-power, a number of saw, grist, fulling, and carding mills have been erected on them and furnish the materials of a considerable trade. Pop. of township, about 2000.

MELLE, a to W. Africa, r bank Sheri: which here forms the W. boundary of the kingdom of Bagirmi, about 60 m. N.W. of Mamma, its capital. It occupies a steep bank overlooking r bank Sheri which is here 500 yards wide and 15 feet deep. The thick forest which borders the place on the N.E. is a favourite haunt of leopards and monkeys. Fish and crocodiles, the latter much valued as food by the natives, abound in the river.

MELLENKI, a to Russia, gov and 70 m. S.E. Vladimír, esp. circle of same name, on the Oukha. It contains two churches, a parish school, a charitable endowment, and several manufactures. The inhabitants of the circle are largely engaged in making fur, pitch and tar. They also manufacture many articles in wood. Pop. 8574.

MELIPILLAI, a to Cebu prov and 40 m. W.R.W. Santiago. It is a large well-built and apparently wealthy place, not far from the N bank of the Maypa. The manufactures are porcelain, coarse crockery, cloth blankets, and superior pottery ware. The trade is chiefly transacted with the province of Cebu, and of the southern part of Negros, passing through this town to its final destination at Valparaiso. Pop. 8000.

MEMPHIS (old) a to and port of entry U States, Tennessee, on the Mississippi, just below the junction of Wolf River and on three great railways, the Memphis and Charleston, the Memphis and New Orleans, and the Memphis and Ohio, 180 m. S.W. Nashville. It stands upon a bluff about 30 ft above the river in its highest reaches and is flanked by a fine escarpment. The streets are regular, and many of the private dwellings are not only substantial but elegant. The principal buildings and institutions are 15 churches, two medical colleges, an orphan asylum, and several academies and seminaries. The trade is chiefly in cotton, of which in 1860, 400,000 bales were shipped. Pop. (1860), 27,623.

MENAM (old), a river Senegal, which rises in the Senegal Mountains, about lat. 20° N., flows easterly S.E. and falls into the Gulf of Senegal by three mouths, about 28 m. below Banjul, following the windings of the river. It ceases to be navigable at Kalaing, the most southerly of the Lant Fams. Owing to a bar the water at its deepest mouth is only 3 ft. at ebb, and 15 ft. at spring tides, and hence vessels drawing more than 11 ft., when intended to land at Banjul, only take in cargo those requiring that depth, and then proceed to the rendezvous to fill up. The banks of the river though fringed with forest-trees, behind which sugar and rice fields extend for a considerable distance inland, are somewhat monotonous. The Makling has sometimes been considered a branch of the Menam. This is a mistake probably originating in the fact that they communicate by a channel on approaching the sea.

MENAMAH a to. Persian Gulf, at N extremity of Behren Island, lat. 26° 15' N., lon. 50° 35' E. The art aspect of Menam from the sea is not pleasing for the beach curving is nearly occupied by oilmen and fishermen, with their cabins; the beach, too is of dirty shingle. The length of the town is greater than its depth, though that is not small, the range along the shore being 1½ m., while the houses reach ½ m. inland; the general level being about 15 ft. above high-water mark. Most of the dwellings are mere palm-leaf cottages, each with its own enclosure, and are arranged in streets and rows. Separate from these, and forming distinct quarters, are large houses of brick and stone, often elegant and spacious, and occupied by the wealthy and upper classes, though many of them are falling into decay. About the centre of the town is the marketplace, a labyrinth

of narrow sheep-lanes, some vaulted, some sheltered with a thatch-roof, and meeting in a small central covered square. In different quarters are several mosques. The lofty and somewhat imposing residence of the governor stands at the S.W. extremity of the town. Ships of all kinds and sizes occupy the bay. Behind the town stretches a wide plain of level saltish soil barren and swampy, upon the extreme verge of which stands a large square fortress, in old times a stronghold and defence for the town now dismantled and ruinous. The pest-house is a principal occupation of the inhabitants.

MENDOZA (old), next to Cordova, the largest and best city in the interior of La Plata, and the capital of prov. of same name 180 m. E.N.E. Valparaiso on the Andes, lies close to the E foot of the Cordillera of the Andes. Like almost all the other old Spanish towns, it is built in the form of a regular rectangle, subdivided by streets running N and S., and E. and W. intersecting each other at right angles, and opening at one of their extremities into a large central plaza or square. On this square stand the principal church, a large but by no means handsome structure, built of limestone, and surrounded by two towers terminating in spires; the cabildo, containing the courts of justice and the police office and some private mansions of a very superior description. To the S. of the principal square is another called the Plaza Nueva, on which the only edifice worthy of notice is the small but elegant chapel of San Loretto. The principal streets, three in number—the Cañada, St. Martin and Constitucion—all terminate in this place. Mendoza is remarkable for the number of its ecclesiastical buildings. The principal church and a chapel have been already mentioned, but to these must be added six other churches, numerous other chapels three convents for monks, and one for nuns. Among buildings not ecclesiastical are the governor's house, the college, the public library the barracks, the theatre and the market-hall. The inhabitants employ themselves chiefly in horticulture, agriculture, and the rearing of cattle. Fruit of all kinds is abundant and cheap and the oranges in particular are famous. Goats are very prevalent, and is attributed by some to the universal use of water coming from the snowy mountains. Pop. 10,000.

MENSA, a small territory E. Africa, the E. borders of which, bounded by Senegal, are about 8 m. W. of the town of Mankara, on the Red Sea. It lies between lat. 15° 30' and 16° N. lon. 38° 45' and 39° 10' E., and has a mountainous surface formed by offsets from the Abyssinian range. Its inhabitants consist of two tribes who are at deadly feud with each other and occupy the opposite extremities of the territory the Belt-Shakha inhabiting the S. and the Belt-Abrehé the N. district. Their chief employment is in feeding cattle, but they are not nomads, and possess two large villages, that of Hamam-hamo situated on an undulating plain stretching toward Mount Marra, which is 7000 ft. high belonging to the Belt-Shakha, and that of Glah which lies at the foot of a mountain steep, belonging to the Belt-Abrehé. Both tribes, apparently of the same origin, are in person light, active, and well-proportioned, of a dark olive complexion, with fine lips, an oval and somewhat Grecian cast of countenance, and large bushy beards. Pop. about 5000.

MEQUINEZ or MIERAS (old) a to N. Africa, Morocco, gov and 38 m. W.S.W. Fez, on an affluent of the Sebou, in a beautiful valley of a healthy and mountainous district. It is surrounded by a triple inclosure of walls, about 15 ft. high and 3 ft. thick, and defended by strong batteries. Among its principal buildings are several mosques, a castle, which was founded by Ishmael in 1674 and a palace, in which the sultans of Morocco often resided. This palace contains within its vast inclosure the imperial treasury, and is adorned with marble columns, obtained partly from Roman ruins and partly from Laghoun and Marrales. The inhabitants are said to be more polished than those of any other town in Morocco.—(Godefr., *Description de Maroc*.)

MEBOANUM, a in India, prov. and 50 m. S. by W. Madras, on the Coromandel coast. Its only title to notice is derived from its salt-pans, which belong of course to government, are very extensive, and produce a salt which is in great demand on account of its size and whiteness of the prod.

MEBOARA a to India, prov. Madras, esp. gov. Coorg, 60 m. S. Bangalore. It stands at the S.E. end of an oblong table-land, 4500 ft. above the sea, sloping gently on the

N and E., but preeminent in all other directions. It consists principally of a fort situated on an isolated height, and built in the form of an irregular heptagon, with a gateway at one of the angles, and round bastions at the other six. Being surrounded by greater height, some of them within breaching distance it possesses little strength. Among the buildings in its interior are the palace of the deposed rajah, a large castellated building now used as a public treasury and quarters for the European officers of the native troops, a jagoda, a court-house, a jail, and a public bungalow or lodge for travellers. The bazar is tolerably good. The heights around furnish grand and picturesque views.

MERCHORE, a tn. S America, Banda Oriental 1 bank Rio Negro 150 m. V W Monte Video. Occupying a much larger space than its inhabitants require it presents a great number of unoccupied spaces in its streets, which are wide and well formed, and many of the houses both in them and on the public square, are substantial and even elegant. The only buildings of any note are the church, a large building of indifferent architecture, and a large coffee house in front of it. The shops and market are well supplied. The environs cannot be called beautiful, though they gain somewhat by contrast with the still less attractive country which is passed before reaching them. In the adjacent plains extraordinary numbers of granite quadrupeds and other fossils are found imbedded. Mercedes carries on an active trade with Monte Video and Buenos Ayres exporting chiefly jerked beef, hides, and sheep's wool, and receiving in return European wares. It is much visited by peasants, who come to drink the water of the Rio Negro, which is said to be very efficacious in the cure of rheumatic and similar complaints. This remarkable property it owes to the large quantity of sarzaparilla which grows upon its banks. The roots comprising part of their substance in the water give it the dark tinge from which the river derives its name. Pop. 5000.

MERLBBURG a post town U States, Pennsylvania, 60 m. S W Harrisburg is the seat of a college of the German Reformed Church with 6 professors 165 students, and a library of 8000 vols. Pop. 897.

MERCURY or **MERCURY**, a group of islands, New Zealand, off the N coast of North Island or Ulster about 18 m. E.S.E. Cape Colville, lat. (N. 40° East Island) 38 15 S. lon. 174 50' W. E. It consists of four principal and many smaller islands, and occupies a square space of about 10 m. each way. The *Great Mercury* the largest, being 4 m. long from N to S, and nearly 5 m. broad at its S. part, is steep and ality on its N and E sides. On the W side is a deep bay with anchorage in 5 fathoms but safe only in fine weather.—*Red Mercury*, the next largest of the group, is only 3 m. in extent.

MERIDIBA, a tn. Abyssinia, on a small affluent of the Shimbela lat. 18° N; lon. 31° 30' E. It is an important market-place, whose inhabitants plant much cotton and maize, and rear many sheep, goats, and camels, but prefer to all other employments the hunting of the elephant, rhinoceros, and buffalo. About 8 m. S. of Meridiba are the boiling or rather bubbling springs of Amba. They are about 16 in number, and issue from a spot of dark-colored swampy ground. The water is cold and pleasant to drink its chief ingredients seem to be carbonic acid gas and iron.

MERIDEN, a tn. U States Connecticut, on the New haven, Hartford and Springfield Railway, 18 m. N E New-haven. It stands on a slight conical several churches, an academy, a high-school, and a state juvenile reformatory, and has extensive manufactures, of which the chief articles are iron and brassware were ivory combs, table cutlery, hardware, and machinery. Pop. (1860) 7426.

MERRIMACK (add.) a river, U States, formed at Frank- lin, New Hampshire, by the union of the Pemigewasset and the Winnepesaukee, flows first E. for 78 m. to Chatham, in Massachusetts and then E. for 85 m. to its mouth in the Atlantic, at Newburyport. Though comparatively indige- nous in both length of course and volume, it would be dif- ficult to find a river which has done more for the country through which it flows, since the immense water-power fur- nished by its falls has created the towns of Lowell and Lawrence in Massachusetts, and of Nashua and Manchester in New Hampshire.

MER-EL-KEBIR, a tn. N Africa Algeria, prov. and

6 m. N W Oran. It occupies a rugged site on the shore of an excellent natural harbour capable of receiving the largest vessels, and is defended by a triangular fort, seated on a rock, and crossing its fire with two other forts at a lower level. The harbour at Oran adds greatly to its importance, and it has been contemplated to complete its fortifications, which the Spaniards originally commenced, and make it the rival of Gibraltar. Pop. 1892.

MESAU a tn. Western Africa, Fouta States, cap. dist. of same name, in a sandy district, on the road from Katsina to Yakoba, 170 m. E.S.E. Kano. It is walled, and the resi- dence of a governor, whose house is built entirely of earth. All the other houses have clay walls, with thatched conical roofs. The weekly market is important. The inhabitants are said to be Fellahs.

MESBRITSCHE or **WALACHIAN MESSURSCHE**, a tn. Aus- trian empire, Moravia, circle and 9 m. S. Neutitschein, in a beautiful valley on the Betschwa, in a house called Moravian Walachia, with two churches, a castle, a bureau of correction manufactures of linen and woollen cloth, and wool cattle, and other annual markets. Pop. 1806.

MESHERD Ali, a tn. Turkey in Asia, pach. and 90 m. S Bagdad. It takes its name from a Mahometan martyr of the Shiite sect and has a splendid mosque, which is annually visited by thousands of pilgrims, chiefly from Persia. These offerings, which had accumulated during a long series of years, tempted the cupidity of the Wahabees, who paid it a visit, and carried off all its treasures to the desert.

MESSENIA, a gov. of the Morea, Greece, bounded on the N by Achaia and Kila, on the E by Arcadia and Laconia, W and S, the Mediterranean. The climate is tem- perate and healthy, and rendered invigorating by the sea- breezes. The soil is fertile well watered, and abounds in excellent pasturage. It produces wine, cotton and olive- oil, and its fast roads those of any other part of Greece. The inhabitants are athletic and industrious, but neglect the breeding of cattle and the cultivation of cereals. The principal towns are Koroni Bavaria and Kalamata. The ancient city of Messene is now an inconsiderable village, which the Greeks call Mavronati.

METAPAN a tn. Central America, state and 44 m. N N W Salvador, to the N E of a lake of same name, which is properly a branch of the Laguna de Ambo. It is the centre of a mining district particularly rich in iron and is a clean well-built place with streets paved with a conglomerate of quartz and sandstone one of the handsomest churches in the state, and a pop. of about 4000.

METHEMMEH a tn. Abyssinia, cap. prov. Galesat, in a mountainous district not far from 1 bank Athara lat. 13° N lon. 31° 30' E. It has recently suffered much from an invasion of a neighbouring chief, and now contains only 1200 inhabitants, who live in the straw huts with pointed roofs known by the name of *tegele*.

METIS, a tn. British America, Canada East, co. Ri- monski, r bank St. Lawrence, 210 m. N E Quebec, with a Free and a R. Catholic church, and a considerable trade in flour and lumber. Pop. about 1100.

METTERSDORF a tn. Austrian empire, Transylvania circle and about 6 m. N Baistritz with a salt spring, a trade in wine and hemp, and 1720 inhabitants.

MEYBUT a tn. Persia, 150 m. E.S.E. Ispahan. It is a small walled town, with a ruined ditch, a paltry castle, and four gates. Wheat and cotton are extensively cultivated in the vicinity and there are many well kept gardens within its walls. Pop. about 2000.

MILAZA NE DI SOTTO a tn. Italy Venetia, prov. and 4 m. N E Verona, with a parish church and a beautiful villa adorned with frescoes by Paul Veronese.

MILAZZO (add.) a tn. Turkey in Europe, S. Albania, circle and 31 m. E N E. Yavuz. It stands at the N en- trance of an important pass in the Pindus, where the roads to S. Albania, Thessaly and Macedonia cross each other. Its inhabitants are very industrious, and, like the Navarros, travel into distant parts, and continue there till they have acquired the means of returning to live comfortably at home. Pop. 6000 mostly Walschs and Zingis.

MGETA a river E Africa, one of the principal affluents of the Kinyua, which it joins on the r bank, about lat. 7° 20' S, lon. 37° 50' E. It rises among the Dufur hills,

and flows E. in a perennial stream, draining a considerable tract of country and with a current so rapid that scarcely anything that falls into it is ever recovered. In its lower course it is only about 50 yards wide.

MGUNDA MEHALI, an extensive tract, E. Africa, lying between Upper on the E. and Uyoysu on the W. in the line of the caravan route from the E. coast opposite to Zanzibar. Its length from E. to W. is about 140 m., and it bears the name of desert simply because it contains no running water or wells, except after rain. Its general aspect is a dull uniform bank of an emerald green during the rains, and a network of dry, lacina-like twigs during the heats. Its most forbidding portion is in the E., where its stony surface and stunted vegetation strikingly contrast with the better country on the E. of it. This portion passed, the west of the desert may be said to be barren, and an open forest of tall trees begins to run along a flat. That the trees in many places not incapable of successful cultivation, has been proved by the many clearings which have been made on it. By means of them its extent is being diminished from year to year and the journey across it, which, about twenty years ago, consumed twelve long stages, is now effected in eight marches. The scrub of the Mgunda Mahali is a detritus of yellowish quartz, in some places white with powdered feldspar, and in others black with the humus of desiccated vegetation. In general moderns can be more numerous than its sparse, but occasionally the same changes, and outbursts of grey granite and gneiss are seen rising abruptly and perpendicularly from the dead plain, or bristling upon a base of low conical hills. Nothing can be more fantastic than the shapes which the rocks assume. Some are stiff and straight, like giant sentinels, and others, split as if on alloy or gateway passed between them, might be mistaken at a distance for Cyclopsian walls, towers, steeples, domes, minarets, castles, and dwelling-houses. Some of the clearings are like canons in the midst of these granite outcrops, and furnish pleasant stations for the caravans. As one of the most remarkable may be instance the Jera in Mbon, or Reed Rock, so called from its immense granite dome, which is 2 m. in diameter, and rises by gradual slopes to the height of nearly 500 ft.

MEHOW or MEOW [add.], a name of place, India.—1. A tn. and British settlement, Holkar's Dominion, in a clayey tract resting on basalt, 13 m. S.W. Indore. The town situated on an eminence above the Gumbhar, is European in its appearance, having a church with a conspicuous steeple, a well-furnished library, a spacious lecture-room, and a theatre. The CANTONMENT, occupied by a considerable force, in the vicinity of the town of Mehow, are situated about half a mile S.E. of the town, at the height of 2019 ft. above the sea. Mehow was one of the centres of the sepoy mutiny of 1857.—2. A tn. N.W. Province, dist. Aumguth, r. bank Surgoo, here crossed by a ford, 55 m. N.E. Benares. It is a large struggling place, possessed of abundant supplies.—3. A tn. N.W. Province, dist. and 11 m. S.E. Meerut, in an open but only partially cultivated country.—4. A tn. N.W. Province, and 37 m. S.E. Allypore. It stands in an open country and has a well-supplied market.—5. A tn. dist. and 17 m. N.W. Allahabad, on a peninsula of some name, in an open but only partially cultivated country, and with a well-supplied bazar.—6. A tn. Bundelkand, dist. Jhansi on the Tappur, 70 m. S.W. Calpa. It made some figure in the wars produced by the dismemberment of the Mughal empire, and is still a large commercial place.

MYTKE, a river, India, which rises in a small plain in the native state of Amgharra in Malwa, flows successively N.W. and S.W., and falls into the gulf, a few miles below the town of Cambay. Its total length is about 250 m. Opposite to Cambay, not more than 6 m. from the sea, it is nearly 2 m. wide, but so shallow at low spring-tides that the channel is almost dry so that the smallest boats cannot navigate it.

MIAKO, a tn. Japan. See KATO in Supp.
MIAMI, GRASS and LITTLE, two rivers, U. States, Ohio.—1. Great Miami, rises in ex. Harlin, flows successively S. and S.W. through a picturesque and fertile country, and after a course of about 150 m. joins the Ohio at the E.W. corner of the state, 20 m. W. Cincinnati. It is navigable only for a short distance, but the Miami canal follows its course for about 70 m. Its chief affluents are the West Branch, the Mad,

and the Whitewater.—2. Little Miami, rises in ex. Madison, flows in directions nearly parallel to those of the Great Miami, and joins the Ohio 6 m. E. Cincinnati. Its source is about 100 m.

MAUTAU or **MAUWAT**, a group of islands, China, lying across the entrance of the Gulf of Pechili, and separating it from the Yellow Sea. They are about 15 in number and lie off the N. coast of prov. Shantung, opposite to the town of Tongshan-fu from which Chang-shan, the largest, is barely 4 m. distant. The channel between this island and the mainland forms the best entrance into the gulf. Close to it is a secure bay which is resorted to by great numbers of junka proceeding with grain to Peking, and promises to become a most important station for foreign vessels when the trade has been fully opened up. There are numerous villages on almost all the islands of the group, supplies are plentifully abundant, and the water is better than is usually found on the coast of the mainland.

MICHAILENTI, a tn. Turkey in Europe, Moldavia, cap. circle Dorokoi. It is a well-built place, the seat of a civil and criminal court, and has a normal school. P. 3000.

MICHAÏLOV, a tn. Russia, gov. and 30 m. S.W. Riazan, cap. circle of same name, on both banks of the Prona. It contains six churches, a monastery, a charitable endowment, and several manufactures. Pop. 3321.

MICHAÏLOVSKAYA, a tn. Russia, gov. Don Cossacks, dist. Chupersk, 1 bank Choper, 125 m. S.E. Yerson. It has three annual fairs, at one of which, held on 6th January a very large amount of business is done. Pop. 13,495.

MICHELE (SAY), a tn. Italy, Venetia, prov. and 6 m. S.E. Verona, on the Etsch or Adige and the railway to Vicenza; with a parish church, another church of a circular form, surrounded by a dome, and much frequented by pilgrims; and extensive manufactures of cables and other cordage. Pop. 5499.

MICHIGAN or **MICHIGAN CITY**, a tn. U. States, in Iowa on the S. shore of Lake Michigan and on the Michigan Central and the Louisville, New Albany and Chicago rail ways, 42 m. E.S.E. Chicago. It possesses seven churches and several benevolent institutions, and being the principal lake-port in the state carries on a considerable trade. Pop. (1860) 3320.

MICHELIMACKINAC, MACKINAC or MACKINAW, a vil. U. States, Michigan, cap. so and on an island of same name in Lake Huron, 80 m. N.W. Detroit. It possesses county buildings and several churches, saw mills, and a safe and deep harbour at which a considerable trade particularly in fish, is carried on. It is a favourite summer resort. On a rocky height in the vicinity stands Fort Mackinac, a military post commanding the village. Pop. about 1500.

MIDDLEBURY, a vil. U. States, Vermont, cap. co. Addison on the Otter Creek at Middlebury Falls and on the Rutland and Burlington railway 31 m. S. Burlington. It possesses five churches, a college, with six professors, eighty-five students, and a library of 9000 volumes, a court-house, a cotton and a woollen factory, as iron foundry and a saw-mill. In the vicinity there is a marble-quarry of so fine quality that much of it is exported for statuary. Pop. (1860) 2679.

MIDGAN, a race, E. Africa, of doubtful origin, found chiefly in the Somali country where they are numerous but regarded as outcasts. They take service under the different chiefs, who sometimes employ them in great numbers in their fields and forays, and find them most efficient auxiliaries, not on account of their prowess, for they are of somewhat stunted growth, and deficient both in strength and courage; but on account of the terror they inspire by their bow and diminutive arrows, barbed and poisoned with the venom. The Midgan, it is said, is able by the mere swaying of the string, to pierce to flight a whole village. Many of the race, instead of thus taking service, employ themselves in hunting and agriculture.

MIDNAPORE, a dist. India, presid. Bengal, between lat. 21° 41' and 23° 27' N., lon. 86° 56' and 87° 59' E.; is bounded N. by Paroolla, Bencooer and Burdwan, N.E. Hooghly, S.E. Hidgeolly, S. Balasore, S.W. the Outback Mahal Mohabunga, and W. Paroolla, area, 4015 sq. m. The W. part is covered by jagged hills, and comparatively little known, the S.W. and E. resemble the adjoining tract of Orissa in its marshy soil, numerous shallow torrents, and pestilential atmosphere. The S.E. which, as the route from

Calcutta to Orissa passes through it, is the best known, has a general slope S.E., and is drained ably by the Soombarra, which falls into the Bay of Bengal, and the Kosi or Cosy, which issues with the Hilsa, and joins the Hooghly at its mouth. Over a considerable extent of surface the soil is so thin and unproductive that no attempt is made to cultivate it, and it remains in a state of nature, growing nothing but stunted and worthless brushwood, to which parts it is fertile, and yields good crops of rice—the staple crop—pulses, sugarcane, and indigo. Silk, obtained by rearing silkworms on the mulberry, is an important branch of domestic economy. The principal manufactures are silk, silk and cotton fabrics, pottery, coarse jewellery, and articles in brass and iron. Pop. 668,069.

MIDNAPPORE, esp. of the above dist., 1 bank Kosi, 67 m. W by S Calcutta, possesses a number of public buildings, in which the civil establishment is accommodated, a large school superintended by a local committee, and attended by above 300 pupils, and a good bazaar well supplied, especially with provisions.

MIECHOW a to Russian Poland, gov Radom, cap circle of same name is a small but handsome town, said to have been built on the model of Jerusalem, and has a beautiful church which dates from the twelfth century, and a circle and elementary school. Pop. 1479.

MILECO, a to Austrian empire, Galicia, circle and 26 m. N E Ternow, 1 bank Wroclaw, with a castle, which was the cradle of the Polish family Mieszkowski, and 2895 m. habitants.

MIGULINKAIA a to Russia, gov Don Cossacks, dist. Medvedets, 1 bank Don, 160 m. N N E Novo-Tcherkassk with an annual fair and a pop. of 13,009.

MIHINTALA, an isolated mountain, Ceylon, overlooking from the E. the ancient capital Anuradhapura or Anuradhapura, and 75 m. W by W Kandy. It rises suddenly from the plain to the height of 1000 ft., and has its slopes densely covered with wood, and its summit crowned with huge rocks of granitic. It is undoubtedly the most ancient locality of mountain worship in Ceylon, its highest peak figuring in the legends as the spot on which Mahinda alighted when he arrived in Ceylon to establish the religion of Buddha. The mountain has in consequence been carved into a temple. The southern face, which at almost precipitous, commands a magnificent view reaching across the island from sea to sea. The north side is surrounded by a flight of steps said to be 1840 in number, partly hewn out of the rock, but generally formed of slabs of granite 15 ft. wide. On a small plateau near the top, the dwellings of the priests are grouped around the Amunthala dagoba, built not, as usual, of brick, but of stone, and encircled by octagonal pillars, the capitals of which are ornamented with carvings of the sacred goose. The last flight of steps leads to the culminating point, the peak of Ambathala, on which stands, and for eighteen centuries has stood, the Bowthana dagoba, a semicircular pile of brick work, surmounting a single lotus from the forehead of Buddha. The road leading from the base of Mihintala to Anuradhapura, a distance of 8 m. passes between mouldering walls by mounds where the grass imperfectly conceals the ruins beneath and by fragments of fallen columns, marking the site of former monuments.

MIKOLAJOW a to Austrian empire, Galicia, circle and 26 m. N N E Hiry, near 1 bank Danowitz with 2150 m. habitants, who are mostly employed in weaving flax.

MIKULINOW (ed.) a to Austrian empire, Galicia, circle and 11 m. E Ternopol, esp. dist same name, on the Sereth, with a fine baronial castle, an infirmity manufacture of woollen and linen cloth, and an active trade in wax and honey. In the vicinity there is a village occupied by German settlers, and containing well-frequented mineral springs with a complete bathing establishment. Pop. 3840.

MILANOVATZ, a to Turkey in Europe, Servia, circle Kraljevo, 1 bank Danube, 85 m. S.E. Belgrade, with a church and a school. Pop. 1400.

MILANOVATZ, a to Austrian empire, Bohemia, circle and 40 m. N Brundis, with three mills, one of them for spinning yarn, and 1100 inhabitants.

MILFORD, two places, U States—1, A. V. and town also, Massachusetts, on the Milford branch of the Boston and Worcester railway, 8 m. S.E. W Boston. It contains six stores. See Geo.—Vol. II.

churches and a high-school, and is extensively engaged in manufactures particularly that of boots and shoes, which are annually made to the value of more than \$250,000. Pop. (1880), 9122.—2, A post borough, Delaware, on the Millington Creek, 80 m. S.E. W Philadelphia. It consists of two distinct portions, N and S Milford, one on each side of the river and contains several churches and a public library. Pop. (1880), 3099.

MILFORD a sound, New Zealand, forming the north-western of a series of inlets which indent the S.W. coast of the Middle Island. Though of limited extent compared with some of the others, it surpasses them all in scenery. Pambroke Peak about 8 m. inland and always capped with snow, rises on the N. to a height of 6700 ft., while Laverney, a remarkable saddle-backed mountain on the S. has peaks nearly of the same altitude. Mount Miter so called from its remarkable shape, starts up abruptly from the S. side of the sound to the height of 5560 ft. on this opposite shore stands a dome-shaped mountain which is nearly bare of vegetation, and from its peculiar colour looks not unlike an enormous mass of metal. These alpine features and its narrow entrance apparently will more constructed by the stupendous cliffs which rise perpendicularly as a wall from the water's edge to a height of several thousand feet, invest Milford Sound with a character of solemnity and grandeur which description can barely realize. — *New Zealand Pilot*.

MILL BROOK a to British America, Canada West, co Durham 59 m. N.E. Toronto. It stands about half a mile from a station on the Port Hope and Lindsay railway which gives it a direct communication with Port Hope, possesses two churches, a foundry and machine shop, a tannery, a brewery, a steam saw mill, and a local trade of some importance. Pop. about 1000.

MILL LAKE, British America, about 80 m. N.W. of Lake Superior, is a beautiful sheet of water of very irregular shape, with an estimated length of 25 and average breadth of 4 m. It belongs to the basin of Lake Superior, but of Hudson's Bay its principal feeder being the Savanne coming from the E. and its outlet the Sault, which flows W.S.W. and falls into Lake Huron. The hills around the lake are clothed with patches of pine of fair dimensions, and towards its W. extremity both on its islands and the adjoining mainland are seen rocks of white quartz, which at a distance look as like the sails of boats that they have been mistaken for them.

MILLOTITZ, a to Austrian empire, Moravia, circle and about 14 m. S.W. Hradisch, with a castle, a poor-house, coal mines, and 1000 inhabitants.

MILTON, a to British America, Canada West, esp co Halton on the Sixteen Mile Creek, a feeder of Lake Ontario 35 m. S.W. Toronto, with four churches, manufacture of waggon and ploughs, a foundry and several saw and flour mills. Pop. about 400.

MILU, a to India, Kanton, on the route to Chinese Tartary 13 m. S. of the Jawahar Pass, at the height of 11,706 ft. above the sea. Lat. 30° 28' N., lon 80° 11' E. It stands in the fork formed by the confluence of the Gunkha and Gores, and consists of about 140 houses strongly built of large stones laid without cement, and covered with slates overlaid with a compact coat of clay. Close to the N.E. of the town there is a temple perched upon a cliff which overhangs the Gunkha. Milu is inhabited only during June and October, during the other months the inhabitants descend to a lower district, and thus avoid the deep snows which render the country impassable, and the avalanches which are constantly rolling down from the stupendous mountains in the vicinity. On their return, the traffic with Chinese Tartary, or Hinades, as the natives call it, is resumed. It is carried on chiefly by the Jawahar or Uts Dhara Pass, though other passes are far more practicable because the highest authorities have been pleased to confer upon the Jawahar its exclusive privilege of visiting and trading in all the parts of Hinades. The principal exports to this country are grain, cottons, broadcloths, sugar-candy, spices, dye-stuffs, hardware, wooden bowls, coral, and pearls; the imports from it are gold dust, salt, borax, goods and sheep's wool, coarse shawls, yak tails, peases, drugs, dried fruits, and tanned leather.

MILWAUKEE (ed.), a to U States, esp. Wisconsin, II.

at the mouth of a small river of some name on the W. shore of Lake Michigan, and on a number of railways connecting it with the Mississippi and all parts of the country; lat. 43° N.; lon. 87° 34' W. It is laid out with considerable regularity, and consists of a central portion situated on a flat, and forming what may be called the business quarter, and two other portions, on E. and W., based on commanding heights, and connected with dwelling-houses generally well shaded with trees. Most of the houses are built of a beautiful greenish-colored brick, which is made from beds of clay obtained in the neighborhood, and has a light and pleasing effect. The public buildings and institutions are a court-house; a large office of Illinois marble, erected by the general government for state purposes, and containing a post-office, a custom-house, and various public offices; thirty-three churches and two orphanages; also public and a large number of private and select schools; two city-law offices, an hospital, and a convalescent. The great staples of trade are grain and flour. The provision trade also, though not yet fully developed, is becoming very important. The population more than doubled within ten years. In 1850 it was 30,000; in 1860, 45,246.

MINAHARA, a prov. or dist. Indian Archipelago, forming the extremity of the N. peninsula of Celebes. It lies between lat. 1° and 2° N., is about 60 m. long by 20 m. broad, and has an area of about 1200 sq. m. It is a mountainous region of volcanic mountains, several of which are active, and of valleys, hills, and rivers. The vegetation is not remarkable for elevation. Rice is the chief of them, but only 6123 ft. above the sea. The table-lands average 5000 to 2500 ft. and contain many lakes, apparently the centers of extinct volcanoes. The fish with which they abound furnish a large part of the subsistence of the inhabitants. The streams, though numerous, are small and unfit for navigation. The cultivated productions are rice, maize, ground pulses (*Arachis hypogaea*), ginseng and sage palm, tobacco, coffee, and cane. The cane is produced yearly to the extent of 250,000 lbs.; the coffee, considered superior to the best of Java, to the extent of 1,500,000 lbs. The rice produced, though human labour only is employed, exceeds the consumption, and leaves an annual surplus of about 40,000 cwt. for export. The inhabitants are estimated at 95,318. Of these only 3375 are Malays and 510 Chinese; the rest, 92,333, considered as aborigines, are, like the other inhabitants of the Celebes, of Malay extraction, but speak a distinct and peculiar language. Though simple and inefficient, they are indolent, dirty and poor. Their chief subsistence is rice.

MINDIF, or **MARROW**, a mountain, Western Africa, connected with a range which forms the western barrier of the country of Wanda, 160 m. E. by E. Kikoro. Surrounded by several other lofty summits, it might be supposed, when viewed at a distance from a particular point, to be the centre of a considerable mountain chain, whereas in reality it is only a detached cone, arising up from a level plain. Its height scarcely exceeds 6000 feet above the sea-level, or 4000 feet above the plain, and its circumference at the base is probably not more than ten or twelve miles. It is partly accompanied by a straggling village of the same name, which seems to stretch out to a considerable length, or rather to consist of two or three distinct clusters. The weekly market of the village is of some importance.

MINERAL POINT, a to. U. States, Wisconsin, cap. on Iowa, on a branch of the Wisconsin River and on the Illinois Central, and the Galena and Chicago Union railways, 56 m. S. W. Madison. It possesses five churches and flour-smelling furnaces, and has an active trade. Pop. (1860), 2389.

MINERBE, a to. Italy, Venetia, prov. and about 19 m. S. E. Verona; built among other fine buildings, a palace by Scamozzi. Pop. 3029.

MINERSVILLE, a to. U. States, Pennsylvania, on the W. branch of the Schuylkill River, and on the Minehill and Schuylkill Harve railways 45 m. N. E. Harrisburg. It is situated among hills containing rich veins of anthracite, and possesses four churches, a car-factory an iron-foundry, a flour and a saw-mill. Pop. (1860), 3294.

MINERY, or **MINING**, a civil Eng. that provision, 52 m. N. by E. Kendy. It contains a small temple and a post-office, but is only deserving of notice for the beauty of the surrounding scenery which has made it to be pronounced

'the most charming spot in Ceylon,' and the bank of some name which lies embayed at the confluence of numerous valleys, separated by low and wooded stages. This spot forms an immense reservoir, upwards of 30 m. in extent, and its embankment, though overgrown with lofty trees, reaches so nearly perfect that the water still issues by the ancient conduit, and after facilitating a considerable area, flows in a broad stream to the Mahaweli.

MINGAN, a group of islands, Gulf of St. Lawrence, lying 45 m. along the coast of Labrador, and opposite the N. W. end of Anticosti Island, lat. (of centre) 50° 10' N. lon. 64° 15' W. The group numbers 29 islands, some of them very small, and the largest not exceeding 11 or 12 m. in circumference. The most easterly is named St. George; the western is one of the Parroquets, noted for the numerous wrecks upon it. The islands are of lower Silurian limestone, dipping slightly to the N. at an inclination of 60 to 80 ft. to the mile, outcrops of the great Silurian band of N. America, and formerly connected with Anticosti. Of ancient fossiliferous rock (sandstone to calciferous), the islands are generally low, some of them having an elevation of more than 800 ft. above the sea. Ancient beaches, as well defined as if moulded during the present glacial period, rise above the highest tides and water-worn rocks shaped like gigantic Egyptian pillars, front the sea, and give a strange and artificial appearance to some of these wave-worn islands. Seals and otters abound upon the limestone rocks and shoals. The four most westerly islands, called the Parroquets, from the vast numbers of these birds which burrow and build on them are low limestone rocks, quite denuded of trees. The north-western of the Parroquets is the highest of the group, and has a layer of peat on its summit. Shallow water lies off this island for 1/2 m. both E. and W. The Mingan Islands are held on the N. side and free from danger to mariners, but shoals generally project towards Anticosti. With Anticosti and Cape Bonaville they form the bounds of the estuary of the St. Lawrence, which, divided by Anticosti is here 100 m. broad.

MINIHA, a to. Central Egypt, cap. near of same name, on an elevated site above L. N. Min, 126 m. S. by W. Cairo. It is a large and comparatively handsome place, with several regular streets and some very handsome mosques. Its manufactures consist of cotton goods and earthen vessels called hardicks, which by their porosity act as water-coolers.

MINNESOTA, or **MINNAPOTA**, [said] North America one of the states of the American Union, between lat. 45° 30' and 49° N., and lon. 95° 30' and 97° 5' W. bounded N. by British America, E. Lake Superior and Wisconsin, S. Iowa, and W. Dakota or Nebraska; greatest length N. to S. 350 m. greatest breadth, 183 m.; area, 81,259 m. It occupies the summit of a central plateau formed by the continuous basins of the Mississippi, the St. Lawrence, and Lake Winnipeg. In the N. E. a group of low hills, composed of huge deposits of drift, and carrying an outcrop of the primary and metamorphic rocks, rises about 1680 ft. above the sea, and is known by the name of Hesperia de la Terre, or Heights of Land but with the exception the surface is generally an undulating plain, with an average elevation of about 1000 ft. The general slope is S. E. towards the basin of the Mississippi, which with its affluents drains about two-thirds of the state; the only other important stream is the Red River of the North, which forms the W. boundary for 875 m., and belongs to the Winnipeg basin. The banks of the latter river are bordered by extensive alluvial flats of great fertility; but those of the Mississippi present a number of rocky limestone cliffs, often remarkable for their picturesque scenery. The rock formations appear to belong almost exclusively to the lower and lower Silurian groups, which for the most part lie covered beneath glacial deposits, forming the superficial surface of the rolling prairie. About two-thirds of the surface are well suited for the cultivation of the cereals and roots of the temperate zone, the soil consisting generally of a dark siliceous loam, abounding in organic and saline matters, and retentive of moisture. The scenery, especially above lat. 46°, is well timbered. Far to the N. forests of pine occur; on the river flat wooded, spruce, aspen, maple, linden, basswood, &c., abound; and in the prairie, tamarack, cedar, and spruce. The wild animals include the elk, deer, antelope, wolf, bear, otter, beaver, the eagle, grouse, pheasant, partridge, quail, and vast flocks of wild geese.

with geese, and other water-fowl. The buffalo, once abundant, is no longer found E. of the Red River. The lakes and streams abound with many varieties of fish. The climate is on the whole temperate, the winters though cold being clear and dry, while winds and breezes temper the excessive summer heat. For administrative purposes Minnesota is divided into 66 counties. St. Paul, situated near its S. frontier, is the capital. By the constitution which was adopted 12th October, 1857, the right of voting belongs to all free white males 21 years of age, who have declared their intention of becoming citizens of the United States, and have resided a year within their limits, and four months previous to voting within Minnesota itself. The executive consists of a governor, lieutenant-governor, secretary of state, treasurer, and attorney general, all elected for two years. The judges are also elected, three of the supreme and district courts for seven, and those of the other courts for two years. The property valued for taxation in 1892 amounted to \$62,850,000. The quantity of land sold by the United States since the establishment of the land system in Minnesota, from the beginning of 1850 to the beginning of 1890 was 3,186,111 acres, or between six eighths and a ninth of the whole area of the state. Pop. by the census of 1850, 8,077; by that of 1860, 178,835.

MINNESOTA or **St. Peter's**, a river U. States has its sources in a series of lakes between lat. 45° and 46° N. Minnesota flows S.E. for about 600 m. till it receives the Blue Earth, when it turns N.E., and continuing in that direction for about 120 m., joins the Mississippi at Fort Snelling. Owing to a rapid which occurs 40 m. above its mouth, it is navigable by steamers only for that distance, but small boats ascend about 250 m. farther.

MIRAMICHI [adj.] a river, British America, New Brunswick, which rises in the W. of the province, on the high ground which borders the basin of St. John flows N.E. and falls into a large bay of same name in the Gulf of St. Lawrence, after a course of about 100 m. The bay is nearly 14 m. wide, from the head here of Blackland Point on the N. to Esplanade Point on the S., and about 64 m. deep from that line across the mouth to the main entrance of the river between Portage and Fox Islands. Beyond these islands is the inner bay or estuary the entrance to which is obstructed by a bar of sand, which in some parts has not more than 3 ft. of water over it at low tide. At its S.E. end of Portage Island how ever there is a part called the Swayway, which has a depth of 16 ft. at low water and of 22 ft. at high water in ordinary spring tides. The inner bay is about 18 m. long from its entrance to Shellbacks Island, where the river may properly be said to commence, and from 7 to 8 m. wide. Its depth is ordinary spring tides is 16 ft. The river, when it enters the inner bay is three-quarters of a mile wide but narrows shortly after to half a mile. This width it retains up to the town of Chatham. At its mouth the country begins to rise into gentle undulations, terminating in steep banks and cliffs of sandstone. The scenery is by no means devoid of beauty though somewhat of a desolate aspect is given to it by the dead and half burnt trunks of large pines, standing out from a young growth of green poplar, and bearing testimony to the terrible conflagration of 1846. Vistas of boundless coal are seen along the banks, but as yet no trace of quality and thickness to repay the expense of working has been discovered.

MIRICKVILLE, a town, British America, Canada West, on Grenville, on the Rideau canal, 105 m. S.W. Montreal, with a Church of England and a Wesleyan church, a mechanics' institute, manufacturing of woollens, an saw factory, a foundry, a tannery, and a large trade in furs and sturgeon. Pop. about 1660.

MIRIBEH, or **Mouat**, a mountain in the N.E. of Turkey in Europe, situated by the St. George and the Balkan arms of the Danube. It is nearly in the form of an isosceles triangle, with its base facing the Black Sea and is densely wooded, spreading thence to whole herds of wild oxen and to various other animals. On its N. side, close to the Sulina mouth, is the town of Braila, containing a lighthouse and about 200 dwelling-houses, the inhabitants of which find employment in avoiding the landing and unloading of vessels, in shipbuilding, and in carrying on a little trade. On the St. George river above is a fishing colony established by some monks who were driven out of Mount Athos.

MIRIBITA, a town in Western Africa, near the N.W. frontiers of Bornu and W. of prov. Sinder 110 m. N.N.E. Kano. It was once the capital of the whole W. prov. of Bornu but began to decay on the foundation of the town of Sinder of which it is now in some degree a dependency. The wall is beautifully adorned with tessellated-tiles. Immediately N. of the town is an extensive district, which enjoys the benefit of irrigation and on which much wheat and cotton are grown.

MIRTA a town in India, Rajpootana, state and 69 m. N.E. Goodpore. It occupies a commanding height, is surrounded by a wall, which is built on the W. side of mud and on the E. of good masonry, and contains several Hindu temples a large and lofty mosque, and a well-constructed but rather miserably supplied bazaar. It is said to have a masonry of salt. A supply of good water is obtained from three large tanks. Pop. estimated at 25,350.

MIRZAPORE, a dist. India, N.W. Province between lat. 23° 50' and 25° 50' N. lon. 83° 11' and 84° 39' E. is bounded N. by Jaecopoor and Benares, E. by Allahabad, Bhatnagar, and Palamou, W. by Bhatnagar, and W. by Benares and Allahabad, area 4325 sq. m. The N. portion forming part of the valley of the Ganges, is of an alluvial character but has some rugged sandstone ridges, which rise into an abrupt rock of considerable height, and furnish the site of the fort of Chunar. Southwards the elevation increases the surface rising first into the Bindachal Hills which are 250 ft. above the adjacent valley or 500 ft. above the sea, and ultimately into a tableland about 800 ft. high, forming part of the N.E. extremity of the Vindhya range, which overtops the whole S. of the district and gives it a rugged and barren character. The natural wealth is less varied than might have been anticipated from the nature of the strata. Coal however has been discovered on the banks of the Soan, which is, next to the Ganges the most important river of India, affording excellent lime and fine sandstone for building abound, and at different localities are found fine slate, native soda, and iron ore. The principal alimentary crops are wheat, barley, opium, millet, maize, pulses, and oil-seeds the commercial crops sugar, indigo, and cotton. The chief manufactures are woollen carpets, in imitation of Turkish cotton carpets or shirtings, various imitations of Cashmere shawls, chintzes, and silk fabrics. In modern times most of these manufactures, unable to encounter British competition, have greatly declined. Pop. 831,388.

MIRZAPORE [adj.], cap. of the above dist., situated 60 m. S.E. Allahabad, on a bed of kumbar above a bank of the Ganges, which is here half a mile wide and crossed by a ferry. It presents an imposing appearance from the river, in consequence of the fine ghats leading down to it, the numerous mosques and temples, the handsome European houses occupying some of the most conspicuous sites, and the great extent of the place. This first impression is scarcely confirmed by actual examination. The native town consists mainly of three long straight, and wide streets, shaded with rows of trees and provided at intervals with wells, some of them so built as to furnish good specimens of architecture. The houses, however notwithstanding the abundance of excellent building stone in the vicinity are usually constructed of sand or unburnt brick, seldom of more than two stories, and for the most part of very indifferent appearance. The manufacture of carpets, and other strong woollens, cottons and silks, have long been on the decline, but Mirzapore still maintains its pre-eminence as the greatest cotton mart in India and has communication with Allahabad, Benares, and other chief places, by means of the India Steam Navigation Company's vessels. The cotton raised within the district forms a mere fraction of what is here warehoused or brought to market, large quantities to be disposed of in the lower provinces being transported hither from the Doab, Oudh, Bundelkand, the Bangor and Nerbade territories, and even from parts of Malwa and Nagpore. The military cantonment is 3 m. S.E. of the town, on a kind of peninsula formed by the windings of the Ganges.

MIRAMBA, a prov. and N. Philippine Island. The upper end of the prov. into which the island of Mindanao is divided, lies on the N.W. side, bounded by Cebu on the E., the territory of the Sultan of Mindanao on the S., and Zamboanga on the W.; area, 1460 sq. m. The climate, hot and damp,

but still unhealthy, produces a luxuriant vegetation, the most obvious effect of which has been to cover most of the country with forests of mammal density. The inhabitants dwell chiefly on the sea-coast, where hay and corn, abounding with fish, supply them with their chief means of subsistence. A considerable number employ themselves in trading the mules of the rivers for gold. Pop. 47,500. The river, cap. of the above port, situated on the W side of the Bay of Higue, in lat. 18° 10' N., lon. 73° 45' E., contains 5530 inhabitants.

MISCOU, an island British America, Gulf of St. Lawrence, at the S.E. entrance of Chaleur Bay. It is of a triangular shape, about 8 m. long from N. to S. and has a maximum breadth from E. to W. of nearly 5 m. On the S.W. the shore is low, and ends on a long ledge of sandy flats; but elsewhere it is tolerably high, with steep sandy beaches, particularly towards the N. extremity where several stores and fishermen's huts are seen. Near the same extremity on Birch Point, there is a lighthouse, on the slope of a wooden octagonal-shaped building with a fixed red light 79 ft. above the level of high water and visible in clear weather at the distance of 12 m. The channel between the islands of Miscon on the N. and St. Pierre on the S. forms an excellent harbour above a mile long, 400 yards wide, and from 4 to 6 fathoms deep.

MISIVIA a to. Turkey in Europe, on a bay of the Black Sea, on the S.E. coast of Bulgaria. It has a harbour surrounded by rock, but notwithstanding remains on a small durable trade in wine for fuel. From the country, iron and other ancient remains found within it appears to have been once much more important than at present. Pop. 3000.

MISIVIE (Aino) a to. Austrian empire, Hungary to Abau-Terna, 7 m. S.E. Kaschau, cap. dist. of same name with a courthouse, a high-school, a large imposing structure which was once a monastery and 1000 inhabitants.

MISIVITZ, a to. Austrian empire, Moravia, circle and about 12 m. N.W. Kaschau with a handsome parish church, a music, a synagogue, and 1000 inhabitants, of whom half are Jews.

MISTASSINKI [old] a lake river, and dist. British N. America. The lake, of vast dimensions, occupies an area between lat. 71 and 74° W. and lies under the parallel of lat. 51° N. It derives its name, Great Stone, from a huge isolated rock in it, the summit or spirit of which is inhabited by the Indians. In the neighbouring country forest trees disappear, and the whole of it is cut up by thousands of lakes, and covered with numerous rocks piled one upon another and often covered with huge lichens of black colour, in the spaces between these rocks a few pine trees are found not exceeding 3 ft. high. The Mistassink River, or Rivière des Saibies is 150 m. long, and navigable for canoe to a distance of 120 m. from its mouth on Lake St. John (lat. 49° 35' N. lon. 71° 30' W.). In one place it has a cascade 80 ft. in height, and from the summit of the hills near the cascade a chain of lakes, occupying a long valley leads to the watershed of the district, whence a small tributary of Lake Mistassink takes its rise.

MITCHILL, a to. British America, Canada West, co. Perth, on the Thames and on the Buffalo and Lake Huron railway 90 m. W. by R. Toronto. It has three churches, manufactures of grout and flannel mills, a brewery, an iron foundry and several grist and saw mills. Pop. about 1000.

MITROVITZ, a to. Turkey in Europe, near the S.E. extremity of Bosnia, 80 m. S.E. Nevesinje. Its inhabitants are chiefly engaged in the culture of the vine the lower slopes of a ridge of hills to the N. of the town being wholly planted with vineyards. Pop. about 1000.

MIZDA a to. N. Africa, regency and 100 m. S. Tripoli near the western extremity of the Wady Scholia, justly celebrated as one of the most fertile within the limits of the regency. It occupies a rich composed country of trypsin, and consists of two distinct sections or villages, of which all the houses are constructed of gypsum. The western and larger village has a wall in a state of decay, and several high round towers equally ruinous, but hints of being able to furnish 100 full grown men fit for military service. Two oases are noted, one from Monrovia, and the other from Ghadamah, both at Mizda, and give it some commercial importance. The inhabitants, belonging to the Kharin tribe, are of a mild disposition, and bear a high character for honesty.

MIZUN, a to. Austrian empire, Galicia, circle and about 30 m. Stry with most numerous and other extensive manufactures. Pop. 1700.

MJESKIBROVSK, a to. Austria, gov. Kalung, asp. circle of same name, on both banks of the Marchfeld. It contains four churches, a sealer and a religious school, a charitable endowment, and an important weekly market, which lasts from June 27 to July 8. Pop. 4011.

MLAVA, a to. Russian Poland, gov. Plock, asp. circle and on a stream of same name contains 9857 inhabitants, and has a missionary church, an elementary school, and various manufactures.

MOBILE [old] a to. U. States cap. and only seaport of Alabama, on the W. bank of the Mobile, immediately above its mouth in Mobile Bay and on the Mobile and Ohio railway lat. 30° 41' 36" N., lon. 88° 1' 29" W. It stands on a sandy plain rising gradually from the water and consists of the town proper with regular, well-paved and well-laid streets, and several extensive suburbs partly covered with fine villas. The principal public buildings are the market house, a large and handsome edifice, with an upper story in which the municipal authorities are accommodated, the custom-house, with accommodations for the post-office and U. States courts, twenty-three churches one of them an imposing R. Catholic cathedral, a Jewish synagogue, the public schools kept in what was formerly the Baptist sanctuary, a city and a marine hospital, an infirmary, the church of the Sisters of Charity, three orphan asylums, a medical college, a literary institute, a theatre, and Oddfellows and Temperance halls. The industrial establishments include two iron foundries a resin-oil factory a dry-dock, and several building-yards, but the great staple of the place is cotton, of which during the five years ending 1859-60, 780,057 bales were exported. The other exports, consisting of lumber turpentine, resin, oil, &c. are comparatively insignificant. So also are the imports, for in 1859 had a value about of \$200,000, while that of the exports amounted to \$6,000,000. The great hindrance to the trade of Mobile is the shallowness of its harbour. Vessels drawing more than 10 ft. must anchor in the bay about 25 m. from the town, and receive their cargoes by the intervention of steamboats. Another serious obstacle to the prosperity of Mobile is its climate. In addition to its excessive summer heats, it is subject to visitations of epidemic yellow fever which in 1858 carried off about a tenth of its then actually resident inhabitants. In common with the other ports of the south it suffered severely during the civil war and was surrendered to the Federals. Pop. (1860), 29,258.

MOCHOWOK, a to. Austrian empire, Hungary to Lower Austria, 89 m. E.N.E. Presburg with a fine summer palace of the Bishop of Neutra and 2196 inhabitants.

MODLIN (called by the Russians Negorodny) a fortress, Poland walled Plock at the confluence of the united Nawro and Bug with the Vistula, 15 m. N.W. Warsaw. Its position giving it the command of the passage of these rivers, clearly indicates its military importance, and accordingly, in the seventeenth century the Swedes forced an entrenched camp here. Napoleon was what might be made of it, and was surprised to find it so situated on the 18th to 18th. In 1812 it was blockaded by the Russians, who only obtained possession of it after the provisions of the garrison were completely spent. During the revolution of 1831 it was heroically defended by the Polish general Ledochowski till the fall of Warsaw when his plan of blowing it in the air was defeated by the pusillanimity of his officers and he was obliged to surrender. Since then its fortifications have been repaired, enlarged, and strengthened, so that it is now one of the most formidable places in the Russian dominions. The whole space within the works being occupied by military buildings, there is no proper town.

MODLING [old], a to. Austrian empire, Lower A. circle, cap. dist. of same name, is a beautiful and romantic district on the South railway, 9 m. S.E.W. Vienna. It has an ancient Gothic church, a conventual chapel, a posthouse, an asylum for children, a theatre, barracks, chalybeate springs, three distilleries, and a considerable trade in wine. Immediately behind the town opens the rocky valley of the Erlau or Erlau, which is rich in natural beauty, and has some of its most romantic heights covered with rufous sandstone. One of these belongs to Prince Liechtenstein, who has in the same locality

a fine summer-palace, with a large park laid out in the English style. In the valley gypsum and limestone are extensively quarried. Pop. 3550.

MODRITS, a tn. Austrian empire, Moravia, circle and 6 m. S. of Bräun with manufactures of beet-root sugar, and three yearly markets.

MOENA, a tn. Austrian empire, circle and 85 m. N. E. Trent, in the marriage of a valley on the frontiers of Venetia, with several towns, and a pop. of 1400.

MOENA, MUSA, or PAYSANET, an Isl. Indian Archipelago, situated between Boston and the S. E. peninsula of Celebes. It is about 105 m. long by 30 m. broad, and has a computed area of 744 sq. m. Its capital, bearing the same name, is interior, and the only place where any trade is carried on is Tivoro, situated near its N. extremity opposite to Celebes. The inhabitants, of Malay origin, speak a dialect of the language of Boston, to whose sultan Moena is subject. The only staple of trade is trepang.

MOGLA, a tn. of the name of two nearly contiguous tns. N. Africa, Algerian Sahara.—The one, *Mogla Fata*, or *High Mogla*, has an elevated site on the N. slope of the Uled Sidi Bheikh range, and contains about 150 houses of indifferent appearance, a mosque, a school and a fountain. The other, *Mogla Tala*, or *Low Mogla*, lies at the base of the range, surrounded by productive gardens and groves of dates. Both districts raise large crops of grain, with which they supply several places in the neighbourhood.

MOGILA, a tn. Austrian empire, Galicia, circle and 4 m. E. Orsovo, 1 bank Vistula, with a Christian monastery founded in the thirteenth century and 1800 inhabitants.

MOGILANY, a tn. Austrian empire, Galicia, circle and 3 m. S. W. Orsovo, on a mountain ridge, commanding a beautiful view of Orsovo and the valley of the Vistula and crowned by a baronial castle. Pop. 1100.

MOGULTOOL, a tn. India, prov. Madras, dist. and 46 m. S. Rajahmundry. It has of late years greatly declined and derives most of the importance which it still possesses from its government salt-pans. In the vicinity nearly contiguous to the town, is a mud fort occupied by a pensioned rajah, a descendant of the sultan who once possessed the greater part of the district W. of the Godavary.

MOHAMMARAH, a tn. Persia, Khuzestan or Arakistan on the N. extremity of the island of Abadan, which is formed by the two W. arms of the Euphrates before discharging their waters into the Persian Gulf, 26 m. below Basra. Forming the key to Persia from the gulf it is a place of great strategic importance, and is accordingly defended by several batteries. These however were easily silenced by the British during the late Persian war in 1856-7, and the garrison, after only a show of resistance, fled, leaving Mohammara itself to the victors. This presents thus brought to bear on the Persian government was doubtless a main cause of the peace which they hastened to conclude immediately afterwards. The advantages which Mohammara derives from its position are counterbalanced by its climate, which is so pestilential that the mortality among those who are obliged from any cause to reside in it during the hot season amounts to about 50 per cent. The cause of this miasmatism is according to Sir Henry Rawlinson, the marsh malarial produced by the decomposition of vegetable matters under a burning sun, added to the great humidity of the atmosphere in the immediate neighbourhood of the sea. Farther up the river the climate is comparatively healthy.—(Sir H. Rawlinson.)

MOHAN, a tn. India, Oude, 1 bank Rase, which is here crossed by a handsome brick bridge of 15 arches, 18 m. W. S. W. Lucknow. It was once defended by a brick fort, which has disappeared, and gives indications of having once been more important than at present. The road leading into it has a low wall on each side, and is paved with brick.

MOHARKEE, or **MARWEE**, a tn. Persian Gulf, at N. end of an island of same name, lies like a long white strip on

the shore of the channel that separates it from the town and island of Monasah or Bahrein, lat. 26° 30' N. lon. 50° 40' E. Its white houses set off by dark palm-trees, the large low palaces of the head family, two or three imposing forts along the shore, and a long coast battery, altogether give it a striking and pleasing aspect. Along the low sand-line of the island rise many detached groups of palm-trees, with an occasional white plastered residence amid tall date-trees, all having a quiet and peaceful air.

MOHRAN (LORAN), a tn. Austrian empire, Blinnitz, dist. Windenthal, 18 m. W. V. W. Tropen on the Morav; with a wire-factory a paper-mill iron-works, and 1400 inhabitants.

MOISIE or **MIS-TE-MURU** (the 'Great River of the Montagnais Indians), a river British America which has its mouth on the N. shore of the estuary of the St. Lawrence, on the S. W. coast of Labrador, about 18 m. E. Seven Islands Bay, lon. 66° 10' W. It discharges a great volume of water

MOISIE RIVER, THIRD RAPID.—From Hild's Expedition to Labrador.

in spring after the melting of the snows and brings down quantities of sand which so obstruct its wide and shallow channel in the first 2½ m. from the sea that boats cannot ascend at low tide. At the end of 2½ in the river which has decreased in width to ½ m., has a clear channel, and flows with a depth of 9 ft. between steep sandy shores or cliffs for another mile. First bottomed boats can ascend to the first rapids, a distance which including windings, is about 30 m. above its mouth. It has its source in some of the lakes and swamps of the high table-land of Canada East. Far easterly it has been one of the chief lines of communication from the interior to the coast, travelled by the Montagnais during the time that they were a numerous and powerful people. The old and well-worn portage paths round hills and rapids, and over precipitous mountains, on the Upper Moisie, testify the antiquity of the route. The general course of the river is from N. to S. running for the most part through precipitous mountain gorges, with numerous rapids and falls, which give peculiar utility for purposes of navigation. Its length is about 250 m. with a total descent of more than 2000 ft.—*Moisie Bay* to the E. of the mouth of the Moisie River is lined with a beach 100 to 300 yards in breadth, fringed with open glades and forests of small spruce. The fishing station at the mouth of it, like other places on the N. shore of the Gulf of St. Lawrence presents, during the summer a busy scene, but in the winter is desolate. In the summer of 1859 the population was 1500 with 500 boats engaged in fishing for cod in the following winter the number of people was 21 left in charge of the fishing establishments. Professor Hind gives the following account:—"The bay especially on the E. side, presented a very lively aspect when we visited it. The beach was lined with stoves and 'skans' on which 100,000 cod-fish were drying. We went to see Mr. Tison's vast deep-sea fishing in which he had since 150,000 cod-fish in a fortnight. It consisted of an immense net divided into eight compartments, into which the fish entered, but from which they cannot or do not escape. The fish-

Just tells them out with except after taking one of the compartments of the net nearby to the surface of the water. On looking over the side of the boat we observed thousands of cod-fish swimming about in the "pond." Mr. Tém informed us that he allows the fish to remain in his nets until he requires them; they feed as in a preserve, and feed the vessels was employment when the weather is too bad for the boats to go to sea. On the day of our visit he took 9000 cod-fish out of his traps.

MOJO, a tn. Bolivia, prov. and 140 m. E. by E. Potosí, in a scattered and barren district. It consists of mud houses badly whitewashed, ranged in straggling rows about the shops are ill supplied, though the potatoes and bread are in high repute.

MOKAI, a river New Zealand, which rises in the Enderbush mountain range, in the W. of North Island or Ulster. It flows W. and falls into the sea about 35 m. N.W. of Plymouth. It has E. R. on its bar at low water and 14 ft. at high-water springs, admits vessels of about 20 tons, and is navigable for boats for many miles, but subject to heavy freshets. Coal is found on its banks.

MOKME, or Moume-Mé, a tn. Burma, cap. of a Shan state, 70 m. S.E. Ava. The inhabitants, comprising about 250 houses, suffer much from the depredations of the Red Namas, who live on their frontier and compel all the other villages to pay them black mail.

MOKOMBE, a village, E. Africa, Portuguese possessions. It lies on the Zambezi nearly opposite to Tete, and is celebrated both for the hot spring of Nyumbereke, situated about 2½ m. to the E. and still more for its gold washings, which have been carried on for a long period, and have not yet been abandoned, though the yield is small.

MOLGHOUY, a vil. W. Africa, country of the Marghi, 150 m. E. by W. Kachawa. It is not so much one village as a large aggregate of huts, sometimes clustering together sometimes detached, and spread over an extensive area. The fields, though much and sown by numerous large tracts, present a wretched appearance. Agriculture is carried on at a stand, and though the rains had not in there was no appearance of activity. Everything showed that the inhabitants, galled by oppression, were biding on despair.

MOLINE, a vil. U. States, Illinois, on Rock Island in the Mississippi, and on the Chicago and Rock Island railway 145 m. W.W. Chicago. It possesses a fine school-house and several mills and factories. Water-power, obtained by the river by means of a dam, and a large out-fall in the vicinity, give it great facilities for manufactures. Pop. (1880), 2328.

MOMET, a tn. Burma, cap. of a considerable territory to the E. of the Irrawaddy, about 60 m. N.N.E. Ava, has within its district the celebrated ruby mines of Mogunt and Kyau-pen.

MOMAS, a river, Assam, which, rising in the Himalayas, in lat. 28° 21' N., lon. 91° 18' E. flows S. through Tibet for 40 m., descends through a mountain gorge into Bhootan, changes its direction by bending gradually round to the S.W., crosses the Dameru, which nearly doubles its volume, enters Assam after passing part of the boundary between it and Bhootan, and joins the Brahmaputra on its E. bank, opposite to the town of Goalpara. Its total length is about 120 m.

MOMASRA, a tn. India, British Dominions, cap. paragon of some power, in a valley bounded on the E. by the Chitr range, 18 m. E. Koonah. It stands at the height of 1440 ft. above the sea, possesses a bazaar and a market, and has a pop. of 4100.

MONASTERYKA, a tn. Austrian empire, Galicia, circle and 27 m. N.E. Stanislaw, cap. dist. of same name; with an extensive manufacture of cigars, and 2363 inhabitants.

MONASTIR [old], a small sea-coast town on the Bay of Haifa, 12 m. S.W. Haifa, and 60 m. S.E. Tyne, surrounded by craggy cliffs of basaltic construction. The streets are clean and well laid out, and the palace, which grew to great numbers in the town, and overtop the houses and the wall, impart to Monastir when seen from a distance, a very unique and picturesque aspect. The town is better fortified towards the sea than towards the land. A tunnel hollowed out in the rock, named by the Arabs the Sultan's Mouth, and giving communication between a plateau outside the town and the sea,

is the only noteworthy object of the place. In the weather this tunnel serves the inhabitants as a bathing-place. Numerous gardens, in which its many country houses, are situated round the town. (Chateaux, *Ajaccio de France*.)

MONASTIR, a tn. Burma, cap. Shan state of same name, at the height of 2000 ft. above the sea, 140 m. S.E. 3 m. It is built along the foot of the hills bordering the fertile valley of the Nam-tsun, a tributary of the Meikong, is the largest of all the Shan states, and the seat where the Burmese government, as the paramount power, exercises its sovereignty, and contains about 8000 inhabitants.

MONOLOVA, a tn. Mexico, dep. Coahuila, 65 m. N.N.W. Saltillo. It is situated in a mountainous district near the centre of the dep. and the sources of the Saltillo, and contains seven or eight churches, an hospital, and a cotton factory Pop. about 4000.

MONGHYE, a dist. India, prov. Bengal between lat. 24° 30' and 26° 1' N. lon. 85° 40' and 88° 50' E. is bounded N. and E. by Bhagpur, S.W. Rangpur and Bahar, W. Sahar and Patna, and N.W. Tyrooh; length, N. to S. 11½ m. breadth, 66 m.; area, 5558 sq. m. It lies chiefly along the l. but partly also along the R. bank of the Ganges. The former or N. portion, constituting about two-thirds of the whole, is in general a low flat, in some places sandy, in others swampy and unadorned, but containing large tracts of remarkable fertility. The S. portion possesses the same general character but appears to be on the whole still more fertile and unadorned. The principal crops are rice and wheat, but barley, pulses, oil-seeds, opium, indigo sugar and tobacco are extensively grown, chiefly by means of irrigation. The inhabitants are very industrious, and turn their land to the best account, often raising three crops from it in a single year. The first is Indian corn, the second rice, and the third pulses, sown in between the rows of rice, and left to attain maturity after the rice is reaped. To the general richness of the district there are some exceptions. One of these is a rocky tract in the vicinity of the town of Monghyr, where rice is sown on a stiff preloping boldly into the Ganges. Still further S. and S.E. an extensive highland is formed by the Kurnoolpore Hills, which, partly in isolated groups, partly in continuous ridges are for the most part covered with wood. Among wild animals are tigers, leopards, hyenas, wolves, bears, jackals, monkeys, &c. The goat a large and noble hoarse animal, exists in the wilder parts the rhinoceros is not unknown and a wild elephant occasionally makes his appearance. Snakes, some remarkable for their size, and others for their venom, are very numerous, and the Ganges teems with alligators, porpoises, tortoises, and good fish. Pop. 800,000.

MONMOUTH a town and port bar. market in. and par. England, cap. of same name, beautifully situated in a luxuriant vale, near the confluence of the Marnow and Wye, 25 m. N. by W. Bristol. It consists of several streets diverging to the Wye, which is crossed by a handsome bridge was once surrounded by walls, of which only a gate remains; and defended by a castle, now reduced to a paltry ruin; it is in general well built, partly of ancient and partly of modern houses, many of them with gardens and orchards attached, and has a parish and a district church, the former with an ancient tower terminating in a beautiful spire. Wesleyan, Independent, Baptist, and R. Catholic churches, two grammar schools, and other schools; an excellent market-house, almshouse, a dispensary, manufactures of iron, tin, and paper, and a trade in iron and timber. Monmouth, with Newport and Usk, sends a member to Parliament. Pop. 5710.

MONTAGNAIS, a tribe of Indians, British America, Lower Canada, inhabiting the coast from the heights of the Saguenay to the shores of Labrador. They are no hunters, hospitable, and kindly men, and gain a subsistence chiefly from farming. They have no turn for agriculture, and are fast decreasing in numbers from want and privation. Many of the tribe have been converted to Christianity, and resort to the agent periodically for the visits of the R. Catholic clergy who minister to them.

MONTICRISTI, a tn. S. America, Ecuador, prov. Manabí, at the foot of a mountain of same name, about 10 m. from the coast, and 100 m. N.W. Guayaquil. Owing to the height of its site, its streets are very long, but many of its houses, which are all built of wood, have a pleasing

and comfortable appearance. The chief manufacture is straw hats, and the trade in them and in brandy, rice, cottons, vanilla, and timber. Monteforte was originally built where the port of Santa Rosa stands, but was removed to its present site in consequence of the degradations of the boomers. Pop. about 8000.

MONTEFORTE, a tn. Italy, Venetia, prov. and 20 m. N.E. E. Verona, with a number of handsome villas, a beautiful parish church, a bishop's palace, and 3674 inhabitants.

MONTEMORELO, a tn. Mexico, state Nuevo Leon, 70 m. S.E. Monterrey, with a pop. estimated at about 8000.

MONTEORIO, a tn. Italy, Venetia, prov. and 4 m. N.E. Verona; with a parish church, an old castle, a paper, an iron, and a cotton mill, the last on a large scale, with 10,000 spindles. Pop. 3221.

MONTEADOR, a tn. Borneo, the chief place of the Chinese diggers of its W. coast is situated about 45 m. N. of the equator, and within 25 m. of the sea, in a wide plain belonging to the decayed Malay state of Matan. The diggers are rude but industrious people, all of the labouring class, come from the prov. Canton. Not bringing their families with them, they intermarry with the natives, and give rise to a mixed race, but continue notwithstanding to preserve their original dress, manners, religion, and language. Since the Dutch obtained the recognition of their settlements in the Archipelago, they have subjected the diggers to their authority though not touch to their own advantage as several rebellions have in consequence ensued. The inhabitants are estimated by themselves at upwards of 100,000. This however is a palpable exaggeration.

MONT ST HILAIRE, a vil. British America, Canada, East co. Nouvelle, at the foot of a mountain 23 m. E. Montreal. It is much frequented in summer by pleasure parties for its fine scenery. The mountain rises to the height of 1400 ft. above the level of the St. Lawrence, and commands a view embracing the city of Montreal and the St. Lawrence, with its affluents Richelieu, Yamaska, and St. Francis. Some way up its side there is a lake with an outlet sufficiently copious to furnish water-power for several mills. Its base is covered with thriving orchards of apple-trees, for which the soil and climate seem to be peculiarly adapted. A superior hotel has lately been erected on an elevated spot in the vicinity.

MONTE-MAKABA, an isl. of the Zambesi B. Africa, below the confluence of the Kafue, about lat. 15° 30' S., is one of numerous islands which crowd the channel of the river and must ever prove a serious obstruction to the navigation of it; is near 2 m. long by 1/2 broad, and has, in addition to its human inhabitants, a herd of buffaloes that never leave it, and give battle when they are attacked. The only time when their numbers can be thinned is when the river is in full flood. Then the island is reduced to its narrowest limits, and the buffaloes afford a sure mark to the archers of a fleet of quoes. It is remarkable that under such circumstances they cling to their island, and refuse to save themselves by swimming, as they might easily do.

MOORHUR, a river, India, presid. Bengal, which, rising in lat. 24° 5' N., lon. 84° 28' E., flows N.N.E. through dists. Banchura, Behar, and Patna, and joins the Ganges on its R. bank a few miles below the town of Patna, after a course of about 180 m.

MOORSHEDABAD, a dist. India presid. Bengal, between lat. 25° 48' and 24° 47' N., lon. 87° 53' and 88° 41' E. is bounded N.E. by the Ganges, separating it from Malda, and Rajshahy; E. Rajshahy; S.E. Nadia; S.W. Beerbhoom and W. Beerbhoom and Bhagulpore, area, 1836 sq. m.; pop. 1,045,000. The E. part is a low flat, subject to inundations and abounding in ghazals or small lakes; the W. part is covered with hills connected with the neighbouring high lands of Rajmahal and Beerbhoom. The alluvial land is very fertile, but the hills had become productive only by a liberal use of manure and irrigation. Before the E. J. Com. N. to E., by 5 m. broad near its N. end, is in some parts of considerable elevation, Mount Trumpet, near its centre, rising to the height of 910 ft., and has hills moderately clothed with trees and scrub, though the greater part of the surface is sandy and approaches to absolute barrenness. Between Moorshabad and Serdhabrook Islands is Roms Channel, leading W. into Moreton Bay. Between Hady Point, the S. extreme of the former, and Avelly Point, the N. outcrop of the latter

Bhagulpore, in lat. 24° 51' N., lon. 87° 1' E., flows progressively 6 E., N., and S., and falls into the Bhagulpore, in lat. 25° 45' N., lon. 88° 10' E. after a course of about 180 m. Its chief affluent is the Dwarika, which, after joining it, sometimes gives its name to the united stream.

MORADABAD, a dist. India, N.W. Provinces, Rohilkhand, between lat. 28° 15' and 29° 27' N. lon. 78° 10' and 79° 54' E. is bounded N.E. by Kaiman E. Bareilly and the jaghirs of Rampoor, B. Budaun, W. Boudhahat, and Naun, and N.W. Bijnour; area, 2967 sq. m. The N. and N.E. frontier is formed by a range of hills of no great elevation and from these the surface gradually declines towards the S. The plain at the base of the hills consists of tawny or marsh land, and is characterised by a luxuriant vegetation of forest trees, jungle, and gigantic reeds and grasses and by daily malaria. To the S.W. where the slope is toward the L. bank of the Ganges, a good deal of the land is alluvial. The principal rivers are the Ramganga, the Gunguna, and the Kotli or Kesse. The wild animals include elephants, which are numerous in the forests, and a few of which are annually captured for domestication, though they are less valued than those found further east; tigers, leopards, bears, hyenas, spotted deer, antelopes, alynas, &c. Among serpents are the box-constructor and the cobra-de-capello. The agriculture is varied and important. Maize and millet form the principal food of the labouring classes, but rice and wheat are extensively grown and sugar-cane and cotton thrive well. Frank, among which peaches and grapes hold the first place abounds. Pop. 997,563.

MORAMBALA [the lofty watch-tower] a detached mountain, S. Africa, about 500 yards from 1 bank Shilo 18 m. above its junction with the Zambesi lat. 17° 50' S. lon. 26° 40' E. It rises with steep sides to the W. to 4000 ft. in height, and is about 7 m. in length. It is wooded to the very summit, and is very beautiful. The S. and west from a distance has a fine gradual slope, and appears to be of easy ascent, but the side which faces the Shilo is steep and rocky especially in the upper half. A small village is placed about midway up the mountain, in a pure and breezy air, and above mosquito range. The people on the summit have a very different climate and vegetation from those on the plains. Upwards of thirty species of ferns and even good-sized trees, are found upon the mountain, though scarcely a single kind is to be found upon the plains. Lemons and oranges grow wild, and pine-apples have been cultivated by the natives. Hornbills, hawks, monkeys, antelopes, and rhinoceros find home and food among the great trees round the base. In the plain near the N. end a hot fountain boils up clear as crystal from two spots a few yards apart, and sends forth a good stream of hot water the temperature is about 174°. An extraordinary smelling of sulphur has been deposited by the water upon the stones.

MORELLIA, or YATTAPOUT DE MORELLA [add.], a tn. Mexico, cap. state Morelos, at the height of 6000 ft. above the sea, 180 m. W.N.W. Mexico. It stands in a marshy plain occupying the centre of a valley watered by two rivers, is surrounded by productive and beautiful kitchen, fruit, and flower gardens, and consists chiefly of a large square and one principal street, with a number of minor ones. Many of the houses, especially in the principal street, are both substantial and elegant. The most important public buildings and institutions are the cathedral—a beautiful structure, somewhat overladen with ornament both without and within—two parish churches, a college, an ecclesiastical seminary, seven tolerably good elementary schools, two monasteries, two nunneries, and several hospitals. The Alameda and Paseo both situated in the S. part of the town, afford beautiful walks. Pop. about 22,000.

MORETON [add.] an isl. Australia, Queensland, forming with Stradbroke Island the entrance to the S. of the E. shore of the large and fine expanse of Moreton Bay. It is 50 m. long from N. to S., by 5 m. broad near its N. end, is in some parts of considerable elevation, Mount Trumpet, near its centre, rising to the height of 910 ft., and has hills moderately clothed with trees and scrub, though the greater part of the surface is sandy and approaches to absolute barrenness. Between Moreton and Stradbroke Islands is Roms Channel, leading W. into Moreton Bay. Between Hady Point, the S. extreme of the former, and Avelly Point, the N. outcrop of the latter

thence the distance is only 1½ m., while a mass of mudbanks stretches out ½ m. from Sandy Point, and forms what is called the North Bar, on which even in calm weather rollers break with great violence. The channel then becomes constricted to little more than 300 yards in width, and has a depth of only 4 fathoms. Notwithstanding the obvious danger of attempting such a channel, the masters of steamers and coasters often used it, though their only inducement was to save the short additional distance of sailing into the bay by rounding Cape Morrocco, but since the loss of the steamer *Overboard* on the north bar, in 1846 when a great number of the passengers had been perished, Zous Channel is seldom attempted.

MOROCCO, a *tu. Caylon*, on the W coast, 10 m. S. by E. of Colaba, with which it is connected by a road which passes between almost continuous gardens of cinnamon. It is a large place; and its inhabitants, most of them carpenters of the father case, are employed chiefly in making furniture from the juk-tree, the wood of which (though yellow when first cut) acquires in time a mahogany tint. The recent adoption of barrels instead of gunny-bags for the export of coffee has given them an additional source of prosperity. Besides these they also make mats for the shipment of coconuts and oil. On a rocky headland which projects into the sea about 3 m. S. of Morrocco and bears the name of Mount Lavinia, are the remains of what was meant to be the marble palace of the governors of Caylon. It had scarcely been completed at an expense which has been estimated at £50,000, when in a fit of economy orders were given to dismantle it. The buildings are said to have been disposed of for less than the cost of the window frames. Morrocco is the E. limit of the region of cultivated cinnamon. Pop. 12,000.

MORUMBSWA a *coastal and mountain, 8 Africa*.—The CATACACT at the head of the Kichikaba rapids on the Kichikaba, in lat. 15° 40' S. lon. 33° 48' E. is situated in a sudden bend of the river, which is flowing in a short canal and above it is jammed between two mountains in a channel with perpendicular sides, and less than 50 yards wide—one or two masses of rock project, and then there is a sloping fall of 20 ft. in 30 yards. The rocks show that in the highest floods the water rises upwards of 90 ft. perpendicularly. On the N. side of the cataract runs the MOUNTAIN from 2000 to 3000 ft. high, which gives name to the spot. On the opposite side stands a particularly formed mountain, partly conical with a large conical peak cut off it, so often happens to granitic, and leaving a broad smooth convex surface, as if it were an enormous half. These two mountains extend their base along the river about half a mile, and the stream in that distance, still very narrow is smooth, with a few detached rocks standing out from its bed. The rocks are all water-worn and smooth, to a height of even 100 ft. above low-water.

MONTAGANEM [add.], a *tu. N. Africa*, Algiers, prov. and 45 m. E.N.E. Oran. It is situated near the shores of the Mediterranean, on a rock about 270 ft. above sea level, and intersected by a river, which divides it into two parts. The one on the N. is a *tu. forming walls* to the walls of the town. The town, which at one time rose to 20,000, has dwindled down to 15,000 at the time of the French capture. Since then it has maintained a large decrease, and is not estimated at more than 3517.

MONTAK [add.], a *tu. Turkey* in Europe, Scythia, ap. of Heraclea, beautifully situated 80 m. N. by W. Bogaza. It stands at the point where two mountain ranges so nearly meet as to leave only a narrow belt of land on either side of the Neretva, because visible at a great distance—the white snows giving it a very imposing appearance—and is intersected by a steep ridge of great height, which separates the river by two bold arches. It is surrounded by walls, and defended by a battery of ancient towers, and consists of about 1500 houses.

moths, 800 Greek, and 800 E. Catholic houses. Among the houses are a great number of small churches, with only two windows. In general, however, they are all surrounded by gardens in empty courts, and these make the area of the place far larger than is indicated by the number of its inhabitants. Different quarters of the town are occupied by the three classes of religionists, and provided with the ministers or churches required. Besides churches and schools, both the E. Catholics and the Greeks have episcopal palaces, Moslems being regarded by both as a bishop's son. None of the buildings require special notice. The trade, which is considerable, is almost entirely in the hands of the Greeks. Pop. estimated at 14,000.

MOULAJULA, or *MULAWA*, a river, N. Africa, Morocco, which rises on the N. slope of the Great Atlas, near the centre of the country flows first E. and then N.E., skirting the W. slopes of Mount Guelben, and falls into the Mediterranean near the N.W. extremity of Algeria, after a course of above 250 m. During the rainy season it is a deep and rapid stream but in summer becomes so completely dry that it has received the surname of the *Rahr-Bahna*, or 'waistless river'.

MOUNT DESERT, an island of the U. States in Frenchman's Bay, off the coast of Maine, 70 m. E. Augusta. It is of a tolerably compact shape, about 15 m. long by 12 m. broad, with an area of 100 sq. m. Its surface is rocky and covered to a great extent by mountains of granite, the loftiest of which exceeds 3000 ft. in height. The other peaks are numerous, and give rise to much striking scenery by their fantastic shapes and the many beautiful lakes which they embrace. The island forms three townships, which contain eight churches and numerous schools, and have a united pop. of 3509, chiefly employed in ship-building and fishing.

MOUNT VERNON a *tu. U. States*, Indiana, cap. of Posey, on a head of the Ohio, 150 m. S.W. Indianapolis. It contains country buildings, a fine chateau, a number of schools and benevolent institutions, a foundry, a planing-mill, and two saw and two flour mills. Pop. (1860), 1994.

MOUNT VERNON, a *tu. U. States*, Ohio, cap. of Knox, on the Vernon River, and on the Sandusky, Maumee, and Newark, and the Springfield, Mount Vernon, and Pittsburg railways, 38 m. N.E. Columbus. It stands on a gentle eminence, is well and compactly built, containing many elegant mansions, and possesses ten churches, numerous stores, and several mills. Pop. (1860) 4302.

MOUREKOU [add.], or *MURKOU* [add.], a *tu. N. Africa*, esp. Fezzan, on a rather picturesque but extremely arid site, in the very heart of the desert, 480 m. S. by E. Tripoli; lat. 25° 55' 16" N. lon. 14° 10' 15" E. It is situated in a flat hollow at the height of 1485 ft. above sea-level. All around it are ridges of sand, but the hollow itself is a kind of oasis, covered irregularly with a plantation of date-trees, and perpendicularly towards the N. with gardens and fields, in which wheat, barley and a few vegetables are cultivated with much labour. The town is situated near the centre of the plantation, and is surrounded by a wall nearly 1½ m. in circuit, built of a sort of clay glittering with white incrustations, and flanked with round and pointed bastions. There are nominally three, but properly speaking only two gates, as the one on the E. side is a narrow entrance unworthy of the name, and the S. side has no gate at all. Though the remains of an old wall in this quarter show that the original area inclosed has been greatly contracted, it is still too large for the actual population, which is thinly scattered, except in the immediate vicinity of the market-place. It has well-built houses and broad streets, but its characteristic feature is the spacious road or *darab*, which is its principal thoroughfare, and intersects it continually, commencing at its E. and terminating at its W. gate. Here stands on its S. side the *hamra*, affording with its halls of palm-wood suitable accommodation to buyers and sellers; and immediately opposite is the principal mosque. To the W. of the mosque are the courts and palace, an immense ponderous structure, with a large court, on the N. part of which barracks, said to be capable of containing 8000 men; have been recently erected. The only other buildings of note are the *outen-boum*, situated on the N. side of the *darab*, near the E. gate, and a little beyond it the *aykha*, known as the *aykha* of the *darab*, which is a *tu. of the* *darab*. It is not so much the seat as the *darab* of a considerable trade. Few wealthy merchants reside in it, and few

merchandise frequent is because it is on the caravan route which, commencing at Tripoli proceeds directly to Murzuk and continues thence either E. to Bornou or S.W. through the Twarek country towards Bouda. Near Murzuk are ancient remains, apparently Roman. P. 8000.

MOGWA, a. in India, Rajpootana, dist Jyepoor, 76 N W Agri. It is surrounded by an earthen rampart, with bastions, and defended by a fort with lofty walls, which rise from 25 ft. to 40 ft above the bottom of the ditch. The bazar is good, and well supplied with cotton, corn and flour, piece, coarse cloth, masonry and ornaments in gold and silver. Estimated pop. 10,000.—There are several other places in India of same name. One of them in Gujarat, at the head of a small bay on the E.E. coast of Kattywar, in lat. 21° 8' N, lon. 71° 43' E., carries on a considerable trade, though its harbour is very different.

MOZABAD or **MAWLAHAN**, a tn India, Rajpootana state Jeypore 48 m. E. Ajmere, is a rather large place, with a ruined wall, some good gardens, a mosque, and several temples. One of the last, belonging to the Jains, is a fine structure, adorned with elaborate sculptures, and surmounted by a richly-carved dome and three pyramids.

MOZUFFERPORE a t India, presid. Bengal div. Tirhoot, on the Little Gunduck, 45 m N E. Dinapore. It is the seat of the civil establishment of the district and contains a government school, in which Arabic and Persian are taught. Pop. about 8945

MOZUEFFENUGUR, a dist. Indu N.W. Friesland, between lat. 59° 10' and 59° 50' N. lon. 77° 6' and 78° 19' E., is bounded, N. by Sharunorup, E. the Ganges, separating it from Bjilnor, S. Meerut, and W. the Jumna separating it from Paciput and Sirhind length, E. to W. 60 m., breadth, 40 m., area, 1617 sq. m. The surface rises gently from the Ganges on the one side, and the Jumna on the other towards the exterior of the Doab and is there marked by a series of semicircular ridges. The *khadar* or alluvial soil which lies chiefly along the bank of the Ganges is very fertile, and admirably adapted for rice-grounds the cultivation of which, however renders the neighbourhood very unhealthy. The other principal crops are the usual cereals, various kinds of pulses, oil seeds, tobacco, cotton, and sugar-cane. The last, in particular, is said to occupy 21 906 acres. Among wild animals wolves are so numerous that it has been thought necessary to

other rewards for their destruction. Top 881,084
MOZUR FURUGUR, cap of the above dist 1 bank
W Kalles Naddes, 60 m N by E. Delhi stands at the height
of 900 ft. above the sea consists chiefly of brick built houses,
possesses an old fort, a court-house, and other buildings for
the accommodation of the civil establishment, and a well
supplied bazar, and has a pop. of 7364.

of the E coast of Africa, which lies between the Island of the Red Sea, Mombasa, lat. 4° S., and the delta of the Redfi River, about lat. 12° S. Its general formation is a mass of coralline limestone, the places communitated and compressed into a rude sandstone and conglomerate and forming by the grinding action of the waves into a beach of brilliant white sand. On the part between the Pungu and the Redfi, there are some very low islands, and the sea is generally shallow, defended on the weather side by low islands and coralline reefs. These islands, forming a species of breakwater, are generally waterless and too small for habitation. They are more ledges of rock only a few feet above the water and have always rugged edges, except in a few cases where these have been worn and ground down into sand. From their proximity to the coast they appear like detached portions of it, and are in fact so separated from it only by the water. The islands are generally more barren, and have a few little hills that undulate parallel to the water, and belonging probably to an ancient sea beach, seem to indicate a former rising of the coast. Indeed, in some places there are distinct signs of two sea beaches, separated from each other by a Is. Inland the Mombasa, where ever regular exhibits a gently rounded surface rising 100 ft. to 150 ft. above an alluvial plain, and this uniformity is broken by depressions, hillsides, and ridges, the latter of excellent landmarks for the sailor. The plain, and the parts of the coast, are a low and rolling beach, the wild vegetation is dense and thorny jungle, but much of it has been cleared by the natives, who have here their dwellings, or plantations.

Arabs and the coast clans. The former belong generally to the Bayat or Khazil, the latter to the Shafai school both, though the most important of Moslems, have on lack of fanaticism. Notably they are the subjects of the caliph of Soudan but when removed a few miles from the coast they are as free men and independent as Bedouins. Between them and the pure Arabs there is a resurgence increased by commercial rivalry they have a hatred of Europeans, and more especially of the British. The half-caste Arab is degenerate in body, and becomes in the third generation as truly negro as the latter generation. The Waurima are still more completely negro, and delight in nothing so much as mere indolence, being fast, stupid and apparently incapable of the least mental exertion.

MSENE a dist. E. Africa, Ungweni country, prov. Cameroons, about lat. 4° 30' S., lon. 23° 10' E. It is the great bazaar or meeting-place of merchants and station of caravans in W. Ungweni, and may be called the capital of the coast Arabs and Wamwili who have settled in it leaving Ungweni to the pure Omni, for whom they have a great antipathy. Besides these settlers there is a large floating population of the pastoral clan Wabul and of fugitives from Ubul the native inhabitants, forming the great mass of the population, are Wamwili, a Wamwili sub-tribe. Mene, Ungweni, is not a town, but a number of detached settlements. To the N. lies Kwilanga and Yova the Sultan's villages. They are defended by a thick milk bush hedge, a deep moat, and a strong stockade; and consist of detached streets like a square, separated by wadis and alleys or open square-like spaces. The other principal settlements are Mji Mpa and Chyambo, the former the favorite locality of the Wamwili, and the latter that of the coast Arabs. Chyambo containing many huge tombs and about 150 huts, has a kind of bazaar where grain, vegetables, and milk are exposed for sale. The natural wealthiness of the climate of Mene is greatly exaggerated by the filth of the villages and the large number of stagnant pools. The principal crops are holms, maize, millet, and manioc, grown in such abundance as to leave room for export. Other vegetable products are tobacco, sweet potatoes, egg plants, pulses, beans, peas, and water-melons. Among a host of wild fruit-trees the tamarind is conspicuous. Milk, poultry, honey and tobacco are cheap and plentiful. Manufacturing industry is confined to cotton cloth coarse mats, clay-pipe heads, and various articles of iron. Mene is a place of gross debauchery and all from Sultan to slave, indulge in intemperance. The drums are never silent, and the fance hills, up the intervals of evening. So strong do these attractions prove that the fidelity of even household slaves, born and bred upon the coast, is shaken, and the caravans in passing through Mene invariably lose members by desertion. The chief possesses considerable power and effects some degree of state. His subjects approach him with clapping of hands and kneeling, the usual homage paid to royalty. Specimens of the rigorous exercise of his authority may be seen in the heads of criminals stuck upon poles in the front of his villages.

MUBI a tn. Western Africa, on the N. frontiers of Adenawa, 170 m. E. by W. Kufura. It stands in a mountainous but well-cultivated district, and is inhabited by the Fula, a distinct race between the Arab and the Berber on the one side, and the negro stock on the other. The mixture is not an improvement, since, while lively and intelligent, they have a dash of malice, and are not nearly so good-natured as the real Nokes. Almost all the grain cultivated is sorghum, which attains an average height of 9 to 10 ft.

MUCHUR a tn. India, N.W. Province, dist. and 18 m. W. Gorakhpore, on the Amn. It is a poor straggling place, surrounded by a ramous brick wall, and possesses a large mosque with the tomb of Kavi a reputed saint, claimed by both Mussulmans and Hindus, though his actual existence at any period is more than doubtful. Pop. 2220.

MUGIBEE, a tn. India, Solima, on the Piterwa, a branch of the Indus. It contains 5000 inhabitants, who deal extensively in rice.

MUHABUN, a tn. India, N.W. Province, dist. and 9 m. E.E. Netira. It was anciently a place of much more importance than at present, and was taken by Mahmud of Ghazna, who obtained a rich booty in it. Pop. 6008.

MUHEBUR, a tn. India, Holkar's Domains, r. bank Nerbudda, 28 m. S.W. Mhaw. It consists of about 2500 houses and contains a large modern palace built by Holkar, of gray basalt, and embellished with sculptured figures of human beings and animals. The celebrated Akshya, Bai who appears much in the history of the Holkar family, resided here.

MUHOWLEE, a tn. India N.W. Province, dist. and 45 m. S.E. Gorakhpore, on the Little Gurdook opposite to Solamoor which properly forms one town with it. Hindus inhabiting the former and Mahomedans the latter. Maj howlee alone consists of about 200 houses, one of them the brick-built residence of a petty rajah.

MI KONDOKIA, a river of E. Africa, in the prov. of Ungava, rises in the Robba Mountains and flows in a S.E. direction, to empty itself into the Indian Ocean at Pangani. The country on either bank is deficient in features of interest, and lacks the attraction of picturesque scenery. In the latter part of its course it is known as the Wam.

MULGRAVE, or BAMB, an id. Australia, Torres Strait, nearly equidistant from Cape Horn, the N.E. extremity of Australia, and the S.E. coast of New Guinea, lat. (Mulgrave Hill) 10° S. 15° S. lon. 142° E. 20° E. It is nearly 8 m. long by 6 m. broad and though generally low along the coast, which is mostly covered with bush and some grown rice in the interior to the height of 500 feet. The ground between the high land and the shore seems fertile. The natives, who live partly scattered over the island and partly in villages, are numerous, of much lighter color than those of Australia, and far more intelligent, but bear a bad character for treachery.

MULONDO-ZAMBI, an active volcano, B.W. Africa, Kibundu country, territory Libollo to the S. of the Coana and 120 m. S.E. Loanda. It towers with its conical summit far above the rest of the bare mountain tops and from time to time erupts with short intervals, sends forth eruptions from its crater. According to the opinion of the natives the souls of the dead have their abode in this mountain and they are hence chary of approaching it.

MUNCHUK, a lake, India Solima, formed by the expansion of the Narra, a branch of the Indus, and discharging itself by the Aral. During the rainy season it is about 20 m. long by 10 broad, but in the dry season assumes the form of a circle about 10 m. in diameter. The space then left dry is sown with grain, principally wheat, and yields heavy crops. When the lake is in flower nearly the whole surface is covered with bloom and leaves. So abundant are the fish that about 1000 boats are employed in taking them.

MUNDALOH, a tn. India, Solima's Domains, 67 m. W. Gwalior. It stands on an isolated hill about 2 m. N. of the Chambal, is surrounded by a wall of masonry and is defended by a fort seated within the town and commanding very fine views of the surrounding country.

MUNDOMER, a country S.W. Africa, prov. Benguela, inhabited by the tribe from which it takes its name, and extending southwards along the sea-coast from the river Kambombo to lat. 15°. The tribe of Mundomer is spread over a much larger area including the country of the Mukshelo, Mukshelo, Mukshel and Mukshokke, which has its S. limit at Cape Negro. As the original possessors of Benguela, the Mundomer maintained a long and bloody struggle with the Portuguese, and were not subdued till 1847 when the greater portion of them submitted. Some, however who live in the mountains and lead a nomadic life, are still independent.

MUNEEMAJRA a tn. India, Barhad on the Soaly 25 m. N. Umballa. It stands near the S. base of the Sub-Himalaya, possesses a well-supplied bazar and has a considerable trade in India, which is extensively grown in the district and exported chiefly to the Punjab and Khorsana.

MUNGHOLO a tn. Western Africa, Bornu, within a short distance of Kakuwa. It stands on a height between two hollows, in the one of which wheat and onions are cultivated after the rainy season while the other during that season is converted into a lake. Ironstone abounds in the vicinity, and is used by the native blacksmiths. Mungholo is an ancient place, and is often mentioned in the history of Bornu.

MUNIYO, a prov. Western Africa, in the N.W. of

Borom, bounded S. by Mungu, W. Kintar and N. and E. the Tawarak country. It has a very rugged and even mountainous surface, being much better adapted for pasturage than agriculture, though in many parts a good deal of millet is grown particularly in narrow valleys and glens inclosed by ridges of granite, which is the prevailing rock. The extent and importance of the province may be estimated from the power and income of the governor who is elected annually the representative of Borom is virtually his own master. He is able it is said, to bring into the field 1500 horsemen and from 8000 to 10,000 archers and besides drawing a tribute in corn which amounts to about a tenth of the produce, annually raises by other modes of taxation a revenue of 80,000,000 shells, which is equivalent, according to the standard of currency in use, to 10,000 Spanish dollars.

MUNKAIRA, or KUNZARA is a town, Punjab in the Doab, between the Jhelum and the Indus, 175 m. W. Lahore. It stands in an arid tract covered with sandhills and is defended by a mud wall and a brick fort. Runjet Singh in 1831, after a siege, during which he was obliged to supply his troops with water brought from a considerable distance, succeeded in capturing it.

MUPINDA, a dist. S.W. Africa, Kumbunda country situated between the Langa on the N. and the Kuru or Kere on the S., its boundary on the E. is dist. Ambulim, and on the W. the Atlantic Ocean about 1700 m. The surface obtains a considerable elevation in the E. where it is covered by ridges of the Hama range but the W. is very flat and being exposed to inundation from two considerable rivers is much flooded during the rainy season. It is hence less adapted for agriculture than pasturage. Good crops of manioc, maize, tobacco &c. are however raised in various quarters, though the abundance of game and the rich pastures both of the mainland and several considerable islands in the Langa, make husbandry and the rearing of cattle the principal employment. The climate, owing to the prevalence of mountains, particularly on the W. flat, is unhealthy. The inhabitants are much milder and more peacefully disposed than those of the surrounding districts. Pop. 20,000.

MUCHISON CAIARACTS, S.E. Africa, between the Upper and Lower Shire in lon. 44° 54' E. and beginning in lat. 15° 30' S. and ending in lat. 15° 50' S. their entire length being a little under 40 m. The river in this space runs nearly N. and S. and the principal cataracts are five in number and are called Pamfunda or Pampoma, Moreva, Pampoma or Zedema, Pampomanga, and Pampola, besides which are three or four smaller ones. While these lower cataracts descend at an angle of not more than 20° the greater one fall 100 feet in 100 yards, at an angle of about 45°, and one at an angle of 70°. One part of Pampoma is perpendicular, and when the river is in flood, causes a cloud of vapour to ascend visible at a distance of 8 or 10 miles. The entire descent from the Upper to the Lower Shire is 1200 feet. Only on one spot in all the distance is the current moderate, namely above Tudana where the rapids and much of it only 50 to 80 yards wide. Pampoma or Pampoma has a deep shady gorge on its S. bank. The rock lowest down in the series is dark reddish gray granite which seems to have been an upheaving agent, for the mica schists above it are much disturbed. Dark trappean rocks of hornblende have in many places burst through these schists and appear in nodules on the surface. The highest rock seen is a fine sandstone quite metamorphosed where it comes in contact with the igneous rock below it. It sometimes gives place to quartz and reddish-gray schists much belied by heat. This is the usual geological condition on the E. bank of the cataracts. On the other side are masses of porphyritic trap in contact with the same mica schists giving the soil great fertility. The great body of the adjacent mountains is syenite. So much mica is washed into the river that myriads of particles may be seen floating and glistening in the sun. (Linnæus).

MUCHISON FALLS, on the Bonasene River or Victoria Nile Central Africa, lat. 2° 17' N., lon. 31° 47' E., about 25 m. from the mouth of the River in the Albert Nyanza. Viewed from below the cliffs on either side of the river rise abruptly to the height of 800 feet, and are beautifully wooded, with rocks jutting out from the intensely green foliage. Rushing through a cleft in the rock the river contracted from a broad stream, is pent up in a narrow gorge not more

than 50 yards wide, and roaring furiously plunges in one leap of about 120 feet perpendicularly into a dark abyss. The fall of water is snow white, and has a beautiful effect in contrast with the dark cliffs and greenish palms and other trees around it. (Baker).

MUREV, a riv. Chinese empire, Manchuria, which has its source in the mountains S. of Ningxia, flows N. N. E. and joins the Urtai on its l. bank, 25 m. above Imma, in lat. 46° 45' N., lon. 118° E. At its mouth it forms a delta, with an area of 200 sq. m. and sends its waters across it by numerous channels, of which the largest and most northerly has a width of only 50 to 60 yards. Its banks are formed by the edge of a plateau, which is densely wooded and well adapted for cultivation the soil consisting of a loose reddish earth.

MURFELDERBOROUGH (add. a to U. States, Tennessee, near the centre of the state, on an elevated plain, surrounded by the Cumberland Mountains, and on the Nashville and Chattanooga railway 35 m. S.E. Nashville. It is well built, chiefly of brick, contains six churches, a Baptist university with 8000 students, two female colleges one of them with 150 pupils a military institution, and two high schools. It has also a foundry and machine shop and a few factories. On January 5 1865, the town was occupied by a Federal army after several days hard fighting in the vicinity. Pop. 13500 1891.

MURU, a mountain range, Western Africa, stretching along the north side of the Benue, where this river intersects the province of Hamarawa. A similar range on the S. side from its being supposed to link with the mountains of Adamawa, has received the name of Mumbina. The Muru range is continuous, and has precipitous sides, often terminating in peaked summits of which the loftiest, called Tugala, has an estimated height of 3000 feet.

MURRAY, a group of islands, Australia Torres Strait near the N. extremity of the Great Barrier Reef. Near the largest of the islands which compose the group, is only about 2 m. long by two-thirds of a mile wide, and has a conical peaked hill in lat. 10° 56' S. lon. 144° 22' E., which rises abruptly to the height of 750 feet. It is well wooded and in many parts cultivated producing coconuts, yams, plantains and other vegetables and fruits. The natives of the group estimated at about 700, are partly of a dark chocolate colour and partly almost black, active and muscular and warlike. They are dexterous in the use of their weapons chiefly bows of a singular construction, and have large and fast canoes, carrying 15 to 20 men.

MUSCATINE, a to U. States, Iowa, esp. no. of same name, on the Mississippi, at the apex of what is called the Great Bend, in the midst of picturesque cliffs and in connection with an extensive network of railways, 27 m. S.E. Iowa city. It contains 18 churches, planning saw and flour mills, and having an excellent landing-place is the centre of a large and increasing trade. The annual sale of lumber exceeds 10,000,000 feet. Pop. 18600 1884.

MURSTRE, a to Italy, prev. and about 15 m. S.E. Treviso, where the Via Claudia Augusta crosses the R. It contains a church, and a strong tower, the only existing remnant of an old castle.

MUSGU, a country Western Africa, bounded N. by Bornu W. and S. Adamawa and E. Bagirmi. It was reported to be a mountainous and inaccessible tract, but Dr. Barth, the first European who set foot in it had full opportunity of proving the contrary by accompanying a hostile expedition sent against it by the government of Bornu. It has indeed a hilly surface, intersected by numerous water-courses, which form extensive swamps rendering even a peaceful journey through it a task of no ordinary difficulty, and a hostile invasion of it for the purpose of effecting a permanent conquest all but hopeless; but the soil, besides being generally fertile, is cultivated with a care of which few examples are seen in Central Africa. Even the importance of manure is understood, and Dr. Barth saw a field to which it was actually applied. The uncultivated land, moreover, is not without its value. Wild rice grows spontaneously, and is collected in vast quantities among the swamps of the forest. Though inferior in quality to the cultivated kinds it is by no means despicable food, and finds its way as a regular article of sale to the market of Kachawa. The chief food-stuffs are that the elephant, which abounds so much that its footprints

are everywhere visible, knows the value of rice as well as man, and besides selecting what is best in quality, too often appropriates or destroys far more than his fair share. The inhabitants, from whom the country takes its name, are a division of the great nation of the Mass, which comprises the Katokele or Mikani, the Lagun or Logone, the Mandara, or Ur Wandala, the Goumari, and the large tribe of the Baka. Unfortunately the friendship which a common origin should have perpetuated, has disappeared, and even the Mangn themselves, whose only safety is in union, are split up into hostile communities, from which it was vain to hope for any vigorous effort against the enemies who surround them, and who are influenced, in addition to the ordinary love of conflict, by the selfish desire of procuring slaves. There cannot be a doubt that, though other objects were pretended, the Herriot expedition which Dr Barth accompanied was undertaken mainly in the hope of capturing and enslaving the inhabitants of Mang. Considering the circumstances in which they are placed, it is astonishing to find the country so populous and so industriously cultivated. The religion of the Mang is fetishism, in which the principal fetish is a long spear-like pole. They seem not to have any sacred groves.

MUSHALAGAN a lake, British America Lower Canada, near the upper part of the Manouagan River about lat. 50° 30' N and lon 67° 30' W. It is about 60 m. in length, and varies from 2 to 9 m. in breadth; it is surrounded by high mountains, very deep and contains pike, the herring, a variety of salmon trout, the muskell, a red kind of fish, and other species.

MUSKONISIA a group of islets in the Archipelago on the coast of Asia Minor N.E. of Mytilene, and at the entrance of the Gulf of Adramyti. They are so near the mainland that one of them is connected with it by a causeway, near the spot once occupied by the town of Armini, or Cydonia, which was celebrated for its schools, till it was laid in ruins, and its inhabitants dispersed by the Turks.

MUSKOCOREE, a sanitary station, India, on the N. frontier of the Dehra Doon. It stands 8228 ft. above the sea, on a rugged ridge composed of beds of compact limestone, alternating with others of soft shale and has a site so irregular and uneven that the houses are built at considerable distances from each other on ground which it has been necessary to level on a ridge, a crag, or on the S. slope of the mountain in the E., however which has been longest settled, the houses stand more closely together and have more the appearance of a regular town. The principal public buildings are a post office with a turret, and a club-house. The surrounding scenery is splendid.

MUSTAFABAD a town, India, Sirhind, 23 m. N.W. Saharunpore. It is of moderate size, surrounded by a brick wall is defended by a fort, which has round towers at the angles, and is the residence of the Sikh chief to whom the adjoining territory comprising thirty-one villages, belongs; and possesses a well-supplied bazar.

MUSZYNA, a town, Austria, empire, Galicia, circle and 22 m. N.E. New Sander, on bank Poprad with 1950 inhabitants, who carry on an active trade in linen between Galicia and Hungary, and have several walk-mills.

MUTRE, a town, Austria, empire, Hungary co. Arva Murau, on the frontier of Galicia, with 1500 inhabitants, who grow wheat, rye, cattle, and saw timber.

MUTTRA a dist. India, N.W. Provinces, between 27° 14' and 27° 55' N, lon 77° 20' and 78° 54' E., is bounded N. by Gorakhpur and Allahabad, S.W. and Agra, and W. Benares; area, 1507 sq. m. With the exception of a few hills on the W. frontier the surface is an extensive plain, watered and drained almost entirely by the Jumna. The soil on the W. bank of this river is sandy with a mixture of kankar or calcareous conglomerate; on the E. bank, though still rather light and shallow, it improves and becomes good towards the middle of the Doab. The alimentary crops are chiefly wheat, barley, millet, pulses, oil-seeds, sugar-cane, and sugarcane; the commercial crops, indigo and some other dyestuffs, cotton, tobacco, and opium. Pop. 701,695.

MUTPETTA, a vil. India, presid. Madras, dist. Madras, near the extremity of the peninsula which forms the W. side of the Pamban Pass between the Gulf of Mannar

and Palik's Strait. Its inhabitants almost all fishermen, are chiefly E. Catholics, and have a large church in the centre of the village.

MVAL, a mountain, S. Africa, the highest peak of Kirk's range, which runs in a nearly due N. and S. direction to the W. of Lakes Shirwa and Nyana. The Mval peak is in lat. 14° 58' S., lon 34° 37' E. It is a huge bare rounded block of granite sloping up from the rest of the chain. It and several other masses of rock are of a light grey colour, with white patches, as if of lichen; the sides and summits are generally thinly covered with rather scrubby trees. There are several other prominent peaks one, for instance still further N. called Churobe. The range is probably not less than 5000 ft. above the sea.—(Livingstone.)

MYAPOOR, two places, India.—1. A vil. Bundelkand, Jhansi 58 m. N. E. Calpa. About 1 m. S.W. of the village the Myapoor Pan commences.—2. A vil. on bank Ganges dist. Saharunpore about 2 m. below Burdwan. At this spot is the artificial dike of the new Ganges canal commences at the extremity of a natural branch across which a dam of masonry is thrown.

MYCONI, a town, Greece, nomarch Cyclades, cap. and on the W. shore of the island of same name is the seat of a justice of peace court, and has a Hellenic and a parish school and the only springs of water on the whole island. The harbour is open except towards the N. The inhabitants are 8000 sailors, and number 5500.

MYEENGVAN a town, Burmah, on a low plain opposite the little delta of the Kyaukse, 16 m. from 73 m. W. Ava. It is one of the largest provincial towns in the kingdom, and is a great mart for rice, brought both from the adjoining districts and from Pegu. About 10,000.

MYMENSING a dist. India, presid. Bengal, between lat. 24° 4' and 25° 41' N, lon. 85° 28' and 91° 18' E., is bounded N. by Goalpara, on the borders of Assam and the Garo tribes; E. by Sylhet S. by Tipperah, Dacca, and Faridkot S.W. by Feroz, and W. by Bogra and Rangpur; area, 4712 sq. m. In the N. and W. there are many hills and large tracts densely covered with jungles. The rest of the district is in general flat covered with extensive fields, and traversed by numerous streams, of which the Brahmaputra, which both bounds in several directions and traverses it, is the most important. The soil, except on the sandy hills, is in general a dark, deep and fertile loam, from which in a single year two crops of rice and a crop of mustard are often obtained the other chief crops are sweet potatoes, ordinary potatoes, and other pulses wheat, cowpeas, musk, sugar-cane, indigo, hemp, flax, tobacco, and plantains. The manufactures are confined to coarse cotton cloth, blankets, and a few finer fabrics, the principal article of export is rice. Mymensingh is the capital. Pop. 1,487,000.

MYNPOORIE a dist. India, N.W. Provinces between lat. 26° 54' and 27° 50' N, lon. 78° 50' and 79° 50' E., is bounded N. by Budaun, N.E. and E. by Farrukhabad, S. by Etawah and Agra, and W. by Agra, Mathura, and Allahabad; area, 3009 sq. m. The surface is level and well-watered, chiefly by the Jumna and the E. Kallan Naddies. In the N. the soil is generally light and sandy depending much on rain or moisture for its successful cultivation in other parts the soil is rich and moist, and even in the simple crop, sugar-cane also is extensively cultivated. Indigo grows wild, but though it is said that it might be grown at little more than half the usual cost, not much attention is paid to it. The chief crops, in addition to those already mentioned, are wheat, barley, millet, gram and other pulses, cotton, and tobacco. Pop. 538,809.

MYNPOORIE cap. of the above dist., situated 70 m. E. Agra on the banks of the Ravi, here crossed by a bridge, is a walled town of considerable size, but has suffered so much from the ravages of war that it now contains only 3778 inhabitants. Its principal buildings are those of the civil establishment, a Jain temple, and a jail.

MYSORE (add.) a town, India, presid. Madras, cap. dist. of same name, 350 m. W. S.W. Madras. It stands on two parallel ranges of elevated ground, running N. and S., 5450 ft. above the sea, and consists of the town proper, surrounded by a rampart and a fort of a quadrangular form. The latter, which is about 450 yards each way, has a large tank on one of its sides, and on the others a deep ditch, beyond which is a stone rampart flanked with bastions. The streets

of the town are regular—the principal one stretching N and S, while most of the others intersect it at right angles. Many of the houses are large and substantial, of two or three stories, and occasionally with terraced roofs, though most of them are tiled. Within the fort is the palace of the titular rajah. It is a large building, forming three sides of a square, but has nothing attractive either in its external appearance or its internal arrangements. The old residency and the church belonging to it are badly situated on the outskirts of the town. Owing to the elevation, the climate is tolerably cool. It is, however, unhealthy, and both fever and cholera prevail. One cause, probably, is the defective supply of water, which is only obtained from tanks, and when these fail in drought, from wells impregnated with soda or other deleterious ingredients. The manufactures consist chiefly of carpets, which

are said to be fair imitations of British and Persian, the trade, though there are many rich merchants in the town, is limited. Pop. 55,424.

MAETHA, a town in Transcaucasian Russia, in Georgia, 1 bank Km. 10 m. N N W Tiflis. Though now a miserable and ruinous place it was for ages famous for wealth and power, and the capital of the Georgian kings who lie buried in the vaults underneath the cathedral. This building, the foundation of which is ascribed to king Miran who was converted to Christianity, A.D. 276, was originally of wood, but after various vicissitudes was rebuilt of stone about the middle of the 17th century. It still scores with its conical domes over the remains of other buildings and is one of the most remarkable churches south of the Caucasus. The present pop. is scarcely 1900, but appears to be increasing.

N

NAGAOOME, a town Central America, Honduras dep. Choluteca, on a river of same name, about 10 m. above its mouth in the Gulf of Fonseca. It is one of the hottest and most unpleasant places in the state and stands in an amphitheatre of hills where ventilation is greatly impeded. During the hot months fevers are both prevalent and fatal. Pop. about 3000.

NACHIRA, a town Central Africa, about a mile N E. Tamsaua, is a straggling place, composed of clusters of huts which cover a large area. The staple commodity of its market is provisions and ready-dressed food but a considerable number of cattle and occasionally camels are exposed for sale.

NAGPORE [add.] a town India, cap. territory of Nagpore or Berar. 440 m. E N E. Bombay. It occupies a low swampy flat, with a slight inclination towards the E. and covers an area about 7 m. in circuit. From the number of trees interspersed over all parts of its site, it might at a distance almost be mistaken for a forest; when more nearly approached, it is found to be little better than a vast assemblage of huts straggling or huddled together in the most irregular manner. Some houses of large size, built of brick with terraced roofs rise up among the general mass; but even these have no architectural merit, and the whole has been not too correctly characterized as 'perhaps the meanest capital city in India.' Even the rajah's palace, though a vast pile of stone masonry is utterly devoid of symmetry and is not only obscured in the lower story by the mud huts abutting upon its walls, but cannot be reached except by passing by means of stepping-stones over an open ditch, the receptacle of all sorts of filth and garbage. In like manner the so-called palace of the minister stands on the margin of a green stagnant pool reeking with pestilential exhalations. Close to the suburbs on the W are the Benboldees Hills, where there is a small enclosure and the British residency is situated. They are celebrated as the scene of a desperate struggle, in which a mere handful of British troops, when treacherously attacked by the rajah Appa Sahib in 1817 with a body of about 18,000 men, not only held their ground, but gained a signal victory. Many of the inhabitants are wealthy bankers but the employment of the greater number is in manufacturing cotton and woollen cloths and utensils of copper brass, and other alloys. The population is estimated at 115,000.

NAGTAG, a town Austrian empire, Transylvania, 6 miles and about 12 m. N W Scutari, in a mountainous district with a mining school mines of gold and silver and an extensive mining establishment. Arsenic and manganese are also found here. Pop. 2305.

NAHUN a town India, capital of the petty state Birmoor stands on a hill of greenish-grey formation, at the W. extremity of the Kyzil Dagh 3507 feet above the sea, in lat. 30° 54' N., long. 77° 21' E., and is a clean handsome place, consisting of small houses built of stone and lime, with flat roofs

covered with mud tempered so as to be waterproof and so arranged on the uneven crest of a rocky eminence, that some of the streets are mere flights of stairs, while others more level are well paved. The bazaar is large and well supplied and the rajah's residence, which stands in the centre of the town, is a spacious stone structure with a beautiful veranda, in an antique Hindoo style. The three temples which the place possesses are more remarkable for their fine sites than their architectural merits.

NAIN, a town Persia, 82 m. E N E. Lepahon, on a rugged part of a great plain bounded to the N by mountains. It is inclosed by a dilapidated wall and ditch about a mile in circuit and entered by five gates. The only buildings of any note are the principal mosque with an ancient pulpit more than 500 years old, a ruined mud fort and a small bazaar. The environs are far from fertile and yield only scanty crops of barley, wheat, and cotton. In the gardens some melons, grapes and pomegranates are grown. Pop. about 2500.

NALANDE a town Ceylon in a beautiful country where the road winds between wooded hills, 24 m. N Nandy. It contains a R. Catholic church.

NALIBI or **NAMIBIA**, a town S Africa, in the Makololo country cap. Barotsi. 1 bank Luambya or Zambezi lat. 15° 24' S. long. 28° 5' E. It stands on an artificial mound, which Sennar, the maker of it, used as a storehouse for grain and consists of several distinct quarters or villages, each enclosed with a wall of reeds. An earlier capital 500 yards S. of the present, stood in what is now the bed of the river and has entirely disappeared, with the exception of a small portion of the mound on which it was built. The site must have been very injudiciously chosen since proper attention was not made for the rise of the river which in consequence of the obstruction caused by the falls near Gonye some distance below sometimes attains an extraordinary height. The present town will probably one day share the fate of its predecessor, and from the same cause, since the water occasionally comes so near the foundation of the huts that the inhabitants are scooped up, and cannot move beyond their ready walls.

NAM a town Western Africa, 280 m. W S W Timbuctoo. It stands at the foot of the hilly chain which encloses the whole valley or basin of the Hoch, and is substantially built of clay and stone. In a valley on its W. side there are several hundreds of palm trees, and some tobacco is grown. Nama, which was founded little more than half a century ago, owes its origin to a civil war which broke out in Wadai, and led to a considerable migration.

NAMAQUA LAND, a vast territory S Africa, consisting of two distinct parts—Little and Great Namaqua-land. The former lying between the Orange River on the N. and lat. 31° S., is now included in Cape Colony and is described in the article under that head. The latter, lying between lat. 22° and 28° S., is bounded N. by Damara-land, E.

the Klabari desert, S. the Orange River, and W. the Atlantic, area about 148,000 sq. m.; pop. under 50,000, or rather less than five persons to the square m. The coast line is a long dreary sandy waste, extending backwards into the interior from 50 to 60 m., and sometimes even 100 m. With the exception of a few localities, this tract is uninhabitable. Of the rivers—which are few and of little importance—some, as the Kumpi, fall into the Atlantic; but the greater part take an easterly direction, and flow E., chiefly to the Fish River, which, rising in the N. of the territory, intersects it from N. to S. to its junction with the Orange River. The characteristic feature of Great Namaqua-land is its immense tract of sandy desert, traversed by hill and rock, and thickly strewn with quartz, which reflects a dazzling and perplexing light. In the N. the dense thorny bush of Damara land is continued for only a short distance across the frontier and then succeeded by a waste, on which the vegetation consists of scattered stunted trees, varied occasionally by the ebony, and by a few mimosa along the water-courses. For more than six months the surface is scorched by a vertical sun, the periodical rains always accompanied with heavy thunder are very partial and unequal; and the springs, either hot or salt, are neither numerous nor copious. It is a general complaint among the natives, and may now be regarded as an ascertained fact, that less rain falls now than half a century ago, and that in the

whole country north of Orange River a general process of desiccation is going on. The prevailing rock of the country is granite, but quartz occurs extensively both in large veins filling up gaps and fissures, and in boulders scattered over the plains. Slate and sandstone also are not uncommon. The metals are the lead, copper and iron. The first three, though known to exist have not been proved by actual working, but the last, in the form of meteoric iron, is found in apparently inexhaustible quantities. Mr. Anderson says—He has seen many lumps of several hundredweights brought from thence, so pure and malleable that the natives converted it into balls for their guns, &c. with out any previous application of fire. The names Hotentots and Namaqua, by which the inhabitants are usually designated, are not found in the native tongue, and are therefore probably of European origin. The Namaqua Hotentots are divided into the two great branches of Tappanar and Oorikam. The former consider themselves the original inhabitants, and are very jealous of the latter who are said to have come overland, and are therefore regarded as intruders. They form numerous sub-tribes, each under its own petty chief, who gives his name to the tract over which he rules. The principal sub-territories have the somewhat odd names of Jonker Afrikaner, Cornelius Aard, Xarabob, Jan Boek, William Fransman, Paul Goliath David Christian, and Boudel Zwart. The Namaqua dwell in small round huts, formed of a framework of semicircular boughs, and covered with rush-mats. When they change their locality they take down the huts, pack them on oxen, and carry them along with them. In addition to the ordinary coat of dress they use a profusion of ornaments consisting chiefly of beads of various colours, and articles of brass, copper, and iron. They also tattoo their selves, and decorate themselves with grease and powders, the latter obtained chiefly from the larvae of plants. For their original arms—the bow and arrow the assegai, and an immense shield—they have generally substituted the musket.

The chief employment of the Namaqua is the rearing of cattle of which they have a breed of moderate size and very compact build. The other domestic animals are sheep, goats, and dogs. In want of meat, qualities the natives rank very low. Such is their greedy and barbarous that they may be seen looking in the sea for days together, and can scarcely be aroused away by the pangs of hunger and thirst to make the necessary exertion for their relief. They are at the same time a selfish, hard-hearted, cruel race. The aged and disabled of their own people are left to perish; any of their slaves committing the least offence is instantly shot;

and in their predatory incursions into Damara-land, besides robbing the inhabitants of their cattle, they are often guilty of the most horrible atrocities. Their religious creed is so scanty that it has been doubted whether they have any idea of a Supreme Being and a future state. It seems, however, that they believe in a deity, god, or deified ancestor called Hutzibeli, who can grant or deny them prosperity, and is supposed to haunt the graves of the dead. They have also so much faith in sorcery that witch-doctors, male and female—called respectively *hahak* and *hahake*—drive a very active and profitable trade in imposture.

NAMANTUQU a v.l. Western *Akhis*, prov. Taghe, 310 m. W. Sokoto. It was once a place of considerable importance, and figures in the history of the Songhay empire, but is now destitute of situation, consisting of a great number of very narrow huts forming several groups, and covering a large tract of ground. Cotton is extensively grown in the vicinity.

NAMAUKAN, a river British N. America, in Rupert's Land lat. 48° 50' N., lon. 92° 40' W. which connects the great Nequawgon or Pine Lake (Lac de la Croix), with Namaukan Lake, at the S.E. extremity of Rainy Lake. The river flows in a N.W. direction, between high precipitous rocks, clothed with dense groves of pine and aspen, descending by numerous rapids and falls to the level of the Rainy Lake. Of these the most important are Crow Portage, with

NAMAUKAN RIVER, GRAND FALLS.—From Hild's *Canadian Register*.

935 ft. fall the Grand Falls Portage 16 ft., and the dangerous Namaukan Rapids, between 15 and 16 ft., where the waters eddy and whirl among the jagged rocks with unceasing violence. At the débouchement of the river into Namaukan Lake there is a grove of magnificent alders. The lake is upwards of 13 m. long and is connected with the Rainy Lake by a narrow circuitous stream, without perceptible current, meandering through a ready swamp, dotted with low willows. From Lake Superior it is distant by water 197 m.

NAMUJA in lat. China, off the E. coast of prov. Quang-long. It is 19 m. long from E. to W. has a maximum width of 5½ m. and is separated from the mainland by a channel which is 3½ m. broad, and has depths varying from 3 to 6 fathoms. Its three peaks, one of which attains the height of 1960 ft., are the most prominent landmarks in the neighbourhood. Notwithstanding the general barrenness of its surface it is densely peopled, the Saboras affording ample means of subsistence. Baylis Bay and Olipier Rock, both near its S.W. extremity afford good anchorage, and need to be much resorted to by opium vessels during the N.E. monsoon.

NANAIMO in and harbor British (Western) N. America, E. side Vancouver Island, about 60 m. N. Victoria. The town stands upon a curious promontory apparently rent by volcanic action, which has strangely twisted the strait. It derives its importance from being the place of shipment for coal, which is found in the neighbourhood suitable for engine purposes. A new wharf and improved shipping appli-

ships have recently been provided, and an extensive and profitable trade will probably be opened. Coal has also been found in Burrard Inlet, on the opposite side of the Gulf of Georgia.

NANGASAKI, or NAGASAKI [add.] From 1665 to 1858 the Dutch was the only European nation permitted to trade with Japan, and to establish a factory on the artificial island of De-sima, at this port. In the latter year Lord Elgin concluded a treaty of commerce between Great Britain and Japan which opened the port to British subjects and since then other European nations, besides the U States of America, have ratified similar treaties with the Japanese government. The result is free intercourse and traffic between the foreigners resident at the port and the inhabitants, all transactions being subject to import and export duties according to a fixed tariff. Instead of being confined to the limited area of De-sima and the restrictions on Dutch trade, commerce is now extended to the mainland, where a considerable tract of ground is laid out as a foreign settlement to the left of the city with a custom-house for the regulation of traffic. Here are many

sumed a pacific aspect and foreign residents took up their abode at the settlement in perfect security although few in number. At the commencement of 1866 the following composed the population:—British subjects, 70; American citizens, 21; Dutch, 93; French, 19; Portuguese, 14; Prussians, 8; Swiss, 2; total, 166. Besides this resident population numbers of foreign residents in China cross over during the extremely hot months, to recruit their health, residing in bungalows built for their reception, on the picturesque hills already mentioned.

The principal exports are tea, camellia cotton, tobacco, vegetable wax, and silk. Since the opening of the port their production has increased according to the demand for foreign trade, and their cultivation is still increasing. The quantity of tea exported in 1865 amounted to 2,359,389 lbs., in 1861 it was 1,569,587 lbs., showing a surplus of 889,802 lbs., and this does not include the green tea which the Chinese ship to their own country and prepare at there for the foreign market, the quantity being considerable, but impossible to ascertain. The export of silk has only recently commenced but it promises to become a large item, and it may be added that in 1865, 150,000 cards of silkworm-eggs, valued at £31,721 were sent to Europe. The principal imports are cotton and woollen manufactured goods such as gray shirtings, cambrics, muslins, &c. A very large business is transacted also in arms and ammunition, of which but a very small portion is reported to the custom-house. Indeed the same may be said of almost every other article of import or export, in consequence of the extensive system of smuggling carried on at this port, through the connivance of native officials with foreign traders. This, added to the corrupt practice of low estimates on the value of merchandise due and products to evade the duties renders the customs returns so incorrect as data for the external trade of the port, that it has been calculated from 50 to 100 per cent. should be added in order to arrive at the truth. Some idea of this traffic may be gleaned from the shipping returns for 1868 as follows:—Arrived British 140 ships, tonnage 44,417; American 48 and 14,897; Dutch, 42 and 12,819; French, 20, and 4,656; Prussian 13 and 3,780 and one Portuguese vessel of 953 tons. An item of importance is the number of steamers and sailing ships and at this port to the native princes, which realized £104,472 in 1866, of which £116,518 was British.—(Compendium of Facts, Messrs. M.S. Notes.)

NAN HIOUNG, or NAK YANG a town in China, on the frontiers of prov. Quangtung near the source and at the head of navigation of the Peikang 175 m. N E. Canton. It is celebrated for its storehouses and its vast port, where all the junks coming up the river from Canton stop.

NANING a small state of the Indian Archipelago lying inland from Malacca, and subject to it. It has a mean length of 40 m., with a mean breadth of 10 m. Though it has belonged successively to the Portuguese, the Dutch and the British it is a poor unprofitable possession, covered mostly with jungle. Pop. 5,881, composed almost entirely of Malays.

NANKIN, or NANKING (man, south long court) [add.] Before the reigning Tartar dynasty established the Chinese emperor's court at Peking, the previous dynasties of Chinese emperors held their government, some occasionally others permanently at Nankin. Hence it was named the southern court, in distinction from Peking or the northern court but at no period have the Tartar emperors resided at or even visited this ancient city which flourished with great splendour during the Ming dynasty in the 16th century. When the Tungus rebellion spread into the central provinces of China, it was the great aim of the leaders of that movement to capture Nankin and establish the throne of the new Heavenly Kingdom of Great Peace within its walls. This capture was effected in April 1853, and the Tien Wang, or heavenly emperor, held it with his forces against the imperialists up to July 1864, when the latter recaptured it, by springing a mine with 68,000 lbs. of gunpowder under the massive walls, and entering through the breach. When the conquering forces reached the palace of the Tien Wang they beheld a gorgeous edifice literally glittering with gold. The entrance, or reception hall, was paved in mosaic with gold and silver and ceiling superbly carved, painted red, and gilded. Gold

substantial stone built warehouses and residences erected by the consulates and subjects of the treaty powers, with a breastwork of stone, which forms a convenient terrace by the water side, for landing merchandise, and a public promenade. At the back, the settlement rises up the wooded hills, where the foreign residents have built houses after the fashion of the Japanese surrounded with beautiful gardens, and having the unrivalled prospect of the city and harbour of Nangasaki, with the most salubrious sites for residences of all the open ports in Japan or China.

A considerable influx of foreigners took place in 1860 chiefly from the open ports in China, the principal mercantile houses and banks establishing branches here. It was soon found out, however that though the trade traffic between Nangasaki and the ports in the Sea of Japan was important, yet its powers for foreign trade were limited, in consequence of the port being distant from the great producing districts. This consideration was found at the more northern port of Yokohama, whether the chief portion of the foreigners migrated in 1861. Then followed three years of bustling commerce caused by political agitation and the threatened expulsion of foreigners from Japan. In 1865 matters as-

seemed to have been spread on the place like mortar on an ordinary building, and, although to a European taste too gaudy to the Chinese eye it seemed truly magnificent. It was surrounded by a wall 80 ft. high, enclosing a garden planted with trees, shrubs, and flowers in the highest art of Chinese gardening. Here the body of the Taping chief was found, he having committed suicide by eating gold leaf, provisions to which he hanged all the chief women of his house on the trees in the garden. The palace was immediately sacked by the Imperialists, who dug up every nook and corner, and tore up the flooring, in search of treasures, which they found to the extent of about two millions sterling. Excepting this and a few other buildings, which had been tenanted by the secondary Taping chiefs, the city, where it was habitable presented a picture of desolation and ruin. The famous Porcelain Tower was levelled to the ground, the ornamental gardens carried away and only a heap of rubbish has now where that beautiful edifice stood. Entering by the north gate a person may traverse a road for 8 m. for the most part between cultivated fields, the place presenting simply the appearance of a large tract of land walled in. The only relics of its former greatness are the tombs of the Ming dynasty with their colossal statues of men and animals and a square tower 50 ft. high, on the top of which is a finely sculptured figure of a turtle, constructed of one solid block of marble. When Lord Elgin was sailing up the Yang-tse-kiang which is front of Nankin, as not more than 1000 yards wide, and filled with batteries on both banks, the British vessels were brought into collision with the insurgents, by an unprovoked attack of the latter in disregard of a flag of truce. Punishment immediately followed by a bombardment, which, begun on the afternoon of one day and continued on the following morning, silenced their batteries, and laid them in ruins. The insurgents, evidently astonished at the overpowering fire they had drawn upon themselves, replied very feebly though one round shot nearly occasioned a public calamity by cutting through a rope within 2 ft. of Lord Elgin's head as he was standing on the bridge between the middle houses of the *Farouk*. A full apology having been offered by the insurgents for the outrage, part of his lordship's suite, on returning down the river, landed at Nankin and visited the insurgent general.

Since the city has been recaptured by the legitimate government some attempt has been made to restore the manufactures in cotton and silk, for which it was so justly famed but with small success. The governor-general of the two Kwang provinces resident here, and has established a manufactory of ordnance, shot, and shell under the superintendence of a British officer who resigned his commission, and ordered the Chinese service. The business part of the city is gradually being restored but the new houses are not very substantial. A good deal of local trade is carried on, and the traffic through the west and south water-gates, where the canals penetrate into the interior of the country, is very considerable. But at the northern gates, opening on the Yang-tse River very little traffic is carried on, and there is at present no prospect of its becoming a port to attract foreign trade. According to the treaty of Tientsin it became an open port, immediately the Taping rebels were driven away from it, but no foreign trader has landed himself there, neither have any of the treaty powers established consulates. —(*North China Herald*, Moscow, *M. Notes*).

NAN TCHANG a tn. China, cap. prov. Kiangsu, on the Kao Kiang, about 80 m. before it enters Lake Poyang. It is one of the most important of Chinese provincial towns, is surrounded by walls about 6 m. in circuit, consists of large and tolerably clean streets, and contains many magnificent shops and extensive warehouses. Kiangsu being the province which has the largest porcelain factories, Nan-tchang, as its capital, is naturally the outlet for the articles produced at them, and is accordingly full of china and porcelain of every description.

NANTO a tn. India, Rajpootana, state and 5 m. N.W. Kotah, contains a palace, which was built by Zalim Singh, and is a fine specimen of a Rajpoot baronial residence, having in front a spacious court surrounded by colonnades, and ornamented with orange-trees and other odoriferous growths, and a beautiful pavilion with a fountain.

NANTSIN, a tn. China, prov. Cheking, on the Grand

canal, about 15 m. E. of Hoo-chow-foo. It has no walls, and is politically of little importance. It is, however, a large and wealthy place, extending for miles on each side of the canal and far back into the country, and containing many good streets and shops well stocked with valuable goods. Vegetables of all kinds, and fruits, particularly water-melons, peaches, and plums, are abundant and cheap; burdock stalks grown under loads of fat pork-dicks, and green and white are exposed for sale in hundreds; and in short everything tending to a Chinese epicure. Frogs, which are eaten, abound in the shallow lakes and rice-fields, and are often very beautifully coloured. The vendors of them sit in the streets skimming them alive in the most unmerciful manner. The great staple of Nantsin is silk, in which it is supposed to do even a larger trade than Hoo-chow-foo itself.

NAPANEE a tn. British America, Canada West, on. Lennox, on a river of same name, which falls into the Bay of Quinte, and on the Grand Trunk railway, 125 m. E.N.E. Toronto. It possesses five churches and a mechanics' institute and library association and is a port of entry from which large quantities of lumber and of flour and other agricultural produce are exported. Pop. about 2000.

NAPHA a tn. on the S.W. shore of the island of Great Loo Choo, in the 4° Pacific nearly 8 m. S.W. of Rhoads or Rhin the capital of which it is the port, is a large and important place, beautifully situated and embosomed among trees of dark green foliage. The suburb through which it is an town consists merely of winding lanes but the town itself has a number of good streets one of them a broad paved thoroughfare leading towards the capital and said to be almost equal to the macadamized roads of Great Britain. It possesses a temple with a finely shaded courtyard, a large edifice which appears to be of the nature of a townhall a school for professors in Confucian lore, and a Christian mission belonging to the English church and included within the diocese of the Bishop of Victoria. There are properly two harbours, an outer and an inner. The former or what is called Napak-lung is a protected E. and is by the land and surrounded in other directions by a chain of coral reefs, which form a tolerable breakwater against the swell but otherwise afford no shelter the inner harbour has a depth of 2 to 3 fathoms, and is large enough to accommodate the fifteen or twenty junks and other coasting craft engaged in trading with the neighbouring islands.

NAPLÉVILLÉ, a tn. British America, Canada East cap. co. of same name, on a small river, 27 m. S.W. Montreal. It possesses a Protestant and a E. Catholic church several schools, a tannery, and grist, saw, carding, and fulling mills. Pop. about 1500.

NAPU [add.] a river S. America, Ecuador which has its sources on the E. slopes of the volcano of Cotacachi and Mount Sanchebagua, flows S.E. receiving on its left the Coa, Aguarico, Agutera, Orinos and Oregon, and on its right the Carrara and several minor streams and after a direct course of about 350 m. joins L. bank Amazon, which here forms the boundary between Ecuador and Peru in lat. 3° 40' S. lon. 75° 20' W. A little below the confluence of the Coa to which a distance of about 290 m. it might be navigated by steamers, it is 200 yards, and at its mouth about 1500 yards wide. Its pure and crystalline waters may be distinguished from those of the muddy Amazon for nearly 100 m. below the point of junction. In the first part of its course it hurries along with the rapidity of a mountain torrent, but after receiving the Coa it becomes a placid and majestic stream, with flat alluvial banks, covered for the most part with a most luxuriant and gigantic vegetation. —(*Villamagna*).

NARROUUGH, an isl. S. America, Ecuador in the Pacific, belonging to the Galapagos group lying about 600 m. W. of the continent lat. 0° 25' S., lon. 91° 25' W. It is a great volcano rising to the height of 5720 ft. and is separated from Albemarle Island by a channel which is 2 to 3 m. wide, and 55 fathoms deep. Within this channel, on the Albemarle side, is the anchorage of Tagua Cove, with 6 to 16 fathoms water. It is formed by an old crater is well sheltered, free from dangers, and capable of containing six frigates.

NAROL, a tn. Austrian empire, Galizia, circle and 25 m. N.W. Zolkow; with a strong castle surrounded by a deep ditch. Pop. 1120.

NAROO a river Sindh, which rises in lat. 27° 45' N.

low 69° 4' E., a few miles E. of Boree, flows S., and is lost in the delta of the Omurkusa, about lat. 35° 25' N., lon. 69° 24' E., after a course of nearly 185 m.

NARSAPOOR, or **NARSAPUR**, a tn. in India, presid. Madras, dist. and 47 m. S. by W. Rajahmundry on the Vastika, and by W. branch of the Godavary, near its mouth. It consists partly of Narsapur proper and partly of the remains of Maddapallam, which, before the East India Company ceased to trade, was famous for its cloths. The trade in this article has now greatly diminished but the commissaries at Maddapallam still receive from this place fine cloth of superior strength and quality and, however, to be made not here but in neighbouring villages of Rajahmundry. Narsapur possesses an English and a vernacular school, supported by local assessments chiefly of the native inhabitants. There are likewise missionary schools for boys and girls attended chiefly by the lower castes. The harbour, which was once resorted to by large British vessels, is now accessible only to native craft, but a great accession to its trade is anticipated, from the proposed removal of its bar, as one of the first and most essential improvements of the navigation of the Godavary, which even now has a depth of 40 to 50 ft. immediately opposite to the town. United pop. of Narsapur and Maddapallam, about 8000

NARWAR, or **NEWAR**, a tn. India, Scindia's Dominions, r. bank Rhind, 44 m. S. Gwalior. When taken by Sikander Lodhi sovereign of Delhi, in 1508 it is said by Ferishta that it was 14 or 15 m. in circuit, and that the emperor spent six months in destroying its temples and idols. At present its only object of interest is its fort, in which recess is given by flights of 850 stone steps. The interior, about 1½ m. in circuit, is formed by a massive bastioned rampart, and contains a palace and many other fine buildings. Magnesia iron ore, abundant in the vicinity is largely smelted.

NARACARA, a tn. Bolivia, prov. and 80 m. N.W. Oruro with a bridge over the Desaguadero. It consists of a number of houses, several of which are large, substantial and commodious. The property that Indians Nacacara owe to its position in being the great toll or ferry over the river and the point at which the transit of merchandise from Europe to Bolivia takes place.

NASHUA, a tn. U.S. State New Hampshire, at the junction of the Nashua and Merrimack and at the junction of several lines of railway 28 m. N.W. Boston. It contains ten churches and a savings-bank, and, having an almost unlimited supply of water-power from the Nashua, which has here a fall of 65 ft. in 3 m. has rapidly acquired importance by its extensive cotton factories, which are chiefly in the hands of large companies. One of these employs 1000 persons, and produces annually between fifteen and sixteen million yards of cloth. The other manufactures are hobbins and brushes, iron castings, edge tools, locks, watches and card and flax paper. Pop. (1860) 10,065.

NASHVILLE [add.], a tn. U.S. States, cap. of Tennessee on the Cumberland, and at the common centre of five railways which radiate from it lat. 36° 9' 33" N., lon. 86° 49' 3" W. It stands chiefly on the S. side of the river, at the foot and on the slopes of a fault rising 200 ft. above the water and is generally well built, having numerous elegant private dwellings and several imposing public edifices. Of the latter the finest is the new capitol, finely seated on a commanding eminence, and built of a beautiful variety of fossiliferous limestone, at a cost of above 2200,000. It is approached by four avenues rising from terraces to terraces by broad marble steps adorned by columnar porticoes and surmounted by a tower 206 ft. high. The other buildings and institutions of note are, a large new court-house, situated on the public square, the state bank, a handsome Dome structure, twenty-seven churches, the university, accommodated in a handsome Gothic edifice, and attended in 1860 by 300 literary and 400 medical students a female college, with 450 pupils; a historical society with a good museum and library, a state library of 40,000 volumes, a R. Catholic theological seminary, two orphan asylums a state asylum for the blind, and a state penitentiary, with about 400 convicts. The manufacturing establishments are not important, consist chiefly of machine shops, and planing and flour mills, but the trade, both retail and general, is very extensive. The leading business of the town is in dry goods, hardware, drugs, groceries, and book trade. The staple exports are of cotton, See. See also—Vol. II.

silence, wheat, Indian corn, bacon, hogs, and herd. The neighbourhood is famous for the rearing of stock-Mold horses, mules, cattle, sheep, hogs, and Calmairs goats. Pop. (1860), 16,698.

NASQUAPEE or **REYNA** **NA** **REYNA**, a river Labrador, falling after an easterly course into Hamilton Inlet, upon the N. side, about 80 m. from the mouth of the latter. It takes its source in Lake Mushkumam (Great Lake) and the river itself is, after the Indians custom called by them Mushkumam Shijis. About 3 m. from its outlet it passes through a long narrow lake bordered by high mountains. There is a canoe communication between this river and the Ashwamut. The country drained by the river is rocky and desolate of trees, except a few clumps of pine, spruce, and stunted birch. Fifty miles up the surface is so undulating as to resemble billows of solid rock.

NASQUAPEE, a tribe of Indians British N. America Lower Canada, who roam over the interior, and subsist by fishing and fur hunting. They number about 2500, of whom 1000 are Christians, the pagan part of them acknowledge a superior being to whom they ascribe a portion of everything they kill. They are clothed altogether in furs and deer skins, and are described as being most filthy in their habits. Their only weapons are the bow and arrow. Of late years they have frequented the Seven Islands. Polygamy is said to be practised and the horrible custom still obtains of killing their parents and relatives when old age leaves them incapable of exertion and even cannibalism is not infrequent. Famine and the fatal influence of the pest have rapidly thinned their numbers.

NASTIK, a tn. India, presid. and 92 m. N.W. Bombay dist. Ahmednagar, is the principal seat of Brahmins in the Deccan, and is as much venerated as Benares in Hindooism. It was a flourishing place when the Peshwas ruled at Poona, but lost much of its prosperity when the Marhatta confederacy was finally overthrown. It still however continues to be important contains numerous temples and Brahminical establishments, which attract crowds of devotees from all parts of the country. In the vicinity are numerous remarkable caverns, believed to have been made by the Brahmins previous to the conquest. Pop. estimated at 25,000.

NATASHQUAN, a river British N. America Lower Canada, falling into the Gulf of St. Lawrence, in lat. 50° 30' N. lon. 61° 50' W. It runs from the S. through a mountainous region, thickly wooded with spruce fir and hard trees. Natashquan Falls, at the mouth of the river has a falling settlement of about fifty families and is a great resort of seals on account of its gently sloping beach. In the rear of it the forest timber is of fair dimensions, and the soil about the harbour is pure sand, but when mixed with fish and their offal, yields excellent crops of potatoes, &c. Wild past and various grow in abundance a little distance from the shore affording pasture for cattle. Close to the shore are low dunes thrown by the waves, in which fresh water is found at a small depth the salt of the sea water being probably extracted by upward filtration through the sand. From April to November the fishermen of Natashquan, who own a few vessels, are engaged in catching seals, walrus, cod, herring and mackerel. **NATIPOL**, a tn. India, presid. Bengal dist. and 50 m. N.W. Purneah, r. bank Gogra near the S.E. frontier of Nepal. It consists of four market places and contains about 8000 inhabitants who carry on a very extensive transit trade between Nepal and Hindoostan.

NATOOR, or **MADURA-OYA**, a river Ceylon which rises in a mountainous district near the E. frontier of the Eastern Province, flows first easterly, then E. and falls into the beautiful Bay of Venloo, below the town of Hattori. It has a wide and rapid stream, studded with numerous fertile islands, and is navigable by boats for a considerable distance westward.

NATSCHERADETZ, a tn. Austrian empire Bohemia, circle Tabor, 36 m. S.E. Prague with a deanery church, a castle, a townhouse, an hospital, and five mills. Pop. 1700.

NATISSA, or **NAUERT**, a tn. Greece, nomarch Cyclades, on a bay on the N. coast of the island of Paros with a parish school and a spacious well sheltered harbour. Pop. 1800.

NAXOS, a tn. Greece, nomarch Cyclades, on a bay on the N.W. coast of the island of same name, is the seat of a R. Catholic archbishop, a Greek bishop, and a seat of 18

passage, is defended by a strong castle, built by the Venetians and has two Greek and one R. Catholic church, a hamlet, a Capuchin and an Ursuline monastery, a custom-house, and a parish school. Pop. 5000

NAZARET (Fr) a town, France, dep. Var 9 m. W Toulon was a small fishing town scarcely known a few years since, but has become a considerable town, both as regards population and commercial animation, and has assumed the rank of a third port in the French empire. France a short time since did not possess a commercial port over an extent of 500 miles of coast washed by the Atlantic. The merchants in that part of France were therefore placed in a disadvantageous position, in consequence of having no seaport whither to ship their produce. But in 1827 a floating dock 88 acres in extent was opened to ships entering the port of St. Nazaire. This dock, though sufficient to accommodate 500,000 tons of shipping, shortly became overcrowded, and insufficient during one day in 70, according to official documents, to receive ships which presented them selves. Since that period the Transatlantic steam fleet has been built, which requires accommodation. The maritime traffic having greatly extended the accommodation and that traffic progressively increased the construction of a second floating dock about the size of the first has been undertaken and the traffic has so much increased that the construction of two more floating docks has become necessary. The population has kept pace with the traffic. It has increased tenfold within six years, and at present amounts to 15,000 souls. According to present appearances, St. Nazaire will shortly rival Havre and Marseilles. The value of ground has increased with the population. Ground sold formerly for 6d the square yard is now worth almost 5s.

NAZARETH a village in Syria, Palestine, 40 m. N Philadelphia. It was first founded in 1739 by George Whitefield, but, before completing a school-house intended for African children sold it to Count Zensendorf. It now contains a church and a Moravian academy for boys. Pop. 781

NEBRASKA [add.] a territory U. States bounded N by British America E. Dakota, Iowa, and Missouri, S by the 40 parallel separating it from Kansas; and W the Rocky Mountains, separating it from territories Utah Oregon and Washington length N to S 620 m. average breadth, 541 m. area 335,982 sq. m. The pop. is mostly in a tract of settled farms, stretching from the Missouri to the Nebraska, a distance of about 200 m. and another tract along the Platte, following the stream westwards and upwards for nearly 300 m. The capital is Omaha. The surface may be considered as a vast plain, with a gentle rise from the Missouri towards the mountains, and consisting partly of flats along the banks of the river, and partly of undulating prairie which occasionally rise into low ridges. The principal river is the Missouri, which has all its head waters and upper branches within the territory. The most important of its affluents is the Platte, which divides the central portions of the territory into two nearly equal sections. The lower portion of its valley has the soil of exuberant fertility, but the banks of many of the smaller streams are rank with vegetation. The Missouri valley, from 10 to 20 m. wide, between parallels 40° and 43° is covered for about half the extent with a heavy growth of cotton wood, intermingled occasionally with hard wood, as oak, black walnut, elm, butler nut &c. the other half nearly destitute of timber is covered with coarse grass. In the S part of the territory limestone abounds and in many places sandstone is seen cropping out but the geological formations are yet very imperfectly known. Several rich salt springs have been discovered and it is expected that more valuable minerals, including the precious metals, will be found as the Rocky Mountains are approached. The soil differs much in quality. In the valley of the Missouri between lat. 40° and 44 there is a tract of about 30,000 sq. m. which, as an agricultural and pastoral region cannot easily be surpassed, but in the N and N W the whole aspect of the country changes, and the arable land almost entirely disappears. In particular, a tract which has received the name of Manvelotte-Terrace and deserves it, is singularly desolate. This tract, which lies to the E. of the Black Hills, and occupies an area of about 60 m. by 30 m. sinks down abruptly from the surrounding prairie to the depth of nearly 300 ft. and is bare and sterile in the extreme presenting an almost endless succession of

plains, columns, and irregular masses of earth and rock, separated by winding passages, in which there is scarcely a vestige of vegetation. In the fertile districts all the ordinary cereals and root crops grow well; fruits also, particularly plums and grapes, are abundant. The climate is on the whole good. The winters are short and mild and the summer heats, which are sometimes excessive, are tempered by gales from the west. Ague, however, and other diseases of a malarious nature, are not uncommon. The settlers consist generally of citizens from the more northern states, with an intermixture of Germans and Irish. Before the territory was organized, almost the only inhabitants were Indians. They are still numerous, and considerable reserves and annuities have been secured to those among whom civilization has made some progress. Towards the N and N W many of the tribes are still wild. Pop. (1860) 28,903

NEDSHEPABAD, a town Persia, prov. of Irak-Ajemi 18 m. W Ispahan, is a considerable town, wearing an aspect of prosperity and wealth, the houses being well and tastefully built, and the streets laid out with some pretensions to regularity. Extensive and blooming gardens surround the town, the whole occupying an area of not less than 16 m. in circumference. The inhabitants are chiefly occupied in the cultivation of cotton and in dyeing cloths. Pop. 16,000.

NET MUGH a town India, Hindia's Dommions on the N W frontier of Malwa, in a well-drained plain, studded with a few small stony hills, 270 m. S S W Agra. It consists of a town which has lost much of the importance which it possessed in earlier times, and of a fort which though small is stronger than usual in India, because British art has been employed in the construction of it. The place would now be little deserving of notice but for its military equipment, intended to contain a portion of the troops of the Greater Company, and rendered a complete station of defence during the late wars. On the 24 of June 1867 the troops stationed there, consisting of the 7th and 72d regiments of infantry the 1st regiment of cavalry, and the 4th company of artillery broke out in open revolt and committed many atrocities. The fort, however, gave a refuge to most of the officers and other European residents, and the soldiers, after a siege and ineffectual attempt at assault, were obliged to content themselves with a kind of blockade which was not relieved till the end of Nov. of the same year, when a British force under Brigadier Stuart, completely defeated the rebels at Mandasore, in the vicinity and compelled them to desist. The pop. of Netmugh is roughly estimated at 4000.

NEPSAUA a district Africa, in the S. of Tunis, lying between the salt swamp of Schott-Kubir on the W and the country bordering the Gulf of Gabes on the E. It has been termed an archipelago of oases and no fewer than 101 villages have been counted within its limits, though many of these have ceased to be inhabited. The whole tract is richly watered. Everywhere springs burst forth, and form either running brooks or large natural basins. In spring it may be said to form one great marsh and becomes covered with luxuriant grass and other kinds of vegetation. The climate, however, from this very cause is unhealthy, and fever rages every year from May to October. The inhabitants have generally the negro cast of countenance. They are industrious agriculturists but suffer much from the extortion of their own rulers, and the depredations of the Arabs. The most important town of Neftsa is Kabil.

NEFSCHERH, a town Turkey in Asia, Karamania, 840 m. S E. Constantinople, on a height with a deep ravine on one of its sides. The houses are almost all whitewashed, and present a very cheerful appearance, but there are no public edifices of any importance, and towers and minarets, which, considering the size of the place, might be expected, are altogether wanting. It was originally a village called Manchar, but one of its natives, Ibrahim Pasha, who rose to be grand vizier and held the office from 1718 to 1730, took a pride in adding to its population and importance, and having conferred upon it the rank of a provincial city gave it the name of Nef Scherh or 'New Town.' It is a place of great extent and importance, with a pop. estimated at 25,000 to 30,000, chiefly Greeks with a considerable mixture of Turks and Armenians.

NEFUSA (Jews) part of the mountain chain, N Africa, in the S. of Tunis, which, at a distance from the coast, follows

the sector of the lesser Syria, extending E of Tripoli to Coles. These hills form the fringe or border of an immense plateau, which, rising abruptly above the neighbouring plain to an elevation of 1600 ft is included in the Tripolitanian Jebel, a rich fruit-producing district. The inhabitants form two distinct classes, the original Wahabees belonging to the Berber race, and the Arabs, who are orthodox. Tahamut Jebel Nefusa is said to have contained in the middle ages 800 villages and 236,000 inhabitants, now reduced to 64 villages and 47,000 inhabitants.

NEGOTINA, a town in Turkey in Europe, Harvia, cap circle Kraina, on a stream of same name forming part of the boundary between Berria and Walachi, 10 m. N E Widia. It is the seat of a court of justice and the see of a bishop and has a church, a gymnasium, an elementary school and much-frequented weekly markets. Pop. 2751.

NEJ NUDDI, a river India, which rises in Malwa in lat. 25° 20' N lon 75° 17' E flows E through Boondie for 100 m and joins the Chumbul.

NE-KA LAO, a town in China on the shores of the Bay of Hang chu on the N E shore of prov Chekiang near the terminus of a canal, on the E bank of the Ningpo. Between the town, or rather village 'as it is but a small place) and the bay there is a wide mud flat about 5 or 4 m in extent having several wide and substantial embankments stretching across it parallel to the bay and probably indicating the successive tracts which have been reclaimed from the sea, and converted into fertile corn fields. Nearer the sea the flats become white with a crystalline substance, which proves to be salt, and is accordingly manufactured here to a great extent as a government monopoly, all the land with the salt-mounds, holding-houses, &c., belonging to government. Smuggling is, however, carried on almost openly, the officials having doubtless substantial reasons for conniving at it.

NELLORE [add.] a town India, grand 100 m. N by W Madras cap dist. of same name on the bank of the river about 10 m. above its mouth on the Coromandel coast. It stands on a flat of red laterite somewhat raised above the surrounding country and was surrounded by a rampart, and defended by a fort, both of which are now in ruins. It is irregularly built, and in some places crowded and confined but it possesses several good streets, and for a native town is on the whole clean and airy. The principal public buildings are the civil dispensary the hospital and the jail. The last consists of a double range of buildings, forming two distinct squares, and is calculated for 800 prisoners. Tanks and cuts from the river affording ample means of irrigation, rice is extensively cultivated in the vicinity. Pop. about 20,000.

NELSON [add.] a prov New Zealand forming the N W portion of Middle Island or New Munster is bounded N by Cook Strait, W the ocean, N Lancaster and E the ocean and Marlborough length N to S 160 m greatest breadth 80 m; area, 8,000,000 acres. The coast-line, which has a sweep of about 800 m, is tolerably continuous on the W., but is deeply indented in the N. particularly by Blind Bay on the S E shore of which Nelson the capital is situated. A large part of the W. half of the prov appears to be a densely timbered alpine region in which some lofty mountain summits are situated. It has as yet been very partially explored, but what is known goes to prove that its agricultural and pastoral capabilities are not great. It promises, however, to yield wealth of a different kind. Iron, copper and coal are found in it, and it possesses a gold field which is actually worked. Pop. 11,000 of whom only 900 are natives.

NELSON [add.] cap of the above prov situated at the bottom of Blind Bay on the margin of an excellent harbour beneath a circle of precipitous hills, which rise like a wall above it, was founded in 1842. It consists of a number of spacious streets, only partially built, and of a central square and contains three churches, an Episcopal and a Wesleyan several schools, and a court-house and other public offices. One great objection to Nelson is the small quantity of land available for cultivation in its neighbourhood, but this objection will probably be overruled should the gold field prove so extensive and valuable as is now confidently predicted. The principal agricultural districts in the neighbourhood are in the fine valley of the Waimea, a tract under high cultivation, and the Motueka is a pleasant district across the bay. Pop. 6000.

NELSON'S HEAD, a lofty and precipitous promontory forming the northern extremity of Durban's Land, Arctie Ocean and lying nearly opposite to Cape Farry a headland on the N coast of America lat. 71° N lon 138° W. It is of limestone formation about 650 ft. in height, and rises almost perpendicularly from the water's edge. It received its name from the captain and officers of H.M.S. *Investigator* who visited it in 1830.

NEMAUER, or Nizawar, a dist India, between lat. 21° 28' and 22° 25' N lon 74° 48' and 76° 45' E. It comprises a large portion of the valley of the Nerbuda and of the Vindhya Mountains is about 180 m long from E. to W. with an average breadth of 40 m and has an estimated area of 2225 sq m. It is partly native and partly British territory the latter extending only to 260 sq m or about an eighth of the whole. Much of the soil is admirably adapted for cotton which was extensively grown while the Indian cotton manufacture flourished. The prevalent geological strata, both in the bounding ranges and on the banks of the rivers are basaltic, and are often broken into picturesque forms, which combined with the wood usually clothing them produce much fine scenery. 1 pop about 250,000.—The town of same name, situated on the E bank of the Nerbuda, 90 m. N E Oglein is an unimportant place.

NEMOUS, a vil N Africa, Algeria, prov and 80 m N W Ouz on the shore of the Mediterranean. It derives some importance from its proximity to the E. Marocco frontier from which it is only 8 m distant, and though its harbour is shallow and exposed a large quantity of the produce of the neighbouring districts, consisting chiefly of corn and wool is shipped at it. Pop. 985.

NI RIAD, a town India, prelat Bombay dist Kaira 80 m N W Baroda, consists of clean, broad and level streets and occupies the heart of a country in which tobacco is very extensively grown. Pop. about 40,000.

NIPTU-GHIBSK [add.] a town and circle, Russia in Asia Siberia gov and 540 m E by N Irkutsk on the Nerchinsk, near its confluence with the Bobilka. The town which lies so low as often to suffer from inundation is built almost entirely of wood and though possessed of several churches and schools, has nothing attractive in its appearance. Its inhabitants are chiefly engaged in the fur trade. Within the circle, among the Nerchinsk Mountains, about 100 m from the town are the celebrated government mines which are worked by convicts. Pop. of town 6000 of circle, 120,000.

NIETAGARU, a river British America which has its mouth 1½ m N W of a group of islands of same name, off the coast of Labrador in the N of the Gulf of St. Lawrence towards the entrance of the Strait of Belle Isle. It is a large stream with a rapid current, over a rocky bottom and with deep water both in its narrow entrance and within all the navigation is terminated by falls which descend perpendicularly 60 ft. on either side of an island into a basin ½ m wide. These falls are partly visible from the sea.

NETHEELANDS (KINGDOM or STATE) [add.] The following statistics, as supplementary to those given in the *Yearbook* will furnish a useful comparison of the state and progress of the Kingdom of Holland.

AREA AND TOTAL POPULATION OF SEVEN PROVINCES OF THE KINGDOM OF HOLLAND ON DEC. 31 1861 1860 AND 1860.

Province.	Area, (sq. m., m.)	Pop. 1861	Pop. 1860.	Pop. 1860.

Bocha	14,000	Banda	111,606
Biliton	15,274	Timor	30,184
		Salt and Lombok	263,726

WEST INDIES.

	Pop. 1864	Pop. 1894
Curaçao	10,566	10,770
Aruba	3,561	3,630
St. Martin	2,771	2,800
Bonaire	—	1,000

The number of Europeans settled in the Dutch East Indies in 1864 amounted to 33,677 of whom 27,933 were born in the colonies, 4478 born in Holland, and 1266 born in other European countries. The number in Java and Madura was estimated at 27,143. These figures are exclusive of the army which numbered 11,747. The Chinese in the same colonies reached the total of 235,533, Java having 136,192 of them.

Trade and Commerce.—The following table exhibits the shipping trade and gives the number and tonnage of vessels entered and cleared with cargoes and in ballast, at the principal and other ports in the Netherlands, in the year 1869:—

Ports.	REVENUE.				CLEANED.			
	With Cargoes.		In Ballast.		With Cargoes.		In Ballast.	
	vessels.	tons.	vessels.	tons.	vessels.	tons.	vessels.	tons.
Amsterdam	1,789	873,861	9	1,546	1,840	271,011	479	1,25,000
Edam	129	39,799	—	—	1	436	180	57,171
Rotterdam	219	50,796	19	1,529	44	12,525	178	64,470

The number of merchant vessels belonging to Holland on Dec. 31, 1869, was 2,231, of 239,944 tons; of these 40 were steamers, of 13,994 tons.

The extent of the commerce of the kingdom of Holland is shown in the following statement of the imports and exports in each of the years 1861, 1862, 1863:—

	Imports.	Exports.
1861	210,077,416	423,607,842
1862	271,153,299	511,161,384
1863	26,000,000	33,000,000

The quantities and value of the principal articles of the import and export trade of Holland in the year 1863 are stated in the subjoined tables:—

EXPORTS.		
Articles.	Quantities.	Value.
Wool.	2,297,075	—

The amount of the public debt of the kingdom of Holland was in 1862 485 779 715, in 1883 £82 261,661 and in 1884 £84 602 429

NEUDORF or **RENNES-UTTALA** in an Austrian empire, Hungary co. Oran on the Danube with 1470 inhabitants, who grow excellent wine, and have both coal mines and marble quarries. The Roman station *Villa* stood here, and many Roman enns are found near it.

NEUDORF a. in Austrian empire, Bohemia circle and about 20 m. E N E Rger with a church, mineral springs, and 1500 inhabitants.

NEUDORFL is in Austrian empire, Hungary co. and 14 m. N W Odenburg, on the Leitha, and on the railway to Vienna, with a mineral spring, and 1300 R. Catholic inhabitants, who are chiefly employed in preparing wood for matches

NEUHAMMER, a tn Austrian empire Bohemia, circle
and 34 m. N.E. Eger with a church manufactures of wire,
and a mill. Coal is worked in the vicinity Pop. 1500

NEUMARKT, a tn. Austrian empire, Upper Austria.
26 m. W Linz with a town hospital, woollen manufactures,
and 10,000 inhabitants.

NEUMARKT, a tn Austrian empire Galicia, county New Soudes cap. dist of same name, at the confluence of the Black and the White Dniester, 28 m E. Cracow. It has

an old church, which, though built of wood in 1210, is still in good condition, a high school, and a considerable trade in wine and flour. Pop. 3450.

NEURATZ [add] a to Austrian empire, Banat, esp. circle of same name, L. bank Danube, opposite to Fiumeraden 76 m S W Temesvar. It is a royal free town, is the see of a non united Greek bishop, and the seat of a Protestant consistory and has two churches—two of them evangelical Protestant, one Armenian, five Greek, and two E. Catholic—a synagogue, a handsome townhouse, an under gymnasium, a brewery, and an important trade partly in wine and fruit. In 11th June, 1840, Neuratz was saved by the Ban Jella fish, and suffered dreadfully. Pop. 15,822.

NEUSTADT, a to. Austrian empire, Transylvania, circle and W Kronstadt, with a Protestant church, large potteries, a trade in flax, and 2000 inhabitants.

NEUSTIFT a to. Austrian empire, Lower Austria circle, 1 ppar Wieselwaid with a parish church, iron and other mills, and 1200 inhabitants.

NEUTSCHIEIN [add] a to. Austrian empire, Moravia, esp. circle of same name, is a beautiful and fertile country 64 m N E Brunn on the Tischo, an affluent of the Oder. It consists of two parishes and five suburbs, is the seat of several important public offices and has three churches—one of them a domitory church, built in the Byzantine style and surrounded by two lofty towers, an ancient castle, a townhouse, a high and other school, a town hospital an infirmary and an asylum for children. The manufactures consist chiefly of woollen and linen goods, glass and dyed and there are four important yearly markets. Pop. 7807.

—Old Tischoa about 2 m off contains an ancient parish church and two castles, one of them a ruin, and has 800 inhabitants.—The circle of Neutischiein bounded N by Austria, Prussia, and Silesia, E by Hungary, S by Brunn and W by Moravia, has an area of 977 sq. m. and a population of 261,539 of whom 20,518 are Protestants and 2365 Jews.

NEVADA, a territory U States, formed in 1861 out of the W part of Utah and portions of California, is bounded N by the parallel of 42° N. E. by the meridian of 116° W. S. by the parallel of 37° N. as far W as the watershed between the valley of the Colorado and the Pacific and W by the watershed as far as the parallel of 41° and from thence S to the parallel of 42°. Its finest portion is the valley of the Colorado, which is cultivated alike for its fertility and for its mineral wealth, particularly in silver. The gold and silver fields are also found stretching from the Washoe in the E. W. part of the territory across it from W to E, and reaching N and S from the great central discoveries of Washoe. It was estimated in August, 1862 that there were in Nevada 140 crushing mills in operation. In some places boulders of quartz are said to lie upon the surface from 3 to 5 m in extent, and to be rich in silver. Obsidian also resembling coarse glass, is found upon the surface; and in some districts below boulders are coated inside with a stone resembling flint spots, of various colors. Bituminous coal and salt have been discovered, and the soil, which is in some districts extremely dry and barren, and covered with wild sage contains much alkali. Besides its resources in the precious metals and useful minerals, the territory likewise possesses considerable agricultural capacities scattered throughout its mineral ranges. Carson city is the capital. The estimated area is 83,500 sq. m. and the estimated white population in 1863, 40,000.

NEVIANSK, a to. Russia, gov. and 175 m. E. S. E. Perm, near the source of the Neva in the Ural Mountains is a district which is almost a continuous forest. It is one of the oldest mineral establishments in the Ural, having been founded about 1709 by the first Demidoff, who built his castle and made it the family residence, which it long continued to be. Extended by his successor, it grew into a magnificent mansion, and though much curtailed and partially demolished by the caprice of one of his descendants, still contains several splendid apartments. About 300 yards from the castle is a fine brick tower, much out of the perpendicular. At one time all the silver brought from the Altai was refined within it. The mines and mines of Neviansk have belonged for nearly a century to the Yalovitz family. Very good iron is made here from a mixture of common red magnetic iron ore. Large quantities of painted iron

were, sent to the fair at Irtish, and their way to every part of Siberia. Pop. of Neviansk, 18,000.

NEVERKOP, a to. Turkey in Europe, circle and 70 m N. E. Salomaki, on the Karasu or Boyrun, at the foot of the Ararat Balkan. It is surrounded with walls, and has a pop. of 3800.

NEW ALBANY [add] a to U States, Indiana, esp. co. Floyd, on the Ohio, opposite to Portland in Kentucky, and on the Louisville, New Albany and Chicago railway, 10 m N W Louisville. It stands on an elevated bank, is well laid out in wide paved streets, and contains 22 churches, a college, and a collegiate institute. The chief industrial establishments are steam-boat building yards and foundries. At commodious wharves, made suitable for the largest steamers, an active and rapidly increasing trade is carried on. Pop. (1860) 12,047.

NEWARK [add], two places, U States:—1. A to New Jersey, esp. co. Essex, on the W bank of the Passaic, on the Morris canal, and on lines of railway connecting it with New York, Philadelphia, and other quarters, 19 m W New York. It covers an area of nearly 5 sq. m., and consists generally of wide and airy streets, and of three spacious squares and parks. Broad Street, the principal thoroughfare, is 2½ m. long and 132 ft. wide, is a handsome avenue, shaded with majestic elms and lined with numerous elegant mansions. The central park is in like manner surrounded by tower ing elms, and surrounded by the residences of many of the wealthy inhabitants. The public buildings include 18 churches, of which no fewer than 12 are German, a custom house and post office, erected at the expense of the general government, a savings bank, a high school, an academy, two orphan asylums and an almshouse. In the vicinity are several cemeteries, one of which occupies 40 acres, and is set out in winding avenues, shaded by ornamental trees and flowering shrubs. The manufactures consist chiefly of leather, cotton, patent, and enamelled sheet, wheels and carriages, plated ware, jewellery, saddlery tools, cutlery, looks, railings, mattresses, hangings, patent or enamelled cloth hats, castings, brass and malleable iron machinery, needles, buttons, type-metal and printing composit and chemical also, and larger beer. The trade is chiefly confined to the above articles of manufacture. The real and personal property of the place is estimated at \$5,300,000. Pop. (1860), 71,841.—2. A to Ohio, esp. co. the principal thoroughfare of three branches of the Licking on the Ohio canal and on the Sandusky, Mansfield and Newark and the Ohio Central railways, 30 m. E. N. E. Columbus. It contains eight churches, and has in its vicinity quarries of sandstone, a coalfield, which is extensively worked and a number of coal oil factories. Pop. (1860) 4675.

NEW BEDFORD [add] a to U States, Massachusetts, one of the capitals of co. Bristol, on Buzzard's Bay and on the New Bedford and Taunton and the Fairhaven branch of the Boston railway, 50 m. S. Boston. It is built along the W side of the Acushnet, which is here crossed by a bridge communicating with Fairhaven and contains 84 churches, a handsome city hall in the Doric style, a custom house, a system several excellent private academies, a public library of 18,500 vols., an orphan house, a house of correction, and an almshouse capable of admitting 400 inmates. Most of the public edifices are built of granite and not a few of the private houses are remarkable for elegance. The principal manufactures are cotton yarn and cotton cloth, hoop iron, oil soap, candles, screws, rivets, castings, paper-hangings and Prussian blue, but for a long period the whale fishery has been the staple business of the place. It began to be prosecuted here as early as 1756, and though prosecuted first by the war of the Revolution, and subsequently by that of 1812 is still the centre of the whale fishery in the U States. On the 1st of January, 1860, the number of vessels in the district of which New Bedford is the port of entry was 847 measuring 184,478 tons. Of this number, 501 measuring 108,564, belonging to this place alone, were employed in the whale fishery, the aggregate products of which for the whole district were, in 1859, 2,336,488 gallons sperm-oil, valued at \$278,559; 4,715,283 gallons whale-oil, value \$206,215; and 2,610,987 lbs. whalebone, value \$256,024. According to the valuation of real estate and personal property New Bedford is the wealthiest community

in the U States, in proportion to the number of its inhabitants. Pop (1860), 22,800

NEW BRITAIN, a post-borough and township, U States, Connecticut, on the Providence and Fitchburg railway 10 m. S. Hartford. It contains six churches and a state normal school and has extensive manufactures of stockinet goods, buck and safe locks, jewellery hooks and eyes, cabinet hardware, harness trimmings, rules, plumbs, and levels. One of its establishments for the manufacture of locks, house trimmings, and general hardware, is the largest and most complete of its kind in the States. Pop. (1860) 5212

NEWCASTLE, a town in British America, Canada West, on the N. side of Lake Ontario and on the Grand Trunk railway 42 m. E. N. E. Toronto. It possesses two churches and an academy marble-works a tannery a foundry and a considerable general as well as lumber trade. Pop. about 1250

NEWCASTLE a town in British America, New Brunswick, cap. co. Northumberland, on the Miramichi about 15 m. above its mouth. It is extremely and advantageously situated contains a court-house and jail, two churches, and some other good buildings and has nearly 6 fathoms water at its wharves. Pop. about 1000

NEW-CHWANG or **NEW CHINE WANG** See YING WAT.

NEW GLASGOW, a town in British America, Canada East, co. Terrebonne on the Achigon, 80 m. N. Montreal. It contains a Protestant and a R. Catholic church possesses several tanneries and carries on a large trade in lumber. Pop. about 1800

NEW HAMBURG, a town in British America, Canada West, co. Waterloo, on the Grand Trunk railway 65 m. W. W. Toronto. It contains two churches—a Church of England and a German Lutheran; and possesses a pottery a tannery a cloth factory a brewery, and a distillery. The trade is however mostly local. Pop. about 1100

NEW HARMONY, a town in U States, Indiana, on the W. bank, 50 m. above its mouth 140 m. S. W. Indianapolis. It was built by the Harmonists under George Rapp in 1815 and purchased from them, in 1825 by Robert Owen of New Lanark, who after failing in an attempt to establish his so-called social system, sold it to a William Maclure, who converted it into a school of industry. This scheme failing like the others, was abandoned at the end of six years, and the place began to decline. It is said to be again improving and now contains an Episcopal and a Methodist church a large schoolhouse, a working men's institute, a hall used as a theatre, three steam mills, and two distilleries. Lark and whisky are its principal exports. Pop. 325

NEW LEBANON SPRINGS, a vil. U States, New York, in the township of same name, 40 m. S. E. Albany. It contains two churches and a female seminary and is noted for its thermal springs, which have at all seasons a uniform temperature of 78° and contain as their chief ingredients chloride of sodium, chloride of calcium, and carbonate and sulphate of lime. The springs are so copious as not only to supply several baths, but to keep two or three mills running throughout the year. In the township is a large flaxseed establishment of about 800 persons, owning about 4000 acres of land. Pop. 2137

NEW LIVERPOOL, a town in British America, Canada East, co. Laval, on bank St. Lawrence, about 7 m. above Quebec. It contains a R. Catholic church and carries on a very extensive trade in lumber. Pop. about 1800

NEW LONDON, a town and port of entry U States, Connecticut, on bank Thames, 8 m. above its mouth in Long Island Sound, and on the New London, Willimantic, and Palmer, and on the New York and Boston railways. It consists of two portions—an older, which possesses few attractions and a more modern which is regularly formed contains many handsome residences partly for the accommodation of summer visitors attracted by the beauties of the surrounding scenery. Among the public edifices are a handsome granite custom-house, city buildings containing also the post-office, court-house, and other county offices, ten churches, a female academy, a high-school, and a public library. The chief industrial establishments are cotton factories, steam saw-mills, foundries, and machine and nail shops. There is also a building yard, at which a few vessels are built. The

harbour which is 8 m. long, 5 fathoms deep, well sheltered, and seldom obstructed by ice, is one of the best in the States. It is also well defended at its entrance by Fort Trumbull which has been entirely rebuilt since 1840, mounts 80 pieces of heavy ordnance, and can accommodate a garrison of 800 men. The coasting trade and fisheries of New London are important. In 1860 the shipping of the district amounted to 57 490 tons of which the wharves employed 15,066, the cod fishery 4057 and the coasting trade 15 000 Pop. (1860) 10 116

NEWMARKET a town in British America, Canada West, co. York, on the Ontario, Huron, and Lake Huron railway 26 m. N. Toronto. It contains four churches and a grammar school, and has manufactures of stoves and water pumps, and of copper, tin and sheet iron as well as a rope walk a sawery and marble works. Pop. about 1000

NEW MILFORD a vil. U States, Connecticut, on bank Housatonic and on the Housatonic railway 80 m. N. by W. Bridgeport. It consists of wide and well formed streets, and contains four churches a cotton and two woollen factories paper filling and flour mills and several tanneries. Pop. (1860), 5383

NEW ORLEANS [add.] The close of the civil war during which New Orleans was captured and held for a long time by northern troops, has relieved it from the prostrate condition to which it was reduced and to a certain extent caused a revival of the trade which previously existed in it as a port. But it will necessarily be long before its staple trade in cotton can be fully restored. One loss in the war one half of the total crop of cotton passed through the New Orleans market—namely 1 848 312 bales out of 5,699 927 but in 1860 the quantity in the market was only 271,016 bales. Two wants will have to be supplied to the cotton and sugar planters before the production can approach that previous to the outbreak of the war—the want of capital and the want of labour. With regard to the latter it is said that the free negroes in many parts of Louisiana, Mississippi and Texas are coming forward largely to make labour contracts and in many instances are returning to their old masters. This is a hopeful sign. Many of the plantations are being let at low rents and some have been sold or let to men from the northern states, but there appears to be a greater disposition to rent cotton than sugar plantations, the capital required for carrying on the cultivation of the former being much less than that necessary for the successful culture of sugar and the sugar crop is attended with much more uncertainty than that of cotton. The experiment of white labour is being tried on a small scale by means of German immigrants, but it is considered doubtful whether white men can do field labour with effect in the summer months. The city of New Orleans itself has always been considered abroad as being unhealthy. Unhealthy seasons occur and the summer climate is unwholesome to some European constitutions but many foreigners enjoy excellent health in New Orleans all the year round. The great scourge of the city has been the yellow fever, but it has been quite free from it for several years, owing probably in some measure to the quarantine regulations, which are strictly enforced from May to November and have prevented this contagious disease from being introduced from the gulf ports.

The revival of trade in the year 1860 was characterized by quantities of goods being thrown into the market for distribution in the country districts, which had been for four years without supplies of foreign or northern merchandise except such as they received through the blockaded ports. The principal part of this revived trade was in articles received from New York and Boston. The principal trade carried on in British vessels up to the time of the closing of the war was almost confined to what is called the gulf trade. After that vessels arrived in some numbers direct from English and French ports, bringing principally salt, coal, and wine, and receiving in return cargoes of cotton. The number of tonnage, and crews of British vessels entered and cleared at the port in the year 1866 were as follows:—

Vessels.	Revenue.		Customs.	
	Tonnage.	Crews.	Tonnage.	Crews.
296	67 118	3392	278	13,261
			49,261	5,285

The total number of vessels arriving at the port in the same commercial year (ending August 31) was 1449 besides 1491

ships from the interior. The export trade in that on which New Orleans principally relies, and of this cotton constitutes the most important article. The following table exhibits the cotton exports for the past ten years to various countries—

	Great Britain.	France.	North of Europe.	South of Europe, Africa, &c.	Central.	Total.
1850	805,622	264,814	358,012	174,612	26,100	1,530,958
1857	749,400	268,143	346,640	139,619	228,000	1,512,821
1858	1,016,718	266,000	316,804	136,454	184,807	1,920,787
1859	994,800	338,447	325,478	146,905	184,000	1,777,631
1860	1,136,802	318,397	336,133	130,370	203,000	2,124,702
1861	1,129,348	348,579	321,842	118,368	135,170	1,912,867
1862	1,211	478	—	31 1	4,381	27,676
1863	1,079	1,946	—	87 1	29,480	32,750
1864	1,153	4,023	—	307	132,645	136,148
1865	21,826	5,008	492	16	764,604	192,851

The following statistics will also be interesting as showing the effects of the war upon the other principal articles of the export trade of New Orleans during the five years ending August 31 1865: It being presumed that the tobacco export in the preceding year (1860) amounted to 82,690 bbls.—

	Tobacco.	Paper.	Hides.
1861	36,596	62,183	4,781
1862	2,521	30,172	4,781
1863	12,555	90,360	6,000
1864	79	89,254	2,071
1865	1,831	658	21

The subjoined comparative view of the prices per lb. of middling cotton at New Orleans on the first day of each month in the same five years will also have its interest—

	1860-1	1861-2	1862-3	1863-4	1864-5

NEW FLYMOUTH New Zealand cap. prov. Taranaki. New Ulster beautifully situated on the W coast among gentle hills, and watered by numerous small streams, was a thriving settlement, with a granite church and chapel, and several stores, breweries, and mills. These still remain, but the rural beauties which constituted one of its chief attractions, have almost disappeared amid the ravages of war. Many of its peaceful homesteads have been sacked and burned down by the natives; and the careful cultivation which caused it to be familiarly talked of as the garden of New Zealand was necessarily abandoned while the settlers were obliged to concentrate all their efforts on the defense of the town.

NEWPORT, two places, U States.—1 A tn and port of entry Rhode Island, cap. of same name, on Narragansett Bay on the W shore of Rhode Island, 5 m. from the ocean. It has a fine harbor, safe, commodious, and of sufficient depth for the largest ships, and defended by two strong forts—Adams and Wolfen; the one on Benton's Point, and the other on Goat Island. The town, built on a declivity facing the harbor, is partly old, but interesting from its quaint appearance, and partly modern, with many large and elegant mansions. The principal buildings are a dozen churches, a state-house, custom-house, market-house, a public library, a museum, and an armory hall. Both manufactures and trade are limited, and the place depends less on them than on its healthy climate, fine beach, and beautiful scenery, which have made it one of the most popular summer resorts in the U States. Its visitors during the summer season are counted

by thousands; and it is for their accommodation chiefly, and not from any permanent increase of population, that the modern town has been erected. Berkeley the celebrated Bishop of Cloyne resided here for some time and is said to be well-known work entitled the *Hebrew Philosopher*. Pop. (1860), 10,500.—2 A tn, Kentucky, on the Ohio, just opposite to Cincinnati on the Licking, here crossed by a fine suspension bridge. It stands on an elevated plain commanding a fine view and contains an academy a U States arsenal, and several rolling mills and foundries. Pop. (1860) 10,047.

NEW QT A Y a fishing-town in Cornwall in the E. division and parish of St. Columb Minor about 21 m N Truro. This rising and busy place is pleasantly situated on the shore of the Bristol Channel, and has a small harbor protected by a pier, enlarged a few years ago to meet the increase of the pilchard fishery. There are several large cellars or warehouses for curing the fish which is exported to various parts in the Mediterranean. A mine of lead is worked, but with no considerable amount of success; the quality, somewhat resembling granite, is shipped here. The parish church is at St. Columb Minor half a mile distant, but there are places of worship for Baptists and Wesleyans.

NEW RIVER, New Zealand. See Otago in *Supp*. **NEWTON** a tn U States, Iowa, cap. co. Jasper on the Mississippi and Missouri railroad, 35 m. E. by N Des Moines. It contains a large court-house, a bank, five churches, and three schools. A mine of coal has been opened about 2 m from it. Pop. (1860) 1817. In 1860, mid to be 2000.

NEW ZEALAND (lat.), 130° E. Zealand is now divided into nine provinces: Auckland, Taranaki, or New Plymouth; Wellington and Hawke's Bay, in the North Island; and Nelson, Marlborough, Canterbury, Otago, and Southland, in the Middle Island. The South or Stewart's Island is at present unconnected with the organized provinces. By the constitution conferred upon the country in 1852 it is governed in the following manner.—The crown appoints the governor and four judges, but the general government of the colony is vested in the General Assembly, which holds its annual session at Auckland, and is composed of a Legislative Council consisting of about twenty-five leading citizens nominated by the governor for life, and in the House of Representatives which is made up of about fifty members elected by the people every five years. Every man owning a freehold worth £50 or being a householder at a rent of £5 per annum in the country or £10 in a town is qualified to vote for or to be a member of the House of Representatives. The governor is aided and advised by a ministry, comprising the chief officers of state, who are members of the General Assembly. Each of the nine provinces is governed for local purposes by a provincial council consisting of a chief officer called the superintendent, and from ten to twenty provincial councillors chosen by the electors of the province every four years. Every provincial council act has to receive the assent of the governor and the ministry before it becomes law. The civil and criminal laws are the same as those of England and for judicial purposes the colony is divided into four districts and sessions are held by the judges in the chief towns of the provinces. The number of criminal convictions in the supreme court for various offences in 1865 was 284. By the police, magistrates, and minor courts, 12,593 criminal cases were disposed of.

New Zealand while displaying some fine open plains and many undulating champagne districts, may be described generally as a wooded highland country clothed with luxuriant evergreen vegetation. It is of volcanic origin, several of the small elevations being extinct craters, and shocks of earthquakes being still occasionally experienced. The country around Wellington the S. portion of the North Island is chiefly affected by them, but, though within the last twenty years two shocks have been severe enough to involve the loss of three or four lives, the inhabitants do not regard them with much apprehension. Numerous wooded ranges of moderate elevation and three snow-capped mountain peaks, Rangitikei, Tongariro, and Egmont, are found in the

North Island, while a chain of rugged forest ranges, including Mount Cook 14,500 ft. high, extends along the entire coast of Middle Island, from Emily Bay to Cape Fawcett. The North Island contains only two or three moderately extensive plains, but abounds in large hilly valleys, and in sheltered dells and dales. Middle Island, on its W side consists chiefly of wooded alpine regions, but on the E displays fine plains and open tracts, admirably adapted for tillage and pasture. In climate New Zealand is temperate, though it is subject to violent winds and heavy rains but though the rainfall is great, the number of dry days in the year is very large. The following table, compiled from meteorological observations made in 1858 and subsequent years, will show the character of the climate of New Zealand as compared with that of Great Britain—

	Mean temperature of coldest month.	Mean temperature of hottest month.	Mean annual temperature.	Annual fall of rain in inches.	Dry days in the year.
Auckland	51	68	59	45	308
New Plymouth	49	66	58	50	240
Wellington	48	65	57	52	267
Nelson	44	64	55	54	246
Christchurch	47	64	55	51	204
Otago	46	64	55	50	285
London	37	62	50	24	187
Edinburgh	34	59	47	40	306

The soil and climate of New Zealand produce in perfection every English grass, grain, fruit, and vegetable. Wheat, potatoes, onions, apples, plums, peaches and their cognates are excellent in quality and the peach bears profusely as a standard. The vine thrives in the open air a little but only a little better than it does in England while in the gardens of the warmer valleys fruits of a semi-tropical character the pomegranate, citron, orange, and olive, might be raised. These are the native of the Sandwich Islands and the hoppers, a sweet potato are partially cultivated by the natives in sheltered sunny spots of the North Island but under common field cultivation maize will not ripen. Cassava and myrtle, attaining a shrubby size, and various plants, which require the greenhouse in England, flourish through the winter in the open air and generally the few fruits and plants which will grow in New Zealand, but not in England are not those which require more summer heat, but those which require less winter cold. In the colder parts of Middle Island, ice and snow occur in winter; but in the North Island, except on the high mountain ranges, ice and snow are seldom if ever seen.

The natives of New Zealand, called Maories, a people of Malay origin, are supposed to have immigrated from the Sandwich Islands some centuries ago. Spill up into numerous petty tribes, and warring each other by intestine feuds, their numbers have been so reduced that they do not now exceed 50,000 all of whom, with the exception of a few hundreds, are located in the North Island. In personal appearance they somewhat resemble deeply tanned negroes. By Christianity, a great part of them have been converted to Christianity; many of the young can read and write their own language, and the Bible has been largely circulated amongst them. They have acquired in many instances considerable property in stock, cultivated lands, coasting vessels, flour-mills, and spars; a few even have accounts at the banks, and others have taken shares in local companies. In the neighbourhood of the settlements they are adopting articles of European dress, but they cling to a great extent to their old degraded domestic habits. In the island of New Zealand is singularly deficient, as it does not possess a single indigenous animal. With the exception of two or three harmless Murids, a small and now scarce bat is the only four-footed creature found in the islands. The pig however originally introduced by Captain Cook, and straying from the native villages, and breeding in the forests, has become a wild animal in some of the remote districts. The cat, too, and a few cattle, have likewise become wild representatives. Pheasants, partridges, quails, and red and silver pheasants have been introduced, and have so far thrived successfully. There are thirty-three species of native birds, of which the puffeduck and the teal are good songsters. Some

English small birds, and English poultry—the latter now abundant all over the colony—have been imported by immigrants. Insects are about as numerous as those in England and mosquitoes are found, but disappear before cultivation of the crops, the weeds, and the hedges, a flying grasshopper are the three most peculiar species. The open moon garden bed, introduced with signal success, frequently swarms in the woods. River fish are scarce and poor but sea fish are plentiful and good. With mineral wealth New Zealand is liberally supplied. Coal has been found in many parts of the country—in Hild Bay near Nelson, in Auckland, in the W coast of the Buller River on the W coast of New Zealand while the whole of the mountainous peninsula, forming the N.W. corner of this province, appears to be stored with coal. Iron is found in many localities, and some of the rocks on the Otago shore are powerfully magnetic. The beach at New Plymouth for several miles is formed of fine iron sand which adheres to a magnet in crystallized particles. Copper has been worked on a small scale at the Kaitake and Great Barrier Islands, near Auckland, and chrome and copper are derived from the Dun Mountain mine at Nelson. Gold has been found in the Coromandel country near Auckland, and in Nelson province, as well as near the Buller River on the W coast of the same province. But the chief discovery of the precious metal have been in the province of Otago, in which vast districts have been found rich in auriferous deposits. The first discovery was made in June, 1861 and produced a rush of immigrants from Australia and elsewhere, Otago the capital, suddenly became a large and populous place and many thousands of gold-seekers rapidly spread themselves over the auriferous districts in two years 700,000 oz were obtained, worth nearly three millions sterling. In the year ending March 31, 1868 the returns showed the following amount of gold exported from the various ports in the colony—

	oz
Auckland	4,508
Nelson	14,908
Hawke's Bay	2,171
Nelson	3,250
Hokitika	387,840
Greymouth	108,426
Lyttelton	1,084,026
Dunedin	210,488
Invercargill	5,318
Total	674,690

Trade and Commerce.—The total value of the imports and exports from the colony including bullion and specie, in the years 1861, 1862, and 1863, is thus given—

	1861	1862	1863
Imports	£1,493,511	£4,702,082	£7,079,574
Exports	1,370,547	3,423,794	8,443,405

The principal and other articles of which these imports and exports were composed, with the values of these, are stated in the following table:—

	1861	1862	1863
FACTORIES AND ARTICLES.	£	£	£
Animals	258,773	453,516	602,816

Bluff Harbour	—	—	67	24,360	135	21,567	—	—	45	27,440	138	15,000
Total of principal and other ports	290	177,008	513	567,350	1154	419,806	346	206,460	735	308,547	1094	504,088

Of these vessels entered in 1863, 990 of 547,465 tons, and cleared, 725 vessels of 319,473 tons, were British vessels.

The total amount of the gross revenue and expenditure of the colony is thus stated for the years 1861, 1862, and 1863.

	Revenue.	Expenditure.
1861	£291,464	No return.
1862	1,192,000	£1,118,117
1863	1,599,456	1,767,025

The revenue of 1863 was derived from ordinary sources of which the customs duties (£225,051) were the principal-producing £748,872; and from 'territorial' sources—the sale of crown lands (bringing £294,000) being the principal-producing £224,405 the remaining £118,025 arose from 'residential' assessments and other payments. The public debt in the year 1863 comprised £200,000 on account of the general government, and £689,750 on account of the provincial governments, making a total of £1,289,750 and involving an annual charge for interest and sinking fund of £68,535.

The area of New Zealand is estimated to be 100,259 sq. m.; and the population in 1861 was found to be 100,516, including 7294 military and 1117 half-castes but exclusive of about 2000 gold miners, and of the Maories, who numbered 54,649. On Dec. 31, 1863, the estimated population was:—

	Male.	Female.	Total.
European	106,978	54,879	161,857
Military and their families.	6,881	1,708	11,589
Total	213,859	56,587	270,446

In December 1864, the European population, exclusive of military had risen to 175,124.

In 1861 the number of immigrants was 13,523; in 1862 34,220 and in 1863, 45,726. Of the last number no less than 23,855 entered the gold-producing provinces of Otago (with Southland). Against this, however, must be set the number of those who left New Zealand during the same period; this number was in 1861, 41,171; in 1862, 18,999; and in 1863, 10,670; the largest proportion to seek work being from Otago.

A great obstacle to the progress of prosperity of the colony has arisen in the distribution of cases of the native tribes, who, representing the sale of certain lands which they had made to the New Zealand Company began to demand satisfaction of troops and police violence, and to begin to take upon rebellion. The friendly tribes which with the

settlers and the military, and a long and bloody warfare ensued, the available troops being insufficient to effectively suppress the rebels. The settlers were driven from their holdings, and many left the country, and trade, immigration, and agriculture were stopped. More than once the hostilities appeared to be quelled, when fresh outbreaks occurred. The Waikato district in Auckland province, Taranaki, and several districts in Wellington and Hawke's Bay have been the most disturbed. But, after the native confederation in these parts seemed to have been broken up, a fresh outbreak took place in October, 1866, in the neighbourhood of Napier, in Hawke's Bay, which was terminated by a successful attack upon the rebels' pah or fort at Omarama, on the Tutakahi River; since which the country appears to have become generally peaceful.

NEYRIZ, a town, prov. Para, on the road between Shiraz and Kerman, and about 7 m. from the E. extremity of the lake of same name, called also Lake Bahkagan. It

occupies a considerable space with its gardens and houses, possesses three adjacent forts, a paltry bazaar and three caravanserais, and is inhabited by about 1500 families. Its trade is insignificant.

NGALLA, a town, Western Africa, Borno, prov. Kotoko, near the S.W. extremity of Lake Chad. It stands on an elevated terrace, surrounded by clay walls, and composed of clay houses, among which stood forth impressively the governor's palace, presenting, with its immense substructure and towering walls, all the appearance of a citadel. The town, however, tells only of a bygone prosperity and a present decay. Several of its quarters are in ruins.

NGAMI [add.] lake, S. Africa, in the Batiana country, on the N. frontier of the Kalahari Desert, between lat. 20° 25' and 20° 40' S. and lon. 25° 21' and 25° 3' E. It lies between E.W. and W.S.W., at the height of 8700 ft. above sea level and is of somewhat irregular shape, narrow towards the centre, and thence bulging out on both sides so as to form two nearly equal ovals, the one terminating at its W. end, and the other at its E. extremity. Its greatest length is 57 m., its breadth near the centre, where narrowest, does not exceed 4 m., but towards the W., where widest, about 12 m., making the average breadth about 6, the shortest about 3 m., and the whole area about 324 sq. m. In the N. shore is low and sandy, without trees or brush, or any other kind of vegetation; but about a mile behind the country becomes densely wooded, chiefly with various species of acacia indigenous to S. Africa, and an occasional knobel growing alone there. The S. shore is so closely fringed along the water line by belts of reeds and rushes, as to be accessible only to a few places, or where the native cattle or other animals have broken through. Solidified this fringe outwardly the ground rises considerably. The W. shore is also somewhat raised. The greatest depth of water is towards the E. it is shallow. The principal, and indeed the only known feeder of the lake, is the Foge, which enters it near its E. extremity and though not more than 90 yards wide, is deep, and when in flood discharges a large volume of water. Its outlet is the Zang, which issues from its E. extremity at Bannin town, so called because the chief of the tribe has there fixed his residence. Where it thus issues the Zang is about 800 yards wide, and has a current so gentle that the eye is unable to perceive it.

NGAN-KING, a town, China, prov. Kiangsi, 1.8 m.

Ngau-tsing, 145 m. N.E.W. Nankin. Its handsome people of eight stories, rising out of a substantially built isolated stone fort, and its massive walls give it an imposing appearance from the river. When Lord Elgin passed up the Yang-tze-Kiang this place was in the hands of the insurgents, with the imperialists were in the immediate vicinity. His lordship was anxious to move on peacefully; but the insurgents, either because otherwise disposed, or from mistake, as they afterwards alleged, fired a shot at the leading British vessel. This was at once resented; and the whole of the British ships, at once opening their fire on the fort, compelled the garrison to scamper out of it into the open country. Before the British reached the last angle above the fort the insurgents repeated the offence in a more aggravated form, by firing two other shots in rapid succession. The only object was to increase their excitement by not only molesting the battery but also throwing some balls and shells into the heart of the town. This unexpected outburst made it impossible for any of Lord Elgin's suite to visit the town and hence our only knowledge of it is derived from the account of Lord Amherst's embassy. According to Mr. Ellis, who explored it in 1816 the shops are not so good as at Woohoo and the streets are unusually narrow. The best shops he saw were those for the sale of horn lanterns and porcelain and he would have had "little difficulty in buying out a large sum in articles of all kinds—such as necklaces, old china, agate-cups, vases, ornaments of cornelian and other stones, various specimens of carved work in wood and metal." The fort of Ngau-tsing, in its hands, could easily prevent large vessels from passing it, as they are obliged in order to find the deep channel, to come within sixty yards of the muzzles of the guns.

NGAUNDERE, a tn. Western Africa, Adamawa, 150 m. S. by E. Tola. It is surrounded by a low rampart, and consists entirely of huts of mud, with the exception of the governor's house and the mosque, which are unpretending buildings—the one of clay and the other of mud and clay. There is a daily market.

NGEGIMI, a tn. Western Africa, near the N.W. extremity of Lake Chad, is a famous place that has fallen rapidly into decay, and now consists of detached conical huts constructed without any regard to comfort. It has suffered much from its position on the boundary between Bornou and the Tuareks. The king of the former as if it were beyond its dominions, withheld from it the necessary protection while the latter are continually making predatory incursions into it. Many of the inhabitants have been carried away into slavery and the remainder driven away by its sandhills have built a new village on the slope of the adjoining sand hills.

NGOENU, a tn. Western Africa, Bornou, in the vicinity of the capital Kukawa. It consists of light but large and commodious huts; there not being a single clay dwelling with the exception of a residence belonging to the sheikh. In the winter of 1854-5 more than half of the town was destroyed by water and a deep open lake formed to the S. burying a large extent of what had formerly been a fertile plain. The most probable cause of the catastrophe was a subsidence of the plain to the extent of several feet.

NGURUTIA, a tn. Western Africa, Bornou, about 80 m. S. by N. Kukawa. It lies in an extensive plain, is well shaded with trees, and though once a large and celebrated place, shows symptoms of decay. Mr. Richardson the traveller died here, and is buried under a large, wide-spreading fig-tree.

NIAKZO, or **KYKUMU**, a tn. Turkey in Europe, Molavia, under of same name, beautifully situated in a wild and romantic district, 65 m. W. by N. Jassy. It occupies a rugged height above the Neris, an affluent of the Melevis, contains the ruins of a fortress which belonged to the knights of Malta, and has in its vicinity a large monastery which is occupied by about 600 monks, and possesses a wonderful image of the virgin in solid silver.

NIAK, or **NIA** (old), an island, Indian Archipelago, about 55 m. off the N.W. coast of Sumatra, length, N.E. to S.W., about 65 m., breadth about 12 m., area, 1300 sq. m. The entire consists of ranges of hills, nowhere rising more than 500 ft. above the sea, and of intervening valleys. Though without any indication of volcanic origin,

it is subject to violent earthquakes, one of which in 1848 swallowed up a hill and a village. The inhabitants, of Malay extraction, and taller than those of Sumatra, are a simple, mild, and primitive agricultural people. They are skilled in irrigation, and raise good crops of rice, cotton, and other useful products. Nias, though ethnically independent, is included by the Dutch among their possessions. Pop. computed at 160,000.

NICOLOAS (St.), a harbour British America, 3 m. N.E. of the cape of same name, on the N. shore of the strait of the St. Lawrence. It consists of a narrow inlet, only 180 yards wide at its entrance, and nowhere within exceeds 380 yards, but is so secure that a vessel might be held on shore and repaired as if she were in dock. This security it owes to the granite hills of 500 to 700 ft. by which it is inclosed its greatest depth at low water is 9½ fathoms but, owing to a bar, not more than 12 to 17 ft. can be carried in at high water.

NICHOLSON (Port) New Zealand. See **WALLINGTON**. **NICOLET**, a tn. British America, Canada East, cap. on and on the river of same name 72 m. N.E. Montreal. It contains a Protestant and a R. Catholic church, a large R. Catholic seminary or divinity hall, several schools, a brewery and some general trade. Pop. about 1000.

NICOPOLI (old), a tn. Turkey in Europe, Bulgaria, 10 miles and 96 m. E. S. E. Widin at the confluence of the Orma with the Danube. It is pleasantly situated between steep mountain heights, and being surrounded by gardens, occupies a large space, extending partly along a hill which overlooks it, and is crowned by a castle, once of great strength, but now in a very dilapidated condition. From this hill the wall stretches downward till it reaches the Danube. Nicopolis is the see of a Greek bishop, and the great entrepot for the goods brought from Valachia. An excellent wine is grown in its environs. A great and decisive battle was fought here, in 1806, between the Christians under Sigismund of Hungary and the Turks under the Beyazid I. The former were defeated. Pop. about 13,000.

NIEGATA, a tn. Japan on the W. coast of the island Nippon nearly opposite to the island of Sado. It is one of the ports which by Lord Elgin's treaty with the Japanese were opened for trade in 1860. Scarcely anything is known of it; but from the number of masts of junk seen in its harbour, it is understood to be a place of extensive trade.

NIEMBROW, a tn. Austrian empire, Galicia, circle Zolkow 80 m. N.W. Lemberg; with a sulphur spring and a garden establishment in a fine park, a paper-mill, and extensive manufactures of linen. Pop. 1750.

NIEPOLOMICE, a tn. Austrian empire, Galicia, circle and 9 m. N.W. Boshnia, cap. dist. of same name, on the Vistula with a castle, which was a frequent resort of the kings of Poland, and is now partly used as a hospital and 3294 inhabitants.

NILSHIN, a tn. Russia, gov. and 85 m. S.E. Tobolsk, cap. circle of same name, on the Ob. It contains a cathedral and numerous other churches, a monastery, a gymnasium and gymnasium two schools (one of the for Greeks, many industrial establishments, and a large trade chiefly in tobacco. Pop. 17,981, many of them Greeks.

NIKOLAYEVSK, a tn. Russia, gov. and about 100 m. S.E. Sumara, cap. circle of same name, on the Great Irtysh. It has two churches a circle school, and some trade in corn. Pop. 3500.

NIKOLAIABADT, a seaport to Romsa, Finland, on a small bay in the Gulf of Bothnia 355 m. N.W. St. Petrusburg. It has a church of stone, ironworks, and high-wood manufactures of leather and pitch, and a trade in these articles, fish and timber. Of late years the harbour has been much injured by the formation of shoals and sandbanks. The town was called Wam or Yaw until 1866, when it received its Russianized appellation. Pop. 3700.

NIKOLAREVSKAJA, a tn. Russia, gov. Don Cosakowsk, 1 bank Don; with a yearly market and 8661 inhabitants.

NIKOLAYEVSK, a tn. Russian empire, St. Albion, on a wooded plateau above L. Jamk Anker near its mouth in the N.W. of Kainia Strait, which connects the Gulf of Finland with the Sea of Okhotsk. It was still fairly supplied by Sofyavsk, the most important Russian station on the river is defended by four batteries, and contains chiefly of 350

shedding-houses arranged in a circle and three side streets. The houses are of wood, with strong doors and windows, and well arranged within. The principal public buildings, those of war, are the church, with five chapels—one large and four small; the 'chancellery,' governor's house, pay-office, police-office, hospital, and school for 'girls' and soldiers' sons. About 2 m. W. of the town the government has a country residence, seated on a prominent cliff commanding a very extensive view. Some Russian peasants established in the neighbourhood supply the town with eggs, poultry,

NIGOLAYEV.—From the Okhotsk Station.

and butter. The vicinity of Nikolayevsk being suited for agricultural purposes, a Russian colony has been established in villages which extend about 70 m. farther Maritime, and where oats, barley, rye, and especially vegetables, are cultivated with success. The trade of the port in 1859 amounted in imports to 294,076, forming the export of eight vessels, carrying 1684 tons. Pop. (1860) 3262, of whom 1518 were soldiers and sailors, and only 200 families.

NIKOLSK, a to. Russia, gov. and 150 m. N. E. Vologda, cap. circle of same name, on the Yug. It has two churches, one of them a cathedral, a circle and a parish school, and a charitable institute. The chief employments of the inhabitants, both of the town and circle, are tanning-hairing and the tanning of furs. A small haven at the confluence of the Yug and the Pechora is an important entrepot for goods conveyed to and from Archangel. Pop. 1192.

NIKOPOL, a to. Russia, gov. Ekaterinoslav on the Donetz; with a church, a parish school, a charitable endowment, several colonies of foreigners, and 5235 inhabitants.

NILES, a to. U. States, Michigan, 146 m. W. by S. Detroit. It stands in a pleasant and fertile agricultural district, and contains six churches and a number of mills and factories. Pop. (1860), 1636.

NILAYAKILLI, or **NILAYAWALLA**, a to. on a lagoon on the N. W. coast of Ceylon, 5 m. N. by W. Trincomalee. It contains a rest-house, built on the wreck of one of those substantial edifices which furnish a monument of the former process of the Dutch, and amid to be gathered from the wreck of a ship stranded in the vicinity, and is the great station for the supply of salt to the eastern provinces. The salt-pans extend for a mile along the E. shore of the lagoon, and are formed simply by levelling and embanking the clayey soil, which is strongly impregnated with salt. The process of manufacture is simple. The sea-water, raised into one of the pans by a wooden pump, carries down a triangle, it runs off successively into a second and third pan. When in this way it is supposed to have parted with all earthy impurities, it is left to evaporate by exposure to the intense heat of the sun. The salt is at the present description, and might be produced in quantity sufficient to supply the whole island of India, did not policy suggest that salt should come from the important source of Indian revenue. At present the price of salt in India produces only about 35,000 hundred annually.

NIMAN, a river, Russian empire, Minusinsk, formed by several streams from the Kays Mountains, flows S. W., and is joined near Burdakh by the Bureya, which it joins in volume. After receiving the Bureya, its principal tributary, it has a width of 160 yards. It flows through a valley bounded by hills which descend steeply towards it; but after its junction with the Bureya, the valley country is succeeded by extensive swampy prairie.

NIMBURA, a to. India, Rajputana, cap. pergunnah of same name, 16 m. N. W. Narmach, is surrounded by a rampart with towers, and has a court-house, a mosque, some small temples, and a remarkably fine well, with a noble staircase, and a verandah of rich Saracenic arches round the well about half way down. The pergunnah has an area of 172 sq. m. and an estimated revenue of £14,000.

NING-KANG-JOO, a to. China, prov. Chekiang on the Ningpo, above the town of this name, at the point where the boat-navigation ceases. It is a place of no great extent, but has a fair which being held at the time when Mr. Fortune visited it, is thus described by him. The streets of this town were now crowded with people and the whole scene resembled one of the fair of a country town in England. In addition to the usual articles in the shops, and

an unusual supply of fruits and vegetables, there was a large assortment of other things, which seemed to be exposed in quantity only on a fair-day. Various articles, woven by native handlooms in the country were abundant, were made from a species of juncus, and generally used for clapping upon clothes of all kinds, both new and second-hand, porcelain and wooden vessels of all sorts, toys, cakes, sweetmeats, and all the common accompaniments of an English fair. Various textile fabrics of interest were abundant being produced in large quantities in the district; hemp jute, China grass (so called), being the hark of the *Urbion* area, and the juncus already noticed. A great number of the wooden vessels were made of the *Cryptomeria japonica*, which is remarkable for the number of beautiful rings and veins, which show to great advantage when the wood is polished. The staple summer crops of the district, the soil of which in the valleys is a light rich loam in the highest state of cultivation are juncus, jute, China grass, and a gigantic species of hemp from 10 to 15 ft. high, which yield the textile fabrics mentioned above as sold at the fair; the staple winter crops are wheat, barley, the tuberosa oil-plant and other kinds of vegetables, among them a *Milnesia* plant, probably a *Perilla*, grown for its buds, which are used in medicine. Its flowers, of a clay greyish-white, are not ornamental.

NINGPO [1844]. Since the opening of this port in 1844, its internal and external trade has increased, without much increase, and in 1851 all legitimate commerce was suspended during its occupation by the Taiping rebels. As the centre for the province of Chekiang it commands a region rich in the Chinese staple products, tea, silk, and raw cotton. But in consequence of the defective water communication with the districts in which these articles are produced, only a portion of the quantity raised is shipped at this port, the bulk being forwarded to Shanghai. In 1855 the quantity of silk imported amounted to 1914 piculs, of 135 lbs., valued at £215,225; green tea, 719,623 chests, 4745,077 and cotton, 23,567 piculs, £216,607. Besides the usual imports of rice and other manufactured goods into Chinese ports, rice, oil, sugar, and sugar from the principal towns on the coast about Ningpo, as follows:—In 1844 rice was imported to the extent of 1,011,148 piculs, valued at £1,313,222; but this was exceptional, in consequence of the existing devastation of the province, so that the quantity was reduced in 1846 to only 232,443 piculs, valued at £256,870. In 1847 upon the

imported to the extent of 2011 piculs, valued at \$508,146; and in 1885, 2380 piculs, of about the same value, in consequence of the price falling. On the other hand, sugar rose in price, but was less in quantity—149 924 piculs in the former year, and 184,847 piculs in the latter, the value respectively being \$281,674, and \$208,718. The foreign tonnage of the port decreased from 296,911 tons in 1864, to 253,247 tons in 1885.

Although some of the missionaries have their mission-houses within the precincts of the walled city, yet the bulk

of the foreigners are located in an old village on the opposite bank of the River Yung, facing Niagao. Here are 21 mercantile firms, employing 36 persons, of whom, in 1854, 23 were British. The foreign maritime customs have 15 employes, of whom 11 are British; and the customhouse has 17 constables. There are also British, French, and American consulates; and 5 mission establishments, two of which are English, two are American and one French. In addition to these civil and religious foreign residents, there are two military contingents of native disciplined troops quartered in

the city under the command of English and French officers, numbering 17 of the former, and 6 of the latter besides 4 British officers in a revenue cutter, making a total foreign population of 117 persons. Besides having suffered from the Taiping occupation, and intercourse with foreigners in southern land traffic, this port at its approach from the mouth of the river to the Chinese Islands is infested with pirates, who are bold enough to attack and plunder foreign ships even in the daytime. The Chinese government have tried ineffectually to suppress this maritime pest, and British gun boats are always cruising on the station to protect peaceful traders of all nations. Notwithstanding these and other drawbacks to its prosperity, Ningpo is recovering rapidly from its depressed state, and the industrious inhabitants are increasing the produce of the surrounding country. (*Consular Reports Mosman, MS. Notes*.)

NIO is a Greek, somewhat Cyclades, esp. and on bay on the W shore of the island of same name, with a justice of peace court, an Hallenist and a parish school, and a good harbor. Homer is said to be buried here. Pop. 2500.

NIOBARRA or **ROBERTS WATERS**, or **L'EAU QUI COULE** a river U States, rises among the Black Hills, Dakota, and flowing E. through the N. part of Nebraska, enters the Missouri at Holbrook; its total length is 650 or 600 m.

NIPISGUIT a river British America, which rises in the N.W. of New Brunswick, near the watershed between the basins of the Gulf of St. Lawrence and the Bay of Fundy, flows N.E. and enters Nipisguit Bay the largest of the arms of Chaleur Bay, after a course of about 60 m. It forms a delta about 3 m. long by 2 m. wide, and is well sheltered. At the head of this basin the town of Bathurst is finely situated. About 14 m. above this town the Nipisguit, in consequence of rapids which prevent the farther advance of the tide, ceases to be navigable.

NISGA, or **Niss**, a N. Turkey in Europe, in the N. of Turkish Georgia, esp. capital and a river of same name, lat. 48° 34' N., lon. 63° E. It is the birthplace of the ancient Caucasian, and the seat of a general governor, is defended by a Citadel and contains eleven mosques and two Greek churches. There are thermal springs in the vicinity. Pop. 12,000, of whom 8000 are Musulmans.

NIU-CHWANG a tn. China prov. Liantung, on the Lau-ho about 30 m. above its mouth in the N.E. of the Gulf of Liantung. Scarcely anything is known of it, but it is reported to be of considerable extent and commercial importance. This is confirmed by the fact that its proper port, situated 3 or 8 m. within the bar of the Lau ho, is itself a large place, and gives evident signs of the existence of an extensive and thriving commerce in quiet times. Its streets and roads are indeed masses of mud and filth, and its houses, mostly of one story high and built of stone and subterranean brook, with oiled paper as a substitute for glass in the windows have nothing to boast of, but supplies are plentiful and there are large quantities of grain stored in spacious enclosures. A large supply of hemp, it is said, can be always purchased and coal may be procured at Niu-chwang though 30 tons furnished to H.M.S. *Atalanta* when she anchored here in 1855, proved of very inferior quality. In the channel used by the large junks there is a depth of 4 to 5 fathoms over the bar of the Lau-ho. Niu-chwang is one of the future coadjutors open to European commerce. In the opinion of Captain Richard Osborn What Kurrahee is with respect to Bala-chistan, Afghanistan, and Bokhara, the port of Niu-chwang will one day be to the great region of Manchuria and Eastern Tartary.

NIZANKOWICE a tn. Austrian empire, Galicia, circle and 9 m. S. Przemysl esp. dist. of same name; with a castle pictorially situated on an island in a small lake. P. 1200.

NOCHISTLAN, a tn. Mexico, state and to the W. of Oajaca on the road from it to the capital. It stands in a beautiful district, in which wheat is largely cultivated, and was a thriving populous place till war laid it waste. The only remarkable building is a handsome church, which once belonged to a Dominican monastery. Pop. about 1500.

NOELBUNG a tn. India, Oude, 10 m. W. Lucknow, in a large walled place, with a tower in a handsome style than usual, and a considerable number of well-supplied shops. Though the walls, and many of the houses give indications of decay the inhabitants seem to be thriving.

NOGARA a tn. Italy, Venetia, prov. and 30 m. S. Verona, on the Tethera, has a dilapidated castle, an old parish church with these towers, and a modern church. Pop. 2460.

NOGAROLE, a tn Italy Venetia, prov and 11 m. S. by W Tarvis; with a church containing an altar-piece by Bassano and an old castle.

NOGOCN, a tn. Austrian empire, Hungary, co Somogy 30 m. N.N.E. Kaposvár; with manufactures of spirits, and a trade in corn, wine, and tobacco. Pop. 1198.

NOGORA, a tn. India, Sindh's Dominion, on the N bank of the Indus, here crossed by a stone bridge of seven arches, 11 m. N.W. Gwadar. Within the inclosure of a pleasure-ground in the vicinity is the tomb of Gonna Begum celebrated for beauty, wit, and poetical genius. She was the wife of a victor of two successive Mogul emperors. The inscription on the mausoleum is 'Alai Gonna Begum, 1180 (175).

NORFOLK [add] a tn and port of entry U States, Virginia, on the N bank of the Elizabeth, 68 m. S.E. Richmond. It lies low and is irregularly laid out, but consists on the whole of wide streets, and houses substantially built of brick and stone. Among the principal buildings are the city-hall, with a capitol 110 ft. high, a court house and jail, a new custom-house, fourteen churches, a military academy and a mechanics institute. The harbour which is safe and easy of access admits the largest vessels, and is defended by the two forts Calhoun and Monroe. The foreign commerce exceeds that of any other place in the state. A branch of trade which has become important of late years is the supplying of the northern states with early fruits and vegetables. The average annual value of these is estimated at nearly £100,000. At Gosport in the vicinity, there is a U States navy yard with a dry-dock constructed of granite at an expense of £180,000 and also a marine hospital. There is also in the suburbs a cemetery beautifully laid out, and adorned with cypress-trees. Pop. 1860 14,605 of whom 3280 were slaves.

NORMAL, a vil. U States Illinois, co M Lean on the Central railroad where it is intersected by the Chicago Alton and St Louis railroad, 61 m. N.E. Springfield. Here is the state university a large and prosperous institution, with 480 students, the building cost £100,000, and it is endowed with a similar sum. Pop. 800.

NORRISTOWN, a tn. U States, Pennsylvania, on the N bank of the Schuylkill and a railway connecting it with Philadelphia, from which it is 15 m. S.W. It consists of regular and well paved streets, and houses mostly and substantially built of brick and native marble, and contains a new court house erected at an expense of £40,000—thirteen churches four large public schools, a public library a county jail, several large cotton and woolen factories, rolling mills foundries, ironworks, machine-shops, saltpetre, oil-mills, &c. The trade, furnished with new facilities by the improved navigation of the Schuylkill is active and increasing. Pop. 1860 8848.

NORTHAMPTON [add] a vil and township, L States, Massachusetts, cap. co Hampshire, on the Connecticut River railway 70 m. W Boston. It stands on elevated ground in a beautiful country with two mountains fully in view contains county buildings, seven churches, a collegiate institution and other excellent schools, cotton and paper mills, tool and silk factories. It is connected with Haverhill by a fine bridge across the Connecticut. Pop. 1860 7678.

NORTH CORNWALL, a town or tn British America, Arctic region 1 m. W. railway 77° 32' N, lon. 56° 12' W. Sir Edward Belcher who discovered it, and gave it its name in honour of the Prince of Wales on Duke of Cornwall had no opportunity of exploring it fully, but reached a station within it which had a height of not less than 800 ft., and was about 5 m. distant from his W point. It is composed of friable sandstone and sand, interspersed on the surface with boulders of granite.

NORTH SAN JUAN, a vil. U States California, co Nevada, near the Middle Yuba River, 12 m. N.W. Nevada city. Its principal resources are gold mines grapes are also cultivated with success. Pop. including Chinese, about 1500.

NORTH MERRILL, a tn. group of numerous lakes, Australia, forming part of the Great Barrier reef, and extending along the E coast of Queensland from 15 m. N.E. of Cape Townshend to about 18 m. N.N.E. Cape Palmerston. Fringing the north-western coast, and the largest of the group, is only 2½ m. long and nearly as broad. It rises into two peaks, connected by a narrow low neck of swampy ground,

and is partly covered with long grass over loose stones, and a few stunted trees. The S. peak, the loftier of the two, rises to the height of 1035 ft.

NORTHUMBERLAND STRAIT, British America, separating Prince Edward Island on the N from New Brunswick and Nova Scotia on the S is 100 m. in length, and near its centre, where it is narrowed by the projection of Cape Tormentine, the S.E. extremity of New Brunswick is only 5½ m. wide, though it widens out on either side to nearly 20 m. The navigation being considered dangerous it is usually avoided by large ships.

NORWICH [add] a tn. U States, Connecticut, at the head of navigation of the Thames, and on the Norwich and Worcester and the New London, Willimantic, and Palmer railways, 30 m. S.E. Hartford. It consists of three distinct parts—Norwich proper or Chelsea Landing the Town, and Greenville. The first is picturesquely situated on a steep hill between the Yantic and Shunket which have united in forming the Thames, and consists of houses which, being mostly white, and seated on terraces rising one above another have a conspicuous and attractive appearance. The Town lies to the N.W. in a pleasant valley enclosed by hills; Greenville lies to the N.E. The principal buildings are seventeen churches, county offices a free academy built and endowed by voluntary subscription to the amount of £27,000 and numerous public schools, which including the academy, were attended in 1860 by 2886 pupils. The manufacturers consist chiefly of cottons and to a less extent of woollens, paper and machinery. The Yantic about 1 m. above its mouth, is contained into a narrow channel and rushing over a rocky bed makes a sheer descent of about 50 ft. Pop. 1860 14,062.

NORARFE, a tn. India, pread Bombay dist and 18 m. N Surat, 1 bank Poona 8 m. above its mouth in the Gulf of Cambay. It stands in a pleasing and highly cultivated district and contains about 15,000 inhabitants many of whom are Parsee weavers, and others artificers in copper, brass, iron, and wood. The trade consisting and foreign in grain, coarse sugar, wool and other articles, the produce of the country is considerably.

NOSS BE, an isl. S Africa, off the N.W. coast of Madagascar belonging to France. It is in the form of an irregular parallelogram about 14 m. long by 8 m. broad has a mountainous surface the culminating point, Loneuhé near its centre, attaining a height of above 1800 ft. and evidently appears, both from its general structure and numerous extinct craters, to be of volcanic origin. It is well watered and well wooded and so fertile as to maintain a population of 10,000 souls. The harbour formed by the N. shore of Noss BE the N.W. shore of Noss Kumbia and the small island of Tadi Keli, has all the requisites of a complete harbour of refuge, being well sheltered, of sufficient depth to float the largest vessels, and capacious enough to receive whole fleets. The chief centre of population is Hallerville, which stands upon a flat about 30 ft. above the sea and is the seat of government.

NOTRE DAME DU PORT, a tn. British America Canada East, co. Temiscouata, r bank M. Lawrence, 90 m. N.E. Quebec with a R. Catholic church, schools, a plough-factory and a flour mill. Pop. about 1000.

NOVGOROD-VOLANSK, a tn. Russia, gov. Volhynia, cap. circle of same name, on the Buzh 60 m. N.W. Zaturin. It has five churches, a circle and a parish school a charitable institution, and various manufactures. At the village of Koritsa, in the circle, there is a summary and a porcelain factory. Pop. 6855.

NOVI, a tn. Austrian empire, kingdom of Croatia and Slavonia co and 22 m. S.E. Fiume, cap. dist. of same name, on the shore of the Strait of Morlacca, with a collegiate church a suppressed Pauline monastery a castle, and a barbour at which some trade is carried on. The Bishop of Seggy usually resides here. Pop. 3790.

NOVIBAZAR, a tn. Turkey in Europe, Bosnia, on the S. frontier of Servia, near the source of the Ibar, an affluent of the Morava. It is the seat of the kaimakan possesses a citadel in a very dilapidated state and thermal springs; has annual fairs, which are much frequented, and carries on a very extensive trade, being advantageously situated at the point where five roads meet. Pop. about 15,000.

NOVOI USEN, a tn. Russia, gov and 180 m. S.E. W.

Samara, cap. circle of same name, on the Great Ussu. It is very irregularly built, and consists for the most part of wooden houses, occupied by inhabitants who are employed partly in fishing and agriculture, and partly in manufacturing. To the latter belong distilleries and numerous tallow melting houses. The annual fair which lasts nine days and three weeks, is sometimes attended by about 10 000 Karghis of the Inner Horde. Pop. 6055

NOVO-MOSKOVSK [add] a in Russia gov and 20 m. N E Ekaterinoslav, cap. circle of same name, on the Samara. It has six churches, a circle school, two charitable institutes, and an important annual fair which lasts nine days and nine nights 9729 inhabitants

NOVO-REDOBO a Portuguese presidium or fort, S.W. Africa. Kinsbunda country territory Hambe, on the S or 1 bank of the river of that name, near its mouth in the Atlantic, 50 m. N Benguela. It consists of a fort built at the end of last century and of a village containing about 300 houses. The fort crowns the summit of a pyramidal hill, in the vicinity of the sea, and is provided with nine guns mostly brass and sundries, of which however scarcely the half are fit for service. The walls are in good condition. The village lies to the E. stretching irregularly and is jumbled over steep hills and along deep valleys. Only a few of the houses are built of stone, and of two stories; and all of these, lying beyond the guns of the fort, receive no protection from it. The best edifice is the church. Among the inhabitants are a few Portuguese but the majority consists of mestizos and blacks, who devote themselves entirely to trade. This, while slaves formed its staple is said to have been very profitable but now that it is confined to ivory wax, gum-resin and orchid yields such poor return that both the wealth and the population have rapidly declined.

NOVOSIL, a in Russia, gov and 80 m S. by W Tash, cap circle of same name r bank Susha. It has three churches, secular and religious schools for the circle and parish, a charitable endowment, and manufactures. Pop. 3042

NOVO-SUTKOV a in Russia, gov and 75 m N N E Tobolsk, cap. circle of same name on the affluent of the Sey. It has three churches a circle school a charitable endowment, and numerous manufactures and 6319 inhabitants

NOWAGORA a in Austrian empire Galizia circle and 7 m N W Cracow with productive mines of calamine and 1100 inhabitants.

NOWANUGUR, a in India, Guyarat peninsula Kaitry war on a creek on the S shore of the Gulf of Cutch. It is a considerable place, near 4 m in circuit, and has manufactures of fine cloths which are celebrated alike for excellence of fabric and beauty of dye, and find a ready sale in the Arabian and African markets. To the N of the tn. is an indifferent pearl fishery.

NOWOSICHTEA a little village, Bukovina, on the Pruth, remarkable as the point where the three states of Austria, Russia, and Turkey meet.

NUBLE, a prov. Chili, formerly part of that of Concepcion, but constituted into a separate intendencia or province, by decree of the general government Feb. 2, 1845. It is bounded N. by the river Puyumazun, S. by the Itata, which divides it from Concepcion, E. by the Andes and W. by the great road leading to Santiago. This district is watered by numerous streams descending from the Andes; the chief of which are the Itata also called the Chillan, and the Nuble—a deep and rapid river which, after receiving the waters of the former pursues a westerly course through deep ravines overhung with fine trees and ultimately discharges itself into the Pacific, forming an almost impassable bar. The soil as everywhere in the south of Chili, is of the best description and highly productive. The principal products consist of grain, wine, and cattle, which are sent in large quantities to the north. The climate, some would rather than that of Concepcion, is equally healthy and some inferior in its adaptation to the various branches of rural economy. Good roads and a large population would soon render it a very rich district; for there is scarcely a limit to the productive power of the soil. Mining industry is of small amount, though in the early days of the Spanish occupation gold-seeking was almost the sole business of the

inhabitants. Small quantities are still gathered in the beds of the rivers but for some time past the less exciting but more profitable pursuit of agriculture has been embracing men and more the attention of the people. Within the limits of this province lies the great volcano of Chile. The principal towns of the province bear the latter name and is 450 m S. of Santiago. Part of it is modern; the ancient part it was built by the Spanish conquerors. Chillan in former times was a place of some strength, and on many occasions served as an asylum to the early settlers when hard pressed by the Araucanians. This danger no longer exists but still Chillan continues to be a military station. Pop. of province (1845), 123,698.—(*Globe and Phil. Reporter* Nov. 1845).

NUDDEA [add] a dist. India, presid. Bengal, between lat. 22° 49' and 24° 10' N lon. 86° 9' and 89° 11' E, bounded N. by Rajshaye E. Purna and Jessore, S. Baraset, and W. Hooghly Burdwan and Bardwan length, N to S, about 80 m; breadth 45 m area, 3643 sq m. It lies wholly within the delta of the Ganges, and is traversed everywhere by its branches—chiefly the Judda, Jellinghee, Bhaguttee, the last two uniting to form the Hooghly, which, for 40 m. in W. boundary of this district. The soil, fertile, friable and easily cultivated, produces in abundance, rice, various kinds of millet, maize, pulses, oil seeds, cucurbaceous plants, angurones, indigo, tobacco and hemp. The mulberry for feeding silk worms, is extensively cultivated. The capital of the district is Kishungar. Pop. 298 785.

NUDDFA, a in India which though giving its name to the above district, is situated in dist. Bardwan r bank Bhaguttee, 60 m N by W Calcutta. It was once the residence of a Hindu sovereign and possesses an ancient Brahminical college in a state of decay.

NILERA EL LIA or **NUYERA KAJA** an elevated plain Ceylon 64 m E by N Colombo, at the height of 6222 ft. above the sea. It is inclosed by mountains, one of which Pedralagalla, having a height of 8380 ft. is the culminating point of the island and having been first made known in 1638 by some English officers who had penetrated to it in pursuit of elephants, was immediately selected by government as a sanatorium. Barrocks were accordingly commenced, and the village began to rise in the midst of its groovy well watered plain. According to Sir J. E. Tennent, Nuyera elia, as a sanatorium, is little to be relied on as active ailments especially such as are incident to the island but as the preventive of illness cannot be too highly valued. To the hypochondriac and the valeretudinarian the valley is a paradise to the lauguid and exhausted dweller on the coast this elevated region acts like the touch of his mother earth strengthening him to writhle with the beasts below, and children after rejoicing in the burning breeze, descend as rosy and bright as on their first arrival from England. The plain, formed of debris from the hills, has been largely productive of precious stones embedded in the alluvial deposit, and is still covered with pits sunk by the gem-diggers. Visitors pursue jewel hunting as an amusement, frequently find small rubies, sapphires, and topazes.

NUFOOD meaning 'death and destruction of provisions and water' is the modern name given to one of the most extensive tracts of Arabia, occupying the whole centre of the N part of the peninsula. Its W boundary commencing at the isolated mountain Hulwan, to the E. of Teima, is sharply defined by a range of hills, which rising to a height of 100 to 200 ft. extends N with an unintermitted ridge of sand-hills resembling the wall of a mountain chain, and separates it from the rocky Syrian desert. On the S its boundary, commencing as before at Hulwan, curves eastward till it is met by the mountain-chain of Jebel Shammar. The E boundary is very irregular the sand-ridge extending unequally—some stretching so far down as to approach the Persian Gulf, while others are soon lost in the stony plain which lies between the Nufud and the sea-coast. The N. and N. E. limits are too little known to be exactly defined. Nufud notwithstanding the destitution implied in its name, is on its whole extent one of the richest pasture-grounds in Arabia during the spring, when the rain gathers in ponds and pools at other seasons owing to the want of walls and springs, the nomadic tribes do not frequent it.

NUGENAH, two places, India—1. a vil. N.W. Pro

chama, dist. Georgetown, 65 m. S.W. Delhi. It contains a handsome bungalow for travellers, which was originally the country residence of Shumie-a-din, Khan of Perswara, who was hanged, in 1886, for the murder of William Fraser, the British political agent.—3. A m. Rohitund, dist. Bijnour, about 80 m. N.E. Delhi. It is a large and stirring place, built chiefly of brick, and has been called the Birmingham of India on account of its extensive manufactures of gun-barrels and detaching tools for fowling-places. Pop. about 14,000.

NUJERERAD, a m. India, N.W. Province, Rohitund, on a low and swampy site, in dist. Bijnour 81 m. S.E. Hardwar. It is about three-quarters of a mile long, and consists of a number of broad regular streets, intersected by barriers at different distances, and forming several distinct blocks. It has a thriving appearance, and carries on an active transit trade between Kumaon and the S. Outside the town are the remains of many considerable buildings and about 2 m. S.E. is the large square brick built fort of Purnagurh, with bastions at the angles and the middle of each face.

NLN a m. W. Africa, on a river of same name; lat. 28° 30' N., lon. 10° 11' W. It occupies a very uneven site, and consists of a series of long streets, so narrow that two carriages can hardly pass in them. The houses, built of clay or mud, generally have a court attached to them, from which their only light is received, as the wall facing the street has no window or opening of any kind. The place is tolerably clean, except in the Jewish quarter, which is inhabited by about 100 families, and is filthy in the extreme. The trade is considerable, and consists chiefly of gum, goat-skins, camel-hair, sheep's wool and ostrich-feathers. These the traders exchange for European goods which are sent by caravan into the interior and especially to Timbuctoo from which the returns are gold, slaves, gum, ivory and wax. A good deal of wheat and barley is grown in the vicinity of Nln, and date-palms are numerous, but seem only for ornament as they bear so fruit.

NUSA KAMBERANGYN, an isl. Indian Archipelago off the S. coast of Java, and only separated from it by a narrow channel, so shallow as to be navigable only by boats. It is about 15 m. long by 5 m. broad, has an elevated surface covered with forest, and is almost uninhabited. At the W. extremity of the island occurs the only good harbour for vessels of burden along the whole of the S. coast of Java. The Dutch have of late years introduced the forced culture of coffee in this island.

NUSEERABAD three places, India.—1. A tn. presid. Bengal cap. dist. Mymensingr. b. bank Brahmapootra, 190 m. N.E. Calcutta.—2. A tn. presid. Bombay Candesh, 79 m. N.E. E. Malgaum.—3. A British settlement, dist. and 15 m. S.E. Ajmere. It stands at the height of 1486 ft. above the sea, on a vast plain of sand or gravel overlying primitive rock, and bounded N.W. by the mountains of Ajmere. The communications land out in wide and regular streets, are large and commodious. On 28th May 1857 the 15th and 30th Bengal N. I. and a company of Bengal native artillery, broke into open mutiny and committed great atrocities.

NUYTS (add), an archipelago, S. Australia, contained in a large light of the coast between Ball Point in lat. 33° 17' S. lon. 135° 5' E. and Westral Point in lat. 32° 23' 30" S. lon. 138° 58' E. The principal groups of the archipelago are those of St. Peter lying near the mainland between Denial and Smack Bay; of St. Francis situated at 18 m. distance in the offing, and affording good anchorage in Petrel Bay and of the Farall Islands, which lie 3 or 4 m. from the shore to the eastward of Ball Point, and are rendered very dangerous by sand and muden rocks.

NYAMBOYONDA a hot spring, S.E. Africa, Portuguese settlements, nearly opposite Tette lat. 15° 50' 35" S. It stands at the bottom of a high hill about a mile and a half E. of Morool, a small affluent of the Zambezi. A little spring bubbles up on one side of the rivulet. Nyayonda, and a great quantity of steam rise from the adjacent ground, of which 12 ft. square is so hot that the natives with their bare feet could not stand upon it. The principal spring is in a hole about a foot in diameter and in depth. The steam issues with in the throat, but does not seem to be indomitable. A thermometer plunged into the water of the hole stands steadily at 160°. The stones over which the water flows as it passes

from the spring are saturated with a white salt, and some diggers have been made by the natives in order to obtain the salt on a larger scale. The prevailing rocks where the fountain issues are azeulic porphyry in broad dykes, gneiss tilted on edge, sandstone in strata discoloured by limonite, rock and basalt, and partially converted into quartz, green stone, and lava, with many specimens of half-formed pumice.

NYAMINA a m. W. Africa, on the N or right bank of the Dnailika, which ultimately sends its waters to the Senegal 450 m. S.W. Timbuctoo. It is a large and important place, with a market which supplies a great proportion of the inhabitants of the W. desert. To the W. of the town the river forks a large creek or backwater, which opens an extensive inland navigation.

NYANZA (ALBERT) *See* LUTA N'GUNDI in *Shipp*.
NYANZA (VICTORIA) *See* VICTORIA in *Shipp*.

NYASSA (add) a lake, B. Africa lying nearly due N and S., lat. 10° 55' to 14° 35' S., its S. extremity is in lon. 35° 30' E., and its N. end in lon. 34° 35' E.; its greatest breadth is about lat. 12° S. is estimated at 60 to 65 m., and its total length about 250 m. It is drained by the river Shire into the Zambezi, and where the Shire leaves it at its extremity the depth along the S. end is from 9 to 16 fathoms; but beyond Cape Maclear, a mountainous promontory 40 m. N.W. no bottom was found at 55 fathoms. Along the W. shore, which is a succession of bays, where the bottom is sandy near the beach, and to a mile out, the depth varies from 8 to 14 fathoms. In a rocky bay about lat. 11° 40' S., there are soundings at 100 fathoms; but outside the bay none were found at 116 fathoms. The S. end of the lake is divided into two arms, from the south eastern of which the Shire issues; this arm is about 50 m. long and from 10 to 18 m. broad. Rounding Cape Maclear the south western arm stretches 18 m. towards the S. and is from 6 to 12 m. in breadth. These arms give the southern and a forked appearance with some resemblance to the boot-shape of Italy; the narrowest part of the lake is about the angle, 18 or 12 m. From this it widens to the N. and lies as near as possible due N and S. About two-thirds up the lake is the island Chumura, which facilitates the crossing of the lake by the natives and Arab and Portuguese slave-traders. The lake appears to be surrounded by mountains, but the beautiful tree-covered heights on the W. side are only the edges of high table-lands. Lake all narrow was encircled by highlands, it is visited by sudden and tremendous storms. The temperature of the water was found to be 72° Fahr. its great depth preventing the sun from raising it to an excessive height. Lake Nyassa receives no large affluents from the W.; the five rivers seen at that side by Dr. Livingstone not appearing to bring in as much water as the Shire was carrying out. They were from 15 to 18 yards wide, and some too deep to ford, but possibly these, with others similar from the mountains on the E. and N., when swollen by the rains may be sufficient to account for the rise of the lake without any large river. Distinct marks upon the rocks show that for some time during the rainy season the water of the lake is 8 ft. above the point to which it falls towards the close of the dry period of the year. The rains begin in November and the permanent rise of the effluent Shire does not take place till January. The W. side of the lake, as mentioned before, with the exception of the arm W. of Cape Maclear is a succession of small bays of nearly similar form each having an open sandy beach and pebbly shore and being separated from the next by a rocky headland, with detached rocks extending some distance under the great S.W. bay would form a fine harbour. The land immediately adjacent to the lake is low and fertile, though in some places marshy, and tenanted by large flocks of ducks, geese, herons, crowned cranes, and other birds. In the southern part are sometimes rich plains ten or a dozen miles in extent, bordered by high ranges of well-wooded hills running nearly parallel with the lake. Northwards the mountains become loftier, and present magnificent views range towering above range, until thin lofty outlines bound the prospect. Still further N. the plain becomes narrower, until they altogether disappear and the mountains rise sharply out of the lake, forming the N. E. boundary of what is described by the natives as an extensive table-land, well suited for pasturage and agriculture, and now only partially occupied by a tribe of Bums, who came from the S. some

mineral of the country and the outlet for conveying flour and other produce to the American side. The Great Western railway has a station near the town. Pop. about 2000.

OBBO a territory Central Africa, intersected by the parallel of 4° N and meridian of 23° 30' E, lying between the Mali Mountains on the N and E and the Bar tribe on the W and the river Atbara, an affluent of the Nile, on the S. The country is mostly a park like, and has in general an elevation of 3600 ft. above the sea to the S. although there are no actual mountains, the country distinctly rises. The drainage is to the W and N W in which direction there is a very perceptible inclination. The vegetation of Obbo and the whole of the W side of the Mahi range is different from that on the E. side the soil is exceedingly rich producing an abundance of Guinea grass, with which the plains are covered. It produces nine varieties of yams, some of which grow wild in the forests there are also many good wild fruits, a fine quality of fax grows spontaneously and tobacco attains an extraordinary size. The climate would be healthy were the country more populous but the rainfall continuing during ten months of the year from February to the end of November the increase of vegetation on the fertile soil is too rapid and the mass of herbage and grasses 10 ft high, with creeping plants and vines, becomes impenetrable by man, and forms a vast jungle, inhabited only by elephants, rhinoceros, and buffaloes. The natives are entirely different from their northern neighbors, the Lotukas, both in language and appearance. They are not quite naked except when going to war and then they paint themselves in stripes of red and yellow their usual covering is the skin of an antelope or goat worn like a mantle. Their faces are well formed with peculiarly fine shaped noses. Their head dress is remarkably neat, the woolly hair being matted and worked with thread into a flat form like a beaver's tail, and bound with a fine edge of raw hide to keep it in shape. The only articles of pottery are tobacco pipes and water jars all other utensils are formed of wood or gourd shells. — (Sir S. B. Baker)

OBBERLIN a vil. U. States Ohio on the Cleveland and Toledo railway 39 m. S.W. Cleveland. It contains an Episcopate and a Congressional church the latter capable of holding 800 persons, and Oberlin college which is attended by about 800 students and combines manual labour with study. By its rules males and females are admitted without regard to colour. 1 vo (1856) 2132, catalogue of students.

OBBERLIN a tn. Austrian empire Bohemia, circle and 22 m. S.W. Bardeau, near bank Moldau with a parish church, four very important yearly markets and 1700 inhabitants.

OBERTYN a tn. Austrian empire Galicia, circle and 4 m. E. Kolomea, cap. dist. of same name; with very important cattle markets. It was once fortified and had a very strong castle. The Turks and Moldavians were signally defeated here in 1559 and 1572. Pop. 4300.

OBILGADK a tn. La Plata, prov. and 108 m. N.W. Buenos Ayres r. bank Parana. Here the river contracts to less than half a mile.

OBUS a tn. Austrian empire Hungary co. and 22 m. E. Arad with 1290 inhabitants who grow maize, and rear goats and bees.

OBVIRIDIA, add., a tn. Turkey in Europe, eyalet Marm. It, cap. leva of same name, on the N. shore of Lake Ochrinda 65 m. N. by E. Durazzo on the Adriatic. It is surrounded by walls flanked by towers, is the seat of a kassan or Turkish governor, and a Greek archbishop and carries on an important trade in dried fish, obtained from the lake, and sent into all the neighbouring parts of Albania and Macedonia. Pop. 8000.

OGONTO a vil. U. States, Wisconsin cap. co. and on river of same name 2 m. from the entrance of the latter into Green Bay and 80 m. N. by E. of the city of Green Bay. The manufacture of pine lumber is the staple of the place, and 100,000,000 ft. of it are said to be shipped annually.

OGONINGO a tn. Mexico dep. Chiapas, 55 m. S.E. Ciudad Real. It derives its chief interest from a series of remarkable aboriginal monuments in its vicinity. Pop. 4000.

OGYLLAN a tn. Mexico, state and 18 m. S. Oajaca, had once a richly endowed Dominican monastery, and a pop. of about 12,000. After the destruction of the monastery it rapidly decayed and does not now count above 400 families.

OGCSA a tn. Austrian empire, Hungary no. and 10 m. S.E. Puth, with a church in the Rymantine style, which dates from the 11th century and in purity of structure will not suffer by comparison with the best edifices of the same period in Italy and Germany. P. 2553 mostly Protestants.

ODERBERG a tn. Austrian empire, Silesia cap. dist. of same name, 28 m. E. Troppen on the Oder near the Prussian frontier and a station on the Vienna and Oderberg railway. It is the seat of several public offices, has a hospital and four yearly markets, and contains 1200 inhabitants.

ODOJEV a tn. Russia, gov. Tula, pleasantly and healthily situated on both banks of the Klazonska, at its confluence with the Upa. It has five churches, a circle and a parish school, and several industrial establishments. Bees are extensively reared, and some coal is found within the circle. Pop. 8080.

ODRAU a tn. Austrian empire, Silesia, cap. dist. of same name 17 m. S. Troppen on the Oder and the Moravian frontier. It is the seat of several public offices, has a castle, manufactures of linen, woolen, cotton goods, and four yearly markets and contains 3143 inhabitants.

ODREJ a tn. Austrian empire, Galicia, circle and about 13 m. N.E. Jaulo with a sulphur spring and the ruins of an old mountain castle, which gave an asylum to the fugitive Hungarian king Zepolya and figures in the early history of the country. Pop. 2250.

ODLUN or **ODLUNGO** a tn. Turkey in Europe, eyalet Rnne It on the shore of the Adriatic a little N. of the mouth of the Boyana, and 16 m. S.W. Scutari. It is the seat of a R. Catholic bishop, and possesses a harbour at which there is some trade in oil and timber. Pop. 7000.

ODLA a tn. Austrian empire, Moravia, circle and 26 m. N. by W. Brunn on the Bohemian frontier; with two churches, a small castle and some cotton manufactures. Graphite is found in the vicinity. Pop. 1700.

ODENSBURG a vil. and port of entry U. States. New York r. bank St. Lawrence, at the mouth of the Oswegatchie, opposite to Prescott in Canada, and on a railway which connects it with Roston and New York. It contains a custom-house, town hall armoury several churches, and an academy and carries on an active trade. Pop. (1860), 7419.

OGOBENDU or **BRIDE**, a tn. W. Africa, on the delta of the Kwarra from two to four days N. of Bonny. It is a large and important market-town forming the principal mart of the district for palm oil and provisions. During the foreign slave-trade it was in the zenith of its prosperity and even since it has declined but little as it still remains a central depot of the home slave-trade.

OHOSIMA two islands of the N. Pacific. 1. *Ohosima* or *Harbour Island*, called by the Chinese *Taitai*, is the largest of the chain of islands lying between Great Loo-choo and Japan. It stretches in a N.E. and S.W. direction for about 50 m. having its N. extremity in lat. 28° 51' 40" N., lon. 129° 40' 12" E., and its S. extremity in lat. 28° 0' 30" N., lon. 129° 27' E. It was partially surveyed by the American squadron in 1856 but has never been properly explored. From the little that has been learned respecting it, it appears to have a bold, rugged and deeply indented coast, and a lofty, well-wooded and well-cultivated interior. Two peaks near its N. end have the respective heights of 1674 and 1480 ft. The number of villages seen along the coast prove that it contains a large population. — 2. *Ohosima*, *Osima* or *Pine Island*, situated in front of the Gulf of Yedo, in lat. (S.E. point) 34° 39' 30" N., lon. 129° 38' E. has an active volcano near its summit which rises to the height of 2530 ft. It would seem, however, that though vapour and smoke rise from it at short intervals, and from different places along its crest, there is no discharge of lava or other destructive matter as its slopes are extensively cultivated and dotted with towns and villages. The vapour, after ascending, sometimes condenses in mists on the mountain, and makes the island a good land-fall for vessels approaching the part of the coast of Nippon.

OIL CITY a tn. U. States, Pennsylvania, co. Venango, on the Allegheny River just below the mouth of Oil Creek, the E. terminus of the Franklin branch of the Atlantic and Great Western railroad, 8 m. E.N.E. Franklin. It is the principal market of the Venango county oil region, immense quantities

of petroleum procured in the vicinity being shipped here for Pittsburgh and elsewhere. The oil-wells are numerous and one is said to have been flowing since 1861. Before 1860 the place contained only one store and one or two taverns, but so rapid has been its growth that it became an incorporated town in 1863 and contains four churches, three banks, numerous oil refineries, twelve hotels, several warehouses, machine shops, and many stores. P (1860) 13,000.

OJOGO a tn. W Africa, territory Koma, on the eastern extremity of a considerable island in the Benue, 120 m. above its confluence with the Kwara. It is a small but cheerful looking place, in the immediate vicinity of which are dense forests containing magnificent oil palms. On the left bank of the river opposite to Ojogo there is a strange tribe called Mitche, by whose quarrelsome disposition and predatory habits the inhabitants have repeatedly suffered. Crocodiles are very abundant in the Benue, near Ojogo.

OKANSK a tn. Russia, gov and 40 m. S W Perm cap circle of same name, on a lofty bank above a river Kama, has two churches, and two yearly markets. The rearing of bees is a principal employment. Pop. 1934.

OKINAWA SIMA, two islands, Loo-choo group lat 26 N lon 128° E, in the N and two in the S connected by isthmuses formed by deep indentations of their opposite shores. The western appears to be composed of gneiss and slate. On these the coral acroplyte has built its structures which have subsequently been so upheaved that coral is found on some of the loftiest summits at the height of nearly 600 ft above the sea. The soil composed chiefly of coral detritus and decayed vegetable and animal remains, varies with the physical features of the surface, being comparatively poor on the mountain tops and their steeper declivities and rich and fertile in the valleys and plains. The climate though subject to droughts and furious typhoons, is on the whole favourable to culture. It is also very healthy as there are no stagnant marshes to produce miasma, and the heat, tempered by sea-breezes and the elevation of the land, is never excessive. One of the principal crops is rice first sown in plots, and afterwards transplanted and copiously supplied with water by means of artificial irrigation during the whole period of its growth. The other crops are taro or sweet potatoes, millet, sugar pulse, barley, sugarcane, tobacco, and cotton. It has been estimated that of the 500,000 people which the island is supposed to contain, eight-eighths is under cultivation producing annually about 300,000 bushels of rice and 50,000 bushels of wheat. In addition to the land thus occupied 55,000 acres are under sweet potatoes, and 2000 acres under sugarcane. The government seems to be an absolute despotism with a system of administration resembling that of Japan to which the island is tributary. The religion is the common Buddhism of the East, with a mixture of popular superstitions. The inhabitants congregate chiefly in the two cities of Shuri or Sheshi, the capital and Naha, each having a pop. of 6000 are roughly estimated at between 150,000 and 300,000. They appear to be of the same original stock, but now form two distinct races—the Japanese and the Loo-chooan properly so called. (U. S. Expedition to the China Seas and Japan.)

OKNA a tn. Turkey in Europe, Moldavia, near the Tretush, an affluent of the Sarath, 75 m. S W Jassy. It has an active trade with Russia, and possesses rich salt mines, which are worked chiefly by convicts. The mineral springs of Sinita are in the vicinity.

OLAHIFALU a tn. Austrian empire, Transylvania, circle and 82 m. N E Udvarhely in a block mountain district. It consists of two distinct portions, called Great and Little Olahifal, and its inhabitants are chiefly employed in spinning hemp, flax, and cotton making wooden articles, and carrying on a trade in wood. In the vicinity in the valley of the Homorod are ironworks, and much-frequented mineral springs. Pop. 3000.

OLAHPATAT, a tn. Austrian empire Hungary co. Gabor, on the Sava, with a fine park with an English garden, large ironworks, and mines of iron, silver and copper. Pop. 1000, mostly Lutherans.

OLBERSDORF a tn. Austrian empire, Russia, cap. dist. of same name, 19 m. N W Troppau, with several public offices, a castle, an hospital, a copper mill, and several yearly markets, chiefly for cattle. Pop. 2363.

OLD POINT COMFORT a vil. U. States, Virginia, on James River, at the entrance of Hampton Roads, 12 m. N Norfolk. It contains commodious hotels for the numerous visitors who come to it in summer for sea-bathing. On the Point which is a low narrow sandy neck of land stands Fort Monroe and about a mile N, on the opposite entrance to the river, another fort has been erected on an artificial island formed upon a mud bank.

OLGA, or **NICHOLAI KAYNOVA**, a bay Russian empire, on the E. coast of Manchouria in the Sea of Japan lat. 43° 46' N lon 135° 19' E. It is open to the S E but protected by high land on the N W and S W. Within in its N part, there is shelter for a few vessels from all winds in 10 fathoms water over a muddy bottom. In the N E, a narrow channel leads into another harbour which is well adapted for cruising purposes, as there is little rise and fall and the water always smooth, is deep close to its S bank. The Gilbert or Arvaikhan falls into the bay at its N W angle. Both sides of the entrance are bordered by abrupt rocks of granite and all around the shores are mountains of rough grained granite and red porphyry of coarse crystalline structure, with wooded slopes. A pass leads through the mountains to the Upper Ussuri. This bay is now the chief naval station of the Russians on the coast of Manchouria. One reason for this preference is its almost entire freedom from ice. It abounds with fish.

OLIDEY a tn. Bolivia, prov Chuquisaca, lat 19° S, lon 65° 20' W. It stands on an elevated plain, overlooking the Tuctuca, and occupies the site of the old tn of Corcon de Jesus founded by the Jesuits.

OLOMOTU/AN a tn. Austrian empire, Moravia, circle and about 12 m. N Brünn with manufactures of stoneware and iron mines. Pop. 1000.

OLSCHAN a tn. Austrian empire Moravia circle and 8 m. S W Olmutz on the Blatta, with a well built parish church. The large plain near the town extending along the Blatta has often been used as a field encampment. Pop. 1000.

OTEMITZA a tn. Turkey in Europe Walachia 1 bank Danube opposite to Turtukai at the confluence of the Arghet 25 m. S E Bucharest. It has a quarantine establishment and a ferry and is celebrated for the victory gained by the Turks over the Russians in 1812. Pop. 1488.

OMAILA a tn. U. States cap Nebraska, pleasantly situated on W. bank Missouri opposite the town of Council Bluffs 12 m. W. by S Des Moines lat. 41° 18' N, lon 96° W. Its position is on undulating ground, between the river and the heights, which overlook a wide and rolling prairie. The streets intersect each other at right angles, and are well paved with stone and brick. The principal buildings are the capital, the court house, and tax dwellings there are also three banks and several schools. The staple trade of Omaha is the sale and transportation of goods to the plains west, and forth of the far west. A great number of emigrants going westward cross the river here, and procure their supplies. The Missouri is navigable both above and below by large steamboats. A military road connects Omaha with Fort Kearney and a branch of the 1st Pacific railroad to it, of which 50 m. are completed is under construction. Population of good quality is quarried in the neighbourhood. Pop. (1860) 1868 in 1865 about 4500.

OMAN [add.] a kingdom, E. Arabia. The name is usually applied to the sea-coast dist. comprised between Ras Musandam and Ras al Hadd the extreme eastern shoulder of the peninsula. Arabs give to Oman however, a much wider range, extending it from Abco Dalea, a village on the E. limit of the territory now occupied by Seno Yass to the neighbourhood of Dofar far down the E. coast with whatever lands lie between these points. It thus touches Hadramaut on the S. and Katar or the maritime vicinity on the N. and forms a huge crescent, having the sea in front and the vast desert of S. Arabia for background. Politically Oman has a yet wider acceptance, since it includes, besides the above-named territory that also of Seno Yass, Katar, the Akhal all the islands of the Persian Gulf from Bahreya eastward, and the entire coast on the Persian side from Ras Bostham to Dyak and its rule extends over a long strip of the African shore opposite to Zanzibar while this island itself, and Socotra, and whatever adjoins them, are likewise subject to

the Omanee accepts. The Arabian and Persian possessions of Oman are divided into thirteen distinct administrations, more or less dependent on the central government. Those least dependent are the following five—1, Bahrayn, which pays but a small tribute and a doubtful allegiance. 2, Katar and the territory of Bencu Yang, which make in a degree of war those that of Bahrayn, 3, Sharjah, 4, Ro-ol-Djebel and 5, Kalboub—the last three being subject indeed, but in no friendly manner. The eight provinces which acknowledge a more strict subjection are—1, The Persian coast from Cape Butastah to Djask, with the adjacent islands—a region nearly 200 m. in length by a breadth varying from 10 to 30 m., a long strip of harbours, and valuable on their account alone. 2, The Batainah, or the entire plain comprehended between the gorge of Kahat's Lohs to the N., Barka and the Hissat Hills to the S., and the mountain-chain of Jebel Akhdar to the W., this province is of equal length to the former, but 40 or 50 m. in breadth, and the most fertile and densely peopled in Oman. 3, Jebel Akhdar which commences at Kahat's Lohs and reaches to Fomad, the Batainah bounding it on the N.E. and Daburah on the S.W. the entire district is mountainous but well inhabited and in it lies the main political and military strength of the kingdom. 4, The Dalurah 5, The prov. of Mascat, from Barka to Ras Hayyau. 6, The Bilad Nijar from Ras Hayyau to Ras-el-Hadd. 7, Muscat which lies immediately behind it. 8, The tracts from Ras-el-Hadd to Adak, chiefly peopled generally by Beduin or negro and African tribes. These eight provinces with the exception of the last constitute Oman, in the strict geographical and political sense of the word. Owing to the extent of its coast line and its possession of the entrance to the Persian Gulf it is essentially a maritime kingdom, in which commerce and sea trade are of the chief importance. But the land possessions of Oman proper—the province which gives its name to the entire empire—are the richest part of the Arabian peninsula both in agricultural produce and in mineral treasures, while its extent is almost ample field for every kind of industrial labour. The inhabitants are said to be decidedly the best tempered and most hospitable of all the Arab races and toleration exists among them for all races, religions, and customs. Jews, Christians, Mahometans, Hindus—all are free to follow their own convictions and practices. Among their bad qualities however are a superstitious belief in sorcery great immorality and indolence in the slave-trade. Negroes are imported from the coast of Africa in large numbers every year and form so large a haven of the population as to have seriously affected the character of the inhabitants for the worse. The working of gold and silver filigree with which daggers, belts, cups and pipes are often adorned in Oman, supports great numbers of families in the larger towns, and is of a perfection rarely to be met with in the workmanship of any other land. The gold thus employed is mostly brought from, or through India, though this precious metal is said to exist in the interior of Oman itself, in the continuation of Jebel Akhdar behind Bahlah. Copper mines occur in Oman and are regularly worked. Lead too is procured in the neighbourhood of Ras-el-Hadd and traces of iron are observed in many localities. Salt mines are very common, and are much worked both for home consumption and for exportation; and the sea throws up amber in such abundance as to form a staple article of the royal revenue. This substance, with pearls, salt and gold, are the only government monopolies.

The form of government of Oman is a limited monarchy and Sultan of Oman is the correct title of the ruling prince and not Imum of Mascat, or Mascat, which is usually given to him by Europeans. The monarchy is limited not by charters and acts, but by the co-existence of a powerful aristocracy by hereditary privileges and the prescription of popular rights. It is in fact but a kingdom with no recognition of municipalities. Each town, each village, has its separate existence and corporation; while towns and villages are in turn subject to ancestral chiefs. The prerogatives of the crown consist in the right of nomination and deposition (upon compulsion) of local governors, though the office always remains in the same family—in fixing and levying port and customs dues in the exclusive management of the navy the keeping up a small standing army of 600 or 700 men and, lastly the transacting of all foreign affairs for

alliance or treaty, peace or war. The administration of justice is in the hands of local royal judges, and is practically independent of the sovereign. The taxes levied on land or goods are fixed and immovable except by local or municipal authority: the sultan enjoys, but cannot change them. The annual revenue of the government, derived from the pearl-fishery, commercial dues (including about ten shillings on every slave imported), land taxes and monopolies, is estimated at £1,055,000. This sum is expended upon the court of the sultan, the maintenance of the forts, army and navy and government officials of all kinds.

The approximate population and military force of the several districts (that of Mascat being claimed partly with Bahlah and partly with Jebel Akhdar, and not separately stated) is estimated as follows:—

	No. of Villages.	Population.	Military Force.
Bahrayn —	60	70,000	2,000
Katar —	40	150,000	4,000
Sharjah, —	25	85,000	2,500
Ro-ol-Djebel, —	30	10,000	500
Kalboub —	40	60,000	1,000
Batainah, —	—	50,000	30,000
Jebel Akhdar —	70	600,000	35,000
Dalurah, —	40	80,000	15,000
Bahlah —	45	100,000	4,000
Djask, —	50	140,000	5,000
Foreign Coast, —	—	500,000	—
Total —	—	2,380,000	11,000

To this population must be added the inhabitants of the adjacent desert and of the south-eastern Arab coast—probably an inconsiderable number.—(Palgrave.)

OMMATH, or NOMATH, a tu W Africa, Kimbundu country territory Ganda, lat. 13° S. lon. 15° E. It stands near the centre of Ganda, on a lofty height commanding a fine view of the surrounding forests and the deep valley watered by a river of some size, is surrounded by a wall which is built of stone without cement of any kind, like a dry stone dyke; and combines about 1500 inhabitants whose robberies and depredations have made them notorious.

OMBO, or OMU, a vil. U States, Wisconsin co. Winnebago on Fox River 53 in N. Wauquesa with which it is connected by railroad. It contains three churches, and several mills. Pop 1400.

ONANIS, a vil. or permanent kral of Hill Damara, S Africa, Namaqua Land. The natives submit chiefly on the wild roots in their sterile neighbourhood but manage to raise a little tobacco and keep the latter for the seed which when chewed intoxicates. When rain falls abundantly Onanis becomes one of the finest grazing localities in Namaqua Land, and is frequented by immense numbers of wild animals among which lions hold a first place. (On one occasion, when passing Onanis, Mr Anderson started troops of lions among the broken ground but they invariably did making it impossible for him to get a shot at them.)

ONARUA or ONAROU, a vil. U States, Illinois co. Injous, on the Illinois Central railroad 86 m. S. by W Chicago. It is surrounded by rich farm land, of which maize is the staple product and contains three churches and a Methodist seminary Pop 1000.

ONDEHILLA, a tn. S W Africa, Kimbundu country territory Ambulim, to the S of the Kape about 120 m. N N P Benguela. It occupies a rocky eminence and contains 2000 inhabitants engaged in agriculture and in an active trade carried on with the Portuguese settlements on the coast, the principal articles being gum copal and orchil.

ONEIDA a vil. U States, Illinois co. Knox, on the Chicago, Burlington, and Quincy railroad, 13 m. N.E. Galena. It is a shipyard, a place for grain and stock, and has three churches, a school, and numerous stores and warehouses. Pop 1500.

ONGKOR-WAT, or NOKKATAT, a prov and tn. of Cam bodia. The town 15 m. N N W Lake Thaleap (or Tochiap) lat. 13° 30' N; lon 104° E. nearly, is situated in an extensive and arid plain, barren of trees, but covered with long rank grass, which is bounded on the S. by the mountain-chain of Siam, and E. by the picturesque Mount Olinea. This ancient capital of the once powerful kingdom of Cambodia,

or Khmer, which is said to have maintained an army of 500,000 soldiers is now but a group of mean bamboo huts encircled with the vast and interesting ruins that indicate its past magnificence. But for the antiquary and the philosopher these ruins of antiquity possess an inexhaustible interest. The most noteworthy is the Great Temple whose superb remains excite the wonder of the modern Cambodians, that to all inquiries respecting their origin they content themselves with replying—It was the work of I-ra-Kun the king of the angle. The temple was built by granite. They spring from the earth of their own power. None of the monuments spared by time and barbarism appear to have been intended for human habitations; they seem to have been wholly dedicated to the rites of Buddhism or the ceremonies of government. The statues and bas-reliefs are exclusively devoted to civil and religious subjects. The

ONITSHA, principal entrance of the Wat. — From Kodai's Travels in Sum.

temple already referred to stands upon a platform of immense stones, supported by massive walls and attended by four huge flights of steps. A sort of fosse or ditch marks the area of the principal buildings. An immense quadrangular colonnade is first approached. This has a vaulted roof crowned with five towers of which the largest crowns the entrance, the others are placed at the four angles. Each tower is pierced at the base, like a triumphal arch. The temple itself is not unworthy of its approach. lofty columns here and there are adorned with one immense block of stone huge pinnacles, sculptured capitals, domed roofs, in some places retaining their original gilding and colour—impress the mind of the spectator with awe and admiration. The particular edifice which we have engraved consists of two quadrangles of concentric galleries, crossed at right angles by avenues terminating at a central pavilion. This is the crown of the superb pile, the holy of holies for which the architect seems to have reserved the most exquisite conceptions of his fancy. In this tabernacle which stands on an artificial mound is placed an image of Buddha, presented by the actual king of Siam, and surrounded by some poor pilgrims. Another temple, only inferior to this in the grandeur of its design and the richness of its details crowns the summit of Mount Ba-Khing about 3½ m N. The modern Ongkor-Wat does not contain above one thousand inhabitants, all employed in agricultural pursuits. It is commanded by a rude fort, or entrenched camp about a mile square, with a crenellated wall, constructed with huge blocks of ferruginous sandstone drawn from the neighbouring ruins.

ONITSHA is in W Africa, territory Ibo or Igbo 1 bank Kwana, about 140 m above its mouth at Cape Ann in the Gulf of Guinea, lat 6° 8' N lon 6° 45' E. It stands on a height above the river at some distance from it is approached along a road lying between extensive fields of maize, yams, and cotton, and is literally enveloped by woods com-

posed of large and lofty trees, chiefly the bombax and cocopalim. It is about 1½ m long and is traversed throughout its whole length from S W to S E, by a broad street, dividing it into two distinct portions. On either side of the street, and at some distance from it, large groups of houses each group under the superintendence of a head of a family or a subordinate chief. The houses which have clay walls, and are open in front, without any proper division into apartments are very indifferent. In an open space, where the houses come close to the street, the market is held. The S part of the town stands higher than the N, and appears to be better built. In the N part of the town a mission house has been erected and on the S W near the bank of the river an European factory has been established. The principal articles of trade possessed by the natives are sheep, goats, fowls, fish, kola-nuts, palm oil, lumber, ivory, straw, mats, and

earthenware which they exchange for iron salt and above all tobacco. The pop is roughly estimated at 13,000.

ONONACON is a vil U States, Michigan on the S shore of Lake Superior at the mouth of a stream of same name which is navigable for a short distance, and is one of the largest feeders of the lake on the S shore draining an area of about 1300 sq m. It is a rising place carrying on a brisk trade. There are valuable copper mines in the vicinity and the ore of the dist is shipped here the quantity in 1884 being 21 m mtd, above 10,000 tons. It has four churches, a school and a copper smelting furnace. Pop. (1880) 1188.

KODAI P., or OUDIPY is in India, prelat Madras, dist. N Canara, about 4 m from the coast and 35 m N by W Mangalore. It contains three temples, and numerous monasteries or convents for de votes. All of these are usually included under the name of the Krishna Deva pagoda, on the revenues of which the inhabitants, about 1200, almost all Brahmins solely depend.

ODEYPOOR or MAWAR (add) is a stat. India Rajpootana between lat 23° 44' and 23° 36' N lon 72° 50' and 73° 28' E is bounded N by Ajmer, S by the native states Boodhee Gwallor, Tonk, and Parbhagpur, W by Marwar, Dounpur, and Mysore, length N to S 160 m breadth 110 m, area, 11,614 sq m. A considerable portion of the territory is covered by the Aravalli range, which after stretching over it S W from the town of Odeypoor to the frontier of Siroche turns N, and passing through Komalwar towards Ajmer, separates Odeypoor from Jodpore. N of Komalwar the range takes the name of Marwar, which varies in breadth from 6 to 16 m and has in all ages been the abode of savage and predatory hordes of Maru, Mina, and Bhils, who after pillaging the surrounding districts, have found a secure asylum in its rugged valleys and gorges. After they had long been permitted to commit their depredations with comparative impunity the device was fallen upon to raise a Bhil corps to maintain the peace of the district. This device however unpromising it must have appeared at first, has succeeded and those who used to take the lead in devastating the country are now serving as a kind of rural police for its protection.

This Maru Bhil corps is maintained at the joint expense of the British government and the state of Odeypoor which has agreed to assign 65000 of the revenues of Marwarra for this purpose. The Rana of Odeypoor claiming a fabulous descent from a son of Rama, takes precedence of all other Rajpoot chiefs. Affinity with his family being thus counted as the highest honour rival claimants for the hand of Odeypoor princesses have repeatedly come to open hostilities, and many acts of barbarism have ensued. The case of Krishna Kaur who died by poison administered with the consent of her father, as the means of terminating a war in which rival claimants had involved him, is well known. Pop. 1,161,400.

ODEYPOOR, cap. of the above state, 830 m. S.W

Agra, stands on the low ridge of a valley or basin, closed by hills on all sides except the W, which opens upon a lake 5 m in extent. The town looks best from the E., and has then a striking appearance viewed more closely the charm vanishes, and it is found to be very indifferently built. The only building deserving of particular notice is the palace, a noble pile of granite 100 ft high, seated on the crest of a rocky ridge overlooking the town, the lake and the valley stretching far beyond it. The lake, which is the finest feature in the picture, is artificial, being formed by the damming up of a small stream by means of a magnificent dyke, which rises 17 ft above the water is faced with marble, and embellished with numerous sculptures, small temples and other structures. The pop. once above 100,000 does not now exceed 15,000.

ODDUNG or **LODUNG** a tin cap. independent Cambodia, on the W bank of a river of same name, an affluent of the Mekong or Cambodia, is enclosed by a wooden palisade 500 yards square and 20 ft. high, and consists of a straggling collection of hatched houses, the residences of the nobles, with a low brick wall is the centre, surrounding the palace, mint, and arsenal. Everything bespeaks poverty and the recent ravages of war. At 11 m. below the town, the R. (Lachon) has a missionary establishment. The river which issues from the S side of Smith's Lake or Tai-ma-pok, apparently a continuation of King's Lake or Tai-nab, is throughout a broad and majestic stream.

ODHAWA, **TILIE**, or **AWANWATTA** [old.] a tin India, is one of the most important of the States of Bhamare 173 m. N. E. Aurangabad. It is a place of great commercial importance and perhaps the most important cotton mart of the Deccan. Several considerable firms are established here, and most of the great mercantile houses of Upper India, as well as those of Bombay have either correspondents or branches. The cotton, when picked in the district where it is grown, is immediately brought hither and lodged in large warehouses built for its reception till it shall be cleaned and repacked for exportation from Bombay or Calcutta. The advantage of this mode of sale as an enterprise must be great since it continued to be thus employed, notwithstanding the excessive and expensive transit duties levied by the British. Now that British rule has been substituted for his oppression and capture, there is every reason to expect that the transit trade of the place will be largely increased.

ODRHA [old.] a tin India, Bandakund cap. princely state of Orissa or Schree 1 bank Betwa 142 m. N. E. Agra. It stands on a rocky eminence, surrounded by a wall built of uneven stones without cement and about 3 m. in circuit. It is entered by three lofty gateways and is, moreover, defended by a fort situated within it and containing two palaces one of which belonged to the Mogul emperor Jahangir and the other the residence of the rajah. The only building of note in the town is a temple surmounted by 15 ft. spires. The territory of which Odrha is the capital has an area of 160 sq. m. and a revenue of 250,000. The rajah of Odrha claims to be the head of the Boudela race of Haypot origin. Pop. of ter. 150,000.

ODTACAMUND a tin and sanitary station India, present Madras, dist and 23 m. N. W. Coimbatore is an extensive valley almost in the very centre of the Nilgiri Hills at an elevation of 7500 ft. above the sea. It has wide and clean streets and well supplied houses, but as yet the only portion of it which can well be called a town is that occupied by the natives. There the houses are tolerably compact whereas the residences of the Europeans are widely dispersed along the slopes of the valley. The most conspicuous object and greatest ornament of the station is an elegant church.

ODYAH, a dist. or ancient principality Ceylon towards the S. P. of the Central provinces. It consists of an upper and a lower portion the former belonging to the mountain zone and the latter to the lowlands.—Upper Odyah is finely diversified by mountains and valleys and contains some of the most magnificent scenery in Ceylon.—Lower Odyah consists generally of fertile fields and grassy plains. The fields are well cultivated, and yield good crops of rice, in the management of which the inhabitants particularly excel, Indian corn, millet, yams and cassava. Among subordinate products are materials for the preparation of curry, turmeric, cardamom, onions and garlic cardamom and pepper. The grassy plains afford better pasturage than any others in the lowlands

and feed great numbers of oxen and buffaloes. Vegetable oils are expressed from numerous plants; madder, asparagus, and annatto furnish dyes; and the hulls were elaborated for growing the finest coffee long before European settlers had established themselves around Kandy. The climate is salubrious, and nothing is wanting but enlarged means of communication with the capital and the coast to make Odyah, as it is already one of the richest, also one of the most frequented and prosperous districts of Ceylon. Its capital is the beautifully situated and thriving town of Badulla.

OPPATOWITZ a tin Austrian empire Moravia, circle and about 52 m. N. Brunn with a handsome parish church, and a beautiful castle in the midst of a park. Pop. 1300.

OPPONTI, a tin Austrian empire, Lower Austria circle Upper Wenerwald, on the Ybbs or Ipe 78 m. S. W. Vienna. It has manufactures of scythes and sickles, steel and other iron works, and several saw mills. Pop. 1000.

ORAN N. Africa, the most westerly of the three provs. into which Algeria is divided is bounded N. by the Mediterranean W. by Morocco and E. by prov. Algiers. The S. limits descending into the Sahara are scarcely defined area, of which about two thirds belongs to the Sahara 39,800 sq. m. The surface consists of the two chains of the Atlas, the plateau between them and their two slopes the one N. to the Mediterranean, and the other S. towards the desert. The only stream of any consequence except the Shilif, which forms part of the boundary between Oran and Algiers, is the Sahel, which flows northwards, and falls into the Gulf of Arzew. The principal agricultural products, in addition to cereals, are grapes, olives, cotton, madder, walnuts, dates, and various plants from which essences and perfumes are extracted. The forests are extensive, and contain many magnificent trees. The administrative division is, as in the other provinces, into military and civil—the former consisting of five subdivisions and the latter forming the arrondissements of Oran and Mascara together with the districts of Arzew, Mascara, Sidi Bel Abes, and Tlemcen. European pop., including 13,302 French soldiers, 63,011; and native, about 480,000.

ORAN [old.] a tin N. Africa Algeria, cap. of above prov and at the bottom of the bay of same name 220 m. N. W. Algiers. It rises in the form of an amphitheatre on a somewhat rugged site between the slopes of Mount Santa Cruz and the plateau of Oran and is a place of considerable strength being not only surrounded by a wall flanked with towers, but defended by a castle and by four forts, two of which command the bay while the other two command the eastern plain. A deep ravine forming the bed of a torrent, divides the town into two distinct portions, both of them containing well formed streets lined with handsome buildings. One of the portions, forming the new or maritime quarter possesses a fine quay, a custom house, and an extensive range of magazines; the other portion forms two quarters. One of these, called La Blanca, is inhabited mostly by Spaniards and besides being well shaded with trees, possesses a fine esplanade in front of the old castle, a bridge which spans the ravine, a handsome church, a fine mosque, and a military hospital. The other, or third quarter, built along the face of the ravine contains the town-house and prefecture, with the (termed) garden. Outside the walls are two suburbs one near the Mascara gate, inhabited by natives who seem to be of negro origin, and another where an important market is held. Between this last and the walls there is a Place d'Armes or parade-ground, and a caravanserai apparently of Moorish architecture. The industry of Oran is largely developed, and includes among its establishments water and steam mills, foundries, tanneries, tobacco factories, vermilion factories and numerous breweries. Its trade, for which, in consequence of the badness of its own harbor, Mers-el Kébir is the shipping port, is carried on chiefly with Spain and Morocco, and consists of corn, hides, tobacco, tallow, cattle, and raw sugar exchanged for articles of European manufacture. In the extent of its export and import trade it ranks next to Algiers, and has progressed with greater rapidity than any other of the Algerian ports. The environs add much to its beauty and attraction as a residence, being covered with handsome villas in the midst of vineyards, orchards, and well-cultivated fields. The population is estimated at 29,000, of which not more than 8157 are natives.

ORANIEBURG or **BARREBUSE** a tn. Russia, gov. and 90 m S. by K. Riazan, circ. of same name, at the confluence of three streams, affluents of the Volga. It has three churches, a d'role and a parish school, a charitable endowment, manufactures, chiefly of soap, and a large trade in corn. Pop 9982

OREGON one of the U. States, between lat 42 and 46° N. lon. 116 40' and 124 25' W bounded N by Washington territory from which it is separated by the Columbia for half the distance, E. Nebraska S. Utah and California, and W. the Pacific length, E. to W. 840 m breadth 290 m. area, about 80 000 sq. m. A large part of the surface is mountainous a prolongation of the Rocky Mountains traveling in it the E. the Blue Mountains in the centre, and the Cascade Mountains in the W. The last range, which is a continuation of the Californian Nevada, stretches nearly due N across the whole territory and has summits varying from 4000 to 10 000 ft. Its culminating point, Mount Hood, in lat. 45° 20' has the still loftier height of 13 000 ft. The E. slope is bare but the W. is covered nearly up to the limit of vegetation with coniferous trees. To the W. of the Cascade Mountains, a subordinate and nearly parallel range which from its proximity to the sea, has received the name of the Coast Range, attains a maximum height of about 4000 ft. and is generally well wooded. The whole state belongs to the basin of the Pacific and is watered chiefly by the Columbia and its affluents particularly the Snake, which, entering it on the S.E. flows easterly across its centre in a N.E. direction, and the Willamette which flows N. at no great distance from the coast, and nearly parallel to it. The course of these rivers has not been so thoroughly explored as to test their navigable value but what is known of them cannot be considered favourable. The Columbia, though 4 m. wide at its mouth, and for nearly 18 m. above it, is encumbered by a bar on which the water at low tide is not above 18 ft., and has a channel so narrow and intricate and so subject to gusts of wind and obstruction by logs, that mariners are justly shy of entering it. Once inside there is no want both of width and depth but about 120 m. from the ocean the navigation is completely interrupted by falls, which have a descent of 40 ft. in 5 m. The Willamette falls at its mouth admits vessels drawing 12 ft. and shallows shortly after first to 8 and then to 4 ft. which it maintains as far up as Salem. The valley of this river about 120 m. long by 30 m. wide, contains land available for tillage. The soil is for the most part a gravelly clay covered with a rich sandy loam. Western Oregon has extensive valleys, well adapted to the growth of fruit, especially apples, pears, plums, and shrub fruit, and considerable tracts of it are also suitable for cereals. The mountain slopes form excellent pasture lands, and much of this country is valuable for raising sheep and cattle. Eastern Oregon is also adapted for grazing, and though but little rain falls E. of the Cascade Mountains except during the autumn yet the bunch-grass (*Festuca*) forms abundant and excellent pasturage. The produce of wool in the state in 1861 was 444,000 lbs. The prevailing geological formations of Oregon are tertiary sandstone in the W. granites in the Cascade Mountains and trap and these eruptive rocks in the E. Among the minerals are iron, copper, platinum, iridium and osmium.

Eastern Oregon, especially that part traversed by the Blue Mountains, is rich in minerals. Gold is abundant, and easily mined on the Salmon and other tributaries of the Snake River, and rich mines were opened in 1861 and 1862 on the John Day and Powder Rivers. The product of the Oregon mines in 1862 was estimated at \$12 000 000. Silver lead, copper and iron have also been found. On the shores of Coos or Cohos Bay about lat 43 30' large beds of tertiary coal have been discovered. The climate in the W. is moderate, neither cold nor hot being over in extreme. Its greatest drawback is excessive humidity in consequence of which drizzling rains and thick fogs prevail during a large portion of the year and the sun is often hidden for a month at a time. This humidity however adds greatly to the luxuriance of the vegetation which is displayed in dense forests of the most magnificent pines, with a tangled undergrowth of ferns and shrubs. In the E., which has an entirely different climate, the thermometer has a very wide range, rising in July to 80°, and falling in winter to 30° and the vegetation is so scanty that one might travel for days in the

valley of the Snake without seeing a tree. The principal indigenous animals are the black and gray bear the panther the gray wolf the mountain sheep the elk, the antelope, the vulture the bald and golden eagle, the swan, the goose, and different species of albatross and pelican. The only rapids deserving of notice is the rattlesnake. The rivers near the coast abound with several varieties of salmon. Pop. (1860), 53 464 exclusive of Indians estimated at about 10 000.

ORFLE or **NEW RIVERS**, New Zealand in the S. of Middle Island or Munster flows S. through a low rich grazing country and falls into Forrester Strait a little to the W. of Bluff Harbour. It is now an exposed and shifting bar but in moderate weather may be entered by vessels drawing from 12 to 15 ft. It has been ascended for a distance of 25 m. The settlement of *Acrocorall* (which see), established in 1850 is situated 8 m. within its entrance.

ORGEJI V a tn. Russia, gov. Bessarabia, cap. circle of same name, on the Rhen, an affluent of the Danister. It has three churches a school for the circle, and contains 4674 inhabitants.

ORIZABA [add.] a tn. Mexico, dep. and 70 to 8 W. Vera Cruz. It lies in a basin surrounded by limestone hills, at the height of 4000 ft. above the sea, and possesses six churches, various schools a large cotton-spinning mill, many factories of saddles several saw mills and a considerable trade. There is much picturesque scenery in the environs 10 p. nearly 15 000. The volcanic mountain of Orizaba about 6 m. N. of the town has according to Heron von Miller was ascended it in September 1856 to an absolute height of 17 045 ft. and is therefore the culminating point of N. America. The crater is in the form of an irregular ellipse of which the greater axis lying between W. N. W. and E. S. E. measures about 3000 yards, or a mile and three quarters, and the minor axis only 100 yards considerably less than the third of a mile. The entire extent of the crater is roughly estimated at about 4 m. Many parts of its internal side have a yellow covering of sulphur and hot vapour is said to issue occasionally from the sides of the mountain but as snow lies unaltered within the crater itself the volcano seems to be extinct.

ORLEANS a tn. Austrian empire Transylvania, curch and 10 m. W. Hermannstadt at the confluence of the Schwarzwasser with the Zibin has two paper-mills, a copper mill and ironworks. Pop. 1600 mostly E. Catholics—*(see also)* on the opposite or right bank of the Zibin has 2474 inhabitants and a mill for spinning wool.

ORLEANS [add.] an I. British America Canada East in the St. Lawrence, 3 m. below Quebec. It is in the form of an irregularly elongated oval 18 m. long from N. E. to S. W. with an extreme breadth of 4½ m. a lake beautiful and fertile, and forms a distinct country divided into six parishes which with their churches and the villages around them form conspicuous and interesting objects as the island is approached. Its strata consist of granite and slate-rocks dipping generally at a high angle to the S. E. and its surface, rising gradually from steep banks attains a central elevation of 550 to 600 ft. A good road carried round the whole island gives easy access to every part of the interior. At the W. end of Orleans the Quebec basin commences, and extends for 9 m. to the wharves in the immediate vicinity of the town. Nothing can be more strikingly beautiful than the view which suddenly bursts upon a stranger ascending the St. Lawrence, and entering the Quebec basin as the vessel opens the falls of Montmorency on the one hand and the city of Quebec on the other.

ORLEANSVILLE, a tn. N. Africa Algeria, prov. and 106 m. S. W. Algiers, on the l. bank and near the centre of the plain of the Shelif. Though built among ruins, indicating the site of an ancient Roman town, it owes its present existence entirely to the French and consists of spacious handsome streets with solidly constructed barracks and hospitals. Its inhabitants, about 27000 carry on an active trade in corn and wool. One of the most important markets of Algeria is held here.

ORMUZ [add.] an Isl. Persian Gulf belonging to Oman and situated on the N. side of the entrance to the gulf. lat. 27 8' N. lon. 56 80' E. The distance to the mainland on the N. is barely 10 m. to the W. the island of Djibut to the S. that of Larey are full in view, and Cape Musandam

On the eastern side of the entrance is also visible the greenish appearance of the inland indicating an extinct volcano; the circumference consists of a wide oval wall of steep grass, shrubs and ragged, inclining a central basin, in which grow shrubs and grass. The hostile slopes of the outer barrier run in many places down into the sea, amid splinter-like pianicles and fantastic crags of many colours. Between W and Y a long triangular promontory low and level, advances a considerable distance, and narrows into a neck of land terminating in a few rocks and a strong fortress, the work of a courageous captain, who on the way, and so completely destroyed the fortress and well constructed breakwater, that after 300 years, remains unscathed by the action of the sea. The greater part of this promontory is covered with ruins, upon it once stood the thriving town, now a confined extent of desolate beach, among which the vestiges of several fine buildings, baths, and a large church may be clearly traced. A plain tower of octagonal form, and of graceful construction rises about 100 yards from the end of the promontory. Lower by the foot (towards a hundred or more wretched huts, the abodes of fishermen and of shepherds whose flocks find pasture upon the craters, a kind of circular grassy plain, surrounded by a low wall, and a single gate for male and female represents the temple of Ormuz. The harbour consists of two bays, one to the W. the other to the E. of the promontory with tolerably good anchors.

OROVILLE, a city, California, cap. Butte Co. on the Feather River 75 m. N. Sacramento, and connected with Marysville by the California Northern railroad. It has productive gold mines, and in 1963 possessed numerous stores and two banking offices. Pop. in 1924 about 2000.

OBOU a tn. Austrorom empire Gallien, circle and 22 m.
N.E. Nambur with ironworks, and 1980 inhabitants

(Old) A New *in Turkey in Europe. Servia, circle
Kraina on an island of the Danube, opposite to Old Orsova
its Transylvania. 9) m. E. Belgrade Being important for
the communication between Hungary and Turkey it is de-*

fended by a castle and otherwise fortified. The elaborated delta known by the name of the Iron Gates, formed by the contraction of the channel of the Danube between rocky banks and a consequent increased rapidity in its current here presents the greatest difficulty and danger to those navigating the river. In the time of the Romans it appears to have been avoided by means of a canal which ran along the Mexican side.

OKTET a tr Austrian empire, Lower Austria, circle Lower Manhartsherg on the Danube, with an imperial palace manufactures of cloth and a trade in furs and sheep.

(c) *DAIVA* or *Owaka* [add.] According to the treaty of Yedo, ratified by the Mikado or hereditary Emperor of Japan in November 1854, this becomes an open port in January, 1960. It is the seaport of the imperial city of Kioto where stands Musco signifying the metropolis where the Mikado resides about 30 m distant from Owaka, on the same river, which runs up both ends once, dividing them nearly as far. *Owaka* stands at the head of Isami Bay 50 m from its entrance between Awadai Island and the mainland. The anchorage in the bay is an open roadstead unsheltered from W. gales; and the entrance to the river is obstructed by a shoal bar some 7 miles long. A narrow channel leads to the *chamfou* leading to Kotoo at full of shoals, over which only the native flat-bottomed boats can pass. In consequence of these obstructions and drawbacks making the port unsuitable for foreign shipping the treaty powers have arranged with the Japanese authorities to open the port of Hogo on the W. side of Isami Bay about 12 m. distant from Owaka, should that anchorage prove impracticable to foreign vessels. In establishing a foreign settlement at this port, Europeans come into direct intercourse with the people of the imperial city near rather than Kotoo near Owaka can compare with Yedo, the greatest capital of Japan in extent, grandeur or population, situated on the opposite bank higher in the alluvium of the Yamato as the residence of the hereditary emperor and his court.

In 1611 a Dutch embassy passed through Oases on their way to Kua, with presents to the emperor, and to enter into a treaty that the port might be open for foreign trade, which was not accorded to. A detailed narrative, embellished with

engravings of those cities, was published at the time, setting forth their grandeur and importance and how the city of Osaca was visited by an earthquake in 1686 so that all the finest edifices built of stone were destroyed and many people killed.—(*Blue Books on Japan*, Arnoldus Montanus, *Dutch Embassadors to Japan*.)

OSDOIA, a tn. Austrian empire, Transylvania, circle
and 33 m. N.E. Kronstadt. Fine rock-crystals, known by
the name of Transylvanian or Siebenburgen diamonds, are
found in the vicinity, in a stratum of fine clay-slate. Pop.
2108

OSFRI, a in Austrian empire, Hungary co Honth about 10 m NE Ipoly Sagh in a mountainous and by no means fertile district with 1150 inhabitants, mostly Lutherans who are partly employed in glass-making. There is an old castle in the vicinity.

OSHTAWA [ald] 1 a. in British America, Canada West co., Durham and 2½ m. from hydroelectric Harbour on Lake Ontario and on the Grand Trunk railway 80 m. N.E. of Toronto. It contains five churches and a central school and has extensive manufactures of agricultural implements furniture in demand not only within the district but in many distant parts of Canada rotatory steam sawmills and other machines, edge tools, ropes and twine, pumps, bricks, etc. and carries on an extensive trade, particularly in flour, which is celebrated as being of a very superior brand. Pop. about \$800

(NEKOSH a tn U States Wisconsin, esp. co. Winnebago, on both sides of the Neenah or Fox at its mouth in Lake Winnebago. It consists of two portions, connected by three bridges across the river containing three churches, an iron foundry and planing and saw mills and carries on an active trade in lumber. Pop (1860) 6186.

(4) **SHMIANA** a tn Russian gov and 80 m S E. Vilna
esp. circle and on a stream of same name. A bottle was
bought here in 1831 between the Russians and the Poles
There are ironworks within the circle. Top 4103

OSTER atn Austrian empire Galicia circle Wadowice
26 m. W & W Cracow with a fine baronial castle, and ex
tensive mulberry plantations. Pop 1800

OSKALOUSA a to 1 Stars, Iowa, exp. so Mahaska, between the Des Moines and the Skunk 60 m. S.W. Iowa city. It stands in a healthy fertile, and well-timbered district and contains several churches a state normal school and two academies. Pop. 1860 4493.

and for steam-mills. Pop (1800) 423.
(354147A) a in Turkey Bulgaria, oval and
70 m S E Silistria. It stands on a plain and has two
mosques, a Greek church and a pop of 4000

OSKIMARE, a W Africa bank Kwara, 130 m above its mouth. It stands on a flat close to the river, and becomes in wet weather particularly muddy and filthy. As the shipping place of an extensive district, it is the entrepôt for a considerable quantity of palm-oil brought from the interior. It has also some trade in ivory. Pop. about 1500.

OSTARIA is an Austrian empire Military Frontier Croatia, east Ogulin, about 20 mi NNE Karstadt, with the remains of a large and a very beautiful Gothic church, and thermal springs, which were much frequented by the Turks. Pg 2220

OSWEGO [adj.] a town and port of entry U. States, New York on both sides of the Oswego at its mouth in Lake Ontario on the Oswego canal, and on the Oswego and Syracuse and on the Syracuse and Binghamton railways. It is built on a regular plan in streets 100 ft wide, and crossing at right angles and contains a fine edifice, erected by the general government for a custom-house post-office and U. States court. It is a city of 10,000 inhabitants, and is the principal seat of the lumber trade, and has a large number of churches, a city library and thirteen churches. The harbour is one of the best on Lake Ontario, and combined with other commercial advantages, secures to the place a large and increasing trade. Large quantities of western produce, and a considerable proportion of the agricultural exports of Canada West, pass through this port to the S and E, while the manufacturers of the Oswego and the western Oswego also work, passing their goods to the S and E. On the canal the city in 1860 was \$24,144 tons. The manufactures are also, in particular, a starch factory, established in 1868 employs 200 hands, and a capital of \$30,000, and eighteen

flour mills grind at the rate of 10 000 barrels a day. In 1863 the receipts of grain at Otago from Lakes Michigan, Huron, and Erie amounted to 12 840 861 bushels, of which 8 786 425 bushels were of wheat. The harbour is defended by Fort Otago. Pop. (1860), 16 816.

OTAGO a prov. New Zealand occupying the southern part of New Zealand or Middle Island is bounded N. by the prov. of Canterbury; E. W. and part of the S. by the sea, and on the rest of the S. by the prov. of Southland, which was detached from it in 1861, extreme length, 160 m., breadth 186 m., area, 17,000 000 ac. The western part of this large territory consists chiefly of a rugged alpine country covered with forest, and offering little or no land for pasture or cultivation. But the E. and central portions possess well-watered agricultural and pastoral districts of great fertility. Its coast line is much indented on the W. and still more on the N. where Forrester Strait separates it from Stewart Island, but is nearly continuous on the E. where it can only boast of the fine harbour of same name, at the bottom of which Dunedin the capital stands. A large portion of the surface is covered by mountains three of which one near the N.W. extremity, a second in the N.E., and the other near the centre, exceed 6000 ft. while at least a dozen more exceed 4000 ft. The intervening valleys however watered by fine streams, contain extensive tracts of fertile land, well adapted both for agriculture and grazing. At present, however Otago derives its importance from its gold fields which upon their discovery in 1861 immediately attracted large numbers of miners, and suddenly raised it to a wealthy and populous colony. The principal gold districts as yet known and worked, are in the northern part of the province around Dunedin in the neighbourhood of Lakes Wakatipu in the centre, and in the S.E. part around the river Taupaka. The precious metal is likewise found widely dispersed in greater or less abundance in other districts. In the few months of 1863 the Wakatipu field sent by export to Dunedin 191 825 oz. of gold. Dun tan sent 185 798 oz. and the Taupaka district 116 637 oz. But this by no means represents the total produce of the gold mines of Otago. In the year ended July 31 1863 514 285 oz. were exported from the port of Dunedin and 92 460 oz. the produce of Otago, from other parts of New Zealand. To these amounts must be added 28 607 oz. lodged in the Dunedin treasury in excess of the balance on hand at the end of the previous year. The augmented total of the year's produce, therefore, was 547 288 oz. of a most valuable of £2 188 939. The weight exported in the previous year was 408 448 oz. making a total estimated value of £4 042 080 for the two years.

Recently published statistics show the effect of this discovery of gold in Otago. In the year 1867 the population of the province was 4631 and there were 79 females to every 100 males. That disproportion was rapidly increased on the discovery of gold, and in 1861 the population having risen to 27 105, there were only 28 females to 100 males. This was the result of the first rush for the diggings. Three years afterwards at the census of 1864 this enormous difference had been reduced, and there were 50 females to 100 males. The immigration into Otago from the United Kingdom in the period here embraced, reached its highest point in 1863, when it comprised 2171 males and 1868 females the largest addition to the population of Otago have been from Victoria, whence there arrived, in 1863, 20 150 males and 2892 females. There have been many departures also from Otago in the last few years, or the population would be much larger than it is. This is shown in the following table—

	Immigrants into Otago	Emigrants from Otago	Excess of immigrants
1861	18 911	6 065	14 146
1862	30 817	15 092	14 675
1863	26 428	8 111	20 811
Total	74 960	29 268	48 943

In Dec. 1864, the European pop. amounted to 184 181 and on Dec. 31 1865 to 201 712—126 894 males and 74 818 females. OTAVALO a. N. America, Ecuador 46 m. N.E. of Quito, on a picturesque site surrounded by beautiful gardens. It consists of straight streets, and houses formed of adobe, with tiled roofs, and contains two fine churches and a chapel. The inhabitants about 8000 are industrious and manufacture ponchos and similar articles.

See ILL. GAZ.—Vol. II.

OTTAWA [add.] formerly Bytown (see Guelph), a N. British America, Canada West, on the Rideau canal at the mouth of the Rideau River and r. bank Ottawa, 87 m. above its confluence with the St. Lawrence, 100 m. W. Montreal. The canal which is crossed by a massive stone bridge and is afterwards continued to the Ottawa through nine magnificent locks, divides the place into two parts, called respectively the Upper and the Lower Town. Both are well laid out in wide regular, and uniform streets, which for the most part intersect each other at right angles. The principal quarters are supplied with gas. The churches six in number belong to the following denominations—Church of England, Church of Scotland, 1 res., Episcopal Methodist, Wesleyan and R. Catholic. The last, which makes some pretensions to architectural display ranks as a cathedral. The principal educational, literary, and benevolent institutions are the R. Catholic college, the Canadian Institute, the Mechanics' institute and steamship, the Bible society, the General hospital superintended by the Sisters of Charity and the Protestant hospital. The monuments though numerous and not unimportant, are in a great measure eclipsed by the lumber trade which forms the mainstay of the place and the material of which is furnished to a greater extent by the surrounding district than by any other locality in Canada. The supply furnished here forms almost the entire cargo of the spring and fall fleets when they return to Europe and yet leaves a considerable surplus for the American market, in which a large and increasing demand for Canadian sawn timber has sprung up. Besides its advantageous position for commerce Ottawa is famous for attractions of another kind. At its W. extremity are the celebrated Chaudière Falls—in some respects rivaling and at all events surpassed on the N. American continent only by those of Niagara. At its N.E. extremity are two other falls where the Rideau keeps up a grandeur into the Ottawa. While nature has thus formed scenery of singular beauty and grandeur art has done something to heighten the effect by the erection of a suspension bridge, which spans the chasm of the Chaudière Falls, and thus unites the two provinces of Canada East and Canada West. Ottawa sends one member to the legislative assembly and has been designated the cap. of Canada, in the event of the confederation of the provinces of British America. Pop. (1861) 14 996.

OTAVANA, a N. American empire Gallia, circle and 14 m. S.E. Stanislaus, with a fine castle. Pop. 2504.

OVALLA a. in Chi., prov. Coahuila cap. dep. of same name, on the N. bank of the Rio de Barranca with two churches, two schools, and 12 288 inhabitants. Copper mines are worked in its vicinity.

OVAMBO, or OVAMBO a people, S. Africa inhabiting a territory of which only a very narrow tract has yet been explored but understood to lie between lat. 17° and 19° S., lon. 12° and 17° E. and to be bounded N. by the Cameroons, W. the Atlantic, S. the Bushman's country and Demara Land and E. several independent tribes. Nangoro the residents of the king or chief and therefore entitled to rank as the capital is in lat. 18° S. and lon. 16° E. The Ovambo are of very dark complexion, tall and robust, and though remarkably ugly have looks which bespeak determination and independence. The women when young possess very good figures, but lose them as they grow older and become exceedingly stout and ungainly. The hair of both sexes is short, crisp, and woolly. The men often shave off leaving the crown untouched, but the women wear and stuff it with a kind of red paste, in the manner practised in many other parts of Africa. Some of the so-called ornaments are particularly preposterous. Among others are iron anklets, some of which weigh two or three pounds and a pair of them is placed on each leg. The other principal female ornaments are a profusion of cowries and other shells, and bands of ivory and colour so arranged as to hide a considerable part of the person, and thereby no far supply the deficiencies of a dress which both in the men and women is very scanty. Their staple food is a kind of grain like Caffre corn converted into a coarse starchy which is always served hot either with melted butter or sour milk. The houses are of a circular form, and resemble gigantic beehives with a throat of 16 ft. and a height not much exceeding 4 ft. These huts, arranged in groups, are inclosed by strong palisades, across

which a passage, intricate as a labyrinth, leads to the abode of the master and his servants, open courts, granaries, byres, pig-sties, &c. The domestic animals thus accommodated are oxen, sheep, goats, pigs, dogs, and poultry. The arms consist of bows and arrows, the latter usually tipped with bone or iron but seldom poisoned, spears, and knob-kerries. In addition to these there is usually a dagger kept in a leather sheath which is carefully ornamented with thin copper wire. Though thus provided with weapons offensive and defensive, the Ovambo are peacefully disposed and remarkably industrious. In tilling the ground, which seems to contain an alternation of sand above and blue clay beneath and to be on the whole very fertile all male and female, bear their part. Apparently the only implement used is a rude species of hoe. The task of clearing the growing crop, reaping it, and afterwards grinding the grain by means of a stout pole in a mortar or hollow wooden tube, falls chiefly on the women; but the men in the season are not idle, being employed either in tending the cattle (of which they possess vast numbers, or in making trading excursions to the neighbouring tribes, with whom they exchange cattle and ivory (procured from elephants taken in pitfalls) for beads, iron, copper, shells, &c. Though neither from nor copper is indigenous, the Ovambo have the art of smelting the ore and making some rude articles of hardware from the metals. In point of morals they do not suffer by comparison with any African tribe. There are hospitable strictly honest affectionate, humane, particularly to those of their kindred who from disease, age, or any other bodily infirmity require nursing and have a strong love of their native soil. They are also decided monogamists making it a boast that they are ruled only by a single chief while the neighbouring tribes are usually subject to many masters. Their morality in private life suffers much from the prevalence of polygamy. A man may not only take as many wives as he pleases but treat them as saleable commodities, disposing of them to others as often as captive, avarice, or poverty prompts him. On the subject of religion it is difficult to say what are the ideas of the Ovambo but there can be no doubt that they are meagre in the extreme.

OYEATSCH, a tn. Russia gov. Volynia, cap. circle of same name, on the Noring, 76 m N Zimorin. It has six churches and a charitable institute. Pop. 8468.

OWEN SOUND a tn. British America, Canada West, cap. co. Grey at the mouth of the Sydenham, in the sound of same name, on the S side of Georgian Bay Lake Huron, with six churches, several schools, brick Mills, tanneries, and some general trade. Pop. about 2000.

OWASSO, or **OWASSO** a tn. U. States, Michigan co. and on both sides of the river Shiawassee on the Detroit and Milwaukie railroad 78 m. N W Detroit and connected with Lansing 28 m. distant, by the Amboy Lansing and Traverse Bay railroad, the machines shops of which are located here consequently it is a very important depot. It is pleasantly situated on undulating ground and contains six churches, a bank, school, and public library. The river affords abundant water power which is utilized in driving flour, saw plants, and other mills. The chief articles of export are wheat and wool. It was incorporated in 1869. Pop. (1880), 1160.

OXFORD two places U. States—1 A vii Ohio, on Four Mile Creek and the Cincinnati and Indianapolis Junction railway near the Indiana boundary 30 m N W Cincinnati. It contains the Miami university a female college capable of receiving 150 boarders, a female seminary and a female institute. Pop. (1880) 2414—2 A tn. Mississippi, cap. co. Lafayette, on the Mississippi Central railway 160 m N Jackson. It contains two churches, and the state university which in 1850 had ten professors, 140 students and a library of 5000 vols.

OLAHUKEE or **PORT WASHINGTON** a tn. U. States, Wisconsin on the W. shore of Lake Michigan 105 m N by W Chicago. It possesses various iron foundries, breweries, and other industrial establishments and carries on an active trade. Pop. 5000.

OLZMAN BAZAR, a tn. European Turkey 35 m. W S W Rhodus, in the midst of orchards and vineyards. It is a large and thriving place, with several mosques and baths and a Turkish hospital and is inhabited by 700 Turkish and 100 Bulgarian families.

P

PABUR, a river India, which issues from Lake Chera maj close to the Bermuda Pass in Bismark at the height of 15,339 ft above the sea, in lat. 81° 22' N., lon. 78° 12' E. and flows S descending for the first 10 m. at the extraordinary rate of 54½ ft per mile and for the next 10 m. at the rate of 2½ ft. per mile. Having thus reached Chergawa it turns S.W. pursues its course through a beautiful, fertile, and highly cultivated valley forming the finest part of Bismark and finally joins the Tona. Its total length is about 60 m.

PACIETTE, a dist. India prov. Bengal between lat. 21° 26' and 22° 54' N. lon. 85° 46' and 87° 10' E., is bounded N. by Rangpur and Beerbhoom, S. E. by Dinapore, S. by Barabhoon, and Benghalpoore, and W. by Chota Nagpore. Length, N. E. to S. W. 163 m. breadth 93 m., area, 4722 sq. m. The surface, so far as can be judged from the scanty information furnished is much diversified, being in some places covered by hills of moderate height overgrown with forests and jungle, in others intersected by plains or open valleys, and in others (particularly in the S. W.) presenting a perfect mass of mountains and ravines connected with the adjacent highlands of Chota Nagpore. The strata seem to be generally composed of granite, gneiss, and syenite, but in the N. hills sand and iron ore have been found. The principal rivers are the Damooda, the Kookerwah, and the Koon. In the plains and valleys rice is the staple crop, but cultivation is in a very backward state and it even appears that much land which was formerly cropped has been allowed to return to a state

of nature. This is said to be owing in a great measure to the absurd and ruinous practice of sowing the land so long as it yields any return till it is completely exhausted, and then leaving it for a series of years to recover itself as best can.—Further the reported cap. of the above dist. 135 m. N W Calcutta, is a ruined town, which must once have been a place of some consequence since its fort though a mere wilderness of jungle, had an area some miles in extent, and was surrounded by a triple labyrinth of moats and mounds.

PACHILAN a dist. or prov. Indian Archipelago, on the S side of the island of Java, bounded E. by Kediri S. by Madaya, and W. by Singur. Its chief town situated at the head of a small and ill-sheltered bay, is in lat. 8° 18' S., lon. 113° 18' E. The chief product is rice. To this the Dutch have recently added the forced culture of coffee, black pepper, and cinnamon. Its area is 773 sq. m. and its pop. 88,278—all Javanese, except 80 Europeans and 100 Chinese.

PADIVIL, an immense tank, Ceylon, N. province, 38 m N W Trincomalee. As it originally existed it was the basin of a broad and shallow valley formed by two lines of low hills, inclosing a space of from 12 to 14 m. in length. By constructing an enormous embankment across the mouth of this valley the drainage of a large extent of country was confined and accumulated into one great tank or lake by means of which fertilizing streams were diffused over tracts which were otherwise have been almost barren. It is difficult now to give exact measurements, as the embankment (having been allowed to fall into disrepair) gave

way. The whole of the surrounding country was in consequence inundated, and the water pursuing its restless course, burst into the sea at the town of Kuala and soon covered the fertile plain, previously covered with rice fields into an extensive lagoon. The level at which the water stood when the embankment was entire has been obliterated by a recent overgrowth of wood and jungle. The breach in the embankment is a chasm 300 ft. wide and 100 ft. deep. In its bottom the water continues to issue in a stream so large as to deserve the name of river. The embankment itself, judging from the part of it still entire must have been a prodigious work—nearly 11 m. long, 200 ft. broad at the base, 50 ft. broad at the top, upwards of 70 ft. high and food throughout its whole extent with layers of squared stone. The quantity of water still confined within the valley and therefore to be regarded as forming no longer an artificial but a natural lake, is very considerable and when Sir J. E. Tennant saw it, it covered an area of 10 m. in diameter. That it abounds in fish may be inferred from the prodigious number of water-birds—pelicans, flamingoes, herons, egrets, ducks, &c.—which not only resort to it occasionally but nest and build their nests on the surrounding trees. The description given by Sir James of what he justly calls 'an extraordinary scene which unexpectedly presented itself when he arrived near the centre of the tank is not unworthy of quotation.—A sheet of still water 200 or 300 yards broad and about half a mile long, was surrounded by a line of tall forest trees whose branches stretched above it. The sun had not yet risen when we perceived some white objects seated in large numbers on the tops of the trees and as we came nearer we discovered that a vast colony of pelicans had formed their settlements and breeding places in this solitary retreat. They literally covered the trees in hundreds and their heavy nests like those of the swan, consisted of large sticks formed great platforms sustained by the horizontal branches. In each nest there were three eggs rather larger than those of a goose and the male bird stood patiently beside the female as she sat upon them.

PAHANG [old] a virtually independent state Indian Archipelago, on the E. end of the peninsula of Malacca bounded with very undefined limits by Johore on the W. and Temenggor on the N. Besides the mainland along the shores of which it stretches for about 80 m. it possesses two chains of islands, which lie parallel to the coast at the distance of about 30 m. It is well watered, chiefly by the Pahang and the Indrag and has many spacious bays and fine sandy beaches but its interior is for the most part rugged and mountainous, though none of the summits rise higher than 2221 ft. Its rocks consist of granite, sandstone and clay-schist. The vegetable products of economical value are timber, rattan, gutta percha, and damar and the minerals iron, gold and tin—the two last obtained by washing. Among the wild animals are the elephant, two species of rhinoceros, the tiger, the leopard, the buffalo, the wild ox, and several species of deer and monkey. The bulk of the population consists of Malays, tolerably civilized. Pahang is nominally subject to the sultan of Johore who is now a British paramount and usually resides at Singapore.

PAHLUNPORE a petty state India in the N. of Guler, between lat. 26° 57' and 34° 41' N., and lon. 71° 51' and 75° 47' E. and bounded N. by Soroche, E. by the Ganges, S. by Kanyala and Damsin, S. by Patna and W. by the petty state Tharwad. Towards the N. and W., in the direction of the Ruma the surface is level and covered with jungle. In the neighbourhood of the capital it is diversified by a succession of mud-hills and small valleys. The only range descending of the same stretches from N. to E. separating Guler from Jodhpur. The soil in the N. and W. is light and sandy; in the S. and E. towards the hills, is a rich black mould, both soils depend for their productivity on the rains and on artificial irrigation, the means of which are wheat, rice, and barley. The sugar-cane thrives well on the black loam under the hills and is cultivated to some extent, but instead of being made into sugar, is merely sold in the stick or converted into gur. Only a little cotton for home use is grown near the villages. Much of the jungle land is well adapted for grazing. The revenue of the state amounts to £280,000. Pop. about 180,000.

PAHLUNPORE, emp. of the above state \$18 m. N. by W. Surt. Both its manufacture and trade are of some importance. It is surrounded by a wall, and contains 30,000 inhabitants, many of them artificers and shopkeepers.

PAINEBELL, a village in U. States Ohio, emp. co. Lake on Grand River here crossed by stone viaduct of four arches and on the Cleveland Painesville and Ashtabula railway 3 m. from the best natural harbour on Lake Erie, 23 m. N. E. Cleveland. It contains a courthouse and jail six churches a large union school a female seminary two flour mills two tanneries two foundries, and two engine factories. The business portions having been destroyed by three disastrous fires, have been entirely built anew of brick within the last three years. Pop. (1900) 2576.

PAISANDU a town in America, Banda Oriental, 1 bank, Uruguay 15 m. above Concepcion. It is a frontier place with deserted houses, and gardens overgrown with weeds. This unhappy state of matters is owing to the civil war, which ravaged the country and destroyed its prosperity. Pop. 2383.

PAKAIOTAN see PERALOTAN

PAK-CHAN a river E. side Bay of Bengal running between the Tenasserim Provinces (British Burmah) and Siam. It is about 2 m. wide at its entrance and contracts but very little for 10 m. affording ample room and deep water for vessels of the largest burden with well sheltered anchorage. About 15 m. up the river is a mile wide, and the banks are steep and densely wooded the depth of water being 5 or 6 fathoms.

PAKLIAT a town in Siam a bank of the river about 3 m. above its mouth. Immediately above it the river winds round in a manner so remarkable that the distance by land serves the purpose between the extremities of the bend is only half a mile while it is 10 m. by water. At its point the depth in the channel is sufficient for the largest ship. Pakliat has an estimated pop. of 7000 consisting principally of natives of Iloilo, who during the war between Siam and that country were led off into captivity.

PAK-NAM a town in Siam on the Mekong about 3 m. above its mouth. It is a place of some importance, being the seat of a governor and not only surrounded by better fortified walls than defended by batteries and other fortifications, erected on a sandbank which rises out of the water near the W. or right bank of the river.

PALAMALOTTAN or **PALAMCOTTAN** a town, and military station India, prelat Malabar, dist. and 3 m. N. E. Tinnevely and equidistant 68 m. S. by W. from Malabar and 8 W. from Remnad.—The town stands on an extensive plain 1 m. E. of the Tambavur river crossed by a good bridge. Within the town are the old hosp. tel and jail and the place of arrest for the native troops.—The fort built on a naked rock of mouldering granite, contains the European officers' houses, barracks, an oblong square on its S. face, and the European artillery barracks, formerly the residence of the commandant. The new hospital has been built on a rising ground outside the fort, and between the latter and the bridge stands the church of the Church Missionary Society a plain structure with a handsome tower and spire 110 ft. high. Near the church is the printing establishment.

PALAMOW a dist. and in India, prelat Bengal.—The river between lat. 23° 12' and 24° 22' N. lon. 84° 19' and 84° 31' E. is bounded W. by Behar and Ramgaur E. Ramgaur S. Chota Nagpore S. W. Kharagpur and W. Mirzapore area, 5400 sq. m. It has a rough and irregular surface, traversed in the rainy season by numerous torrents which carry the drainage chiefly to the Koel an affluent of the Rone, and extensively covered with forest or jungle. Wild animals are very numerous, and include among others the gaur, a banyan quadruped much larger than the ordinary one but apparently of too uncertain a nature to be ever domesticated. Lions are only occasionally seen but tigers abound, as do also bears, leopards, wolves and snakes. Among the last are the bo-constructor of enormous size, and the cobra-de capello. The minerals not yet fully examined promise to be valuable. At Singra, on the right bank of the Koel, coal and iron ore are known to abound.—The towns of same name, cap. of the above dist. standing in a mountainous tract among seasons of coal and iron 135 m. S. W. Patna, is an important place.

PALAVERAM a military cantonment, prelat and 12 m.

S.W. Madras, dist. Chingleput at the W foot of a range of hills of same name, and nearly 4 m. from the Coromandel coast. The cantonment, which is exclusively for native troops, is about a mile long by half a mile broad. The officers' houses, arranged in four rows, are well built of brick and chrome, a few with terraced roofs, but most of them tiled. The barracks and hospitals are substantial buildings, with arched roofs and granite floors. The site, however, is so flat, and the *Adyar* which drains it, so sluggish, that in the rainy season the ground becomes swampy up to the officers' houses, and the huts of the men have been occasionally washed down. As a remedy lines obtained near the bazar on the right of the cantonment have been substituted for the huts. Both lines and bazaar are kept clean and dry.

PALGHAT or **PALOGAT** is a India presid Madras, dist. and 30 m. S.W. Coimbatore, beautifully situated in the great depression of the W. Ghats, on the direct line of communication between the Coromandel and the Malabar coasts and on the N or right bank of the Palnar, an affluent of the Ponnai. It consists of a fort, in the form of a square of about 200 yards, inclosed by a wet ditch and walls of rough granite flanked with bastions, and of a large struggling town, tolerably well built, and containing a Protestant and a R. Catholic church and a number of insignificant pagodas. The manufactures consist chiefly of twinning coarse cloths, woven mats and brass and copper ware. The position of the town gives it considerable commercial importance as an emporium, the merchants transmitting rice, betel, and coconuts off from the coast and also besides engaging in the timber trade active as agents for the transmission of Malabar Malabar, and diversely cloth Coimbatore give shillies cotton etc. Pop about 3000.

PALLANNA is a S.W. Africa, territory Galangue, near the S frontier of the Namibiana country lat. 13 35' S., lon. 1° 30' E. It stands on an open plain nearly equidistant from the Ekabene on the E. and the Kamato on the W., is inclosed by a palisade and a ditch, and has a pop. of 2500.

PALLEE, in India Rajpootana, state and about 70 m. S. Jodhpur, was once surrounded by a wall which is said to have been demolished at the special request of the inhabitants, because its strength only made the possession of the place an object of keen contest during the civil wars of Jodhpur. The ruins thus produced gives the place a somewhat desolate air; but it still contains nearly 50,000 inhabitants, and is so advantageously situated at the intersection of the great main mercantile routes from Cutch to the N. provinces and from Malwa to Bhawalpore and Sind, that it is the principal mart of W. Rajpootana, and carries on a very extensive trade, of which the principal articles of home produce are salt, woollens, coarse cottons and paper, the two last made in Pallee.

PAMALOMBE a small lake, S.E. Africa, formed by an expansion of the Shire about 10 m. from its exit from Lake Nyasa. It is 10 or 12 m. in length, and 5 or 6 m. broad and is nearly surrounded by a broad belt of papyrus, so dense that when beaten down it supported the small temporary huts of the natives. The papyrus plants, 10 or 12 ft. high grow so closely together that air is excluded, and so much and abundant hydropne gas evolved, that the *Livingstone's* boat was blackened in one night's exposure to it.

PANDERMA (see *Panderma*) is a Turkey in Asia, Anatolia on the coast near the peninsula of Cyzicus which projects from the E. shore of the Sea of Marmora, and is connected with the mainland by a narrow isthmus, about 60 m. N.W. Constantinople. It consists of about 1000 houses, inhabited chiefly by Greeks, has a regular communication by steam with the Turkish capital, and carries on an active trade. On the peninsula part of the walls and many other remains of the ancient Cyzicus are still found.

PANLEPU or **PANPUR** a dist. India, N.W. Province between lat. 28° 55' and 29° 45' N. lon. 78° 40' and 77° 15' E. is bounded W. and N. by Garhwal, E. the Jumna, separating it from Meerut and Meerut, and S. Delhi, length N. to S. 65 m., breadth, 80 m., area, 1279 sq. m. The surface is level and waters not irrigated by the Jumna, or the Delhi canal and its branches, has generally a barren and repulsive appearance, consisting in many places of a mere waste of unproductive sand, with a scanty growth of stunted shrubs and coarse herbage; and in others, of a soil so full of saline ingredients that the effluence has on the surface

like snow. On some fertile tracts a good deal of sugar-cane is grown. The jungles, extending sometimes as far as the eye can reach abound in game especially hares, quail, partridges, and porcupine. Pop 283,430.

PANREPT cap. of the above dist., in a fertile tract finely diversified by clumps of trees 30 m. N. by W. Delhi, is surrounded by ancient walls and ramparts, built at different times and in different styles and of very irregular shape. The houses, built for the most part of brick, and in some instances of two stories, are usually provided with balconies, and occasionally surrounded by copulas. Within the town are numerous temples the cupolas and spires of which, with their white and polished surfaces, have a pleasing and striking effect when viewed from a distance and two large curvilinear minarets, which seem to be the great centres of resort and commercial activity. The environs are overgrown with ruined tombs, some of which must originally have been splendid structures. Panrept is famous for two great battles. The one, fought in 1526, between Baber at the head of 13,000 men, and Ibrahim Panat, king of Delhi with an army of 100,000 men and 1000 elephants established the Mogal dynasty in the person of the former the other fought in 1781 between the Afghans, under Ahmed Shah Durrani, and the Marathas, under Sadashiv who there proved most disastrous to the latter who fed completely routed, and lost nearly the whole of their arms and many of their most distinguished leaders in the battle or the flight. Many of the houses are said to be unoccupied, but the pop. is still estimated at 18,570.

PANRYN KERRY, a salt lake Ceylon near its F coast, 34 m. S.E. Trincomalee. It is 6 m. long by 3 m. broad, and together with the vast saline marshes which surround it, supplies the whole district with salt. It is usually covered with myriads of wild fowl including flamingoes, white peacocks, wild ducks, curlews, snipe, &c. According to tradition Panryn Kerry was once the site of a magnificent residence and was reduced to its present state by a subsidence of the land followed by an eruption of the sea. The locality, now wild and desolate is not without indications confirmatory of the tradition.

PANGANI a tn on the F coast of Africa on a bay and at the mouth of a river of same name, to the N.W. of Zanzibar. It is surrounded by thick thorny jungle which though important for defence is not without its disadvantages as numerous leopards make it their lair and cubs of about twenty African houses and a number of cattle huts, each with its large mud encircled courtyard where all affairs are transacted. Plantains, arums, and coconuts grow in the town and betel pappaws and the plant an Indian fruit, in the environs while in the surrounding hills below maize, sesamum and other grains are extensively cultivated. Pangani drives a thriving trade with the Nguru, Chupa, and Masai countries. Pop, including that of three adjoining villages, about 4100 Of these a large proportion are female slaves.

PANGANI a river, F. Africa, which is supposed as it has never been explored to its source to be formed by several streams from the lofty range to which the name of Zanzibar of Kilimandjaro belongs, about lat. 5° S. lon. 38° E. flows first easterly 8 to about lat. 5 then E.S.E. and at Pangani falls into a bay of same name in the Indian Ocean to the N.W. of Zanzibar in lat. 6° 25' S., lon. 38° E. At Kilindi, 36 m. of direct distance above its mouth, it is about 80 yards broad and flows deep and strong under high banks of stiff clay reddened especially after rain, by the rich loam of the hills and abounds in hippopotamuses and crocodiles. At its mouth it is about 200 yards broad but having a depth of not more than 8 ft., is navigable only by country craft. Even in them when the strong current is met by wind and tide, the navigation is dangerous.

PANGASINAN (adj.) a prov. of the island of Luzon, in the Philippine Isles, bounded N. by Ilocos W. Zamboanga, S. Pangasinan, and E. a mountain chain, inhabited by wild tribes length, 78 m., breadth, 44 m., area, 1240 sq. m. It consists almost entirely of a beautiful and well watered valley of remarkable fertility producing in abundance rice, maize, pulses, and sugar-cane. The mountains yield sulphur and arsenic, and many of the inhabitants find employment in washing the sands of the streams for gold. On the sea-coast large quantities of bay-salt are made for export. The natives

consent of two distinct races, speaking different languages. Langkaya is the capital. Pop of prov 224,180

PANGRAGRAMONE, a vil Caylen Central Province, a little to the W of Blatun, on the highest to Kandy. It consists of mud houses, built under towering trees of great age and prodigious size, and from being situated in a hollow suffers much by the rains. The inhabitants classify it not as classless Moors, have erected a small mosque of the humblest specimens. The adjoining district was in ancient times so famous for its fertility, that it received the name of *Wol Lakeya*, or the Hundred Thousand Rice-fields. It still retains the name but loses it by the miserable cultivation which prevails.

PANG-TSE, a ta Chinse plecterism seated among hills on the Yang-tse-kiang, a little above the point where the river quits the province of Kiangsu to enter that of Nanchow. It is surrounded by a wall which not only incloses the town proper but also a large area of barren hill and valley, obviously with the view of converting the ridges themselves into barriers of defence. Unfortunately within the theatre of the civil war Pang-tse has been so severe a sufferer that only a few of its buildings remain.

PANJANG (Pulo), an Isl Indian Archipelago off the E coast of Sumatra, from which it is separated by a strait which bears its name. It has a flat alluvial surface, and produces the best grade sago, which is exported by the Malays to Singapore and Malacca to be refined by the Chinese. It is inhabited chiefly by wild tribes of Malay origin.

PANKOW a vil Prussia, prov Brandenburg, gov Potsdam and so near Berlin that it may be regarded as one of its suburbs. It has a handsome church completed in 1859 and a Roman Catholic seminary, and is a favourite pleasure resort of the Berlin aristocracy. Frederickshagen, containing a royal palace and fine gardens is connected with it by a beautiful avenue. Pop 1100

PANKAWA, a ta Austrian empire, Bohemia, circle Bunsau near the frontiers of Prussia with line-kilns and extensive lime-stones and sandstone quarries. Pop 1100

PAO TING LOO, a ta China prov Szechuan, cap. dist. of same name, on an affluent of the Fuchow, 80 m. S.W. W. Pekin. It stands in a fertile country and as the residence of the governor of the province takes rank next to the capital.

PAPALI (Pulo), an Isl in the Australian archipelago, which attended the Austro-Italian war in 1869 the Romagna detached itself from the Papal rule and in the time of Garibaldi's revolutionary advance the Marches and Umbria followed and were incorporated with the kingdom of Italy. By these changes the territory of the sovereign pontiff which previous to 1869 embraced an area of 17,218 sq. m., with 1,214,668 inhabitants was reduced to 4,501 sq. m. and 622,106 inhabitants. Of the former twenty legations and delegations into which the territory was subdivided, only five remain viz Rome and the Commerce, pop 826,509; Viterbo, pop 128,934; Civita Vecchia, pop 90,701; Velletri, pop 62,018; and Frosinone, pop 104,019. The city of Rome had 180,359 inhabitants in 1868 and 194,587 in 1881. No account is published of the revenue and expenditure of the Papal government. But, according to statements in the Italian press the revenues in 1883 amounted to 4,500,000 scudi, besides 1,500,000 scudi in Peter's pence; and the expenditure to 10,000,000 scudi. Another account gives the budget of 1885 as representing an income of 3,383,994 scudi, and an expenditure of 11,947,370 scudi, leaving a deficit of 5,593,377 scudi. The large yearly deficiencies are partly supplied by contributions from Roman Catholics in all countries, and partly by loans. The loan thus contracted in 1860 was of 10,000,000 scudi. The total amount of the public debt is unknown. The pontifical army is raised by enlistment in foreign countries, as well as in the Papal States. At the commencement of 1886 it numbered 9568 men including 8600 infantry and 556 cavalry. The foreign trade of the Papal States is very small and chiefly carried on through the excellent port of Civita Vecchia. With the United Kingdom the trade in the five years 1861-5 is thus stated.—

	Exports from United Kingdom.	Imports to United Kingdom.
1861	463,197	41,356
1862	45,091	807
1863	25,968	1,992
1864	71,259	2,279
1865	12,858	22,921

There are four lines of railway in the Papal States.—1 Rome to Capranza, 2 Rome to Civita Vecchia, 3 Rome to Corone, 4 Rome to Frascati and Albano. The total length being 84 m. The traffic upon them is small, on the Frascati line there is an annual loss, and on the others but little profit.

Since 1860 the authority of the Papal government has been maintained by a French garrison in Rome, and in September 1864 the emperor of the French entered into a treaty with the king of Italy that the garrison should be withdrawn before the end of the year 1866. The articles of the treaty were as follows.—1 Italy undertakes not to attack the present territory of the pope and to prevent by force any external attack. 2 France will withdraw her troops gradually, the army of the pope becomes organized, the evacuation will nevertheless be accomplished within two years. 3 The Italian government will not protest against the organization of a papal army, even composed of foreign R. Catholics volunteers, sufficient to maintain the authority of the pope and tranquility both at home and on the frontiers of the Papal States, provided that this force does not become a menace of attack against the Italian government. 4 Italy declares herself ready to enter into an arrangement for assuming a proportional part of the debt of a former Italian of the Papal States. In accordance with the terms of the treaty the withdrawal of the French garrison from Rome commenced in November, 1866, and has since been completed.

PAPUGNY a river S. India, which rises in the N. E. of Mysore, flows N. E. into dist. Cuddalore, and after a course of about 90 m. joins the sea near its bank. At Tippasalla, 3 m. above the point of junction it is 800 yards wide.

PARAD a ta Austrian empire, Hungary, co. Heves, at the foot of the Matra Hills, in a beautiful valley; has glass works, copper and silver mines and mineral springs, with a large and much-frequented bathing establishment. P 2000

PARALLOOR a vil India presid. Madras Poodoocottor or Tondaman Country on the Vellar 80 m. S.W. E. Trichinopoly. It possesses a beautiful pagoda with a wall within it out in a rocky bottom. This wall, according to the natives has a very remarkable property. Once every year within the months of February, March or April when the water rises up to a certain mark the sound of music is heard below and continues during 83 hours. The English have made a large concourse of people annually assemble to listen with devout astonishment to this thrice distinctly Brahminical trick.

PARANA or **PARADA** [add] a ta La Plata, and seat of its government, prov Entre los Rios, a bank (river) same name, lat 31° 42' 54" S, lon 60° 52' 39" W. It stands on a plateau which is evidently a continuation of the high land on the opposite bank, is regularly built in the form of a quadrangle, subdivided by streets crossing each other at right angles, consists of houses partly old and indifferent appearance, and partly new, all of brick, plastered and whitewashed, and has among its public buildings several churches, a governor's residence and government offices, houses of legislature and a theatre. Its gardens numerous and well arranged, add much to the comfort of the inhabitants and give the whole place a cheerful appearance. The chief industrial establishments are extensive tanneries and ironworks. The trade in the produce of the country is as yet imperfectly developed, the imports are rapidly increasing. Pop 6500 mostly coloured persons of diverse stocks.

PARAKATSHIV or **PARAKATSH** a ta Turkey in Europe, Morla, circle Thessalonica, on the Zrimza, a little above its confluence with the bank Morava, 75 m. S.W. E. Belgrade. It has a church, a school, and a pop. of about 5163.

PARBUTTY, two rivers India.—1 *E. Parbutty* which rises close to the town of Bijnore, in Bundel's Dominion, lat. 25° 31' N, lon. 77° 46' E. flows first N. for about 40 m. then E. for about 30 m. and joins the Ghaghra at its bank lat. 25° 47' N; lon. 78° 31' E.—2 *W. Parbutty* which rises in Malwa on the N. side of the Vindhya range lat. 23° 45' N, lon. 76° 53' E. flows successively N. E. and N. W. and joins the Ghaghra at its bank, after a winding course of 290 m. It is a shallow stream, easily fordable everywhere in the dry season.

PARAKIA (anc. Paros) a ta Greece, nomarch Cyclades, cap. and on a bay on the W. coast of the island of Paros. It occupies the site of the ancient city, is the seat of a justice of

place court, and over the beauty of some of its public buildings, particularly its castle and its church, to their having been mainly constructed out of the ancient ruins. In the vicinity is Mount Elise, or Marpessa, which rises to the height of 4000 feet, and is celebrated for its quarries of white marble. PARIS is a British American. Canada West, on Brent, on the Grand River and Smith Creek, and at the junction of the Buffalo and Lake Huron with the Great Western railway. It has three churches, and a considerable trade in flour and lumber. Large quantities of gypsum are quarried in the vicinity and ground for agricultural purposes. Paris is a port of entry. Pop. about 2000.

PARANAY is an Austrian empire, Hungary, co and 20 m. E. Komora, on the railway from Presburg, and 1 bank Danube, opposite to Orma. The Turks were defeated here on their retreat from Vienna in 1683. Pop. 1280.

PARMASTUN is a tin. India, presid. Madras, dist. and 21 m. W N W. Malara, on the S or R bank of the Vignay. It consists of upwards of 1330 houses straggled in dirty and very irregularly formed streets, and occupied chiefly by weavers. It contains several ranges of bazars and a large stone pavilion with an adjoining chattrum, where alms are daily distributed among twelve poor Brahmins, or other travellers. The manufactures consist of superfine duffs, silks, muslins, silk carpets of great value, turbans, &c.

PARHALL is a hill, poor Masle on a swampy plain between the Lencari and the Lergillaquen, 160 m. S by E. Valparaiso. Its streets, following the direction of the trunk road from N. to S., are somewhat tortuous. Its only public building worth notice is its church. Pop. 2200.

PARKAN is a Mexican state Coahuila, near a lagoon of same name. It is a well-built town with several good streets lined with old but handsome houses, a large square, and a fine public walk or alameda. The inhabitants are chiefly employed in the culture of the vine for which the numerous ridges in the vicinity appear to be admirably adapted. The wine produced has a pleasant flavour and resembles the better Spanish wines. Pop. 9000.

PARAVAN is a town, India, presid. Madras, Travancore, 13 m. N. Cochin. It was a place of importance, but having suffered much from the cruelty and rapacity of Tippeco Balab has become comparatively insignificant. It contains two churches, a pagoda, some small temples or native palaces, and a few buildings of European architecture, now chiefly used as stores, upon the tobacco pepper salt &c. The celebrated town of Travancore, the forcing of which by Tippeco led to the first war with him, ran for 8½ through the district of Paravane.

PARRY is a cape on the N. coast of America, Arctic Ocean, lat. 70° 6' N. lon. 128° 48' W. It is from 400 to 500 ft. in height, and nearly opposite to Nelson's Head, the southern extremity of Baring's Land.

PARIR, a state on the E. side of Borneo. Its principal town is lat. 1° 44' N. lon. 116° 26' 30' E., stands about 45 m. above the mouth of a stream, navigable only by boats, and consists of about 400 houses. The products are edible wallnuts, resin, bees wax, rattan, damier and a little gold dust. Pop. of state about 20,000 consisting of Malays, Beggas, settlers from Celebes and several wild tribes.

PARSAIC is a river U. States, which rises at Mandham, in New Jersey flows successively S. N. W. E. and R. and after a very devious course of 90 m. enters Newark Bay. It is navigable a short distance for sloops and lighter up to 1 afternoon, has a fall of 72 ft., which furnishes immense water-power. The beauty of its scenery attracts many tourists.

PATRENG is a town, Italy, Venetia, prov. and N. W. Verona, r. bank Adige, is memorable for conflicts between the Austrians and Piedmontese, 29th and 30th April, 1846.

PATANI is a native state, Indian Archipelago on the E. side of the Malacca peninsula, between Kalantan and Hungora, the latter forming the most eastern province of Siam. The chief town or rather village shown is consular only of about 2000 inhabitants on the banks of a shallow stream, is at lat. 7° N. lon. 101° 45' E. The pop. which was ascertained at 90,000 in 1890 was said to have declined to 64,000 in 1882. This great decrease assuming it to be real, was accounted for by an invasion of the Minnans, who carried off several thousands of the inhabitants as captives and formally annexed the state

to Siam. This annexation is one of the greatest obstacles to the prosperity of Patani where two native dynasties are said to have reigned for nearly four centuries.

PATAPSCO, a river U. States which rises in the N. W. of Maryland flows successively S. and S. E. and enters Chesapeake Bay 14 m. below Baltimore. At this city, up to which it is navigable for large vessels, it expands into a broad estuary. Its total length is 80 m.

PATARNA is a river S. America, Ecuador, which formed by several streams which have their most distant sources in the volcano of Cotacachi, begins to flow under its own name, after forming the cascade of Agroyan and after a course of about 200 m., the latter part of which is nearly due S. joins the Amazon on its l. bank, at Choro Anzures, close to the meridian of 78° W. After leaving the cascade it is navigable by canoes, and lower down it might be navigated by steamers. Its banks and islands are finely wooded, and present much beautiful scenery.

PATIENCE, a cape and bay Russian empire, on the E. coast of the island of Feghallin. The cape, the most prominent and most eastern point of the island is a low promontory formed by a double hill which terminates abruptly. It is surrounded by a rocky shoal, which extends to a considerable distance from the land. The bay formed by the above cape on the E. and Cape Soumouf a high promontory on the W. has mountainous shores and a craggy beach on the N. but on the W. the shores are low and shelving. The bay or Neva, which enters the bay in lat. 49° 15' N. lon. 143° 33' E. has at its mouth a width of about 50 yards, and a depth of 7 ft. At a short distance inland it communicates with a lake. The land along the shore has in some places a deep covering of sand and in others a rich black soil, but the trees, mostly of the thorn kind, are stunted.

PATN is a town, India, Nepal on a rising ground in a valley about 2 m. S. E. Khatmandoo, which it is said to surpass both in safety and in neatness, having been built by the Nepars, who held the country previous to the Ghorka invasion, and possessing a number of handsome edifices.

PAI'VA is a dist. India, presid. Bengal between lat. 24° 8' and 25° 38' N. lon. 84° 40' and 86° 10' E. is bounded N. by the Ganges, separating it from Baran, Tibhot and Monghyr N. E. and S. E. Monghyr S. Monghyr and Behar; and W. and N. W. the Son, separating it from Shahabad, length E. to W. 85 m. breadth 45 m., area 1828 sq. m. It consists almost entirely of a rich alluvial tract, both fertile and well cultivated, and producing in abundance rice the staple for which it is celebrated, wheat, barley, &c. In the W. about Maner and I. Holwarra, much fine opium is produced. Orchards and groves of fruit-bearing trees abound. Pop. 1,200,000.

PATOUAN, an isl. in the Somerset River or Victoria Nile Central Africa, a few miles above and E. of the Murchison Falls, is one of the numerous masses of rock that divide the river between Karuma Falls and the Great Marabout Cataract. The rock is entirely of grey granite from the effects of which beautiful forest trees grow so thickly as to quite shade the island. In the middle of it is a considerable village. A succession of similar islands continues eastward from Patouan to within a march of Karuma Falls.

PATOUK, or PATUGA, a river Central America, which is formed near the centre of dep. Olancho, in Honduras by the junction of the Jalen Triste, Guayape, and Gansabue, flows N. N. E. and falls into the Caribbean Sea by two mouths. The smaller mouth is in a lagoon, and will not admit vessels drawing more than 6 ft. the larger open directly into the sea, and is encumbered by a bed and shifting bar over which the depth is not more than 10 ft. Within it the channel passing through deep alluvium is navigable for 60 m. but beyond a series of rapids occurs rendering further navigation impossible. The total length of the Patouk is about 150 m.

PA-TOUNG, a town in China, on the Yang-tze-kang at the point where it quits poor Soochow to enter that of Houpe. It is a small place, with nothing entitled to special notice except its koo-pau or literary institute, an extensive range of building, in which the competitive examinations are held. According to M. H. these examinations are little better than a sham. The rules to prevent fraud and ascertain the true merit of the candidates, are extremely stringent, but a rich

now can always find out beforehand the subjects that will be proposed for examination, the judges sell their votes to the highest bidder; and any candidate, conscious that in his own person he must fail, has only to go with a sum of money in his hand to some poor graduate of the requisite ability, who persecutes him, and brings him back the diploma.

PATRAS [add.] a tn Greece, Morea, cap. near the Akasha and Ellis, on the N. E. shore of the gulf of same name, leading into the Gulf of Lepanto. It rises on the side of a hill in the form of an amphitheatre; and though laid out ruins by Ibrahim Pasha in 1821 during the war of independence, has been rebuilt in an improved style, and is now one of the finest towns in Greece. It is the seat of an archbishop, and of several courts and public offices, and has a gymnasium, a Hellenist and four parish schools, a lazaret, &c. The acropolis in its vicinity is well fortified. The advantages, position, and the fertility of its districts make it the most important centre of trade in the Morea, and its population, which prevails to its destruction did not exceed 10,000 is now nearly 20,000.

PATUN a petty state, India, Rajpootana between lat. 27° 31' N. lon. 75° 46' and 76° 12' E., is bounded N. W. by Sheikawatie, N. E. by Jhalmer, E. by Udaipur and S. E. by Jaipur; length N. to S. 30 m., breadth 20 m. It consists of an alternation of barren hills and tolerably fertile valleys and is inhabited in most inaccessible parts by Minas who used to carry their depredations into the surrounding districts but have of late been so much curtailed in their sphere of operations, and so severely punished for them by the vigilance of the British government that many of them have at last betaken themselves to agriculture.

PAUUA cap. of the above state 100 m. S. W. Delhi occupies a strong position at the foot of a hill crowned by a fort and is a rather considerable place. On the hill, about half way between the base and the summit stands the palace of the rajah as well as a magnificent temple founded by his family, but the town belongs together with two-thirds of the pergunnah to Benauli, who pursues in retaining it, though strongly solicited to cede it for an equivalent.

PAUK PLITFLN, a tn India, Punjab, about 10 m. W. of the Ravee, and 14 m. from Namok that a much frequented ferry crosses it lat. 30° 17' N. lon. 73° 36' E. It occupies the site of an ancient fort, on the summit of a lofty eminence rising from a perfectly level plain and is supposed to possess peculiar sanctity from having been many years the residence and containing the tomb of a celebrated Mussulman saint Sheikh Farid u-Din whose miracles form the subject of many legends. As those who rub their foreheads on the saint's grave suppose themselves safe from perdition, and access to it is given only during the Moharrum the crowd of visitors at that season is immense, and the crush enormous. Paik Pateson is conjectured to be the spot where Alexander the Great erected colossal altars to mark the E. limit of his conquests.

PAUS (St.) a tn British America, on the E. entrance of the Gulf of St. Lawrence 13 m. N. E. Cape Breton and 50 m. N. W. Newfoundland lat. (N. and) 47° 13' N. lon. 60° 8' 20" W. It is about 8 m. long by 1 m. broad, and is composed of primary rocks, principally mica-slate, dipping N. at an angle of not less than 45°. Its N. E. point, which is properly a detached island separated by a very narrow channel from a peninsula, is from 300 to 400 ft. high and is, as well as the peninsula, so precipitous as to be nearly inaccessible. The rest of the island, also steep and precipitous towards the sea, is traversed by two parallel ranges of hills of which the more eastern and elevated attains a height of 430 ft. The surface is partially wooded with stunted and scrubby spruce-trees. The only inhabitants are two men in charge of a depot of provisions for shipwrecked persons.

PAUL (St.) [add.] a tn. U. States Minnesota, cap. Ramsey 1 bank Mississippi 9 m. below the Falls of St. Anthony. It stands on a plain about 80 ft. above the river and is partially encircled by hills, and has fourteen churches, a college, and two female seminaries, a female academy taught by the Sisters of Charity several other schools, a fine state house, an extensive public market lumber and flour mills various other industrial establishments, and a considerable trade, partly in furs. Pop (1860) 10,401

PAUL (St.) [add.] an isl. in the S. of the Indian Ocean nearly equidistant from the E. extremity of Africa on the W. and the S. W. extremity of Australia on the E. lat 88° 43' S. lon. 77° 24' 8' E. It is in the form of a triangle with its base facing the N. N. E. and its vertex pointing S. W.; has a coast line of little more than 8 m. and rises precipitously into a cone, the summit of which is about 800 ft. above the sea. It is of volcanic formation and has on its E. side a conical crater which though several ft. above the sea in 1695 when the island was first discovered by the Dutch navigator Van Vlamingh now communicates with it on the E. by an opening 600 yards wide, and deep enough to allow large boats to enter the basin. Within the crater which is two-thirds of a mile in diameter the depth of water varies from 16 to 20 fathoms. The inhabitants, who are few in number have formed terraces on which they are enabled to cultivate patches of ground laid out for the most part in gardens, each about 50 square yards in extent. Their chief occupation however is fishing for which there is a regular establishment belonging to a merchant of the Isle of Bourbon. The fish caught are mostly different species of oil fishes and sea-elephants which once abundant are now seldom seen.

PAULS (St.) a tn. Austrian empire Tyrol circle Drizen, near Bozen with a beautiful Gothic church of the 15th century and 1400 inhabitants.

PAUMBLN or **PAUMUNU** a tn India presid. Malabar, dist. Madras on the W. extremity of the island of Namamur, forming the E. side of the narrow strait or pass of Paumben, which connects Paik a Strait with the Gulf of Mannar. It consists of about 250 houses generally built of stone and mud, with tiled roofs and placed in narrow irregular streets. The inhabitants, about 1500 are actively engaged in trade, as pilots and boatmen to the dhows and vessels in sailing through the pass. The pass, which was at one time tortuous in the extreme and had only a depth of about 5 ft. has been recently improved at the expense of government, and is now 10 ft. deep and nearly straight. The consequence is that not only dhows without keels but kelped vessels of nearly 200 tons burden can pass through, and the trade of the place has very largely increased. There is a lighthouse at Paumben, the light of which is a fixed red—its visible about 10 m. at 10 ft.

PAVLION a tn. British Columbia 1 bank Fraser, 120 m. N. E. New Westminster. It stands upon a lofty terrace above the river and is important as the head-quarters for the miners and male-trains that diverge here to the gold diggings at Alexander, Cariboo Kamloops, &c. The land adjacent is adapted for agricultural purposes and produces abundant crops of grain and vegetables.

PAVILLOV a lake British Columbia about 10 m. S. E. of the tn of same name. It is 8 m. long and 1 m. wide on its S. side is a mountain 9800 or 4000 ft. high topped by a remarkable peak not unlike a watch-tower. The hills are of limestone, and rise abruptly from the water's edge.

PAVLIGRAD a tn. Russia, gov. and 98 m. P. by N. Ekaterinodar cap. circle of same name on the Volga, an affluent of the Don river with two churches a school a charitable institute, several industrial establishments and 9329 inhabitants.

PAVLIOV a tn. Russia, gov. and 50 m. S. W. Nijni-Novgorod circle Gorbatov, r. bank Ural. It has some land some stone churches and manufactures of steel and hardware, bellows soap candles and leather and contains upwards of 6000 inhabitants.

PAWBUCKET or **NORTH PROVIDENCE** [add.] a tn U. States, Rhode Island co. and 4 m. N. Providence, beautifully situated on both sides of the Pawtucket, here crossed by a stone bridge. Until 1861 it was partly in Massachusetts but a recent arrangement has given the whole of it to Rhode Island. It contains eleven churches a public library two public halls and three savings banks, and possesses numerous industrial establishments, among which are thirteen cotton mills, one of them established in 1790 and historically interesting as the first erected within the States, machine shops, brass and copper foundries, an extensive calico printfield not built and tool factories, a manufactory of fire-engines famous throughout the country and other manufactures of belting leather cabinet ware,

hair-cloth, &c. These manufacturers have the advantage of handsome water-power from the river, which has here a fall of 16 ft. and ample means of transport are afforded by the Boston and Providence and the Providence and Worcester railroads. Pop. (1860) 11,818.

PAYTA, a town, Peru and the most northerly haven which is possessed, is situated at the base and on the side of a hill, which descends abruptly to the S.E. shore of a small bay of same name lat. 5° 54' lon. 81° 30' W. It consists partly of two narrow streets leading to a square, on which the cathedral—a large but ugly structure—stands, and partly of several other equally narrow streets which surround the square, and contain a number of very indifferent houses, among which the barracks are conspicuous, together with a second church totally devoid of interest. The only building with any pretensions to elegance is the custom house, which is constructed of iron, and was made in the United States. Payta, as the port of the province Piura, carries on a considerable trade, receiving American and European manufactures in return for cotton, bark and hides. Pop. about 5000.

PAZARINIE (PAZAN and LOWAN), two nearly contiguous places, American empire Military Frontiers, Crimea, dist. and S.W. of Sebastopol or Ocheron. *Over or Upper Pazarinie*, had once an important trade, but now contains only 1000 inhabitants, and has an old ruined castle perched on a rocky summit — *Lower Pazarinie* contains 1470 inhabitants and has a curious old structure built by Boris III in 1225.

PACUARO or **PACUARO** a town Mexico, state Michoacan, near the S. shore of a picturesque lake of same name 4½ m. S.W. Morelia. It stands at the height of 7000 ft. above the sea, is regularly built in spacious streets, has a parish church, a superior school or college, a monastery and three monasteries and contains 6000 inhabitants engaged in tanning, sugar-raffing, and trade.

PAHILL, a group of islands or rather archipelago S. America, on the E. side of the Bay of Panama extending over an area of about 450 sq. m., and consisting of sixteen islands and several rocks. Isla del Rey is the largest next to it, but much smaller are San José Gonzales, Casaya, Saloya, and Pacheco. They are low and wooded, contain numerous coconut groves, have a fertile soil not much cultivated and are inhabited by about 1541 persons who occupy from thirty to forty fishing villages and are chiefly engaged in the pearl fishery. Most of the islands belong to Panama merchants, who cultivate them by means of negroes, and only visit them occasionally.

PAHILL or **PAHILL**, a gulf in the N.E. of China, separated from the Yellow Sea by the Man-tzu group. It trends first S.W. for 50 m. and then bends round W.N.W. and N. to the mouth of the Peiho, which may be considered as forming the limit between it and the Gulf of Lung-tung. The coast is low and flat and shoal water extends to some distance from the shore, rendering it necessary for vessels to approach it with caution. In no part of the gulf is much depth attained, but the navigation in a N.W. direction from Min-tzu Strait to the mouth of the Peiho gives a safe and nearly uniform depth of 8 to 10 fathoms. The principal rivers which enter the gulf in addition to the Peiho are the Li-lan and the Hsu Hsien. The climate appears generally to be very good, but during the winter which lasts from November to April, both the rivers and the gulf to the distance of 3 or 4 m. from the shore become frozen.

PAKSA (MADYAT and OLAK) two places, Austrian empire Hungary, co. 11 m. W. Arad on the Maros. They are contiguous, containing an aggregate pop. of 14,025, and have a diocesan.

PAZPANYIN a town Austrian empire, Galicia, circle and 7 m. W. Kolomea, cap. dist. of same name with a spring of rock-salt. A Boleslaw monastery which stood in the middle bearing forest was suppressed by the emperor Joseph II. P. 4185.

PAZPANA a town Austrian empire, circle Istria, in a district rich in oil and wine, 30 m. S.E. Trieste. It has a castle, which was at one time the residence of a bishop, and contains 2100 inhabitants.

PAZPANA (HAY), a town La Plata, prov. and 100 m. N.W. Buenos Ayres on bank Parana, just above the point where one of the great arms branches off. It stands on an argillaceous

plateau, and is indebted to the currents for a fine climate. As it is accessible only to very small craft it has never obtained much commercial importance. Pop. 2000.

PAPEL, an island N. Pacific the largest of the chain which forms the central group of the Bonin Islands; lat. 37° 15' lon. 143° 18' E. It is 6 m. long by about 3 m. broad, is deeply indented particularly on its S.E. and its W. sides, on the latter of which is the fine harbour of Port Lloyd, and presents a bold and mountainous surface, composed of rocks evidently volcanic. Its soil is very fertile, and maintains a luxuriant vegetation. Among the trees is the palm which yields the sap of commerce. The position of the Bonin group in the direct line of navigation to Japan having attracted attention, Captain Beechey visited it in 1827 and took formal possession of it, and more especially of Port Lloyd and its harbour of Port Lloyd, in name of the British crown. The Americans were disposed to dispute this claim chiefly on the ground that the S. cluster of the group had, previous to Captain Beechey's arrival been visited by Captain Coffin the master of a whaler who, it was assumed, must from his name have been an American citizen. Subsequent inquiry having proved that Coffin was an Englishman, the American claim was necessarily abandoned, and Port Lloyd along with the rest of the Bonin group belongs nominally to Great Britain with no understanding, that this point is first to the vessels of all countries. It is the only one of the Bonin Islands which has any inhabitants. Their number amounts only to about 30, consisting partly of emigrants from the Sandwich Islands.

PECARUS a bay and port New Zealand.—The bay, situated on the E. coast of Middle Island or Munster to the N. of Banks Peninsula is 40 m. in extent from N. to S., and 15 m. in depth. Across the entrance the depth is 20 fathoms and gradually shoals to 5 and 7 fathoms a mile from the sandy beach. Five rivers fall into the bay. Of these the most important are the Coates and the Maitai by large boats the latter is navigable by vessels drawing from 8 to 10 ft. water.—The port situated on the S. of Stewart Island, extends 7 m. between N.E. and S.W. and is divided into two distinct portions a N. and a S. connected by a narrow strait. Three islands lying in its entrance form the same number of ship-channels. The general depth of the N. arm 20 to 25 fathoms is inconvenient for anchorage the S. arm is more moderate in depth, and has several coves where vessels may anchor in 8 to 10 fathoms. Over the S. arm are three bare granite cones from 1000 to 1400 ft. high.

PEHIAN, a village prov. Pe-chili at the mouth of the San Ho. 90 m. S. Peking. It is a place by no means of the first class. The houses are strongly built with walls of mud and chopped straw resting on layers of reeds introduced about a foot from the ground between the upper part of the wall and the foundation and intended probably to preserve the house from the deleterious effects of the saline quality of the earth. The roofs are generally of rushes and mud though some of the better ones and the temples have tiled roofs. The streets are narrow and have an open air gutter on either side. It was occupied by the allies on the advance to Peking in 1860. Near it is a fort built of logs of timber plastered with a mixture of mud and fax or chopped straw, and having embrasures for twelve guns.—(See also the *China Compendium*.)

PEIHO or **TAI-TAI-NO**, a river, China, which rising in a mountainous district in the N.W. of prov. Chih, not far from the Great Wall, flows S.E., and enters the Gulf of Pe-chili. Peking the capital of China, is situated on its banks, and to this, much more than to its magnitude, it is indebted for its great commercial and political importance. It pursues a tortuous course through a flat country scouring out for itself a narrow channel by the velocity of its stream rather than the volume of water, and discharging instead of increasing its depth as it approaches the sea. Embargoes itself over an area several miles in extent. The bar thus formed has only a depth of 2 ft. at low-water springs, but at high water attains a depth which allows vessels of 11 ft. draught to cross it. Junka, carrying from 500 to 600 tons burden are thus enabled to ascend as far as Tien-tsin, a direct distance of 80 m., and as indurct of 50 m. Here the river is only 200 ft. wide, and contracts and shallows so rapidly, that the *Kowloon*, drawing only 6½ ft. water, could not even with the help of the tide ascend

more than 6 m. The banks, which at the entrance present the appearance of a dreary mud flat improve much toward the interior. Signs of agriculture, says Captain Shennel Osborn, 'multiplied on either hand fields of Indian corn, millet, bearded wheat, lettuce and radishes followed in rapid succession. The villages were enclosed in fruit orchards, or hid their upthrust in groves of handsome trees. I counted at one time no less than twenty-five villages in sight from the mast head, and often ten or fifteen were visible. They were zones of them in yellow condition, and all appeared full of inhabitants. Though the navigation of the I-tcho ceases at Pion into the water communication is maintained by means of boats and rafts to within 10 m. of the capital.

PEKIN or PEKING (24, north, long coast) [add]. According to the terms of the treaty of Tientsin English and French ministers were allowed to reside at the Chinese capital and subsequently the same privilege was granted to America and some other nations. Foreigners generally are also allowed to visit the city but they must be provided with a passport from the ambassador or consul of the nation to which they belong and on no account is any individual allowed to carry on trade. I refer to the ratification of that treaty Russia was the only foreign power privileged to have a resident embassy which comprised four persons. In addition to these are the members of the British legation comprising nine persons, besides a police escort and English servants the French *attachement diplomatique* six persons and the American legation eight persons. Besides these civil establishments there are religious ones—four British, one American and one Russian—conducted by twelve persons. Of the native population a more correct estimate has been obtained since our countrymen have had free intercourse with the inhabitants, at the same time it is only approximate in the absence of a native census. In 1861 the latter section of the city was calculated to contain 800,000 civilians and 110,000 soldiers, of the Tartar Banner corps and the Chinese section about 400,000 persons making a total in round numbers of 1,310,000. The Pekinians have more of the Tartar empire among them than any of the more southern cities of China, still the Chinese predominates, and they are gradually superseding their fellow subjects by their greater industry and wealth. Even the old Tartar Banner corps is being dispersed on account of their poverty and inability to follow sedentary pursuits to add to their scanty pay. There are no manufactures at Peking of any importance beyond those necessary for making articles of luxury for the resident aristocracy and gentry, consequently it is not famous for its skilled workmen and artisans.

As a place of residence for Europeans, Peking is by no means so unhealthy as the more southern cities although the range of temperature is much greater. Its acres from the comparative dryness of the site, so that although the thermometer falls to 10 below zero in the winter and rises to 110 in the shade in summer less inconvenience is felt than in Shanghai, where intense humidity prevails at a lesser range. A rude system of drainage intercepts the city but not sufficient to carry off the effluvia of the sewage which even pervades the dust in summer exhaling a disagreeable odour. The water supply is abundant, and a very complete fire brigade used to be maintained in quenching the frequent conflagrations that take place. These and other matters are under the management of a governor of the city irrespective of the central administration which holds its office in the imperial quarter of the Tartar section.

During the war in 1860 between the British and French allied forces and the Chinese, Peking was invaded by western troops for the first time in the history of the empire. An army some 20,000 strong appeared under the walls, and were preparing to bombard the city on the 13th October when the Anhing gate was opened and the allies marched in taking possession of the city. The city was placed in a state of defence, to resist any treacherous attack from within the city. This want of confidence in the Chinese was enhanced by an act of treachery committed by the commanders of their army on the 18th September when twenty-six British and twelve French subjects were made prisoners while protected by a flag of truce and carried into the city where they were cruelly tortured, and twenty of their number died in agony.

See THE GAZ.—Vol. II.

On the entrance of the allies the survivors were delivered up, but the remains of four only could be found of those who had succumbed, which were buried in the Russian cemetery. As an act of retribution for this horrible deed of treachery Lord Elgin the British plenipotentiary who accompanied the expedition sanctioned the proposals of the English and French generals to let the troops sack and destroy the emperor's palace of Puen ming yuen. This famous imperial residence and grounds are outside the walls of Peking about 4 m. N.W. of the north gate, and contained not less than thirty distinct palaces, built by different emperors with gardens, parks and lakes, extending over an area of 60,000 acres. On the 18th of October the first division of the British and a contingent of the French army proceeded to the work of destruction and plunder. In the palace, the accumulation for centuries of jewels given as articles of vassal and gorgeous furnishings were found stored away. Among other things the presents brought by European ambassadors from their sovereigns to the emperor were preserved. These and all the costly ornaments in gold and silver presented by tributary states together with the valuable porcelain vases and cabinets inlaid with gems and furniture of the emperor and his court were seized by the avenging foreign troops or broken up and burned if they were too bulky to carry away. The work of demolition and plunder continued for two days, when the palaces were given to the flames, and the walls razed to the ground. It was estimated that the value of the plunder was not less than a million at a half sterling and that of the articles destroyed exceeded two millions, exclusive of the buildings. This material act of vengeance had more effect on the Chinese mind than all the diplomacy of ambassadors or even the demonstrations of naval and military force. By it the unspeakable sanctity of the emperor and his residence was completely broken up, and he fled as a fugitive, to his palace of Zuhai or Jehol in the fastnesses of the Tartarian Alps where he died ten months afterwards, in August 1861 a prey to the rigid chest and mental anguish at being the first monarch of this vast empire who had to succumb to the enemies of his throne. After the demise of Hien-Fong—the reigning title of that emperor—his son, Tongz-Chang, a minor succeeded to the throne, under the regency of the empress-widow who now takes up their abode chiefly at the Imperial palace, in the centre of the Tartar city. This palace is an imposing structure, with brilliant yellow tiles of porcelain on the roof, and surrounded by pleasure grounds with picturesque temples (close to the southern wall of the imperial quarter the English legation is established in a spacious palace, formerly the residence of a Chinese duke, who has let it in perpetuity to the British government, at an annual rental of £500. Beyond this are the buildings of the Russian embassy and nearer the wall that divides the Chinese from the Tartar portion of the city stands the French legation. Viewed from this wall 100 ft high a comprehensive glance may be had of the extent of Peking but the low roofs of the houses are so hid by the number of trees that it has more the aspect of a park, especially in summer than a great city except where the palaces, temples, and towers rise above the foliage. (—*Monroe Peking and the Pelobus*, Monro & Co. N.Y.)

PEKIN or PEKING is in Turkey in Europe, Albania, about 11 m. N.W. of Shkumbi about 10 m. above its mouth in the Adriatic, and 20 m. S.E. of Durazzo. It stands on a densely wooded height, but is said to be rendered unhealthy by the extensive rice grounds of the plain below.

PELOMPOING is an independent Cambodian, on the bank of the Odong at its confluence with the Mekong or Cambodia. It stands on the border of Cochinchina and has some trade in raw silk, iron, dried fish, &c. Immediately below the town the Mekong turns E. at right angle and has a breadth of not less than 3 m.

PELOBUS is a second New Zealand on the S. coast of the Middle or Manter Island, in Cook's Strait, between Guard Bay and Admiralty Bay. It extends about 25 m. in S. direction, branching off on the E. and W. into numerous arms and creeks, and embracing a coast line of not less than 250 m. The depth of water varies from 45 to 18 fathoms. Within the sound there are at least thirty bays or embayments, mostly landlocked, and safe in any winds, though the gales in bad weather are very furious. Fish may be caught in abundance.

The country around, except toward the head of the main branch, is mountainous, rising precipitously to 8000 and 9000 ft and clothed with dense forests. The geological formation is soft clay-slate with frequent veins of quartz as much thick.

MALÉZ, a town Austrian empire, Hungary, on Gómbó on the Bays, 8 m S W Rossum with ironworks, a trade in produce, and 1800 inhabitants.

EMBA, a town E Africa, about 18 m from the main land and 25 m N N E of the island of Zanzibar. It is about 50 m long from S. to N. has a low surface, is well wooded and fertile, and maintains a large population. Among the principal products are rice and bread-fruit. Great numbers of cattle and goats are reared for export. The channel between Pemba and the continent is so deep that it is said to give no soundings.

PEMBINA, a town N America, so close to the boundary line between British America and the U. States, as to attract more notice than it deserves. It is situated on the Red River north, and has been described as the town and port of Pembina, sometimes with the addition of a U. States post town, but though the ruins of several good houses formerly occupied by a R. Catholic mission are still seen, the actual Pembina consists of only a few log houses. About a day's journey to the W. of it, and about 7 m. N. of the boundary a place, called St. Joseph is springing up and promises to become of some importance. It was founded by the Red River half breeds, who resorted to it to escape the floods from which they had previously suffered, and is already much used as a depot for the articles of trade brought by the Indians of the U. States from St. Paul. The country around Pembina is very fertile and is free from undulations that the low range of the Pembina Mountains 30 m distant are seen in a clear day.

PENNSYLVANIA [old] one of the U. States. The discovery of petroleum has given a sudden accession of wealth and importance to this State. The deposits of oil lie at a depth varying from 800 to 1500 ft below the surface, the oil region of Pennsylvania lying principally in its N. W. part, in Venango, Crawford, Clarion and Warren cos. This district is usually known by the name of the Venango county oil region. The first discoveries of petroleum were made on Oil Creek, which flows through the most productive part of the district and along the course of which through Venango co., a distance of 21 m. oil wells are abundant. The district about French Creek, which enters the Allegheny in Venango co. and its tributary Sugar Creek is also productive. Petroleum has been found also in considerable abundance in Fayette and Oregon cos. in the S. W. of Pennsylvania, and probably exists in many other places of the western part of the state. It is believed that the oil region extends into Western Virginia, indication of oil having been found in the Panhandle and other places of the Pennsylvania boundary. But the great oil territory of W. Virginia lies on the Little Kanawha and Hedges river and their numerous tributaries in Pleasants, Boone, Wirt, and Wood cos. This last territory has been only superficially explored but the oil found is of a superior quality. There is also an oil region in the N. part of Ohio contiguous of the W. Virginia tract. Petroleum is found in several other parts of the U. States. The total exports of the oil from the U. States to foreign countries in 1862-5 amounted to the following quantities:—

	Barrels.
1862	19,307,528
1863	26,420,721
1864	31,874,125
1865	28,775,111

PEÑON DE VELEZ DE LA GOMFRA a town N Africa, Morocco, on a lofty promontory or rather island, of the Mediterranean, washed on all sides by the sea. It consists of only two streets, which rise in the form of an amphitheatre and possesses a series of defensive works of considerable strength and in good repair. Its principal buildings are the commandant's house, perched on a rocky point overlooking the town an hospital, and large bomb-proof magazines. It belongs to the Spaniards, who use it partly as a state prison. Its harbour is too shallow to admit large vessels.

PENSACOLA [old], a town U. States, cap. Escambia co., West Florida, on the N. W. side of a bay of same name

in the Gulf of Mexico, in a sandy and almost sterile district, lat. 30° 24' N. lon 87° 10' W. Till lately it had a somewhat decayed appearance, consisting of unpaved streets, with only wooden sidewalks and houses built in the old fashioned Spanish style while little commercial activity was anywhere manifested. In this respect a considerable change has taken place, in consequence of the completion of the Alabama and Florida railway and both trade and population have begun to increase. The harbour which is admirably sheltered admits vessels drawing 31 ft, and is spacious enough to admit any number of them. The principal public buildings are the fire and an academy. In the rear of the town are the remains of some Spanish forts. The defenses which they gave to the harbour has been far more than supplied by other forts, and more especially by Fort Pickens erected near the entrance of the bay on the island of Santa Rosa. Pensacola became the scene of important military operations between the Federals and the Confederates, in the early part of the civil war. On 11th January 1861 immediately after Florida had declared its adhesion to the latter a body of 500 volunteers took possession of Fort Barrancas and M. les, the navy yard, naval hospital, and military barracks. The U. States forces in command had previously removed to Fort Pickens which was invested and captured by the Confederates. Pop. (1860) 2876.

PERTECOST a river British America which flows N. E., and has its mouth on the N. shore of the estuary of the St. Lawrence near Repulse Point. Its entrance, which is only 20 yards wide, has a depth of 7 ft at low water but at high water 16 ft can be carried in so that small schooners as well as boats can find shelter in its channel. Its banks for 24 m. the utmost distance to which it is navigable, are steep cliffs of sand and clay. A fine bold sandy beach extends from its mouth to English Point situated 7 m. to the S. W.

PEORIA a town U. States Illinois cap. of same name a bank Illinois here crossed by two long bridges, at the outlet of Peoria Lake on the Illinois and Michigan canal and at the common point of junction of these railways, 123 m S. W. Chicago. It is laid out with great regularity in spacious streets lined with well built houses and contains twenty-four churches several educational institutions, and county building. The value of its manufactures in 1860 amounted to £1,345,400. It is also a port of entry and carries on a considerable trade. There is a large coalfield in the vicinity. Pop. (1860) 14,045.

PELIN a lake, U. States, Minnesota, about 80 m. below St. Paul lies in the direct course and is, therefore, properly nothing more than an expansion of the Mississippi about 20 m long by 5 m broad. It is remarkable for its romantic scenery. A series of lofty calcareous cliffs with conical peaks loomed it on the right. On the left, towards the N. E., is a lofty promontory which juts into the lake. It is about 400 ft. high and bears the name of the Maiden's Rock, because an Indian girl of the name of Winona, denied the lover to whom she had pledged her faith leaped from the tower to be forced into another marriage. On the prairie adjoining the lake are some conical mounds, apparently artificial.

PERADENIA a botanic garden Ceylon about 4 m. S. W. of Kandy the road from which leading to it passes through a continuous suburb in which almost every house is surrounded by a little garden of coco-nut palms, bread-fruit, and coffee trees. It overlooks the Mahaweli-ganga, which encircles it on three sides covers an area of nearly 160 acres, and is entered through a noble avenue of India-rubber trees (*Ficus elastica*). A group of palms including nearly all that are indigenous to the island, stands near the entrance, and is said to be unsurpassed in variety and grandeur. The garden was established about 40 years ago and has been productive of the greatest benefit. European and other exotics have been largely introduced, sloes, nutmegs, vanilla, and other valuable products of the Indian Archipelago have been acclimated, foreign fruits without number—mangoes, durians, lichees, loquats, guavas, and the avocado pear—have been propagated and diffused over the island, and the tea-plant, the chocolate, arrowroot, tobacco, W. India ginger and many others have been domesticated.

PERAK [old] a state, Indian Archipelago on the W. side of the peninsula of Malacca, bounded N. by Quana, E. by Lingga and Perak, S. by Balangore and W. the ocean. It

extends about 100 m along the shore and 50 m back from it, and seems hence to have an area of 5000 sq. m. In addition to this mainland it possesses the Dindog and Samblen islands. It is well watered by a river of same name which pursuing a very tortuous course, in a shallow channel, is navigable only by boats. The whole interior is little better than a vast jungle with a few villages interspersed in it. The chief cultivated product is rice, but the staple article of trade is tin of which 500 to 600 tons are annually exported to Penang. The other articles are ivory, rhinoceros horns, bees wax, resins and some perfumes and dye woods. The pop. has been computed, by a very rough approximation at 20,000.

PERCÉ a to British America, Canada East, cap on Gaspé, on a bay of same name, on the W shore of the Gulf of St. Lawrence, and at the foot of Mount Percé called also the Table Ronde, which rises to the height of 1280 feet above the sea. It contains a R Catholic church a courthouse, jail and other requisite buildings, and has a pop. of about 1500 chiefly engaged in the fisheries. The bay is formed by White Point on the E. and Percé Rock on the N. The latter which is narrow and one-third of a mile long in a S.E. direction, is an outlier to the range of cliffs on the S.W. side of Mal Bay and is remarkable for two large holes which have been perforated in it by the waves, and through one of which a boat can pass at high water.

PERECSEN a to Austrian empire Transylvania, circle and 4 m E Suly 40 mly on the Krassna, with a Greek united church and 1700 inhabitants.

PERÉ a to Austrian empire, Upper Austria dist and 16 m E Linz, on the Naarn with a town hospital three large millstone quarries and a large trade in millstones and earthenware. Pop. 1000.

PERIM or **MERKAS** an isl. at the entrance of the Straits of Babelmandeb, of a somewhat circular shape, and about 3 m. in diameter. In itself it is little better than a bare rock without fresh water and almost entirely without vegetation but its position and a haven on its S.W. side with from 7 to 8 fathoms water and of dimensions sufficient to contain a fleet of ships of war, have given it a strategical importance which it would not be easy to overrate. The Red Sea is entered by two channels called the Great and the Little Straits the former, is an outlet to the range of cliffs on the S.W. side of the mainland of Abyssinia, and the latter on the E. side between Perim and the mainland of Arabia. The width of the Great Strait between Perim and Abyssinia is about 10 m. but much of it, owing to rocks and other dangers, is not easily navigated and hence ships, whether passing by the Great Strait, which is little used or by the Little Strait, which though less than 5 m. wide possesses advantages which have made it the ordinary thoroughfare must pass so near Perim as to be completely commanded by any fortifications erected upon it. Great Britain during the invasion of Egypt by Napoleon I. took possession of the island and has recently asserted her right to it. This circumstance, taken in connection with the proposed navigable canal across the Isthmus of Suez, has attracted considerable notice and been the subject of diplomatic correspondence. The impression is that Great Britain intends to fortify the island, but the matter is in abeyance, as the only thing resolved upon at present is the erection of a lighthouse upon it.

PERIM, an isl. India, off the W. shore of the Gulf of Cambay on the coast of Gujarat. It is about 3 m. in length and 1 m. in breadth and is separated from the mainland by a narrow but very deep channel. Its strata consist generally of conglomerate overlaid by sandstone. The chief interest attaching to it is derived from its numerous antiquities. Among these are the remains of a considerable fort, a temple containing an image of Buddha and two elephants cut out of the solid rock. The island is also interesting to geologists from the great number of organic remains found in the strata.

PEROTE a to Mexico, lat 19° 35' N. lon. 97° 14' W. It is a small place, but derives importance from its military school and from the fort in its vicinity, which occupies a commanding position on the high-road to the capital and has been much used as a state prison.

PENTHOLZ (GREAT) a to Austrian empire, Lower Austria, circle Upper Marchburg at the source of the

Lainsitz with a paper-mill and numerous manufactures. Pop. 1270.

PERU two places, U. States —, A. to Indiana cap co Miami, on the Wabash River and canal and on the Toledo and Wabash and the Penn and Indianapolis railways. It possesses six churches, a handsome courthouse and jail, a woolen factory a distillery and two foundries and carries on a considerable trade. Pop. 1860, \$506.—2 A to Illinois, co. La Salle at the head of navigation of the Illinois and on the Chicago and Rock Island railway 52 m W Chicago. It stands amid fine scenery contains six churches, a number of manufactures, a large ship-yard and dry-dock and carries on a very extensive trade exporting large quantities of grain, flour, lumber and coal the last obtained from an extensive coalfield in the vicinity. Pop. (1860) 3184.

PESCAVINA, a to Italy, Venetia, prov. and 7 m W N W Verona 1 bank Adige, with 3023 inhabitants, mostly employed in the navigation of the river.

PESPIRE a to Central America, Honduras dep and 80 m N N W Leon on a plain near the Nacuanos. Its streets are regularly laid out and well paved. Among the mass of its houses, which have all red tiled roofs the buildings which stand out prominently are the church the parsonage and the casildo all formed of adobe. The inhabitants carry on an active trade, Pespire being the connecting link in the traffic between the mountain city of Tegucigalpa and the ports of Amapa and La Unión. Pop. 3000.

PETALIA, or **PETALIE**, a group of islands Greece off the S.E. coast of the island of Negropont, in the entrance to the channel of Egeus. It consists of ten islands of which Megalo and Xaro are the largest. These are well wooded and partially cultivated producing corn olives olives-oid wine cotton and figs. Most of the others are mere islets, which however serve the important purpose of shortening the roadstead lying between the largest island and Negropont and thus rendering it one of the best harbours in the Archipelago.

PETALUMA a to U. States, California, cap co Butte on the creek of same name 10 m from San Pablo Bay and 45 m N by W San Francisco. It contains six or seven churches a banking office, large retail warehouses and three steam flour-mills. Corn and dairy products including large quantities of butter and cheese are the chief articles of trade. Steamboats ply daily to and from San Francisco. It was founded in 1841. Pop. (1860) 1,005 in 1865 2580 to 3000.

PETTER (St.) a to Austrian empire circle Upper W. Moravia 80 m W by S Vienna. It is an industrial place with an oil and two saw mills and 1000 inhabitants.

PETTERBURG a to and port of entry 1 States, Virginia, on Dinwiddie, on the Appomattox 12 m above the junction with the James, and on several lines of railway connecting it with Richmond Memphis and Mobile, 25 m S Richmond. It stands on a slope descending gradually to the river, and affording excellent natural drainage, is well built, and contains fourteen churches, four of them for coloured people a custom house and post-office, a courthouse, mechanics hall and public library. The annual value of the manufactures is estimated at upwards of £700,000 and the export trade, consisting chiefly of cotton and tobacco is very extensive. The town lost a conspicuous part in the later episodes of the civil war being invaded by the Federal armies under General Grant, and several times bombarded and assailed but it was never captured until the surrender of Richmond. Pop. (1860) 18,275.

PETTERSDORF or **PENICHTOLDORF** a to Austrian empire, Lower Austria, on the S. railway 7 m S.S.W. Vienna has a remarkable parish church with a lofty tower a ruined castle a townhouse, a town hospital and a bathing establishment. It is an ancient place and suffered much during the invasions of the Turks. Much wine is produced in the district. Pop. 2500.

PETTERSDORF (GRAT) a to Austrian empire, Hungary on Eisenburg about 6 m S.E. Eisenmanngar with famous cattle markets and 1270 inhabitants.

PETO a to Mexico, state Yucatan, 70 m S.E. Merida. It is a regularly built and apparently prosperous place with a church and a monastery, the buildings of which form an enormous pile.

PETROPOLIS, a to Brazil, prov. and 80 m N Rio de

Jamiro, lately situated on a mountain 9000 ft. above the sea. It was founded by a German colony and Germans still continue to form a large proportion of its inhabitants; but its pleasant site, healthy climate and proximity to the capital of Brazil have raised it rapidly to importance, and covered it with elegant hotels and splendid mansions. Among the latter stands conspicuous the palace, in which the Imperial family regularly reside during the hottest months of the year, extending from December to April. This example is usually followed by all the inhabitants of the capital whose means enable them to do so, and Petropolis has acquired all the characteristics of a fashionable watering place. Its permanent population is estimated at 7000.

PETSCHAU a town in Austrian empire, Bohemia, circle and about 23 m. E. N. E. Eger, cap. dist. of same name; a bank, Tepl with a parish church; two castles, an hospital, a brewery and four mills. Pop. 2776.

PEUERBACH a town in Austrian empire, Upper Austria, circle Hausruck, on the Lederbach about 24 m. W. Linz. It is surrounded by walls with a gate, and has a fine parish church with a lofty tower and an old spacious castle, a statue of St. John of Nepomuk, erected in the market place, an hospital and other benevolent institutions. Pop. 1200.

PERALMHERG a town in Austrian empire, Bohemia, circle Eger, at the foot of a mountain of same name about 84 m. from Pilsen with a parish church, a townhouse, a ruined castle seated on a rocky height and 1000 inhabitants.

PHALGGOO a vast, fertile India, present Bengal dist. Belur, formed by the junction of the mountain streams Mahanadi and Jharkhand, about lat. 24° 44' N. lon. 85° 3' E. During the rainy season, particularly in the latter part of it, it carries an enormous volume of water rushing with great velocity between high and rocky banks and filling its channel which is from 500 to 800 yards wide. After passing through Belur and Jarna, and reaching lat. 23° 25' N. lon. 85° 30' E. about 180 m. from its remotest source it takes an easterly direction and retains it till it joins the Ganges on its right. It sends out numerous branches which form a kind of network across the country and lay it partially under water. The lower part of its course sometimes is called Mahanadi.

PHARALIA or **SAVASSIQUA** a town in Turkey in Europe, circle and 30 m. S. W. Solonki. It is the seat of a Greek archbishop, and is defended by a fortified castle situated on a commanding height. The famous battle of Pharsalia, between Julius Caesar and Pompey was fought at a short distance to the N. W. Pop. 5000 almost all Greeks.

PHILIPPOLIS or **PHILIPPOPOLE** a town in Turkey in Europe, Roumelia, in a wide plain extending from the foot of Mount Rhodope to that of the Balkan and watered by the Maritza, 55 m. W. N. W. Adrianople. Among the public buildings are eight Greek churches and the palace of the Greek archbishop, an Armenian and a R. Catholic church, a Jewish synagogue and several religious houses belonging to the Turks, a superior Greek central school, four other schools, one of which, for girls was founded in 1880 by 160 pupils, and a Bulgarian school with 50 pupils, partly from the town and partly from the neighbouring villages. The trade is so extensive that the place ranks as one of the most commercial in Roumelia. A little to the W. are three villages beautifully situated and mostly occupied as summer residences by the wealthier classes. It is one of the most populous places in Turkey, having a population of about 60,000 of whom 20,000 are Christians, a small sprinkling of Jews and the remainder Turks.

PHILIPPOPOLE (anc. Philippi) a name or prov. of Lacedaemon in northern Greece, bounded by Turkey, N. on the S. by the Gulf of Corinth, E. by Attica and the Saronic Channel, W. by Acarnania and Epirus. The surface is hilly relieved by deep and fertile valleys the soil is good but cultivation has done little for it. The principal products of the province are corn, wine, and olive-oil. Large flocks of goats are depastured on the green summits of the hills. The capital is Lanch.

PHULOWDIE, a town in India, Rajpootana, state and 70 m. N. W. Jodhpur. It stands on a rising ground, and was once surrounded by a wall, of which a ruinous portion still remains. It is defended by a stone fort, on which a few guns are mounted, and contains several lofty well built houses, belong-

ing to wealthy Jain merchants, three Jain temples, and several Hindu pagodas, all built of a deep red sandstone. Pop. about 15,000.

PIATKOWA a town in Austrian empire, Galicia, circle and about 10 m. N. N. E. Sank. It is remarkable as the scene of a battle between the Poles and Russians in 1285, and contains 1850 inhabitants.

PIATRA a town in Turkey in Europe, Moldavia, cap. circle Kuchuk, on the Disla, 35 m. W. N. W. Jassy. It is the seat of a court of justice, possesses a handsome church, and a normal school, has a manufacture of paper and carries on an active trade in wood sent to Galatz. Pop. 4000.

PIAZZA a town in Italy, Venetia prov. and 11 m. N. N. W. Padua near the Brenta with a beautiful Centauri palace, manufactures of silk and 4313 inhabitants.

PICCOLI a town in British America, on the N. coast of Nova Scotia, cap. co. of same name on the N. shore of a creek or bay forming the best harbour which the north portion of the province possesses. It consists of houses, which are crowded together on a flat or slope, the declivity of a ridge which rises to the height of 70 ft. and contains three churches with steeples, several other places of worship, and an academy. These are all built of wood, though some of the ordinary dwellings are of stone. Opposite the town the harbour expands into three large arms, at the head of which are the East, Middle and West Rivers. The channels of the two last are little used except by very small craft, but the East arm is navigable for 2½ m. to the terminus of a railway which conveys coal from the Abitibi mines, situated about 5 m. to the S. The working of these mines has greatly contributed to the prosperity of the town and to that of the surrounding country, which is becoming well settled. There is much beautiful scenery in the vicinity of Piccoli particularly toward the W. where Rogers Hill rises to the height of 54 ft., and Mount Jellison to that of 90 ft. above high water. Pop. upwards of 2000.

PIFRAWARH a town in Austrian empire, Lower Austria, circle Lower Marchburg on the Weidenbach with two chalybeate springs which attract many visitors, and 1210 inhabitants.

PILKING (Lower) and **PIRRA**, two towns in Austrian empire, Lower Austria, 38 m. N. N. W. Vienna. **Lower Picking** situated in a beautiful valley of same name, has a parish refinery, two iron mills and a seam of lignite and contains 1300 inhabitants. — **Upper Picking**, in the same vicinity with only 340 inhabitants has two saw mills and manufactures of wooden ware.

PILKIL, a town in Austrian empire, Tyrol, circle and S. E. Brixen on the frontier of Veneto. It has a parish church built in the Gothic style and adorned with three statues by Mollino. On a lofty precipice in the vicinity is the old feudal castle of Andras. Pop. 1000.

PILIA a cape, S. America, forming the N. W. extremity of Terra del Fuogo and the W. point of entrance to Magellan Strait, lat. 52° 42' S. lon. 74° 43' W. It is a remarkably bold cliff which rises at its extremity to the height of 1750 ft. above the sea. A current at the rate of 1 to 2 m. an hour sweeps round the cape towards some danger and clusters of rocks.

PILIT or **PILIT** a town in India, British India, cap. pergunnah of same name dist. and 30 m. N. E. Bareilly, 1 bank Ganges. It is of considerable extent, and is the centre of an important trade between the Terai of Kumaon and Chinese Tartary. The town, which bears the name of Pilibhit, and is much famed throughout India for its white stone, firminess, and fine flavour is produced in the fertile valley of the Kosi, in Kumaon. Pop. 25,157.

PILNIKAU a town in Austrian empire, Bohemia, circle and 32 m. N. E. Gitschin with a parish church, a townhouse, an hospital, manufactures of cotton and a quarry from which gneiss and whetstones are obtained. Pop. 1000.

PILLOT or **PILOT**, a hill in U.S. States, Missouri, co. Iron on the St. Louis and Iron Mountain railroad 87 m. S. by W. St. Louis. There is here a remarkable volcanic hill, variously stated to be 450 and 550 ft. high, containing lava of inferior quality. Indeed it is said to be almost a solid mass of lava.

PINDUR a river India, which issues from three snow beds on the W. side of the summit of the Himalaya, 72,491 ft.

high. In Kunming, flows circuitously S for 45 m to Chongqing then N for 20 m to reach the Alakaunds at Kureprag.

PINGRIH is a town in the Alakaunds at Kureprag about 27 m from the sea. It is defended by many new fortifications constructed on European principles possesses ships and armaments for the building and supply of ships of war. It is the residence of a provincial governor and has a large population and a considerable trade. It is 8 m. below Saigon, of which it is sometimes regarded as the port or suburb.

PING HOO a town in China, in the S of prov Kiangsoo at no great distance from Shanghai. It stands on the banks of a central canal and contains a wild and unruly population owing partly to the large number of boatmen and partly to its having seldom been visited by foreigners. It is surrounded by walls, has a main street running from the S to the W gate, besides a number of minor streets, some of them very narrow and it is said to count among its inhabitants many retired wealthy people. The shops are in general poor and there seems to be no particular branch of manufacture carried on to any extent. Outside the W gate are extensive nursery gardens.

PING-SHAN, a town in China, prov Soehuen, 1 bank Kin che-kiang regarded by some as the proper continuation of the Yang-tze-kiang. It stands at a considerable distance above Su-chow and not far from the N frontiers of Yunnan, and is a small place surrounded by walls, which have lately been improved and strengthened by traverses and a banquette, as a means of defence against the western rebels, who attacked it in 1861 apparently in a very inefficient manner the very day when General Sargol in pursuing his expedition of the river succeeded in reaching it. With the exception of about 80 m between Queshow and Ichang, the Yang-tze-kiang is navigable from Ping-shan to its mouth. The country around Ping-shan is hilly and fertile, producing silk in considerable quantity, maize, rice sugar-cane, &c. In the rice fields eels and water serpents are taken and are used as food by the boatmen and peasants.

PINGUPATTE a town Austrian empire, circle Tetric, 23 m S E Trieste with a millstone quarry and a seam of lignite. Pop 1000.

PINATAT a town Russia gov and 100 m. N Poltava cap circle of same name on the Udai an affluent of the Sula. It has three churches a circle and a parish school and two desirable endowments. On a lake within the circle stands the beautiful village of Yagoin belonging to Prince Rejain and containing a church and a fine castle with a tolerably good library and an excellent collection of paintings. Pop. 3548.

PISCO [add] a town Peru about 1 m from the E shore of a bay and to the S of a river of same name, 130 m S S E Lima. The inhabitants dwell a spirit known by the name of Pisco or Urales and export it in large quantities to different parts of the coast. Sugar also is an article of trade. The place, after having greatly declined has recently received a new impulse from the frequent calls of steamers, and the supply of several hundred large merchant vessels, which while lying off the Chincha Islands to take in their cargo of guano draw their provisions chiefly from Pisco. One of its greatest drawbacks is the bad landing, which though managed by a company built for the purpose, is sometimes impracticable. The bay, which is of great extent, is formed by the peninsulas of Paracas on the S and the Ballista and (Chincha Islands on the W and may be said to have four entrances one called the Boqueron de Pisco between the above peninsulas and the island of St. Gallen a second between St. Gallen and the Ballista islands a third between the large Ballista island and the Chincha Islands and a fourth between the Chincha and the N mainland. Pop about 3000.

PISTYN a town Austrian empire, Gabels circle and 10 m S S Kolomoa on an affluent of the Pruth with a cold water-cure establishment and 2988 inhabitants.

PITESTI a town Turkey in Europe Walachia, cap. circle and on the river Arghis, 65 m N W Bucharest is the seat of a court of primary jurisdiction, and has a church and a normal school. Pop 5000.

PIT HOLE CITY a new town U. States, Pennsylvania, co. Venango 5 m N the Allegheny River and 10 m N E Oil City. It has several banks and hotels, and numerous oil

wells discharging from 6000 to 8000 barrels of petroleum daily. It has grown up rapidly and is said to contain a pop. of 10,000.

PITILEV a town Austrian empire, Lower Austria 35 m S Vienna. It was once the capital of a dukedom and a place of some importance in the 11th and 12th centuries, but now depends chiefly on the ironworks employed in smelting and manufacturing ore, obtained from mines worked in the vicinity. It has also a paper mill and some trade in fruit which is largely grown in the district. 1 op. 1400.

PLACERVILLE, a town U. States California cap. co. El Dorado 5 m S of south fork of American River and on the overland mail route, 50 m E by N Sacramento. It stands in the midst of a mountainous district in which are productive gold mines. In 1863 it contained four or five churches a school, and numerous stores. A railway connecting it with Sacramento is nearly completed. 1 op in 1864 about 4000.

PLANIAN a town Austrian empire Bohemia circle Casavia 27 m E Prague, with a deanery church a mill and 1000 inhabitants.

PLANKENFELN a town Austrian empire, Lower Austria, circle Upper Wieselwaid at the S end of the Mündbach 51 m S W Vienna. It has several saw mills, lime and chemical kilns and gypsum and sandstone quarries and contains 1100 inhabitants.

PLEBENICA a town Austrian empire kingdom of Croatia and Slavonia co. and 4 m S W Poega, on the Orlyava, with cavalry barracks, and 1000 inhabitants.

PLETESHI, a town European Turkey Valacia cap. circle Prubova on an affluent of the Yalomia 33 m S by E Bucharest. It lies on a mountain among trees and gardens, is the seat of a court of primary jurisdiction and has a normal school. Pop. 24 400.

POAKE a town S W Africa Kimberley country on the 1 bank of the Coanza, lat. 10° 20' S lon. 16° E with about 3000 inhabitants.

POALHO a town S W Africa Kimberley country territory Namibia, 15 m N E Benguela. It stands on the river bank of the Nambe, at the foot of a steep hill which rises a mile and contains about 1500 inhabitants who raise large quantities of agricultural produce, and dispose of it to the European factories on the coast.

POCSALY a town Austrian empire Hungary co. V Bihar 20 m S E Debrecen. It has in its vicinity four ancient castles, and contains 2053 inhabitants.

POBELL a town Austrian empire Hungary co. Arva Thurco about 42 m S N E Neuhof on the Arva in a fertile district, with the remains of an old castle and 1000 inhabitants.

PODHAIJCI, a town Austrian empire Galicia, circle and 15 m W Brest cap. dist. of same name. The Tartars here sustained a bloody defeat from the Poles in 1667. 1 4419.

PODORODOL, a town Austrian empire Galicia, circle and about 23 m S W Stry has a fine baronial castle, and contains 1200 inhabitants.

PODIBRID a town Austrian empire Bohemia, circle and 20 m S W Casavia in a bank the town crossed by a chain bridge and on the Vienna and Prague railway with a deanery church several public offices, a postoffice two hospitals a high-school and manufactures of alcohol, rosoglio and liqueurs. Pop 3211.

PODOLSK [add] a town Russia gov and 26 m S S W Moscow cap. circle of same name on a series of heights on both sides of the Moskva. It has two churches a circle school a charitable establishment, and cotton-mills. Within the circle lies the prebendal village of Podolsk, distinguished by its beautiful cathedral which was built by a son of Peter the Great. In the same locality is the village of Lopacna, situated on the lake of same name, and so well built as to have all the appearance of a handsome town. Pop of Podolsk, 1640.

POHOJ a river India, which rises near the S W boundary of Bundelcund, 20 m S W Jhansi pursues a winding course generally N E for 125 m and joins the Sinto on its bank in lat. 25° 5' lon. 78° 25' E.

POINTE AUX TREMBLES, two places, British America, Canada East — 1 Pointe aux Trembles on the St. Lawrence 1 bank St. Lawrence, 23 m W S W Quebec. It

is much resorted to for summer residences, possesses building-grounds, where teams of large dimensions are built, and carries on a very extensive trade, chiefly in flour and lumber.—3 *Plains* are *Trémie* in *Bas*, on *Neobol*, on the island, and 10 m. from city of Montreal, with a Protestant and a R. Catholic church, a Protestant institute, and some trade in flour. Pop. about 1000

POINTS CLAIRE, a tn. British America, Canada East, cap. of Jacques Cartier contiguous to a station on the Grand Trunk railway 16 m. E. Montreal, with a R. Catholic church and two R. Catholic academies—one for boys, and the other for girls. Pop. about 1500.

POINT LEVI, a tn. British America, Canada East, on *Levi*, on the St. Lawrence, opposite to Quebec, and on the Grand Trunk railway. It is a large and flourishing place, with a trade so extensive that in this respect it is surpassed only by Montreal and Quebec. Pop. about 4000

POINT PEDRO a tn. situated near a rocky cape of same name, facing the N. extremity of the island of Ceylon. Its streets are regular and well light, its houses more substantial and commodious than usual and its Hindu temple and tank are on a scale which attests the wealth and liberality of its devotees. Its harbor sheltered by a coral reef affords tolerably secure anchorage, and though 30 m. N. E. of Jaffa, continues to be its principal port. In its immediate neighbourhood village cultivation is carried to its highest perfection. Every field is fenced, and every cottage has its garden which, for the skill and care bestowed upon it, would not suffer by comparison with the best-managed market garden in the suburbs of London.

POKHURN a tn. India, Rajpootana, state and 80 m. N. W. Jodhpur on the great commercial routes between E. Rajpootana and Sind. It consists of about 3000 houses, surrounded by a wall of masonry stone, and defended by a fort, enclosed by a deep narrow ditch faced with masonry and a wall 25 ft. high. Within the fort the residence of the chief is so isolated as to form an interior citadel capable of separate defence. The transit trade is very extensive. Close to Pokhurn are the ruins of a deserted city.

POKHURV, a tn. Russia, gov. and 53 m. S. W. Yedineur, cap. circle of same name, on the *Sikhits*, with two churches and a charitable institute. The inhabitants of the circle deal largely in wool, and wooden articles, and timber 1694.

POLKIL, a tn. India, dist. and 10 m. N. W. Ajmer, cap. pergunnah of same name, in a low swampy valley, close on the borders of a lake which Hindoo superstition regards with the utmost veneration. The town, renowned for its gardens and vineyards contains many good houses but owes the celebrity which it possesses chiefly to its temple of Brahma, which Ted declares to be the only one he ever saw or heard of in India dedicated to the One God. It was built not many years ago by a wealthy Mahatma, a minister of Scindia. Clusters of stone give access to the water which is visited every full moon by great numbers of pilgrims. At the same time houses are not neglected, and a fair is held for camels, horses, and kams, as well as for various wares. In the environs are many shrines and sanctuaries belonging to many of the great families of India. The surrounding mountains, composed in many places of rose-coloured quartz, and presenting abrupt precipitous and bold pinnacles make the scenery striking and picturesque.

POLANOEN, a tn. Russia, gov. Courland near the Baltic Sea, and close to the Prussian frontier 110 m. N. W. Mitau. It has a R. Catholic church, a synagogue, a frontier custom-house, and a considerable trade. A treaty between the Russians and the Poles was signed here in 1831. It contains 658 inhabitants, the majority of whom are Jews.

POLANY a tn. Austrian empire, Galicia, circle and about 12 m. E. Jasin, near the frontiers of Hungary, with glassworks, and 1300 inhabitants.

POLAL, a tn. Austrian empire Moravia, circle and 23 m. E. Zuzm, at the foot of a mountain of same name in a picturesque district, contains an old ruined feudal castle, and carries on a trade in red wine. Pop. 1100.

POLNESHAW a tn. India, Nizam's Dominions, in a green and fertile valley about 4 m. wide, and enclosed by lofty hills, 150 m. E. Hyderabad. The area nearly 7 m. in extent and said to be very populous, renders almost entirely of mud built. The soil is a square of about 800 yards, to

closed by a dry ditch, and a rampart faced with masonry, with a tower at each corner. The chief building within it is the residence of the rajah, which has nothing remarkable.

POLGAR, a tn. Austrian empire, Hungary co. N. Biber between marshes not far from the Theiss, and 80 m. W. N. W. Debreczin, with important yearly markets, and 4440 inhabitants.

POLOMKA, a tn. Austrian empire, Hungary co. Grasse on the Gran, in a mountainous district covered with forests. It contains 2348 inhabitants, who rear sheep and cattle, work as iron mines, and fell and saw timber.

POLYKANDRO [old] a tn. Italy, Greece, near the Cyclades, nearly equidistant from Male on the W. and Nio on the E. It is of irregular shape 9 m. long from N. W. to S. E., with breadth varying from 1 to 3 m. has an area of 16 sq. m., and contains 4900 inhabitants who produce some wheat, wine, and olives. The town, of same name, on the N. coast, lies at the foot of a hill on which the ancient tower stood and has an Helianist and a parish school, and a pop. of 1300. There is a statue in the cave on the island.

POMORZANY a tn. Austrian empire Gohela, circle and 12 m. S. by E. Zloczen with an old castle, which is still inhabited, though the castle works were destroyed by the Tartars, who whose hands it fell in 1599. The first before the Tartars had sustained a severe defeat from the Poles at the neighbouring village of Hlowow. Pop. 3573.

PONGA [add] a river W. Africa, Senegambia, which acquires some magnitude in the interior but on approaching the flat coast divides into several branches, and forms a considerable delta. The principal branches are the Mud Bar on the N. and the Sand Bar about 7 m. to the N. E. of it. The Mud Bar is two-thirds of a mile wide, and may be entered at three-quarters flood by any vessel not drawing more than 14 ft. The Sand Bar at low tide looks formidable, from the number of shallow spots which give the appearance of an almost continued line of breakers, but as there is a rise of 9 ft. at full flood any vessel not drawing more than 15 ft. may venture in. Once within the river, there is sufficient depth up to the town of Bangalong.

POMIETZ, a tn. Russia gov. and 60 m. N. N. E. Kovno cap. circle of same name on the Nereva. It has three churches and a circle school. There are sulphur springs in the circle. Pop. 4622.

PONTREINA [anc. ad *Pontem Sarnicum*] a well built village Switzerland, can Grisons, 30 m. S. E. of Coire, 4 m. in the Upper Engadine and valley of the same, 3720 ft. above sea-level. It lies on one of the two main roads between Italy and the Engadin Valley and is an entrepot of some importance for goods crossing the Bernina Pass. The church is an edifice of some architectural pretensions. The inhabitants are Protestants, the doctrines of the Reformation having been introduced in the sixteenth century by Paul Vergerio, Bishop of Capo d'Istria. In the vicinity are the glaciers of Roegg, Bernina and Monte del Oro. Pop. 269.

POODGOLLOTTAI a tn. India, presid. Madras cap. dist. Pondicherry or Pondicherry, on a small island surrounded by thick jungle, through which there is access only through three guarded entrances 36 m. S. E. Trichopoly. It is nearly in the form of an exact square divided into four regular main streets. The houses in these are large and commodious, partly with terraced, but mostly with tiled roofs. In the centre of the town stands the rajah's palace, a terraced edifice of two stories, covering a large area enclosed by a wall. Outside this enclosure, on the W. is another similar structure and on the S. E. a grand mosque. There is also a handsome pagoda. In the suburbs, where there are many gardens there is a fine country, with a reservoir. The place owes its prosperity and generally opulent appearance to the rajah by whom it was recently rebuilt.

POONAH a dist. or collection, India, presid. Bombay between lat. 17° 58' and 18° 28' N. lon. 72° 50' and 73° 10' E. is bounded N. by Ahmednagar E. Ahmednagar and Solapure, S. and S. W. Satara, and W. Tummak, area, 2296 sq. m. It is intersected by numerous ridges and spurs, which proceed eastward from the W. Ghats, and finally sink down into the plains in the Nizam's Dominions, and is watered chiefly by the *Deccan* and its affluents. The climate at all times, except during the W. monsoon, is extremely arid. This is particularly the case in easterly winds, during which

the lips and exposed parts of the skin are cut, and become black and tawny. The soil particles of the same aridity, and hence, in June, the whole country often assumes the appearance of a parched waste. A few days' rain, however, suffices to clothe it anew with verdure. The principal crops are the ordinary cereals and potatoes which are extensively grown in the N. and find a ready market at Bombay. Cotton is grown only to a limited extent, and the growth of the mulberry, after a full and careful trial, has been pronounced a failure. The sugar-cane appears to have shared the same fate. Pop 668,006

POONAH [add.] exp. of the above collectorate 80 m. S. E. Bombay on the Moote, immediately above its confluence with the Moote. It stands in a treeless plain, terminating westward in the Ghats, which, at the distance of a few miles rise to the height of 1000 ft. above its level. Originally it was ill built, with irregular streets and mean houses but recent improvements have entirely changed its appearance, and made it almost a European town. The old bridge across the Moote-Moola has been replaced by one of stone; another of the same material has been built across the Nagarwan Nallah the streets and thoroughfares of the whole E. portion of the town have been macadamized, and between 1841 and 1846 no fewer than 400 houses were erected. An ample supply of water, long felt to be a want of primary importance has at last, after several failures and a heavy expenditure, been secured, by means of a dam thrown across the Moote-Moola, and adequate water works. Poonah being the headquarters of a division of the British army, adequate cantonments have been provided. They occupy an elevated site about a mile W. of the town and are among the most extensive and best arranged in India. The most remarkable building is the palace of the old peshwas. It is a large structure, containing a handsome quadrangle, surrounded by clusters of carved wooden pillars and is now used as a prison, an hospital, and a lunatic asylum. The principal educational establishment is a government school, which has been amalgamated with the previously existing Sanskrit college, and now consists of three departments—a Sanskrit, an English, and a normal—attended in the aggregate by nearly 500 pupils. A separate school for girls has also been established with flattering prospects of success. During the Marhatta rule Poonah had extensive manufactures of piece goods, and was famous for jewellery and precious stones. These have almost entirely disappeared, and the only manufacture worth mentioning is paper to a very limited extent. The trade is confined almost entirely to grain and the raw products of the country. Pop about 80,000

POONAMALIEE, a tn. India, presid. and 15 m. W. S. W. Madras, dist. Chingleput. It consists of a native town containing about 7000 inhabitants of an old square fort, inclosed by a wall 18 ft. high, flanked with bastions, and now used partly as store rooms and partly as a prison and of a cantonment, which is half a mile square and has barracks well ventilated and drained.

POONPOON, a river, India presid. Bengal which rises in Kamrup, among the mountains, on the N. frontier of Behar about lat. 24° 30' N. lon. 84° 20' E. flows somewhat northerly N. E. and joins the Ganges at Futwa, after a course of about 180 m.

POONBUTY or **POKARUTTE** a tn. India presid. and 110 m. S. W. Madras, dist. S. Arcot, possesses a good public bungalow and used to be much frequented by native merchants, but its trade has recently declined. Pop 5497

POORAKAAD, a tn. India, presid. Madras, dist. Travancore, on the Malabar coast 99 m. S. E. by E. Cochim. It has lost much of its importance in consequence of the rise of Alleppey, which has carried off a large part of its trade, but it is still a populous place, with a broad street of houses and a number of narrow streets, or rather lanes branching off to the right and left. The principal buildings are a palace of the rajah of Travancore, another palace, now used as a tobacco depot, a large pagoda, and a Roman Syrian church. Several of the merchants have spacious residences. The sea appears to have made large marvellous residences. The sea appears of the merchants have spacious residences. The sea appears of the ground which was occupied by a Portuguese fort and factory the ruins of which are still visible at low water.

POORONDUR, a tn. India, presid. Bombay, dist. and 20 m. S. E. Poonah. The town is an insignificant place, and

the only thing particularly deserving of notice is the hill fort, situated on a mountain of same name which rises 1700 ft. above the plain below, and 4473 ft. above the sea. The fort or rather two forts, an upper and a lower are situated from 800 to 400 ft. beneath the summit, and consist of a series of curtains and bastions surrounding the natural defences of perpendicular rocks, and including a considerable area. The chief importance is derived from the commanding an important pass through the Ghats. Sivajee by securing the possession of it at an early period in his career may be said to have laid the foundation of his future conquests. A treaty which subsequent events rendered abortive, was concluded here in 1776 between the British and the Marhattas, and is known in Indian history by the name of the Treaty of Poornadur. **POZO** (JACAR and LITZING) two m. W. Africa, on the Slave Coast, in the Gulf of Guinea, 300 m. E. N. E. Cape Coast Castle.—1. Great Popo lies behind a sand ridge which makes it impossible to see it from the offing. This position was probably chosen as a means of facilitating the traffic in slaves, in which it long possessed a guilty pre-eminence. The means used for the apprehension of this traffic having in a great measure destroyed the profits derived from it, most of the inhabitants are now better employed in collecting and exporting palm-oil.—2. Little Popo, situated about 18 m. W. of the former, presents an imposing front of beach houses, and signal poles, one of which marks the residence of the native chief. The town proper which is about a quarter of a mile inland, is separated from the seashore by the creek of an adjoining lagoon. The trade in palm-oil and ivory is extensive.

POPPITZ a tn. Austrian empire Moravia, circle Brunn with a trade in fuel and excellent wine and 1200 inhabitants. **POREGLIA**, a tn. Italy Venetia prov. Udine, near the railway 2 m. S. W. Pordenone, with a parish church a paper-mill and 2901 inhabitants.

PORCESSEZ a tn. Austrian empire Transylvania, circle and about 7 m. S. E. E. Hermannstadt, with a large trade in leather, chalk, and many remarkable petrochemicals are found in the vicinity. Pop 1810

PUREBA a tn. Austrian empire Galicia, circle Now Sandomir 20 m. S. E. Cracow in an alpine district with glass-works and 1100 inhabitants.

POIVANGE a tn. L. Pister Wisconsin, on the La Crosse and Milwaukee railway 85 m. K. W. Milwaukee. It contains five churches two large breweries brick kilns, a pottery, and a foundry and carries on a considerable trade in lumber. Pop (1860) 2879

PORT HURWILL a tn. British America, Canada West on Elgin, on the N. shore of Lake Erie 95 m. S. W. Toronto. It is a port of entry and having a good harbour promises to become a place of importance. Pop about 900

PORT CANNING See CANBERRA Pop in Supp.

PORT DALHOUSIE a tn. British America Canada West, on Lincoln at the mouth of the Welland canal, in Lake Ontario, with two churches—Church of England and Free—a superior school, a boat-building yard, and a large trade in flour. The harbour is one of the best on the lake. Pop about 800

PORT FRANCO, or **CHARLOTTE ANNE**, cap. of the W. India island of St. Thomas, belonging to Denmark lies among hills at the head of a spacious harbour and is a clean well-built place. The principal street, facing the sea and traversing the whole town, contains a number of excellent houses, a spacious hotel and extensive stores. The trade is very important, and a great ascension has been made to it by the selection of the harbour as a principal station of the British steam packets to the W. Indies.

PORT HOOD a vil. British America, on the W. coast of Cape Breton Island. It is well situated, contains a south-west of stone, and a church with a spire, and has the only safe anchorage on this side of the island. The harbour, however was once much safer than at present, as it was protected by a peninsula attached to the mainland by a range of sandhills. These the waves have entirely washed away, and the peninsula has in consequence been converted into what is now known as Smith's Island, which is about 2 m. long and 210 ft. high and has much fertile land under good cultivation.

PORTLAND a tn. U. States, Oregon, cap. co. Multnomah on 1 bank Willamette, 18 m. from its mouth, 50 m. N. by E. Salem, and 643 m. (by sea) N. San Francisco lat. 45° 50' N. lon. 122° 37' 30" W. It is the most populous and commercial town of Oregon and contains several churches, an asylum for the insane, a bank, numerous houses, two steam-ovens, and the Oregon ironworks. Pop. (1880) 2974; in 1865 about 4500.

PORT LYTTELTON a support town, New Zealand, Middle Island, prov. Canterbury to which it forms the chief

or only entrance, 8 m. S.E. Christchurch, and at the head of Foul Victoria harbour. It is a neat town, possessing an air of regularity and completeness, with fairly metalled streets, a jail, hospital, and three churches, and is surrounded inland by a belt of precipitous volcanic hills, from 2000 to 6000 ft. high, beyond which lies the vast Canterbury Plains. Communication with Christchurch, the capital is maintained by means of steamers plying from the harbour up the river Avon, by a railway tunnelled through the hills, and by telegraph. It exports a very large quantity of wool, and carries on a

PORT LYTTELTON—Panoramic View from the Bridge-path to Christchurch.

considerable trade otherwise. The harbour is a fine lead-locked inlet, on the N.W. side of Banks Peninsula, and the town stands upon a small bay at the head of it, and about 4 m. within the entrance, which is 1 m. wide. The depth between the banks, which are bold and steep-to, is about 6 fathoms thus decreasing to 3½ fathoms at the anchorage opposite Lyttelton. Pop. about 2000.

PORT MONTE a tn. S. America, Chili, at the head of Raleneau Sound, which branches off from Ascent Gulf on the N.E. of the island of Chiloe, lat. 41° 30' 30" S. lon. 72° 56' W. It was founded by the Chilean government in 1853 and being only 15 m. S. of the flourishing German colony of Llanquihue (of which it is the port) has made rapid progress. The colony was settled here under the patronage of the Chilean government; and such is the fertility of the soil and the salubrity of the climate, and so great are the advantages offered to emigrants, that in ten years the population has increased to a total of 15 000 souls. The harbour of Port Monte is deep and perfectly sheltered from all winds, and the trade current on it is already very extensive, including in addition to the direct traffic of the colony a large export of wheat of the shore—a species of pine of which so unlimited supply is obtained in the adjoining mountains. The number of persons employed in sawing and selling the timber is computed at 1200. As yet the number of houses in the town amounts only to 150, of which about 18 are of two stories. An abundant supply of good water is procured from two streams that run in the neighbouring hills. Spaces have already been marked out for public buildings, and from the excellent position of the settlement, there is little doubt that it will eventually become one of the most prosperous places in the republic. The permanent population of Port Monte, in which the wood-cutters are not included, amounts to 610, of whom upwards of a half are natives and the remainder chiefly Germans, with a sprinkling of French, Spaniards, British, and North Americans. The Pacific Company's mail steamers call here once a month.

PUETNEUF a tn. British America, Canada, East, cap. co. and at the river of same name where it joins the St. Lawrence, 36 m. W. Quebec with a Protestant church, flour, saw, paper &c. and carding mills. There are two light-houses in the vicinity. Pop. 750.

PORT NICHOLSON New Zealand. See WELLINGTON.

PORTOBUFFOLÉ a tn. Italy, Venetia, prov. and about 18 m. N.E. Treviso, on the Livenza, which is here navigable for vessels of nearly fifty tons. It contains a parish church and a civil hospital and has a considerable trade.

PORTO NOVO, a tn. India, preuss. and 120 m. S. by W. Madras, on the Malabar coast, at the mouth of Velazur or Vellara. It was formerly a place of great trade, but has never recovered the disaster which Hyder inflicted upon it during his invasion of the Carnatic in 1789 though Hyder himself paid the penalty in a signal defeat by Coote on the 1st of July 1781. The harbour is so shallow that large vessels are obliged to discharge and take in cargo outside the bar. Owing to this and other causes the place had greatly declined, when a new source of prosperity was opened to it by the establishment of extensive ironworks by the East India Iron Company. The supply of a very pure iron ore found near the surface is unlimited and iron and steel of a superior quality are produced. Otherwise however, the speculation has not proved very remunerative, and the old has been succeeded by a new company which it is hoped may be more successful. Pop. about 15,000.

PORTO RÊ a tn. Austrian empire, kingdom of Croatia and Slavonia, co. and about 6 m. S.E. E. Muma, at the entrance of the Bay of Boccezi. It has a spacious free haven defended by two castles, a lazaretto, an infirmary, a building-yard, and an important fishery, and contains 2912 inhabitants.

PORTO VILLO a tn. S. America, Ecuador cap. cant. of same name, 125 m. S.W. Quito. It stands on the banks of a river of same name, in a beautiful plain, which contrasts pleasantly with the surrounding sandy desert, but has nothing else in its appearance deserving of notice. The houses are built of wood, without any regard to regularity, and a college which it was proposed to found, has not been commenced. Meanwhile, as a kind of substitute for it, there are two primary schools—the one for boys and the other for girls. The chief manufactures of the district are straw hats, horsecloths, and cotton goods, plain and figured.

PORT SAN ANTONIO, S. America, on the N.E. shore of Patagonia, is the best harbour on this part of the coast, and the best place of resort for a large ship in want

of serious repair. Being only 30 m. distant from the Rio Negro, it is well situated for commercial intercourse with the interior, and only wants a proper development of its resources to become a place of importance. It is perfectly sheltered from every wind, and possesses localities in which dry docks might be built for vessels of any size. The rise of the tide varies from 18 to 30 ft.

PORT STANLEY, a tn. British America, Canada West, on Eglia, on the N. shore of Lake Erie and on the London and Port Stanley railway communicating with the Great Northern and the Buffalo and Lake Huron railways, 113 m. S. W. Toronto. It possesses Church of England, Free and Wesleyan churches, and is the entrepôt of a large trade in the surrounding fertile and well-cultivated districts, shipping from its harbour for exportation considerable quantities of flour, grain, and other commodities.

PORT ST. LUCIA, a small seaport on the S. E. coast of Africa, Zulu country, lat. 28° 26' S. lon. 33° 36' E. It is the natural port of the Zulu country, through which imports of various kinds and in considerable quantity, are introduced into the Orange River free state, and the Transvaal Republic.

FORUMBACH a tn. Austrian empire, Transylvania, circle and 15 m. S. E. Hermannstadt; with glassworks and 1706 inhabitants.

POSHAREVATZ, or **PARANOWITZ** a tn. Turkey in Europe, Servia, cap. circle of same name at the foot of a mountain crest, 85 m. E. R. L. Belgrade. It is the seat of a court of justice, and has a church and a school. A treaty of peace between Austria and Turkey was concluded here in 1718. Pop. 5198.

POSINA, a tn. Italy, Venetia, prov. Vicenza, with 2937 inhabitants who are chiefly employed in making nails.

POSTYEN a tn. Austrian empire, Hungary, on Upper Neutra, on the Waag 32 m. N. N. E. Tyrnau with a court of justice, a beautiful castle, and much-frequented yearly markets. Teplice-Postyem, situated about 2 m. S. in a beautiful and fertile valley is famed for its thermal sulphur springs and elegant bathing establishments. Pop. 6539.

POTISIA a tn. Independent Cambodia, about 60 m. N. W. Oudong in lat. 12° 10' N. lon. 105° E. It has quarries of alabaster, and a large deposit of antimony is found in its vicinity.

POTULYCZ, a tn. Austrian empire, Galicia, circle Zolkiew 28 m. W. Lemberg, with manufactures of stoneware, and 2459 inhabitants.

POTOMAC [add.] a river U. States which is formed on the N. frontiers of Virginia by the junction of two branches—a N. and a S. The N. branch runs in the Alleghenies in the N. of the state, the S. branch in the Shennandoah range near its centre. From the point of junction, about 20 m. S. E. Cumberland, the united stream flows in an irregular curve, first N. E. and then generally S. E. till it reaches Washington. Here, changing its direction to S. and S. W., it expands into an estuary from 6 to 8 m. wide, flows for 50 m., then resumes its direction of S. E. and continuing it for about 70 m. falls into Chesapeake Bay on its W. shore, about 75 m. from the ocean. Its entire length is about 400 m., and during nearly the whole it forms the boundary between Virginia and Maryland. Its principal tributary is the Shennandoah, which joins it immediately W. of the Blue Ridge. In the upper part of its course it forms a number of falls, and passes through much magnificent scenery, particularly where it passes the Blue Ridge at Harper's Ferry. The tide reaches Georgetown, a short distance above Washington, to which the largest vessels can ascend.

POTOOR, a tn. Ceylon, on the peninsula which forms the N. extremity of the island, about 7 m. N. E. Jaffna. It contains one of the few old churches which were saved by the Portuguese, and which has been restored for the use of the Wesleyan missionaries who have a successful station in the vicinity; but its most remarkable object is a wall, which forms one of the wonders of the peninsula. It is about 80 ft. in diameter and has been sunk to the depth of 144 ft. in a bed of stratified limestone so hollow that in riding over it the horse's hoofs sound as if striking on an arch. The water on the surface is fresh, lower down brackish, and at the bottom highly fetid, giving off bubbles of sulphuretted hydrogen gas. A still more remarkable fact is, that the surface rises and falls

a few inches every twelve hours, but never overflows, and never sinks below a fixed point, how large soever the quantity of water that may be withdrawn. The cause of these phenomena is still unknown. The native belief is that the wall communicates by a subterranean channel with the Ekenamah, near Kankonang torre—a distance of 7 m. In 1874 government, with the view of making this apparently inexhaustible spring available for the perpetual irrigation of the surrounding districts caused a steam engine with three pumps to be erected at the well. It proved a failure, not from any deficiency in the supply of the water, but in its quality—the fields irrigated by it yielding no increase, but as if they had been poisoned barely returning the seed. Nothing can exceed the perfection to which horticulture is carried in the gardens around Potoor.

POTOSI, a tn. U. States, Wisconsin, on the Grant, 3 m. above its junction with the Mississippi 75 m. S. W. Madison. It stands in a deep and narrow valley, in the midst of lead mines, the produce of which constitutes its principal trade. Pop. (1860) 2084.

POTSH HALEK, a tn. Austrian empire, Bohemia, circle and 28 m. S. E. Tabor, on the frontier of Moravia. It is the seat of several public offices, contains a deanery church, an hospital, a brewery, a much-frequented mineral spring, and 2991 inhabitants.

POTSCHKESTROOM or **MOOR RIVER**, Donr. a tn. S. Africa, Transvaal Republic, on the Mool or Mlino—an affluent of the Vaal or Lika, 27½ m. N. W. Port Natal. It stands on a plain almost as flat as a bowling-green from 6 to 10 m. in diameter and surrounded by hills, and is laid out on a large scale in acres or lots of 100 yards square. It has a very pleasing appearance, though as yet the houses—all of unburned bricks and thatched—do not exceed 100. The water brought from 3 to 4 m. up the river seems not to be over abundant, as the inhabitants are only supplied by turns for irrigation. Lions are still numerous in the vicinity, seven having been killed during a hunt in one day.

POTLENDORF, a tn. Austrian empire, Lower Austria, near the frontier of Hungary, on an creek of the Danube and a canal communicating with the Leitha, has a castle belonging to Prince Esterházy, ancient waterworks with three massive towers, a Gothic chapel, a picture gallery, a beautiful parish church, a fine park, an hospital, a poor-house and a custom-mill, which is said to be the largest in the Austrian dominions. Pop. 3200.

POVENEZ, a tn. Russia, gov. Olonetz, cap. circle of same name, on Lake Onega, near its N. extremity 70 m. N. E. Petrozavodsk. It contains only 780 inhabitants, who are chiefly employed in fishing on the lake, or hunting wild animals for their fur.

POYANG, a lake, China, in the N. of prov. Kiangnan. It is formed mainly by the Kan Kiang which it receives near its N. W. extremity, and discharges itself into the Yangtze, which near its N. extremity, by a channel which is about 3 m. long by 1 m. broad. On its eastern shore, at the point of outlet, stands Hoo-kow or the 'City of the Lake.' This city is perched upon a precipitous rock, whose opposite to H. Mount Len rises its crest majestically to the height of 5000 ft. In the distance, far to the S., the Taiko shan, or 'Great Orphan Bank,' as seen rising in solitary grandeur from the bosom of the lake. Poyang and its romantic scenery furnish the subjects of many poetic legends current among the people.

PRACEVGAJ a tn. Austrian empire, Serbian Banat, Military Frontier, on the Mura, 42 m. E. N. E. Belgrade; with a Greek non-suited parish church and 1970 inhabitants.

PRADNIK a tn. Austrian empire, Galicia, circle and 8 m. N. W. Cracow with a castle in which King Sigismund Augustus died in 1572 and the films Demetrius, the pretender to the Russian throne, resided in 1605. Pop. 700.

PRALOG a tn. Austrian empire, kingdom of Croatia and Slavonia, circle and 12 m. E. N. E. Waresin with four mulberry plantations, a trade in silk, and 3000 inhabitants.

PREMIDI [add.] a tn. Turkey in Europe, S. Albania, circle and 46 m. N. W. Yarrow, on the Toprakli. It stands between hills clothed with vineyards, contains three mosques with minarets, and has a pop. of about 3000.

PRERAU a tn. Austrian empire, Moravia, circle and 12 m. S. E. Olmitz, in a fertile plain on the Betschwa, and

at the junction of the Frigate and Olimpia with the Lundberg and Odeberg railway. It is the seat of several public offices, and has three churches, a synagogue, a castle with a lofty tower, a townhouse also with a tower, manufactures of cloth and cattle and other animal products. Pop. 5419.

PRESCOTT, a *to* U. States, esp. Arizona, and east of justice for Yavapai, picturesque situated among the Pine Mountains, 140 m. E. the Colorado River, and 500 m. S. Salt Lake City; lat. 34° 7' N. lon. 113° 30' W. It was founded in 1864, is built of wood and inhabited mostly by immigrants from California and Colorado. There are mines of gold and silver in the vicinity.

PRESERVATION a small island in the E. of Bass Strait, situated in Armstrong Channel, which separates Barrow Island on the N. from Clark Island on the S., and belonging, like them, to the Furber group. It contributes, with Bass Island to protect the excellent anchorage of Hamilton road in the above channel, and is frequented by flocks of sea-birds, including the barnacle goose and a few black swans. In point of numbers, however they are all surpassed by the snowy petrels, which burrow in the ground like rabbits and then lay two enormous eggs, and during up their young. (Of these birds Captain Flinders remarks:—A little after sunset the air at Preservation Island used to be darkened with their numbers coming in from sea and it was generally an hour before their squabbling ceased, and every one had found his own retreat. These birds are about the size of a pigeon and when skinned and dried in smoke, we thought them palatable food. Any quantity could be procured by sending people on shore in the evening. The sole process was to thrust in the arm up to the shoulder and seize them briskly in 1842 this island was inhabited by an old sailor of the name of James Moore, another man, and three or four native women. They lived in rude huts on a black soil and had a number of dogs, goats and fowls. Moore had spent twenty-three years in this desolate spot.

PRESTETCH a *to* Austrian empire, Bohemia, circle Chudowa with a Protestant and a R. Catholic church, a townhouse, a mill and 1100 inhabitants.

PRIMISLJE (Prizna and Lowen) a *to* Austrian empire, Military Province, Croatia, dist. and 12 m. S.E. Ogulin. Other or Upper Primislje, has a German trivial school, and contains 1370 inhabitants. — Lower or Lower Primislje, has only 680 inhabitants. There are two remarkable grottoes in the vicinity.

PRINCE OF WALES or MORALDO an Isl. Australia, and the largest in Torres Strait, being 11 m. long from N. to S. by 10 m. broad. The N.W. coast, consisting of rocky points and small bays, with wooded valleys descending between ridges of hills to the shore is rendered difficult of access by numerous shoals and sand banks; the N.E. coast is fringed by a narrow coral reef. The interior is high and rocky but comparatively little is known of it. In many parts it is well wooded and has a fair proportion of good soil. It also appears to be the only island of the surrounding neighborhood which is permanently inhabited, though many of the others are occasionally visited by the natives.

PRINCE OF WALES a strait, Arctic Region, separating Bering Island from Prince Albert Land, and extending N.W. to N.E., lat. (N.E. extremity) 73° 25' N. lon. 115° W. It is one of the communications by which the N.W. passage between the Atlantic and Pacific Oceans may be effected, as ascertained in 1850 by Captain Sir R. McClure, of H.M.S. *Investigator*, who entered it, but was unable to force his way through owing to the masses of ice.

PRINCES ROYAL, a group of isls. in Prince of Wales Strait, Arctic America, between Bering Island and Prince Albert Land, lat. about 73° 44' N. lon. 117° 35' W., were so named by Captain Sir R. McClure of H.M.S. *Investigator* which wintered a while in the E. of them in 1850-51. They consist of a larger and a smaller island, the former of which attains an elevation of about 500 ft., and extends a mile nearly due north and south, with an average breadth of 800 yards. Both islands are barren to the extreme, the surface consisting of small stones and pebbles.

PRIKEND, or PRINSMAN [old], a *to* Turkey in Europe, Albania, *syria*l Rum-El, on a peninsula of same name, which leads through the Shkumbij, 75 m. N.E. of Scutari. It is surrounded by walls, and defended by a castle,

which was once the residence of Serbian kings, and is partly built in the form of an amphitheatre on a slope of the shore. It is the seat of the Greek bishop of N. Albania, and contains ten mosques, and a Greek and a L. Catholic church. Pop. 26,000.

PROBN (Durbach) a *to* Austrian empire, Hungary, on Lower Neutra, 38 m. N.W. Schumacher, with 2730 inhabitants, the greater part of whom are tanners, shoemakers, or cutlers.

PRONA (Torn) a *to* Austrian empire, Hungary, on Arva Theros, 30 m. N.W. Fetsch in a pasture and wooded district. It has a chateau, and a mineral spring and contains 1100 inhabitants, of whom a majority are Lithuanians.

PROKUROV, a *to* Russia, gov. Podolsk, cap. circle of same name, at the confluence of the Plochna with the R. Bug 50 m. N. Kanemeter with four churches, a circle school a charitable institute, and several industrial establishments. At the village of Yarmotin, in the circle there is a large annual market. Pop. 7850.

PROVO a *to* U. States, Utah, cap. co. Utah, on the Timpanogas or Provo River 34 m. E. of the same into Utah Lake at the base of the Wasatch range, and 45 m. S.E. Salt Lake City. It has a church, school, townhall flour and saw mills, tanneries, &c. The river furnishes abundant water-power. Pop. (1860), 2030, in 1865, about 2300.

PRUCKNIK, a *to* Austrian empire, Galicia, circle and 12 m. N.W. Przemysl contains a fine baronial castle and 2200 inhabitants.

PRUN a *to* Italy, Venetia, prov. and about 9 m. N.W. Verona; with four parish churches and the Ponte di Piva, a remarkable natural bridge which has a span of 157 ft., and is 90 ft. high and 50 ft. thick. Pop. 321.

PRUSIAN, a *to* Russia, gov. and 60 m. S. Grodno, cap. circle of same name, on the Mukewitz, It has three churches, a circle and a parish school, and two charitable institutions. Part of the circle is still occupied by the almost impenetrable forest of Bielozerska. Pop. 4636.

PRUSSIA [add.] The result of the war with Denmark in 1864 and with Austria in 1866 has been to materially aggrandize the kingdom of Prussia, and to raise it to the foremost place in Central Europe. The Prussian territory now comprises the following constituent parts:—

	Area, sq. m.	Pop. 1864.
The Kingdom of Prussia as previous to August 1866.	109,096	19,294,812
The Kingdom of Hanover	14,648	1,228,449
Electoral Hesse.	3,673	737,282
Duchy of Hesse.	1,918	466,076
Free City of Frankfurt.	24	80,327
Duchy of Schleswig-Holstein.	6,809	508,360
Parts of Bavaria (Landsberg, Osnaburg and Oldenburg).	214	92,976
Parts of Grand Duchy of Hesse (Hesse Hanberg, Amt Hunsburg and Amt Melsungen).	438	76,169
	181,904	23,500,242
Increase of Prussia.	27,811	4,283,708

The kingdom of Prussia has thus been augmented by the incorporation for ever of Hanover, Electoral Hesse, Nassau, Frankfurt, Schleswig-Holstein, and ceded portions of N. Bavaria and the Grand Duchy of Hesse and the space upon the map separating the smaller western part of Prussia (the Rhine Province) has been filled up, and the boundaries, formerly intricate and confused have been simplified.

The Germanic Confederation has been dissolved and the states which composed it, with the exception of Austria, now entirely excluded, have been ranged in two groups—North Germany, consisting of twenty states under the sole and absolute leadership of Prussia; and South Germany, numbering six states, nominally under the ascendancy of Bavaria, but by a secret treaty really allied with Prussia.

Not included in either North or South Germany, but nominally still belonging to the German empire, are the duchies of Luxembourg and Liege, of an area of 1886 sq. m., and a pop. of 418,681. The following table gives the area and population of the several states of the new confederation, according to the census of 1861:—

States—German Confederation.	Area, sq. m.	Pop. 1864.
1. Prussia.	188,906	28,000,000
2. Saxony.	3,777	2,800,000
3. Mecklenburg-Schwerin.	5,100	500,000
4. Oldenburg.	5,420	200,000
5. Brunswick.	1,434	1,000,000
6. Saxe-Weimar.	2,400	200,000
7. Mecklenburg-Strelitz.	1,037	90,000
8. Saxe-Meiningen.	856	100,000
9. Anhalt.	1,000	100,000
10. Saxe-Coburg-Gotha.	730	100,000
11. Saxe-Altenburg.	610	100,000
12. Waldeck.	430	100,000
13. Lippe-Deimold.	420	100,000
14. Schleswig-Holstein.	874	100,000
15. Schleswig-Holstein.	802	100,000
16. Rhenish-Prussia.	900	100,000
17. Saxe-Lippe.	171	100,000
18. Rhenish-Prussia.	144	100,000
19. Hamburg.	130	100,000
20. Lubeck.	127	100,000
21. Bremen.	74	100,000
22. Oldenburg.	100	100,000
Total of North Germany.	100,000	10,000,000

The states of South Germany viz. Bavaria, Württemberg, Baden, the part of Grand-ducal Hesse of the Main and Liechtenstein, are at liberty to enter into a national alliance with the North German Confederation, with an independent existence.

The constitution of the northern confederacy was laid down by a treaty, ratified by all the members of it at Berlin in September, 1866 and is based upon the following principal terms:—The several governments enter into a mutually defensive and offensive alliance, for the preservation of their integrity and independence the objects of the alliance are to be insured by certain fundamental principles laid down by Prussia, and with the co-operation of a national parliament, to be convened jointly by the allied powers. The military forces of the allied governments are placed under the supreme command of the King of Prussia, and their several services in time of war shall be regulated by special agreement. By the law for the election of representatives for the North German parliament, passed by the Chamber of Deputies and the Upper House of Prussia, in September 1865, every man blameless in the sight of the law who is a citizen, and of the age of twenty years, is to have a vote. One deputy is to be elected for every 100,000 of the population and may surplus of 50,000 or more is to be reckoned equal to 100,000, the voting is to be in public, and every vote is to be given personally by means of a voting card without signature, enclosed in an envelope, and placed in an urn and the election is to be decided by the absolute majority of votes.

As the Prussian constitution will not come into operation in the incorporated territories until October 1 1867 and as no statistics of the kingdom in its enlarged condition can be furnished collectively for some time, the following information will be applicable to it only in its previous form the latest particulars relating to the several subject territories being given under their respective heads. The population, then, of the several provinces of Prussia, as it was before the war of 1866 together with the principal religious divisions, was as follows, on December 31, 1864—

Provinces, &c.	Pop. 1864.	Protestants.	R. Catholics.	Great Church and other sects.	Jews.
Prussia.	2,774,395	2,111,013	600,233	21,073	80,674
Pomerania.	1,030,730	457,404	546,409	2,130	69,880
Posen.	1,457,270	1,208,530	15,788	430	13,000
Silesia.	2,810,700	1,905,610	1,104,646	6,527	43,000
Brandenburg.	2,018,382	2,450,000	85,180	4,570	35,000
Saxony.	2,045,770	1,072,771	1,235,265	4,078	5,000
Westphalia.	1,065,661	730,686	300,073	1,073	10,000
Rhine Provinces.	2,045,305	801,709	2,045,305	6,109	35,000
Schleswig.	654,905	1,300	65,000	111	946
Jahde.	1,073	1,000	1,000	111	7
Military district.	55,000	1,000	1,000	111	7
Total.	10,553,130	11,445,700	7,112,800	21,000	300,000

Of the total population the military altogether numbered 79,421.

Finance.—The revenue, expenditure, and public debt of the kingdom of Prussia for the years 1862-3, are thus stated:—

	Revenue.	Expenditure.	Public Debt.
1862.	230,478,611	230,000,000	241,103,215
1863.	250,000,000	250,000,000	240,000,000
1864.	21,500,000	21,575,000	21,561,707
1865.	24,000,000	24,000,000	24,112,770

Trade and Commerce.—At the ports of Danzig and Stettin the imports and exports in 1865-6, are stated as follows:—

	Imports.	Exports.
	1865.	1866.
Danzig.	2,765,589	2,800,000
Stettin.	7,058,491	2,800,000

The number and nature of the mines in Prussia, with the amount of their produce in the year 1863 the number of miners employed in the working of them together with that of their families, are thus stated:—

Principal Mines.	No. of Mines.	Produce.		No. of Miners.	No. of their Families.
		Quantity.	Value at place.		
Coal.	400	200,000,000	20,000,000	7,000	120,000
Iron.	400	80,000,000	8,000,000	1,000	20,000
Lead.	100	10,000,000	1,000,000	1,000	20,000
Copper.	100	10,000,000	1,000,000	1,000	20,000
Total of principal and other mines, &c.	1,200	400,000,000	40,000,000	10,000	200,000

The number and tonnage (in last), of sailing and steam vessels, belonging to the ports of Prussia, on January 1 1864 and 1865, were as follows:—

Ports.	Sailing.		Steam.		Total.	
	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.
Danzig.	117	52,100	11	601	128	65,101
Stettin.	109	37,185	48	2,000	157	41,185
Stettin.	107	31,400	5	300	112	31,700
Other Ports.	80	30,700	4	100	84	30,800
Total.	1,200	125,485	118	4,001	1,318	129,486

PRZEWISLAU. a town in Austrian empire, Moravia, circle and 16 m. S.W. Neustadt with a Protestant and a R. Catholic church and 1200 inhabitants.

PRZEWISLAU. a town in Austrian empire, Moravia, circle and about 14 m. W.S.W. Olmütz pleasantly situated, has an ancient parish church and contains 1200 inhabitants.

PRZEWISLAU. [add.], a town in Austrian empire, Galicia, emp. circle of same name 55 m. W.S.W. Lemberg, on both banks of the San here crossed by a long bridge, the oldest in Galicia. It is the seat of several important public offices, and the see of a R. Catholic and a Greek United bishop, and has several fine Gothic churches particularly the R. Catholic cathedral, adorned with fine paintings and ancient wall trophies, an ecclesiastical museum, an upper gymnasium and a high school a convent of Minorites founded in 1254.

PRZEWISLAU. a town in Austrian empire, Moravia, circle and about 14 m. W.S.W. Olmütz pleasantly situated, has an ancient parish church and contains 1200 inhabitants.

PRZEWISLAU. a town in Austrian empire, Moravia, circle and about 14 m. W.S.W. Olmütz pleasantly situated, has an ancient parish church and contains 1200 inhabitants.

Bohemian circle and 26 m. S.S.E. Casner, cap. dist. of some name; with a parish church, a castle, a townhouse, an hospital, a brewery, manufactures of furs and other articles, and 2320 inhabitants.

PREIBRAM [add], a mining in Austrian empire, Bohemia, circle and 23 m. S.S.W. Prague, on a stream of same name. It is an open town with neither walls nor suburbs, and has several important offices connected with mining, a deanery church, and other decayed buildings, with two conspicuous towers, a townhouse, mining and other schools, and no archbishop's palace in a dilapidated condition. The mines, which are wrought on the Durkoberg in the vicinity, yield silver and lead, and are very productive. Pop. 7700.

PUBNA a dist. India, presid. Bengal between lat. $23^{\circ} 34'$ and $24^{\circ} 30'$ N., lon. $89^{\circ} 50'$ and $89^{\circ} 45'$ E., is bounded by Bagura or Bagura, N.E. Myrmening S.E. Dacca Jaiel pore S. Jomora, and W and N.W. Naddea and Rajshahye, area 2006 sq. m. A large part of the surface is occupied by water in the form either of Jhails or watercourses, which intersect it in all directions. The soil is in general of the richest description, and nothing can be more beautiful than the rural scene which presents itself to the eye of the traveller as he passes along one of its navigable streams and beholds its fields of green water meadows covered with cattle, and its plantations of cotton, sugar and paws, backed with magnificent pagod banyans, humber, and coco trees. Pop. 600,000.—**PURBA** the capital situated 110 m. N.E. Calcutta, on a stream of same name an offshoot of the Fudde, or great E. branch of the Ganges, is an insignificant place.

PULCHENDRA a tn. India, Rajpootana, state and 60 m. S.W. Jodhpore stands in a fertile but partially cultivated country and contains about 5000 inhabitants, who are chiefly employed in the manufacture of coarse cloth or in the salt works, which derive their supply from extensive salt marshes situated about 3 m. to the S. The revenues derived by the ruler of Jodhpore from his salt monopoly is specially allotted to the maintenance of his army.

PEDROWKAN a tn. India, N.W. Provinces, dist. and 34 m. E. Gorakhpore, stands in a beautiful and well wooded district, and consists of a few rich houses of two stories, with a far greater number of wretched huts. Pop. about 3000.

PUEBLA (La) DE LOS ANGELES, or LA PUEBLA [add] a city Mexico cap. prov. of same name lat. $19^{\circ} 5' N$ lon. $98^{\circ} 5' W$ 75 m. S.E. of Mexico on the Tlaxcala or Papagallo as a fertile, extensive, and populous plains of the Mexican Cordillera, 3500 ft. above sea level. The climate is good dry and salubrious the soil of the surrounding country exceedingly fertile and prolific, meeting but little cultivation streams descending from the neighbouring mountains, irrigate the entire plain, and also supply the inhabitants of La Puebla with an abundance of excellent water. Puebla is the third city in Mexico in point of size and only—if at all—inferior to the capital in the regularity of its streets the handsome appearance of its houses, the wealth of its depots, and the splendour of its ecclesiastical edifices. The principal streets run due E. and W., crossed by others from N. to S., the former square blocks of houses, neatly calculated. They are broad and well kept, and the pavement, being composed of variegated stones of different sizes, artificially disposed so as to form lozenge-shaped figures, present a curious and attractive spectacle. The houses are usually three stories high, having flat roofs, and covered galleries open at the side running round an interior court or quad square. The principal square is the Plaza Mayor which contains, on opposite sides, the cathedral and the government palace as well as the exchange, an extensive building completed in 1700. The principal market is held in this square. The sixty churches of Puebla are profusely adorned with sculptures and paintings, carvings, and ornaments of gold and silver. A number of magnificent churches the nine monasteries and thirteen convents which the city contains. The church and monastery of San Domingo may be cited as an example. The high altar is wholly composed of silver and two dogs of the same metal, life size, are mounted on either side on pedestals of silver and gold. The sanctuary is enriched with colours, gilding, and carved work. In the centre stands the tabernacle, 30 ft. high consisting of marble and the precious metals. The balustrades are of solid silver, and the silver walls glow with richly painted representations of the

miracles of the Saviour. A popular and well endowed foundation is attached to the church of San Felipe Herl. Persons of either sex desirous of purgating themselves for the sacraments, or devoting themselves to religious exercises, are received therein and maintained for eight days without charge. Other noticeable buildings are the bishop's palace, containing a library of several thousand vols.; the mint, the theatre, and the hospital. There are also twenty-one collegiate houses or higher theological schools, besides numerous educational establishments for children of either sex. As the principal town between the support of Vera Cruz and Mexico the capital Puebla enjoys an extensive trade. Its manufactures are certain tissues converted into seas and shawls, comfortable porcelains, and a red pottery dusting granted by the elegance of its forms, glass, earthenware, beads, and soap. In the environs there is a quarry of beautiful alabaster which, when sawn into thin plates becomes so transparent, that several monasteries have employed it as a substitute for glass. During the French invasion of Mexico it acquired considerable notoriety from the resistance it offered, for two months, to the French arms [May, 1863] Pop. 71,631.

PUGWASH a vil. British America, Nova Scotia, co. Cumberland on the N.W. coast, near the mouth of the river in a bay of same name in Northumberland Strait. It is well situated the river expanding into a small lake with islands and promontories, forming scenery of considerable beauty and contains a small wooden English church. The harbour which stands at the head of the bay, is small, and somewhat difficult of access, but is quite secure, and has depth enough for any vessel able to cross the bar, on which there is 14 ft. at low water in ordinary spring-tides. A great deal of lumber used to be shipped here but the supply has become deficient. In the vicinity are quarries of limestone, which through much for building, is extensively worked for agricultural purposes, supplying lime to Prince Edward Island, as well as the neighbouring country.

PULI, a tn. Russian empire, E. Siberia, on the Amoor, about 100 m. below Marinsk, and about 150 m. above its mouth lat. $52^{\circ} 30' N$ lon. $140^{\circ} 20' E$. It has acquired some celebrity as the place where the hunters and traders assemble from all quarters at stated seasons Tungus hunters from the Kaysa and Yablonsky bring the produce of their rides, Gilyaks, from the shores of the Sea of Okhotsk, come with furs and the Mangos and Oskid with skins from the Lena and Gurena. Here they are met by Manchou merchants with wares from China, and even by the Japanese, and an important bazaar takes place.

PULICAT a tn. India, presid. and 22 m. N. Madras at the E. extremity of one of the islands lying at the entrance of the lake or lagoon of Pulicat. It once belonged to the Dutch, who established an important factory here in 1609. It is now a decayed place. The lagoon appears to have originated in a branch made by the sea through a low sandy basin, and the consequent flooding of the adjoining lands. It is nearly 50 m. long from N. to S., and varies in width from 8 to 31 m. The lake has a few entrances, and the water is constantly brackish. A canal, about 14 m. long, excavated between Madras and a narrow breakwater which stretches 8 m. from the lake, gives a continuous navigation, and greatly facilitates the importation of charcoal, firewood, vegetables, and other articles of daily consumption, to the Madras markets.

PULLICONDAR or PALMCONDAR, a tn. India, presid. and 120 m. W.S.W. Madras, at the base of a lofty hill of syenite, near r. bank Palar. It is the chief town of the Vellore talook and contains two pagoda one handsome, and the other, in front of it, supported by four lofty pillars.

PULLUQUI, an Isl. S. America, off the coast of Chili, the largest of those which lie between the Chaco Narrows and Bahamovi Sound about lat. $41^{\circ} 30' S$ lon. $75^{\circ} 25' W$, is 7 m. long a thickly wooded, and rises gradually from its S. point to a ridge which is about 800 feet high, and traverses the island from N. to S. With Outien, which is opposite to it, and only 2 m. distant, it forms the entrance to Bahamovi Sound, which stretches N. for 20 m., and a about 18 m. across from E. to W.

PUNA a tn. S. America, Bolivia prov. and 65 m. S.S.W. Obispoque, near one of the sources of the Pilcomayo. It is of very pleasing appearance, and has a good plane and church,

and a number of shops well supplied with fruits and other necessities or luxuries. The Indians of the district are industrious, and with very imperfect tools manufacture large quantities of earthenware.

PUNGO-ANDONGO, a fort, W Africa Portuguese Settlements, prov Angola 170 m. S.E. Luanda, lat. 9° 42' 14" S; lon. 15° 50' E. It stands atop a group of craggy volcanic-shaped rocks, each upwards of 500 ft. high composed of a conglomerate of a great variety of rounded pieces in a matrix of dark red sandstone. Several streams run among the rocks, and nearly to the centre stands the village, so completely enclosed that a handful of men could hold it against an army. It was long the stronghold of the Jings, the original possessors of the country who now live in independence at some distance to the N. In former times Pungo-Andongo was considered so unhealthy that banishment to its bleak rocks was the punishment inflicted when the judges meant the sentence to be particularly severe. It is now ascertained to be the most healthy part of Angola.

PUNJABI, a tn India, Sindhia's Dominions, 12 m. S.W. Gwalior remarkable as the scene of a victory gained by the British on 29th Dec. 1848 the very same day when a still more important victory was gained at Maharajpore. The result was to place the north and interests of Gwalior entirely at the mercy of the British government.

PUNNAGHULU, a tn India, Sangoor and Nabudda territory, 190 m. S.W. Allahabad. It is an ancient place, containing a great number of Hindu temples, and, among other striking objects, is a curiously sculptured bull placed on a lofty stone altar but is very poorly built, most of the dwelling houses being merely composed of mats coated with mud.

PUNNAH a tn India, Bundelkand, cap. territory of same name 117 m. S.W. Allahabad. It stands on the N.E. slope of a barren range of hills, close to a very extensive sheet, formed by embanking the extremity of a deep valley and though now in ruins was once a well built place. Most of the houses being composed of square stones and covered with tiles. The streets with a pathway of large flags in their centre, are well formed and commodious but many of them are tenanted only by monkeys which are seen seated on the roofs or at the windows. The principal buildings are the raja's palace, a large and beautiful but dilapidated structure, embellished externally with numerous carvings, and surmounted by lofty and elegant kiosks, several Hindu temples, in a mixed style of architecture, partly Saracenic and a number of mansions, many of them of striking appearance. Punnaah derived its prosperity from its diamond mines, consisting of a seam of ferruginous gravel and reddish clay in which after careful washing the diamonds are found. They are still worked but not to much profit as the stones are not only rare, but small and of indifferent quality.—The town situated between lat. 23° 53' and 25° 5' N; lon. 78° 58' and 80° 45' E. has an area of 688 sq. m. a revenue of £80,000 and a pop. of 87,000.

PUNTENANG a tn Independent Cambodia, on the S. bank of the Odong, a little below the point where it issues from Benih, a town situated 30 m. above the town of Odong. It is a large place, established for its pottery with which it supplies the whole country.

PURIFICACION or **VILLA DE LA PURIFICACION**, a tn Mexico state Jalisco 122 m. S.W. Guadalajara, at the foot of the W. slope of a mountain range on a small stream which flows S. to the Pacific. Pop. 4000.

PURKREDORE a tn Austrian empire Lower Austria, on the Vienna and the W. railway 7 m. W. Vienna is the seat of several important public offices, and has an ancient castle, and a trade in the fruit of the district. Pop. 1100.

PURNIAH a dist. India, presid. Bengal, between lat. 25° 5' and 26° 37' N; lon. 85° 48' and 88° 28' E, is bounded N. by Nepal and Akhmur E. Dinagpore, S. Malda and Bhagulpore, and W. Bhagulpore, length, N.E. to S.W. 117 m., breadth, 108 m., area, 8878 sq. m. It is covered for the most part with an alluvium so deep that the calcareous rock lying beneath it appears above the surface only at a single spot, and so low and level that nearly a half of the whole surface is nearly levelled. Owing to this flooding field work, particularly along the banks of rivers, differs much from year to year according to the kinds of deposit left upon it, what was fertile

in one season becoming converted in the next into an almost barren land, and vice versa. The drainage is carried to the Ganges directly or by its affluents of which the principal are the Cossy with its tributary Gogora, and the Mahanada. Among wild animals, some are so numerous and voracious as makes, by whose bites it has been calculated that upwards of 100 persons and a great number of cattle annually perish. The most valuable domestic animals are buffaloes, cows, goats, and sheep. The staple crop is rice next to it are maize, millet, wheat, pulses, and oil-seeds. Tobacco and indigo grow, the latter are the most important commercial crops. The manufactures, greatly derived from what they once were, consist chiefly of coarse woollen cotton and silk goods, and some articles in metal. The only external commerce is with Nepal. Pop. 1,600,000.

PURNIAH cap. of the above dist. 280 m. N. by W Calcutta, consists of the town proper and a series of strong girding suburbs. The town incloses a space of about 8 m. sq. much of it however occupied by plantations gardens and open places. The best part, situated on the bank of the Little Cossy consists of three parallel streets one of them about 1/2 m. long wide, tolerably straight, and lined with houses which are generally well built and tiled. Among the inhabitants estimated at nearly 50,000, are a number of wealthy capitalists engaged in banking.

PURROOAH, or **PANNA** a tn India, presid. Bengal, dist. Midnah, 180 m. N. by W Calcutta. It is an ancient place, now nearly covered with ruins, the extent and character of which attest its former grandeur. The principal street, which may still be traced in a direction from N. to S. for 8 m., contains numerous buildings most of them constructed of materials drawn from the still more ancient and extensive city of Gaur situated about 13 m. farther S. and long the capital of Bengal. Among the more perfect structures still existing are the Admah mosque, an immense pile surrounded by colonnades, and surmounted by numerous domes and the Golden Mosque.

PURTAPOUR two petty territories and tna. India—1 A. **TRANMOR**, Rajpootana between lat. 23° 14' and 24° 14' N; lon. 74° 21' and 75° E bounded N. and S. by Mewar or Odeypore E. Mundhore, Jowra, and Kutch and S. and W. Banwarra area, 1457 sq. m., revenue, £17,500, pop. 145,700.—The town capital of the above, 95 m. N. W. Ootman, is a place of considerable size, but contains nothing particularly deserving of notice.—2 A. **TRANMOR** Ootman, lying between lat. 25° 40' and 26° 15' N; lon. 81° 40' and 82° 5' E and bounded N.E. by Sulazpore, E. Joonpore S. Allahabad and W. Allahabad and Balon, length, N.E. to S.W. 45 m. breadth 20 m.—The town cap. of the above dist. 52 m. N. Allahabad, occupies a rather elevated site in a sandy district, and is surrounded by a mud wall, and defended by a fort, both in a dilapidated state. The inhabitants almost all cultivators, are estimated at 10,000.

PUSILAWA, a dist. Ceylon, Central province, about 10 m. S. Kandy. It is by far the largest and most productive coffee district of the island having 8900 acres under cultivation, and yielding on an average of two years (1855, 1856, 40,000 tons of coffee. The number of coolies required as labourers in crop time is 10,000. The district consists chiefly of a valley overhanging on its S.E. side by a chain of wooded hills. Of these, Moona-galla, or the 'Peacock Rock', rises to the height of 4000 feet above the sea, commands a prospect of almost unrivalled beauty and magnificence, embracing far and wide, mountains, forests, rivers, cataracts, and plains. The plantations extend up its sides to its very summit. The tea-plant has been tried, and found to thrive amazingly but the want of skilled labour has hitherto been an insuperable obstacle to any regular attempts to cultivate it.

PUTKA a tn. Austrian empire, duchy Bukovina, dist. and S.B.W. Csernowitz. It contains a Russian monastery, founded by the Moldavian prince Stephen the Great in 1466, and possessing several interesting tombs of the Dragonar house. In the vicinity there is a cavern, apparently artificial, and once occupied by a hermit, who was much consulted during the war which was carried on by the Moldavians against the Turks.

PUTTIALAH, a native state, India, British, forming one of the Cis-Satlej protected states, has an area of 4448 sq. m.

It is the largest and most fertile territory in Hindustan, and exports large quantities of grain across the Ganges to Unnao and Lahore. The present ruler distinguished himself greatly during the mutiny by his fidelity under trying circumstances, and important services both in furnishing troops and keeping open the communication between the Punjab and the besieging force at Delhi. Pop. 682,782.

PUTTIALAH, one of above territory 125 m. N. N. W. Delhi, is a neat, clean, and compact place, built chiefly of brick, densely peopled, and containing the rajah's residence, and a small fort of no great strength.

PUTTUN, or **AMBAWAR PATTAN** is a town, Gujarat, on the Baravat, 65 m. N. W. Ahmedabad. It stands close to the ruins of the ancient city of Anshivara, whose walls in the form of an irregular trapezium about 5 m. in circuit, can still be traced, and is surrounded by a wall the lower part of which composed of materials drawn from the ruins, contains

many fragments of palaces, temples, and fountains, while the upper part is merely a stony rampart of brick. The inhabitants, about 80,000, have manufactures of silk and cotton goods, fine pottery and sword cutlery.

PYHRA, a town, Austrian empire, Lower Austria, 80 m. W. S. W. Vienna, with a gypsum and several saw mills, and a considerable trade in wood. Pop. 3240.

PYRGOS, or **LORENA**, a town, Greece, Moravia, near the Gulf of Arcadia. Before it was ruined by the Turks in 1825 it was the finest town in the Moravia, and contained 10,000 inhabitants. At present their number does not exceed 1000, and their chief employments are fishing, cultivating the vine, and carrying on an active trade with the Ionian Islands.

PYRGOS, a town, Greece, near the Cyclades, on the island of Tinos, with a civil court, two parish schools, a harbour, and a pop. of 3500.

Q

QI AICHOW or **Kong-tsoo-yoo**, a town, China, not far from the E. frontiers of Yekhen 1 bank Yang-tse-kiang, about 1200 m. W. N. W. Shanghai and 85 m. from Ichang. It seems to have no trade, and only a few boats are at anchor in its vicinity. The river is here overwhelmed by rapids, and runs with a very strong current, the navigation is however effected by native boats, 120 feet long by 15 broad, and drawing not more than 3 feet water.

QALALICH is a town, Austrian empire, Bohemia circle and 28 m. N. E. Olmütz, with blackish, stone-quarries, coal-mines, and 1100 inhabitants.

QUANGA is a town, W. Africa, situated in a mountainous region, forming part of the Kong Mountains, 287 m. N. E. M. M. M. M. M. It is surrounded by walls a mile and a half in circuit, and has five gates, with roads leading from them to the principal towns of the surrounding districts. Besides fine cattle, sheep, and goats in abundance, horses, which are used not to live in Liberia, appear to thrive well, and form an article of trade. Sierra Leone English is understood by some of the inhabitants, who are in general extremely industrious, and produce rising crops of rice and corn, weave cotton cloth, and work in iron and other metals.

QUAPPELLE LAKES, British America, situated in the valley and really extension of the river of same name, are eight in number and form a chain of long narrow troughs stretching from W. to E. with depths varying from a few feet to eleven fathoms. The most westerly situated at what is called the Height of Land from occupying the highest level may be considered to belong equally to the Quappelle and the Saskatchewan, since the valleys of the two rivers here unite and the water flowing from its two extremities take opposite directions that from the W. extremity flowing W. to the S. branch of the Saskatchewan and that from the E. extremity flowing E. and forming the true source of the Quappelle River. Extending E. along the deep narrow trough which the river has excavated to the depth of 150 ft. below the general level of the surrounding prairie, we arrive in succession at Sandhill Lake, containing brackish water Buffalo Pond-hill Lake, 16 m. long, and so called from the number of buffaloes taken in its vicinity Long or Last Mountain Lake, formed by an expansion of an affluent of the Quappelle, and lying from N. to S. nearly at right angles to the ordinary direction; and a nearly continuous series of four lakes, to which, from the number of fish caught in them, the name of Fishing Lakes has been given. They have an aggregate length of 23 m., and an average mean depth of 40 ft. Between the two most westerly which are headwaters and the two most easterly a space of about 5 m. in length intervenes, and is traversed by a rapid stream. On this stream stands the Quappelle mission, which belongs to the Church of England, and was established only in 1856, though

a settler had been labouring in the locality several years before. It is finely situated, having on the S. a vast level prairie, fertile but treeless, on the N. a country studded with groves of aspen and on the W. and E. the four lakes fringed with belts of timber among which are seen ancient elms, with long drooping branches bending over their waters, and ash leaved maples loaded with the most luscious fruit.

QUAPPELLE or **CALLING RIVER**, British America, the most important affluent of the Assiniboine, issues from a series of lakes of some name, in a country occupied by the Plain Cree Indians, about lat. 50° 45' N. lon. 106° W. flows generally E. and after a course of about 270 m., joins the Assiniboine on its R. bank at Fort Ellice. At the Quappelle Mission on lon 104°, 119 m. from the Assiniboine, the river is 40 ft. wide and 6 ft. deep in the channel and has a current of 1 m. an hour. Here, too, its valley is 12 m. broad, and 2-0 ft. below the level of the prairie which stretches N. and S. from its abrupt edges as far as the eye can reach. At its mouth the stream is 88 ft. broad and 12 ft. deep, and has a current of 14 m. an hour. Its valley which joins that of the S. branch of the Saskatchewan, has a total length of 269 m.

QUEEN CHARLOTTÉ, a sound, New Zealand, in the N. of Middle Island or Munster in Cook Strait. It is formed on the S. by Cape Kooruoro which has a cone-shaped hummock at its extremity and on the N. by Cape Jackson, a long elbow-shaped point and runs first N. E. W. for 14 m., and then S. W. by W. for 11 m. to its head. Its only drawback as an anchorage is its inconvenient depth, varying from 20 to 25 fathoms. It is indented on either side by numerous bays, which like itself are secure, and singularly free from dangers. The land is high and in general thickly wooded to the waters edge rising on the N. side 1500 ft. to 2000 ft., and on the E. side, in Mounts Robertson and Teahua, to 3000 ft.

QUEENSLAND, a British colony erected in 1859, and comprehending the whole of the N. E. portion of Australia, lies between lat. 11° and 39° S. lon. 141° and 153° 40' E., and is bounded S. by New South Wales, W. by South Australia, and the large unsettled district called Stuart's Land, extending N. from this colony to the Gulf of Carpentaria, N. W. by this gulf N. by Torres Strait N. E. by the Coral Sea and E. by the S. Pacific. In addition to the mainland, all the adjacent islands are included in the colony, which has an area of 575,600 sq. m., nearly four times that of France, and twice that of Canada at the present time. Exceedingly the country consists of unimproved stock and sheep farms, which are rapidly extending in number, the actual settlement has extended over an area at least three times as large as the United Kingdom. Brisbane is the capital. The capabilities of Queensland have been rapidly developed by its erection

into an independent colony. Towards the W. indeed, a large portion of the surface is included in the region which is known by the name of the *stony desert*, and which, though proved by recent explorations to be by no means so hopelessly barren as was at one time supposed, presents comparatively few attractions to the settler. Toward the E. however, and for a long stretch along the coast, the forbidding character so truly characteristic, and homelike, of the climate admirably adapted for sheep-walks, and lofty ranges of hills generally well wooded and intersected by fertile valleys, form the general characteristics of the country. Along the coast, and among the numberless islands which skirt it, are tracts on which cotton of excellent quality and in almost unlimited quantity may be grown. The coast line presents features of greater interest than any other portion of the Australian continent. The interior is chiefly composed of a succession of alternate flats and ridges, well covered with grass and finely timbered, or spreading into extensive plains of luxuriant herbage.

About 60 or 70 m from the shore mountain ranges run parallel to the coast-line, with spurs extending in the direction of the sea. They add an agreeable variety to the aspect of the country, and originate a series of rivers and streams, some of which are broad and navigable for a considerable distance inland. Along their banks the best alluvial soil is found. It is excellently grazed, and often heavily covered with timber. Most of the rivers have a bar at the entrance, but there is little doubt that, though obstructions can be easily removed by dredging. The coast is indented with many bays, some having extensive natural harbours, which already have been brought into practical use as the outlets for the produce of the adjacent districts and in time will become the seats of a vast coasting and foreign commerce. Moreton Bay at the head of which Brisbane the capital of the colony is situated is about 60 m long and 20 wide the soil on its banks is rich, and admirably adapted for agriculture. The bay is dotted with islands, whilst five navigable rivers empty themselves into it—the Brisbane, the Arrowpoint, the Lygon, the Pine, and the Caboolture. The bar at the mouth of the Brisbane is rapidly being removed by dredging and when this obstruction is done away the river will afford a capacious harbour, with many miles of natural wharfage for vessels of any ordinary tonnage. The other chief estuaries are Keppel Bay, Hervey's Bay, Port Curtis, Port Bowen, Port Denison, Mackayham Bay and others. These ports afford easy access to the interior and thus diminish the cost of carriage and shipment. Beyond the range of mountains, the watershed of the eastern coast-land, the country and climate assume a different character, and the higher elevation renders the temperature much cooler than in the low lands in the same latitude. These table-lands spread over an immense extent of country commencing about the 26th parallel and extending for several hundreds of miles in a succession of magnificent downs covered with nutritious herbage and well supplied with water. First come the Darling Downs, then succeed the Calvert Plains, Fitzroy Downs, Mantuan Downs, and the rich pastoral country of the Dawson, the Peak Downs and the fine grassy plains of the Blackall, extending away northward and onward under the Plains of Triana, which stretch along the shores of the Gulf of Carpentaria. Besides its internal resources the geographical position of the colony furnishes it with great facilities for entering the leading ocean thoroughfares, and carrying on an extensive foreign trade. The climate is generally healthy, though the thermometer has a great range, and it appears to be exempt from the hot winds of other parts of Australia. Sheep as well as cattle are found to thrive well up to lat 18° S and besides the rich grass, they feed upon the salt-bush, native heath, carrots and cabbages. The number of cattle in the colony in 1884 was 859,078 and of sheep 9,885,334. Cotton is cultivated, and to the list of staple products sugar and tobacco have been added. Wool is the chief article of export, the value of that sent to the United Kingdom in 1883 was £295,775 and in 1884 £374,548. Agriculture is not largely followed, owing to the high cost of labour and the difficulty of conveying the produce to market, hence it is found better to import agricultural products than to grow them. In 1884 13,008 acres were under cultivation. Live-stock and its produce are the most profitable interests of the colony. But as facilities for commerce are extended the resources of the colony will also

be developed. A line of ports has been opened along the E. coast from Keppel Bay to Cape York, a distance of 1060 m. Port Burketon on the Albert River is some miles after the unfortunate traveller had 300 inhabitants in 1864. Bowen, cap. of Port Denison had a pop of 1000. Rockhampton on the Fitzroy River had between 6000 and 6000 and Somerset, near Cape York, in lat. 11° S recently founded, promises to be completely successful. The following table of the imports and exports from 1860 to 1886 shows that the six years the total commerce of the colony had been increased nearly threefold—

	Imports.	Exports.
1860	2749,083	2238,278
1861	987,960	700,000
1862	1,388,600	746,219
1863	1,123,203	889,261
1864	2,109,704	1,287,034
1865	3,668,559	1,316,484

Of the exports in 1884 wool constituted £1,087,063 of the amount, gold dust, £38,293, tallow, £23,000, hides and skins, £24,999, cotton, £24,186. To promote the growth of cotton for which many districts of the colony are specially adapted a bonus of 10 acres of land has been offered by the government for every half of Sea Island cotton weighing 800 lbs. In 1863, 2691 acres were planted with cotton. There are several coal mines in the colony some of which are worked. Gold, also, is believed to exist in large quantities. The public income and expenditure of Queensland during the first six years of its existence are thus stated:—

	Revenue.	Expenditure.
1870	£176,620	£210,108
1871	239,240	259,408
1872	340,461	367,111
1873	300,520	404,404
1874	509,458	432,864
1875	631,423	61,006

The greater part of the revenue is derived from customs duties (£192,540 in 1865, land sales, £110,996 in 1864), and rents of public lands. The chief expenditure is upon works of general utility and for assisting emigration. The number of emigrants from the United Kingdom in 1865 was 12,551 of whom 1469 were conveyed at the expense of the colony. The population which numbered 24,870 in 1860 had risen to 61,467 in 1864, the proportion of males to females being as three to two. At the end of December 1866 the population had increased to 87,775. The aborigines number from 10,000 to 15,000 they are by no means deficient in intelligence but unable to settle down to a permanent residence or any regular occupation, in the neighbourhood of the trees or large stations they make small earnings by cutting wool drawing water &c. Many of the men are endowed with great physical strength and their stature increases as the equator is approached.

QUEENSLAND two lakes British Columbia, 80 m. E. the Fraser in lat 57° 30' N. lon 121° 30' W. One of the lakes runs E. and the other E. for some distance and then N. E. till it nearly meets the head-waters of Cassie River. The first is estimated at 70 m. in length the other at 100 m. Gold is found and largely worked there.

QUILLOTA (add.), a tn. Chilli prov. and 80 m. N. E. Valparaiso cap. dep. of same name, near the E. bank of the Acouagna, which here sometimes receives the name of Quillota. It lies on a wide flat, with huge bare mountains on either side and the famous Campana or Bell Mountain in the background. It sustained a shock of an earthquake in 1822 but suffered less damage than some of the neighbouring towns. Quillota when it first becomes visible from some of the heights around it presents a very beautiful appearance. In the foreground, are seen fine evergreen forest-trees in the mountain ravines; then green open lawns, separated by small valleys, each with its rivulet; and lastly little square gardens, crowded with fruit-trees and every variety of vegetables. In the midst of all this verdure rise the white walls and steeples of the town itself. There is little to be had and the gold-mines of the valley long celebrated for productiveness, are no longer worked. It contains nearly 10,000 inhabitants, who are chiefly employed in cultivating the luxuriant fields in the vicinity.

QUILLOTA or ACORAGUA, a river Chilli, which, de-

driving the waters from the melting snows of some of the highest peaks of the Andes, descends in two streams, each of them watering and fertilizing the beautiful valley of its source. After their junction in Shree W., and falls into the Pacific, in lat. 23° 25' S. lon. 71° 30' W., about 10 m. N. of Valparaiso. Though it has a course, tortuously windings, of about 140 m., and is fed by so lofty sources, it never acquires much volume, scarcely exceeding 50 yards in width and 7½ ft. in depth. It is of course, no veritable impetuous, but as fertilizes the valleys through which it passes, that they are at once the most productive and the best cultivated in Chili.

QUILON, KOLM, or COMLAR [add.], a tn. India, prov. Madras, dist. Travancore, is a night on the Malabar coast, 146 m. N. W. Cape Comorin. It is said to have been founded above one thousand years ago, and is a populous place, with an extensive range of houses, and several Persian shops, well supplied with articles from Bombay. The customhouse, situated E. of the town, contains barracks and other buildings sufficient for three or four battalions of native and one of European troops, a Protestant church, and several officers' bungalows. On the E. of the customhouse, the British reside every a large and conspicuous building, occupies a commanding site. Near it is an antique pagoda. The dewan's outcherry and the appeal court were kept here till 1829, when they were removed to Trivandrum; about the same time the number of troops was reduced to one native regiment. The place has then lost some of its main sources of prosperity. The chief vegetable productions and articles of trade are timber, coconuts, one pepper, cardamoms, ginger, betel-nuts, and coffee. Estimated pop. 20,000.

QUINCHAO, m. lat. R. America, Chili in the channel between Chile on the W. and the mainland on the E. It is the largest of the group, lying in the bay to the S. of Town Point on the Chilean shore, and is nearly 18 m. long between E. & E. and W. & W.

QUINTO a tn. Italy, Venetia, prov. and about 4 m. N. W. Verona, at the entrance of Val Fontana, with a church, containing fine paintings by Veronese.

QUINHUA, a tn. Chili, prov. Maipo, cap. dep. Maipo, near the Cerro Colapen, the cooling system from which makes its site little better than a swamp, 180 m. S. Valparaiso. Though containing only 1500 inhabitants, its houses are arranged in four longitudinal and six transverse streets. Its public buildings are a church and a market-house, in the latter of which one of its two schools is kept.

QUISAMAS. See KINAMAS in Supp.

QUITO [add.] a tn. N. America, the capital of Ecuador, on the E. slope of Mount Pichincha, at the height of nearly 10,000 ft. above sea-level, and 100 m. E. from the shores of the Pacific lat. 0° 13' 18' S.; lon. 78° 25' W. (Owing to the inequalities of the ground on which it stands, there is

some want of regularity in the formation of its streets, though most of them are laid out in straight lines, and intersect each other at right angles, or open into squares. Most of the houses are of two stories and are built either of brick or of adobe. They are all roofed with tile, and not a few have ornamental fronts and iron balconies. The principal buildings are situated in the Plaza Mayor, near the centre of the city, and consist of the government-house, a modern structure, the archbishop's palace, also modern, the cathedral, and the municipality. The buildings which formerly belonged to the Jesuits are considered the finest in the place. The church, which has a stone front, is adorned with statues, columns, and sculptures of considerable merit. The college accommodates various public establishments, part being used as a university, with a seminary, a museum, and a library of 18,000 vols. part as a school and part as a guard-house, with an armory. The monastery of St. Francis has a richly decorated facade, but is chiefly remarkable for the large space which it covers. The monastery of San Basilio is used partly as a public prison and partly as a police-office. The only other buildings deserving of notice are the monasteries of St. Dominic, St. Augustine, and Mercy all of them adorned with handsome stone facades and surmounted by lofty towers among which that of the last named monastery is most conspicuous, and contains the public bells. The charitable establishments include two hospitals, one for male and another for female patients and an hospicio, or poor's house, occupying the old Rococeto or Encanto of the Jesuits and partly used as a lunatic asylum. To the N. and S. of the town are two beautiful places, laid out in ornamental grounds and gardens; and from the surrounding hills magnificent panoramic views are obtained embracing the snowy cones of the volcanic mountains of Cayambe, Antisana, Cotacachi, Sachabaga, Corazon Inusa, Pichincha, and Cotacachi. The valley of Quito, situated at a short distance to the S. is a delicious spot covered with elegant villas and country seats in the same locality are several extensive cotton factories; the only other manufactures of any consequence are woollen goods, bricks and tiles, and straw hats. Pop. 80,000.—[Villavieja, *Geografía de la República del Ecuador*]

QUITTA a tn. W. Africa, Sierra Leone, lat. 5° 55' S. W., lon. 59° 55' E. It consists partly of a dilapidated fort which belonged to the Dutch, till they sold it with their settlements in W. Africa to Great Britain, but chiefly of a large native town occupying a narrow strip of sand on the W. side of the fort, and containing a number of square inclosures and narrow streets lined with huts, which are built principally of clay, and neatly thatched with long grass. Both the town and fort are embosomed in a large grove of lofty coconut-trees. To the E. of Quito there is a large lagoon, about 30 m. long. Its S. bank is more mud, almost sterile, but its N. bank is sandy and very productive.

R.

RAAR, a tn. Austrian empire, Upper Austria, circle of the Inn, cap. dist. of same name, 39 m. W. by N. Linz. It has a castle, a large brewery and numerous inns. There is a thermal spring in the vicinity. Pop. 1400.

RAAT or RATT, a tn. India, dist. Timorpoor 40 m. S. by W. Calcutta, on a site rendered almost insalubrious by malarial from the tanks, swamps, and rank vegetation which surrounded it. It is an industrious place, with a well-supplied bazar and a pop. of 9616.

RAHENBURG, a tn. Austrian empire, Lower Austria, circle Lower Marchburg, on the Thaya, with 1670 inhabitants, who are of Slavonic origin, have a walk and several saw mills, and carry on a considerable trade in wine and cattle.

RABENSTEIN, a tn. Austrian empire, Lower Austria, circle Upper Wiesenthal, on an affluent of the Danube, 99 m.

N. W. Vienna. It has an old castle in ruins, manufactures of grain saw-mills, sandstone quarries, and 1260 inhabitants.

RACINE [add.] a city, 11 States, Wisconsin, cap. co. Racine is situated on the W. shore of Lake Michigan, at the mouth of the Root River 25 m. S. by E. from Milwaukee, and 70 m. N. from Chicago. It is the second city in the state in point of commerce and population and has one of the best harbours on the lake, formed by the mouth of the river, and admitting vessels of considerable tonnage. Racine is built on a plateau about 40 ft. above the level of the lake. Laid out in regular blocks of wide and handsome streets, containing many large public buildings, it presents to the stranger an agreeable and imposing aspect. Several newspapers are published here. There are twelve Protestant and two R. Catholic churches, a college, a bank, and central high-school. The trade of Racine is extensive and annually increasing.

There are three ship-yards, several furnaces, machine factories, and flour-mills and railroad-cars are extensively made. It was first settled in 1885 and incorporated in 1848. Pop (1880), 782.

DACLAWICE, a tn Austrian empire Galicia, circle and about 19 m S W Jaulo, with 1800 inhabitants, partly Germans, and mostly weavers.

RADOMISL, a tn Russia, gov and 52 m W Kiev sep. circle of same name, at the confluence of the Myka and Tezev. It has two churches a girls school, and a charitable institute and contains 4,050 inhabitants.

RADSEGE, a tn Austrian empire, Hungary co. Presburg, on the Little Danube, with 1900 Magyar inhabitants. who trade in wood and in cane.

RADYMOG, a tn Austrian empire Galicia, circle and 11 m N Przemysl sep dist of same name with manufactures of cordage and packclothing, a considerable trade in fruit, and 1800 inhabitants.

RADZIECHOW, a tn Austrian empire Galicia circle Zlencow sep. dist. of same name, 42 m N E Lemberg, with a baronial estate, and 1970 inhabitants.

RAGGA, a tn India, presid. Bengal dist and 82 m N Dinapore. It consists of about 1000 houses, ranged narrow, irregular, and filthy streets and engrosses the traffic of a large extent of rich country. Many wealthy merchants have stores here, and it has been calculated that during eight months in the year 5000 loaded oxen on an average arrive daily.

RAGOONA, a tn Italy, Venetia, prov and 19 m N W Udine, near the Tagliamento. It has a seam of coal among the hills that border the river and contains 2769 inhabitants.

RAGUSA VEC HIA or **OLD RAGUSA**, a tn Austrian empire, Dalmatia, circle and 8 m SE Ragusa. It is the ancient Greek Epidaurum and has a Franciscan monastery and a harbor with some trade. In the vicinity there is a remarkable stalactite cavern, in which according to tradition Cedemus the ruler of Thebes found an asylum when he fled from the Argives. Pop 1000.

RAGUEVATZ, a tn Turkey in Europe, Serbia, sep circle of same name in a spacious valley near the Serbian Morava 63 m S S E Belgrade. It is the seat of a court of justice, and has a church, a gymnasium, and an elementary school. In the vicinity there is an old castle, where several of the Serbian princes used to reside. 1 pop 3430.

RAHOVA, a tn Turkey in Europe Bulgaria, eyalet and 64 m E E L. Widin, at the opening of a valley on the Danube. It has eight mosques and a pop of 3000.

RAIDROOG or **RYADROOG**, a tn India, presid Madras, dist and 81 m S Bellary. It consists of an old citadel seated on a lofty granite hill of a lower fort, and of a town inclined between them and straggled in regular streets. According to the old inhabitants, it formerly contained 8000 houses, but the number at present does not exceed 700 and the revenues, said to have amounted to upwards of £50,000 now falls short of £19,000. On the ascent to the citadel, about half way up appear the remains of the palace of the Raidroog rulers. In the same locality are two Hindu temples. The rock on which the citadel stands has an apparent height of 1000 ft, and forms the E. extremity of a wild and rocky range, the rocky crevices of which are infested by leopards, wolves, and hyenas.

RAIGERN, a tn Austrian empire, Moravia circle and 7 m S. Brinn on the Schwarna, and on the railway from Brinn to Vienna. It has a Benedictine abbey which dating from 1048 is the oldest in Moravia, a remarkable church, a library with 20,000 volumes, manufactures of beet-root sugar and three yearly markets. Pop 1000.

RAINE [said], an island, Australia, Queensland, in the centre of the opening between the E. extreme of the Great Detached Reef and the projecting point of the Great Barrier Reef. It is of coral formation, and very insignificant dimensions, being scarcely three quarters of a mile in circuit. Its position, however, makes it of great importance. On each side of it is a clear channel—S which is 3½ m. and N which is nearly 3 m. broad. These channels form the most eligible entrance to Torres Strait from the outer route and Raine Island has been selected as the proper site for a sea-mark to guide the navigation. With this view a substantial

Surrey, Eng. &c.—Vol. II

beacon of stone was erected in 1844 on the E. E. point. It is in the form of a circular tower 30 ft. in diameter at the base, and surmounted by a wooden dome with a ball at the top. It is painted with alternate red and black vertical stripes and being 64 ft. in height, or 74 ft. above low-water mark is visible in clear weather from the deck of a vessel at the distance of 8 or 9 m. and from the marshes of 10 or 12 m. An ample supply of provisions for the relief of shipwrecked and other distressed persons is from time to time lodged in the chambers of the beacon and an iron tank, capable of containing five tons has been placed at its base to collect the rain-water from the roof. Turtles deposit their eggs, and sand-birds in incredible numbers frequent the island.

RAINOKH WITTA, a tn Austrian empire H.avia elect. Neutitschein about 35 m S E Olmitz with manufactures of cloth and cotton-ware, a paper mill and 1100 inhabitants, partly Protestants partly R. Catholics.

RAINY LAKE or **LAO TA LUKE** British America 83 m S E of the Lake of the Woods, and 2½ m W of Lake Superior is 50 m long 3½ m broad and 24 m in circuit measured by canoe route. It is formed by three nearly equal troughs, with deep lateral indentations—the main trough is a broad and rapid stream, with the other two in a direction The canoe route is through the main trough, from the mouth of the Nemadjiun River, a feeder of the lake, in lat 48° 40' N, lon 92° 40' W to its outlet by the Rainy River at the N W extremity. Rainy Lake is about 500 ft. above Lake Superior and 1100 ft. above the sea. Its shores generally low often consist of naked shapless masses of rock with marshy intervals or rise gradually in ridges which at a short distance become hills 800 to 400 ft. high. The islands about 500 in number are tolerably wooded but the timber on the marshes is small and scarcely the ridges and hill-tops are absolutely sterile, and the general aspect is on the whole forlorn. The lake freezes about the 1st December, and is open about the 1st May.

RAINY RIVER, forming part of the boundary between the U States and British America, issues from the S W extremity of Rainy Lake, and flows easterly down W to its mouth in the Lake of the Woods. The direct length of its course is 60 m, the indirect 80 m. At its point of issue it is a broad and rapid stream, with low alluvial banks clothed with a rich second growth the original forest having long since been stripped of its finest trees by the occupants of the old North west and the present Hudson's Bay Company's first franchise, which stands 2 m from the head of the river just below the Chaudiere Falls. These magnificent cascades have a descent of 22 88 ft. and immediately beneath them is a famous fishing-ground, where the Indians obtain an abundant supply of their staple food. The river is its course receives numerous affluents, both on the l and on the r bank. Some of the sources are large all the latter are mere outlets to the swamps occupying the region north of Rainy Lake valley. The main obstacles to extended cultivation along the Rainy are the Lac la Pluie Indians who are not only numerous, but very independent and jealous of intruders.

RAINFLE or **YANWUJUNAN** a fort India, presid Bom bay B. Cochin on the coast of Kathiawar at the mouth of a small river navigable for boats of considerable size. It was built by Shivaji in 1682, and passing to the rulers of Sawant warwar, became a stronghold for pirates. The British, provoked by their depredations, captured it in 1785. It was restored next year but finally became a British possession in 1819.

RAISEEN a fort, India Malwa, territory and 2½ m. E Bhopal, on an elevated tract at the E. extremity and near the summit of a sandstone hill. It is a conspicuous object for many miles around, and being a place of much strength, was often an object of contention, both during the ascendancy and during the dismemberment of the Mogul empire. In this latter period it was seized by the Mahabata, but shortly after wrested from them by the Nakh of Bhopal, to whom it still belongs.

RAJAH a river which rising in a mountainous district of Borneo flows E. to the W coast, and falls into the sea by six mouths. It has been described as the finest and perhaps the largest river of the island. Its principal mouth is of very recent origin by large vessels, as at low water its bar has a depth of 3 fathoms, which is increased 10 feet by the rise of

the 10th. Within the bar the depth is from 8 to 10 fathoms, and affords an easy navigation for nearly 100 m. as far as the tide reaches. Coal and iron ore are found in its upper course, but these are at present inaccessible in consequence of a series of rapids.

HAJEPOORAH a tn. India, British, 189 m. N N W Delhi. It stands in a level and fertile country, and owes its existence to a palace built here by one of the Mughal emperors. The town, situated opposite to it, is surrounded by a high brick wall, with only one entrance, and possesses a large caravanserai, with numerous towers and bastions, and a massive round tower, used as a prison for convicts employed on the works. The bazar is well supplied.

RAJGHEER, or **RAJAGHRIA**, a tn. India, presid. Bengal dist. Behar, 40 m. E. Patna. It is situated among the Rajagria Hills, near their N W extremity and on the huge and mossy rampart of an old fortress, which is in the form of an irregular pentagon and includes a considerable space within which are numerous large mounds, understood to be the ruins of the ancient palaces of the sovereigns of Magadha or Bihar in the vicinity is a broad mound, about 4 m. long which dams up the inundation of the prehistoric rains, and forms an artificial lake. The number of modern houses in the town is about 800.

RAJGURH numerous places, India, particularly—1 A fort, Birmour at the height of 7115 ft. above the sea, in lat. 30° 52' N., lon. 77° 22' E. It stands on a natural terrace jutting out from the side of a mountain, and is of a square form, with a tower at each angle. The whole structure is of slate rock, neatly cut and bound together by large beams. It was nearly demolished by the Ghoskhar in 1814, and is in a very ruinous condition.—2 A tn. Rajpootana, state Uwar 76 m. S.W. Meera, on an eminence which rises abruptly from the bottom of a valley and is crowned by a large fort.—3, A vil. dist. and 10 m. E. Ajmer beautifully situated on a small lake in the immediate vicinity of a ruined fort which is surrounded by a massive rampart of rough stone, and includes a large area.

KAJFEELA a petty state, Rajpootana, Rewa Kanha, division of Gwalior, between lat. 23° 28' and 31° 55' N., lon. 73° E. and 74° E. and bounded N. by the Nerbada, E. by the ranges of W. Wazir and Bural, and W. by the range of the Kumbhar, an extensive agricultural race, are in general well cultivated, but most parts of the highlands are in the possession of a wild race composed partly of Rajpoots and Sheeds. Nandode, the capital stands on the Kurgun. Within this territory are the celebrated corbelian mines producing the fine pebbles which are sent to Cambray, and there out into the various ornaments for which this town is famous. The revenues from this source, once considerable, does not now exceed £100 a year. Pop. 122,100.

RAJULDEHIR, a tn. India, Rajpootana, state and 76 m. E. Bikaner stands in a sandy district, is defended by four towers, and supplied with water from six wells 100 ft. deep, and contains a pop. of about 1000.

RAKOS (*Upper and Lower*) two nearly contiguous places, Austrian empire, Transylvania, circle and about 20 m. E. Udvartchey. Upper Rakos has 880 inhabitants, and a mineral spring; Lower Rakos 910 inhabitants, and an iron mine.

RAKOVICA a tn. Austrian empire, Military Frontier, Croatia, dist. Ogulin, about 20 m. E. Karistadt with a rival school. Peter Erze defeated the Turks here in 1648. Pop. 1954.

RANGURH or **RAJAGHARIA** a dist. India, presid. Bengal, between lat. 23° 20' and 24° 40' N., lon. 85° 50' and 90° 20' E., is bounded N. by Behar N.E. Mongheer, S.E. Pachet, N. Chota Nagpore S.W. and W. Palamouer, length, E. to W. 175 m., breadth 90; area, 6524 sq. m. Its surface is well diversified by hills and undulating plateaus, one of the most extensive of which, situated near its centre, has an elevation of 1800 ft. above the sea. Many of the rocks are composed of granite, quartz, and gneiss, but in other parts a later formation prevails, and both coal and iron are found. Lead and silver have also been discovered. In the vicinity of the town of Kanchagurh silver is quarried in blocks, which are easily split into transparent laminae, and used as a substitute for glass, and for various ornamental

purposes. The rivers are numerous, and carry the drainage to the Ganges. Much of the surface is occupied by forests, which yield fine timber but are infested by numerous wild animals, particularly tigers, which often commit dreadful ravages, and serpents, among which the box-constrictor and the cobra-de-capelle are prominent. Civilization is said to be at a very low ebb, and many of the inhabitants are in a half-savage state. Pop. 872,516.

RANGURH, several places, India—1, A tn. which, as it gives its name to the above dist., may be presumed to have been once of some importance, though it is now insignificant. It is in lat. 23° 45' N. lon. 85° 30' E.—2 A tn. Rajpootana, territory Uwar, 95 m. S.S.W. Delhi. It consists for the most part of wretched huts, but has a pop. bordering on 10,000.—3, A fort, Hindoor which stands on a steep and lofty ridge overlooking the l. bank of the Sutlej at the height of 4084 ft. above the sea, in lat. 31° 5' N. lon. 76° 51' E. Chetwary, having succeeded in capturing it in the beginning of the Ghoskhar war in 1814 demolished its defences.

RAMNAU (old) a tn. India, presid. Madras, dist. and 60 m. S.E. Madras on the Vigny. It consists of a fort and a town. The former occupies a square area measuring about half a mile each way and is enclosed by a ditch and a loop-holed wall, 27 feet high and 5 feet thick. It is said to have been constructed in the 17th century. Within it are a large reservoir or artificial lake, a spacious palace somewhat Gothic in its style of architecture, a small but handsome Protestant church with a burying-ground adjoining, a E. Catholic chapel, a hospital and a dispensary. The fort which is laid out in narrow irregular streets, lined with houses generally built of mud and covered with thatch, has alone a pop. of 5000.

RAMNOS, or **REAL DE RAMON**, a tn. Mexican state and 75 m. N.W. San Luis Potosi on an elevated plain, 7000 ft. above the sea. It is a well built place, telling by the number of its large and handsome dwellings, and extensive mining establishments of a prosperity which once existed, but has now passed away. Pop. 2300.

RANTRAK a tn. India, territory and 24 m. N.E. Nagpore on an elevated site composed of rocks of granite or gneiss. There is little in the town itself to attract notice, but to the E. of it is a steep hill 500 ft. above the adjoining plain, crowned with a group of Brahminical temples, to which access is given by a broad flight of steps solidly constructed of granite, and provided at intervals with suitable resting-places. The principal temple and accompanying buildings are dedicated to Rama, and at the annual festival which lasts ten days, are visited by about 100,000 devotees from all parts of Nagpore and those parts of the Nizam's Dominions lying N. of the Godavari.

RANAGUA, a tn. Chili, prov. Semilago 90 m. N.F. Valparaiso. It is very prettily situated on an elevated plain rather more than a mile N. of the Colapal and nearly midway between the Andes and the W. Cordillera, contains a number of streets intersecting each other at right angles, contains some large and substantially built houses, all of them however without glazed windows, and has a fine almshouse and a large plaza on which stand two churches, a prison, and a guard-house. Pop. (1855) 5608.

RANCO the largest lake in Chili, situated in the prov. and about 70 m. F. of the town of Valdivia. It is of a very irregular shape with numerous projections and indentations which make it difficult to form even an approximate estimate of its area. Its greatest length is about 22 m. its breadth about 18 m. It receives the waters from the neighbouring Cordillera and discharges its water by the Buena. A little E. of this lake is a mountain ridge, forming part of the water shed between the Pacific and the Atlantic.

RANEENGUNGE, a tn. India, presid. Bengal, dist. Baranagore, on the Baramoode, and a branch railway from Burdwan, 105 m. N.W. Calcutta. It owes all its importance to its coal field, which is now successfully worked to a considerable extent.

RANGITIKI a river, New Zealand, in the S.W. of North Island or Ulster has its mouth in Cook Strait, between the mouths of the Manawatu and the Wanganui. It is accessible at high-water by coasters drawing 8 ft., and is navigable by boats or canoes for 60 m., but at low-water becomes fordable a mile above the entrance. The land around is

among the best in New Zealand, being level and clear of wood, with excellent pasturage for cattle. The natives in the vicinity clean some fax for export.

RANIPETT, a to India, praid and 70 m. W. Madras. It was its existence to the cantonment of Arcot, having grown up within the last half century in consequence of its establishment, and containing a pop composed in great part of pensioned native officers, and sepoy of cavalry and the numerous classes who have congregated to find a living in ministering to their wants. The cantonment stands on elevated ground about half a mile from the E. bank of the Palur and descending towards it with a gentle slope. It is capable of accommodating a regiment of European and two regiments of native cavalry, but for some time there has never been more than a single regiment of native cavalry, and lately even this has been withdrawn leaving the cantonment to be occupied only as the head quarters of a battalion of native veterans.

RAPHEL, a river, CHIL, between provs Colehague and Santiago. It is formed by the junction of the Tingwaza and Oshapual which, fed by melting snows, descend from great elevations, and flows WNW to the Pacific. It is nowhere navigable but being much used for irrigation can tribute greatly to the fertility of the districts through which it passes.

RAPID RIVER, or **LITTLE SAKKATHEWAN** British America, rises in the E. slope of Riding Mountain, near lat. 51° N. lon 100° W. and after descending from its densely wooded flanks flows first S through a narrow excavated valley, filled with balsam poplar and an outgrowth of cherry and dugwood, then E. among groves of soft leaved maple, then S.W. through an open undulating country attractive and fertile, and finally S.E. through a sandy district covered with boulders to its junction with the Assinihoin, about lat. 49° 50' N. lon 99° 40' W. Its whole course, to a current so rapid as to give it a good title to its name, is about 190 m. It abounds in fish.

RAPTEL (BURA) or **OLD RAPTEL**, a river India, which rises in Ouda, about lat. 27° 54' N. lon 82° 10' E. flows S. to the frontier of the kingdom, then E. forming part of the boundary between this district and Ouda, then S.E. and finally joins the Raptan on its E. in lat. 24° 58' N. lon 83° 17' E. after a course of 184 m. It is much used for floating down timber but is not otherwise of navigable importance. There is a tradition among the natives that this stream owes its name of *Burja* or *Old Raptel* to its having once been the main channel of the Raptan, though it has now no communication with it except at the confluence.

RASDOUSKALA a to Russia, gov Don Cosacka. It bank Don 85 m. N.E. Novo-Tolozk with an annual fair. The vine is largely cultivated in the vicinity. Pop. 4556.

RASHKOW, a to Russia, gov Bessarabia. circle and not far from Dela, with two churches, a parish school and a pop of 2022.

RATTENBERG a to Austrian empire, Tyrol circle and 28 m. N.E. Innsbruck. It bank Inn. It was a place of some strength till 1781 when its fortifications were destroyed and possesses a handsome parish church with fine wood carvings, a town-school, a female industrial school, and a Serrito monastery. Pop. 1100.

RAWA a to Austrian empire, Galicia, circle and 13 m. N.W. Zolkiew. cap. dist. of same name situated between hills on the Rata, an affluent of the Bug. It has a Franciscan monastery, and no hospital for the poor. Here in 1690 Peter the Great and Augustus II. concluded an alliance against Charles XII. of Sweden. Pop. 4039.

RAY BUBA a to W. Africa, Adamawa. cap. of the country of the Boma, a family of the Fall 120 m. S.E. Yola. It is situated on the Chad, a southern tributary of the Benue; has a wall with four gates, and is said to derive much importance from the strength of its fortifications.

RAYCZKA, a to Austrian empire, Galicia, circle Wadowice, bank Rola, about 88 m. S.W. Cracow; with ironworks. In the vicinity there is a mountain peak 5000 ft high, leading from the valley of the Rola into that of the Kurnesia. Pop. 1700.

REAL DEL MONTE or **MINERAL DEL MONTE**, a to Mexican Confederation, state and 62 m. N. E. Mexico, in a

deep and narrow valley at the height of 8000 ft. above the sea. It is irregularly built, and has two suburbs and a newly-created town of correction, the inmates of which work in the mines. Extensive agricultural works have been recently erected in the vicinity. It contains 4000 inhabitants, who are chiefly engaged in mining operations.

REALJO [add.], a export Central America, Nicaragua, dep Occidental on a bay of the Pacific, 10 m. W. Leon. The port, the only one which the state possesses is formed by the three islands of Castejon, Cardon, and Anasodora. It is both well sheltered and of good depth, and has recently attracted attention as the W. terminus of a proposed navigable canal to unite the Atlantic and Pacific Oceans. The town, situated some miles above the port is a decayed place, with about 8000 inhabitants, many of whom live in miserable hovels. The most conspicuous edifice, the convent of San Francisco, is in ruins and the only existing building possessed of any architectural merit is the church of San Isidro. The climate is very unhealthy and the inhabitants generally have a yellow sickly hue. Realjo figures much in the list of the Buccaneers.

REBAT KERRIM a to Persia, 28 m. S.W. Tehran. It is a flourishing place, and being on the highway to Hamadan, is a station for caravans for which it has provided good accommodation. Pop. about 1500.

RED BAY, British America, on the E. coast of Labrador, nearly in the centre of the Strait of Belle Isle, is a beautiful little harbour sheltered from every wind. It is formed by Beaulieu Island, which has a hill at each end about 100 ft. above the sea. The hills of the mainland are close to the shore, and to the N. W. of the island are of reddish granite, nearly 800 ft. in height. At the head of the bay the hills are also high, and partially wooded. Within the bay there are properly two harbours, an outer and an inner. The outer harbour which at its entrance is about 200 yards wide is from 6 to 8 fathoms deep over a mud bottom and has inside a space for anchorage about 800 yards long by 400 wide. The inner harbour immediately N. E. of the anchorage, is a capacious basin, nearly 2 m. in diameter with 16 or 17 fathoms water. Any number of vessels might safely winter in it. Red Bay however, has no great disadvantages. Though it is easily entered with a leading wind, nothing larger than a schooner of 150 tons burden can beat in or out.

RED BLUFF a to U. States, California, cap. co. Tehama on the Sacramento River at the head of navigation 240 m. above Sacramento City, and 145 m. by road. It contains a church school and a factory &c. and grain and wool are shipped from the adjacent country which is well adapted for wool growing. Steamboats ascend the river at all seasons. Pop. in 1860, about 1800.

RED DEER RIVER British America, rises in the Rocky Mountains between Mount Morrison on the W. and Palliser Range on the E., near lat. 52° N. lon. 117° W. flows first N. E. to a point where it is joined by the outlet of Buffalo or Bull Lake, and then, making a sudden turn flows S.E. to its confluence with the north branch of the Redatchewan at Cheyenne. In lat. 52° 12' N. lon. 118° W. an extensive coalfield has been discovered. One group of three beds, with partings of carbonaceous clay between has a total thickness of 20 ft. of which 12 ft. are pure coal. At one place the coal is on fire, and, according to the Indians, has been so as long as they can remember. In consequence a heavy sulphurous and lousy smell pervades the air for miles around. The extent of the coalfield in the line of the river is 14 m., sandstone cliffs succeeding it at its upper and white marls and sands, with beds of calcareous grit, at its lower extremity. It is navigable by canoe.

RED RIVER See AMERICA in Europe.

RED RIVER or **YAN NODIR** [add.] N. America, has its source in Ottertail Lake Minnesota U. S., lat. 46° 24' N., and flows W. through an undulating country, till it reaches lat. 46° when it makes a great bend to the N. and meanders through a boundless prairie, which gradually slopes down into a vast level plain only about 2 ft. above the river at its ordinary height in June. In lat. 46° 39' 30" a belt of timber sets in, and continues with some interruption to skirt the banks on one side or the other as far as Pembina. The American frontier. Within the American territory Red River is joined by some important tributaries—on its left

bank by the Shayenne, which sweeps round the N.E. bank of the Grand Coteau de Missouri, and has its mouth in lat. 47° 30' and on the right bank by the Red, which comes from Red Lake and has its point of confluence in lat. 47° 30'. After entering the British territory it still continues its N. course through a vast expanse of level prairie, and arrives at Fort Gerry where it receives its most important affluent, the Assiniboine, coming from the W. Now nearly doubled in volume it flows N.N.E. and enters the S. shore of Lake Winnipeg by a network of branches and mouths, lat. 50° 28' N. lon. 96° 30' W. Within British territory its most important affluents on the right are the Kootenai and German Creeks. Its whole course measured by the windings of the stream, is 665 m., of which only 140 are in British America, and the remainder in Minnesota. About 4 m. above its mouth its banks become fringed with oak elm and maple, which soon give way to aspen and then to open prairie land, the trees of larger growth appearing at intervals on the points and on the islands of the bends. The rapids and whirlpools, which occur in several parts of the stream, do not present any serious obstacles to its navigation by canoes. On its banks, particularly towards the W. are immense fertile tracts, on which settlements have almost been made.

RED WING a m. l. Boston, Minnesota, cap. of Cannon River & m. Mississippi, just below the mouth of Cannon River 6 m. above Lake Pagan and on the Milwaukee and St. Paul railroad, 43 m. by land, and 55 m. by water below St. Paul. It contains an institution called Hamilton University, a good courthouse, seven churches a bank steam saw mills, &c. and ships a large quantity of wheat. Pop. 1860 1251.

REDWOOD a m. U. States, California, cap. of San Mateo near the Bay of San Francisco and on the railway connecting San Jose with San Francisco 36 m. S. of the latter. It possesses many country-seats of wealthy citizens of the capital and contains a church public library several shops and warehouses, and a flour mill. Lumber directed and grain are shipped in small vessels which reach the town by the inlets of the bay. Pop. about 1000.

REFN (Saxo) a m. Austrian empire, Transylvania, circle and 45 m. S.E. Blatna, on the Maros, cap. dist. of same name. It contains a very industrious population of 477 in the seat of a district court and other public offices, and has manufactures of cloth and woollen, and a considerable trade in wool. In the neighbouring village of Abafja are fine gardens and a stud.

REICHENAU a m. Austrian empire Lower Austria, at the entrance of the Danube into the Hainburg, lying between the Hainburg and the Kaspau, and near the Fayerbach station of the S. railway from Vienna. It has important iron works, employed in smelting and manufacturing the iron obtained from mines in the vicinity as oil and numerous saw mills, large quantities of excellent cabbages grow in the district. Pop. 3900.

REICHENAU a m. Austrian empire Upper Austria, circle Trutau, on a river of same name, 8 m. W.S.W. Vienna, has important manufactures of iron steel, and brass ware.

REIFVITZ a m. Austrian empire, duchy Carinthia, in a valley of same name, watered by the Ribnitz, 27 m. S.E. Laybach. It has a castle manufactures of straw and wooden ware, and some trade and contains 1100 inhabitants.

REITENBAL a m. Austrian empire Moravia, circle and 30 m. N. Olmutz, on the Teis, with ironworks, yarn and linen manufactures, and 1100 inhabitants.

REYN a m. Western Africa, Bornu, prov. Kotonou, 100 m. S. Kikou and S. of Lake Chad. It was formerly a large place and the centre of a petty kingdom, though it is in a state of utter decay. Misgovernment on the part of Bornu has produced this, and all that is now left of it is a picturesque site and the beautiful fig-trees shading the ruins of its high and well built houses. The inhabitants are said to have a distinct peculiar to themselves.

REYN a m. India, Rajpootana, state and 150 m. N.E. Bikaner in a district which, watered by the Matsi, is less barren than the adjacent desert. It is surrounded by walls, and contains about 7500 inhabitants.

REYN a m. Chili, prov. Colchagua, cap. dep. Compañeros, 100 m. S.E. Valparaiso. It stands near the S. bank of

one of the Rio Claro, and on so low a level as to be exposed to inundation, contains only of one irregular and irregular street, with several elegant, among a greater number of indifferent houses, and has a handsome church. Pop. about 3000 of whom the females are remarkable for the regularity and beauty of their features.

RENI a m. Turkey in Europe, Moldavia, 1 bank Danube, at the confluence of the Pruth, 10 m. E. Galatz. It is a place of some strength and carries on an active trade, particularly in corn. It is one of the places ceded by Russia in 1858. Pop. 7600.

RENTENDORF a m. Austrian empire, Transylvania, circle and 3 m. N.W. Hermannstadt, 1 bank Sina with 1830 inhabitants, among whom are many descendants of people who emigrated from Upper Austria and Baden in the latter part of last century.

RESHANYA a m. Austrian empire, Hungary co. S. Bihar 45 m. S.E. Grosswarden, near the frontiers of 1 m. sylvanus with copper mines and marble quarries and 1600 inhabitants belonging to the non-united Greek church.

RESTAURACION a m. La Plata, prov. Entre Rios, advantageously situated on a gentle eminence above a bank Uruguay, near the junction to the Brazilian town Uruguay, lat. 29° 45' S. lon. 57° 30' W. It is of recent construction, and has an excellent haven formed by the broad and deep mouth of the Yatae close to it, but it cannot have much trade so long as it remains subject to custom house regulations while its rival Uruguayana has been declared a free port.

RETAMO a m. La Plata, Pampas near the Tunuyan about 36 m. W.S.W. Mendoza. It is a large place with spacious but unpaved dirty streets and houses generally of one story only yet large and commodious, with gardens attached and so homed in by trees as somewhat to interfere a free circulation of air. The only buildings of consequence are the church and a large new prison-house. The ocularians seen from Retamo present a magnificent spectacle.

RFTLEG a m. Austrian empire Transylvania, circle and 9 m. E.N.E. Doss on the Neane with a Protestant and a Greek united church and 1660 inhabitants.

REVELGUNJ a m. India, presid. Bengal dist. Seram 1 bank Ganges 5 m. below the confluence of the Gogra, and 24 m. W.N.W. Dinapore. It is famous for its annual fair which is much frequented both by dealers and devotees, the latter bathing at the confluence.

REYFALU a m. Austrian empire Hungary co. Raab, at the confluence of the Rabinia, which separates it from Raab, with the Danube. It has a large pottery refinery and contains 1600 inhabitants, who are mostly artisans and fishermen.

RHYVILI a m. Mexico, state Tamaulipas, on the Babinas, an affluent of the Rio Grande. It is picturesquely situated and contains 3000 inhabitants. Coal has been discovered in the vicinity.

REYNOSA a m. Mexico, state Tamaulipas, r. bank Rio Grande, about 70 m. above its mouth, and 105 m. N.N.E. Victoria. It stands on a rocky site, of tertiary formation, and being accessible by large steamboats has some trade. Pop. 1500.

RIAD or **ASHRAD** a city, Central Arabia, cap. kingdom of Nejed 470 m. N.E. Mecca lat. 25° N. lon. 46° 25' E. Viewed from the W. stretches a wild open plain in the foreground of which, at the foot of a publicly open stands the city large and square crowned by high towers and strong walls a mass of roofs and terraces and overtopping all the huge but irregular pile of the royal palace, and near it another scarcely less conspicuous. For 5 m. or more on the surrounding plain, and more especially to the W. and E. are numbers of palm trees overshadowing green fields and well-cultivated gardens. The city itself is divided into four quarters, one the north-eastern, in which are the royal palace the houses of the state officers and of the richer and government classes. Here the dwellings are in general high and the streets tolerably straight and open, but its situation is low and it is therefore perhaps the least healthy locality of all. The second, or north-eastern quarter is a large irregular mass of houses, of every size and description, and inhabited chiefly by the merchants and service classes. The south-western quarter, with open healthy streets, is spacious and well-people, it is the chief residence of the strict Wahabite religious, and

above all here dwell the principal survivors of the family of the great religious founder Abd-el-Wahhab. Mosques, churches, walls for ablution, are met with at every turn. Lastly, the south-eastern quarter is large and more thickly inhabited than any other; being occupied by the lower classes of the population it is naturally the worst built and worst kept part of the town, the ground is low, and the air not healthy; the ravages of the cholera in it in 1864-5 were ally loaded as the wharves. On the N bank of the Rithblun, near the confluence of the Aikun, about a mile from its mouth stands Liverpool, the capital of, Keot.

RICHMOND [add.] a tn British America, Canada East, cap co of same name, beautifully situated r bank St. Francis, 75 m ENE Montreal. It possesses a N Catholic and three Protestant churches a college called St. Francis lately erected and intended to be conducted on what are called unsectarian principles, a mechanics institute and library association and manufactures of leather pearl ash and agricultural implements. The circuit court is held here. Pop. of township, 2200.

RICHTEHFIELD a missionary station S Africa, on the N frontier of Cape Colony, prettily situated on the Swakop at the junction of the Oowernoma, lat 28 28 S lon 17 20' E. Near it are three groups of wretched hovels belonging to the Damaras, and containing in all about 200 inhabitants. In the vicinity there is abundance of garden ground in which most European vegetables thrive well, and wheat of excellent quality has been grown.

RIFD [add.] a tn. Austrian empire, 1 pper Austria, cap. circle of the Inn, on the Oberach, lat. Breisach 36 m W by S. Inns consists of the town proper surrounded by walls and entered by three gates and of two suburbs as well built, and has three churches one of them with a conspicuous tower and fine altar-piece, a town hospital, an infirmary, an asylum for children and other benevolent institutions a townhouse, a theatre and, on an adjoining height a castle enclosed by a deep ditch. The manufactures, which are not important, consist chiefly of linen and a variety of woollen articles. Pop. 8300.

RIMAB/DCS, a tn. Austrian empire, Hungary, on Glimor 12 m S.E. Rima Rombach on the Rima, with large horse markets and 1100 inhabitants.

RIMOUSKI a tn. British America Canada East cap co of same name r bank St. Lawrence, 170 m N.E. Quebec. It is a large and flourishing place with a N Catholic church an academy and industrial college an academy belonging to the Congregational sect, lawrences, and numerous saw mills furnishing the materials of a very extensive trade in lumber. A large and magnificent wharf has recently been constructed at the expense of government. Rimouski is beginning to attract attention as a fashionable watering place. Pop. about 5,000.

RINTIMBORE or RANTAMPOOR, a fort India, Nagpootna, state and 75 m S.E. Jyopoor on a rock isolated on all sides by deep ravines, and accessible only by a narrow pathway between steep overhanging cliffs. Crowning the summit of the rock, which is a mile long and nearly a mile broad it is surrounded by a massive stone rampart strengthened by towers and bastions and contains within its inclosure, in addition to the buildings required to accommodate the garrison, an ancient palace in which the commandant resides and a mosque, with the tomb of a reputed Mussulman saint. A perennial spring and several tanks furnish an ample supply of water. Hence the introduction of artillery the fort cannot be considered as a place of strength, as it is commanded by several local warlords. A small paltah or native town is situated a little to the east.

RIOBAMBA, or BOLIVIAN a tn S America, Ecuador prov and to the eastern slopes of the volcanic mountain of Chimborazo 100 m S. Quito. It is a modern place with spacious streets, only some of which are paved, and contains several churches, a college in which Latin philosophy, and theology are taught, and an hospital. It is the scene to be upon the ruins of an ancient and more important town. The congress which in 1830 declared the independence of Ecuador met here. Pop. about 16,000.

RIO PARDO, a tn. Brazil prov Rio Grande do Sul on a height above a stream of same name, near its confluence with the Jacuhy, 80 m W Porto Alegre. It is probably

above all here dwell the principal survivors of the family of the great religious founder Abd-el-Wahhab. Mosques, churches, walls for ablution, are met with at every turn. Lastly, the south-eastern quarter is large and more thickly inhabited than any other; being occupied by the lower classes of the population it is naturally the worst built and worst kept part of the town, the ground is low, and the air not healthy; the ravages of the cholera in it in 1864-5 were ally loaded as the wharves. On the N bank of the Rithblun, near the confluence of the Aikun, about a mile from its mouth stands Liverpool, the capital of, Keot.

RICHMOND [add.] a tn British America, Canada East, cap co of same name, beautifully situated r bank St. Francis, 75 m ENE Montreal. It possesses a N Catholic and three Protestant churches a college called St. Francis lately erected and intended to be conducted on what are called unsectarian principles, a mechanics institute and library association and manufactures of leather pearl ash and agricultural implements. The circuit court is held here. Pop. of township, 2200.

RICHTEHFIELD a missionary station S Africa, on the N frontier of Cape Colony, prettily situated on the Swakop at the junction of the Oowernoma, lat 28 28 S lon 17 20' E. Near it are three groups of wretched hovels belonging to the Damaras, and containing in all about 200 inhabitants. In the vicinity there is abundance of garden ground in which most European vegetables thrive well, and wheat of excellent quality has been grown.

RIFD [add.] a tn. Austrian empire, 1 pper Austria, cap. circle of the Inn, on the Oberach, lat. Breisach 36 m W by S. Inns consists of the town proper surrounded by walls and entered by three gates and of two suburbs as well built, and has three churches one of them with a conspicuous tower and fine altar-piece, a town hospital, an infirmary, an asylum for children and other benevolent institutions a townhouse, a theatre and, on an adjoining height a castle enclosed by a deep ditch. The manufactures, which are not important, consist chiefly of linen and a variety of woollen articles. Pop. 8300.

RIMAB/DCS, a tn. Austrian empire, Hungary, on Glimor 12 m S.E. Rima Rombach on the Rima, with large horse markets and 1100 inhabitants.

RIMOUSKI a tn. British America Canada East cap co of same name r bank St. Lawrence, 170 m N.E. Quebec. It is a large and flourishing place with a N Catholic church an academy and industrial college an academy belonging to the Congregational sect, lawrences, and numerous saw mills furnishing the materials of a very extensive trade in lumber. A large and magnificent wharf has recently been constructed at the expense of government. Rimouski is beginning to attract attention as a fashionable watering place. Pop. about 5,000.

RINTIMBORE or RANTAMPOOR, a fort India, Nagpootna, state and 75 m S.E. Jyopoor on a rock isolated on all sides by deep ravines, and accessible only by a narrow pathway between steep overhanging cliffs. Crowning the summit of the rock, which is a mile long and nearly a mile broad it is surrounded by a massive stone rampart strengthened by towers and bastions and contains within its inclosure, in addition to the buildings required to accommodate the garrison, an ancient palace in which the commandant resides and a mosque, with the tomb of a reputed Mussulman saint. A perennial spring and several tanks furnish an ample supply of water. Hence the introduction of artillery the fort cannot be considered as a place of strength, as it is commanded by several local warlords. A small paltah or native town is situated a little to the east.

RIOBAMBA, or BOLIVIAN a tn S America, Ecuador prov and to the eastern slopes of the volcanic mountain of Chimborazo 100 m S. Quito. It is a modern place with spacious streets, only some of which are paved, and contains several churches, a college in which Latin philosophy, and theology are taught, and an hospital. It is the scene to be upon the ruins of an ancient and more important town. The congress which in 1830 declared the independence of Ecuador met here. Pop. about 16,000.

RIO PARDO, a tn. Brazil prov Rio Grande do Sul on a height above a stream of same name, near its confluence with the Jacuhy, 80 m W Porto Alegre. It is probably

BIASI a tn. India Gholab Singh's Dumbions on the slope of the most southerly range of the Himalays, near 1 bank Chocab lat. 23 5' N lon 74 53' E. The town is considerable, containing only 1000 inhabitants, but the fort situated on a rocky cone, and surrounded by a lofty stone wall rising from steep precipices, is one of the strongest and best constructed in the country.

RIBAGO or RIBAWO, a vil or dist. Western Africa Adamawa, in the vicinity of Yola is a large struggling place stretching along a grassy eminence. It is surrounded by fertile corn fields, from which almost the only crop grown is a species of sorghum, and by rich meadow lands depastured by cattle, horses, asses, goats, and sheep. It is also abundantly supplied with fish from a large inlet or backwater which branches off from the Fero, and extends along the N.E. foot of the Bagale Mountains to within a short distance of the vil. Pop. about 6000.

RIBYE-RIBYE, or RIBY-RIBA, a river S.E. Africa, an affluent of the Shire rising in the hills of the Marami R. K's range is about lat. 12° 50' S lon. 24° 30' E. and after a S.E. course of about 60 m, joining the r. bank of the Shire. The lower part of the channel is without water in the dry season, but higher up it has pools with dry spaces in the intervals, and still farther W it becomes a fast-flowing stream, forty feet wide, and one or two feet deep. Its name implies that it has estuaries in it, and the word riba ascends it to spawn; but the evaporation is so great in the hot season, that before it reaches the Shire it is quite dry. The adjacent country is divided into districts, that on the N. of the Ribye-rhya is called Ribwe, and that on the S. of the Ribye-rhya is called Ribwe, and these are interesting as indicating an appreciation among the natives of the value of land

the effect places in the province, and obtained a high degree of prosperity in early times when it was the central entrepot of the upper Jacoby. Improved navigation and the introduction of steamboats have carried the trade into a new channel by which while Porto Alegre has gained, Rio Grande has suffered. It is still a handsome town containing besides two churches, one of them an elegant structure, a new hospital well endowed but not yet completely finished, and barracks, a number of elegant mansions and extensive warehouses. Many of the mansions however are untenanted, and the warehouses, telling only of a past prosperity show no signs of activity. Pop 3500.

RIO QUARTO a. ta. La Plata, Pampas, on a high bank of the Quarta, 100 m. S. by E. Cordova. It consists of houses built of sand compressed within a framework of wood,

and regularly arranged in the form of a square and possesses a large market-place, two churches one of them belonging to a Franciscan monastery which still exists, and the other a large narrow structure with two thick towers, and barracks, which are regularly occupied by about 150 men. The inhabitants, about 3000 are chiefly employed in raising cattle or in trading in European wares, with which they supply the neighboring districts.

RIPON FALLS (Tns), in the Nile, at its exit from the Lake Victoria Nyanza about 3308 ft. above sea-level lat. 0 33 N and lon 38° 40' E. The falls, says Captain Speke, 'were by far the most interesting sight I had seen in Africa. Everybody ran to see them, though the marsh had been long and fatiguing, and even my sketch-book was called into play. Though beautiful the scene was not exactly what

THE RIPON FALLS, LAKE VICTORIA NYANZA.—From Speke's Journal.

I had expected for the broad surface of the lake was shut out from view by a spur of hill, and the falls about 12 ft. deep and 400 to 500 ft. broad, were broken by rocks. Still it was a sight that attracted one to it for hours—the roar of the waters, the thousands of passenger fish leaping at the falls with all their might, the Waogon and Waganda fisher men coming out in boats and taking post on all the rocks with rod and hook, hippopotami and crocodiles lying sloping on the water the ferry at work above the falls, the cattle driven down to drink on the margin of the lake—made in all with the pretty nature of the country—small hills, grassy-topped with trees in the fields, and gardens on the lower slopes—as interesting a picture as one could wish to see.

RISTIGOUCHE a river British America, which rises in the N. W. of New Brunswick on the borders of the haun of St. John flows N. E. forming part of the boundary between New Brunswick and Canada and after a course of above 80 m., during which it receives several considerable affluents, enters the head of Chaleur Bay near Campbelltown, by an estuary about 20 m. long, and with a breadth varying from 1½ to 3 m. At Indian Point a mile above Campbelltown the navigation for shipping ends, as the channel there becomes narrow and has only 12 ft. at low water but small craft may stand for some distance by very narrow passages with from 5 to 9 ft. water. In point of grandeur and picturesque beauty the scenery of Ristigouche Valley is at least equal to that of any other part of the Gulf of St. Lawrence. On the Canadian side of the estuary the mountains rise to the varying heights of 1000 to 1745 ft. at the distance of only 2 or 3 m. from the shore, while on the S. side the wooded hills or ridges situate in the Sugar Loaf and Dalhousie Hill, the respective heights of 950 and 715 ft. The mountains are few on the N., but are rapidly increasing on the S. side. The Ristigouche offers a tempting field to the geologist and ichthyologist. Among

others there are amygdaloid trap rocks abounding with scudica, jaspers, corallines, and agates. The agates in particular together with petrified wood are found more or less all along the shores of Chaleur Bay and under the name of Gaspe pebbles are worked up at Quebec into ornamental articles of jewellery.

RITZCHAN a. ta. Austrian empire, Bohemia circle and about 12 m. E by S Prague with a parish church, a town house, tile-works and 1000 inhabitants.

RITZCHKA a. ta. Austrian empire Bohemia circle K. nigwitz, on the Klassebach 6 m. E N E. Reichenau with oil and corn mills, and 1200 inhabitants. RIVAR or RIVANAGUA a. ta. Central America, Nicaragua, dep. Matagalpa. It stands about 3 m. N. of Lake Nicaragua, in the centre of an extensive plain overgrown with rank vegetation and interspersed with cacao coffee sugar and indigo plantations, which are among the most valuable in the state. Its streets are regularly laid out, paved, and of uniform width and its houses are of one story with heavy cedar doors, entered by a portico, and roofed with tiles. The principal public buildings are on the grand plaza, where the offices of greatest pretension is a large church which has been long in course of construction, and still remaining unfinished looks not so much a modern edifice as an instant ruin. The town contains four other churches, but none of them deserve special notice. The market, held on the N. and W. sides of the plaza is abundantly supplied with fruit, Chili pepper, articles of light clothing medicines, and trinkets. As the central entrepot for the department, Rivas carries on a considerable trade. Pop about 5000.

RIVER DAVID a. ta. British America, Canada East, co. Yarmouth, on the river which gives it the name, 53 m. N. E. Montreal with a E. Catholic church a model school, several mills, and a large trade in furs sent to Montreal and Sord, chiefly for the use of steamboats. The wilds of

the surrounding districts abound with cranberries, of which large quantities are exported to the U States. Pop of parish about 8000

RIVIERE DU LOUP EN HAUT, a tn British America, Canada East co, Mastungog, 70 m S E Montreal. It possesses a Protestant and a R. Catholic church, and several tanneries. The territory in which it stands belongs to the Urmaline name of Trois Rivières or Three Rivers. Pop. about 3000

RIVIERE QUELLE a tn British America, Canada East, co Kamouraska, r bank St. Lawrence, 73 m N E Quebec, with a R. Catholic church manufacturers of stoneware and mill work, a tannery, and some general trade. Pop. about 2500

RIZANA a tn Austrian empire, Hungary, co. Arva-Thorsau, about 40 m N E. Munkacs on the Arva, with an iron-mill iron furnace and a considerable trade in flax. Pop. 1200

ROCHESTER, a tn U States, Minnesota cap co. Olmsted, on the Winona and St. Peter's railway 44 m W Winona. It is an important station on the railroad, and is situated in a rich wheat-growing district. It contains a court-house, several churches, and a bank. Pop. (1880) 1484

ROCKALL, an island, N Atlantic Ocean about 150 m W St. Kilda, the westernmost of the Hebrides lat 57° 36' N, lon. 13° 41' W. It is a circular mass of rock which rises steep from the water and being whitened by the dung of the numerous birds frequenting it, appears when first seen, like a distant sail. The breakers around it warn the mariner to give it a wide berth. From recent examination it proves to be the top of a submarine mountain separated from the great plateau which forms the bottom of the ocean for a long distance westward from the shores of the British Isles by a valley in which no bottom is found at the depth of 750 fathoms. Rockall harbours recorded merely as a danger, has changed its character so far as to become an object of some practical interest on account of the fish around it being found to be large and plentiful

ROCKHAMPTON a tn Australia, Queensland, cap co. Livingstone, r bank Fitzroy River about 20 m distant above its embouchure in Koppell Bay which lies on the tropic of Capricorn. It is a thriving place, and the outlet for the wool produce of the Comet Peak Downs and Barrow Pop. about 6000.—(Proceedings Roy Geo Soc.)

ROCKINGHAM RAY, a bay Australia, Queensland lat 18° S, lon. 146° E immediately S of Hinchbrook Island. Its shores are mountainous, and off its outcrops are islands of various sizes. The mountains rise to the height of 3500 to 4000 ft., and their slopes and the plains at their feet are clothed with a dense and luxuriant tropical vegetation, resembling the most picturesque parts of Ceylon. On this bay in January 1854, Sir George Bowen Governor of Queensland founded the new settlement of Cardwell. The pastoral districts to which Rockingham should naturally serve as an outlet lie on the table land, and in the valleys beyond the mountains. Communication is established between the bay and these districts by means of a road suited for wheeled vehicles, through a gap in the wall like range. This road likewise connects all the interior country and the banks of the Flinders Lynd and Burdakin with the shores of the Pacific.—(Proceedings Roy Geo Soc.)

RODONDO an isl on the N side of Bass Strait, 6½ m from Wilson Promontory, the extreme S point of Australia. It consists of a conical mass of granite, which rises to the height of 1180 ft. above the sea, so as to be visible from a ship at a distance of 80 m., is thinly clothed with vegetation on its upper part, and so steep all round that even the seals cannot find resting places on its declivities.

ROFFAH, a tn Africa, Nubia, prov. Senaar, r bank Nile Nil, 60 m S E. Khartoum. It stands opposite to the ruins of Arbaga, the residence of the Sheikh of Shukry who rules over a large extent of territory nominally subject to the Turk, and being thus regarded as the capital, possesses a considerable degree of importance. The inhabitants rear, fowls, lambs, camels, and deal largely in agricultural produce and cattle, for which an active market is held twice a week within the town.

ROGAN KOTO, a tn W Africa, territory Koma, r

bank Bonuwa, 140 m. above its confluence with the Kwana. It is surrounded by a wall with numerous loopholes for archers and has a pop. of about 1300, who are very industrious and disposed to trade. On a large island immediately eastward are two towns inhabited by people from Koroorko.

ROHATYIN, a tn Austrian empire, Galicia, stride and 16 m. W Brestow cap dist of same name, with numerous stores of cloth and a trade in corn. There are rich gypsum quarries in the vicinity. Pop. 3628

ROHR, a tn Austrian empire, Lower Austria, on the Bohemian, 35 m. S W Vienna, with four saw mills, a considerable trade in wood and wooden ware, and 1080 inhabitants.

ROHEBACH a tn Austrian empire, Upper Austria dist and 28 m N W Linz. It has a handsome parish church an hospital, manufactures of leather, and an active trade. Above the town lie the ruins of a castle, and beside it a church to which pilgrimages are made. Pop. 1000

ROHTUK a dist India N W Province between lat 28° 38' and 29° 18' N lon 76° 10' and 77° 4' E, is bounded N E. by Panesot, L. Delhi and the native state Bahadurgarh B. Jhujhar B. W. Dadrar, and W. Muresar and B. hind area, 1549 sq m. The Rohituk branch of Perce's Shakti canal traverses the district from N. to S., and adds greatly to its fertility. The old Delhi canal also traverses it, but when first opened was the cause of a great disaster. Owing to a blunder in taking the levels the water which was expected to flow in a continuous stream accumulated at Ghana, threw down the embankment, and carried devastation into the surrounding country. Pop. 294,190

ROHTUK, cap. of the above dist 42 m N W Delhi stands on a watercourse 45 m long formed by the British government in 1826 to convey water from the canal of Feroze Shakh. It is surrounded by a wall and possesses good houses. Hodson, who distinguished himself so much during the Sepoy mutiny here encountered a body of rebels on 16th August 1857, and signally defeated them. Pop. 10,850

ROMANOVSKAYA a tn Russia, gov. Don Cossacks, r bank Don, 68 m S E. V. Novos Tcherkassk. It is a chief entrepot for salt, and has 2181 inhabitants.

ROME See PARISI SYRVE in Supp.

RONCADE a tn Italy Veneto, prov. and about 12 m S E. Treviso. It is enclosed by a wet ditch and an ancient wall flanked with towers and has a handsome parish church and a palace of distinction. Pop. 8,560

RONCEGNO a tn Austrian empire, Tyrol circle and about 12 m W Trent with a handsome parish church, a ruined castle and 2200 inhabitants

ROODURPOOR, two places, India —1 A tn N W Province, dist. and 26 m. S. L. Goruckpore, on the Mughana, a small feeder of the Rapti. It consists of about 300 mud huts, and has in its vicinity two temples, one a large pyramidal structure, and the other of small or daisies adjoining it—2 A tn Richmond dist. and 53 m N Bareilly, on the bank of an affluent of the Ramganga, and fine mango groves. The foliage of the trees and the temples and other buildings overtopping them give the place at a distance a striking appearance and raise expectations which a nearer inspection does not realize. The houses are merely a few scores of wretched huts, and the temples and tombs are all in ruins.

ROOPROA a vil Aracan r bank Kolady which here flows through a hilly district, and on the N. is bounded by the Pectonung range. The inhabitants are Aracanese, and differ in many respects from the Mughal of Akyab and the seaboard. Their houses are entirely of bamboo and built contiguously to short rows or streets, an elevated platform common to all running along their front. The cultivation, chiefly cotton, tobacco, sugar-cane and small quantities of upland rice, the last used chiefly to make arrack, is very indifferent. The river here abounds in the fish

BOORKEE a tn India, N W Province, on one of the most elevated sites in the Doab between the Janna and the Ganges, and on the great Ganges canal 90 m W by E. Delhi. The operations connected with the canal have converted a place which was formerly a mere village, into an important European station, and an institute called in honour of its founder Thomson College, has been established here for the purpose of affording instruction in civil engineering

to Europeans and natives. In the vicinity the canal has been started over the Sabana, by means of an aqueduct 920 ft. long. This noble work, of which the estimated expense was \$185,000, and the actual expense about \$200,000, consists of fifteen arches, each of 50 ft. span.

BOOS-EL-DJERAI, a prov. E. Arabic kingdom of Omani comprising Cape Mascandah and its vicinity. It is the wildest and most barren district of Omani; the people are looked upon as half savages, though they are not really so in character; they furnish good soldiers to the government, and have often rendered valuable service in naval war. Each village has its chief, apparently independent of all the others, owing no doubt to the little communication that can be held between places in this region of precipitous mountains.

BOPEZTCHIK, a tn. Austrian empire, Galizia, circle and 36 m. E. by N Ternow, esp. dist. of same name, with three churches, a synagogue, important horse market, and 2963 inhabitants.

BOPEZ, a tn. India. Extended a mile from the left bank of the Suigay a little below the point where this river finally quits the ranges of the Ilusaya, lat. 8° 58' N. lon. 16° 37' E. It occupies a slight eminence in a narrow plain, which extends for several miles along the bank of the river, and contains what was once the residence of a rich and powerful chief, his territory by proving unfaithful to the British government during the war with the Sikhs. Here, in November 1831, an interview took place between Lord William Bentinck, then governor-general, and Ranjot Singh and was accompanied with much expense and ostentatious display.

BOUALIA (BART), a tn. Mexico, state and 80 m. S. E. Chihuahua, on a height above the Florida at its confluence with the Conchos. It is a place of some consequence, and has a pop. estimated at 5500.

BOUALIA, a tn. La Plata, prov. Santa Fe, r. bank Paraná, 170 m. N. W. Buenos Ayres. It stands on a high and steep bank, about 60 ft. above the level of the river and is regularly laid out in square blocks, according to the variable mode adopted in all the towns of the confederation. The central part of the streets is unpaved, but on each side there is a footpath formed of tiles. Besides a square at the entrance of the town there is another near its centre, one angle of which is occupied by a tolerably handsome church with a portico and two towers. There is no other public building of any consequence. Some of the private dwellings are of two stories and elegant. The houses are of the adobe, or the great majority are only of one story, poorly built, and often even of wretched appearance. Still the place is evidently prospering, mainly in consequence of the opening of the navigation of the river and its facilities of transport to Buenos Ayres by means of regular steam-packets. A Centro-Argentine railway is in course of construction, and will afford communication with the interior provinces, the commerce with which is now carried on by means of carts and mules. This traffic has risen from 15,325 tons in 1862 to about 30,000 tons in 1864. The shipping trade in 1864 comprised 806 coasting and river craft of 55,241 tons, and 33 foreign vessels of 9007 tons, entered and 858 coasting and river craft, of 72,254 tons, and 33 foreign vessels, departed. Some of the foreign vessels drawing 16 ft. discharged their cargoes alongside the railway mole. Copper from the mine of Catamarca is manufactured at Rosario, and there are also several flour-mills. Wool forms an important and increasing article of trade, and the American system of curing wool has been commenced. The value of the exports in 1864 was 2512,353. Some things are still wanting to develop the trade of Rosario. The river is navigable up to it for vessels of large burden but it has as yet no proper harbor and is very imperfectly provided with warehouses for the reception of goods. Though of comparatively recent origin, Rosario already contains nearly 16,000 inhabitants, composed of a mixture of almost all nations.

BOUALIA, or **AMLO DE ROSARIO** a tn. Mexico Dep. (Mexico, on a river of same name, which flows W. and falls into the Pacific at Mazatlan, about 30 m. below. It was once an important mining place, and carried on an extensive trade, being the principal source for an extensive tract of acquired but since this mines have ceased to be productive, and the merchants, who used to wait for foreign goods, prefer supplying themselves directly at Mazatlan, it is greatly decayed.

Its site in a mountain gorge, is very imposing and its streets, though narrow, contain many lofty and substantial stone built houses. Pop. about 7600.

BOCHITZ, a tn. Austrian empire, Lower Austria, circle Lower Mannerstberg 38 m. N. W. Vienna. It contains 1200 inhabitants, who carry on a considerable trade in fruit, wood and corn.

BOCHINAU, a tn. Austrian empire, Moravia, circle and 9 m. S. E. Nertischau, on the Betaschva, in a beautiful valley. It has a parish church and a considerable trade in cattle, flax, and ewe-milk cheese. On one of the lofty mountains in the vicinity is the old ruined castle of Kösseles Pop. 3105.

BOCHALOWITZ, a tn. Austrian empire, Bohemia, circle and 12 m. S. W. Glitschin on the Irsawa, with a deanery church a castle, and 1900 inhabitants.

BOCHUENU a tn. Russia, gov. and 50 m. N. W. Kovno, esp. circle of same name, on the Dubissa, with two churches, a school and a parish school two charitable institutions, and a pop. of 6324. A battle was fought here in 1820 between the Russians and the Poles.

BOCHITZ, a tn. Austrian empire, Moravia, circle and 9 m. N. W. Belzin, with which it is connected by railway. It has a parish church and a castle, both of them beautiful structures; manufacture of beet-root sugar a blast furnace and coal mines, which are very extensively worked, and contains 2680 inhabitants.

BOCHOW a tn. Austrian empire, Galicia, circle and 12 m. S. Koloman, esp. dist. of same name, with a salt spring a government salt magazine, an extensive trade in salt and 2871 inhabitants.

BOCHU WESLEY a tn. Austrian empire, Bohemia, circle and 8 m. S. E. Glitschin on the Cyllina with a parish church a castle, a townhouse, a brewery and 1000 inhabitants.

BOUPAT, an Isl. Indian Archipelago, on the N. E. coast of Sumatra, in the straits and nearly opposite to the town of Malacca. It is for the most part more jungle, its only inhabitants being a few Malay fishermen living on the coast.

BOVERHARA a tn. Italy, Venetia, prov. and 18 m. S. E. Verona, on the Adige, with a church containing fine paintings, and 2689 inhabitants.

BOVIGO a tn. N. Africa, Algeria, prov. and 18 m. S. Algiers, on the Arrah where it enters the plain of Metidja. It has several oil mills, and in the vicinity are gypsum quarries and mineral springs. Excellent tobacco grows in the district. Pop. 1408.

BOVUMA a river E. Africa, falling into the Indian Ocean in lat. 10° 20' S. lon. 40° 27' E. Its source, as yet undiscovered, is supposed to be in the country N. E. of the northern extremity of Lake Nyassa about lat. 10° 50' S. lon. 36° E. It has been explored for 150 m. from the sea in a W. W. direction. At its mouth it forms a magnificent bay and has no bar. The scenery upon the lower part of it is superior to that on the Zambezi: the highlands being visible from the sea. Eight miles up a beautiful range of well wooded hills on each bank begins. On these ridges a tree resembling African black-wood, of finer grain than ebony grows abundantly and attains a large size. The current is rapid, but the volume of water is not great, and in depth is at times only navigable by a small vessel. Upon the l. or N. side of the river 25 m. from the entrance, is a small lake named Chidra, which is connected with it in flood time, and is nearly surrounded by hills, 500 or 600 ft. high, dotted over with trees. The navigation becomes more difficult as the river is ascended, the channel being much impeded in the dry season by mangroves brought down by the floods. In some places the river is divided into two or three shallow channels. The valley of the Rovuma, bounded on each side by a range of highlands, is from 2 to 4 m. broad, and its direction is tolerably straight: the channel is the dry season however, is exceedingly tortuous and useless for navigation for at least four months in the year. Forty miles beyond Lake Chidra is an inhabited island called Kibokomana, along the l. bank above this island is an exceedingly fertile plain nearly 3 m. broad. At Mchid, 50 or 60 m. up the river the white land disappears which up to this point, bound the view on both sides with ranges of flat-topped hills 600 or 800 ft. high, to this plain a level fertile plain succeeds, on

which stand detached granite hills. That part of the table-land on the right bank seems to lead away to the S., still preserving the appearance of a hill range. The height opposite extends a few miles further W and then branches off in a N direction. Indications of the existence of coals are found hereabouts probably a continuation of the coal-field of the Zambezi; the more seductive rock with fossil wood in it, being seen at the Island Chibia, which is on the Zambezi a few miles to the S. of the mouth. The direction of the river seems to be more from the south, and some parts of it are deeper than nearer the sea. At 140 m. up, by the course of the river, soft tufa rocks begin to appear; and 10 m. beyond the river becomes narrow and rocky, and at 156 m. (rather less than 3 in a straight line from the coast) it ceases to be navigable in the dry season. Just above this point is the island of Nyamatolo Is. 11° 55' S., 38° 38' E.; near the island is a rocky rapid with narrow passages fit only for native canoes; the fall is small and the banks quite low but the rocks are an effective barrier. The Rovuma is remarkable for the high lands that flank it for 80 m. from the coast. The outcrops of other rivers occur in mountains; those of the Rovuma are found in a level part with hills only in the distance. Far away in the W and N hills heights are visible probably from their form of igneous origin rising out of a plain. According to native accounts the Rovuma is joined about 20 m. beyond Nyamatolo Island by the Lende, which coming from the S.W. rises in the mountains on the E. side of Lake Nyasa; the Rovuma itself coming from the N.W. By some the latter is said to come from the S. range itself but the statement is hardly trustworthy. The country about the lower part of the Rovuma is apparently inhabited by a poor race of Afrikan extraction. Higher up the population is somewhat more numerous, though rendered ill-disposed to strangers by the slave-trade but proceeding more inland the people are more civil and peaceable. In the neighbourhood of Nyamatolo there are well supplied with food and cultivate the land extensively. Sesamum gum-copal and tobacco are articles of trade. A large quantity of excellent quality is collected in bark bins placed for the bees in the high trees all along the river. Crocodiles inhabit the stream and are much hunted by the natives, by whom their flesh is eaten and relished. Of rare animals the snake, about the size of a large cat but in shape more like a pig exists in the rocky banks and low islands; the hunting of it is a favourite pastime of the natives who set fire to the reeds to drive the snake out.

RUWERSDORF is an Austrian empire Silesia, dist. Hohenau about 18 m. N.W. Troppa with manufacture of worsted and articles used in weaving woollens, and 2187 inhabitants.

ROZDOL, an Austrian empire Galicia, circle and about 20 m. N.E. Stry; with a beautiful barometrical circle with fine gardens, two monasteries one belonging to the Sisters of Mercy a sulphur mineral spring and 3806 inhabitants.

RSHEV or RZEV is in Russia, gov and 68 m. S.W. Tver cap circle of same name, on the Volga. It is a hand-some well built town, and has nice churches secular and religious schools for the girls and the parish two benevolent institutions, manufactures of chemicals, paints and hardware particularly ploughshares, sickles, sheep shears, peasants knives, &c. There is also a stone quarry in the vicinity and the trade is extensive. Pop. 11,854.

RUAMAHUNGA, a river New Zealand which, rising among the mountains in the E. of North Island or Ulster flows S.W. through the fine valley of Waipara, which contains 150,000 acres of level grazing land and when about to enter Pailier Bay in Cook's Strait, loses itself in two shallow lakes. In the winter months these lakes, forming a passage through the narrow sand bar which separates them from the bay, may be entered by boats which, after sailing over their expanse of 10 m. away afterwards ascend the Ruamahunga for 30 or 30 m. numerous settlements are established in the Waipara Valley.

RUANWELLE a fort, Ceylon, on an eminence above the Kandy 32 m. N.E. Colombo, and nearly the same distance S.W. Kandy. Standing near the frontier of the latter it was once regarded as a place of great importance, but is now merely the residence of the civil officer in charge of the district. A few miles W stood Sainyawa, one of the most ancient cities of Ceylon. It was the stronghold of the chiefs. See 1st, Gov. - Vol. II.

Manya Duma and Rajah Bhang during their war with the Portuguese, as the allies of King Cetis and was eventually destroyed by the Portuguese general Ansaldo at the close of the sixteenth century. Among the still existing remains are a deep moat crossed by a bridge composed of five arches 14 ft. long and more than proportionate thickness, and vestiges of the palace and temple, which were of heavy granite. Ruwalle, meaning Golden Sand, takes its name from a small stream near it. The country around is magnificent, and commands fine views of the mountains near Adam's Peak, and of the straits which descend from them.

RUAPUKU, an old New Zealand nearly in the centre of the E. entrance of Forreux Strait, which separates the Middle from the South Island. It is of irregular shape, 44 m. long from N to S and about 2 m. wide. The surface is low, nowhere rising more than 220 ft. and only becoming visible from a vessel's deck at sea at the distance of 12 or 14 m. Its central part, 140 ft. high, is thickly covered with trees of stunted growth. In almost every direction it is surrounded by white reefs, and tide-ripples, causing some anxiety to the mariner particularly when approaching it from the E.

RUBY CITY a vt. U. States, Idaho on Jordan Creek 60 m. S.W. Boise City. Here are gold placer mines, and quartz lodes producing silver.

RUDDNA (GREAT and LITTLE) is an Austrian empire Galicia circle and 4 m. N. Rzeszow with two fine castles and 1800 inhabitants.

RUDNICK, a town Austrian empire, Galicia circle and 28 m. N.E. Rzeszow with 1900 inhabitants. The Swedes were here defeated by the Poles in 1650.

RUFUJI or **ICRIE** a large river, E. Africa which pours its water into the Indian Ocean by a number of mouths west of the island of Mufah in lat 8° S. It is the main drain of the Zanzibar coast, and like the Zambesi becomes swollen by the heavy rains in the interior from January or February till May and June. The natives ascend it in boats at a distance which they calculate at seven days when the current becomes too strong for them to stem it. The inhabitants on the banks have their houses raised on piles or poles, beyond the reach of the inundation and the crocodiles. They are very barbarous. Could the barbarous tribes be conquered, the Rufiji might become one of the great gates for commerce into E. Africa. In its upper course it has the name of Kwaha.

RUM an isl. or cap West Indies near the centre of the Bahamas about lat 23° 45' N. lon 74° 40' W. It is about 84 m. long by 2 m. to 5 m. broad, and terminates in the S.E. in two remarkable high white cliffs which become visible at the distance of 10 or 12 m. The principal settlement is at St. George Bay in the S.E. where there is an extensive anchorage and a valuable salt pond. Its inhabitants amounted in 1807 to 900.

R1 O, a river S.E. Africa rising among the hills S. of Lake Shirwa and flowing S.W. into the bank of the Rbire in lat 18° 58' S. lon 35° 11' E., opposite the island of Male. About 100 yards from the point of confluence is the grave of Bishop Mackenzie, the first missionary Bishop to the part of Africa, who died here of fever not many months after the arrival of his mission.

RUPERT'S LAND the name given by a charter of Charles II. to a considerable territory in British America, extending from the Rocky Mountains on the W. to Hudson's Bay on the E. N. to Lake Methy and S. to the U. States boundary between lat 49° and 60° S. and lon 66° and 118° W. It includes the settlement of Red River and the co. of St. Bonaventura, English River, Nelson River, Cumberland, Seven Albany, Rainy Lake, &c. in the west of a bishopric, and divided into two archdioceses. The Episcopal cathedral is St. John's, Red River. (See HUCON'S BAY TERRITORY in Imp. Geo. SASKATCHEWAN and RED RIVER in Supp.)

RUSKBERG a town Austrian empire, Banat Military Frontier, N.E. Karanseeb, with a colliery, silver lead, and copper mines and 5280 inhabitants.

RUSSIA [add.] In pursuance of her long cherished designs upon the integrity of the Turkish empire, Russia took advantage of some petty quarrel between the Latin and Greek priests at Jerusalem to claim the protectorate of the Greek Christians under Turkish rule. Such a claim being

Total	16 458	736 879,064	404 610

The estimated number of live-stock of various kinds in the year 1865 was —

	European Russia.	Asiatic Russia.	Total
Horses.	16,448,000	5,676,000	16,510 000
Oxen	25,816 000	2,075,000	26,444 000
Sheep	59 315,000	6 515,000	46 131,000
Pigs	9 817 000	599 100	10,067 000
Goats	1 786 000	233,400	2,000 400

In the year 1865 the public revenue of the Russian empire amounted to £60 181 474 and the expenditure to a similar sum. The public debt of the empire in 1861 was £263,500,544.

RUSTCHUK [add.] a tn Turkey in Europe, Bulgaria north and 66 m. W. S. W. Silivria + bank Danube, opposite to Giurgiu in Wallachia, at the confluence of the Kara Lom and on the great road leading from Russia to Constantinople

by way of Jassy and Bucharest, and the two principal passes of the Balkan. It occupies a series of heights, and is a place of strategical importance, being defended both by extensive fortifications and especially by a strong castle which commands the town and also the river the channel of which is here partly occupied by several islands. Among the public buildings within the town and its suburbs are nine mosques several Greek and Armenian churches, and two synagogues the palace of a Greek archbishop, and numerous baths. The manufactures include woolen and linen cloth muslin, silk, leather (ordinary and Morocco) tobacco &c. and the trade is very extensive. Rustchuk and its environs have been the scene of many conflicts between the Turks and the Russians. The latter took it in 1810 after a long siege and the gaining of a battle at Balut. Pop. estimated at 30,000 composed of Wallachian Turks Greeks and Jews.

RUTNAGHERY, a dist. or collectorate, India, presid. Bombay Concan, between lat 15° 44 and 16° 8 N. lon. 73° 6' and 75° 58' N. is bounded N. by Habel's Territory, and dist. Tannah E. Malara and Kolapore, S. Sawantwarre and the Portuguese territory of Goa and W. the Arabian Sea, greatest length N to S, 187 m., greatest breadth 40 m. area, 3964 sq m. The quantity of arable land is owing to the mountainous character of the country limited, but this is in general well cultivated, as a ready means of conveying the produce to market is furnished by the numerous creeks which indent the coast. Towards the interior the case is different, as access to it is excluded by the Hydras range belonging to the Western Ghats in which there are only a few practicable passes and these so difficult that pack and not draught bullocks are employed in the conveyance of goods. In this way the expense becomes so heavy that the district is in a manner shut out from all profitable trade with the rich country T. of the Ghats. The consequence is that the great body of the people left without any proper stimulus to exertion are ignorant and apathetic and activity and enterprise are almost entirely confined to the sea coast, where productive fisheries give considerable employment. The chief agricultural products are rice and various species of grain. Both cotton and flax have been tried but pronounced failures. Sugar cane is cultivated to a small extent. Pop. 665 238.

RUTNAGHERY cap. of the above dist., is situated on the coast at lat. 17° N lon 73° 30' E.

RUTPUNCHUR three places, India — 1. A fort Kalloor on the crest of the steep ridge on which Malown stands, and 1½ m. W. of it. It is of considerable strength by both nature and art, and having been taken by the British during the Nepalese war greatly aided them in their operations against Malown — 2. *Rutpungin Khew* a tn Serinda's Division, 36 m N E Deemuch. It stands in a rugged and elevated district is of considerable size, and has a well supplied harbor — 3. A tn Nepotiana state and 85 m E Bhimner. It is surrounded by a stone wall and defended by a fort at its N E angle, and has a good harbor.

RYEN a tn. Austrian empire, Transylvania, circle and 27 m E. E. Kronsstadt with a Protestant and a Greek non united church. In the vicinity are the ruins of an old castle which belonged to the Teutonic knights. Pop. 2080

KYMANOW a tn Austrian empire Galicia, circle and 18 m W. Bank cap. dist. of same name; with an ancient parish church with some remarkable monuments, much frequented cattle markets, and 2185 inhabitants.

RYMNIK or **SALZ BRUKA** a tn Turkey in Europe, Wallachia, cap. circle and on a river of same name 75 m. N. N. E. Buloarest. It is situated in a beautiful plain, is the see of a bishop, and the seat of a court of primary jurisdiction and has an ecclesiastical seminary, a church and a normal school. The Russians defeated the Turks here in 1789.

RYMNIK VULTUREA, a tn. Turkey in Europe Wallachia, in a mountainous district on the Aluta, 95 m. N. W. Buloarest. It is the seat of a court of primary jurisdiction and contains several churches and a normal school. Pop. 8000

S

SAAD-EL-DIN an isl. off the coast of E. Africa, about 2 m N Zayla. It is of very small extent, bordered on its outer edge by a thick belt of underwood, and consisting within of a barren flat of silt and sand. Local tradition, however, says that it was the site of an ancient Zayla built by the Arabs from Yemen. In proof of this remains are still shown, consisting chiefly of watercourses stretching across the plain to wells now lost and of tanks made apparently to collect rain-water. Near one of the latter which is a work of some art, there is a cemetery containing among other tombs, that of Sheikh Saad-el Din formerly the hero and now the much venerated patron saint of Zayla. On the island some specimens of fine sponge and coral are picked up.

SABA [add.] an isl. West Indies, in the N.E. of the Caribbean Sea, lat 17 23 N lon 69 19 W. It is nearly circular 42 m in diameter and is throughout a mass of rugged mountains intersected by deep and precipitous ravines, and terminating in a summit which is 2820 ft. high and usually enveloped in clouds. The inhabitants live chiefly in a small valley called the Dorton, 950 ft. above the sea. They export poultry and vegetables, chiefly sweet potatoes, to the neighbouring islands, speak the English language, and are excellent ship builders, their boats and small craft being famed and generally used as a model over all the Windward Islands. A heavy surf which generally breaks all along the shore renders landing extremely difficult and often dangerous. Pop. 1674.

SABON BIPNI a tn. Western Africa, Hausa States, near the Tsaiki frontier 140 m N W Kano is approached with difficulty through narrow lanes of a suburb and has outside its western wall a large sheet of stagnant water of very bad quality with a border of kitchen garden in which onions are cultivated. The governor is a dependant of the emir of Sokoto.

SACU a river U. States, one of the largest in New England, has its sources in the White Mountains New Hampshire, being there formed by the junction of three principal branches at Bartlett flows S.E. into Maine and after an abrupt turn northwards, resumes its original direction and falls into the Atlantic at Saco Bay, after a course of about 100 m. A succession of lofty falls the last of them only 4 m above its mouth render it unfit for navigation beyond this point, but furnish immense water power. It is subject to freshets, which have repeatedly proved very destructive.

SACRAMENTO [add.] a co. U. States cap California, 1 bank river of same name, 125 m above its mouth at San Francisco lat 38° 53' N lon 121° 20' W. It occupies a low flat only 30 ft above the level of the sea, and 20 ft. above low water in the river and is of unattractive appearance, being for the most part bare, with occasional patches of oak and considerable tracts of swampy ground. The streets are wide and straight, cross at right angles, and are well shaded by trees the shops and stores are mostly of brick but the dwelling-houses are of wood, most of them with gardens attached. The only public building of imposing appearance is the capital among the other public buildings are numerous churches and schools. The prosperity of the place and the rapidity of its progress are almost entirely due to the Sacramento Valley which has become famous for its gold fields and exports all its produce by way of the town. In maintaining this trade, and keeping up the connection with the mining localities, numerous steamers are employed. It is the S.W. terminus of the Central Pacific railroad now in progress, and of the Sacramento Valley rail way 20 m. long, to Folsom, which was opened on 2d Feb. 1870, and is extended to Lincoln. Unfortunately the river becomes so low in the dry season that some but boats of light draught can ascend. Another serious disadvantage is the town of the site already mentioned. Catastrophic floods have already followed. In 1850, 1852, and 1858 the flooding of the river threatened to overwhelm the

whole place, some of the streets having 5 ft. of water in them, and not more than a dozen houses remaining level free. A similar catastrophe occurred in 1861-2. Means have been employed to remedy this evil. The level of the streets has been raised and a levee or embankment carried round the town. Water however, is not the only element against which Sacramento has had to contend. A dreadful conflagration on 2d November 1852 destroyed 600 houses and other property to the value of about a million sterling another serious conflagration occurred in July 1854. Pop. (1860) 12 759 (1865) 18,000.

SADAGURA a tn. Austrian empire, duchy Bukovina dist. and 4 m N N.E. Chernovitz, cap. dist. of same name, with very important cattle markets and 3985 inhabitants.

SADO an isl. Japan, off the W coast of Nippon, lat. (W point), 38° 1' N lon 138° 17' E. It is high bold and safe of approach but nowhere presents what appears to be a safe anchorage. The N point, off which there is a remarkable conical rock 700 ft. high, rises somewhat abruptly to an elevation of 2500 ft., and then, running in rocky ridges S.W. for 9 m attains its culminating point in a sharp peak of 4500 ft. Thereafter the surface descends in a gentle uniform slope till it meets the low lands in the S. The number of villages, and the indications of high cultivation seen in sailing along its W shore prove that it is well peopled.

SADOWA, a vil. Bohemia, about 8 m. N.W. Königgrätz on the road to Gitchin, with a castle and some dwellings of government officials and about 200 inhabitants. On 24 July 1866, the Austrian army under General Benedek reserved here a crushing defeat from the Prussians, some 15,000 men were killed.

SADOWA WISZMA a tn. Austrian empire, Galicia circle and 25 m E. Przemysl on a muddy stream of same name which rises in the marshes of the Dniester. It has a Franciscan monastery and an hospital for the poor. In the vicinity are several mounds containing the remains of a Tartar host that perished here. Pop. 3387.

SAGHALIEN or **TARAKAI** [add.] native Turukin on Okoto Japanese, *Krefu* or *Ota* pop. an isl. off the E coast of Asia, from which it is separated by the Gulf of Tartary and the Strait of Mamiya, extends 568 m from N to S., with an average breadth from E. to W. of not more than 60 m and has a computed area of 53 000 sq m. Its N. extremity Cape Elizabeth, lat. 54° 24' N. is in the Sea of Okhotsk its S. extremity Cape Grillon, lat. 45° 24' N. is in La Perouse Strait which separates it from the Japan island of Yezo, on the E it lies open to the Sea of Okhotsk and has no land nearer than the Kurile Isles, forming the E entrance of this sea, on the W. in the Strait of Mamiya, it approaches within 6 m. of the continent. In shape it bears no incommensurable resemblance to the S part of the Italian peninsula. The coast is generally rocky and steep, except in the N.W., opposite to the mouth of the Amoor and a similar part of the E. where sandy downs occur. Its only remarkable indentations are the Gulf of Patience in the S.E. and the Bay of Anwa in the S. The interior is traversed centrally from N to S. by a mountain chain part of which, about lat 52° N. is believed to be covered with perpetual snow. As it extends through 8 degrees of latitude there is a considerable difference between its N. and S. climates, the former reproducing the winter rigors of the Lower Amoor while the latter is more equable and moderate than the opposite coast of Manchuria. The only rivers of any consequence are the Tuma and the Ty, which, though they rise nearly in the same locality take opposite directions, the one piercing the central chain, and flowing N.E. through a wide valley into the Bay of Okhotsk, and the other flowing S. into the Gulf of Patience. Among the forests which cover many parts of the island, oak, ash and maple are frequent. The rivers afford a refuge to numerous kinds of ducks and other birds, and both in them and on the coast fish abound. Among the land animals are the reindeer the common stag, the roe, the elk and the musk-ox.

The inhabitants consist chiefly of Gilyaks, Orochons, and Ains. The island belongs to its northern part to the Russians who have lately supplanted the Chinese, and the southern part to the Japanese.

SAIGON a city and river port, cap. of the French prov. of Cochinchina upon the river of same name, 35 m. from the China Sea, lat. $10^{\circ} 47' N$, lon. $106^{\circ} 45' E$. It consists of two towns connected by a straggling suburb; Ploegh with the citadel being on the W side of the river, and the commercial town being on a tributary stream navigable by large boats. It is regularly built and intersected by canals some of which are lined with quays of stone and brickwork. The houses are mostly of earth, one story high and thatched with palm-leaves. The citadel fortified in European style, contains barracks, officers' quarters and the governor's residence. Saigon has also a naval yard and arsenal a palace and large rice magazines. It communicates with the Mekong by a canal 23 m. in length, and has a foreign trade, chiefly with Siam and China. The markets are well supplied with provisions, especially fish and the environs are fertile and carefully cultivated. Estimated as 150,000.

SAINTE ADELE, a vil British America, Canada East, dist. and 41 m. W.W. Montreal, on the North River with a R. Catholic church several schools, a small-dock court, and a trade in pearl-shell flour and lumber. Pop. of vil and par about 1400.

SAINT ANNE, the name of five places, British America Canada East:—1 *Sainte Anne de la Poudre*, a large and flourishing vil on Champlain intersected by the Anne River close to its mouth in the St. Lawrence 58 m. W.S.W. Quebec. It possesses a R. Catholic church a building yard, a tannery manufactures of mill machinery and tinware and a local flour and lumber trade. Pop. of par about 4000.—2 *Sainte Anne des Monts*, a settlement rather than a vil dist. Gaspé, at the mouth of the Ste Anne on the S shore of the estuary of the St. Lawrence. It possesses fine fisheries abounding in cod halibut, salmon trout, mackerel and herring and exports in addition fur, barley potatoes deals, hickory and shingles. Pop. of par about 19,000.—3 *Sainte Anne de la Poudre*, a vil on Kennebec, 7 bank St. Lawrence, 55 m. N.E. Quebec. It is beautifully situated and boasts of a magnificent college, with an attendance of 300 students.—4 *Sainte Anne des Plaines*, a vil on Terrebonne 19 m. N.W. Montreal with a R. Catholic parish church and some trade in lumber. Pop. of vil and town ship about 2000.—5 *Sainte Anne du Nord* a vil on Montmorency 1 bank St. Lawrence, 20 m. N.E. Quebec with a R. Catholic church, a tannery factories for mill machinery and some general trade. Pop. of par about 1900.

SAINT CATHARINE, a vil British America Canada East, co. Dorchester, 20 m. S.E. Quebec with a R. Catholic church a tannery and several cooperages. A considerable number of the inhabitants are blacksmiths. Pop. of par about 2500.

SAINT CROIX a vil British America Canada East co. Lethbridge, 7 bank St. Lawrence, 20 m. above Quebec with a R. Catholic parish church an academy of Congregational nuns, two tanneries, and carding and saw mills. Pop. of par about 2500.

SAINT SCHOLASTIQUE, a vil British America, Canada East, co. Two Mountains on Belle Rivière, 25 m. N.W. Montreal with a R. Catholic church, an Institut Canadien des Armes, two tanneries a carriage factory and some trade. Pop. of par about 4600.

SAKALA a m. Austrian empire, Banat Military Frontier on the Tamas 6 m. N.W. Opava, with two Greek churches and 2640 inhabitants.

SALA a m. in Western Africa, on the route between Sokoto and Gambia. It is well fed but so unobscured among the splendid vegetation of tamarind monkey bread, and other trees, that at a distance its dwellings are scarcely visible. It stands in a fine valley entered by a steep rocky descent, and intersected by a considerable sheet of water.

SALAJER, a m. Russia, gov. Tomsk, prettily situated on one of the spurs of the Altai, which runs down into the low country between Tomsk and Koiyvan. Large quantities of silver have been obtained from its mines, which have been wrought for a long series of years. A bed of coal has been discovered in the vicinity.

SALATAL, a dist. Russia, forming the part of Hilty Dagestan or Lezghia lying immediately W. of the Caspian. It has a mountainous surface intersected by deep ravines but is well wooded and rich in pasture land, on which large flocks of sheep are fed. Though some of the mountains rise to the height of 8000 ft. the climate is generally warm in the valleys. There rice is cultivated, the vine is raised with success and peaches abound. There are very fine hot sulphurous springs in the district, but they have hitherto been little frequented, in consequence of the troubled state of the country. Salatal having long been the theatre of the bloody struggles between the Russians and the Iragli highlanders, while the latter endeavoured nobly but fruitlessly, to escape the thrudom which had been prepared for them.

SALBYE, a m. India, Scindia's Domain, 32 m. S.E. Gwalior is of some historical interest, as the place where a treaty, which bears its name, was concluded in 1782 between the Marathas and the British on terms disadvantageous to the latter.

SALBEM [add] a m. India presid. and 175 m. S.W. Madras, cap. dist. of same name in Mysore and northern part of a valley washed by the Taccumar, which sweeps round the N and W sides of the town, and is here crossed by a substantial bridge of three arches. It stands at the height of 1070 ft. above the sea, and, though containing many wretched huts and narrow lanes, is on the whole a tolerably well-built place, having two wide principal streets, and a number of better houses built of brick and tiled. Across the river, to the S of the town, stands the old mud fort, the ramparts of which have been partly thrown down and the ditch filled up. It is now inhabited chiefly by peons, and has no building of greater consequence within it than the civil jail. The principal buildings of the town are a commodious and well ventilated hospital and a new jail intended to receive 400 prisoners, but most immodestly erected on a low damp confined site. The inhabitants of the town and suburbs, estimated at 25,600 are employed partly in agriculture, and partly in weaving silk and cotton goods.

SALBEM a m. U. States, cap. Oregon, 7 bank Willamette 50 m. S.W. Portland is situated in a rich prairie, and is accessible by small steamers up the river for the greater part of the year. It contains six churches the Willamette university a woollen factory, flour and saw mills, and a foundry and has telegraph communication with the Atlantic states and with California. Pop. (1855) 2500.

SALGOA a m. Western Africa Alauance cap. prov. Gonga on the Volta, which falls into the Height of Benia about 180 m. below. It is the mart of the gnu trade. Pop. 1500.

SALINE a river U. States, rising to the W. of Little Rock near the centre of state Arkansas, flows successively and circuitously S.E., E. and W., and joins the Washita after a course of about 200 m.

SALMON a river U. States rises in the central part of Idaho and flows northward in two branches, the North Fork and South Fork. The main stream then runs westward into Snake or Lewis River, about 50 m. S. Lewiston. Gold is found upon the Salmon River.

SALTO a m. S. America Banda Oriental cap. dep. of same name, 1 bank Uruguay a little below the point where the navigation of the river is obstructed by the Salto-Grande rapids. It stands about 60 ft. above the water. It is a bustling place, and its inhabitants carry on a limited trade in hides and tallow and a very extensive one in yerbe trazeported by carrettes or ox waggons, from Uruguayana and other Brazilian towns. Though the quality of this yerbe is inferior to that of Paraguay 80,000 robes of 25 lbs each are here shipped annually. Pop. 3800.

SALVADOR [add] two islands West Indies, Bahamas, about lat. $25^{\circ} 30' N$, lon. $75^{\circ} 30' W$ —1 *San Salvador* more frequently called *San Island* is somewhat in the shape of a leg and a foot, the leg stretching S.E. for about 40 m. and the foot trending westerly for about 15 m. The average width is from 3 to 4 m., and the height varying from 200 to 400 ft. proves the island to be the loftiest of the Bahamas. It is fertile and well cultivated and contains a considerable population, not congregated in any particular locality, but scattered over its surface. At its S.E. extremity is Columbus Point, so called because it was here sup-

posed to be the landfall of Columbus, or the first land which the great navigator reached on October, 1492 during his first voyage across the Atlantic. The title of San Salvador to this honor has, however, been disputed and Captain A. B. Reeder in particular has shown, in an elaborate article inserted in the 26th vol of the *Journal of the R. G. S.*, that not the present San Salvador or Cat Island, but Watling situated 50 m. to the E. is in all probability the true landfall, as it completely answers the description given of it by Columbus himself in his journal.—2. *Little San Salvador* about 10 m. from the W. end of the former is 5 m. long from E. to W. by 1 m. broad. The space between the two is almost filled with dry ridges and small rocks, leaving only a single intricate opening with a depth of 2½ to 5 fathoms.

SALVADOR, a tn. Paraguay 1 bank. Parana, 146 m. N. by E. Asunción. It is the most northern town or settlement, except Guaymas, in Paraguay; and has about 1000 inhabitants, who live in great poverty in the midst of great natural advantages. Corn, rice, sugar-cane, tobacco, manioc, water-melon, melons, pumpkins, and beans grow luxuriantly and in the vicinity the *concepcion* gum, the most useful species of the acacia tribe, abounds. Its flameless leaves are said to make a cordage stronger and more durable than hemp, and yet to be fit for the manufacture of the finest fabrics.

SALVADOR (San) [add.] a tn. Central America, capital and near the S. base of the volcano of same name. It was founded in 1523 by Jorge de Alvarado, about 6 m. N. of its present site, to which it was removed in 1539. Under the Spaniards it was the capital of a province, and after their expulsion the capital of the republic of Central America. When this confederation was broken up in 1839 it became, as it continues to be the capital of an independent state. In 1863 it contained about 50,000 inhabitants, and had two churches, one of them a large and beautiful cathedral, a university a female seminary several hospitals, and an active trade. In the night of 16th April 1864 it was so completely overthrown by an earthquake that government laid out a new city under the name of Nuevo San Salvador 10 m. nearer the sea, so many of the inhabitants, however chose to remain and rebuild their ruined houses that the old city was formally relinquished as the seat of government. Pop about 15,000.

SAMANA or **ATTWOOD** [add.] an sd. or cay West Indies, Bahamas, to the N. of the Crooked Island group about lat. 23° N. lon. 78° 30' W. It is 9 m. long by 1½ m. broad, has a hilly and uneven surface rising to the height of 100 ft. is skirted by dangerous reefs, and is uninhabited. The anchorage is at its S.W. extremity but is little used as the island lies almost entirely out of the usual track of vessels.

SAMAO, or **SERAO**, an Isl. Indian Archipelago off the W. end of the island of Timor, from which it is separated by a wide navigable channel 3 m. in width. Its length is about 30 m. its breadth 7 m. and its area 184 sq. m. With the exception of the S.E. extremity and part of the interior it is a bare and sterile plain covered with decomposed limestone and fossil shells. It is the residence of the rajah of Compaeng and contains about 3000 inhabitants.

SAMARA [add.] a tn. Russia, cap. gov. of same name, in the angle formed by the confluence of the Samara with the Volga lat. 53° 11' N., lon. 50° E. It was built in 1591 as a protection against the hordes of the Bashkirs and Kalmycks, and enclosed by a deep ditch and an arched rampart. In 1793 these defenses were demolished and a new fortress built. It too has been completely disappeared that scarcely any traces of it remain. The modern town, which is the seat of a civil governor and the see of a bishop, has two cathedrals and two parish churches, secular and religious schools for the clergy and the parish, numerous manufactures, and two annual fairs, which attract large numbers of dealers from distant quarters. The trade is very extensive, Samara ranking as the most important corn market on the Volga. Pop. 19,753.

SAMBA-KATENDA a tn. S.W. Africa, on the S.E. frontier of the Kaimbunde country, between Kapingi lat. 13° 20' S. lon. 18° 25' E. In its vicinity are the marshy lakes of Kapingi, in which the Coema has its source. Pop. 1800.

SAMBOR [add.] a tn. Austrian empire, Galicia, cap. circle of same name on a beautiful and fertile plain 1 bank Dolom, 40 m. S.W. Lemberg. It is the seat of several important government offices, and has an upper gymnasium, a high-school a Burgundian convent, founded in 1472, and containing the tomb of the renowned Chominski found in Polish history; manufactures of linen, and a considerable trade. It was besieged in 1496 by the Turks, in 1556 by the Swedes, and in 1657 by the Soubienburghs. In 1769 it was ravaged by the plague. It was the starting-point of the false Demetrius, when he set out at the head of a host in 1604 to invade the Muscovite territory. Pop. 10,507.

SAMBOS, a territory, S.W. Africa Kaimbunde country between lat. 12° 30' and 15° 35' S. lon. 16° 35' and 17° 55' E. bounded N. by Botswana, E. Kapingi, S. Gaborone, and W. Hambo, area about 1800 sq. m. It consists entirely of an elevated plateau which towards the N.E. becomes connected with the Bafan-Bule the climate is temperate and healthy, and the surface, watered by numerous streams, is fertile and cultivable. The government is in the hands of an absolute prince the people, more peaceful in their habits than those of the adjoining territories, devote themselves to agriculture and trade. Pop. 50,000.

SAMBULPOHA, a tn. India, presid. Bengal 290 m. S.W. Calcutta, extends far about 2 m. along the l. bank of the Mahanady and is said to contain a number of temples and other substantial buildings but comparatively little is known of it, as its climate is deadly to European constitutions. Though the river is navigable by large boats during eight months, and by small boats throughout the year there is little or no trade.

SAMBOUR, a tn. Austrian empire kingdom of Croatia and Slavonia, co. and 13 m. S.W. Agria, cap. dist. of same name with a castle a Franciscan monastery, a copper mill, and 2660 inhabitants.

SAMULCOTIAH, a tn. India, presid. Madras, dist. and 25 m. S. Rajahmundry. It is a large place but derives its chief claim to notice from its cantonment, which occupies the site of an ancient fort, portions of the rampart of which are still standing. The public buildings, all substantial consist of barracks, hospital, magazine, store-rooms, and arsenals quarters. There is also a racket-court and a good mess-house but the officers' houses, scattered about the cantonment are miserable.

SAN ANDREAS, a vil. U. States California on the Calaveras River 165 m. E. San Francisco, is surrounded on all sides by lofty mountains. Gold-mining is the occupation of the inhabitants, who number about 1250.

SAN ANTONIO a tn. W. Africa, on the N.E. shore of Prince's Sound, in the Gulf of Guinea, 140 m. S.W. Fernando P. It consists of about 200 houses of a single story and contains two churches and a convent. The entrance to the harbour is defended by a small fort. Of the inhabitants, about 1000 in number only a tenth are white the rest are mulattoes and negroes.

SAN CARLOS, a tn. La Plata, prov. and 190 m. N. Catamarca, between the sierras of Aconagua and Santa Barbara. It consists of houses, for the most part substantially built white-washed and of pleasing appearance and possesses on its principal square a handsome church with a dome and two towers, erected at the sole expense of a Dominican monk. Pop. about 1800.

SAND an sd. W. Africa, near the mouth of the river Niger. About half a century ago it was a small bare mud bank, but subsequently became a distinct island, about half a mile long, raised 6 ft. above the highest tides, and covered at its N. end by many large trees. On its S. side found timber was piled up to such an extent that H.M.S. *Arcton*, which anchored in 5 fathoms within half of the shore, consumed her fuel from it and the growing trees without any apparent diminution of the store. The greater part of the island, however, consisting of fine sand, which the slightest wind set to rise, it would seem that in recent times it has diminished as rapidly as it had previously increased, and is receding. If it has not already reverted to its original condition of a flat sand-bank.

SANDEE (Nar), a tn. Austrian empire, Galicia, cap. circle of same name, on the Dunajec, 43 m. S.E. Cracow. It has a Protestant church, an upper gymnasium, a high-school

for the circle an ancient castle a monastery which belonged to the Jesuits, a Jewish hospital, and an infirmary. Pop. 1079.

SANDORF, a tn. Austrian empire, Hungary no Upper Austria, 20 m. N. 37 Tyran, with 1250 Slovak inhabitants. In the vicinity are the ruins of the castle of Korlatko, the scudle of the Hungarian family of that name.

SANDY the name of two islands, Australia, off the E coast of Queensland.—1. *South Sandy Island*, about lat 27 S 4 lon. 158 30' E is 27 m. long from S to E and from 5 to 13 m. broad. On the S. it is separated from the mainland by Laguna Bay which is 5 m. wide, and communicates with an extensive sheet of water washing the island on the W. On the E. where the island lies open to the sea, its coast is nearly straight, and rises abruptly to a ridge of sand-hills partly covered with stunted bushes.—2. *Great Sandy Island*, separated from the former on the S. by Wide Bay is 68 m. long from N to S and has a breadth of 13 m. measured nearly across its centre. It consists of a continuous range of barren sand-hills, which rise in some parts to the height of at least 500 feet, and are diversified only by some bushes and stunted trees scattered over the slopes facing the sea. Wide Bay which separates the two islands and is about 10 m. across, throws off two arms, which penetrate to the N and S. between the two islands and the mainland. The entrances to the bay is encumbered by a bar with 2 to 3 fathoms water on it; but, once made, secure anchorage may be found for any number of vessels in 4 to 10 fathoms, in what is called Wide Bay Harbour.

SANGHEBING (Ain) a tn. Austrian empire Bohemia a circle and 16 m. E. N. E. Eger, with a parish church two miles, and several chalybeate springs. Iron and tin are worked in the vicinity. Pop. 1000.

SANGIR (add.) a group of islands Indian Archipelago, so called from the largest island, which is nearly equidistant from the N. E. extremity of Celebes and the S. extremity of the Philippines Isle Mindanao. The group consists of three larger and a great number of smaller islands most of them inhabited, and covered with whole forests of coco palms. Where the ground is cleared, the natives who are very industrious, raise good crops of sugar cane, and other useful plants. The islands are generally mountainous, and betray their volcanic origin not only by their geological formation but also by actual display of volcanic agency. On Deswaga the largest island of this group an eruption took place in 1805, and destroyed all the buildings and cultivated ground for a considerable distance. It has since continued to smother at intervals. On the island of Sinao the volcano of Apo manifests its activity by volumes of smoke and occasional showers of ashes. On Grand Renger the largest and most northerly of the islands, the volcano of Abao which rises to the height of 4000 feet above the sea burst forth in 1812, and emitted streams of lava which poured down on all sides, destroyed many human beings, and converted the northern part of the island previously covered with coco plantations and well cultivated fields, into a desert waste. After nearly half a century of quiescence it burst out anew in 1866 and repeated its former devastation pouring down seven broad streams of lava, and covering the whole district with stones and ashes. Most of the people have engaged at the time in the fields were not killed within the lava streams and having no means of escape perished to the number of 2800. The principal articles of culture and trade are rice, sugar, coco, and coconut oil. The last, which is the great staple, is sent chiefly to the Ternate group. Two of the smaller islands abound in swallows edible nests, which yield no small revenue. The number of inhabitants in the group, exclusive of slaves, is above 21,000. This number falls far short of what might be anticipated but any great increase is prevented by the ravages of small-pox and fever.

SAN JOSE, a tn. S. America, Banda Oriental, on a stream of same name 40 m. N. W. Monte Video. It is a small place of pleasing appearance, with a place on which stands the church, without a tower and a pair of good houses one of which is the post house. Neither the place nor the streets are paved, but there are good side walks raised above their level and paved with tiles.

SAN JOSE, a tn. S. America, Ecuador prov. Oriente on an elevated site above a bank Napo, 900 m. S. E. Quito.

It is the best-peopled place in the interior of the country and carries on a considerable trade but has no public building deserving of notice.

SAN JOSE DEL MORRO a tn. La Plata prov. San Luis, on the banks of a stream with a broad bed full of large boulders but monthly supplied with water, 25 m. E. Macdon. It consists of a number of good houses, possesses a church with neither a tower nor an officiating priest, and contains about 1000 inhabitants.

SAN JUAN DE NICARAGUA or GREAT TOWN (add.) a tn. Central America, state Nicaragua, at the mouth of a river of same name in the Caribbean Sea, lat. 10° 25' N. lon. 85° 48' W. It stands on the frontier of Costa Rica and was claimed by that state as well as Nicaragua. It has been finally ceded to the latter by a treaty concluded in 1860. It is at present a petty place with a pop. not exceeding 1000, but derives much importance from being the E. terminus of a proposed navigable canal to connect the Atlantic with the Pacific Ocean. The communication by water by means of the river San Juan and the lake of Nicaragua, leaves no little land conveyances that an American transit company was established to convey goods and passengers between the two seas. The town instead of profiting suffered severely in consequence of this arrangement having been abandoned and burned in 1855 by a naval force of the U. States, on the charge that the inhabitants had infringed the rights of the transit company. It is said that the harbour has since become choked with sand.

SAN LUIS DE LA PUNTA a tn. La Plata cap. prov. and at the E. extremity of a mountain of same name 195 m. S. E. E. Mendoza. It stands at the height of 5580 ft. above the sea and consists partly of large and elegant houses substantially built, and partly of others of a very inferior description. The church though surmounted by a tower has no other claim to notice. A small body of troops occupies the barracks. The only attraction in the place is the abundance of fine fruit, almost every house of any importance possessing a productive garden in which plants figs, grapes and even oranges of excellent quality are grown. Fossil bones of some of the extinct gigantic animals are found in the vicinity. Pop. about 4000.

SANSAÑE AJBA a tn. Western Africa, Hausa States, on the S. 14 m. N. Kano, 160 m. N. W. Kano. Its advanced and isolated position has made it necessary to provide carefully for its defence, and hence it is surrounded not only by a wall but a dense forest, forming a kind of natural fortification. It has thus become a place of considerable importance, travellers preferring to encamp at it, on account of its greater security though it lies somewhat out of the direct route.

SABANNE MANGU or MANGO a tn. Western Africa, an old settlement of the Mandingoes or Wangarwas, who seem to have migrated to this quarter at an early period and engaged in the gold trade between Kong and Kuka. It is situated about 570 m. N. of the Gulf of Benue and has an estimated pop. of 2000.

SANTA CLARA a tn. U. States, California on the 41 Jose and San Francisco railways 48 m. S. E. San Francisco. It contains five churches a collegiate institute for girls, two public halls and a Jesuit college with about 210 students. Between the town and San Jose, 3 m. distant, is a shaded carriage drive. The manufactures are of carriages, bricks, lime, leather, &c. Pop. 2500.

SANTA CRUZ, river S. America, which is understood to have its source near the E. frontiers of Chili flows E. across Patagonia, and falls into the Atlantic about lat 50° S. Near the above at Weldall Bluff a conspicuous headland 200 feet high it divides into two arms a N. and a W. The former seems to be navigable, even at high water, 12 m. above its confluence; the latter which is the far more considerable of the two and ought evidently to be regarded as the main stream was examined by Captain Stokes for 88 m. At 44 m. up, the head of the tide was reached, and the water was altogether free. The stream with a mean breadth of a quarter of a mile, and a depth in mid channel of 8 ft., ran beautifully clean and pure with a velocity of at least 5 m. an hour, over a bed of pebbles mixed with dark sand. Captain Fitzroy sailed up the river with three light whale-boats, which laboured against the straits by rowing or trawling for 16 days when provisions failing they were obliged to return.

The down voyage was performed on three days. The highest point reached was 140 m. of direct distance to the westward of the entrance, or 245 m. by the course of the river. They were then within 90 m. of the foot of the snow-capped Andes, but the courses of the river seemed still to be distant, as the channel had scarcely narrowed for the last 100 m., while the temperature of the water higher than that of the air, was supposed to indicate that the headwaters were to be found northward in a warmer, and not southward in a colder climate. The spot reached was 400 feet above sea-level. This spread over the whole distance gives an average descent of only 1.6 feet per mile, though in many places the stream ran like a torrent. The tides range 40 ft at springs and 18 feet at neaps and tides from 6 to 3 knots.

SANTA EULALIA a tn. Mexico, prov. and 15 m. S. E. Chihuahua. It has a pop. of about 1500 who subsist chiefly by the working of its mines in a very imperfect and desultory manner. These mines, of which more than 200 have been worked within a space of two square leagues, were the main source of the prosperity of Chihuahua, the population of which rose in consequence to 75,000, though it now barely exceeds a sixth of that number.

SANTA FE or **SANTA FE DE LA YERBA CRUA**, a tn. La Plata, cap. prov. of same name advantageously situated at the confluence of the Salado with the Parana, 230 m. N. W. Buenos Ayres. It stands on a height, the only one which occurs in a district remarkable for its uniform flatness, and is of a rectangular shape, with several tolerably regular but narrow streets and a plaza of considerable dimensions. On the latter stand an ancient and a modern church, and the Cabildo, by far the largest and most imposing building in the town, though displaying little taste and immediately behind a Dominican and a Franciscan monastery each with its own church, making four churches in all. The only other buildings of any note are the guard-house and the market-hall the former surmounted by a tower and the latter in the form of a square, with the sides partly arched over for booths. The whole place has a hideous and deserted look except towards the quay which is solidly built of brick, and giving excellent accommodation to vessels large and small, is occasionally a scene of considerable activity. The principal trade is in hides and in the excellent timber obtained from the forest on the banks of the Salado. Pop. about 8000.

SANTA LULIA a tn. Central America, Honduras, dep. and 4 m. S. E. Tegucigalpa, on a mountain range of same name. It stands embowered among trees in the centre of a celebrated mining district is well built, and possesses a neat white church. The grounds around produce good crops of wheat and other grain, and the mines as the vicinity are still worked, but by processes so rude as to be by no means productive.

SANTA MAGDALENA a tn. Mexico, dep. Sonora, near the bank San Ignacio 80 m. N. W. Ures. It is a pultry place, with about 1000 inhabitants, but is celebrated for its annual fair which begins on the 24 October and attracts thousands from the surrounding country.

SANTA MARIA a tn. La Plata, prov. and 160 m. N. E. W. Catamarca at the height of 7000 feet above the sea. It consists of a principal and two other crooked streets, together with a square on which stands a church in a very dilapidated condition. The houses, built for the most part of mud are very indifferent. Any importance possessed by Santa Maria is due to the copper mines in its vicinity. Pop. 800.

SANTA ROSA a tn. U. States, California, cap. co. Sonoma, on a creek of same name 80 m. N. San Francisco. It is situated in a fine cultivated valley and has a courthouse, four churches, and an hospital. Wine and grain are produced and exported.

SANTA ROSA a tn. S. America, Ecuador cap. prov. Oriente, on the E. bank of the Napo lat. 0° 55' S. lon. 77° 12' W. It was once a place of considerable importance and contained a large population of whites, at present it is a wretched place, occupied only by a few families of Indians.

SANTIAGO a tn. Bolivia, on the S. border of prov. Chuquis, near the frontier of Paraguay. It stands on a hill overlooking the source of the Paraguay, in a district at once fertile and rich in minerals, valuable woods, and medicinal plants. Pop. 1280.

SANTIAGO, two rivers, S. America, Ecuador. The one, formed by several streams which have their most distant source in the E. slope of the Andes, in the district of Omasa, first assumes its own name on receiving the Zamora on the right, flows successively S. E. and E. S. E., forming in the latter direction part of the boundary between Ecuador and Peru, and after a course of about 250 m. of which 100 might be navigated by steamers, falls into the Amazon. The Jivaro Indians, who inhabit its banks are the only serious obstacle to its successful navigation. The other stream, rising on the W. slopes of the Andes, receives the Bogota or Chobachi on the right and the Cayapas coming from Mount Cotacachi on the left, and flows N. W. in a majestic stream till it reaches the island of Tola. Here it is divided into the two branches of Tola and Pastos the latter of which, the more important of the two, is again subdivided so that the whole at last enters the Pacific by three mouths, not far from the S. W. frontier of Guayaquil. Its banks, and those of its affluents, are said to be rich in gold.

SANTIAGO DEL ESTERO (add.), a tn. La Plata cap. prov. of same name, about 15 m. from the E. bank of the Dulce, and near the point where the parallel of 28° S. is intersected by the meridian of 64° E. It is nearly in the form of a regular square, with the plaza situated in one of its angles but nowhere has the least appearance of a capital. The streets are dusty and deserted, and the only buildings which have an air of importance are dilapidated or uninhabited. The cathedral which appears to have been originally a handsome structure, as a mere ruin, in consequence of the falling in of its dome, and the Franciscan and Dominican monasteries, though still externally devoted to their original purposes are occupied only by five monks, three in the one and two in the other. The ground in the immediate vicinity is so sandy as to be naturally unfit for cultivation, but the manner in which it annually recedes from the inundations of the river has so far improved its texture that part of it is laid out in gardens—in which among other fruits, excellent oranges are grown—and part in corn fields, which raise good crops of maize. The only important export is of mules, for which the province is famous. Pop. about 8000.

SANTIAGO DE MACHALA, a tn. Bolivia, dep. and 180 m. N. W. Oruro, at the source of an affluent of the Uruaguazú. It is inclosed by ill constructed walls, and consists for the most part of miserable-looking houses. The only buildings of any consequence are the church and parsonage which contrast strikingly with the general wretchedness. There is no trade, but the wine-shops are numerous and do a thriving business.

SANTOS (add.) a tn. Brazil, prov. and 50 m. S. S. E. San Paulo, on a bay of the S. Atlantic. It stretches for a considerable distance along the bay forming S. E. to N. W. with comparatively little breadth, and is on the whole well built, having several wide and spacious streets containing many elegant and stately houses. Among the public buildings are several churches and monasteries, a town house, custom-house, and two hospitals. Its marshy site, however makes it very unhealthy and the evil is greatly aggravated by imperfect sewerage and the filthy state in which the streets are permitted to remain, the clearing of them even of military notorious as the breeders of fever and pestilence, being apparently regarded by the authorities as a work of supererogation. The harbour which is the best in the province, and the chief outlet for its produce, is theemporium of a very extensive trade, in which the principal articles of export are coffee (the great staple), sugar tobacco hides lard bacon, and other provisions. The only imports are various articles of European and American manufacture. Pop. about 7000.

SARAHAN or **SARAW** a tn. India Buxarilly beautifully situated in a semicircular mountain recess forming a wooded amphitheatre at the height of 7144 ft. above the sea, lat. 21° 50' N., lon. 77° 50' E. The houses are of a very lofty built in the Chinese style, with pent-roofs and balconies and are occasionally embellished with fine wood carving. The principal buildings are a summer palace of the rajah, and a Hindu temple, where, it is said, that human victims were once offered. Sarahan is the N. halt of Buxarilly.

SARAWU a tn. Western Africa, Adamawa, 50 m. N. E. Yola, in an elevated district, on the water-shed which separates

rates the design of Lake Qad and the Kwara. It consists of a K. and a B. village, the former of which, because inhabited almost exclusively by K. people, is distinguished by the name of Sarawa Bawer while the other separated from it by a ravine, takes the name of Sarawa Tufikid. The staples of the market are cattle, ground-nuts, butter, salt, and soap. Cotton is cultivated to some extent. The situation of Sarawa is very important, from its being the point where the road from Logon and all the N.E. of Adamawa, meeting some very considerable centres of industry and commerce, particularly Fawala, the entrepôt of all the ivory trade in these quarters joins the road from Kakuwa to Yola.

SARAYAMO is in Western Africa, cap prov Kine on a navigable affluent of the Niger, 55 m. S. by E. Timbuktoo. It consists of an inner city and a large suburb the former composed of narrow and uncomfortable clay dwellings, and the latter of huts of large size with very low doors. The inhabitants, Follahs possess a great number of horses and the whole place though there is no regular market, and the trade is unimportant, appears to be tolerably flourishing. Rice is the chief article of food.

SAROGARD is an Austrian empire, Hungary 20 and 23 m S by E. Stuhlweiseneburg with a court of justice and 8000 inhabitants, who belong to the Reformed church, and are mostly engaged in weaving.

SAROS (Great and Little) two places, Austria empire, Hungary to Saros—Gross or Great Saros, situated 6 m. N.W. Eperies, on the Tisza was once a royal free town and has a large castle, a high-school, numerous looms and iron mines. Pop 2598—Little Saros situated about 2 m from the former has a mineral spring and 600 inhabitants. On the highest summit of a large pine forest in the vicinity stands the old castle of Saros, which gave name to the country.

SARYKOI (anc. Zelce) is a Turkey in Asia, Anatolia, on the E. slopes of the last outliers of Mount Ida, about 90 m. E.W. Constantinople. It consists of about 900 houses many of them in a state of decay and contains four mosques. There are still some remains of the ancient acropolis, which stood on a completely isolated hill.

SASKATCHEWAN [ad.] a river British America, which, in the upper part of its course consists of two branches a N and a S. The N branch, issuing from the E. end of Glacier Lake, on the E. slope of the Rocky Mountains at the height of 4820 ft above the sea, in lat. 51° 04' N; lon 112° 30' W, flows E along the base of Mount Marchion which has an absolute height of 15 789 feet, then turns abruptly N N W and continues this direction to the junction of Big Horn River. Here it resumes its easterly course and continues till it reaches the station called Rocky Mountain House when it makes another abrupt bend and begins to flow N N E. On reaching the meridian of 110 it bends round and flows first E N E. to Fort Edmonton in lat. 53° 25' lon. 113° 49' and then very gradually but on the whole nearly due E to Fort Pitt, lat. 53° 54'. Here bend round it flows E E in a very winding channel to a point known as the North Branch Elbow where another bend carries it N E past Fort Carlton, to its junction with the S branch at the Grand Forks near the meridian of 105° and about 12 m above Fort à la Corne. The S. branch of the Saskatchewan, formed by the junction of the Bow and Belly Rivers, from the Rocky Mountains, about lat. 49° 40' N lon. 111° 40' W flows N E. to Chesterfield, where it receives the Red Deer, and then eventually E to the South Branch Elbow, near the parallel of 51. Here it bends round to the N E. and maintains this direction to its junction with the N branch above Fort à la Corne, as already mentioned. The main Saskatchewan then flows first N E to the Great Bend on the parallel of 54 and there changes its direction to S.E., which it retains till it enters or expands into Cedar Lake. On issuing from it it flows E, rushes down the Grand Rapid, and pours its accumulated waters into Lake Winnipeg. The N branch which passes over 12 of longitude, is a yellowish turbid stream, flowing with a current so rapid, and in a channel so shallow and obstructed by boulders, as to be very difficult of navigation. At its

Source the Sask.—Vol. II.

mouth it is only 140 yards broad, and discharges 91,011,800 cubic feet of water per hour. Its affluents, though numerous, are too insignificant to require special notice. The S. branch a more important stream, has, 15 m below the Elbow and 334 m from its mouth, a branch of 600 yards in depth in the main channel of 10 feet, and a current at the rate of 2 1/2 m per hour. At its mouth it is 180 yards wide, and discharges 128,425,616 cubic feet of water per hour. Its

GRAND RAPIDS SASKATCHEWAN RIVER.—From Elbow's Canadian Exploring Expedition.

only important affluent is the Red Deer which joins it on the left at Chesterfield. The main Saskatchewan called by the natives Ki si ka chawan sweeps in magnificent curves through a valley about a mile broad and 160 to 800 feet deep. Opposite Fort à la Corne it is 320 yards broad, 20 feet deep in the main channel and flows at the rate of 8 m an hour. At Teasing River 102 W near the middle of its course, its discharge of water is 208 976 000 cubic feet per hour. At its mouth the mean discharge per second is 59 289 cubic feet or 215 440 400 per hour. The estimated area of its basin is 940 000 sq m. At Fort à la Corne it usually becomes frozen in the second week of November and remains closed till the second or third week of April. The basins of the N and S branches are generally too wild and mountainous and of too rigorous a climate, to admit of much cultivation. From the Rocky Mountain House to Fort à la Corne the N Saskatchewan traverses the plains in a valley that varies in depth from 100 to 800 ft and never exceeds 2 m in width. The greater part of this width is occupied by alluvial flats, the river itself rarely exceeding 400 yards in breadth. The alluvial flats, which form the finest quality of land in this part of the country, are often well timbered, but from the manner in which the stream winds from side to side of the valley the "points" as they are termed, seldom are more than 2 or 3 m in extent. The general course of the river is bounded by hills which sometimes recede to a considerable distance, and rise 200 to 400 ft. above the general plains level. At these base are tracts of land of fine quality while the spaces, sometimes of 20 m. between the hills and the river is good grazing land. These natural pastures produce nutritious species of grasses and carices, along with vetches in great variety affording excellent food for cattle during winter, which lasts five months from November to April. The places chosen for settlements and mission stations are all at a distance from the river for the sake of vicinity to the large lakes along the base of the hill country which afford a vast abundance of fish, which are preserved throughout the winter simply by being frozen, and furnish a cheap and nutritious article of food. In the upper part of the Saskatchewan country coal of fine quality is found abundantly and in the same strata iron ore exists. Between Carlton and Edmonton there is no valuable timber S of the river to the N however spruce, fir, pine, and birch abound. The S. Saskatchewan in its upper part called Bow River, passes through a different description of country. After leaving the mountain region it flows in a deep and narrow valley through arid plains devoid of timber or pasture of good quality. The steep and lofty sides of the valley are composed

II

of calcareous marls and clays baked hard by the parching sun. The sage and scotch and other scanty vegetation bespeak the arid nature of the climate. Towards the southern end of Red River with the S. Saskatchewan, there are isolated patches of white land, on which vegetation becomes luxuriant; to the S. of the river, also, about lat. 49° 40' N., at the Cypress Hills, there is abundance of water and pasture, and a heavily timbered slope faces the north. The impatience of this country and its climate in the growth of cereals have not been thoroughly tested. Barley and oats are successfully grown at the settlements, but wheat does not answer owing perhaps to other causes than soil or climate. Harvest commences in September. Wild fowls are so numerous in every direction as to be a serious hindrance to sheep-farming.

SARKATCHEWAN (LITTLE) See RAPID RIVER in June.

SATSUMA, a principality Japan, on W coast of the island of Kiu-siu, in various respects one of the most interesting parts of the whole Japanese empire, and ruled by the most powerful and richest prince of the land. It extends on the S. to Yau Diamen Strait, and includes the islands beyond the strait. The country both in the mainland and the smaller islands is rich volcanic hills, some of the latter 6000 ft. high. One of the small islands is an active volcano rising directly out of the sea to a height of 2524 ft. It contains large masses of sulphur. The province contains iron and copper ore, sulphuret of lead, &c. The Bay of Kagayama bordered by rugged rocks, runs far up into the mainland. The town of the same name situated upon it was bombarded by the British fleet in 1863 in retribution of the murder of an Englishman by the retainers of the prince.

SAUGOR AND NERBODDA TERRITORY, an extensive tract India, lat. 21° 15' and 25° 15' N. lon. 78° 55' and 82° 51' E. bounded, N by Bundelcund, and dists. Banda, Allahabad, and Mirzapore. E. Mirzapore and Kora, S. Nagpore or Berar and the Nizam's Dominions, and W. Banda's Dominions and Bhupalnagar E. to W. 380 m. breadth, 190 m. area, 32,114 sq. m. Within these limits, however, are comprehended the native states of Rewah, Kotea, Myhr Godevya and Subawal. The portion strictly British is of very irregular shape, and has an estimated area of only 20,000 sq. m. The territory is generally elevated being partly covered by Vindhya and Maladoo mountains, which include the N. and the S. sides of the Nerbudda Valley. The greatest elevation is in the E. where Mount Amarakantak rises to the height of 5465 feet. The average height of the two ranges does not exceed 3000 feet. Bundles inclosing the valley of the Nerbudda, they form the watershed between it and two other basins, the drainage of the S. slope of the Maladoo range being carried to the Taptue while the N. Vindhya slope sends its drainage to the Jamna and Ganga. In the E. the prevailing rock appears to be sandstone overlaid in many places with a rich mould producing luxuriant vegetation. The sandstone, an extending westward becomes interstratified with red marl slate, and limestone. Still farther W., about the meridian of 79° a volcanic tract commences and extends over the N.W., where the town of Saugor is seated on its highest part. In the E. among the Maladoo Hills trap also predominates. In some localities granite, gneiss, mica-schist, quartz, and other primitive rocks are seen piercing the overlying trap and sandstone. In the great valley of the Nerbudda there is a large extent of alluvium, intermixed with sandstone, coarse conglomerate, limestone, schist, and laterite. The minerals include both iron and coal. The former is mined and smelted to a considerable extent about 30 m. N.E. Jabalpur; the latter also abounds, particularly on the left bank of the River. The soil in the volcanic tract is very fertile, producing almost every kind of crop, on the alluvium of the Nerbudda rice is extensively grown. The principal domestic animals are a small indigenous cow celebrated for its milk, buffaloes, reared also for the dairy and oxen for draught. Neither horses nor sheep are much attended to. Among wild animals none seem to occur more ravages than the wolf. Manufactures are few and insignificant. A considerable portion of the inhabitants are Gonds, some of whom still live in the woods in a state of savage nature. They have been changed with Christianity, and are known to have been within a recent period, addicted to human sacrifice.

SAUGOR, cap. of the above territory, occupying the highest part of a hilly tract 1840 feet above the sea, 215 m. S.W. Allahabad, is built along the W. N. and N.E. sides of a lake abounding with fish, and frequented by large flocks of waterfowl. It was once defended by a fort which is now used as an ordnance depot, and had a mint, in which 400 men were employed before the establishment was finally removed to Calcutta. It possesses a church, built in the Gothic style, for the accommodation of the European residents, who are more numerous here than in most provincial Indian towns and consist partly of the officers of the native troops stationed here in military cantonments. These, situated on an undulating plain N.E. of the lake, are in some places low and swampy and as a natural consequence unhealthy. The only other building and establishment requiring notice is a sort of collegiate school, in which English Hindoo Persian, and Mahatta are taught. In the vicinity an iron suspension bridge, 200 ft. in span made of native materials and erected by native workmen under the superintendence of a British officer has been erected over the Deem or Dea. The skill thus manifested is further displayed in various manufactures in brass and iron. For goldsmiths work the place has long been famous, more especially for the kind of gold chains known by the name of son-chet. During the survey visiting a number of Europeans, including about 190 women and children, were closely besieged here from July, 1827 to November, 1828 when Sir Hugh Rose relieved them. Pop. about 60,000.

SAUGOR, an isl. India, presid. Bengal near the E. shore of the great entrance of the Hooghly. It is nearly 8 m. long by 4 m. broad, and consists of a low flat of considerable fertility. It was leased by government to a company who undertook to clear it and to begin paying land-tax on the cleared lands on the expiry of 20 years. The undertaking has not prospered, and the period of rent-free tenure has been extended. An iron lighthouse has been erected on the island at Middleton Point, and on the E. side of it there is an ancient temple with a large tank, which is annually visited by large numbers of Hindoos for ritual purposes. Pop. 10,000.

SAINT STE MARIE a vil. U. States, Michigan on the W. side of the celebrated rapids of same name, which form part of the boundary between the States and British America, and through which Lake Superior discharges its waters to the ocean. For a long time these rapids were the only remaining obstruction to a continuous navigation of the whole chain of North American lakes from the St. Lawrence upwards but all difficulties have at length been overcome by the completion of the magnificent locks of the Sault Ste. Marie canal and ships can now sail from European or Atlantic ports and without breaking bulk land their cargoes at Port William at the W. extremity of Lake Superior and, of course, make their return voyage in the same way. The canal is $\frac{1}{2}$ m. in length, 70 ft. wide at bottom, and 100 ft. at water-level, and has a depth of 12 ft. It was completed in May, 1855 and in 1856 was passed for the first time by the *Deer Steamer*, a vessel of 266 tons register, bound from Chicago for Liver pool. Since then the number of sea-going vessels from Lake Superior has regularly increased, and its trade is assuming an importance which the most sanguine scarcely ventured to anticipate.

SAVA OR SAVER (supposed son. Tubed), a tn. Persia, 70 m. E.W. Teheran. It must have once been much more important than at present, as nearly two-thirds of the space within the walls are occupied by masses of debris and crumbling buildings, while the remaining third appears not to contain a population of more than 5000. The only buildings deserving of notice are the mosque and near it a minaret, which has at one time been highly ornamented a large domed structure, called the Chahar Sa, containing a reservoir and the remains of rich internal decorations and a small covered in bazar of about fifty shops, where petty trades are carried on and provisions sold. There is no trade, even transit, as the caravans do not enter the town and the only manufacturers are a sort of wire for which the extensive ruins furnish ample material.

SAVANNA GRANDE, a tn. Central America, Honduras, dep. and 30 m. S.W. Tegucigalpa, in a valley surrounded by black hills. It is compactly built, possesses a paved plaza and an adobe church, and carries on a thriving

trade in brandy, of which large quantities are made in the vicinity.

SAVITREE, a river India, presid Bombay which rises in dist. Rannagerry, 8 Canons, lat. 18 17' N., lon. 78° 27' E. flows W past the town of Mhar and falls into the Arabian Sea at Bhokolo, after a course of about 70 m. It is navigable up to Mhar 80 m. above the mouth and was once accessible at all times for large ships, but the bar has now only 10 ft. at low water spring tides though the depth inside is still 6 fathoms.

SAY a in Western Africa Hausa States 190 m W Sokoto, 1 bank Niger which here, when Dr Barth visited it in June 1858, was about 700, and again on his return in July 1854, only about 800 yards wide. The town is nearly in the shape of a quadrangle, open to the river but enclosed by a low earthen rampart on the other three sides, each measuring about 1400 yards. The large space is thinly inhabited the houses, all of which are of reeds and matting except the governor's, scattered about like so many separate hamlets, and the pop in all not exceeding 8000. A wide shallow depression, bordered by dune-palms almost the only tree within the town or outside, intersects it from N to S. and becoming filled with water in the rainy season, must cause much unhealthiness and prove a serious obstacle to intercourse between the different quarters. In floods the greater part of the whole of the town must be under water, and the inhabitants must necessarily take refuge beyond the borders of the valley. There are scarcely any industrial establishments in Say even weaving and dyeing being greatly neglected and the market is unimportant, though it is much frequented by the natives of W Sudan, whom it supplies, through importation from Souda, with native manufactures, especially articles of clothing.

SAYUI A in Mexico state Jalisco 64 m S. by W Guadalajara. It is a regular and well built place, with 9500 inhabitants who produce large quantities of fine earthenware, and rear great numbers of cattle.

SCARCE (GREAT and LITTLE) the name of two rivers W Africa, which have their mouths about 25 m. N Sierra Leone. Previously a united stream they are divided into two by Curleemo, a considerable island with extensive mud-banks lying in their mouths. Great Scarce is navigable for large ships but Little Scarce is fit only for very small vessels.

SCHADOWITZ (GREAT and LITTLE) two nearly contiguous places Austrian empire, Bohemia, circle and 18 m N E Königgrätz, at the terminus of the branch railway from Josephstadt. They have a pilgrimage chapel sulphur springs, and extensive coal mines, and contain an aggregate population of 1200.

SCHIAH an inlet Persia Lake Urmiah, bearing considerable resemblance to the island of Capri in the Bay of Naples, and forming a most picturesque object when its rocky peaks shapd like sharp-pointed crowns, are seen lowering above the blue-green waters of the lake.

SCHREIBS, a in Austrian empire Lower Austria, circle Upper Wienstadt, cap dist. of same name, on the Elbe with a parish church a Capuchin convent a high-school a castle with many ancient monuments, a town-hospital, a town-house, and various industrial establishments. Pop. 1040.

SCHRELLBERG, a in Austrian empire Transylvania, circle and S E Hermannstadt, cap dist. of same name, with a Protestant high-school, manufactures of linen, and a trade in flax and fruit. Pop. 2565.

SCHENKELDEN, a in Austrian empire Upper Austria, dist. and 15 m N W Linz with a town hospital extensive manufactures of linen, and a pop. of 1000.

SCHILTBERG, a in Austrian empire, Lower Austria, circle Upper Manhartsberg, on the Schiltbach 40 m. N W Vienna, with 1000 inhabitants, who are partly employed in a some quarry in the vicinity.

SCHINTAU, a in Austrian empire, Hungary, co. Lower Neutra, 1 bank Wag, opposite to Feser, with a fine castle, numerous mills, a trade in wine of good quality and 1400 inhabitants.

SCHLACKENWERTH a in Austrian empire, Bohemia, circle and 39 m N E Eger on the Weitzsch with a parish church, a high-school, a townhouse, an hospital, a beautiful meadow with a park a brewery four mills, and iron mines. Pop. 1800.

SCHLUSCHOWITZ a in Austrian empire Moravia, circle Hradisch about 2 m N of Wicowitz with a R Catholic church possessed of a fine high altar a considerable trade in fruit and 1000 inhabitants.

SCHÖNBACH two places Austrian empire, Bohemia, circle Eger. The one, situated near the N W extremity of the empire, on the frontiers of Saxony has a castle a brewery manufactures of cloth and white leather several mills, and 1000 inhabitants. The other about 10 m N Eger, has a parish church, manufactures of calico and muslin hatters' wares cotton, saw and other mills, and 2292 inhabitants.

SCHÖNGRABERN a in Austrian empire, Lower Austria, circle Lower Manhartsberg on the Lower Schmelde, 39 m. N N W Vienna. It has a large church in the Byzan fine style, with bas-reliefs and numerous monuments. Pop. 1160.

SCHÖNNA a in Austrian empire Tyrol circle Brison at the entrance of the valley of the Passer, about 4 m N E Meran. It has an imposing castle belonging to the Counts of Meran and contains 1400 inhabitants.

SCHÖNWALD a in Austrian empire, Moravia, circle and N Olmitz on the Drauzeller, with an old parish church and 2100 inhabitants.

SCHREIBS, a in Austrian empire Lower Austria, circle Upper Manhartsberg cap dist. of same name at the Brunnbach, 71 m N W Vienna. It has glass works and an iron mill and contains 1980 inhabitants, many of whom are weavers.

SCHRUNS a in Austrian empire Tyrol circle circle and 88 m S E Bregenz, on the Ill with important cattle markets, and 1800 inhabitants.

SCHUMITZ, a in Austrian empire Moravia, circle Hradisch not far from Hungarian Brod, on the Olmava, with 1100 inhabitants, who carry on an important trade in fruit.

SCHWANBERG, a in Austrian empire duchy Styria, on the Schwarz Salen an affluent of the Mur 24 m S W Graz, with a castle, a Capuchin monastery and manufactures of inferior matches. There is a mineral spring and lignite is worked in the vicinity. Pop. 1000.

SCHWARZAU a in Austrian empire, Lower Austria, on the Schwarn near the Huneberg 50 m. S W Vienna with iron works numerous saw mills, and a quarry which furnishes grindstones. Pop. 1800.

SCHWARZENBERG a in Austrian empire Upper Austria, in the N W corner of the district of Linz, near the frontiers of Bohemia and Bavaria with glass-works and a paper mill and 1100 inhabitants.

SCHWECHAT a in Austrian empire Lower Austria, cap circle and on a stream of same name, 4 m S E Vienna. It is an industrial place, with numerous manufactures, a cotton-mill and three breweries. In the vicinity is an obelisk commemorating the meeting of Sobieski king of the Poles, with the emperor Leopold I, after the raising of the siege of Vienna. The Hungarians unexpectedly sustained a defeat here in 1649. One of the Roman frontier forts was situated in this locality and had the name of Villa Gai. **SCHWASTIAN (VILLA DE SAN)**, a in Mexico, state Oaxaca, 105 m S by E Cuicatan stands in a fertile district, is well built, and contains 2500 inhabitants, whose chief employment is the rearing of cattle.

SEBRA, a in Western Africa, cap prov Yagha, 800 m W Bokoto. It is picturesquely situated among a thick covert of trees beside a large sheet of water but is a miserable place, composed of about 300 huts without any market or anything to indicate that it is the residence of one who styles himself the lord of Yagha. This personage, when Dr Barth visited the town was sitting in front of his house close to the mosque in the midst of a large congregation, to whom he was reading and expounding some passages from the Koran. All the inhabitants are Fellatah.

SEBOU, a river N Africa, Morocco, which rises in the slopes of the Little Atlas, flows westward through a valley between two parallel chains from which it receives numerous affluents, and after a course of which no lists is known this it is variously estimated at 150 and 250 m., falls into the Atlantic near the ruined town of Melkida. The determined hostility of the natives has hitherto prevented any survey of its mouth, but the large quantity of water which it discharges, as well as the rapidity of its current, may be inferred from the extent of desolation caused by it to a considerable distance seaward.

SECKAU, a m. Austrian empire, duchy Styria, circle Bruck, at the foot of a mountain range of same name, 38 m N W Graz. It has a large Gothic church, with an excellent organ, some fine monuments and two handsome towers; a spacious castle, once the residence of the Bishops of Seckau, considerable manufactures of iron and a powder-mill.

SECKETAR, an isl. New Zealand, on the S W coast of Middle Island or Matarua. It extends 10 m. between N and S, with a maximum width of 3 m. and separates Doubtful Inlet from Thomson Sound forming the N side of the one and the S side of the other. In N.W. corner, forming the coast line between the two is almost straight and has no great a depth of water opposite to it that at the distance of little more than a mile no soundings are obtained at the depth of 300 fathoms.

SEIGOLÉ, a tn India N W Provinces, so close to Meerut on the W that it may be considered as its suburb. It contains the civil establishment, the military cantonment, and the residences of the European population. These residences are substantial, well finished, and commodious. Near their center there is a church with a spire, and in the summit a great chapel, in which the service is conducted in Hindoostanee. The other principal buildings are the courts of justice, the treasury, the jail and the mint. The last, the only one of these buildings possessed of any architectural merit was scarcely finished when the mint itself and the whole establishment connected with it was removed to Calcutta.

SEIDICO, a tn Italy Venetia, 8 m S W Belluno, on an affluent of the Piave. It contains a parish church and a splendid villa with a large garden laid out in the English style. Pop. 3545.

SEIDENBERG, a tn Austrian empire, Bohemia, circle and N W Tabor, cap. dist. of same name; with a parish church a saw-mill and two mills.

SEIDZISOW, a tn. Austrian empire, Galicia, circle and 14 m. N W Krakow on the railway from Cracow with a Capuchin monastery founded in 1740 and 1900 inhabitants.

SEILPRA, a river India, Malwa which rises on the N side of the Vindhya range, in lat. 22° 37' N. lon. 76° 12' E. flows easterly N W, passing Ojain and Mehlpour, and joins the Chambal on the R bank after a course of 120 m. **SEISMAL A**, a tn N Africa, Sahara, on the S slope of Mount Ragula, belonging to the Lled budi Sheikh range, about 25 days S of Algiers on the road to Tinsalah. It is not walled but is a place of some importance containing 3,000 houses, with a pop. of about 1800.

SEGAN FOU or **SEKAT FOU**, a tn. China, cap. prov. Kiang, near the junction of the Koo-ho and Kin-ho whose united stream flows the Hwang to about 85 m. below. It is surrounded by walls, which are about 10 m. in circuit, is entered by gates, of which several are remarkable for height and splendor and contains an estimated pop. of about 500,000. The troops intended for the defense of the N of China have their head-quarters here. The old palace, in which its sovereign resided when Shun was an independent principality null exists. In 1685 a marble tablet was dug up here with an inscription containing Myrae words in Chinese characters. It was headed by a cross, and contained a brief statement of Christian doctrine. It is supposed to have been written by Nestorian missionaries from Persia or Syria.

SEGEBO, a vil. Western Africa, Adamawa, in a well cultivated district within sight of Mount Holmes, 190 m. S W Y Kukawa. It occupies a commanding position on the two edges of a mountain ravine and watercourse, which divides it into two parts, the one of which is inhabited by the dominant Fulbe, and the other by the subjugated Haussa. Ground nuts, of the species called *Apike* in Kanari, here form as large a part of the food of the people as potatoes do in Europe.

They are made into a kind of porridge, which if boiled with milk, is by no means disagreeable. In cultivating them they are planted with regular spaces left between the stalks of one just as beans are grown in many parts of England.

SEHLANDERS, a tn. Austrian empire, Tyrol, circle Brienz, about 85 m. N W Bolzano. It stands at the entrance of a narrow Alpine valley, contains 800 inhabitants, and has an institute of the Sisters of Mercy, a Capuchin monastery and a strong castle. Excellent marble is quarried in the vicinity.

SEHORE, a tn India, Malwa, state and 22 m. S W Bhopal. It stands on a rock of quartz, rising boldly from the plain, surrounded by a large grove of mango and other trees, and is a place of considerable size, with a good bazar and manufactures of printed muslin.

SEINE, a river British America, which rises from Mill Lake in a channel more than 100 ft. wide, flows W through a narrow valley, thickly wooded with *Banksia* pine and poplar of large size, and falls into Beau Bay on the E shore of Rainy Lake after a course of 67 m. Soon after leaving Mill Lake it falls, by a series of seven rapids, 85 ft. in 9 m., then precipitated 24 ft. by two successive steps, and before reaching Beau Bay makes a total descent of 150 ft. by 19 steps, varying in height from 1 to 85 ft. One of its affluents called Fire Steel River has its source in swampy marshes, common to the basins of Lake Superior and Hudson's Bay.

SEISENBERG, a tn. Austrian empire, duchy Carinthia, on the Gail 24 m. S E. Laybach. It has a castle belonging to Prince Auersperg with a square tower, a paper-mill, several flour-mills and contains 1100 inhabitants.

SELEANGSIAN and **TUNGLEANGSIAN** the names of two remarkable masses of rock, China, probably a local name for the former on the E. or S. and the latter on the W. or N. bank of the Yang-tse-kiang, about 14 m. above the town of Tsaping. The river here narrowed to the width of not more than 3 m. forced its way between these rocky barriers, the rugged flanks of which are hewn out in singular pinnacles and steps while their projecting ledges are scraped into battlements. Seleangshan is said to be a resemblance in miniature of the rock of Gibraltar. Its height is somewhere about 500 ft. This pass is evidently the key between the upper and lower sections of the Yang-tse-kiang and properly defended would be impregnable.

SELLE, a territory S.W. Africa Kibumba country between lat. 11° 45' and 12° 40' S. and lon. 14° and 15° E. bounded N by Ambuun, E by extensive unincultivated forests S by Klamandah, and W by the Makgabo desert area, about 2000 sq. m. The surface is generally mountainous, but between the ranges are several large beautiful, and fertile valleys. Those intersecting the mountains nearly at right angles, are the beds of considerable streams, which flow W in directions nearly parallel to each other and render the soil so productive that Selles is regarded as the granary of an extensive barren tract along the sea-coast. Unfortunately the predatory habits of the people prevent them from turning their natural advantages to account and they crown all their enormities with the practice of cannibalism making horrible repasts, not only of many of their prisoners taken in war but of their own aged sick. This small territory is ruled, not by one chief, but by a number all claiming to be equally independent. Pop. about 75,000.

SELMA, a tn. U. States, situated on bank river Alabama, on the Alabama and Tennessee, and the Alabama and Mississippi River railways, 42 m. W Montgomery. It stands on an elevated plateau, which terminates in a steep cliff on the bank of the river and has six churches several public and private schools, a carriage factory two iron foundries, and a trade in cotton of which in 1859-60, it exported nearly 100,000 bales. So abrupt is the cliff above the Alabama that passengers ascend or descend by flights of steps, and goods are conveyed to or from the platform by means of machinery. Pop. (1860) 3177.

SELWITZ, a tn. Austrian empire, Moravia, circle and 9 m. S Brunn, pleasantly situated on the Salsburg. It is the seat of several public offices, and has a handsome parish church, a large and beautiful castle, manufactures of beet-root sugar, a considerable trade in fruit, and five yearly markets. Pop. 2855.

SELVI, a tn. Turkey in Europe, Bulgaria, circle and

110 m. S.W. Widin. It has three mosques, and a pop. of 6000 to 6500.

SEMENDRIA, or **SEMENDRIJA** [old], a town in Turkey in Europe, Servia, cap. circle of same name, on bank Danube, at the confluence of the Jassava, 53 m S.E. Belgrade. It is pleasantly situated, rising in the form of an amphitheatre on a height embraced by vineyards, ranks next to Belgrade as the largest and most important place in Servia, is the see of a Greek archbishop and has some imperfect fortifications, but is poorly built, and is rendered unhealthy by the swamps in its neighbourhood. Its only manufactures are firearms, which are much esteemed. Its inhabitants, amounting to 8229, are chiefly employed in trading, fishing and cultivating the vine.

SEMIPALATINSK, a town in Russian empire, W Siberia, on the frontier between Fomsk and Tobolsk [lat. 50° 30' N, lon. 80° E]. It stands on the E bank of the Irtysh, at the height of 775 ft above the sea and consists chiefly of wooden buildings, facing the river and overlooking the Kirghis steppe, which stretches in the direction of S.W. for upwards of 1000 m. A space of about 150 yards between the houses and the river is occupied by gardens in which melons of large size and delicious flavour are grown without the aid of glass. The space occupied by the town is of considerable extent, as each house, great and small, has its courtyard enclosed by a wooden fence from 10 to 12 ft high with a large gate in the centre. The principal public buildings are the government offices, the custom-house and the barracks. All of them, built, not, like the dwellings of wood, but of brick have an imposing appearance at a distance. The regular garrison is always considerable, as the position of the town with reference to the Kirghis makes it strategically important. The merchants chiefly Tartars carry on a large trade with the Chinese towns of Tchuobuchack and Kule, and also with Bokhara, Kokhan and Tashkent. There is also a large traffic with the Kirghis, who in exchange for black and grey fur skins, black lamb skins, brown oxen and sheep obtain silk dresses, tea, rasulins, and wooden bowls from China. Sales of printed cotton from Kokhan Russian hardware, iron, copper and leather.

SENICA [old], a lake, U. States in the W. of the state of New York, about 25 m S. of Lake Ontario, into which it discharges itself by the Seneca and Oswego. It is a long and narrow expanse, about 27 m. long from N. to S., and only 2 to 4 m. broad, lies 441 ft above the Atlantic, has a depth of 690 ft, and was never known to be frozen over till 32d March 1856. It communicates with the Erie canal and is navigated by steamers which ply between Watkins, its S. and Geneva its N. extremity.

SENKA, a vil. S.W. Africa, near N. or I. bank Zambesi at the foot of Mount Molemwa [lat. 16° 56' S. lon. 31° 20' E]. It is a flourishing village in a country the mountains of which are generally covered with open forest and grass. Many are between 3000 and 3000 ft high with their summits clothed with trees. The country N. of the mountains here is a part of the Zambesi is also called Senge, and its inhabitants Aseaga or Basaga, but they appear to be of the same family as the Manganya and Maravi.

SENKE, a town W. Africa, Kimbunda country, territory Gambia, r. bank Kibango lat. 13° 42' S. lon. 18° 10' E. It is surrounded by a palisade and a ditch, and contains 5000 inhabitants, employed in agriculture and fishing.

SENNA, or **Sena**, a town in S. D. Africa, Portuguese possessions, on r. bank Zambesi, about 125 m. above its mouth [lat. 17° 38' S. lon. 33° 13' E]. It stands in a low plain, with some pretty detached hills in the background and is surrounded by a stockade of living trees to protect its inhabitants from their troublesome and rebellious neighbours. It contains a few large houses some ruins of others, and a weather beaten cross, where once stood a church, a mound shows the site of an ancient monastery, and by the river are the remains of a sand fort. The greater part of the area enclosed by the stockade which is an oblong of 1000 yards by 500 yards is covered with tall indigo plants, cassia, and bushes, and a number of small ponds, filled with green field mud, afford wallowing places for lean and filthy pigs. The air is thus foul, and deprived of circulation, and fever abounds. Among the pigs is a curious variety, marked with yellowish brown and white stripes running horizontally along the body, perhaps belonging relationship to the original

wild pig the young of which are distinctly banded, though the marks fade as the animal grows up. Near the summit of an adjacent hill behind the village a plant, the *Podocarpus forbesii*, is found, the smell of which produces headache and fever. In the vicinity of the town are gardens and patches of wood, the loftiest trees being thorny acacias. The natives, who are tributary to the Zulus, are industrious and active.

We met many natives on the road, says Dr. Livingstone, most of the men were armed with spears, bows and arrows, or old tower muskets the women had short-handled iron bows and were going to work in the gardens, they stepped aside to let us pass and saluted us politely the men bowing and scraping and the women even with heavy burdens on their heads, courtesying a courtesy from barabala standing. But the Zulus or Caffres, here called Landoons taking advantage of the miserable state of the place visit it periodically and levy fines upon the inhabitants, who unable or too cowardly to resist allow themselves to be pillaged without mercy, thus confirming the Caffres in the belief they entertain that the Portuguese are a conquered tribe. Under these circumstances it necessarily follows that trade is all but extinguished. The only period of activity is during the transit of a number of Banyans, or native merchants of India, who come annually in small vessels from Bombay with cargoes of British and Indian goods. About a mile W. of Sena is a remarkable conical hill called Barumana, composed of trap, and commanding a fine view of the surrounding country.

SENOKETECH, a town Austrian empire, Duchy Krain or Carinthia, on the commercial road from Laybach to Trieste, with an ancient castle and 1200 inhabitants.

SEREDNICA, a town Austrian empire, Galizia, circle and about 10 m. S.W. Senok with 1100 inhabitants, chiefly employed in making slaves.

SERGATBI, a town Russian gov. and 83 m S.E. Nijnei Novgorod cap. circle of same name on the Serpashina. It has three churches, a circle school, a charitable endowment several manufactures and contains 3035 inhabitants.

SERGIJEVSK, a town Russian gov. and 66 m N.E. Samara, on the Volga with cold sulphur baths and 5145 inhabitants.

SERINAHUR, **SERINAGUR**, or **SERINAGUR** [old], the cap. of Kashmir situated on the river Jhelum, in the famous valley of Kashmir [lat. 34° 10' N. lon. 75° 0' E]. The houses cluster upon the river banks, or built upon piles project over the sluggish waters, while irregular streets stretch up either slope of the valley shaded by poplars and other trees. Beyond these extends a wide space of blooming garden ground the naturally genial soil being rendered very fertile by careful cultivation. The river is crossed by seven bridges. The town is the seat of a busy population remarkable for their mechanical talent. Kashmir shawls have achieved a world wide reputation and their gun, pistol and matchlock barrels, are of exquisite workmanship. They also excel in the manufacture of paper masks, jewellery, watches, shoes &c. The maharajah's palace is a long labyrinth of brick walls and dingy woodwork embellished by a few gilded domes. The Hurra purwat fort on the high ground above the town is not calculated to resist European artillery. There are one or two mosques or mosques of great antiquity, but the public buildings of Serinagur are not calculated to interest the visitor. The bridges however, are picturesque, built entirely of wood resting on piers formed of massive blocks of cedar, and some having rows of shops on their flanking the footway on either side.—Torrans *Travels in Ladakh, Tartary and Kashmir*.

SEROHEE, a petty state, India, Rajpootana, between lat. 24° 28' and 25° 16' N. lon. 72° 10' and 75° 12' E. and bounded N. by Jodhpur N.E. by Godwar, F. by Deegpore and S. and S.W. by Gujrat; area, 5024 sq. m. revenue, £7600. In the E. and N.E. it is hilly being partly composed of the S.W. slope of the Aravalli range in the E. and S.E. it is mountainous rising in Mount Abo. It was for some time considered a district of Jodhpur, which has not yet abandoned a claim upon it for tribute. The population consists in a great measure of predatory tribes of Minas, Gerasas, and Bhels.

SEROHEE cap. of the above state, 185 m W.N.W. Neemuch. It is built on or near the site of a more ancient city of same name, the ruins of which can still be traced, and is of considerable extent, possessing good brick houses, many

of which however are numerous, and a palace of the ruler is chief, totally devoid of architectural merit. The trade is considerable, and the manufacture are almost entirely confined to sword blades, for which the place has long been famous.

SERPENT ISLE, or *Pine Nas* [add] situated in the N.W. of the Black Sea, opposite to the delta of the Danube, and nearly equidistant from its Kille and Salina mouths, being about 25 m. E.N.E. of the one, and K.N.E. of the other. In itself it is comparatively insignificant, though, in consequence of the high point created upon it, it is sometimes spoken of as the eye of the Danube. It is nearly of the shape of a triangle, about a mile in extent, and surrounded for the most part by precipitous cliffs from 60 to 100 ft. high, with deep water near their base. The rocks composing it consist of siliceous strata, separated by thin bands of friable shale, containing large crystals of quartz, attaining a thickness of 200 ft. and sometimes passing into red paper. Its surface is sterile, but it still justifies its name by the great number of serpents, or rather water-snakes, which live among its cliffs, and subvert on the fish which they manage to catch in the surrounding sea. The island is not devoid of historical interest. The Greeks whose traditions made it the final abode of Achilles, built a temple upon it, which was dedicated to him and became celebrated. On its summit are several blocks of squared marble, which may have belonged to this temple, and in many other parts numerous fragments of ancient pottery seem to tell of an early period when the island must have been inhabited. It also attracted considerable attention at the termination of the Russian war from being actually claimed by Russia and Turkey. By the congress of Paris in 1857 it was finally adjudged to the latter as virtually and necessarily included in that part of Bessarabia which Russia had been compelled to cede.

SERRAVAL, a tn. India, Gujarat, peninsula Kattywar 190 m. S.W. Ahmedabad. It consists of a town and a fort, situated on a stream of same name about 2½ m. above its mouth, and has a harbour which, though bad, commands a considerable trade.

SESEMITSZ a tn. Austrian empire, Bohemia, circle Chemnitz, on the Lauscha, 5 m. E.N.E. Pardubitz, with a parish church, a townhouse, a brewery manufacturers of alcohol, and a mill.

SESEHEKE, a tn. S Africa cap of the Nakoloto 1 bank Zambesi, about 700 m. S.N.E. Liliyanti. The old town now in ruins, is on the bank of the river but another has been built on the same site ½ m. higher up. The site is very unhealthy being productive of fever which has carried off numbers of the natives and was fatal to the mission of the London Society a few years ago. The native produce cultivated in this centre of the continent consists of the holcus sorghum, millet, maize, underground beans, cucurbitaceous plants, sweet potatoes, tobacco cotton, and Indian hemp, but wheat, rice, and yams, the natives have never seen and they have no garden fruits or vegetables.

SESSANA a tn. Austrian empire, circle and 22 m. S.F. Gorz, near the frontiers of the district of Trieste and Vienna and Trieste railway. It is the seat of several public offices, has some trade, and contains 450 inhabitants.

BETIE a tn. N Africa, Algeria, prov and 55 m. W.S.W. Constantine. It occupies a plateau more than 3000 ft. above sea-level on the banks of one of the principal affluents of the Oued Sahel, where the ancient Roman city *Stifis* once stood and having been employed by the French as an entrenched camp because the site of a new town, which has made rapid progress, and carries on an extensive trade. Its weekly market is numerously attended by the Arabs who bring to it grain, wool, oil and honey. Pop 3238.

SEUE-TOWSEZE [the Snowy Valley], China, prov Chekiang, among the mountains, about 45 m. S.W. Ningpo. The country between it and Ningpo is a level and exceedingly fertile plain, producing large crops of rice, and thickly covered with small towns, villages, and fortresses. On approaching the mountainous district, one of the first objects which meets the eye is the pagoda of Koon-k'ow-tu, seated on a hill, the summit of which is about 1000 ft. above the sea, and commands a splendid view. From the pagoda six or seven others can be counted, each marking the position of some ancient city on the plain, or Buddhist monastery on the hills. The

next place reached is Too-poo-dow situated on the Ningpo, where, a few miles above it, ceases to be navigable for boats. About 25 m. S.W. Too-poo-dow is a beautiful mountain pass, called Yang-ling, where, in addition to the common trees of the mountains, the funeral cypress grows in great abundance, and forms a striking feature in the landscape. The neighborhood is rich in iron ore, which occurs in the form of black sand, and is smelted at a place called Sien-k'he, in furnaces about 5 ft. high and 3 ft. in diameter, for which the fuel used is charcoal, and the blast is made in bellows. The cast iron, run into moulds about 1 foot square, and 1 inch thick, is afterwards converted into malleable iron in blocks 4 inches long, 3 inches wide, and 1 inch thick. The Snowy Valley about 10 m. beyond Too-poo-dow is at first somewhat unpromising, but after a winding ascent for about 6 m. the scenery becomes varied and beautiful. On every side are hills and mountains of every conceivable shape, some peaked, precipitous, and barren, and others sloping gently, and covered densely with pines and brushwood while a stream winds its way to the north. The point thus reached is not the terminus, but only the entrance of the Snowy Valley, which lies a little beyond, at the height of about 2000 ft. above the sea. It is enclosed at all sides by mountains except towards the further extremity, where the mountain stream which drains it plunges over a precipice some 800 or 400 ft. below and forms a series of noble falls the water long before it reaches the bottom being converted into showers of spray. The temple of the Snowy Valley is an old and dilapidated Buddhist building occupied by a number of priests, but possessing nothing within or without to entitle it to special notice.

SEVASTOPOL, or *Sevastopol*. [add] was originally nothing more than a Tartar village until the emperor Catharina commenced in 1780 the works which her successors completed, and which made it a beautiful city and the chief naval arsenal of Russia. It was then 1 m. long and ½ m. broad, rising from the S. shore of the harbour in the form of an amphitheatre. It possessed a basin, dry docks, and quays, and immense magazines and warehouses belonging to government, and was strongly defended both by land and by sea. On the south the port was defended by six batteries, and on the north were four batteries, altogether mounting before the war 850 guns, but during the siege the number was immensely increased. The original defences on the land side were not so formidable but new earthworks and batteries were rapidly and continually erected during the operations. When the allied English and French armies invested the city in September 1854 the English occupied a high bare plateau overlooking the city and the French were placed W. of them on the lower slope of the plateau and on a level with the Russian defences. On October 17 the bombardment of Sevastopol was commenced by the allies by both land and sea. The land attack produced little effect upon the Russian defences and by sea the allied fleets were prevented from effective co-operation by the shoals that obstructed the mouth of the harbour and by a blocking up of the entrance channel by seven vessels sunk by the defenders for the purpose. After this unsuccessful attack the allies settled down to a regular siege, and operations were prolonged with varied success and many important engagements the battle of Balaklava on October 25 and that of Inkermann on November 4, among them. During the winter the condition of the allied armies was very severe, unprovided with proper and sufficient shelter, and inadequately supplied with provisions and other necessaries, in addition to the laborious deep operations, the troops were overwhelmed with disease and suffering, borne nevertheless with heroic fortitude and patience. With the opening of 1855 Sevastopol was acquiring new defensive strength, every available piece of ground being fortified, and counter works were as actively pushed on by the allies. On April 9 a second bombardment of the town was made, but with no useful result. More active measures were then adopted, the land forces furnished a body of 15,000 men, and the fortress was now closely invested. On June 7 the French assaulted and captured the Malakof, and on the 18th a general assault upon the line of defence was only partially successful on the side of the French, but was a signal failure in the British attempt to capture the Redoubt. The Russians in the meantime were becoming hard pressed, their sources of

supply in the sea of Asaf having been destroyed by the allies. On August 18 they made a fresh endeavour to raise the siege in the battle of the Tchernaia, in which the front was borne by the British and French, but the endeavour failed, and the assailants were heavily repulsed by the allied forces. The allies then made preparations for an attack upon Sevastopol which should be final and successful, and mid day when the Russians were accustomed to withdraw under shelter for their meal was the time fixed. The French assaulted the Malakoff and speedily captured it, as well as the other works allotted to them, but the British were again unsuccessful in their attempt upon the Roden, owing partly to bad arrangements and partly to the Russians being on the alert and ready to repel them after the French attack. Sevastopol after

the capture of the Malakoff and other defenses, was now at the mercy of the allies, and the resistance of the Russians could only be prolonged for a few days at the most. The defenders, however, determined to leave nothing but ruins for the capture, and on the evening of the 9th Sept. they commenced their passage in boats and by the bridge to the N side of the harbour, and when all were safe the work of destruction was begun. Magazines and stores were blown up, streets and squares were enveloped in flames; the remainder of the fleet was scuttled and sunk and the bridge removed, and on the morning of the 9th the allies, approaching as close as the fire and ruins permitted beheld only the funeral pyre of Sevastopol. Subsequently the extensive docks, and other naval and military works, which it had

taken the Russian government long years to construct were effectually destroyed by the allies and Sevastopol no longer existed as a stronghold. In December Russia made overtures of peace and on February 26, 1855, an armistice and the terms of peace were agreed upon. The final evacuation of the Crimea took place on July 12 on which day the British commander-in-chief formally restored Sevastopol and Belaklava to the Russians. Sevastopol thus deprived of all that gave it importance, has become a comparatively insignificant place, though considerable efforts have been made to repair the damage which it sustained during the war. Most of the S side has speedily been rebuilt on a new plan forwarded from St. Petersburg. On the site of the six bastions which formed the outer fortifications and were long and ably defended, hospitals and almshouses for invalided soldiers and sailors have been erected, the communication between the N and S sides of the town is now maintained by means of a handsome chain bridge which stretches between the former forts of St. Nicholas and St. Michael and the small huts which occupied the greater part of the sailors suburb, have been replaced by large symmetrical houses. To give more solemnity to this work of restoration, and improve the S side of the town has been consecrated anew by the archbishop of Cherson and Tauris. The position of Sevastopol, however, makes it all but impossible that it can ever acquire much commercial importance.

SEVEN ISLANDS, a bay and group of isles British America, N side of the Gulf of St. Lawrence, about lat. 50° 20' N, lon 66° 30' W.—The bay remarkable for its wild beauty is about 6 m. long 2½ m. wide at its entrance,

and nearly landlocked by the islands and a bold peninsula at its N. extremely rising 737 ft. above the sea, the bottom is of clay and without shoals so that the bay forms one of the best and most sheltered anchorages on the N. shore of the gulf. From the E. point of the bay a broad shelving sandy beach fringed with white and balsam spruce, the boundary of a forest covering the flat country behind, extends to the river where the settlement is and between the bay and two ranges of hills 1300 to 1700 ft. high, some distance inland lies a considerable extent of lowland. The bay has always been a great resort of the Montagnais Indians.—The relations beautiful at a distance, on a nearer view are rugged and barren. The summit of the largest is 700 ft. above the sea and two others rise 600 ft. and 457 ft. So bold are these islands and so suddenly do some of them rise from the sea, that there is no anchorage close to them on the seaward side.

ST. YAGUR, or KUNOOK, a river India, which rises in the Doab in dist. Allypore flows S. E. in a very winding course, and joins the Jutna on its N. bank, about 15 m. below Calcutta. Its total length is about 210 m.

SEYPAN an isl. of the N. Pacific, belonging to the Ladrones or Mariana group lies 3 m. N. E. of Tinian, and has a peak which rises to the height of 2000 ft., forms a very conspicuous object. Its only village, situated on its N. side, contains about 200 inhabitants, most of them fine young men from the Caroline Islands, who go almost naked, their only piece of dress being a narrow slip of cotton round the lower part of their bodies. Seypan is annually visited by three or four whalers, which anchor off its N. W. shore, outside a long reef stretching southwards towards Tinian.

SPAX or **SAFON** (add.), a tn. N Africa, regency and 1400. R.S.E. Tunis, beautifully situated on the N.E. shore of the Gulf of Gabes. It is surrounded by a lofty wall, and consists of two parts, the one, called El Bled, inhabited exclusively by Mohammedans and the other called El Bledh, inhabited by Christians and Jews. El Bledh is a comparatively insignificant place, having only 1500 inhabitants, whereas El Bled contains nearly 13 000 and in respect both of its size and its buildings, ranks as one of the prettiest places in the regency. The manufactures consist chiefly of woollen and cotton tissues, and the trade, which embraces a large extent of country, is very important, though the harbour is so bad that vessels lie exposed nearly a mile from the shore. The principal articles of export are wool oil, basins, sponges, dates, almonds, and dry fruits.

SHARA, a tn. Russia, gov. Bessarabia, circle and not far from Akermann with a church and 1400 inhabitants. The vine is extensively cultivated in the vicinity.

SHARAZ, a tn. Turkey in Europe. Boeris cap circle of the same name, on the Rive, 57 m. W.S.W. Belgrade. It is the seat of a court of justice and the see of a bishop, and possesses a gymnasium. It was once a strong fortress, and was inundated by a large ditch and a palisade. The culture of the vine and the rearing of cattle are the chief employments. It contains a pop. which amounted in 1834 exclusive of the Turkish garrison, to 3920.

SHADRINSK, a tn. Russia, gov. and 31½ m. S.E. Perm. cap circle of same name, 1 bank Isnet. It has three churches, a circle school two charitable institutions, several factories, particularly for smelting tallow an important trade and three variety markets at which large quantities of goods are sold. Pop. 486.

SHAHABAD two places, India.—1. A tn. Surhid 1 bank Bureosky in lat 30° 10' N. lon. 76 56' E. It contains nearly 3000 inhabitants and possesses a good bazar but is described as little better than a heap of silt and ruins.—2. A tn. Oude 82 m. N.W. Lucknow. It is a considerable place, built chiefly of brick, and proving by its remains of fortification that it must once have been more important than at present. Its palace was strengthened with towers like a citadel and it had also a fine mosque. At present it possesses a bazar.

SHAHJAHANPOOR three places, India.—1. A tn. Sindia's Dominion 1 bank Thir 55 m. N.E. Ojien. It is a considerable place, with an important trade carried on chiefly by the Borohe, an intelligent and wealthy class of Musselman merchants.—2. A tn. N.W. Provinsia dist and 21 m. N.E. Meerut; with a dilapidated fort and a bazar.—3. A tn. N.W. Provinsia, dist Cawnpore 12 m. N. Calpee, with a bazar.

SHAHSEZ, or **SHAHSE**, a tn. China, prov. Honan on the Yang-tse-kiang about 170 m. above the point where it commences with Lake Tang-chay. It is built on the embankment on the left side of the river and extends along it to upwards of 3 m. On the banks and in all the creeks lie junks at anchor some of them of large size and all so closely crammed together as possible. Numerous boats from the W. come down the river to Shaks, bringing sugar pepper salt, opium, tobacco, and hemp and carrying back cotton, as well as some of the articles imported at Canton. Shaks is only considered as the port of Kinohor, which is situated 1 m. inland, and is said to be a place of much more importance. The pop. as stated by a mandarin, is 600,000 but it is suspected that he has at least doubled the real number.

SHAKABABA, a tn. N.W. Africa. Kribunda country territory Gelaenge, lat. 14° N., lon 16 E. It is surrounded by a palisade and a ditch, is finely shaded by lofty incense trees, and contains 1500 inhabitants.

SHANGHAI a foreign settlement on the mainland of China, adjacent to the walled city of the same name, but perfectly distinct in its boundaries government, and commerce. The name signifies 'upon the sea' and there is data in Chinese history that goes to prove that at one period the site whereon it stands on the r. bank, at the mouth of the Yangtze River, was reached by the waters of the Pacific Ocean. Now it is distant 35 m. from the sea-coast, and surrounded by navigable creeks that intersect the delta, so numerous that within a circuit of 50 m. there are not less than 8000 to 2500 m. of water communication; and if the

ditches for irrigating the land be taken into account this network of waters may be doubted. The widest of these creeks is named the Whang-poo, which is about 8 m. wide at Shanghai, and increases to over 1 m. at its outlet into the Yangtze, at the port of Wooming 14 m. distant by water, and 8 m. by land. From the immense volume of water flowing into these creeks at their upper junction with the Yangtze, the water is perfectly fresh to the Whang-poo. The settlement stands on the left bank of that stream, below the

walled city from which it is separated by a moat, with several bridges across it, and, again, is divided by two smaller creeks, the Yang-kue-Pang and Boonchoo Creek—the latter being from 150 to 200 yards in width with one stone and one wooden bridge across it. These water boundaries divide the settlement into three sections, each under the jurisdiction of the following nationalities—the upper French the middle British, and the lower American. They are commonly called cosmopolitan but no portion of the land has been ceded by the Emperor of China the foreign residents being merely renters of the soil who have purchased the rights of the former native occupiers and are subject to the same trifling annual tax paid by those to the government. At the same time they hold their title to the land under a code of regulations drawn up by the treaty powers, and sanctioned by the Chinese government, whereby they cannot be dispossessed of their claims by the Chinese while they are at liberty to sell or let the ground with any buildings thereon, to the native inhabitants. Moreover this applies to the subjects of other nationalities who have concluded treaties with China besides the three already mentioned. The British section is not only the most valuable and covered with the largest number of buildings, but the consulates of all the other nations are sit-

ated there, except the French and American. Along the bank of the Whang-poo extends a wide broad' or quay, with a bulwark of stone, and numerous stone jetties, for landing and loading cargo; while the quay forms a promenade for the residents, from 50 to 80 ft. wide. This footage is nearly 1 m. in length, along which range the foreign houses—places of residence as well as business. These are chiefly spacious mansions, built mostly in the Italian style of architecture, which give an air of elegance and wealth to this otherwise unpretentious side that is seen nowhere else in the Far East. For a quarter of a mile back they extend more or less, each being surrounded by a wall inclosing a garden presenting the aspect of a fashionable suburb in London. Here are extensive 'goldens' or warehouses for storing imported merchandise, and preparing tea and silk brought from the interior for export. There are no European shops in the thoroughfare, which consists of narrow roads from 30 to 35 ft. wide, laid out at right angles with walls more or less on either side and occasionally a narrow footpath. These roads are macadamized, but the nature of the ground is such that the metal sinks in the soft mud, and during heavy rains or high tides the water comes up through the drains, flooding the lowest parts of the buildings. There at any time water may be found by digging from 1 to 5 ft. deep. Below this mud is a tenuous clay into which piles are driven to obtain a secure foundation not only for buildings but the walls that surround them—all of which are built of small black bricks, dried in the sun, but very durable. A system of underground drainage has been constructed but it is very defective, in consequence of the level nature of the site. This general plan of the settlement is carried out to the westward for about three quarters of a mile extending from N to S the same distance, the greater portion of the area being densely covered with Chinese houses, the property of the foreign residents. Here the aspect of the roads is completely changed by the continuous streets of native shops displaying every description of European and Chinese wares suitable for the foreign and native consumers. Through the middle of this quarter runs the Maloo (horse-road) from 50 to 60 ft. wide, where a market is held in the morning for the sale of poultry, fish, vegetables, and all other kinds of provisions. A busy and industrious population throngs this quarter from sunrise to sunset, who enjoy all the privileges of their own country with the protection and advantages of the others. On the other hand they are obliged to comply with the land regulations and local laws established for their control which in some respects differ from the clauses referring to foreigners. For this purpose a municipal council is elected annually by the foreign renters, comprising subjects of all nationalities except French, who elect a chairman and appoint a staff of officials, similar to that of an English municipality, chiefly for the maintenance of roads, bridges, jetties, &c. and lighting and cleaning the settlement. They have also the appointment and control of the police which consists partly of Europeans and partly of Chinese. To meet the expenditures, they are empowered to levy taxes upon the consumers of tenements native and foreign, and wharfage dues upon imports and exports—the former varying per annum from £30,000 to £25,000 and the latter from £10,000 to £15,000. This includes the revenue of the American section of Shanghai, which is incorporated for municipal purposes with the British division, but the French 'commune' has a council of its own, specially under the control of the consul for France at this port. In extent the latter section is about half the size of the British and about as densely peopled by Chinese, while the American portion, named Hong-quai, extends nominally over a greater superficies than the two others together, but thinly populated, with comparatively few native or foreign houses. According to a detailed census of the population taken in March, 1865, the following general results were obtained, which have not altered materially since—British and American sections, including the army (1916), navy (593), and mercantile shipping (9931) 51,929; of whom 280 were females, and 107 children comprising 15 nationalities, namely, English, 2993; Americans, 407; Germans 249; Danes, 30; Spaniards 181; Italians, 10; Dutch, 37; Portuguese, 113; Norwegians, 23; Swedes, 60; Russians, 22; Swiss, 22; Greeks, 7; Austrians, 6; French 38; Mexicans, 1; Persians, 1; and Arabs 4. In the French section exclusive

See Int. Gaz.—Vol. II.

of the army and navy the foreign population number 460 persons, of whom 101 were women and children belonging to eleven different nationalities. Of the native population in the British section 48,490 resided on shore, 9709 in boats, and 3900 vagrants of whom 15,456 were females; in the American section 17,466, all living on shore, making a total of the two districts, 77,945; but the council considering that the Chinese residing being enumerated to the extent of one-sixth, this percentage was added forming a total of 90,587. In the French section the returns furnished a total of 55,645, making a grand total of 146,232 Chinese and 5589 foreigners. The subjects and citizens of each nationality are under the protection of their respective consuls and amenable to the jurisdiction of their courts or where the person has no consul to appeal to he is amenable to the Chinese authorities. It was a question whether Chinese in foreign employ were exempt from imperial jurisdiction, and it has been decided in the affirmative. The following consular flags may be seen fluttering in the breeze along the 'bund'—British, French, American, Prussian, Swedish, Norwegian, Russian, Netherlands, Belgian, Portuguese, and Spanish. On occasion when any matter affecting the general interests of the community is mooted, the foreign consuls meet in a body and pass resolutions, or make representations to be forwarded to the Tao tai of the walled city and the ambassadors at Peking. This functionary who is both governor and chief magistrate of the city and district, has judicial power over all the Chinese in the settlement, except where British interests are involved when the case is tried before a mixed court at the consulars and if the Chinese offenders in petty cases are convicted they are sentenced to hard labour on the roads of the settlement. Previous to 1865 all cases civil and criminal were tried by the British consuls, vice-consuls, and their assistants, but these accumulated to such degree that the rapid growth of the settlement that the home government sent out a complete judicial staff forming at Shanghai a supreme court, with jurisdiction over all British subjects in China and Japan and removing the court of appeal from Hong Kong to the settlement. The subjects and citizens of other nations are tried by their respective consuls. This motley community of foreigners having equal rights on Chinese ground gives to Shanghai settlement a domestic and public character which nowhere else exists. Consequently there is no united system of government able to command the respect of the Tao tai, the are despised of the worst class, giving greater trouble to the authorities than the whole native population.

The port of Shanghai extends from the upper limits of the Whang-poo below the native shipping to Woo tung a distance of 14 m., of which the anchorage for foreign vessels extends for 4 m. below the settlement. The anchorage is divided into nine sections, defining the foreign from the Chinese boundary where all the vessels are anchored abreast, and lateral according to their position, vessels being separated from sailing ships. A foreign harbour master is appointed by the Chinese authorities, who retain complete control over the conservancy of the harbour and its entrance, and collect all shipping dues, duties on imports and exports, &c. through the imperial foreign maritime customs. This institution arose out of the troubles of the government, when in 1853, the native customs was suspended while the city was in the occupation of the Taipings. A treaty was drawn up and a foreign protectorate established in July 1864, which proved so beneficial to all concerned, that on the ratification of the Tientsin treaty in 1858, its jurisdiction was extended to all the open ports, such under the management of a consular commissioner, and the whole under an inspector-general, most of whom are British subjects. At this port the number of employees is about 80 of whom from 50 to 80 are English. During the year 1864 the number of foreign vessels entered inwards and cleared outwards was 5562, making an aggregate of 1,670,809 tons carrying imports of general merchandise valued at \$21,010,787 and exports of tea, silk, cotton, and other products of \$13,282,589, realizing a customs revenue of \$280,776. In 1865 and 1866 commerce declined on account of over-trading but there is every prospect of the port maintaining its title of the commercial capital of China. Its position near the silk districts with which it is connected by magnificent water communication, and lying at the mouth of the Yangtze river, makes it the chief outlet of the tea-dis-

trials on the tributaries of that river. Moreover, its central position with regard to the northern ports, and the open ports in Japan, will necessarily make it the centre for imports to be transhipped thence. Although the international trading with this port are numerous, yet it may be said that the British are the only importers. In 1865 they introduced goods to the amount of \$12,000,000 sterling, of which the principal item was opium from India, and next to that Manchester cottons, the remainder being general merchandise—the former representing not less than \$5,000,000. France brings nothing to Shanghai, and takes away only a small portion of the silk that supplies her looms. Out of 45,000 bales exported in 1865 France purchased 7300 bales, of which no more than 2500 were shipped by French houses. The Americans are the next in importance to the British, and they excel in establishing steam traffic on the rivers and coast, and recently a line of 4000-ton steamers has commenced running from San Francisco to the ports in China and Japan. Between thirty and forty steamers ply regularly to and from the riverine and coast ports and Shanghai, solely American. They are likewise the only shippers of tea, after the British. Although the tea-districts are situated from 500 to 1000 m. from Shanghai, yet the export exceeds that of all the other ports in China. In this important branch of trade, as well as the export of silk, the native merchants work in harmony with the foreigners, and each class is satisfied with the trade that falls to its share. Nowhere in China have the wealthy inhabitants such faith in foreign transactions and in foreign protection as in Shanghai. During the years 1861-2 the Taiping rebels threatened the city and settlement with an armed force of 80,000 men when it was defended by British and French troops and men-of-war. The Chinese looked to the settlement from all parts with their families and treasures until the population increased to half a million and the amount of silver in coin and ingots was incalculable. This created a transient degree of prosperity which can only be compared to the sudden increase of wealth in the gold regions of California and Australia. Land increased ten times and even a hundred fold in value, as the exulting fugitives paid fabulous rents for the houses within protection of the British army. When the rebels were driven beyond the boundary of 30 m. by our troops, and the rebellion finally suppressed by an army of disciplined Chinese under Colonel Gordon, the refugees returned to their native places and the value of land and dwellings returned to something like its former position. Many foreigners who had amassed great wealth were ruined and whole streets of Chinese houses were unoccupied. At the same time the overtrading in tea caused some of the oldest firms to become bankrupt and otherwise checked the banking and mercantile operations in 1866, since when they have been slowly recovering in the aggregate. The following table exhibits this phase of the foreign trade of Shanghai, compiled from the Chinese customs reports:—

	1864	1865	1866
Imports,	\$12,520,000	\$12,520,000	\$12,520,000
Exports,	\$12,520,000	\$12,520,000	\$12,520,000
Total,	\$25,040,000	\$25,040,000	\$25,040,000

Here are the chief mission establishments in China. That of the London Missionary Society has a printing office for publishing religious works in Chinese, from which was issued in one year half a million copies of the New Testament for gratuitous distribution or at a small charge. Connected with the mission is a hospital for the gratuitous care of native patients, under the charge of a medical missionary where many thousands attend during the year. The American Presbyterian Mission not only print in Chinese, but manufacture the movable type. There is an extensive mission, also, under the auspices of the French Société de la Propagation de la Foi, where the missionaries conform to the dress and manners of the Chinese, with an extensive establishment near the walled city, having a cathedral within its precincts, capable of accommodating 8000 people. Besides this, the French have a handsome church in the western end under their charge. In the British concession there is an English church with the chaplain as incumbent and several chapels and meeting houses are scattered over the other parts of the settlement. Here also is a public library and a branch

of the Royal Asiatic Society which publishes its transactions. Of newspapers there are two issued daily one twice a week, two weekly, and one fortnightly. The oldest is the North China Herald, established in 1851; and at the same office a newspaper is issued twice a week, printed in the Chinese character. The British consulates and the foreign customs, likewise issue reports and returns connected with their affairs.—(Consular Reports, Customs Returns, Monthly MS Notes.)

SHAN TUN, or **Trinow** is in China, prov. Quang-tung about half-way between the Canton and Western Rivers, and about 4 m. back from the channel which connects them. It consists of a walled city about 2 m. in extent, and suburbs of still greater extent. A creek passing through the heart of the suburb and sufficiently deep for pinnaces, is spanned by two well-built granite bridges of three and five arches. The city walls are 25 ft. high, but without embrasures, and have at the base a thickness, including facing and earth-work of not less than 30 ft. For the purpose of arresting fire double walls run through the town, which contains many good shops and several handsome yamens, has clean streets, and appears from the bustle and activity displayed in them to be densely peopled.

SHAO-KING or **TERAO-KING** is in China, prov. and 60 m. Quansong or Canton 1 bank Si king, 80 m. from the sea at Macao; lat. 25° 3' N. lon. 113° 3' E. It consists of a walled city of the second class, and an extensive suburb lying to the westward, in one of the finest towns in the province and was once the residence of a governor whose jurisdiction extended over both Quansong and Quansong. About 8 m. below Shao-king the Si king flows in a deep channel through a magnificent mountain pass, 24 m. long. The district is famous for tea, and the grass which is woven into

SHARJAI is in, and port, Arabia, Oman esp. prov. of same name, on the Persian Gulf; lat. 25° 30' N. lon. 50° 36' E. The harbour is a narrow creek adapted only for small vessels and the town, which is walled in on the land side, is open towards the creek. The old or central town consists mainly of brick or stone houses, and long rows of cottages, half wood, half palm-leaf and chiefly tenanted by fishermen and sailors, extend along the beach especially northwards. Towards the N. end of the town is the large marketplace divided into several quarters, near the centre stands a long and lofty vaulted building strongly constructed, with iron bound gates, and a guard within which is kept the government treasure. The shops are neat and well built, with raised stone counters, and shelves as in Bombay or Madras they display Cashmere shawls, Bombay manufactures Persian arms, and jewellery of various kinds. The N. quarter of the town has a large number of weavers, who make the long red cloaks common in Oman, cotton robes, carpets, and curtains. Beyond the walls stretches a large extent of sand, sloping and studded with palm-trees, with an occasional garden, but the soil is too light to produce much. Sharjah is the centre of a large export and import trade being the chiefemporium for wool, cotton, and metal and the sale of domestic and foreign goods; and it is also the principal slave-market of the inner Persian Gulf, and through it are imported the goods of Persia and India. Hence a large population of many races is attracted and were the harbour better adapted for shipping, it would rise into a place of considerable importance. Pop. 20,000 to 30,000.

SHARKOI or **SHOR**, is in European Turkey in the N. of Turkish Bazar, about 25 m. S.E. Mena. It contains 8000 inhabitants, who are mostly employed in the manufacture of carpets.

SHAYLI is in Russia, gov. and 80 m. N.W. Kovno, esp. circle of same name; with two churches, a gymnasium, a circle school a charitable endowment, and 5844 inhabitants.

SHFOYGAN, a tn. L. States, Wisconsin, on the W. shore of Lake Michigan at the mouth of a stream of its name 48 m. N. Milwaukee, with which it is connected by railway. It possesses seven churches and carries on a very extensive trade particularly in timber. So large a proportion of the inhabitants are Germans, that two of the four newspapers published in the place are in their language.

SHEKDIAC, a tn. British America, New Brunswick co.

Westward, at the mouth of a small river in a bay of same name, on Northumberland Strait. It is a small but thriving place, well situated for trade, as its harbour is the easiest of access and access on this part of the coast, and the only one to which a vessel in distress can safely run for refuge. A railway has been made to Moncton, a distance of 14 m., where by communicating with the Pictoucoad, which falls into the Bay of Fundy, it saves the transport which would otherwise be necessary round the peninsula of Nova Scotia. It has been proposed to join the same object still more effectively by means of a ship-canal. Shediac Bay abounds in oysters and other shell-fish.

SHEEMOGA or **SIMOGA**, a in India presid. Madras Mysore, L. bank Tunga here navigable during the rainy season, 180 m. N.W. Seringapatam. Till destroyed by the Mahabata in 1798 it was a large and flourishing place containing about 30 000 inhabitants. Though now greatly diminished it is clean, well-drained and apparently thriving.

SHEIPU, a in China, on the E. coast of prov. Chekiang, lat. 29° 12' N. lon. 121° 50' E. It is surrounded by deep dated walls, and consists of very indifferent houses and shops, but derives some importance from being a convenient stopping place for the coasting trade. Its harbour formed by the mainland and Nyew-tow Island, has an entrance at its W. end into San-ma Bay, and another in the S. leading into the bay W. of Leaning Island. At high water the harbour has the appearance of a splendid basin, but at low water dries a far out as to become a mere expanse of mud with a small strip of water in its centre.

SHEKAWUTTEE, a state or rather collection of petty states, India, Marathas, between lat. 27° 20' and 28° 35' N. lon. 74° 55' and 76° 10' E., and bounded W. by Hikaner N.E. by Loharo and Jajhar S.E. by Jeypoor and Patna and S.W. by Jeypoor length, N.E. to S.W. 65 m. breadth, 63 m. area 8895 sq. m., revenue about £230 000. It is an arid barren tract, composed of either sandy wastes or rugged hills and mountains. In the valleys there is some fertile soil on which several kinds of grain, pulses, red pepper, and hemp for cloths are grown. The inhabitants a semibarbarous race with a mongrel religion partly Hindoo partly Mahomedan, have long been notorious freebooters, but efficient means have at last been taken to check their depredations.

SHELIF or **Uad-Sakary** a river N. Africa the largest and most important in Algeria rises on the N. slope of the Jebel Amour near the village of Boud, lat. 34° 26' N. lon. 2° 10' E. At first it has the same of Moka which, while proceeding almost due N., it exchanges successively for the names of Herda and Fagun and passes through the sandy eastern portion of the Algerian Sahara. On approaching the high land of the coast, which has an elevation of about 1600 ft., and passing round Mount Gontas which attains the still higher elevation of 3300 ft. it takes a W. direction and continues it to its mouth in the Mediterranean, near Mostaganem.

SHELLALA, a in N. Africa Algerian Sahara, in a small oasis of same name irrigated by numerous springs 170 m. S. by E. Ouan. It is surrounded by a wall with two gates, consists of about 100 houses constructed of earth and possesses a small mosque and a school. The principal articles of trade are tobacco, which is grown to some extent in the large and beautiful gardens of the interior and tar, obtained from the *arar* (*Juniperus phoenicea*).

SHELANDOAH [add], a river, U. States, which is formed in Virginia by the junction of three streams near Fort Republic, flows N.E. through the valley of Virginia, along the W. side of Blue Ridge, and nearly parallel to it, and immediately below Harper's Ferry joins the Potomac of which it is the principal tributary. Its length from Fort Republic is 170 m. the greater part of which is navigable for small boats. It furnishes a large amount of water-power.

SHEKOTTAH, a in India, presid. Madras dist. Travancore, about 70 m. S.W. Madras. It stands near the E. entrance of the sea of Perakulam, and, though covering a considerable area is neatly and compactly built. Among its public edifices are several pagodas and the Telukid's embassy.

SHEKURSK, a in Russia, gov. and 190 m. S.E. Arkangel. Though containing only 618 inhabitants it has six churches, a secular and a religious parish school, and a

charitable institution. Sulphur is found in the vicinity in the bed of the Petchi and within the strata is a village called Blagovestchansk, where two important yearly markets are held one for horses, which lasts four and the other for cloth which lasts ten days. Great quantities of turpentine are extracted in the district.

SHERA, a in Western Africa, Hausa States, cap. prov. of same name, 55 m. S.E. Kano. The position is among rocks, which surround it on all sides having only a narrow approach from the N.W. and surmounts it so strongly by nature that it has no wall. The houses are built partly of clay partly of rocks. The inhabitants, belonging to the dominant Fulaiah, have neither industry nor commerce.

SHERA, a mountain chain N. Arabia, which commencing not far from the Red Sea and the Gulf of Akahali, stretches N.E. towards the Syrian desert. Its W. slope descends rapidly and often precipitously toward the shore but the E. slope is lost gradually and almost insensibly in the sandy deserts. When composed of granite the strata is steeper and naked but when limestone prevails cultivation only is wanting to make it fertile as in Palestine. The inhabitants belong chiefly to the Himaui tribe.

SHERAYENKILLI, a in India, presid. Madras, dist. Travancore 8 m. E. Aingoo, and behind one of the lagoons of the Malabar coast. It is a large and irregular place, laid out in streets, mislaid chiefly by Nairs, and in gardens in which the coco-nut, sugar-cane, jack, mango, and other fruits abound and contains a court of law, a palace, a pagoda, and a free school for the instruction of native youths in the English and Malayalam languages.

SHERBO or **SHERBOGORI**, a in W. Africa 40 m. S.E. the peninsula of Sierra Leone, lat. (W. extremity, 7° 34' 30" N. lon. 13° 58' W. It is upwards of 27 m. long from S. to W. by 10 m. broad, and is densely wooded, particularly on the W. side the forest everywhere advancing to within a few yards of the beach. On the N. side it is bordered by an extensive mud bank and separated from it by a channel by Sherbo River in which there is a good channel 6 fathoms deep, but with several shallow and irregular patches. On the S.E. it is separated from the mainland by another channel called the Steber River. Cape St. Ann a low sandy point, forms the W. extremity of the island, and immediately westward separated only by a narrow opening choked with sand, are the Turtle Islands originally mere banks formed by deposits from the neighbouring rivers, and gradually acquiring vegetation.

SHERBOORE, a in British America, Nova Scotia on the E. bank of the St. Mary which is one of the large rivers of Nova Scotia, and falls into Indian Bay. It is a small place, with only 300 inhabitants but possesses two churches a school a courthouse, and jail on some schooners employed in the fisheries, builds a few vessels, and trades in firewood and seals. The district is well settled, and at a short distance below there are other two churches, one of which, 75 ft. high is a conspicuous object at sea.

SHERGHOFUY, a in India, presid. Behar, on a small island formed by a tributary of the Forquy, 126 m. S.E. Benares. It contains about 5000 inhabitants, and having once been the seat of the civil establishment, contains several bungalows of the European officials.

SILKA a river Russian empire Trans-Baikal Province, which formed by the junction of the Onon rising in the Kental, and the Ingoda, rising in the Chokondo Mountains, flows N.E. and mingles with the Argun in forming the Amur. At Blankin, in lat. 53° N. lon. 118° 30' E. it is 450 yards wide, and navigable thereafter by boats drawing 3 ft. of water. Its shores, partly hilly and wooded with birches and pines, are also lined with large tracts of prairie covered with rich herbage. Below Gorkum the country through which it flows becomes more mountainous, and abrupt cliffs often rise directly from the water. At Last Steika some Cossacks are stationed, who employ their time in fishing, hunting and bartering with the Ormushon and Manyar on the Amur. The current of the Silka is at the rate of 4 knots.

SILKINSKOI a in Russian empire, E. Siberia, gov. and 640 m. E.N.E. Irkutsk, on a rocky recess on the banks of the Shilka. The dwelling-house, built of wood, extended for some distance along the left bank of the river. On the

opposite side are government smelting-works, formerly used for lead and silver, but now for iron, as the more profitable commodity. Besides the smelting-works government has here a glass manufactory and a large tannery, famous for the superior quality of its leather, which is wholly tanned with bush bark.

SHINGE, a tr. to N.W. Africa, Kibumba country, territory Bamba, a bank river of that name, 40 S. N. by W. Benguela. It occupies a beautiful and romantic site in the midst of a grove of palms, and contains about 2000 inhabitants.

SHINGHIT a tr. N. Africa, Sahara, dist. Adorer lat. 20° 30' N., lon. 11° 40' W. It is a straggling place, situated in a sandy valley between two hills, which are planted with date-palms, and consists chiefly of huts in a variety of forms square, oval, &c. The inhabitants, who do not number more than 300, carry on a considerable trade with Timbuctu, Senegal, and the Senegal, and derive great facilities from the caravans proceeding into the interior and toward the W. coast. Their staple article is salt, which they obtain from Sebaha, and exchange for European goods, chiefly cottons. There are some carefully cultivated fields around Shinghit, but the sand from the desert is constantly threatening to overwhelm them.

SHINTE, or Kano, a tr. N. Africa, country of the Bafode, pleasantly situated on a rivulet in the centre of a green plain about 10 m. E. of the Lankaya or Kano lat. 12° 37' 35" N., lon. 23° 47' E. It is embowered in banana and other tropical trees, has straight streets, contrasting with those of the Bechuanas, which are all very tortuous, and consists of well furnished huts with square, oval, and round roofs, each with a carefully smoothed roof, used in some instances as a garden for raising a little tobacco and sugar-cane.

SHILI, a native tribe, E. Africa upon the White Nile. The men are armed with well made ebony clubs, two lances, a bow always strung, and a bundle of arrows, their hands are completely full of weapons, and they carry a small neatly made stool slung at their sides. They wear tufts of cow's feathers on the crown of the head, and their favourite attitude when standing is with one leg raised over a spear and the foot resting on the hands of the other knee. Their arrows, about 3 ft. long are pointed with hard wood, iron being scarce among them. The women wear small leopards of tanned leather as bras and from the back of the belt a tail of finely cut strips of leather their children are slung from the shoulder in a skin across the back, and secured by a thong round the waist. The huts of the natives are circular with very low eaves. The women are skilful in manufacturing mats and baskets of the leaf of the doum-palm they also make griddles and necklaces of river-mussel shells threaded upon the hair of the gorilla's tail. (Zaner)

SHIRE a river S.E. Africa, draining Lake Nyman into the Zambezi, which it enters on its left bank, at lat. 17° 46' N., lon. 35° 55' E. after a course of about 270 m. Ascending the river from the Zambezi the lower part of it has an average depth of 2 fathoms, but it becomes shallower higher up, when many departing and re-entering branches diminish the volume of water; the absence of sandbanks, however, makes it easy navigation. It drains a low and exceedingly fertile valley of 15 to 20 m. in breadth. Ranges of wooded hills bound the valley on both sides. For the first 20 m. the hills on the left bank are close to the river, then comes the detached mountain Morambala, with steep sides towards the W. wooded to the top and reaching a height of 6000 ft. A few clumps of palms and acacias appear N. of the river, on the tongue of land occupying the angle it forms with the Zambezi. Beyond Morambala the Shire winds through an extensive marsh. For many miles northwards a broad sea of fresh green grass extends. Ten or fifteen miles N. of Morambala stands the dome-shaped hill Makanya; several others with granite-looking peaks stretch away to the N., and form the E. boundary of the valley, another range, of metamorphic rocks, bounds the valley on the W. Villages are numerous, and many gardens of maize, pumpkins, and tobacco fringe the marshy banks. Into the river on its right bank, runs a deep stream about 20 yards wide, flowing in from a body of water several miles broad, from which great quantities of duckweed are carried into the Shire. Further on the village of Khoma stands upon the right bank, and a range of hills, commanding opposite Khoma, on the Zambezi approaches it within 5 or 6 m., and then runs in a N.W. direction, the principal hill is

named Malawa a number of villages stand upon its tree-covered sides, and coal is found cropping out in the rocks. The country now improves as the river is ascended the rich valley becoming less swampy, and adorned with trees. The majestic mountains, to which the name of Mount Chirindani has been given, now become visible in the N.E. as does also the E. end of the Mlanje range, among the mountains of which the Luo has its source, and flowing S.W. joins the Shire at lat. 16° 31' S. A short distance beyond the Luo is the Elephant Marsh, in which Dr. Livingstone counted 800 elephants in sight at once. The members of the Shire support prodigious numbers of many kinds of water-fowl. Beyond the marshes the country is higher and has a larger population, the soil is saline and salt is extracted from it, and cotton of excellent staple is grown upon it. A succession of rich low islands shade the river, many of them being cultivated with maize, &c. About midway in the river's course is a series of cataracts, to which the name of 'Marelikon' has been given, dividing the river into the Upper and Lower Shire. The lowest, called the Mamvira is at lat. 15° 55' S., but it is insignificant compared with the five above it, altogether they occupy 40 m. of the river's course with a total fall of 1200 ft. In that distance but the river is navigable in the still reaches which exist in the intervals of the cataracts. Above the cataracts the Upper Shire is a broad dry stream with but little current unless the current here seldom exceeds a knot an hour while that of the Lower Shire is from 2 to 2½ knots. The course at first is rather tortuous, and makes a long bend to the E. till it comes within 5 or 6 m. of Mount Zomba which stands near the W. shore, about the middle of Lake Shurwa. The direction of the river is then northerly, as far as the lakelike Pambombe, which is an expansion of 10 or 12 m. long, and 5 or 6 m. broad, a few miles below its exit from the S.E. arm of Lake Nyman. The banks of the lakelike are low and covered with a dense wall of papaya 10 or 12 ft. high. At its effluence from Lake Nyman the Shire is from 9 to 15 ft. deep the depth in the lake itself being much greater.

SHIRWA a lake, S.E. Africa lying S.E. from the S. end of Lake Nyman lat. (S. extremity) 16° 35' S., lon. 35° 40' E. It has never been explored but was seen by Dr. Livingstone from the base of Mount Pirmit, on its S.W. side. Thence the prospect northwards ended in a sea horizon, with two small islands in the distance, a larger one, resembling a hill-top, and covered with trees, rose more in the foreground. Ranges of hills appeared on the E. and on the W. Mount Chikala, which seems to be connected with the great mountain mass called Zomba. The shore was covered with reeds and papaya. The N. end of the lake has not been seen, though it has been passed the length of the lake is probably 60 or 80 m. and the breadth 20 m. The height above the sea is 1800 ft. From probably having no outlet the water, which appears to be deep is slightly brackish, with a taste like that of a weak solution of Epsom salts. The country around is very beautiful and clothed with rich vegetation. Exceedingly lofty mountains, perhaps 5000 ft. above sea level stand near the E. shore on the W. stands Mount Zomba, 7000 ft. in height, and 20 m. long.

SHISHOW, a tr. China on the frontiers of Hoonan and Hoopet, at the point where the Yang-tse-kiang comes into communication with the Lake of Tung-ting. It is protected on two sides by the river and the lake, and surrounded by a wall apparently of no great strength. The space inclosed being far larger than is built upon, nearly a half of it is laid out in gardens.

SHKLOV a tr. Russia, gov. and 25 m. N. by W. Mohilev, on the Dnieper with two churches, an ancient castle, and a pop. of 11 563.

SHLEB a tr. Austrian empire, Bohemia, circle and 4 m. S.E. of Gussan, on the Danubius, with a parish church, a castle, an asylum for children several corn and saw mills, and 1100 inhabitants.

SHOAL LAKE, or Lac Plat, British America, on the N.W. of the Lake of the Woods about lat. 49° 30' N., lon. 95° 10' W. is a considerable sheet of water, about 10 m. long by 7 m. broad, shallow rocky, and much frequented by aquatic birds. Its E. shore is bordered partly by ridges clothed with large oak-trees, and partly by rock masses, which stretch southward for a considerable distance. It is a

in forests sporting ground of the inhabitants of Fort Gerry, situated about 85 m. N. W.

SHOE AND SLIPPER, the name of two isls. New Zealand, North Island or Ulster on the N. W. side of the Bay of Plenty. The one is 1½ m. E. N. E. and the other 4 m. S. E. of Taiaroa Head. They are both named from their shape. Shoe Island in particular, which is only 1 m. in circuit, exactly representing its name even to the toe.

SHOLAPORE, a collectorate and dist. India presid. Bombay between lat. 18° 10' and 18° 24' N. lon. 73° and 76° 28' E., bounded N. by Ahmednagar and the Nizam's Dominions, E. the Nizam's Dominions, S. Satara and Belgaum and W. Ahmednagar, Poona, and Ratnagiri; greatest length, N. W. to S. E., 170 m., greatest breadth, 50 m. It has an undulating surface diversified by spurs and valleys, and is well watered by the Kistna and the Beema, but has scarcely any trees except a few mango trees. The staple product is cotton which it is said might be far more extensively grown if the roads were better, the difficulty of transport destroying the profit which would otherwise be realized. Still, notwithstanding this disadvantage, the quantity sent along this route from the Nizam's Dominions towards Bombay is large and increasing. Pop. 675,115.

SHOLAPORE, esp. of the above dist., on a level tract at its E. extremity 720 m. S. E. Bombay, occupies a considerable area of an oblong form, inclosed by a wide and deep ditch and by a wall of substantial masonry, provided with a massive brass and flanked by round towers. Beside the town proper there is an extensive suburb or outer town, also surrounded by an outer wall. Though not possessed of much natural strength, Sholapore is well ranked as an important fortress, the possession of which was repeatedly contested till it was taken by Aurangzeb in 1684. It afterwards fell into the hands of the Marathas, and being in their possession in 1818 when the Peshwa fled from Poona previous to his final deposition was taken by a British force by escalade. A church has been erected within the town.

SHOOA, a territory and to E. Africa, S. of the Madi and N. E. of the W. of the Albert Nyanza, intersected by the parallel of lat. 3° N. and longitude of lon. 32° E. The country forms a natural park, well watered by numerous rivulets, ornamented with fine timber and interspersed with high rocks of granite, which from a distance produce the effect of ruined castles. The pasturage is of superior quality and the surface being undulating, a small brook in every valley forms a natural drain, consequently the more elevated land is remarkably dry and healthy. The cultivation of the soil is superior, large quantities of annuins are grown and carefully harvested, the crop being gathered and arranged in oblong trusses, 20 ft. long and 12 ft. high, and in this way dried previous to being stored in the granaries. These are of two kinds—the one, of wicker work, supported on four posts with a thatched roof; the other simply contrived by fixing a stout pole 20 ft. long firmly in the ground, about 4 ft. from the ground a bundle of strong and long reeds is tied tightly round the pole, hoops of wicker work are then bound round them at intervals, until they assume the form of an inverted umbrella half expanded; this receptacle being filled with grain, fresh reeds are similarly added, and the work reaches within a few feet of the top of the pole the whole is then covered with reeds securely strapped. Fowls, butter and goats are abundant and cheap and beads are held in great value. The town or vil. of Shooa, in lat. 3° 4' N. lon. 32° 4' E. is a lovely place. A fine granite mountain ascends in one block, on a sheer precipice, for about 800 ft. from its base, perfectly abrupt on its E. side, while the other parts of it are covered with fine forest trees, and pretentiously dotted over with villages. The people are precisely similar to the more northerly Obo and Eriaka in language and appearance, and are exceedingly mild in their manners. The village stands a few miles S. W. of the Ansa, which receives the entire drainage of the Madi and Shooa countries with that of extensive districts E. of Shooa, and becomes a tremendous torrent so long as the rains continue, and conveys a vast volume of water to the Nile; but the inclination of the whole country being rapid towards the N. W. the bed of the Ansa, following the general incline, is so quickly emptied after the cessation of the rains that it becomes insignificant as a river. Shooa has an elevation of 8000 ft. above the sea. (See also)

SHOOSHEENDRAM, a N. India, presid. Madras, Travancore, about 5 m. N. W. Cape Comorin. It has a large Brahmin population, and a famous pagoda.

SHUPANGA, a vil. S. E. Africa, a bank Zambesi, about 80 m. from its mouth. It occupies the prettiest site on the river. In front a sloping lawn with a fine mango orchard at its S. end leads down to the Zambesi with its green islands beyond, northwards, lie vast fields and forests of palms and tropical trees, with Mount Morambala towering to the clouds, and further away more distant hills appear in the horizon. A one-storied house situated here possesses a remarkably interesting. In it Kilipanzuk of Captain Owen's surveying expedition died of fever in 1823, and in 1832 died of the same fatal disease the wife of Dr. Livingstone. A hundred yards E. of the house, under a large baobab-tree, both are buried.

SHUYA, a tn. Russia, gov. and 65 m. N. N. Vladimir asp circle of same name on the Tetz, which is here crossed by two handsome bridges. It has five churches, circles and parish schools, a charitable institution, and numerous industrial establishments both the town and the circle ranking among the most industrious in Russia. Pop. 8408.

SHWEI YN, a vil. Aracan, a bank Koladyn, on a bank 20 ft. above high water, in the midst of groves of plantains, mangoes and jack-trees. It is a large and populous place, with comfortable houses and homesteads, and an extensive cultivation of rice. The cotton tree is common. The people are all Musulmans, and dress nearly like the genuine Malays, though their features are different.

SIRIHU (Pulo) or Sirihawoo an Isl. Indian Archipelago, off the W. coast of Sumatra, between lat. 3° 10' and 4° 25' S. It has a length of about 56 m. from N. W. to S. E., a medium breadth of about 10 m. and an area of 480 sq. m. There is an active volcano near its centre. Its inhabitants are of Malay origin and speak the same language as those of the adjacent islands of Sijora and Pogo.

SIDDIAPORE, a tn. India, Nizam's Dominions, about 97 m. N. W. Bellary on the road to Bombay via Bellary. It consists of about 200 inhabited houses, and possesses two pagodas and four churches. The inhabitants are mostly agriculturists.

SIDIBOW, a to Austrian empire, Galicia, circle and 20 m. E. Czerkow on the Kustka-Kroutter with an ancient castle and a porch.

SIDHOLT, a tn. India presid. Madras dist. and 12 m. E. Cuddapah a bank Penuar. It consists of a town and fort, but the only objects of any interest belong to the latter, which is in the form of a quadrangle, built of sandstone and limestone, and strengthened by bastions, which are round at the angles, but square on the curtain. A deep and broad fosse makes three sides of the fort; the fourth side is washed by the river and furnished with a fusar base. It had once two gateways, but that on the E. has been built up, and that on the W. is now the only entrance. Among the buildings of the interior are the ruined Pann palace, the mosque, the cecoberry or hall of audience, and the mausoleum of Hummiah Shah. The last is surrounded by a handsome cupola with a gilded crescent, and has attached to it a small mosque, garden and burial-ground. Except during the rainy season the flat bed of the Penuar, near Sidholt is used as garden ground, and produces melons, which are celebrated for their superior flavor.

SIDI BEL-ABBAR, a tn. N. Africa, Algeria prov. and 38 m. N. Oran. It was founded by the French in 1848, and consists of two quarters, a military provided with immense storehouses and a civil, which consists of spacious streets which cross at right angles, and are lined by shady trees and a number of lofty and handsome houses. Its advantageous position promises to make it the principal entrepot for the ports of Mostaganem, Arzew and Oran. Pop. 4156.

SIDI HESHAM, a small state, N. Africa, territory Maghreb, between lat. 28° and 29° 41' N. lon. 11° 45' and 15° 44' E., bounded N. W. and W. by the Atlantic, S. the Sahara, and E. and N. E. Morocco. Much of the traffic between Morocco and Timbuktoo passes through it, and its inhabitants availing themselves of the facilities thus afforded, carry on a considerable trade. They are also industrious cultivators of the soil. Sidi-Hesham, which originally belonged to Morocco, threw off allegiance to it, and secured its independence in 1810.

SIENKOV a tn. Russia, gov. Frelava, cap. circle of south name, on the Grays. It has nine churches, a circle and a parish school, and a charitable institution; and contains 7715 inhabitants.

SIGIRI a natural stronghold, Ceylon, 46 m N by E. Kandy. It is situated in the heart of the great central forest and consists of a gigantic cylindrical rock rising suddenly from the surrounding flat to a height of 400 ft., as if shot up by subterranean force. Its curved sides are nearly perpendicular, and in some places overhanging their base. Its upper surface is very little more than an acre in extent. This was the retreat selected by the paricide Kysapa, who seized the throne of Ceylon after assassinating his father, King Dhatusena. Having isolated it by a rampart and formed a deep fosse, filled with water from an adjoining tank, he carved galleries along the face of the cliff, partially hollowing them out of the rock, and protecting them in front by strong curtain walls of stone. His palace, which stood on a triangular bastion, protected on two sides by the fosse, was a shapely mass of dunes and fallen brickwork, the mounds of which are infested by bears and snakes, while the ruined galleries are tenanted by thousands of bats. The tank, covered with the red and white flowers of the lotus, abounds with crocodiles.

SIETTE-ALIN, a mountain range Russian empire, stretching N. E. at the distance of 25 to 80 m from the W shore of the Sea of Japan and the Gulf of Tartary. It may be considered a continuation or skirt of the Trans-silva range on the S. The loftiest of the mountains rise from 4000 to 6000 ft. and are densely wooded with pine, hardwood and leafy trees being entirely confined to the valleys and lower slopes. The drainage of the E. slope is carried to the Sea of Japan and the Gulf of Tartary by numerous torrents, the course of which is too short to allow them to be developed into considerable streams, the drainage of the W slope belongs to the basin of the Amur. Of the numerous passes leading across the mountains the best are in the S. One of these, somewhat difficult, leads from the Upper Ussuri to Olga Bay, another is said to be practically even for carriages.

SI KIANG or **Wu River**, China, by far the most important of the streams which unite to form the Canton River was till recently almost entirely unknown. Even now its upper course, from the mountains of Yunnan and Kuenchow continued eastward across Quangong is only conjectured, but the lower course, from the city of Canton up to the frontier of Quingong, was thoroughly explored in 1869 by a British gunboat squadron. This expedition, leaving the anchorage of Canton on the 16th February, and proceeding down the river entered the Sai wan passage by the Si-chai-tan channel. The passage was easily navigated till abreast of the town of Su-wan, where the stream, dividing into two channels, leaves a large middle ground of hard mud, on which several of the vessels grounded. The expedition next proceeded by the Tan-ohai passage into the Tai lang channel, which runs out of it to the westward. In this channel no obstruction was found till within 3 m. of the village of Yan-tai-tan, where a flat island, about 1 m. long forms a N. and S. passage; the former almost buried by a bed of rocks, with a channel only 7 ft. deep at low water; the latter better and deeper, but very narrow at its E. end, and embanked near its centre by a rock, on which, as it is dry only at low water and had not been discovered by the previous sondings, the landing vessel struck. Having cleared all the channels leading to it, the expedition on 19th February entered the Si-king proper called also the Blue River from the clearness of its waters, and the following day reached the San-shui junction, and anchored at Shao-king situated on the left or N. bank about 20 m further up. About 5 to 6 m. below or E. of this town is a rock pass the river becoming narrower and flowing nearly straight for 21 m. among mountains ranging from 2000 to 3000 ft. high. In the narrowest part of this pass the width does not exceed 300 yards, but at Shao-king it is not less than 1400 yards. Midway between the San-shui junction and Shao-king, below the village of Kwang-li, the river splits round a richly cultivated island; and a little above the village, before reaching the pass, appears at one spot not to be more than 2 fathoms deep. The necessary inference is that at this spot in February when the exploration was made, the river, which is here only 7 m. from the sea, ceases to be navigable

for vessels drawing more than 12 ft. Near Shao-king limestone hills appear in rugged and picturesque groups, and still farther up the river winds through a continuously hilly country of sandstones and granites, chiefly in N. and W. directions. The hills, varying in height from 100 to 1500 ft., are in general densely wooded and often highly cultivated. At 50 m above Shao-king, after passing a singular mass of granite, which rises perpendicularly 800 ft. in the form of a stump, out of a range of hills 1500 to 1800 ft. high, the river bed is studded with rocks, and the navigation becomes dangerous. The exploration was however continued 35 m further to We-ohu or Ng-ohu situated on the E. frontiers of Quingong, where the Si-king is joined by the stream on which Kwei-ling the capital of that province, stands. At We-ohu in lat. 23° 38' N. lon 118° 14' E., the breadth of the river is nearly a mile from shore to shore, and about 600 yards between the sandbanks, but the navigation is difficult even for junks, and, according to report, becomes about 12 m. further up entirely obstructed by rapids. The course of the Si-king so far as now known, being only the portion from We-ohu to the sea, is 150 m. in length.

SILAO a tn. Mexico state and 13 m W Guanaxaco. It contains 6000 inhabitants who used to weave large quantities of woollen and cotton goods, but now confine themselves almost entirely to agriculture.

SILLESIA (DOCHOT) Austrian empire, lies between lat. 49° 25' and 50° 36' N. lon 16° 23' and 18° 39' E., and is bounded N. by Prussian Silesia, S. Galizia, S. Hungary and Moravia, and W. Maravia and Prussian Silesia, area 14,680 sq. m. pop. (1857), 462,051 of whom 230,000 are Slaves, 210,000 Germans, and 3280 Jews. With the exception of 61,572 Lutherans 45 Reformed Protestants, and the Jews, they are all R. Catholics. For administrative purposes the duchy is divided into 23 districts. Troppa is the capital.

SILLOTH a seaport, England co. Cumberland newly formed on the English coast of the Solway Frith, 18 m. W Carlisle lat 54° 33' N., lon 8° 33' W. The channel here has 15 ft. depth at low water and the harbor in an emergency may securely run but vessels into it at a time when the tidal harbour along this part of the coast cannot be approached. The commercial traffic is chiefly with Ireland.

SILVET, an isl. China, prov. Kiangsoo, in the Yang-tze-kiang, beyond a bold projecting hill above Kiang-yu. It rises out of the centre of the river to the height of nearly 200 ft. covered with the richest foliage, and crowned by a small pagoda-shaped edifice, which commands an extensive panoramic view over a broad and richly cultivated plain stretching away to the N. On its sides, embowered in foliage, are several quiet temples, with white walls gleaming and lazy priests basking in the sun. Silver Island is evidently destined to form a junction with the small islands of Ju-shu. Two spits of land, jutting out from each and accumulating alluvium, are rapidly narrowing the channel which lies between them. H.M.S. *Furze* in proceeding up the river with Lord Elgin in 1856, grounded on a reef to the E. of this island, in a channel through which a British fleet, consisting of several ships of the line, had passed, totally unconscious of the danger, and which was marked on the charts as having a depth of 18 fathoms. Thus silent must not be confounded with Kintyre which lies between the W. end of the island of Chusan and the mouth of the Yang or Hangpo, and is also known by the name of Silver Island.

SIMEN a prov. Abyssinia, Tigre, washed on the E. by the Taccana and consisting almost entirely of an elevated plateau averaging about 10,000 ft. in absolute height. Above the plateau rise several mountains, the loftiest of which called Ras Dutchen, is at least 14,000 ft. above sea-level. Snow is often seen upon it, and from its sides descend numerous torrents, which, after forming beautiful cascades, hurry along, some to the Ballea and others to the Taccana. The whole of the mountains are evidently volcanic, and consist of darkish basaltic tuff, and trachytes. The plateau, though generally bare, has patches of excellent pasture; even barley is grown upon it at the height of 11,000 ft. where trees seem to grow. The inhabitants of Simen have a very limited export of cattle and cereals, for which they obtain in return cotton, salt, pepper, coffee, iron &c., all in small quantities.

SIMILIAN, a tn. Austrian empire, Military Frontier, Croatia, dist. Loez, about 56 m. S. by W Kachladia with a

R. Catholic and a Greek non-united parish church, a trivial school, and a large core magazine. There are several ruined castles in the vicinity. Pop 1900

SIMNITZA, a town in Turkey in Europe, Walosha, 1 bank Danube, opposite to Slatava, 30 m. W.S.W. Rostochok. It is the seat of a court of primary jurisdiction, contains several churches, a normal school and a quarantine establishment, and has a harbour formed by an island. Pop. 7400

SIMODA a town in Japan near the S.E. extremity of the peninsula of Ido, on the island of Nippon and at the W. entrance of the Gulf of Yedo, lat. 34 39' 49" N lon 138° 57' 50" E. It occupies an extremely picturesque site among undulating hills, which rise from the water edge covered with trees and verdure, and extend backward till they terminate in bare, rugged and lofty mountains. About two centuries ago it was the port of entry for vessels bound to the capital, but having been supplanted in this respect by Uraga situated further up the bay suffered a considerable decline. Still however it continued to be an important place, and in April, 1854, when visited by the U. States expedition to Japan, was a compactly built town with regular streets intersecting each other at right angles, and about 1000 houses containing an estimated pop of 7000. Among the public buildings were nine Buddhist temples and many smaller shrines, while the

whole place had a tolerably thriving appearance. A few months later a very different scene presented itself. On 23d December an earthquake of the most frightful description occurred and carrying destruction along a large part of the coast of Nippon laid Simoda in ruins. The sea first retiring so far as to leave the harbour which had a usual depth of five fathoms nearly dry returned in a wave which overtopped many of the houses and swept everything away. Only a few temples and private dwellings that stood on elevated spots escaped. Fortunately the harbours on which the prosperity of the town mainly depended has suffered only by the washing away of the alluvium which formed its holding ground, and the leaving of a rocky bottom in its stead. It is expected however, that the washings from the higher ground will ere long supply this deficiency. Meanwhile the work of rebuilding has gone on with spirit, and the houses, constructed indeed as before of inexpensive and flimsy materials, have rapidly disappeared.

SIMONOSAKI a town in Japan, on the S.W. point of the island of Nippon and province of Nagato at the western entrance to the Suwayama Sea, lat 35° 55' N lon 131° E. It stretches in one straggling street about 1½ m. along the shore, and is situated in a very commanding position for purposes of trade. At present the high hills by which it is sur-

rounded supply the principal articles of its small export trade—sugar, rice oil and iron, but it forms an important depot station for the transmission of European imports from Nagasaki to the interior as well as for the return traffic in native produce from Osaka and other parts of the Suwayama Sea. In the shops are retailed considerable quantities of grey shirtings, camlets, prints, &c. of British manufacture besides medicines and glass from Holland. The most conspicuous building is the custom-house, recognized by its tall white gables. The warehouses or godowns are constructed of wood and mud, coated with white cement or stucco and are said to be fireproof but the dwelling-houses are generally built of wood. Pop. estimated at 10,000.—The strait, commencing at Entrance Head, the S.W. point of Ido, is 7 m. in length with a navigable channel varying from 3 to 7 cables in breadth the town stands 4 m. within the entrance.

In consequence of the persistent refusal of the semi-independent Prince of Nagato to open the channel of Simonosaki to foreign vessels, notwithstanding the treaties with the government at Jeddo, an attack was made on the batteries

he had erected to command the strait by a combined squadron of British, French, Dutch, and American ships, on the 5th and 6th September 1864 and a passage forced in spite of an obstinate resistance.

SINANO a vil. Greece, Morea, 1½ m. N the ruins of ancient Megalopolis, the metropolis of the Arcadians is of only a few years date. All the houses are built on the same primitive plan, with four walls, a roof, a low door and two windows. The chimney is considered useless. The furniture is as simple as the house, and the dress of the people not more complicated. Pop. 750.—(Dora d'Istria)

SINDER, a town in Western Africa, on an island of some size in the Niger 210 m. W. N.W. Sokoto. It is the market for all the corn used in this district, and even exports largely to the provinces of Kabardia and Dandina. Including Goro, another town on an adjacent island, it has an estimated pop. of 18,000.

SINGHANA a town in India, Rajpootana, state Shikarwana, on the skirts of a hill of purplish rock, 95 m. S.W. Delhi. It is a handsome town built of stone, and depends for its prosperity on a copper mine in the vicinity, which has been

worked to such an extent that the subterranean galleries are about 2 m. in length, and the acacia forms a line of small hills several hundred feet in length, and from 80 to 60 ft. high. On these hills four isolated stone bastions have been built.

SINGKEI, a river, Sumatra, the largest which falls into the ocean on its W. coast. In month, which is in lat. $2^{\circ} 15' N.$, is about three-quarters of a mile wide, but the bar has only 12 ft. water even at spring-tides. Within its channel is deep and navigable for a considerable distance. At one time benzoin, camphor and gold-dust were exported from it.

SINGURH a fort, presid. Bombay dist and 11 m. S.W. Poona, among the mountains to the S. belonging to the Western Ghats. It possesses great natural strength, being seated on an immense craggy precipice, access to which, if opposed seems almost impossible and is of a triangular form, surrounded by a strong stone wall flanked with towers, and enclosing an area about 2 m. in circuit. It figures much in the Indian wars while the Maharrats were establishing their supremacy in opposition to that of the Moguls. In 1618 it capitulated to a British force, after it had been invested for eight days and had suffered much from shot and shell.

SINHO or **SINHA**, a vil. China, prov. Fuchien 85 m. S.E. Fuku, on a narrow causeway ditch which flows from the Fuku, half a mile distant, and through which communication is kept up with the river by junks. It consists chiefly of one long winding street of shops, and is surrounded by pleasant orchards. Water-melons, peaches, Cape gooseberries, and various vegetables, are grown abundantly. — (Sinhua s. N. China Campaign.)

SINJERE, a tributary of the Zamboi, S.E. Africa, rising in the Churchy rocky hills, and flowing S. into the Zamboi, which it joins on its L. bank about lat. $16^{\circ} 25' S.$ lon. $32^{\circ} 15' E.$ It is a fine stream, one of many which drain the mountainous country N. of the river. Grey sandstone is common hereabouts, and many lumps of coal, brought down by the rapid current, lie in its channel. A vast coal field exists hereabouts both N. and S. of the Zamboi. A dyke of black basaltic rock crosses the Zamboi near the mouth of the Sinjere; but it has two openings in it from 60 to 80 yards in breadth and the channel is very deep.

SINKEP, an isl. Indian Archipelago off the N.E. coast of Sumatra, and N. of the entrance to the Straits of Malacca. It has an area of 153 sq. m. and is composed chiefly of granitic rocks and is rich in the which, existing in the form of gravel both on the land and on the sea-shore within water-mark, is obtained in the latter position by a rule kind of dredging. The inhabitants Malay, are mostly fishermen. Sinkiep is nominally subject to the Dutch.

SIOUX CITY a vil. U. States, Iowa, cap. of Woodbury on the Mississippi, 8 m. below the mouth of Sioux River, and 220 m. above Omaha. It is the W. terminus of the Debague and Sioux City railway now in progress.

SIPHANTO [anc. Siphaon] [add.] an isl. Greece, near arch. Cyclades intersected by the parallel of $37^{\circ} N.$ has a maximum length N.W. to S.E. of 11 m. a central breadth of 5 m. an area of 32 sq. m. and a pop. of 5700. It has a rather elevated but finely diversified surface, is healthy and fertile, producing corn, cotton, figs, oil, silk, honey, and wax, possesses quarries of marble, and was at one time famous for its mines of gold and silver. The only manufactures are cottons and straw hats, particularly the latter which are in demand in all the islands of the Aegean Sea. Many of the inhabitants, male and female, become domestic servants in Athens, Smyrna and Constantinople. In the last they are in great request as cooks. The principal villages of the island are Stavros near its centre, with an Hellenic and a parish school and a pop. of 1200; Kastro, seated on a strongly fortified precipice on the E. coast, and containing 750 inhabitants; and Grampeia, which extends 1000 ft. above the sea, is most beautifully situated among cultivated fields, vineyards, olive-yards and gardens, and has a pop. of 600.

SIPORA an isl. Indian Archipelago, forming one of the long chain of islands lying nearly parallel to the W. coast of Sumatra. It is situated between Sibura on the N.W. and Paga on the S.E. is about 50 m. long by 18 broad, and has a computed area of 1200 sq. m. The inhabitants belong to a peculiar race of Malays, known by the name of Maja-

SIRBA a river, Western Africa, the whole course of which is imperfectly known. Rising as is believed, in the S.E. of prov. Mosi, it flows N.N.W. past Kullala, enters prov. Garma, which it intersects and then, proceeding between districts Taghe and Torolo, joins a bank N.W. near lat. $14^{\circ} N.$ At the village of Boesangang, where Dr. Barth crossed it on the 2d July 1858, it was about 70 yards wide and 12 ft. deep in the middle and was running between banks about 30 ft. high, on the 26th of July in the following year he found it, much lower down near its confluence with the Niger, to be only a foot deep.

SIRCI, or **SERSON** a tn. India, presid. Madras, prov. N. Canara, 122 m. N. Mangalore. It is situated above the W. Ghats and has risen since the establishment of the British rule. It was the great emporium for the area-ant trade while the inland duties were levied, and is now an important entrepôt for the cotton transmitted from the S. Maharrats country to Coompta. The sub-collector of Canara resides here. Pop. 4570.

SIRCE, a tn. Austrian empire Hungary on and 10 m. N.N.E. Odenburg near the N.W. shore of Lake Neusiedl where the Waika falls into it. It has a mineral spring, with a bathing establishment, and 1200 R. Catholic inhabitants.

SIRDAHANA a tn. India, N.W. Frontier, dist. and 11 m. N.W. Meerut. It stands in an open and level country and is surrounded by a mud wall and defended by a mud fort in a dilapidated state. Its principal buildings are the palace of the rather notorious Begum Samroo, and a church, built at her expense. The palace is a large and handsome structure, profusely ornamented with paintings; the church is a fine imitation of St. Peter's at Rome. At the begum's death without issue, in 1836 Sirdahana, which was her capital and all her territory passed to the British government.

SIRDOOLAH, a petty state, India, on the S. frontier of Baluchistan between lat. $23^{\circ} 54'$ and $25^{\circ} 54'$ N. lon. $63^{\circ} 49'$ and $64^{\circ} 5'$ E., is about 90 m. long from N. to S., by 85 m. broad and has an area of 5441 sq. m. Its surface is rugged and mountainous, rising about 600 ft. above the adjoining table land of China Nagpore and is drained chiefly by the shallow streams Kumber and Khari. Its forests contain elephants, leopards, deer and hogs and its extensive pastures are frequented by large herds of buffaloes, which come down to grass from Banaras and Mirzapore. Pop. 818,052. — The town of some name, situated about 40 m. S. Mirzapore, is a ruined place, with scarcely a vestige of former grandeur.

SIRJAN a dist. Persia in S.E. of prov. Kerman. It is one of the most flourishing of the Kerman districts, and contains forty-one villages among which is Pures, once celebrated for its mine of turquoise, which is no longer worked and still noted for the hawk which it rears. Gems are abundant, and both copper and lead ore are found in Sirjan.

SIRMOHUR, a petty hill state, India, between lat. $30^{\circ} 25'$ and $31^{\circ} 2'$ N., lon. $77^{\circ} 5'$ and $77^{\circ} 53'$ E. is bounded N. by Dulem and Jacobel E. the Dehra Doon from which it is separated by the Tons and Jumna, and S. and W. by Sirhind and Patiala, area 1075 sq. m. The surface declines generally though irregularly, from N. to S. and sends almost all its drainage to the Jumna. Its culminating point, the Char peak, has a height of 12 150 ft. The minerals include copper, lead, and iron. The working of the first has been abandoned, but that of the other two still continues. Notwithstanding the elevation good crops are raised. Of these the most important is turban (*Eleusine coracana*) but wheat, barley, poppy, and oil seeds are also grown, with madder for a first crop, and rice, cotton, and tobacco for a second. The rice, cultivated on ground suited for irrigation and arranged in terraces, is very fine. The forests, which are so dense as to be almost impenetrable, and contain much fine timber abound in wild elephants, tigers, leopards, bears and hyenas the principal domestic animals are kites of the lumped species. They are kept only for the dairy, and are never killed or eaten for food. The manufacturers are confined to the smelting and working of iron, and the weaving of a few coarse woollens and cottons for home use. There is no trade. The state of morals among the population may be judged from the fact that chastity is unknown. Pop. about 62,000.

SIRROJ, or **SERROJ**, a tn. India, Malwa, lying within the territory granted to the noted Bundelkhor Amee Khan, and still possessed by his descendants, is situated at

the base of a giant leading S from a plateau to the plain 218 m. S. Ag. It was once a place of great importance, surrounded with walls, and crowded with merchants and weavers' houses for their fine muslins and chintzes. Much of this property has disappeared, but it still contains a considerable population, is defended by a rectangular fort with a square tower at each angle, and possesses many mosques, two caravanserais, and a fine bazar.

SINSEK, a *tu*. Austrian empire, kingdom of Croatia and Slavonia, co. Aggram at the confluence of the Kalpa with the Sava. It is the seat of a district court, and has a castle, a building-yard, and a large trade in corn. Pop. 800.

SISUBO, a *vil*. Chinese empire, on the E. side of a peninsula of same name, near the N. E. extremity of the peninsula of Corea. It is of considerable extent, is surrounded by low stone walls and has a small harbour convenient of access for fishing-boats. The Tumen-king, or Tiding-king which has its mouth 4 m. E. of Suru, now forms, in consequence of the Russo-Chinese treaty of 14th November 1880 the S. limit of the Russian territory on the shores of the Sea of Japan.

SITANG, a river Burmah and Pegu, which rises among the hills to the S. E. of Ava. Taking the name of Poungeing in the upper part of its course, it flows nearly due S. through a valley about 80 m. long. Before entering Pegu and beyond its frontier as far S. as Tongay, its banks, as far as yet traced, are high and hilly. Lower down an alluvial tract commences, and is continued with varying breadth towards the sea. In Pegu the river is much more tortuous than it seems to be in Burmah. At the town of its own name it widens out, and forming a broad estuary, falls into the Gulf of Martaban, 55 m. E. of Rangoon. One great obstacle to its navigation is its shoals, which advances at the rate of nearly 13 m. an hour sometimes with a crest 9 ft. high.

SKALATZ, a *tu*. Austrian empire, Galicia, circle and 19 m. S. E. Tarnopol, cap. dist. of same name, in a well-wooded and well-cultivated country, not far from the Russian frontier; with an ancient castle and much frequented yearly markets. Pop. 4008.

SKALITZ (GREAT and LITTLE) two *tu*. Austrian empire, Bohemia, circle and 18 m. N. E. Koniggratz—1 *Gross* or *Great Skalit*, 1 bank Aupa, contains 2045 inhabitants, and has a townhouse an hospital for the poor, and a mill—2, *Klein* or *Little Skalit*, situated opposite to the other on the r. bank, contains 400 inhabitants, and has a parish church and a castle.

SKARI-MADAN a *tu*. Turkey in Europe, in the N. W. of Bosnia, 30 m. W. N. W. Banjaluka, is the seat of a Greek bishop and has iron mines and iron mills, in which the inhabitants, about 8000 are chiefly employed. In another place, called Bessan Meydan, and situated about 10 m. eastward there are extensive iron foundries.

SKOTSCHAU a *tu*. Austrian empire, Silesia, cap. dist. of same name 40 m. S. E. Troppau, on the Vistula, here crossed by a long bridge. It has an elegant townhouse a castle an hospital and cattle and other yearly markets. Pop. 2000.

SKRYSZOW a *tu*. Austrian empire, Galicia, circle and 8 m. S. E. Tarnow with numerous linen looms, a wagon factory, and 2260 inhabitants.

BLANKAMEN [old] a *tu*. Austrian empire, Peterwardein, Military Frontier, r. bank Danube nearly opposite to the mouth of the Theiss, 22 m. S. E. Peterwardein. It has a R. Catholic and two Greek churches the ruins of an ancient and once strongly fortified castle, salt springs and an important fishery. It is an ancient place, and under the Romans had the name of *Blannum*. The defeat of the Turks here in 1691 by Prince Eugene, was followed by the peace of Karlowitz. Pop. 690. At a short distance on the same side of the Danube is New Blankamen with 2400 inhabitants.

SLATINA, a *tu*. Turkey in Europe, Walachia, cap. circle Otta, near the Olita, 85 m. W. Bucharest. It is the seat of a court of primary jurisdiction, and contains a church and a normal school. Pop. 8590.

SLICHOW, a *tu*. Austrian empire, Hungary co, and 10 m. N. E. Temein, in a mountainous district, with a large trade in glass, and 1400 inhabitants.

SLOBODZIE, a market *tu*. European Turkey Walachia, 85 m. S. E. by N. Bucharest, 1 bank Jalomitza, here crossed by a flying bridge.

Surf. Lar. Gaz.—Vol. II.

SLAVINKA (UPPER and LOWER), two nearly contiguous places, Austrian empire, Hungary, co. Zips, about 23 m. S. E. Lennchen, in a picturesque district, with mines of silver and copper, and an aggregate pop. of 2500.

SLOWITA, a *tu*. Austrian empire, Galicia, circle and 16 m. W. Zlesnow; with a Russian monastery, and a beautiful mansion seated on an artificial mound, said to have been constructed by the Tartars while encamped here. Pop. 1100.

SMATYN, a *tu*. Austrian empire, Galicia, circle and 24 m. S. E. Kolomej, cap. dist. of same name, 1 bank Pruth. It has a high school a fund for making loans to the industrious, an hospital, and an infirmary. Here, in 1689, the Tartars sustained a bloody defeat from the Polish general Wniewski. Pop. 10,668.

SOAVE, a *tu*. Italy, Venetia, prov. and 16 m. S. E. E. Verona, on the Tormegna. It is surrounded with ancient walls is the seat of a court of justice and has a parish church, an old castle, manufactures of leather and a trade in excellent wine.

SOBAT a river, E. Africa, a tributary of the White Nile, which it joins in lat. 9° 21' 14" N. from the E. It is the most powerful affluent of the White Nile, and is probably fed by many streams from the Galla country about Kassa, in addition to receiving the rivers from the Barri and Lastoka countries. It appears to be supplied by considerable streams from distinct countries E. and S. having a rainfall at different seasons, as it is full at the end of December when the more southerly affluents of the Nile are extremely low. The mouth of the Sobat at its junction with the White Nile is not more than 120 yards wide, and the country about it consists of dead flats of gravel and marsh as far as the eye can reach. The stream (at the beginning of January) by S. W. Baker found to run about 14 m. per hour, the quality of the water was superior to that of the Nile, indicating a mountain origin, and the depth varied slightly from 27 to 28 ft. Within a few days and from the junction the Sobat is reported to divide into seven branches, all shallow, and with rapid streams. Between its mouth and the farthest navigable point it is said to be fed by many mountain torrents. It has been navigated from its mouth upwards for nearly 200 m. Its N. or r. bank is inhabited by the Dinka and Djuha its S. or l. bank by the Bahr and Bari tribes.

SOBUIST a *tu*. Austrian empire, Hungary co. Upper Neutra, on the Verbana, about 25 m. N. W. Jyran, with a castellated mansion, and several mills. Many of the inhabitants, who occupy a separate suburb are descendants of the German Anabaptists, who have returned to the R. Catholic church, and are mostly potters and cutlery. Pop. 3097.

SOBRALON a *vil*. India Cis-Satlej territories, 1 bank Sutlej, 60 m. S. E. Lahore. Is famous for the victory gained here on the 10th February 1846 by the British, under Sir Hugh Gough, over the Sikhs.

SOFTYSEK, a *tu*. Russian empire, B. Siberia, r. bank Amoor above Lake Kulus and 40 m. W. of Castrum Bay in the Gulf of Tartary with which it is connected by a good road. Though only founded in 1858 it is intended to be the great entrepôt for the produce of Manchouria, and promises to become the most important commercial place on the Amoor more especially after the projected railway to the coast shall have been completed. Foreign shipping is admitted to it on the same terms as at Nikolayevsk, and wharves and dry docks are to be built.

SOHAR, a *tu* and port, Arabia, Oman cap. prov. Bahrein on W. shore of Sea of Oman, 140 m. W. Muscat. The roadstead and anchorage are good, sheltered by the promontory of Farisak on the N. and W. and by that of Bawrah on the S., and the fishery off-shore is excellent. Within the town there stands the chief's castle, a handsome building with a triple crenel of walls, and occupying a small rising ground. In front of the castle is an open space planted with trees, and reaching down to the wall seawards. The market-place is large and regular in form, and possesses good shops. Wares, and smiths in silver, gold, iron, and copper are the staple manufactures. The houses, of two and three stories, are well built, and over the main street several arcades are thrown. Around the town outside the walls, which are in tolerably good condition and mounted with a few guns, is an open sandy space, beyond which are gardens with shady trees and

standing waters and a tropical vegetation. The commerce of the place has been drawn away to Misant, and its prosperity consequently reduced. Many of the houses are empty, and some are in ruins. Pop. about 24,000.

BOKNA, a to. N Africa, regency and 280 m. S.S.E. Tripoli. It stands 1800 ft. above sea-level in a hollow entirely surrounded by hills, is well built, and has an apparently prosperous population of about 7500 souls who obtain abundance of dates and various other kinds of fruit from their gardens, and are supplied with water from forty wells, which are all hot, and have a temperature of 88°. At Bokna the first salt lagoons of the desert are found.

BOKOTO, a to. Western Africa, Hausa States, once the capital of the prince of Gobar, on a slope, 720 m. W N W Kano. It consists of the town proper and a suburb, the former enclosed by a ditch and a machicolated wall, and nearly in the form of a square, and, though in a dilapidated condition, and exhibiting on every hand symptoms of decay and ruin, contains many good buildings. The market is much frequented and well supplied. The principal articles are horses and cattle, slaves, leather articles, salt, and iron. The leather articles in particular bear a high name throughout Negroland, and consist of bags, cushions, bridles, &c. The iron also is excellent and is great demand as that of Kano is of bad quality. Rice is extensively cultivated in a well-watered valley near Sokoto. The traveller Clapperton died here. Pop. roughly estimated at 30,000.

BOKUWA, a to. Western Africa, Hausa States, diet. Autogum, on the W bank of a stream, which is converted into stagnant pools in the dry season, 120 m. E Kano. It is a large place surrounded by a wall of earth, and consists of clay houses and reed huts. There is a weekly market.

BOLANDER, a small island, S. Pacific, New Zealand, near the W entrance of Foveaux Strait, lying 22 m. S. of the S coast of Middle Island, and 33 m. W by E of the N W end of Stewart Island. It is about a mile long and runs almost perpendicularly from the sea to a peaked summit, which is 1100 ft. high, and visible at the distance of 40 m. forms a perfect finger-post to vessels from the W making for Foveaux Strait.

BOLANI a river India, which rising at the S W base of the Sewalik Hills, flows S W for about 55 m., and joins the Ganges on its right bank, at lat. 29° 2' N. lon. 78° 1' E. It is crossed by the Ganges canal by a magnificent aqueduct of fifteen arches, each of 50 ft. span executed at an expense of not less than 2300,000.

SOLFERING (add.) a vil. Italy, Lombardy about 18 m. N W Mantua, has a ruined castle, formerly belonging to a prince who took his title from it a church and two chapels; and is famous as the scene of two great battles in both of which the Austrians were signally defeated. The first battle was fought between them and the French in 1796 and prepared the way for the siege of Mantua; the second was fought between them and the allied French and Prussians, on 24th June 1809 and was obstinately contested for sixteen hours the French led by the Emperor Napoleon III. having been defeated by the Austrians led by Prince Eugene, who had 12,000 and the French lost 15,000 and the Austrians had 5000 killed and wounded. The Austrians, led by the Emperor Francis Joseph, suffered much more severely and moreover left in the hands of the victors 4 standards, 80 cannon and 6000 prisoners. This battle is said to have been decided in favour of the allied forces chiefly through the superior range of their artillery and rifles. The fruit of the victory was a peace, by which Lombardy was ceded to France, and by France made over to Sardinia.

BOL-GAI TICH a to. Burma, gov. on the river and 100 m. E by E of the town of Moulmein, cap. chole of same name. It has numerous churches, of which several are Catholic; secular and religious schools for the male and the female; a benevolent endowment, salt springs, baths, and several industrial establishments. Pop. 2720. A large quantity of salt is made in the crevices.

BOLLENAU a to. Austrian empire, Lower Austria, 22 m. S. by W Vienna, contains 1000 inhabitants, and has a cotton spinning mill. Numerous sheep are reared, and coal is extensively worked in the vicinity.

BOMBERO (add.) a to. lat. W India, N of Virgin Island, between lat. 18° 45' and 18° 50' N., lon. 68° 25' and 68° 30' W. Attached to the Leeward Islands it naturally

belonged to the English government, but remained unoccupied and uninhabited until the Americans took possession of it in 1866. They immediately began to remove and export the rock of which the island is composed, and which was proved to be an excellent substitute for guano, containing 70 to 80 per cent. of soluble phosphoric acid lime. English traders soon established a business connection with the American postoffice, and a large export of the valuable rock to made to England and Germany as well as to the U. States. The dimensions of the island, the whole of which consists of the massive stone, render the supply practically inexhaustible of this valuable and opportune substitute for Peruvian guano. The exact nature of the stone is still unascertained. The chemical compound results from 70 to 80 per cent. of a base of phosphoric acid limestone, as before stated; the next constituent part being chiefly carbonic acid lime and cryolite of iron. In 1866 about 25,000 tons were exported to England. Present pop. of island, about 880.

SOMERSET RIVER, or VICTORIA NILE, Central Africa, the name given by Captain Speke, and retained by Sir S. W. Baker, to the river issuing from the Victoria Nyman at Elgon Falls, lat. 0° 22' N. lon. 33° 28' E., and supposed to be the same that enters the upper part of the Albert Nyman, or Lake Lata Nige at lat. 2° 18' N., lon. 31° 34' E. From the Victoria Nyman its course is generally N W., and it reaches the parallel of its mouth about lat. 2° 30' E., where at the Karuma Falls it turns and flows directly W. A little below the Karuma Falls it is about 150 yards wide the cliffs on the S. side are higher than those on the other being about 150 ft. above the stream. The falls themselves are insignificant, but curiously regular the ridge of rock over which they flow extending like a wall across the river. They are just at the head where the river turns westwards. From the point the river passes through a densely wooded country and over a succession of rapids and falls between high cliffs, covered with groves of bananas and palms. The descent of the river is very great the fall from Karuma to Patonau Island being 801 ft. and a total of 1275 ft. from Karuma to the Albert Nyman. The last estuary is that of the Murchison Falls where the river, contracted into a narrow gorge scarcely 50 yards in width plunges in one leap of about 120 ft. into a dark abyss, whence it flows over a more level bed, and gradually widens to 5000 yards. The stream becomes so sluggish that at its outlet into the Albert Nyman at Mungo it is scarcely perceptible.

BOMLYO (add.) a to. Austrian empire, Transylvania, cap. circle of same name, in the N W of Transylvania, 114 m. N W Hermannstadt. It is the seat of several important public offices and has a beautiful R. Catholic church built by Stephen Bathory in 1434. A M. Monastery a town-hospital a high-school a castle, once strong but now dilapidated, a mineral spring and a trade in wine. It contains 4003 inhabitants, mostly R. Catholic.

BOMMA CAMPAGNA, a to. Italy, Venetia, prov. and 7 m. W by W Verona with several churches one of which has a painting by Paul Veronese. The Piedmontese were here defeated by the Austrians under Radetzky on 23rd July 1848. Pop. 2569.

SOMNATH PATTAN (add.) a in India, Gujarat, on the S W coast of the peninsula of Kaitiwar 210 m. N W Bombay. It occupies a beautiful and commanding site, and is in the form of an irregular quadrangle inclosed on all sides except the W where the sea washes it with a ditch and a wall. This wall, which is a mile and three-quarters in circuit, is of great solidity and strength, constructed of massive square stones without cement, and flanked with two round and thirty-six square towers. The space inclosed is far too large for the present inhabitants who do not exceed 5000, and live amid splendid ruins, telling of a grandeur which has long since passed away. The great temple, to which the place was mainly indebted for its celebrity stands on an eminence N W of the town, and so completely overtops all the other buildings that it can be seen at the distance of 25 m. It was stormed and pillaged by Mahmood of Ghazna, who found an immense booty within it, and carried off its sandalwood gaud, which, according to a prevailing tradition, he employed in embellishing his own tomb at Ghazna. The temple has never been rebuilt and still remains a shapeless ruin, but a very extraordinary attempt was made by Lord

Ellenborough, while governor general to give it back its gates, which were carried in ostentatious procession from Calcutta for this purpose, and would doubtless have been replaced had not the power of discretion interfered to prevent it. The only other buildings of consequence are a small but beautiful temple, erected in the vicinity of the great temple by the celebrated Abul Fazl, and a number of mosques, one of which is an imposing structure surrounded by colonnades, and surmounted by four domes. Billawal or Yauvalwal, situated about 20 m. N. is the seat of Somnath Pattan, and having a good haven for trading vessels, enables it to carry on a can-
sizable trade.

SONA, a tn. Italy, Venetia, prov and 8 m W Verona, on the railway to Milan, with 8196 inhabitants. The Austrians under Radetzky were victorious here, on 23d July, 1848.

SONAR, a river India which rises in the Sanger and Nerbudda territory at the height of 1950 ft above the sea, flows N E and joins the Gans on its left bank in lat. 24 22 N lon. 79° 59' E. after a course of 118 m

[illegible]

of excellent quality is found. Guayaquil is the principal port of Sonora. It is a small town, conveniently situated for commercial purposes, and containing about 8000 inhabitants. The harbour is magnificent, and can receive the largest vessels. The principal rivers are the Fuerte, the Yaqui, the Mayo and the Sonora. Pop. of Sonora, 180,000

800CHOW [add] This Chinese city of the first order (50) suffered severely during the Taiping rebellion, and its occupation for several years by the insurgents, who drove the healthy and refined inhabitants from the place, plunging the city into a state of anarchy and confusion. Thus laid waste and in ruins. In 1863 the disciplined Chinese forces under Colonel Gordon, having reduced all the towns in its vicinity, the rebel leaders, four in number agreed to surrender the city to the imperialists provided their lives were spared. This was assented to, but the governor-general of the province, when he had them in his power, treacherously beheaded them. The city was again a scene of anarchy and confusion, and the abandonment of the force, and the withdrawal of British officers from the Chinese service. After the surrender the interior of the city presented a mass of ruins, except where the Taiping paragon had quartered themselves near the gate. In former times the native pose named Paradise above, and "creech below" now the place presented a scene of filth and decay, and the streets were a mass of mud. The Chinese with unusual vigour to restore the streets to something like their former appearance. The canals which intersect the city were cleared of their accumulations and the bridges repaired. The inhabitants who had fled soon returned, and erected new dwellings on the sites of their old habitations while trade was gradually resumed in the shops. Under these circumstances the city is recovering but it will be long if it ever recovers its former prosperity and refinement. (J. H. Chen, Herald).

SOOJABAD atn India, Punjab r bank Chenab, 80 m S by W Mooltan It stands in a fertile district, among extensive and luxuriant gardens and is surrounded by lofty but irregular fortifications, which give it a striking and picturesque appearance Its bazar is well supplied, and it has manufactures of cottons and wood turnery For the latter it is famous

BOOK, s in Austrian empire Hungary, so Lower Nentra, near the Waag which is here crossed by a ferry, about 40 m E S.E Presburg It contains 2500 inhabitants, whose chief employment is in preparing wood for matches

SOORAJGUNG, a tn India presid. Bengal dist. Myrmecinae r bank Konale, a great offset of the Brahmaputra, 69 m N W Dacca. It is the principal mart of the district, and exports rice, butter, cattle, hides, and timber. Between 1000 and 2000 river craft of considerable size are often seen at its wharves discharging or receiving cargoes.

SOOLSBUTTY a river India, which rises near Nahan, in Sirmoor in lat 80° 30' N lon 77° 59' E, flows S.W. to Thabesar then turns W. joins the Markanda, and finally after a course of above 90 m. reaches the Gaggur. Flowing generally through a level tract it often during the rains overflows its banks and inundates the surrounding country but at other times it is merely a small thread of running water. The Hindus identify it with Saraswat, the consort of Brahma, and hold it in high veneration, believing that it passes underground to the confluence of the Jumna and Ganges, and there mingles its waters with theirs.

SOOSKUL is in Austrian empire, Hungary co and about 20 m NE Stahlwassersburg, with valuable stone quarries and 2492 inhabitants.

800WURUDROOG a fort, India, S Concan 80 m S. by E of Bombay, on a small and slightly elevated island close to the coast. It was first put into a state of defence in 1663 by Ravjee and passed in 1713 into the possession of Khurshid Agria, who had once been admiral of the Mahratta fleet. In his hands and those of his successors it became a nest of pirates, who preyed so much on British commerce that Commodore James was despatched against it in 1756 and notwithstanding its boasted strength captured it without the loss of a single gun. It was afterwards given to the Mahrattas in exchange, but finally reverted to the British, on the extinction of their confederacy in 1818

SORBOGON, a tu Philippine Isles prov Albay in the island of Luzon It is situated at the head of a spacious

bay of same name, which, next to that of Manila, is the best port of the Philippines, and contains a pop. of 7312.

SORUTH a corr. India, Gujarat, peninsula of Kattywar, between lat. 20° 41' and 21° 50' N; lon. 69° 58' and 71° 13' E, is bounded N by the Arabian Sea, E by the Gulf of Kattywar, E. Babriwar, and S. and S.W. the Arabian Sea, estimated area, 8300 sq. m. The coast, which stretches about 60 m. S.E. to Dwa, and then 28 m. E.N.E. to the estuary of the Kahan at Rajpoot, is in general of moderate height, with deep soundings, so that it may be approached with safety, except towards Dwa Head where a rocky bank stretches W. N. W. for nearly 4 m. and has only 14 fathoms of water, though the depth within is 9 fathoms. The interior in the E. and N.E. is rugged and hilly rising to the granite peak of Girnar to the height of 2500 ft. From the mountains and the adjacent highlands numerous torrents stream down, and furnish ample means of irrigation. The most important stream, however, is the Bhader which, after traversing the district for 25 m., forms part of its boundary for a short distance before falling into the sea. The S. part of the district is as fertile as any part of Gujarat, the soil consisting chiefly of a black loam, on which heavy crops of sugar-cane, wheat, and *Jowara* are grown. The mango justly takes precedence among the fruits. Jounagar is the capital.

SUDAN, or **BLACK MOUNTAINS**, a range N. Africa, Tripoli, on the eastern route by Suva to Marak about 300 m. N.N.E. of the latter. The mountains consist of a yellow sandstone impregnated with iron, which gives it an outer crust of a black color appearing in the sun's rays of a deep blue. On these black rocks large round patches of a yellow or brown colour are often seen and give the whole a most remarkable appearance. The breadth of the range is 25 m. and its loftiest summit 2160 feet, though the pass along which the route is continued is about 100 ft. lower. Animal and

vegetable life is entirely absent in this region, which, according to Vogel, 'vividly recalls to your mind a landscape by moonlight.' Beyond the Black Mountains, for a distance of about 70 m., as far as Om-el-Abd, extends the desert of Dun Adee, perfectly level, with an average elevation of 1870 ft., without animals, plants, or water, and so scorching by day that to save the camels feet from being burned it is usually passed at night.

SOUK-HULAK, the cap. of Fardin Khordistan, prov. Azerbijan, at the S. end of a green valley 20 m. S. of Lake Urmiah. It consists of about 500 poor stone hovels, occupied by about 2000 souls, mostly of Khordish descent, the number of Nestorian families amounting scarcely to 50.

SOUBA, or **SOUS**, a river, Morocco, which rises near the S.W. extremity of Mount Atlas, flows S.W. 80 m. to Tardant, then W.N.W. and falls into the Atlantic about 5 m. S. of Santa Cruz or Agadir. It has been believed, from the existence of large rings in the walls of Tardant similar to those used on quays for mooring vessels that it was at one time navigable up to that town, but at present the bar of sand across its entrance is nearly dry at low-water, and at all times so shallow that no vessel drawing more than 4 or 5 ft. can enter it. The people along its banks are less bigoted, and more friendly to Christians, than the Moors generally are, and as the province of same name through which it flows is peculiarly fertile and populous, and adjoins those parts of Barbary where its most valuable productions are raised, there is reason to believe that it might be made the channel of a profitable trade.

SOUSA, or **SICA** [add.] (anc. *Hadromentum*) a pretty fortified tn., whose walls are washed by the sea, regency of and about 70 m. S.S.E. Tunis at the Gulf of Hammamet. It is commanded towards the S. by a square citadel, flanked by eight towers of Saracenic architecture built upon Byzantine

SOUSA.—From Chertou, Algeria. Photographed by the Signes de Trade.

foundations, and its houses, placed in a regular manner one over the other and whitewashed with lime present an appearance of extreme cleanliness. The principal mosque, built in a good Moorish style, is one of the most remarkable in the regency. Outside the town are both Byzantine and Roman remains though not specially noteworthy. It has manufactures of linen and shoes, and a trade in olives. The seafaring part of the population is composed chiefly of Maltese. The total population is about 8000, of whom 4000 are Moors, 1800 Jews, and 400 Europeans.—(Chambers *Africa*).

SOUTHERN or **KONKON**, a river British America, Labrador, rising in Lake Charlevoix, and flowing N. into Ungava Bay. From its source to a small outpost of the Hudson's Bay Company called South River House, a distance of 250 m., little is known of it. It is rapid and turbulent, flowing through a partially wooded country. At South River House it receives the Whapmag River and from this point to the sea, 150 m., the current, though strong, is less broken by rapids; it also widens very much, and 90 m. from its mouth it is a mile in breadth, flowing between high rocky banks thinly clothed with trees. At its mouth it is nearly 3 m. in width. Fort Chimo is situated upon its bank, 25 m. from the sea.

SOUTHLAND a prov. New Zealand, Middle Island, until 1861 a part of Otago, is cut out of the south coast part of the latter province, and has 60 m. of frontage on Foveaux Straits. The new province has a large amount of agricultural and grazing land. Its capital Invercargill, at the mouth of New River has risen rapidly into importance, and besides its commercial advantages to the province, furnishes the most convenient access to the central goldfields of Otago. The population of the province, which a very few years ago numbered about 5000, has since rapidly and largely increased. In 1863, 171 vessels, of 44,773 tons, entered the harbour, and 158 vessels, of 54,100 tons, left it; and the value of the imports was £717,478, and of the exports £21,405.

SPENCE COVE, a vil. British America, Canada East, co. and 5 m. below Quebec, on bank St. Lawrence with a E. Catholic church and several large lumber depôts, many of the timber-vessels which resort to Quebec landing here. Pop. about 2000.

SPITAL-AM-PYEN a tn. Austrian empire, Upper Austria, circle Traun, at the foot of Mount Pyren, near the frontiers of Styria, was founded in the beginning of the twelfth century, for the reception of pilgrims on their way to Palestine.

ST ELIZABETH, a vil. British America, Canada East, co. Bonaventure, 30 m. S. Quebec; with a R. Catholic church and some trade in flour and lumber. Pop. of par about 2500.

ST ELM, a vil. British America, Canada East, co. Terrebonne, in the rear of Isle Verte or Green Isle, 125 m. N. E. Quebec; with a R. Catholic church, and some trade in flour and lumber. Pop. of par about 1300.

ST ESPRIT, a vil. British America, Canada East, co. Montcalm, on the river of its name, 28 m. N. Montreal; with a R. Catholic church, boys' and girls' schools, tanneries, a carriage factory, and a large local trade. Pop. of par about 1900.

ST ETIENNE, a vil. British America, Canada East, co. St. Maurice, 66 m. N. E. Montreal; with a R. Catholic church, a tannery, several mills and a trade in lumber. Pop. of par about 3000.

ST FELIX DE VALOIS, a vil. British America, Canada East, co. Joliette, near the Bayonne, 40 m. N. E. Montreal; with a R. Catholic church, several schools, a mechanics' institute and library association, and several mills. Pop. of par about 9000.

ST FIDELLE, a vil. and par. British America, Canada East, co. Charlevoix, 1 bank St. Lawrence, 10 m. below Quebec; with a R. Catholic church, building yards and a trade in flour and lumber. Pop. about 1800.

ST FRANÇOIS, two vil. British America, Canada East.—1. A vil. and par. co. Beauce, 45 m. N. E. Quebec; with a R. Catholic church, mill work factories, a tannery and a trade in flour and lumber. Pop. about 3000.—2. *St. François de Sud*, co. Montmagny, 24 m. N. E. Quebec; with a R. Catholic church, an academy of Congregational nuns, cooperages, and some trade in lumber. Pop. of par about 1900.

ST GABRIEL DE BRANDON, a vil. British America, Canada East, co. Berthier, near Lake Maskinongé, 40 m. N. E. Montreal; with a R. Catholic church, male and female schools, manufactures of harness, some mills, and a timber trade. Pop. of par about 3000.

ST GEORGE, a vil. British America, Canada East, co. Beauce, on the Chaudière, 54 m. S. E. Quebec; with a R. Catholic church, maple-sugar and a trade in pine timber, which abounds in the neighbourhood. Gold is said to have been found within the parish. Pop. about 1500.

ST GEORGE'S BAY, British America, between the N. E. of Nova Scotia and the S. E. of Cape Breton Island, is 13½ m. wide at its entrance and 30 m. deep from Cape St. George at its N. W. to the Gut of Canso at its S. E. extremity. The cape, which rises 600 ft. above the sea, is a bold precipitous headland, composed chiefly of slate, conglomerate, and trap. Antigonish Harbour situated 11 m. S. S. W. of the cape, is of great extent, running in 6 or 7 m. to the S. W. and presents much beautiful scenery, the shores being broken into numerous coves, points, and inlets, while a range of hills rises behind to the height of 760 ft. On either side the ground is well cultivated, and at the head of the W. arm stands the village of Antigonish containing two churches, and about 500 inhabitants. (Oysters abound in the vicinity and at Monk Head, 2½ m. S. E. of the harbour, forms a cliff 45 ft. high. In the bay 2½ m. S. S. E. Monk Head is Piquet Harbour which branches into two principal and many smaller inlet coves, and inlets. The principal settlements and the church are on the N. W. branch, and on the E. and larger branch the Indians have a chapel and a reservation of land.

ST GERVAISE, a vil. British America, Canada East, co. Bellechasse, 19 m. S. E. Quebec; with a R. Catholic church, manufactures of mill-work and of tin and iron ware, tanneries, and some large general stores. Pop. of par about 3000.

ST GREGOIRE, a vil. British America, Canada East, co. Nicolet, 7 bank St. Lawrence, 67 m. N. E. Montreal; with a R. Catholic church, an academy of nuns of the Assumption, tanneries, and a local timber and flour trade. Pop. of par about 3000.

ST HENRI'S ISLAND, British America, Canada East, is the St. Lawrence, nearly opposite to Montreal, from which it is only 1 m. distant. It is well covered with trees, and rising gradually from the water has a pleasing appearance, both from the city and from different parts of the river. As a military post belonging to the crown, and garrisoned by

imperial troops, it has been fortified, and contains extensive buildings for stores, powder magazines, and a large and well-kept arsenal.

ST HENRI, two places, British America, Canada East.—1. A vil. co. Hochelaga, on the Lacine railway, about 3 m. from Montreal and included within its municipality, with an ink manufactory, and some general trade. Pop. about 1800.—2. A vil. co. L'Assomption, 10 m. S. S. W. Quebec; with a R. Catholic church, a tannery, a flour-mill, and some large general stores. Pop. of par about 2200.

ST ISIDORE, a vil. British America, Canada East, co. Dorchester, 17 m. S. Quebec; with a R. Catholic church, and a considerable trade in flour and lumber. Pop. of par about 2400.

ST JACQUES, a vil. British America, Canada East, co. J. Amoungton, 26 m. N. E. Montreal; with a R. Catholic church, a convent, a brewery, and manufactures of furniture and of tin and iron ware. Pop. of par about 800.

ST JEAN DESCHAILLONS, a vil. British America, Canada East, co. L'Assomption, 46 m. W. S. W. Quebec; with a R. Catholic church, two tanneries, and some trade in flour and lumber. Pop. of par about 1900.

ST JEAN PORT JOLI, a vil. British America, Canada East, co. L'Assomption, 54 m. N. E. Quebec; with a R. Catholic church, a literary institute, several schools, manure and mill work factories, a tannery and a trade in lumber. Pop. of par about 3800.

ST JEROME, a vil. British America, Canada East, co. Terrebonne, on the North River 30 m. N. W. Montreal; with a R. Catholic church, a Canadian institute, several schools, manufactures of leather and harness, a cooperage, and a number of general stores. Pop. of par about 1500.

ST JOSEPH, two places, British America, Canada East.—1. A vil. co. Beauce, on the Chaudière, 36 m. S. E. Quebec; with a R. Catholic church and manufactures of leather, poultry and swine. Pop. about 1000.—2. *St. Joseph de Des*, co. and near the Lake of Two Mountains, 20 m. N. W. Montreal. It occupies a height commanding a wide and splendid view, and has a R. Catholic church and male and female schools. Pop. of par about 1225.

ST JULIANE, a vil. British America, Canada East, co. Montcalm, near the St. Esprit 45 m. N. E. Montreal. It is a thriving place with a R. Catholic church, a foundry, a tannery, a large supply of water-power and a considerable trade in flour timber and miscellaneous articles. Pop. of par about 1800.

ST JAMBERT, a vil. British America, Canada East, co. Chambly, on the S. shore of the St. Lawrence, directly opposite Montreal of which it was in some respects be regarded as a suburb. It is a flourishing place advantageously situated at the S. extremity of the Victoria bridge, possesses a Protestant and a R. Catholic church, and two schools and is becoming the centre of a large and rapidly increasing traffic. Pop. about 800.

ST LAURENT, two places British America, Canada East.—1. A vil. co. Jacques Cartier on the island and 6 m. from the city of Montreal; with a R. Catholic church, a college of the Sisters of St. Joseph, a convent of the Sisters of St. Croix, a brewery and some local trade. Pop. of par about 2800.—2. A vil. co. Montmagny, on the island of Orleans, not far from the S. bank of the St. Lawrence, 7 m. E. Quebec. The most important branch of industry is boat-building. Pop. of par about 1000.

ST LEON, a vil. British America, Canada East, co. Maskinongé, on the Rivière du Loup 65 m. N. E. Montreal. It is celebrated for its mineral springs. Pop. of par about 2500.

ST LIGORI, a vil. British America, Canada East, co. Montcalm, near the river Lac Ouanan, 43 m. N. W. Montreal; with a R. Catholic church, and a large amount of water-power, which has been made available for the flour and lumber trade. Pop. of par about 2000.

ST LIN, a vil. British America, Canada East, co. L'Assomption, on the Achigan 22 m. N. Montreal; with a R. Catholic church, male and female schools, manufactures of sawdust and shavings, and a number of general stores. Pop. of par about 2000.

ST LUCE, a vil. British America, Canada East, co. Rimouski, 7 bank St. Lawrence 180 m. N. E. Quebec; with a

R. Catholic church, and several cooperages and general stores. Pop. of par about 3000.

ST MARY, a vil. British America, Canada East, co. Verchères, on the Richelieu 20 m. N.E. Montreal with a R. Catholic church, several schools, a literary institute, a Jean Baptiste society, flour-mills, and general stores. Pop. of par about 1500.

ST. MARY'S, two places, British America, Canada East.—1, *St. Mary de Monville* cap. co. Bonville, 17 m. E. Montreal. It possesses a Protestant and a R. Catholic church, a college of a superior description with seven professors, a convent, a race course, manufactures of bricks, carriages and saddlery, and a considerable trade in grain, horses, &c. Pop. of par about 1000.—2, A large vil. co. Beauce, on the Chaudière 27 m. S. Quebec with a R. Catholic church, a college of the *Frères de la Doctrine Chrétienne*, a convent of the Congregational nuns, and some trade in lumber. Pop. of par about 5500.

ST. MARTHE, a vil. British America, Canada East, co. Veureuil, 35 m. W.S.W. Montreal with a R. Catholic church, an academy, a tannery, a cooperage, and a carriage factory. Pop. of par about 2000.

ST. MARTIN, a vil. British America, Canada East, co. Laval, on the Des Prairies and Jean, two branches of the Ottawa, 12 m. N.E. Montreal, with a R. Catholic church, an academy of the St. Joseph Order, an observatory, a convent, several male and female schools, a St. Jean Baptiste society, an extensive carriage factory, a number of general stores, and a good local trade. Pop. of par about 8500.

ST. MARTIN, a vil. British America, Canada East, cap. co. Châteauguay, on the river of that name, 18 m. S.W. Montreal, with a R. Catholic church, a current court which is held every four months, tanneries, carriage factories, cordage and other mills. Pop. of par about 4000.

ST. MICHEL DE BELLECHASSE, a vil. British America, Canada East, cap. co. Bellechasse, r. bank St. Lawrence, 15 m. F. Quebec with a R. Catholic church, a tannery, several general stores and a considerable trade in lumber. Many of the inhabitants are employed as pilots. Pop. of par about 2750.

ST. NICOLAS, a vil. British America, Canada East, co. Laval, r. bank St. Lawrence 18 m. above Quebec, with a R. Catholic church, a tannery, saw mill, and some trade in lumber. Pop. of par about 3200.

ST. OURS, a vil. British America, Canada East, cap. co. Richelieu, on the river of that name, 33 m. N.E. Montreal, with a R. Catholic church, a Canadian institute, and an important market, held weekly in winter, and twice a week in summer. Pop. about 1100.

ST. PAUL, a to on the N.W. shore of the *Isle de Bourbon* or *Rédoubt* in the Indian Ocean. It is a large straggling place built along the shore of a gulf situated between *Pont de Galle* and *St. Gilles*. In 1847 but exposed roadstead induced the French to attempt the formation of a harbour at the latter point, but after the expenditure of large sums the plan has been abandoned as impracticable.

ST. PAUL, a vil. British America, Canada East, co. Joliette, 40 m. from Montreal with a R. Catholic church, an academy of the *Frères de la Doctrine Chrétienne*, and some general trade. Pop. of par about 1300.

ST. PAUL, a to U. States, cap. state of Minnesota, 1 bank Mississippi, at the head of its navigation and 12 m. below St. Anthony's Falls. In 1847 it consisted of only a few huts, and bore the name of *Pigs Eye* but no sooner was attention called to it than the advantages of its site were seen, and it has accordingly increased under its new name with amazing rapidity. It is now a large and well built town, arranged in spacious streets with commodious sidewalks, and contains lofty brick warehouses and well-supplied stores and shops. Among its principal buildings are six churches, some with spires, others without them, a female academy of a superior description, and several large hotels. For the benefit of the reading public no fewer than ten newspapers are published, four of them daily. The wharves, except during the four months from November to March, when the river is frozen, exhibit a very busy scene, upwards of 300 steamers arriving annually to land new settlers and carry off the produce of a large tract of territory particularly rich in corn and lumber. St. Paul may be considered as still

in its infancy more especially should the scheme of connecting it by railway with Lake Superior be carried out. Pop. (1860), 10,401.

ST. PAULIN, a vil. British America, Canada East, co. Maskinongé 60 m. N.E. Montreal with a R. Catholic church, and a flourishing lumber trade, consisting chiefly in the export of planks to the U. States. Pop. of par about 1400.

ST. PIERRE, three places, British America, Canada East.—1, *St. Pierre du Sud*, co. Montigny 30 m. N. Quebec, with a R. Catholic church, and some general trade. Pop. of par about 1600.—2, A vil. on the island of Orleans, co. and opposite the falls of Montmorency 8 m. N.E. Quebec with a good local and lumber trade. Pop. of par about 900.—3, *St. Pierre des Esquisses*, co. Nicolet, r. bank St. Lawrence, 52 m. W.S.W. Quebec, with a R. Catholic church, two tan yards and a good general trade. Pop. of par about 3000.

ST. ROCH DE LACHIGAN, a vil. British America, Canada East, co. L'Assomption on the Achigan 35 m. N. Montreal, with a R. Catholic church and an active flour and lumber trade.

ST. ROCH DES AULNAIS, a vil. British America, Canada East, co. L'Islet, r. bank St. Lawrence, 50 m. N.E. Quebec with a R. Catholic church, several tanneries, a flour-mill and a number of general stores. Pop. of par about 8000.

STE. ROSE, a vil. British America, Canada East, co. Laval, r. bank Ottawa, 70 m. N.E. Montreal with a R. Catholic church, and two extensive carriage factories. Pop. of par about 3000.

ST. SAUVEUR, a vil. British America, Canada East, co. Terrebonne, on the North River, 40 m. N.E. Montreal with a Wesleyan and a R. Catholic church, two tanneries, and a number of general stores. Pop. of par about 2000.

ST. SIMON, two places, British America, Canada East.—1, *St. Simon de Rouville*, co. Rimouski, r. bank St. Lawrence 140 m. N.E. Quebec, with a R. Catholic church, and a little local trade. Pop. of par about 1800.—2, *St. Simon d'Yvesville*, co. Bagot 35 m. N.E. Montreal with a R. Catholic church, and manufactures of iron ware. Pop. of par about 2400.

ST. SYLVESTER, a vil. British America, Canada East, co. Lethbridge 34 m. S. Quebec. It possesses a church of England, Free Wesleyan and R. Catholic churches and carries on some general trade. Pop. of par about 3500.

ST. THOMAS, a vil. British America, Canada East, co. Joliette, on the St. Lawrence and Industry railway 40 m. from Montreal with a R. Catholic church and manufactures of carriages and agricultural implements. Pop. of par about 1700.

ST. THOMAS MOUNT, a cantonment, India, presid and 8 m. S.W. Madras, and about 4 m. E. of the Coromandel coast. The little hill, only 120 feet above sea-level which gives it its name, according to an ancient tradition the scene of the martyrdom of St. Thomas the Apostle. The excellence of its position for a cantonment was however overlooked, until it was made the principal station and headquarters of the Madras artillery. To the W., immediately under the mount, are two ranges of barracks for European artillery the one facing the extensive parade-ground, and the other the European hospital and the Protestant Episcopal church. This church, a neat and well-ventilated structure, is seated for 500 persons. The other places of worship are a Wesleyan and two R. Catholic, the one for the European soldiery and the other for the Portuguese Christians. The native town consists of three parallel rows of brick and tiled houses. The only other buildings requiring notice are the artillery depot, the artillery mess-house which is said to be the finest in India, and the prison camp factory which supplies the whole of the Madras army. The native pop. of St. Thomas Mount is estimated at 17,730.

ST. USULEE, a vil. British America, Canada East, co. Maskinongé on the Rivière du Loup, 60 m. N.E. Montreal with a R. Catholic church, two tanneries, and some general trade. Pop. of par about 2500.

STE VICTOIRE, a vil. British America, Canada East, co. Richelieu, 4 m. N.E. Montreal, with a R. Catholic church, boys and girls schools, and some local trade. Pop. of par about 2000.

ST VINCENT DE PAUL, a vil British America, Canada. East on the Isle Jesus, dist. and 13 m from Montreal, with a R. Catholic church male and female schools, and some general stores. Pop. of par 8000.

STADLBAURA, a tn. Austrian empire, Upper Austria, circle Hainburg, on the Traun, opposite St. Leonhard, with which it is connected by a bridge, 30 m. S.W. Linz. It has a fine church of a circular form, with a tower at each angle, a threefold apse, three altars, and a pavement of three-colored marble. The abbey who built the church to commemorate a deliverance from the plague in 1717, having dedicated it to the Trinity has endeavored to make it correspond with its name by giving this curious prominence to the number three in everything connected with it, whether external or internal. Pop. 1600.

STANISLAU or **STANISLAWOW** [add.] a tn. Austrian empire Galicia, cap. circle of same name on the Bistrina, an affluent of the Dniester, 74 m. S.E. Lemberg. It consists of the town proper and three suburbs. It is one of the most important government offices and has a beautiful church, situated in a spacious square, and containing monuments of the Potocki family a statue of the emperor Francis I. situated on the same square an upper gymnasium a high school and other educational establishments, a military hospital, an infirmary, two machine factories and a considerable trade. It was founded by Stanislaus Potocki in 1664, and was pillaged by the Tartars in 1692. Pop. 14,000.

STANLEY an isl. S. America, in the Gulf of San Miguel, an E. arm of the Bay of Panama. It is 1½ m. long by 1 m. broad is low and wooded and standing in the mouth of the fine harbour of Darien, situated within the gulf divides its entrance into two channels, the principal one called the *Boez Grande*, and the other the *Boez Chico*.

STARAI MAINA, a tn. Russia, gov. Samara circle Staropoli near the confluence of the Mama with the Uika, which joins the Volga about 3 m. below. It has two churches, pawn refectory, and a trade in corn, of which large quantities are shipped here. Pop. 1900.

STARO TCHERKASKAJA, a tn. Russia, gov. Don Cosack circle Novo-Tcherkask r. bank Don. It was once the capital of the land of the Don Cosacks, has an important yearly market, and contains 5691 inhabitants.

STATEN ISLAND [add.] S. America, 18 m. E. of Terra del Fuogo from which it is separated by the Strait of La Malina. It is an deeply indented by bays as to form nearly four different sides, and stretches for 38 m. between E.N.E. and W. & W., with a breadth which nowhere exceeds 8 m. The surface is mountainous. Some of its peaks, rising to the height of 3000 ft. and usually covered with snow offer a good landmark for ships bound into the Pacific or returning from it. The harbours, all of which are, with one exception, confined to the N. side, being merely a continuation of the valleys are like them surrounded by high land, and deepen rapidly towards the centre. The coast consists almost every where of rocky cliffs, which rise abruptly from the water 500 to 500 ft. and have a depth of 15 to 12 fathoms close to their base. The harbours, though secure enough when gained, are all more or less difficult of access from the force with which the tides set across their mouths, and the variability of the wind, which usually follows the direction of the various ravines through which it finds an outlet. The most eligible harbour for shelter is Fort Cook on the N.E. coast. In respect of geological structure Staten Island consists chiefly of quartz rock and graywacke, which form the mountain masses, and of clay slate and micaceous schist. The quartz is in many parts disposed in vertical veins. The only quadrupeds are the ox, the rat, and the mouse. Birds are more numerous, and comprise three species of penguins, some albatrosses, and others, the last form extensive flocks, and build in the loftiest trees on the hills. With the most hurricanes and humid climate on the globe, and a low but very uniform temperature, vegetation flourishes with such surprising beauty and luxuriance, that the rugged aspect which the island wears at a distance is changed on reaching it into pastoral and unbroken verdure. At all seasons the ground is covered with plants and the hills covered with evergreens. The prevailing tree is the *Adiantum* bush, which grows to the height of 30 to 40 ft. with a diameter of 3 to 5 ft. and sometimes doubles these dimensions. Even the sea shores

in the luxuriance of the vegetation. Various signs, not infrequently of a gigantic form, entangle the harbours and shores. Some of them are 300 ft. long; some of singular strength and stately stems become, as it were, cabs in the sea; some spread their tough and leathery substances like sails, so that boats, bows, and oars may be made of it; some form ropes and cables to moor boats with, and some yield a pure and tasteless jelly, the surpassing the saccharine mass of our shores.

STEBNIK, a tn. Austrian empire, Galicia, circle and 23 m. S.E. Bamber with extensive salt mines which were opened in 1845 and have proved very productive.

STEGERSBACH, a tn. Austrian empire, Hungary co. Eisenburg, 30 m. W. & W. Steinsammler, in a fertile district, with large yearly markets, and 2000 inhabitants.

STEINBERG a tn. Austrian empire, Upper Austria, dist. and 4 m. N.E. Linz, 1 bank Danube, opposite to the mouth of the Traun. It is partly surrounded by walls, and has a castle perched on a rock overlooking the town, and an hospital. Pop. 1900.

STEIN a tn. Austrian empire Transylvania, circle and about 34 m. NW Kronstadt with salt springs. It is the vicinity Roman utensils, weapons, and coins have been found. Pop. 1960.

STEINAMANGER [add.] a tn. Austrian empire Hungary, cap. on Eisenburg on an ascent of the Rad and on site of an ancient Roman town, 55 m. S. by E. Vienna. It is the seat of a bishop and the seat of several important courts and public offices, and has a cathedral, regarded as the finest church in Hungary, built in the latter part of last century in the modern style, and adorned with frescoes by Dorminiator and beautiful altar-pieces; a bishop's palace handsome country buildings an ancient strong castle, a diocesan seminary Franciscan and Premonstratensian monasteries an asylum for children an upper gymnasium, a high school and a bathing establishment. It contains 3558 inhabitants, mostly S. Catholics. In the vicinity are numerous remains of the Roman town *Savaria*.

STENIMACH or **STENIMAK** a tn. Turkey in Europe Roumelia, beautifully situated on the N. slopes of Mount Rhodope, 30 m. W. N. W. Adrianople. It is an ancient place with many interesting remains attesting its ancient splendor, and until about a century ago enjoyed a high degree of prosperity, carrying on a very extensive trade domestic and internal. The envy of the Turks displaced itself with its usual barbarity and Stenimach was devastated. It has, however, in a great measure recovered from the disaster and now contains about 10,000 inhabitants, almost all Greeks, who live partly in Stenimach, properly so called and partly in Am polioe, another town or suburb situated on the opposite side of the stream which, descending from the mountain, flows between the two places. Among the public buildings are eight churches and five schools one of them for girls. Wine and silk are both raised in sufficient quantity to form important articles of trade.

STERLING, a tn. U. States, Illinois on r. bank Rock River, and on the Atlantic branch of the Chicago and North-western railway 110 m. W. Chicago. It contains seven churches, a bank, flouring mill a foundry and machine shop, and a manufactory of agricultural implements. A large quantity of grain and other produce is shipped here, and the river affords abundant water-power, which has been improved by a stone dam.

STICKEEN **STICKEN**, or **STICKEN**, a colony, British N. America, formed by decree, July 12, 1863, of the N. portion of British Columbia. It is bounded W. & S. W. by the territory formerly belonging to Russia, but recently sold by her to the U. States, E. by British Columbia, E. by the 125° meridian E. from Greenwich and N. by the 62° parallel of N. latitude. It contains the lands on the S.E. corner of the Yukon, on the Upper Liard, on the Stickens, and the Takto. It takes its name from the Sticken or Frances River, which falls into the Pacific Ocean opposite Prince of Wales Island, and about 160 m. N. from Fort Simpson. Gold washings were discovered on this river about 70 m. above its mouth, at a point called Little Cabin, extending upwards to Big Cabin, 190 m. above its embouchure. A steamer has ascended this river 160 m. and the Takto, a stream which falls into the Pacific further N. 55 m. On this latter river copper is

found. Comparatively little is known of the interior of this colony, but it has been described as a desert waste of hills and rocks.

STINKENBRÜNN, a tn. Austrian empire, Hungary
co. and 14 m. N Oedenburg; with a colliery alum and vitriol
works, lunehills, and tileworks. Pop. 1000

STIRLING, a v/l British America, Canada West, co Hastings, 80 m. N E. Toronto. Though founded only about 1860 it already possesses three churches, a superior grammar school, and several extensive factories and deals largely in agricultural produce. Pop. about 1000

STOCKTON, in U. S. State of California. Pop. on San Joaquin, near the San Joaquin River, with which it is connected by a creek, 50 m. S. by E. of Sacramento. The site low and flat, in an extensive and fertile plain. Many of the houses are neatly built, and surrounded with gardens; and the town contains eight churches, an asylum for the maimed, and several schools. It is supplied with water by means of pumps worked by one hundred and fifty wind mills which raise the water through pipes inserted in the ground, there is also an artesian well one thousand feet deep. A railway to connect Stockton with San Jose and Sacramento is in progress, and a steamboat plys daily between it and Sacramento.

STOLEK, or Stolek, a town in Turkey in Europe, located in the Balkans, is a pleasantly situated in the straits of the Bosphorus, which here forms a picturesque waterfall. It is defended by a fort, which is regarded as the most important one on the Herzegovina, though, from being commanded by adjoining hills, it possesses little real strength. In early and to some extent also in recent times, however, it has played an important role in the Balkan wars, and has been twice captured by the country. Among the houses is one which belonged to Ali Paşa, the well known vizier of Herzegovina. The public buildings include several mosques, whose white minarets have a pleasing effect. Stolek, which owed much of its importance to its position, has been almost entirely destroyed by fire, and the only thing which remains of its old life is the old city wall, which has been left as a ruin.

STOLZENBURG a tn Austrian empire, Transylvania, 10 m S of Sibiu, 10 m N of Hermannstadt, with the ruins of a castle which has stood several sieges, a trade in wine, and 2483 inhabitants.

STOPNICA or **STOPNITSA**, a tn. Russian Poland gov. Radom, in a mountainous district, has a handsome Reformed church, an old castle, and an elementary school. Pop. about 2261.

STOEZ, a town in Austria, Hungary on Zips, 19 m. W. Leutschau with a high-school mines of iron, silver and copper and 1400 inhabitants.

STRADBROKE, an rd. Australia Queensland form, with Moreton, situated immediately to the N of it, the E. boundary of the large and beautiful expanse of Moreton Bay. It is about 83 m. long from N to S by 7 m. broad, is of moderate elevation, and, although not destitute of trees, is bare and barren in the extreme, nowhere presenting the least appearance of fertility. Its sea face from its S. extremity to Look-out Point, in the N. E. extremity, is merely a succession of sand beaches and rocky points.

STRASSNITZ, in Austrian empire, Moravia, circle of Olmütz, 11 m. S.W. Hradisch is a beautiful place on the March which is here crossed by a chain bridge. It is the seat of several public offices, and has two churches, a synagogue, a high school an old castle with extensive gardens, five annual markets, and an extensive trade in corn and excellent wine. It contains 4700 inhabitants, of whom 600 are Jews.

STRASSWALDEN a tn Austrian empire duchy and
25 m. N E. Salzburg; with a handsome parish church a tower
hospital and 1000 inhabitants

STRATYN a to Austrian empire, Galicia, circls as
N W Bressan, with a paroh church. It possessed a Great
printing-press at the beginning of the seventeenth century
Pop. 1400.

STRELITKA, or **ARROW BAY**, Black Sea, in the S. W. of the Crimea, forms one of a series of indentations between the head of harbour of Sevastopol and Cape Khankaya. It is little more than 1 m. W. of Quarantine Bay and of dimensions sufficient to form a spacious harbour, and to receive 11 m. into the land. The depth at its entrance

BOOK LXXI.—VOL. II.

is 18 fathoms, but diminishes gradually to 6, and in some parts is only 3 fathoms.

STRENGBERG is in Austrian empire, Lower Austria on a steep mountain of same name, 78 m W Vienna, has an hospital and two saw-mills, and contains 1810 inhabitants.

STRIGOVO, a tn. Austrian empire, kingdom of Croatia and Slavonia, co. and 11 m. N E. Waradin on the plain
sola of Murakoo. As a town it has only 320, but as a parish
3370 inhabitants; and has an ancient castle, and a trade in
excellent wine.

STRUNKOWITZ, a in Austrian empire, Bohemia, circle and 24 m. S.E.W. Pisek, on both sides of the Blatitz with manufactures of shoes, stockings, and linen, and 1000 inhabitants.

STRUZINA, a town Austrian empire, Galicia, circle Tarnow, and so near the town of Tarnow as to be properly its suburb contains 3560 inhabitants. On Mount St. Martin, in the vicinity are a ruined castle, and a church built of larch wood and three centuries old.

STRY [adj.] a town Austrian empire, Galicia, cap. circle of same name I bank Stry, an affluent of the Dniester which here divides into several arms, 40 m S by W Lemberg. It was once a place of strength, and belonged to the chivalrous John Sobieski on whom it was bestowed for his victories over the Turks. It has a high school an infirmary an hospital for the poor, and contains 6184 inhabitants.

STUART LAND, Australia, the name given in honour of the first discoverer to the central part of the country lying between the Gulf of Carpentaria and the Gulf of St. Vincent, N of South Australia, and forming the S part of the Northern Territory, N of Western Australia, and the S of Queensland, provinces of North Australia. Except by Mr. John M. Donald, Stuart it has not yet been explored, and as he traversed only the central part, in his journey to and from the N coast of the continent, little is yet known of its character. Mr. Stuart passed over ranges of hills, intersected by river beds mostly dry and saw occasionally patches of good country, but the prevalence of long continued droughts produces an aridity and consequent sterility of soil, that appears to render the country generally unfit for human habitation.

STUBEN (Upper and Under) two places, Austria. Empire, Hungary co. Arva-Thurocs, about 5 m. N.W. Neosold.—*Ober* or *Upper Stuben* stands in a wooded and pastoral district, and contains 1900 inhabitants.—*Unter* or *Under Stuben*, situated about 4 m N of the former contains only 500 inhabitants, but is famous for its warm baths.

STUBICA, a tn Austrian empire, kingdom of Croatia and Slavonia, in a mountainous district co. and 12 m N Agram with much-frequented mineral springs, and 1000 in habitants.

STUDFIN a tn Austrian empire, Moravia, circle Iglaa
52 m. W Brünn; with an ancient parish church, two large
weeklies and two weekly markets and 1160 inhabitants

RUAKIN [uak] a seaport, Dublin, cap. prov. of Conn. name, on an island on the W coast of the Red Sea, lat. 13° 17' N. lon. 28° 30' E. It consists of the town proper, and a suburb on the mainland, which has outgrown it both in population and importance; is defended by a small fort, and contains a considerable number of houses, a school, and a mission station. No deriving of notice are the governor's residences, the custom-house, and the bazaar. The harbour is formed by a channel about 200 yards wide, which penetrates between the mainland and two islands, on one of which the town is built. Though completely sheltered from all winds, it is too shallow to admit large vessels. There is, however, a considerable anchorage, and a small pier, and coasting vessels, and fishing boats, frequent the place. The population is about 7000.

BLRATHOO a fort and cantonment, India, Ch-Sing State, Territories, on dist. or paragraph of same name, 163 m. N. of Delhi. The paragraph, which was reserved by government in 1816, on the settlement of the H.H. status at the conclusion of the Nepalese war, is a sort of table-land, 2,400 m. above sea level, and is bounded by a low ridge, 2,600 m. high, but rather open southwards towards the plains. Agriculture is carried on with great industry and skill, the level spots on the banks of streams being cultivated for rice, while the mountain-slopes are formed into a succession of terraces, and produce good crops of wheat, barley, mustard, etc. The population is 10,000, and the area of cultivation on an estimate, being 11,000 fr. from the right bank of the Ghaggar. An old fort has been converted into a school.

The salubrity of Subanoo having been satisfactorily tested, it has been selected as a sanatorium for troops.

SUBIG is a Philippine lake, on the W side of the island of Luzon, lies in lat. 14° 22' 56" N; lon. 121° 5' 30" E and has a pop. of 8935. The bay on which it stands, though of limited extent, is a safe haven for vessels of small draught.

SUCRA is an Austrian empire, Gletsch, circle and 8 m. S.W. Wetzstein, 1 bank Shera, with a beautiful parish church, a baronial castle with fine gardens, iron and copper mills, and 2425 inhabitants.

SU-CHOW, a tn. China, prov. Szechuan, 1. bank Yang-tze-kiang at the confluence of the Min-kiang coming from the N. 125 m. S. by E. Ching-toe-ko; lat. 28° 46' 4" N. lon. 105° 7' E. It is a large place surrounded by walls, and in quiet times carries on a very extensive trade; but when Loo-tsun-colored Earl visited it in 1951 civil war was raging in its vicinity and he found it impossible to gain admission, as the gates were closed and an attack by the rebels was hourly anticipated. Under ordinary circumstances its advantages as a commercial entrepot are very great. The Min-kiang is at all times navigable for large junks up to Kueing a distance of about 100 m., while the Yang-tze-kiang, all the way down to Chung-king has generally a depth of 8 fathoms in the fair way, and of seldom less than 3 fathoms close to the bank. The products of the district around Su-chow are rice and yellow silk, wax, honey, coal, green tea, and some iron and iron ore, which come to the town. Immediately above Su-chow the Yang-tze-kiang takes the name of the Min-cha-kiang, or of the Min-kiang, according as the former or the latter is regarded as its continuation. The Chinese seem to give the preference to the Min-kiang, and identify its source as that of the Yang-tze-kiang.

SUDOGDA a tn. Russia, gov. and 20 m. S. S. Vladimir cap. circle and on a river of same name. It contains two churches and several industrial establishments. A beautiful white stone found within the circle is much employed in making statues. Pop. 2134.

SUGHRA a support, Arabia on the shore of the Indian Ocean, district of Fadli 80 m. E. N. E. Aden with a stone castle, in which the sultan or chief of the district takes up his residence several months each year. The haven is protected by a reef of rocks, and has 9 fathoms water. Good water oxen, sheep, fowls, oxen, and melons are to be obtained. In the neighborhood dates and millet grow plentifully. Pop. 200.

SUGLEK, or **SUGOLKRA**, a river India passed Madras which rises in a mountainous district on the frontiers of Kurnool and Cuddapah, flows first S. E. then south by due S., and joins the Pennar on its right bank, 15 m. of direct distance above its mouth. Its whole length is about 80 m.

MUK ABRAS or **ROCK HABAS**, a vil. N. Africa, Algeria prov. and 80 m. E. Constantine, on an affluent of the Mejerda, in a mountainous district near the W. frontiers of Tunis. It occupies the site of the ancient Tagaste and has an important native market. Pop. 1300.

SUK EL-FAWWAR a tn. Anatolia Turkey, pashalik and 100 m. S. E. Beyrut, on the Fawar canal E. of left bank of Libanus. It was formerly a large and thriving place frequented by a number of small towers but having lost the water which fed its canal through the breaking of one of the dams at the mouth of the Hishik was abandoned by its inhabitants. The ruins of its walls and houses extend fully half a mile along both sides of the water-course. Recently a return of its prosperity has been promised, by the repair of the dam which caused the original calamity.

SULLI, a mountain fort, Turkey in Europe, S. Albania, eyalet and 15 m. W. W. Yashka, on the Kalama. It is the chief place of the Sullow, who distinguished themselves so much during the struggle for Greek independence, and afterwards nearly all submitted to Greece or Capodistria.

SULLEPKO, or **SULLEPKO**, a tn. Mexican Confederation, state and 60 m. S. W. Mexico, in a narrow valley at the height of 7000 ft. above the sea. It has a Franciscan monastery and was early celebrated for its salus, which are no longer worked.

SULLEKI, a tn. Central Africa, Barotsi prov. Nambyo, 100 m. N. S. Kano. It is a large place, consisting of several detached hamlets, and containing about 5000 inhabitants. Its markets are the most important in Muzony. The chief

agricultural product is millet which is grown to a great extent under rather disadvantageous circumstances, as the obstructing roots of the down-bush make cultivation extremely difficult.

SULTANABAD, or **SHAKH SAW** a tn. Persia, prov. Irak Ajem, 160 m. S. W. Tehran. It manufactures a few carpets. Its markets are abundantly supplied with European goods, especially hardware from Russia and colors stuffs from England. Pop. 8000.

SULLA, a tn. Austrian empire, Lower Austria, circle Lower Mauthausen, on the Sulzbach 35 m. N. N. E. Vienna. It contains 1900 inhabitants, who are chiefly employed in the culture of the vine and the rearing of cattle.

SUMBE, a territory W. Africa, Kibinda Land, between lat. 11° and 12° 30' S., lon. 15° 30' and 14° E.; bounded, N. by the Kuve or Kave, W. by the Atlantic, S. by the Kuve or Kave, and E. by the territories of Ambula and Saller. Its length measured along the sea-coast from N. to S. is about 90 m., its breadth nowhere exceeds 80 m. The surface, elevated on the E. descends gradually and becomes flat as the sea is approached. On the heights are several extinct volcanoes, from the sides of which a large quantity of sulphur might easily be obtained. In the N. part of the territory is the district to which the Portuguese give the name of Valia or Old Benguela, but is known to the natives as Timba in the central part are the Portuguese presidium or fort of Vera Redonda, and the factory of Klobene and at intervals along the coast, in the southern portion were no fewer than five European factories of which Egypt is the only one now subsisting, the predatory natives having pillaged and destroyed all the others. The Musumbe or inhabitants of Sumbe, are in person tall and vigorous, and would be rather favourable specimens of a semi-barbarous race, were they not addicted to the horrible practice of cannibalism. Small as this territory is it is ruled by no fewer than three independent chiefs, while part of it is at the same time possessed or claimed by the Portuguese. 1 sq. about 35,000.

SUMBULPORE a dist. India, on the S. W. frontier of Bengal, between lat. 21° and 22° 5' N., lon. 85° 6' and 84° 51' E. is bounded N. by Ryghur and Gangpoor, E. by Bomet and Bombra, S. by Sonpoor and Patna, and W. by Phooly, Haranghur and Burghur; length E. to W., 113 m., breadth, 80 m., area, 4693 sq. m. It is divided by the Mahanday into two unequal parts, an E. and a W. the latter by far the larger. The E. part is mountainous and woody; the W. generally level and in some places greatly depressed. The valley is only 400 ft. above sea level and has an alluvial soil, which raises heavy and excellent crops of rice, wheat, and sugarcane. Indigo abounds in a wild state, but is not cultivated, though it was so formerly, and it is thought might still be with advantage. The only mineral of which the district boasts is the diamond, of which the specimens are found in the beds of the Mahanday and its affluents. The diamond-seekers, who carry on their avocation from November to the rainy season are a very dissipated race. Pop. 800,000.

SUMEGH [add] a tn. Austrian empire, Hungary, on Zala, in a marshy district, 20 m. N. E. Zala Eisenstadt, with a palace, a palace in which the Bishop of Veszprim resides a high-school, a Franciscan monastery with a church manufactures of calico a trade in wool and wine much frequented yearly markets, and 4257 inhabitants, mostly R. Catholic.

SUPERIOR CITY, U. States, Wisconsin, co. Douglas, exists more in prospect than in reality. The site selected for it is at the mouth of the Nemadji, on the W. extremity of Lake Superior and the object in view is to make it the great entrepot for the traffic of the lakes from the E. and the basin of the Mississippi from the W. The site, mostly level, is elevated 84 ft. above the lake and 628 above the sea. The town contains several churches a large hotel, and several steam saw mills. Steamboats ply in and from Detroit, Chicago, &c., and large quantities of lumber, fur, and fish are shipped. Copper is found in the country. The harbour is commodious and safe. In 1855 the work of building the town commenced, and in 1860 the inhabitants amounted to 534. In 1865 the number had increased to about 800.

SURAJ a tn. Russia, gov. and 25 m. N. N. E. Vitepsk, cap. circle of same name, on the Dvina; with two churches, a charitable institution, and a pop. of 1573.

SURAJPOOR, two places, India:—1 A. in N.W. Province, dist. Beasleedhar, 22 m. S.E. Delhi with a well-supplied bank.—2 A. in North-western Province, district of Peshawar, right bank Ganges, 117 m. above Allahabad, is irregularly built, and somewhat ruinous in its appearance, but possesses a good bazar, and a number of Hindoo temples and ghats.

SURAT [add.] a town in India, near the S.E. extremity of Gujarat, say dist. of same name, 1 bank Tapti, about 20 m. above its mouth in the Gulf of Cambay. It is nearly in the form of a semicircle of which the river forms the diameter or chord, and the perimeter measures about 5 m. Near the centre stands the citadel, which though small, has bastions, covered-way, and glacis. The town, surrounded by a wall with semicircular bastions and battlements in good repair possesses few attractions, and consists of narrow winding streets lined with lofty houses of which the upper story formed of a framework of timber filled up with brick, projects beyond the base. The houses of the British inhabitants, situated in the vicinity of the fort, are usually of good size, with spacious inclosures. The old French factory standing without the walls but completely deserted contains some handsome and commodious buildings. The Dutch factory also described long ranked as the most regular and best constructed edifice in Surat. The palace which belonged to the nawab is a plain structure of moderate dimensions. Towards the end of the eighteenth century Surat was flourishing. Its bazars were filled with costly merchandise, partly the product of its own looms and its streets and thoroughfares were filled with picturesque groups of natives, and strangers from all parts of the world, in their respective costumes. It then ranked as the capital of W. India, but having been supplanted in this respect by Bombay and having in a great measure lost both its manufactures by British competition and its trade by the silting up of its harbour it is now only the ghost of what it was. One other cause of decadence may be found in the calamities which it has sustained from repeated inundations of the Tapti. That its name still figures in commercial lists, is owing to its being still the principal mart for the cotton which is extensively grown in the surrounding country.—The district to which Surat gives its name, lies between lat. 20° 15' and 21° 11' N. lon. 72° 45' and 73° 24' E. is bounded N. by Broach, E. by Gujarat, S. by Broach and Tannah, and W. by the Portuguese territory Damão and the Arabian Sea and has an area of 1629 sq. m. and a pop. of 462,684.

SURJOO two rivers India tributaries of the Gogra.—1 *Eastern Surjoo*, rises in Nepal in lat. 28° 15' N., lon. 81° 57' E. flows first W. N. W. to the frontiers of Orissa then nearly due S. and joins the Gogra on its left bank, after a course of about 160 m. At its mouth it expands into a kind of morass.—2 *Western Surjoo* rises in a gorge of the Himalayas, in Kumaon, at the height of about 7000 ft. above the sea, flows successively S.W. and S.E. and about 12 m. after receiving the Ramganga, and being indifferently called by its name, or retaining its own, falls into the Gogra after a course of 90 m.

SURMENEH a town in Turkey in Asia, prov. and 20 m. E. by E. Trebizond, at the mouth of the Kara Dere in the Black Sea. It stands on a limestone height, and consists of houses built of stone, but distinctive both in size and height. The shops, kept chiefly by Greeks are very indifferently supplied, the chief articles being woolen and cotton cloth, tobacco and groceries. The exports consist of wine, oil, and fruit. Pop. 3000.

SUSA, or *Scopa* [add.] a town in Africa, regency and 65 m. S.E. of Tunis, on a bay of the Mediterranean. It is built partly along the shore and partly on a height above it, is surrounded by a wall nearly 1 m. in extent, and defended by a fort, and contains some handsome houses adorned with columns obtained from Roman remains in the vicinity several fine mosques, and a market bazaar. The harbour though open to the winds allows large vessels to come within a short distance of the shore, and there is in consequence a considerable trade in which the principal exports are oil, wool, pottery, and a few other articles of native manufacture. Pop. about 11,000.

SUBINTSCHI a town in Russia, gov. and circle Kaluga. It has a church, and carries on a large trade in hemp-oil,

which is sent partly into the interior and partly to St. Petersburg. Pop. 6831.

SUTTO, a town in the Austrian empire, Hungary on the Grana, on the Danube, with brandy distilleries, a marble quarry, and a trade in the excellent wine of the district. Pop. 1050.

SVERTZIANY a town in Russia, gov. and 42 m. N.E. Vilna with a church, a girls school, and a pop. of 5497.

SVILAINATZ, a town in Turkey in Asia, Servia, circle Kralina, near the Beava, above its confluence with the Morava, 52 m. S.E. Belgrade. It has a church and a school but the chief attraction of the neighbourhood is the monastery of Manassya, which has a little to the S.E., is built in the Grecian style, and is adorned with frescoes and other paintings by some of the oldest Italian masters. Pop. 3284.

SWATOW a treaty port, prov. Quang-tung China, 180 m. N.E. of Hong Kong mouth of the Han River. This port was opened up to foreign trade by the treaty of Tientsin in 1858 under the designation of Chan-chow, the departmental city. But the inhabitants being hostile to foreigners, Swatow was made the foreign emporium, and trade established in 1860, increasing beyond the expectation of the merchants to a total of internal commerce in 1863 of £2,487,428 and £2,243,135 in 1864. The imports in 1864 amounted to £3,108,754—of which £273,080 was opium, £285,394 bean-oils, £204,981 raw cotton, and the remainder cotton and woollen fabrics and yarns, metal, rice, wheat, peas, beans, vermicelli, medicine oil &c. The exports of native produce for the same year amounted to £1,238,871, comprising sugar, chinaware, casals, grasscloth, indigo, paper, and tobacco. No tea or silk is shipped at this port, the surrounding district being chiefly laid out in sugar plantations, the export of which was nearly a million sterling in the above return. The large debtor balances against imports of £275,983 is paid in Sycee silver and copper cash, chiefly for opium. During 1865 the neighbourhood of Swatow was seriously disturbed by the last remnant of the Taiping rebels who held the adjacent city of Chai-yung-chow, and thus commanded the most direct route into the province of Kueangsee which absorbs nearly all the opium imported into Swatow. Hence there was a depression of trade, which temporarily retarded the rising tendency of the port, but, however, not sufficient to check the increase, as the returns show £235,693 on the total over 1864. In 1864 the foreign merchants and their employees numbered fourteen persons, of whom six were British, seven German and one Portuguese. Here is a British consul, with three assistants—other nationalities being represented by merchants. There is also a branch of the Foreign Maritime Customs, comprising nine officers, chiefly British the duties collected amounting to £108,686 in 1863 and £118,594 in 1864. The shipping inward and outward were for the same years respectively 656 ships in the aggregate 804,660 tons, and 941 ships of 838,808 tons. Three missionary establishments are located at this port belonging to the English, Americans and French conducted by seven missionaries. The total foreign residents is 99 and the native population about 20,000.—(*Customs Returns, China Directory*).

SWIRZ, a town in Austrian empire, Galizia, circle and 28 m. N.W. Biecz with a fine baronial castle, and 1900 inhabitants.

SYDNEY, a town in British America, beautifully situated on the E. coast of Cape Breton near the head of the harbour of same name. It was the seat of government till the island was annexed to Nova Scotia and though its progress in consequence of this event has been greatly retarded, it is still the principal town of Cape Breton, and contains three churches, an academy, a courthouse, and barracks. The country is its immediate neighbourhood is fertile, and its harbour is one of the finest in the world being equally free of rocks and ice, and spacious enough to contain any number of the largest vessels in safety. At present the principal business is carried on at the N.W. bar, where the railway from the coal mines has its terminus and the coal is shipped.

SYKOW a town in Austrian empire, Galizia, circle and 16 m. N. Sankt, on the San. It was once defended by a strong castle is a principal mart for the linen trade, and has much extensive yearly markets. Pop. 7384.

SYRA (NEW), or *HERMOPOLIS*, a town in Greece, nomarch

Cypades, cap. island of same name, on the N.E. shore of a spacious and sheltered bay, which forms an excellent harbor, and is visited as the common point of rendezvous by the steamers from Marseilles, Trieste, Constantinople, Smyrna, and Alexandria. It is the capital of the province of the Cyclades, the residence of a Greek archbishop and a R. Catholic bishop in wall built, containing several handsome houses of three stories, and has a court of primary jurisdiction and a justice of peace court, several churches and parish schools, a gymnasium, an arsenal, a barracks and a customs-house. Pop. 12,500. Old Syra, situated on a height, has 4000 inhabitants.

SZALLAS (Kis-Uj), a tn. Austrian empire, Hungary co. Szabolcszombat 9 m. S. Károlyi with 9645 inhabitants who belong to the Reformed church, have a reformed gymnasium, and raise large quantities of corn and wine.

SZALONNA a tn. Austrian empire, Hungary, co. Borsod, N. Miskolc, on the Bodva with 850 inhabitants, who mostly belong to the Reformed church whose chief employment is in making charcoal, and carrying it into the lower districts. They also produce a good wine. There is a thermal spring in the vicinity.

SZCZAWNICA a tn. Austrian empire, Galicia, circle and about 19 m. S.W. Now Sandoz, with mineral springs and a much frequented bathing establishment. Large quantities of the water are exported. Pop. 1450.

SZCZKIECZ, a tn. Austrian empire, Galicia, circle and 19 m. S.W. Lemberg, cap. dist. of same name, with a seat of gymnasium strongly impregnated with sulphur, and a remarkable limestone cavern. There are excellent quarries in the vicinity. Pop. 5100.

SZCZYRK, a tn. Austrian empire, Galicia, circle Wodzis, 49 m. S.W. Czerow with a Cistercian monastery and 1900 inhabitants.

SZEK, a tn. Austrian empire, Transylvania, circle and 12 m. S.W. Doss with salt mines, good vineyards, and 2126 inhabitants.

SZELI (Urdex and Urdex) two places, Austrian empire, Hungary, co. Presburg.—*Unter Szeli*, on the Dug-Wang, S.W. Salla, with 1600 inhabitants, trades in salts and excellent cheese.—*Ober-Szeli*, on the opposite bank of the stream, and nearly 4 m. distant, has 1920 inhabitants.

SZEWCEYKI, a tn. Austrian empire, Galicia, circle Rzeszow with a parish church, manufactures of terypsine, and 1900 inhabitants.

SZELO, a tn. Austrian empire, Galicia, circle and 24 m. N.E. Presburg, with a paper-mill, and warm sulphur springs with a tolerably complete bathing establishment. Pop. 1250.

SZOLGYON (MASTAN and KORMAN), two places, Austrian empire, Hungary co. and 15 m. N.E. Kormon, situated opposite to each other, in a well cultivated district with two churches, a trade in corn and wine, and 2550 inhabitants.

SZOLNOK (add.), a tn. Austrian empire, Hungary, cap. of same name, in the angle formed by the confluence of the Zagyva with the Theiss. It ranks as the most ancient town in the kingdom, having according to tradition, been founded by a military leader from Scythia, and was once one of its strongest fortresses, though it has now become comparatively insignificant. Its only buildings deserving of notice are a Franciscan convent, a high-school, and an infirmary. Its inhabitants are chiefly employed in agriculture the rearing of cattle, and fishing, have several mills and yearly markets, and carry on a considerable trade, now greatly facilitated by the railway leading to Miskolc, and in which the principal articles are silk, wool, corn, fruit, and fish. A conflict with the Hungarian insurgents took place here on 5th March 1849. Pop. 13,926.

SZOMBATH (LITVA and LITVA) two places Austrian empire, Transylvania circle and 40 m. N.W. Kronstadt, with a fine castle with extensive gardens, and 2090 inhabitants.

SZOREGH (add.) a tn. Austrian empire, Banat, circle Temeswar not far from the Maros, with an important trade in corn, cattle, wine, and tobacco. The Hungarians were defeated here by Haynau on 5th August, 1849. Pop. 2533.

T

TAAI, a lake and town Philippine Isles, in the S.W. of Luzon. The LAKE, called also *Bontoc* or *Bontoc*, is about 15 m. long from N. to S. by 9 m. broad, and is so deep that some parts have never been fathomed. It lies in a basin surrounded on all sides by hills, and has near its centre an island of a triangular shape, named *Volcan*, which rises to the height of 1667 ft. above the sea, and is evidently volcanic, about its surface is almost throughout incrimated by a coat of lava, and the hollow of its summit has all the appearance of a crater. Indeed it cannot be said to be extinct, since two eruptions have taken place within a century and a half, the one in 1716, and the other in 1754. The latter the more tremendous of the two destroyed four towns, and sent its ashes into Manila, 50 m. distant, and beyond into the provinces of Bulacan and Pampanga. At present the bottom of the crater is occupied by a caldera, about 3 m. in circuit, containing water which is strongly impregnated with sulphur. The lake abounds with fish, a species of which, weighing from 6 to 7 lbs., are considered the most delicate of the Philippines.—The *covey*, called also *Tail* or *Bontoc*, mentioned for another of same name destroyed by the above-named volcanic eruption, stands on the shore of the Bay of Bontoc, and seems to rank next in size to Manila, having a pop. of 41,847. The surrounding district is fertile and well cultivated.

TAB, a tn. Austrian empire, Hungary co. Gemany, 20 m. N.E. Kapuvár, with manufactures of linen and leather, a terypsine a steam-mill, and 1590 inhabitants.

TABACUNDO a tn. S. America, Ecuador dist. and N.E. of Quito; lat. 0° 7' N. lon. 78° 40' W. It contains

about 2000 inhabitants, who, in the revolutions which have taken place, have greatly distinguished themselves by zeal on the liberal cause. The trade is chiefly in wheat, barley, potatoes and other agricultural produce.

TABASCO or **ORIOALVA** a river N. America, which rises in the mountains of Chichuacatan, near the N.W. frontier of Guatemala, enters the Mexican dep. Chiapas, and flows through it very abruptly intersecting it from S.E. to N.W. Some time after entering the Tabasco it divides into two branches the more westerly of which, taking the name successively of Gonzalez, Rio Sacco, and Chitupa, proceeds N. to the Gulf of Mexico. The easterly branch continuing for a time nearly parallel to the other and at so short a distance that it nearly unites with it on passing the city of Tabasco, flows N. in a winding channel, and receives on its right first the Palla or Tapalcoan, and then the Chila. On approaching the sea, across a very extensive and swampy flat, it is joined by a large arm of the Usumacinta, and a few miles below near the town of Frontera, falls into the Gulf of Mexico. It is navigable for vessels of considerable size for about 50 m. above its mouth.

TABASCO or **RIO SAN RAFAEL** DE TABASCO, or **VILLA HERMOZA** (add.), a tn. Mexico, cap. dep. and 1 bank river of same name, 260 m. S.E. E. Mexico. It stands partly on a flat and partly on a gentle eminence surrounded by fertile fields, and though of imposing appearance at a distance, presents a miserable spectacle within, a great part of its houses lying in ruins ever since the place was laid storm by the Americans during the Mexican war. The best part

of the existing town is towards the bank of the river, where there are some good houses. As a whole, however, and even before the disaster which has befallen it, the town must have been very indifferently built. Its streets are steep and even, and dirty in the extreme and the houses, partly of stone and partly of wood, are entirely devoid of elegance or taste. The only public buildings worthy of notice are two churches, several schools, the governor's residence, and the custom-house. The inhabitants, not more than 6000, are chiefly employed in trading in cacao, coffee, maize, rice, tobacco, dyewood, &c. The climate of Tabasco is one of the worst in the Mexican Confederation.

TABINTAL, a river, British America, New Brunswick, which flows N. and falls into a gully of same name in the Gulf of St. Lawrence. It is enumerated at its mouth by a bar, with not more than 7 ft. at low water but within it there is a depth in some parts of 4 to 5 fathoms. The tide flows 10 m. up the river through an undulating country, and occasionally between steep banks of sandstone, which rise to the height of above 100 ft. Its shores are occupied chiefly by Scotch settlers.

TACOTALPA, a tn, Mexico, dep. and 50 m. S. Tabasco, on a river of same name. It was at one time the capital of the dep. but now ranks only as a village. It consists of some well built houses and a greater number of one-huts, and contains 3000 inhabitants, who have no industrial establishment of any importance, and though situated on a navigable river no trade except in a little cacao.

TACUNGA, a tn S. America, Ecuador, situated to the S.E. of Quito on the slopes of the volcano mountain of Cotopaxi. It is tolerably well built in regular and spacious streets, and contains a parish church, several convents, an ancient Jesuit college, now used as a public college, in which practical chemistry, Latin and philosophy are taught. The chief manufactures are gunpowder, and cotton, woollen and linen goods. Pop. about 16,000.

TADPOURI or **TADPOURIV**, a tn, India, presid. Madras, dist. and 80 m. E.S.E. Bellary, r. bank Pennar. It possesses two handsome temples, elaborately decorated with sculptures representing the exploits of Krishna Rama. The pop., consisting of about 4000 Hindoos and 2000 Mahomedans, are engaged either in wearing turbans and similar articles, or in trade.

TAE-SHAY an isl. of the Chinese Archipelago E. coast of China 8 m. long by 5 m. broad. Its centre is an extensive plain, which is well cultivated and maintains a large population. The only manufacture of any consequence is salt from sea water. It was at Woo-hou Creek, which runs through the centre of this island, that a Chinese force assembled to attempt the recapture of Chusan.

TAE-YLEN FOW, a tn, China, cap. prov. Shanai, on the Fuso ho an affluent of the Hoang-ho 240 m. S.W. Peking. It was once a place of great splendour filled with palaces in which princes of the imperial family resided. These have all been allowed to go to ruin, but it is still large and populous, isolated by a wall about 7 m. in circuit, and has extensive manufactures of carpets and of various articles in iron. On the neighbouring hills is an ancient cemetery surrounded by groves of cypress, and containing many fine monuments in marble.

TAGANAMA, a tn W. Africa, Bornou, about 90 m. N.E. Kano. It is a considerable and apparently thriving place, enclosed by a wall and a double ditch, and consists of large and spacious huts with well-fenced courtyards.

TAGANETI, a large and favoured dist. W. Africa, bordering towards the E. and E.E. on the Koolle which encloses El Hadji towards the S.W. on Adet, and towards the W. S.W. on Adet. It is naturally divided into two regions—the Black Taganet or E. part, consisting of fertile valleys full of palm-trees, and with excellent pasturage for cattle and sheep, but fit only for the camel in the dry season, and moreover infested with lions and elephants, and the White Taganet, consisting of white desert and with excellent food for the camel, and plantations of date-trees in a few favoured spots. The nomadic inhabitants are the *Serege* or *Sambe*, a mixed Berber tribe, who figure much in the history of this part of Africa, and combined manly to destroy the *Rama* empire.

TAGELLE, a vil W. Africa, in the country of Damergu, which lies in the S. of the kingdom of Asten, and is

about 60 m. long by 40 broad. The vil., consisting of two separate groups of cottages, numbering in all about 120 would be undeserving of notice but for the political importance which it derives from being the residence of a chief whose talents and powerful connections have enabled him to play an important part in the factions and wars which have long distracted the country, and dried up the sources of its prosperity. (Bertr.)

TAGILISK, or **NISSAN TAGILISK**, a tn Russia, gov. and 210 m. E. Perm near the source of the Tagil in the Ural Mountains. It is a large town picturesque situated in a valley and contains many elegant buildings in brick and stone, including a fine church with some beautiful paintings. Being the principal mining establishment of the Darnidoff family, it is provided with a large and splendid edifice for the administration of the mines, spacious and well conducted hospitals, excellent schools, vast warehouses, spacious mansions for the directors and chief managers, and comfortable dwellings for the workmen and their families. The smelting furnaces, forges, rolling mills, machine shops, and other works, with the machinery and tools are on a magnificent scale, and of the best description. The principal minerals are iron and copper. The iron ore, which is magnetic is chiefly dug out from the sides of a hill, which appears to contain it in inexhaustible quantity. In a small valley on the W. side of the hill it is worked as an open quarry, where it is found in an enormous mass, about 400 ft. in length and 80 in thickness. The copper ore is obtained by sinking shafts to the depth of about 60 fathoms. It often occurs in the form of malachite, of which many large and beautiful specimens are found. Platinia is found chiefly in grains, but occasionally in large fragments one of these weighed nearly 12 lbs. Gold is another of the riches of this district. It also abounds with porphyry and Jasper of great beauty and a variety of coloured marbles. The manufacture of Japan ware and other articles for which Tagile was at one time celebrated no longer exists. Its school of design has also been given up. Pop. 25,000.

TAIR [said] a tn in the W. of Arabia, on a stream in a mountainous district of Hegaz 35 m. S.W. Mecca. It forms a kind of oasis in the midst of a sandy plain, enclosed by mountains of no great elevation and is surrounded by the Garden of Mecca, on account of its gardens which are celebrated throughout Arabia for the beauty of their roses, vines and fruit-trees. It is surrounded by a wall and a ditch, and defended by a castle seated on a lofty rock, consists of houses built of stone but generally small, and has wider streets than usual in western towns. Its principal buildings are two mosques. It was pillaged and destroyed by the Wahabees in 1802 but has been almost entirely rebuilt. Its market is held in the only public square which the place contains.

TAJAX (Gaxar and Lartia), two places, Austrian empire, Moravia, circle and N.E. Zeam.—*Great Tajax* contains 3500 inhabitants, who live chiefly by cultivating the district, which is remarkable for fertility and in producing wine—*Little Tajax* possesses an old church built in the Gothic style, and contains 1000 inhabitants.

TA-KOO or **TAKU**, a vil and forts at the entrance of the Pehlo River 100 m. S.E. of Peking on the shores of Pecheloo Gulf. The village is a collection of wretched mud-built cabins, inhabited by a poverty-stricken population engaged in the salt-trade on the river suffering severely in the winter when it is frozen up, and navigation closed during four months. The forts are of extensive construction, built of mud and bricks, deriving their importance from the batteries commanding the entrance to the river leading an enemy to the capital, and being almost unapproachable by an armed force from the sea, in consequence of the low marshy lands of mud and tenacious clay that surround them. These forts were captured with comparative ease by a British and French force on the 20th of May 1860. The treaty of Tien-tsin was the immediate result. It would seem now ever, that the Chinese had been allowed to escape too easily and accordingly, when Mr. Bruce appeared at the mouth of the Pehlo to exchange ratifications, he found the Taku forts re-established in a much more formidable manner than before. They were of considerable extent, built in the alluvial mud deposit which flanks the river, and formed strong redoubts, with thick, heavily-armed ramparts on the sea-front, contain-

ing gunboats batteries, with a monitor in front of each gun. The rear of the forts was protected by a crenellated wall, defended by guns and walk-panels. The walls of the forts were built of thick logs of timber coated with a coating of mud and wax, or sometimes chopped straw. The approach to each fort was defended by two or three converging ditches and belts of wooden spikes, and the ditches were sown over with iron wire. The fort accompanying Mr. Bruce, as a witness of the hostilities had not been anticipated consisted only of a squadron of gunboats and a few other vessels, and was far too feeble for any important military or naval operation. But as admission into the river was refused it was determined, perhaps with more boldness than prudence, to force it. Here the British fleet, under Admiral Hope, met with a sad reverse in attempting to force the passage up the river and capture the forts, in July 1859, when several ships were lost, and a number of the attacking forces killed and wounded. This led to the third war with China in 1860, in which the English and French allied forces landed at Peking, to the N.E. of Tientsin, taking the north gate in the rear. Upon this the Chinese garrison in the south forts surrendered on the 24th August, and the invading army afterwards marched upon Pekin, some 20,000 British and 8000 French the former under Major-general Sir James Hope Grant, and the latter commanded by General Monteban. After the treaty of peace was ratified in October, the forts were garrisoned by British troops, and held as a material guarantee for the good faith of the Chinese, until March 1860, when they were evacuated, and handed over to the Imperial authorities. During the occupation of the forts, the British garrison were on such friendly terms with the government, that a number of Tartar and Chinese officers in the army were drilled by our drill-sergeants and instructors, who exhibited great aptitude in acquiring a practical knowledge of European discipline, the manual exercise, and the use of arms. As they became proficient each officer was drilled away to instruct the soldiers in the native army with a view to form the nucleus of a disciplined force under their own officers. How the experiment has succeeded has not transpired.—(Keanes's *British Army in China and Japan*.)

TALAE SAP or **KING'S LAKE**, situated in Cambodia, on the S.W. frontier of Cochin China, is a large expanse of water which, although it becomes so shallow in the dry season that boats require to be poled instead of rowed over its surface, is so augmented in the wet season as to have a length of 100 m., and a breadth of 40 m., with a depth of not less than 45 ft. It is formed in a depressed basin in a very flat country and is said to have been once a fertile plain, and the site of a large city. Abounding in fish, it is the seat of a very extensive fishery from November to July, when the rising of the water compels the fishermen to remove to Matubong, or other places in the vicinity. The fish, when dried, are sold to the Chinese who come from Battambang, Oudong, and other places, to purchase them and export them to Cochin China, where they are sold at the rate of four taels = 10s. 8d per picul of 133½ lbs. The chief fishes of the lake is the Matsabong augmented by the kambari and the Tanavau. The Oudong is its outlet.

TALANGA or **SAN DIEGO DE TALANGA** a th. Central America. Honduras, dep. and 16 to N.E. Tegucigalpa, is a very extensive valley watered by a stream of some name. It consists of a number of huts ranged partly in streets, and partly in a large plain, where the church, the only building of any pretensions to architectural merit, attracts notice not so much by its own elegance as by contrast with the paltry dwellings in its vicinity.

TALLA, a prov. Chili, is bounded N by the Lantau and Manqueipo separating it from Cobahaga, S. the Maule, separating it from the prov. of that name, E. the Andes, in which the lofty peak of Cordillera occurs and W. the Pacific. It is 120 m. long, 20 m. broad, N to S. 96 m. It has an extremely fertile soil, yielding in profusion all the products peculiar to S. Chili; a mild and healthy climate, and numerous streams, affording a cheap and ready means of transport. The largest of them is the Uarco, which takes its source in the Andes, and skirting the head of the province, joins the Maule, and forms with it an uninterrupted water-communication from the Cordillera to the sea. The trade is chiefly in wheat, barley, cattle, leather, and jerked beef, sent

to Santiago and Valparaiso. The inhabitants are naturally enterprising and industrious, and generally in good circumstances. Pop. 21,381.

TALCA, a th. Chili, cap. of above prov., on an undulating plain near the river Maule, and 640 ft. above sea-level 140 m. S.W. Santiago, lat. 35° 14' S., lon. 71° 57' W. It is built with the greatest regularity according to the usual plan of Spanish American towns, in rectangular streets, with a plaza near its centre, on which the principal public edifice stands and an alameda. The streets, wide and well paved, have occasionally side-walks for foot-passengers, and are kept clean and in good repair. The houses are generally whitewashed, and many of them have two stories of which the upper one is provided with a balcony facing the street. Both churches and convents are numerous but the only public building which has any pretensions to architectural merit is the cathedral, which, however, must be judged of by its plan rather than its actual state, as it is unfinished, and the two towers intended to be given it are still waiting. The main features consist of ponchos, woollen cloths, and blankets. All of these are woven to a considerable extent, both within the city and in the surrounding district, and are in great demand the ponchos particularly are famous for the exact tone of the material the evenness of the texture, and the durability of the colours. The only other industrial establishments are two flour-mills. The trade is chiefly in raw manufactures, and in grain, tallow, cheese, wine, brandy, and wool. Pop. about 16,500.

TALCARUANO, a seaport in Chili prov. and 12 m. N.W. Concepcion, cap. dep. of same name, on the S.W. side of the Bay of Concepcion of which it is the port. In 1885 it suffered dreadfully from an earthquake, followed by a huge wave which demolished and swept away almost everything that the earthquake had spared. It has since been rebuilt in a better style than before, and contains about 8000 inhabitants, for whom, so far as can be judged from the number of churches and schools, ample means of instruction have been provided though the preference given to Concepcion seems to preclude Talcahuano from ever being more than a place of business. A railway to Chillan a distance of 108 m. running S.E. by Concepcion has been designed, and its construction will be very beneficial.

TALLA MUNGONGO a vil. and mountain, S.W. Africa, Portuguese settlements prov. Angola, 326 m. S.E. Luanda. The village is situated on the edge of the mountain of same name commanding a view of the great Quango valley which according to Dr. Livingstone, is equal in fertility to that of the Mississippi. Within the village, as at several other Portuguese stations, travellers' houses are erected on the same principle as the khans or caravanserais of the East. They are built of the mud wall and thatch and beside benches of rods for beds, are each provided with a table and chairs, and a large jar of water.—The mountain Talla Mungongo from 1200 to 1500 ft. high, is ascended by a steep and slippery path, with deep gorges on each side of it, which leaves but narrow room for the traveller; its summit is a kind of table-land covered with lofty trees, while on its heights the coffee plant is seen growing at the distance of nearly 800 m. from the W. coast, where the Jesuit missionaries first introduced it.

TAMATAVE (add.) a maritime tn. E. coast of Madagascar, lat. 16 10' S., lon. 40 38' 30" E. The anchorage here is little better than a rock-strewn protected by reef, but exposed to the winds from the E. and N. The village is built on a point of land between 200 and 400 yards wide, stretching into the sea to the S. The surface is diversified by sand-hills thrown up by the wind or sea to the height of 15 or 20 ft. and the low sandy shore is partially clothed with brushwood, rubber and grass, relieved by the tall slender pillars of the coco-palm. The entire town, a native structure between 30 and 40 ft. long, and nearly as wide, may be taken as a sample of the Malagasy houses. Its walls are about 12 ft. high, and composed of posts fixed at irregular distances, the timbers being filled up with the thick strong leaf-stalks of the traveller's tree between that lattice. The thatch covering the steep roof is composed of the leaves of the same tree fastened with native cord—the floor of coconut, partly covered with the bark of the traveller's tree. The coco-palm and the pandanus fling their grateful shadows

around this modest structure. Almost the only good houses in the village belong to the foreign residents and Hova officers. The dwellings of the inferior classes are much

TAMBLEGAV.—From a drawing by R. De Bonaux Tour J. H. H. H.

dilapidated. The trade is chiefly in rice, cattle, and poultry. Pop. about 3000.—(*Three Years in Madagascar*, by Rev. W. Ellis.)

TAMBLEGAM, a lake or lagoon, Ceylon, which communicates with the bay and is about 4 m. S. W. of the town of Trincomalee. It is a shallow expanse, about 30 m. in or out, and, according to native tradition confirmed in some measure by an examination of the locality, was once a fertile plain covered with rice fields, and irrigated by a canal from the enormous tank of Kandela, about 12 m. to the S. W. The tank, allowed to fall into ruin, burst its embankment, and sent its water like an impetuous river which inundated the plain, and forced its way to the sea by a breach which has ever since remained open though it is said that the breach might easily be closed and the tank repaired, so as to convert the lake once more into a productive plain. At present Tamblegam is chiefly valuable for its fish particularly the thin transparent oyster (*Placenta plicata*), whose clear white shells are used in China and elsewhere as a substitute for window-glass, and are collected annually both for the small pearls contained in them, and also for export to India where they are brewed into chinaman, to be eaten with betel. So abundant and profitable is the *Placenta*, that the number taken by the licensed runner in the three years prior to 1858 could not have been less than 18 000 000. They delight in brackish water but excrete either salt or fresh kills them.

TAMKALA, a town Western Africa, Hausa States, prov. Zabarwa, 140 m. W. Sokoto. It is a celebrated place, which has figured much in the wars of the country, and suffered accordingly. Its walls are greatly dilapidated, and even the governor's house is little better than a ruin. The market is very indifferently supplied.

TAMSHU, a treaty port, China, N. W. coast of Formosa, lat. 21° 46' N. lon. 120° 30' E., 40 m. S. of Taiwan the chief city of the island and near the S. entrance to Formosa Strait. In the treaty of Tientsin, Taiwan is the place mentioned as the port to be open to foreign trade. But the British consul appointed there found it less eligible as an entrepôt than Tamsui, and removed to the latter place in 1864, when the first regular returns of trade were reported from the 31st May to the close of the year. During that period the total amount of imports and exports was 2385 637—the former 2339 613, comprising opium (£170 798) tea (£448 539), and general merchandise and the latter, 12156 014 consisting of rice (£268 176), sugar (£252 967), assamum seed (camphor), &c. This being the latest port in China opened to foreign commerce, there remains a remnant of the prohibitive system which long paralyzed the external commerce of the country. Rice, which is largely produced in Formosa, can be exported only under pass to Amoy and Foochow. During 1865 a slight increase in all the more important

imports was noticeable, and exports, with the exception of tea, were displayed an advance upon 1864. In shipping the centres for 1865 were 152 vessels, 377,549 tons, against

183 vessels (35,455 tons) in 1864. It possesses an excellent harbour over the bar of which there are about 18½ ft. water at high water. The entrance is unmistakably marked by two lofty and picturesque hills—*shaf* on the left, termed the Kwang-yin Hill, having two prominent peaks, of 1720 and 1240 ft. respectively—and that on the right, the Tai-tan Hill forming an imposing ridge, of which the summit is 2800 ft. high. From land to land at the entrance of the harbour is just half a mile, but a considerable spit of sand diminishes it more than one-half. Within the harbour, however, it rapidly increases to three-quarters of a mile, and even a mile in width, affording good anchorage for large vessels. Immediately on the left hand on entering is a small Chinese fort, and half a mile higher are the ruins of an old Dutch fort—a square, red brick, castellated building, none no doubt of great strength, and elevated 50 or 60 ft. above the water's edge. The long rambling town of Tamsui, or How wei, as it is more properly called, commences a little higher, and consists for the most part of a narrow street of shops of a poor description, paved with great cobble-stones or not at all, and in which pigs of all sizes and barking dogs beset the passage, which in some places severely annoys the passengers passing one another. There is a very pretentious tea-house in the town of which the stone pillars, elaborately carved and representing with considerable cleverness, fantastic dragons encircling the columns in high relief—workmen being yet engaged in the task. The immediate neighbourhood is hilly, having numerous scattered houses, and a large amphitheatre, just outside the town, forms an immense and well-filled burial-ground, upon which grows abundantly of the two-petted plant (*Ardisia coccinea*) which is largely exported from this neighbourhood. The soil is very fertile, and of considerable depth of alluvium, in which are numerous angular and rounded blocks of stone, some of very great size. The inhabitants of How-wei (Tamsui) are mostly poor and meanly clad—the males wearing usually nothing more than a pair of short drawers, or some substitute for them—some of the younger male children going entirely naked. The women and girls, however, are always decently clothed, very few of the female children being even naked to the waist. Remanded feet are universal among them.

Peim Island, at the entrance of the harbour produces no palm-trees, as the name would seem to indicate, but they are represented by cycads, which have probably been mistaken for them. This island presents unmistakable indications of having risen above its former level in comparatively recent times, and similar indications in other parts of the harbour seem to show that a gradual elevation is taking place, a circumstance which renders it more necessary to preserve the integrity of the harbour from the encroachments and encumbrances of the native coolies, who mischievous by throwing overboard the ballast they are paid to take away. Its importance is yearly increasing as a harbour of refuge as a port of trade, and more particularly as a coaling station.

In consequence of the aboriginal population on the island being harshly treated by the Chinese, its productive capabilities are not developed, and few foreign merchants are disposed to settle at Tamsui, restricted from the authorities on the mainland. All the residents are British, comprising three merchants, two consular officers, and an employé in the Foreign Maritime Consulate.—(*China Directory*, Customs Returns, China Telegraph, Proceedings of Royal Com. &c.)

TANANARIVO or ANTANANARIVO [add.] (the thousand towns, the city) the cap. of Madagascar, prov. Ankay, near the centre of the island lat. 18° 56' S. lon. 47° 57' 48" E. It is built on the summit and sides of a long irregular hill 1½ m. or more in length, rising 600 ft. above the surrounding rice-fields, and 7000 ft. above the sea-level. A path from the S. winds up the hill to the centre of the town, another from the N. traverses the town to its S. extremity,

and thence the principal thoroughfare. Innumerable pathways run between the houses on each side so narrow in some cases as scarcely to allow two persons to pass.

The houses, generally detached and surrounded by mud walls, stand on terraces 20 to 40 ft. wide, cut in the declivity of the hill. The richer inhabitants have substantial houses of wood, with long roofs of bamboo rafters, thatched with rushes; the poorer have huts constructed of split bamboo or of rush-mats supported on poles. Mud huts, sometimes painted yellow or bright pink, are found in the surrounding villages. All the houses are rectangular with the window and door in the W front, the former at the S end, the latter at the E, 18 inches above the pathway, with a single step outside and inside. The interior is sometimes divided by matting and hampers, but in general it is a single apartment. The floor is seldom boarded; a coarse mat spread on the earth forms the bed, the table, and the floor; three or five upright stones near the centre constitute a hearth, no chimney is thought necessary. Of late, however, several improvements have been introduced: beds are found in most of the houses, the furniture has become more European in character, and a second story is more frequently added. A few houses are hired by Arabs as shops, the proprietor levying a percentage on the sales from the purchaser—but as a rule the occupants are also the owners, and most of the richer inhabitants have a second or third house for a kitchen or for their slaves. The palace stands near the centre of the town on the summit of the hill. It is about 60 ft. high, with a very long roof pierced by three windows at three different elevations and surrounded by a large gilt figure of an eagle on the wing. Double verandahs, one above the other surround the walls. Near the E. angle is a smaller house of similar construction, the residence of the prince royal. The houses of most of the

humblest block of stone marking the boundary of the capital. It has been reserved in order to retain the wall, but its site still retains a partly secret character; over this point unclean animals or vegetables are not allowed to be carried into the town.

The surrounding country is all but destitute of trees, and a species of wild fig is almost exclusively adapted into the capital. To this may be ascribed its remarkable freedom from the Malaria fever, indigenous elsewhere throughout the island. In 1890 the population was estimated at 15,000 to 22,000 under the rule of Radama it increased rapidly, and in 1888 was stated to be about 30,000, the number of houses being 6000 to 7000. Another estimate makes the population 80,000 which is obviously largely in excess of the truth, and probably includes the numerous surrounding villages as well as the capital itself.—(J.E.H.)

TANCITANGA, a town, Malawi, in the S.W. of state Malawi, on the N. slope of a mountain range, responsible for the richness of its mineral veins, particularly iron. It possesses an Aqueduct, a railway, and has a pop. of 1500.

TANDA two places. India—1, Tanda, or Tera, a station, N.W. Province, 62 m. N. Bareilly, on the route to Almorah. It occupies a small cleared spot in the marshy forest of the Terai, and during the hot season has a climate so deadly as to occasion a fearful loss of life among both travellers and permanent residents. An ample supply of water seems to be the only inducement to retain it as a station.—2, Tanda, or Tandah, a town, Oude, near 1 hour. Gogra, 110 m. E.S.E. Lucknow. It contains about 6000 inhabitants, the greater part of whom are weavers, the largest cloth factories of Oude having their seat here.

TANGA, a town on the E. coast of Africa, on a bay of same name, about lat. 5° S. Like all settlements on this part of the coast it is a patch of thatched, pent-shaped huts built in a straggling grove of coconuts and calabashes. The country around with a soil of hard red and yellow clay is fertile and yields in abundance cassava, wild tamarind, plantains and papaya, banana and coconut trees and wild-cow plant. Pop. from 4000 to 6000.

TANGANYIKA a lake, situated in the centre of the length of the African continent, and on the inland edge of the eastern third of its breadth, between lat. 3° 25' and 7° 20' S., lon. 29° 30' and 30° 35' E. length N. to S. 290 m. average breadth about 35 m. circuit about 640 m., and area about 6800 sq. m. The western half, up to lat. 5° S., is in the shape of an elongated oval, the northern part diminishes gradually in width, and finally terminates at its N. extremity in a point. The basin in which it lies is enclosed on all sides by an almost continuous mountain curtain, rising from 2000 to 3000 ft. above the water-level, and suggests the idea of a depression similar to that of the Dead Sea in Palestine, rather than that of a vast reservoir formed by the drainage of the surrounding country. The surface of Tanganyika, though 1250 ft. above sea-level is nearly 2000 ft. below that of the

TANANARIVO.—View as seen by Capt. F. F. Oliver. Illustrated News.

judges, nobles, and chief military officers are in the immediate vicinity of the palace. The courts are held in the open air to the W of the palace, and a little to the N.W. is a rock, the Tarpaulin Block of Madagascar, where criminals convicted of wholesale robbery are hurled down a precipice of more than 300 ft., broken by scattered masses of rock 60 or 70 ft. from the top. The common place of execution, however, is a dreary spot at the E. extremity of the hill on which the town is built, covered with the bones of the criminals left without burial to be devoured by dogs and birds. Meetings or public assemblies are held, to receive messages from the sovereign and transmit all public affairs, in a natural amphitheatre N. of the palace, capable of accommodating 100,000 persons. N. of this was built one of the stupendous and subterranean of the English missionaries, now become a prison and a few hundred yards further the repository, printing-office, and library of the Madagascar mission. Westward lies a part of the town which the sovereign and royal family are forbidden to enter. At the N. extremity of the hill formerly stood an

Victorian Nyassa, situated about 400 m. E.N.E. but its range intervenes. No soundings have been taken to ascertain the depth of Tanganyika, but its shallow shore-dwelling rapidly into blue water tends to confirm the statement of the Arabs that with lace of several fathoms no bottom was found. The only important feeder of the lake yet known is the Malagasy, which flows westward from the Uryunawani plateau and has its mouth near the middle of the E. shore, to the south of L.H.I. The water is fresh, and to the traveller arrived from the E. tastes deliciously sweet and pure, after the salt and bitter, the putrid and slimy produce of the wells, pits, and pools in his line of route. The natives, however, complain that it does not satisfy thirst, and contrast it unfavourably with the water of the Victoria Nyassa. Tanganyika is well supplied with various kinds of fish. It contains few islands. By far the largest of these is Uvuhui, in the N.W.; the only others are two small groups, one near the middle of the W. shore, and the other near the S.E. extremity. The bottoms of the lake are generally low, and chiefly stony.

TAMARIND AND REED Immediately behind is a shelving plain, the principal locality for cultivation and settlements. This plain is in some parts a dry conglomerate in others a rich red loam, and in others sandy but everywhere clothed with dense vegetation. Beyond the ground rises in slopes and terraces, occasionally misshapen and producing luxuriant crops of manioc and cereals, and finally forms a back-ground of mountains, clothed for the most part with giant trees of navel, tamarind, and banyans but sometimes also covered with various species of cascas. The commercial importance of the lake is as yet undeveloped. The Arabs in former times built sailing vessels, and trained their slaves to the regular use of the oar, but in 1808 only one dory, or small quarter-decked sailing craft, remained. The native boats are long narrow canoes, or rather mere logs of navel or some other large tree, rudely hollowed with the axe. Sometimes three of these hollowed logs are joined together so as to form one vessel. It is, however, a very rude and clumsy contrivance, has neither mast nor sail, and though fit for its use to carry a cargo, is so leaky that the oar, 'Bengal' or 'bala, bala' rarely ceases. The traffic on the lake from Ujiji takes three principal directions one to the ivory and slave marts of Uvira at the N.W. extremity a second across the lake to the island depot at the W. shore, and the third southward to the land of Marungu. The lake is frequently visited by violent storms of wind, lightning and rain. As to the dangers of the navigation, prowling tribes haunt the beach and are ever on the alert to seize any canoe that may chance to land upon it.

TANGKOO, a vil and fort, China, prov. Fochili, in the Falho taken by the British and French troops, August, 1860. The fortifications of the place consisted of a long semicircular crested wall 8 m in length, terminating at both ends on the banks of the river. (Swinhoe's *N. C. Gazetteer*).

TANNAH a dist. or collectorate, India, presid. Bombay between lat 17° 56' and 18° 30' N. lon. 73° 42' and 75° 48' E., is bounded N by the Portuguese territory Damão dist. Surat, and the Gujowar a Domains S. Bui nagherry S. Ahmednuggur Poonah, and Satara. and W. the Arabian Sea, length, N to S 175 m, breadth 65 m; area, 5477 sq. m. Its soil is admirably adapted for the cultivation of grain, particularly rice, compared with which all other crops are insignificant. The most extensive non-sugar-cane, from which a small quantity of sugar is manufactured and plantains, grown chiefly on the island of Basail and largely exported to Bombay. Ginger the cultivation of which is nearly confined to the gardens of Mahim is sent chiefly to Bombay and Surat for consumption in the green state. The great Bombay and Agra road and the Indian Peninsular railway pass through the district. This railway was opened on 10th April, 1858 from Bombay to Tannah, which is situated 34 m N.E. of the former and had then a pop. of about 9000. Pop. of district 815,648.

TANNWALD a tn. Austrian empire, Bohemia, circle Bouda, reg. dist. of same name, on the Kametz with a church a cotton factory linen blastfurnace, and numerous glass-polishing mills. Pop. 1100.

TANTANAH, a mountain, N. Africa, which attains the height of 4000 ft. above the sea-level, and forms the culminating point of the mountains situated near the W. frontiers of Fouta. Vegetation being confined to narrow crevices and valleys, it supports only a few nomadic stragglers. The mud stone and sloping strata of marl which previously prevailed, are here succeeded by granite, which rises in lofty peaks not without grandeur.

TANTOO, a tn. China, on a creek of the Yang-tze-kiang, forming one of the outlets of the Grand canal, and at some distance above Kiang-yin. It has been several times in the hands of the rebels, and in consequence suffered so severely that a large portion of it was laid in ruins, and remains so as no attempt has been made to rebuild the temples, and many of the poorer inhabitants are living in straw-huts. Before devastation it had a small but active trade, and at times presented a busy scene, from the number of boats passing up and down the creek.

TADDEVAT a tn. Western Africa, lat 22° N. about 300 m. N.W. Timbukto, celebrated for its salt mines, which have been worked for about three centuries, and are *See Tan. Gaz.*—Vol. II.

still very productive. The salt covers a very extensive tract in the district of El-Jaf, and consists of five layers, of which the fourth, which presents a beautiful intermixture of black and white, not unlike some species of marble, is the most esteemed. The largest pieces brought to market measure 3 feet 5 inches in length, 18 inches broad, and 2½ inches in thickness, this however, is only half of one layer, each layer being sawn into two slabs. A government officer, who superintends the mines, lets out the ground in small patches to workmen, who pay a certain *khomsa* or lordship for each *Aqra* or hole.

TAPARULY, a bay Indian Archipelago, remarkable as the only one of any extent possessed by the island of Sumatra. It is situated on its N.W. coast, in the country of the Batak, and contains many islands, and several well-sheltered coves and harbours, with sufficient depths for large ships. For anchorage, or Little Porehng near its entrance, was once occupied by the British, but the attractions are small as most of the country is mere jungle, and the inhabitants are in a state of barbarism.

TAPABANG, or LABAYA a lake, Indian Archipelago the largest in the island of Celebes, is situated near the centre of its S.W. peninsula. It is about 24 m long by 12 m broad, is fed by numerous streams and discharges itself by the Ghivane into the Bay of Bondi about lat. 4° 15' S. Both the Ghivane and the lake are navigable, the former for vessels of 20 tons and the latter having a depth of 2 to 3 fathoms in the dry and as much as 8 fathoms in the wet season.

TAPOLCZA, a tn. Austrian empire, Hungary, co. Zala, 28 m. E. Zala Egerzeg, esp. dist. of same name; with a steam company for navigating Lake Balaton a sulphur spring with a bathing establishment, and a trade in corn and wine. Pop. 5439.

TARANAKI or NEW PLYMOUTH a prov. New Zealand W. island of North Island, bounded N. and N.E. by prov. Auckland, E. and S.E. Wellington and S. and W. the ocean has an extreme length of about 100 m., an extreme breadth of 60 m., and a coast line of 120 m., area, 3,000,000 acres. Notwithstanding its large extent of coast it is utterly destitute of harbours and, though well watered by torrents, possesses neither rivers nor lakes. The surface is elevated, particularly towards the S.W., where Mount Egmont rises to the height of 8270 ft. a large proportion of the soil is admirably adapted for agriculture. Owing to the war with the natives the province has made no progress for several years, but lost what prosperity it had previously attained. The pacification however which has at last been effected will reopen the country to colonization. From the fertility of its soil and the beauty of its scenery it has been called the garden of N.W. Zealand. The name of Taranaki is generally applied to the settlement and that of New Plymouth to the capital, which is situated in lat. 39° S. and stands on the margin of the beach embosomed in granite hills, and watered by several streams. With its granite church and chapel and rustic buildings and the beautiful and varied scenery around it, the settlement presented a fair appearance. But the total number of colonists in the province owing as said before to its disturbed state, amounted to only about 3000. The number of vessels entering the port in 1863 was 6, of 759 tons and there left 19 vessels, of 2809 tons. The imports in the same year were of the value of £49,030 and the exports £1288.

TARONTO, a tn. Italy Venetia, prov. and 8 m. N. Udine, on the Torre, with a civil court, a silk mill, and 2961 inhabitants.

TARKANY (FALCO and MEND) two places, Austrian empire, Hungary, co. Haves.—*Falco Tarkany*, situated 4 m. N. Erian, between mountains, has a saw-mill and quarries of slate, limestone and red marble, and contains 1500 inhabitants.—*Mend Tarkany* situated about 10 m. N. Haves, on the Lake contains 2530 inhabitants, chiefly employed in agriculture and rearing cattle.

TARNOCZ, a tn. Austrian empire, Hungary, co. Lipitz, about 4 m. N. Bont-Miklos, with 1100 inhabitants, who cultivate fax, weave linen, and fell and saw timber in the adjoining forests.

TARNOW [add.] a tn. Austrian empire, Galicia, esp. dist. of same name, 42 m. E. by S Crasow, on the Dmupke, near the confluence of the Biala, and on the railway which

here crosses the latter by a bridge. It is the seat of several government offices, and the see of a R. Catholic bishop; and has an ancient and beautiful cathedral, with some remarkable statues, an ecclesiastical seminary, a Benedictine monastery, an upper gymnasium and high-school, a theological institute, an hospital, and an orphan asylum. Pop. 8463.

TARRANGOLLE a tn. E. Africa, cap. Zanzibar country, 101 m. E. S. E. Gombeiro. It is situated at the foot of Mount Lindia, about a mile from the stream, a tributary of the Chet or Sobet, that flows below it, and which is about 80 yards wide, but shallow. The town contains about 8000 houses, and is not only surrounded by iron-wood palisades but every house is separately fortified with a stockaded courtyard. The cattle are kept in large kraals in various parts of the town; fire is lit every night to protect them from flies, and sentinels keep watch on high platforms day and night to give alarm in case of danger. The houses are generally bull-shaped, while others resemble huge extinguishers, 25 ft. high, the roofs are neatly thatched, and rest upon a circular wall about 4 ft. high, the eaves overhang to within 2½ ft. of the ground the doorways are only 2 ft. 3 in. high. The interiors are remarkably clean but dark, windows being unknown. The town has several entrances in the form of low archways through the palisades, which are closed at night by large branches of the hooked thorn of the kintir-bush, a species of mimosa. The main street is broad but all the others are purposely only wide enough to admit a cow singly between high stockades, these narrow passages being easily defended in case of attack. The natives, Latokas & S. W. Baher describes it, the sweet oranges he had ever seen. The average height of a number of them was 5 ft. 11½ in., and they possess great muscular development and well proportioned limbs, and a very pleasing cast of countenance.

TARRENA a tn. American empire, Tyrol, circle and about 25 m. W. by N. Innsbruck with large manufactures of articles and stockings, and 1200 inhabitants.

TARTAKOVA a tn. Austrian empire, Galicia, circle and 36 m. N. E. Zolkow, with a fine castle, and a church to which pilgrimages are made. Pop. 1780.

TARUSA a tn. Russia, gov. and 40 m. N. E. Kaluga, at the confluence of a stream of same name with the Oka. It has two churches, a circle and a parish school, and a benevolent institution, and contains 2374 inhabitants.

TASCO, or **TALCOO**, a tn. Mexico state Guerrero, at the height of 5833 ft. above the sea, 67 m. N. by W. Tlaxila. It is the oldest mining town in the Mexican Confederation, and had at one time valuable mines of the but is now without importance, and has no building deserving of notice except its parish church which is a beautiful structure, erected at the expense of a Frenchman who had made his fortune at the mine but was afterwards reduced to such poverty, that the altarpiece which he had presented to the church was afterwards sold for his behoof to the cathedral of Mexico.

TARMAZIA formerly Van Dumen's Land [add] This island, the S. coast of which was discovered by Captain Abel Jansen Tasma, in 1642 and by him named Van Dumen's Land, was found by Mr. Bass, surgeon of H.M.S. *Reliance*, in 1793, to be separated from the mainland by a strait 180 m. wide. Immediately after Bass's exploration the island was named Tasmania, in honor of its first discoverer; but it was not until 1852 that the home government adopted it, on the petition of the colonists, at the time of the cessation of transportation to its shores. In consequence of the millions of convict labor under a labor-of-the-system adopted by Sir W. Denison, appointed governor in 1846, the government increased the amount of transportation to Tasmania, till the free settlers took alarm, remonstrated with the governor, and petitioned the home government, and even the queen in person, to stop the flood of demoralization thus being poured into their adopted country. At length they prevailed, and an order in council terminating transportation to the colony took effect in 1853. But a retrograde movement had already begun in the material condition of the colony the discovery of gold in New South Wales and Victoria withdrawing from it both labour and capital. Many of the richest and most enterprising merchants removed to Melbourne the *Arden* found a large demand and high prices for their produce, and the trade across Bass Strait rapidly increased in both sailing and steam vessels. Besides agricultural produce, a large trade in timber

from Tasmania for wharves, railways, and other works in Victoria, employed a large amount of shipping. But these vessels carried many passengers also towards the gold regions, and from 1851 an exodus of the population of Tasmania began, and has continued ever since. This withdrawal of capital and labour in a few years produced a reaction, and so reduced the value of landed property, and raised the rate of wages, that while streets of houses in Hobart Town became deserted and the splendid harbor, with its docks and jetties, no longer presented the bustling prospect consequent on the arrival of transport vessels with convicts and government supplies, the intercourse with Melbourne being chiefly through Launceston. A new constitution too had been granted to the Australian colonies, and the governing power became vested in the responsible advisers of the governor and two houses of legislature, elected by universal suffrage and vote by ballot. The local parliament, to check the exodus and revive property offered rewards for the discovery of gold in Tasmania. The most promising district was found at Fingal, some distance from Launceston, the productiveness which in both its washings and gold-bearing quartz, was favourably reported on in 1884. Some slight improvement in the condition of the colony has since taken place in some respects, though upon the whole, there seems to be a decline. The annual volume of statistics issued in 1887 by the government of the colony, shows that the population at the end of 1886 was 87,568 an increase of 2167 in the year. The birth-rate in the year was 24.68 per 1000 living, the death-rate only 18.07. At the end of 1886, 2,241,071 acres were held under deposit mining licenses, at a value amounting to \$2909, 979 0/28. There were in a state of cultivation, but only 167,866 were under crop. The number of sheep in the colony was 1,732,804, of cattle, 88,870, of horses, 21,567, of swine 33,258—all these numbers are less than those of 1885. The exports of 1886 amounted to \$254,806, a decrease of \$26,859 the imports reached \$243,107 an increase of \$179,737. The general revenue amounted to \$245,431 and the expenditure to \$243,361. The territorial revenue was \$28,543 and the expenditures \$108,740 the commissariat expenditures were \$26,462. The public debt was \$255,280 being only \$5 18s. 7d per head. The number of vessels belonging to the ports of Hobart Town and Launceston was 211, of 19,709 tons. Of coal 14,569 tons were raised in the year valued at £18,035; 63,290 acres of crown land were sold in the year and realized £39,227.

TASSAUA, a tn. Western Africa, cap. territory of same name 100 m. N. by W. Kano. It is a large place, of pleasing appearance, and contains a population who possess many of the comforts of life, and seem disposed to enjoy them. They are, however, much exposed to the depredations of the Fulani and other marauding tribes. The territory is of limited extent, and the chief, though in many respects independent, is regarded as a powerful vassal of the king or chief of Maradi, another territory which bounds it on the W.

TATAR HUNAR, a tn. Russia, gov. Bessarabia, circle and 35 m. S. W. Akerman, close to the frontiers of Moldavia. It possesses a church and contains 1400 inhabitants.

TATCHIO a tn. cap. Tamsina Island, in the Strait of Corea, between Japan and the Corea. It stands upon a somewhat exposed bay on the E. side of the S. division of the island, at the mouth of a stream which flows through a rich and well-cultivated valley. A cliff rising abruptly 100 feet from the water forms a cove, behind which small vessels and aboats and covered with pines, is a striking feature in the scenery. The bay opens to the right and left of the entrance, and is surrounded by wooded hills. The town, upon the right or N. arm of the bay, does not differ in appearance from an ordinary Japanese town. The residences of the prince, who is absolute and independent, is about 4 m. from the town. Pop. 10,000.

TAUGUNCHERRY, a tn. India, presid. Madras Tra. vancore, adjoining Calicut on the W. It was formerly a Dutch settlement, and constituted chiefly of a fort, seated on a promontory of islands. Part of its walls still remain, and the interior of one of its bastions is used as a Protestant burying-ground. The present town consists of four regular streets, intersected by narrow lanes, and is inhabited mostly by E. Catholics, under the charge of the Bishop of Cochin, who resides here. The customs port-due, and other

revenue are levied by the Taranaki rajah, who pays an equivalent in money. By this arrangement a check has been put to the smuggling which formerly prevailed.

TAUPO a lake, New Zealand, about the centre of North Island, prov. Auckland. It is of triangular shape, 36 m. long and 20 broad, and is the largest lake in New Zealand. The Waikato River flows into it from the N. and passes out of it in a N.W. direction carrying off its superfluous waters. A broad table-land surrounds the lake, intersected by many creeks and streams, which carry off the drainage of the mountain district above. The lake is in the central portion of the island, which remains as yet in the state of a wilderness, and which extends over a considerable space around the lake, and southward to the neighbourhood of the volcanic mountains Tongariro and Rangitoto, displaying some of the most remarkable features of natural scenery in New Zealand. The small hot-water lake of Rotarua, with the curious boiling springs in its vicinity is situated about 80 m. N. of Taupo. It has been proposed to form a military station or permanent camp at Lake Taupo, to oversee the Maoris.

TAUROV a town in American empire, Galicia, circle and about 8 m. N.E. of Brest; is memorable as the scene of a bloody battle fought in 1649, between the Poles under John Casimir, and the Cossacks under Chmelnik. Pop. 1800.

TOHANG KIA KHEOU, or **KHALAX** a town in China, prov. Fochin, on the frontier near the Great Wall about 100 m. N.W. Pekin. It consists of the town proper and extensive suburbs. The former enclosed by a fence and an earthen rampart, and defended by a citadel, contains about 25,000 inhabitants, the latter is inhabited chiefly by merchants, who carry on an extensive trade, Tohang-kia-kheou being the chief entrepot for the trade with Russia through Mongolia.

TCHABTALOWITZ a town in Austrian empire, Bohemia circle and 12 m. S.E. of Krongratz; bank Wild Adler with a parish. It contains a church with a chapel an hospital a brewery and 1200 inhabitants.

TOHATCHAK, a town in Turkey in Europe, Serbia, cap. circle of same name, in a mountainous district, on the Serbian Morava, 65 m. S. by W. Belgrade. It is the seat of a court of justice, and has a church and a school. Pop. 1200.

TCHENBAR, a town in Russia, gov. and 62 m. W. S.W. Penza, cap. circle and on a stream of same name with four churches a circle and a parish school a charitable institute, and several industrial establishments. Pop. 8664.

TCHERASSU a town in Russia, gov. Ekater. cap. circle of same name, on the Dnieper. It was once the chief town of the Dolopet Cossacks, has two churches a parish school and a charitable endowment. There are several best-root sugar factories within the circle. Pop. 8664.

TCHERAILLOV a town in Austrian empire, Bulshia circle and 4 m. N.E. of Krongratz with 1300 inhabitants, a R. Catholic parish church, and two Protestant churches, one of the Augustines and the other of the Helvetic Confession.

TOHOKOLIK a town in Turkey in Asia, pach. Sivas, 32 m. S.E. Amasia, on the side of a steep descent into a valley. It contains about 120 houses, which have an air of comfort about them; and possesses a mosque with a minaret, which seen from a distance is a very striking object.

TCHING-TOO-FOU or **CHING-TOO-FOU** (add.) a town in China, cap. prov. Szechuan, about lat. 30° 30' N. lon. 104° 25' E. According to M. Hue it is one of the finest towns in the empire. It stands in the middle of a fertile plain watered by beautiful streams, and bounded in the distance by hills of varied and graceful forms. The principal streets are of good width, paved with large flagstones, and so clean that one can scarcely believe them to be Chinese; the shops are equally remarkable for the value of their goods and the taste displayed in arranging them, and many of the public buildings, more especially the pagoda, courts of justice, and literary institutes, are fine structures. Though the poor are numerous, the inhabitants generally appear to be in comfortable circumstances. In the vicinity is one of the richest and best maintained Bonze monasteries in China. The present Tching-too-fou is a modern town, which was built to replace an ancient one destroyed by conflagration. — (See a Chinese Empire).

TCHERIKI, a town in Turkey in Asia, Anatolia, bank Salda, 90 m. S.W. Siope. It is surrounded by walls, and has a pop. of 3000 to 4000. Angora goats are reared in its

vicinity and there is a mine of rock salt on the adjoining mountains.

TCHISTOPOL, a town in Russia, gov. and 68 m. S.E. Kazan cap. circle of same name, bank Kama. It has a cathedral and thirteen other churches a monastery, schools and religious schools for the circle and the parish, and a considerable trade in corn, cattle, and fish. There are mineral springs in the circle. Pop. 9213.

CHUKLOKA a town in Russia, gov. and 136 m. N.W. Kustroma, cap. circle and on a lake of same name has three churches, a circle and a parish school and a benevolent institution and contains 2713 inhabitants. Many of the inhabitants of the circle leave their homes during several of the winter months, and find employment at their different trades in other parts of the kingdom.

TCHUNG-KING FOO, a town in China, prov. Szechuan, 160 m. S.E. Tchung-tse-fou and next to it is the most important town in the province. It stands on an advantageous site, bank Yang-tse-kiang opposite in another large town which would make one with it were it not for the magnitude of the river which is here, though 900 m. above its mouth, more than a mile wide. It is a most important commercial place, being the central entrepot for merchandise from almost all the provinces of the empire. The R. Catholics are said to be here a large and flourishing community.

TEAPA a town in Mexico, dep. and 40 m. S. Toluca, pleasantly situated at the foot of the mountains of Chiapas, on a stream of same name which is here crossed by a bridge. It consists partly of houses substantially built of stone and arranged in a few tolerably regular streets, and partly of a great number of one-hutted, grouped without any regard to order and forming a kind of suburb. In the highest part of the town is a square containing the church and the market-place. The only manufactures are water-tight shoes made of the gum of the *Cattalia elaeagnifolia*, and to be nearly as good as those made in the trade is important, particularly in cases, which bear a high name. Pop. about 8000.

TEBESSA (anc. *Therapsa*) a town in Africa, Algeria, dep. and 75 m. S.E. Constantine on the N. slope of the Jebel Aurès, and close to the W. frontiers of Tunis, lat. 35° 27' 30" N. lon. 6° 7' 30" E. On being taken by General Negrier in May 1842 it was immediately resolved to make it the seat of a French colony. A number of European traders have accordingly settled in it and the population including that of two adjoining villages but excluding the military amounts to about 3000. The military must be numerous, as a French work of some authority makes the whole population amount to 15,000. Even this however is not more than the half of what it is believed to have had under the Romans. The Arab town, which is poorly built lies among the Roman ruins and is surrounded by a wall flanked with towers. Within it there is no Arab building worth notice, but immediately outside there is a Marabout establishment which the natives hold in the highest veneration. Among the Romans remains the most interesting are a portico or triumphal arch, and a temple. The position of the town at a point where four highroads meet gives it great facilities for trade but at present its prosperity is more in prospect than in reality. Many of the inhabitants find employment in the quarries of Jebel Dyr from which millstones are obtained.

TEE-KIANG a town in China, prov. Szechuan on the Yang-tse-kiang, about 5 m. above Kew-han. It is pleasantly situated near a range of hills, which trends away from it to the S. and E., about 50 m. above Nanking, and with its diversified bridges of heavy masonry its white houses clustering up the hill-side, or nestling among the trees at its base, looked more like an Italian than a Chinese town. It at one time contained about 10,000 inhabitants but the cruel hand of the insurgents has been upon it, and it now possesses only a single street.

TEFAX a town in Mexico, state Yucatan, 50 m. S.S.E. Merida, at the foot of a hill. It is regularly built consists of spacious streets and a fine market place, and has large and substantial houses, a handsome church, and an active trade. Within the town are some ancient Indian ruins.

TEGUCIGALPA a town in Central America, cap. dep. of same name, on the Rio Grande or Choluteca, here crossed by a white sandstone bridge of ten arches lat. 18° 50' N. lon. 85° 33' W. It consists of the little outer town or suburb of

Canaguala, on the opposite side of the river, and of the town proper which, contrary to usual rule in Honduras, has an active and bustling appearance. It is laid out with great regularity in well paved streets, lined for the most part with handsome stone and adobe houses, painted, according to the fancy of the proprietor, blue, red cream-colour, or white and provided with gabled balconies. The most important public buildings are the church and old academy, most of these steeped in their walls and in a very dilapidated state, but still imposing structures. La Parroquia, the largest and most venerable of the churches, is considered superior to any in Central America, those of Leon and Guatemala alone excepted. Among its educational institutions the place boasts of a kind of university or academy known, which was established in 1847 in the old convent of San Francisco. The shops and market are well supplied the former with all kinds of wares among which articles of female dress seem to predominate, and the latter with fruit of every description in the greatest abundance and at the most moderate prices. Most of the goods exposed for sale of foreign manufacture consist of British cutlery, woollen and cotton cloths, wood and tin wares, French wines and alika, Italian olives, sweet-oil, sardines, macaroni, &c. and American patent-leather boots and shoes, soap, candles, Lowell goods, and household wares. Pop. about 13,000, one half of whom are mestizos and mulattoes, and the other half whites, negroes, quadroons and Indians.

TEHERAN [add.] cap. Persia about 5000 ft above sea-level in the north-east, of which the south and south are the longest sides. It is surrounded by mud walls, furnished with towers every fifty or sixty paces, outside is a dry ditch 30 ft. wide. The city has six gates from which the main streets lead to the bazar in the centre of the town the smaller streets on the left and right have no thoroughfare. Tehersan has too few open spaces within the walls, the best is that called the 'green place', in front of the entrance to the shah's palace from the inner side of the town. The ruins of Kei the most remarkable in Persia after those of Persepolis and Pasargada, lie an hour's walk S.W. from Tehersan. Pop. 80,000 in summer 130,000 in winter.—(Brough's Persia).

THREE, a tu. India, Bundelkhand cap. territory of same name, called also Ourcha, 180 m. S. by E Agra. It is a place of considerable size, surrounded by walls, and defended by a fort seated on an adjoining height and contains the raja's palace, and a few small temples built as tombs or oratories. It is described however, as a wretched place, the only inhabitants being uncultured and rascals.

TEHUACANTEPEC, a tu. Mexico, in the newly formed territory and about 10 m. above the mouth of a river of same name in the Pacific, 205 m. S.S.E. Vera Cruz. It occupies several hills and consists of two distinct portions—one occupied by whites, composed of substantial stone houses, and containing among other public buildings several churches and a Dominican monastery and the other occupied by Indians, who, though dwelling only in cane-huts covered with palm-leaves, have made great progress in civilization, and are at once intelligent and industrious, producing considerable quantities of indigo and cochineal. The harbour, being encumbered by a dangerous bar is little used. Pop. 8000.

TEJA, or TEZA [add.] a tu. N. Africa, Morocco gov. and 75 m. E. by N. Fez. It is strongly defended, and is of great strategic importance because it guards the principal communication between the baons of the Molouia and Sebou, and between Algeria and Fez, and moreover keeps watch over the S. slope of the Rif. Its site is upon a rock overlooking a fertile and well-watered district. Among its public buildings is a handsome mosque. Pop. about 8000.—(Gedder).

TEKENDORF a tu. Austrian empire, Transylvania, circle and 12 m. S. Bistritz, cap. dist. of same name, with 1766 inhabitants, mostly employed in agriculture and the production of wine.

TEKKULOOTTA, a tu. India, presid. Madras, dist. and 26 m. N. Bellary. It contains two stone forts one in ruins and the other in tolerable condition and an old temple, with a stone inscription in the Hala Ganesara character. The number of houses is about 480.

TEKUT a mountain, N. Africa regency and 50 m. S. Tripoli, on the borders of Ghazania. It is in the form of a

cone, the summit of which has an absolute height of 2800 ft., and a hollow in the centre which has every appearance of an ancient crater. The rock though adapted to be pure, is very impure.

TEKUTSH a tu. Turkey in Europe, Lower Moldavia, cap. circle of same name, on the Bistritza, an affluent of the Sereth, 44 m. N.W. Galatz. It is the seat of a civil and criminal court, and has a normal school and an important trade in corn and wine. Pop. 8000.

TELETZEY a tu. Austrian empire, Bohemia, circle Chrudim, 4 m. W. Politzschka, with a Protestant and a R. Catholic church three mills, and iron-mines.

TELLICHERRY [add.] a tu. India, presid. Madras, dist. Malabar 80 m. S.S.E. Mangalore, and very nearly the same distance S.W. Seringapatam. It occupies a beautiful site between the sea on the W. and the magnificently wooded heights of the Ghats on the E., and consists of a town and a fort. The town is built for the most part of unburnt bricks, though some of the wealthier natives use laterite, which abounds in the neighbourhood. The fort stands on a rising ground close to the sea, and about 40 ft. above its level. It is of very limited dimensions, being only 117 yards long by 34 broad. The whole of its N.W. side is occupied by a lofty building the upper part of which is appropriated to the criminal court and offices, and the lower to the jail, which is calculated to receive 300 prisoners. Other parts of the fort are occupied by the civil and military hospitals. Though of comparatively small size the place is so healthy that they have never been overcrowded with patients except during some frightful visitations of cholera. The harbour of Tellicherry is protected by a natural breakwater, which consists of a ledge of rocks extending about 672 yards in length and running parallel to the shore at the distance of about 514 yards. It is said that within the ledge the depth is sufficient for a vessel of 600 or 800 tons but meanwhile, till some important improvement takes place, large ships are directed to anchor well out in 7 or 8 fathoms. From not taking this precaution, the *Superb*, 74 guns, was lost here in November, 1781. Tellicherry was long the chief settlement on the Malabar coast, but since 1817 having come into competition with it, it has greatly declined. Many of the richest natives, however, still reside here; and an active trade is carried on, chiefly in pepper, cardamoms, sandal wood, ginger, &c. Hyder Ali laid siege to Tellicherry in 1782 but failed to take it. It has an estimated pop. of 20,000.

TELLWITZ, a tu. Austrian empire, Hungary or Upper Austria, 12 m. N. by W. Tyrnau has a fine castle with English gardens, and 2050 inhabitants, who are mostly weavers and shoemakers, or cultivators of the vine. There is a lunatic asylum in the vicinity.

TELSHI, a tu. Russia, gov. and 105 m. N.W. Kovno, cap. circle of same name. It is the seat of a R. Catholic bishop, and has a church, a circle school, and a charitable endowment. Pop. 8784.

TELTZ, a tu. Austrian empire, Transylvania, circle and 22 m. N. by W. Bistritz, on an affluent of the Great Sava, with a Greek united parish church and 1578 inhabitants.

TENASCALTEPEC, a tu. Mexico state Guerrero, in a beautiful and healthy district, 50 m. N.N.E. Taxila. It contains 6000 inhabitants, and though once famous for its wealth has now a very indifferent appearance.

TENANCINGO a tu. Mexico, in a beautiful valley at the foot of a mountain, 25 m. S.S.W. Mexico. It possesses a principal church and two chapels, and contains about 6000 inhabitants, who are chiefly employed in agriculture, but partly also in the manufacture of paper, which are made of cotton, and form an indispensable article of female dress in Mexico.

TENDUKHERI, a tu. India, Saurashtra and Harbada territories 50 m. E. Sangor. It stands at the base of a remarkable conical hill composed of trap, and has in its vicinity rich mines of iron ore, which is worked to a considerable extent, and furnished the iron of which a suspension bridge of 300 ft. span was constructed by native workmen at the commencement of Sangor.

TENES, two nearly contiguous places in Africa, Algeria, prov. and about 100 m. W. by E. Algiers.—1, Old Tenes, a small fishy place on a stream at the bottom of a bay of the Mediterranean, which forms a very indifferent harbour. It

was once the capital of a petty kingdom, and is still surrounded by ramparts built of large stones, and contains a mosque and a *caravansaray*.—*New Times*, founded by the French in 1843, on the site of the Roman *Castrum*, consists of well formed streets and handsome houses has an important weekly cattle-market, and exports considerable quantities of grain. A large part of the adjoining plain has been laid out in vineyards and mulberry plantations, and in the vicinity marble, lead and copper are found. Pop about 8800 of whom 2500 are Europeans.

TENG-CHOW FOO a tn China, prov Shantung at the S.E. entrance of the Gulf of Pechili. It stands upon a flat raised somewhat abruptly to the height of about 100 ft above the sea, and is surrounded by battlemented walls which have the form of a parallelogram and extend for upwards of 8 m along the shore terminating on the extreme right in a conical hill crowned by a citadel and joss house. It is one of the ports opened by the treaty of Tientsin, and is probably destined to become the principal emporium of M. China. The harbour, however is not on the mainland, but among the islands of the Mian tan group, lying opposite to it at the distance of about 4 m. At present the harbour is used chiefly by large numbers of junks proceeding with grain for the supply of Peking. The ground in the vicinity of Tengchow is richly cultivated, and rises in a gentle ascent till terminated by lofty rugged and barren mountains apparently granitic.

TEPANTITLAN a tn. Mexico, state Jalisco about 50 m ENE Guadalajara with 8600 inhabitants, chiefly employed in agriculture.

TEPEACA or **TEPEYACAC**, a tn. Mexico state and 22 m S.E. Puebla, in a fertile district upwards of 7000 ft. above the sea. It is an ancient place which has lost much of the importance once belonging to it, but still contains several fine churches, an octagonal tower, a fountain and a large market place.

TEPOCOCOLUILA a tn. Mexico state and 60 m W N W Oajaca, cap. dep. of same name on a beautiful plain. The chief products are cochineal cotton, and maize. At one time the culture of silk, introduced by the Dominicans, was extensively carried on in this and the adjoining department of Acolitlan, but the Indians, provoked by some acts of oppression, ravaged themselves by setting down the whole of the mulberry plantations in a single night. Since then the culture of silk has entirely ceased.

TEREGOVA a tn. Austrian empire Banat Military Frontier, 66 m S.E. Temeswar with a Greek non-natural parish church, and 2410 inhabitants. Not far from it is a mountain pass leading into Valachia.

TERENNYE a tn. Austrian empire Hungary co. Neograd, 23 m E Balass-Gyarmat, with a fine castle, large manor, a manufacture of alcohol, and 1650 R. Catholic inhabitants.

TENNOVA, a tn. Austrian empire Hungary co. and 25 m N.E. Arad, with 2115 inhabitants engaged in agriculture and in raising live-stock and bees.

TENERO a tn. Austrian empire, Tyrol circle Trent with a large hospital, an institute of the Sisters of Mercy and 1300 inhabitants, many of whom are basket-makers.

TESBOWA, or **TALAWA**, a vil. N Africa pach. Fessan 80 m N.W. Mourzouk. Seen from a distance its clay walls and towers have a conspicuous appearance, but the expectations thus raised vanish as soon as it is entered. Still, how ever though it has a deserted look, it ranks among the more wealthy and important places of the country.

TESTE, an island, the largest and most conspicuous near the W limit of the Lonsdale Archipelago: lat 10° 56' S, lon. 151° 5' E. It is 2½ m long by ½ m broad, and is traversed by a ridge of hills through its whole length. It has not been explored, and nothing is known either of its inhabitants or of the depth of water near its shores.

TETTEL, or **TETE** [add.] a tn. Portuguese possessions S.E. Africa, r. bank Zambezi, about 170 m (direct) from its mouth, lat. 16° 7' S. lon. 33° 37' E. It stands on a succession of low sandstone ridges at the side of the river, which is here 960 yds. wide. Shallow ravines running parallel with the river form the streets, the houses of the Portuguese being built upon the ridges. A wall of stone and mud surrounds it, and the native population live in huts outside. The num-

ber of white inhabitants is small, comprising chiefly the garrison, many of the officers and men of which are said to have been sent out of Portugal for their country's good, and the merchant settlers, who deal in ivory and slaves. The place is under the rule of a Portuguese governor. Droughts are of frequent occurrence, and the crops suffer severely, owing probably to the ranges of hills N and S, which stand the rain-clouds to themselves. Indigo grows freely, and fills the shallow ravines which form the streets of the town; wheat is sown in May, and in about four months is ready for the sickle; onions and other seeds of plants cultivated by the Portuguese are sown in April. The wheat of Tette is exported as the best grown in the country. A small quantity of cotton of first-rate quality is grown by the natives for the manufacture of a coarse cloth. The Zambezi is in flood twice in the year: first about the end of December or beginning of January, the second, after the river has like the Nile inundated the interior takes place in Tette in March. A few miles to the N of Tette coal is found in seams from 4 to 7 ft. in thickness—one measured was found to be 25 ft. thick, and of good quality for steam purposes. It lies under a coarse gray sandstone, which often has the ripple mark and impress of plants and shell-worked wood on its surface. Magnetite from exists in abundance near Tette, and gold also is found in many places across to the south. Pop. 4500.

TETUAN N [add.] a tn. N Africa, Morocco, 24 m S by W Ceuta, in a valley of the Little Atlas, and rather less than 1 m W of the shores of the Mediterranean. It rises on a slope which descends rapidly eastward towards the sea, and terminates westward in a lofty eminence crowned by its citadel while at some distance S the view is closed by a mountain range of rugged appearance, and about 3000 ft. high. To the W lies the mouth of the valley by which it is approached after crossing a stream on a substantial bridge. On reaching the town the ground becomes covered with gardens and the air is deluged by the sound of the waters employed in irrigating them. Shortly Tetuan itself comes fully into view with its white lofty and picturesque walls. On entering the first thing passed is a large garden planted with olive trees, and forming an appendage to the governor's residence. Beyond it is a large public square, imperfectly levelled, where the markets are held. To the left of this square stand the governor's palace and the citadel and to the right the gate of the *medina*, while in front is seen the Moorish town with its narrow tortuous streets, occasionally shaded with trellis-work of vines, and its arched and gloomy bazars. Among the public buildings are about forty mosques, several of them large and well kept, but not a few in a ruinous condition. The manufactures, chiefly of leather and lacquer articles, sword-cutlery and fire-arms, are carried on to a large extent and are so much in demand as to form a considerable export trade. Tetuan figures a good deal in early Spanish and Moorish history and attracted notice in the hostilities which broke out between Spain and Morocco. The latter, after sustaining several defeats the last and most equal of which took place in the vicinity of Tetuan on the 23d of March, 1860, was glad to sue for peace, and obtained it on somewhat onerous conditions. Among others the Emperor of Morocco engaged to pay twenty millions of piastres as a just indemnity for the expenses of the war and full payment, left Spain in possession of the town of Tetuan and the whole of the territory that formed the prebend of the same name.—(Gardner *Description of History of Morocco*).

TEYUSSEL a tn. Russia gov. and 50 m S.S. W Kazan, cap. circle of same name, on the Volga with a church, a circle school a charitable institute, and 3022 inhabitants. There are sulphur and naphtha springs within the circle.

TEUTLIA a tn. Mexican state and 130 m N N E Oajaca, on a fertile plateau on the N.E. slope of the mountain range stretching along the N.E. side of the state. It once possessed importance as the capital of the Guasacots but now contains only about 150 families, whose chief employment is in agriculture and in weaving cotton covers.

TEWAERAE a bay, New Zealand, in the S of Middle Island or Munster, towards the N.W. entrance of Foveaux Strait. It is formed by Pahi Point on the E. and Sandy Hill Point on the W. which are about 15 m apart, square shaped, and has a depth of 7 m. It is entered at its N.W. and N.E. corners by two rapid hotted rivers, which drain a

wild mountain region. The river in the N.E. issues from a large lake in the interior, and is turned to account by the natives, who descend its rapid current on rafts during their excursions to the sea coast. The river in the N.W. seems to form a natural boundary between the open country and the mountains.

THAIEVAPOOR, a tn. India, presid. Madras, Pooconchak or Travancore Country, on the skirts of a jungle on the road to Trichinopoly and 3 m. S.W. Pooconchak. It is a populous place, noted for its weekly market, where cloths of various kinds, including the best in the province, are sold along with other commodities.

THALESAP, or **TOULI SAP**, a lake, Cambodia, situated at the N. extremity of the kingdom, in about lat. $18^{\circ} 30' N.$ lon. $102^{\circ} E.$ It is nearly 100 m. in circumference, and abounds in fish, especially in a large and very delicate kind called *saot*, which the Cambodians esteem a luxury. Near the shores of this lake are the marvellous ruins of Angkor-wat, which are described under **OSKOR** in *Siam*.

THABEN-NEUDORF, a tn. Austrian empire, Hungary, 60 and 7 m. N.W. Presburg, on the railway to Vienna, and on the March, which is here crossed by a long bridge giving access to a fine imperial palace on the opposite bank. Pop. 1200 Slovaks.

THEINNAH, or **SHAN THEIN VAH**, cap. of a Shan state tributary to Burma, 55 m. N.E. Ava, near the frontier of China, on the highway to Yanta; has a population of about 5000. The territory though by no means the most populous, is the largest of the Shan tributary states.

THILISING, a tn. Austrian empire, Bohemia, circle and 22 m. N.E. Eger, on the Schmelz with a deanery church, a castle, an hospital, two breweries, two mills and 1800 inhabitants.

THIERIA, or **ANTHURA** [*id.*], an island, Greece Cyclades, S.E. of the island of Zos. It has an area of 40 sq. m. and has an elevated and rugged surface, intersected by numerous ravines and small valleys. The island is tolerably productive, yielding barley, wine, figs, honey and wax, wool, goat-silk cheese, excellent silk, and some wheat and olives. One main employment of the inhabitants, amounting to about 4000 in number, is raising goats and wool, the industry the latter. The principal place is Messara, the capital, situated on a bay of the E. coast, with a justice of peace court, a Helms and a parish school a considerable trade, and a pop. of 1850. Polioastron, perched on the summit of a steep rock overhanging the sea, and having near its foot the large and sheltered haven of Phiklida, and bytaka, which contains 1800 inhabitants, and has a parish school and a harbor. Iron is found in several parts of the island.

THIERBERG, a tn. Austrian empire, Lower Austria, on the Schiltbach about 35 m. S. by W. Vienna, with a palace of one of the Austrian archbishops, a picture-gallery, a botanical garden, several saw-mills, and 1020 inhabitants.

THOMPSON, a river British Columbia, Western N. America, an affluent of the Fraser River which it joins about lat. $50^{\circ} 12' N.$ lon. $121^{\circ} 25' W.$ It issues from the Shuswap Lake in about lat. $50^{\circ} 55' N.$ lon. $119^{\circ} 50' W.$ flowing S. and then W. through Kamloops Lake, whence it runs westward for some miles, receiving some minor streams, then E. being joined by the Nicola River and then W. into the Fraser, after a course of about 125 m. with scenery in its lower part similar to that of some parts of the Fraser—a shelving bank with large boulders. Below the Nicola it receives the Nicomen a small stream in which the first discovery of gold in this region was accidentally made by an Indian, who, stooping to drink, saw a glittering in the water. The district of the Thompson and its affluents is exceedingly beautiful and picturesque, being composed of a succession of hills and valleys, lakes and rivers, with miles of green hills, crowning spires, and level meadows, all producing an abundant growth of grass. It is of great value as a grazing district, and has a most healthy and agreeable climate. The lakes and streams furnish good facilities for irrigation in dry seasons, so that the cultivation of the land may always be carried on with great success.

THOROLD [*id.*], a vill. British America, Canada West, on Welland, on the Welland canal, and on the Great Western and Welland railways, 55 m. S.W. Toronto. It

occupies a hill commanding an extensive and beautiful view, in the centre of an old settled and rich agricultural country, and possesses three churches and several schools, manufacturing of soap and candles, agricultural implements, tin and iron ware, &c., tanneries, a pottery, a carriage factory, and flour saw planing and cement-works. In the vicinity are building and limestone quarries, which are wrought to a considerable extent. Pop. about 2500.

THUNDER BAY, British America, between lat. $46^{\circ} 18' N.$ and $45^{\circ} 35' N.$ lon. $82^{\circ} 35' W.$ and $89^{\circ} 22' W.$ forms a portion of the N.W. expansion of Lake Superior and is one of three large and deep land-locked bays which characterize that part of the coast. Its greatest length in a N.E. direction is 53 m., and its breadth about 14 m. The main entrance to it is between the imposing headlands of Thunder Cape, 1250 ft. above the level of the lake, and nearly 2000 ft. above the level of the ocean, and Pelee Island, which is 5 m. S.W. of the cape, and attains the height of 850 ft. The depth of water at this entrance is 30 fathoms, and in many parts of the bay varies from 10 to 20 fathoms. On the W. side of the bay, where the Kamistiquia narrows its waters into it, stands Port Williams one of the earliest and most important stations of the Hudson's Bay Company. The scenery around the bay and beyond it on the mainland, where Mackay's Mount, forming the N.E. boundary of a trap range and having its flanks covered with a heavy growth of hardwood timber, lifts its broad front to the height of 1000 ft., is of the most imposing description.

THUNNESSE, a tn. India, British India, bank Seracooty in a fertile and well-cultivated district, abounding in mango groves, 90 m. N. by W. Agre. It stands on a great irregular mound composed of the ruins of a former city is surrounded by a ruinous wall which was once of considerable height, and is defended by a dilapidated fort with numerous towers. Most of the dwellings are wretched huts scattered among ruins, but the natives in easy circumstances have handsome houses the walls of which are covered with figures of their monstrous idols painted in gaudy colours. The principal buildings are a Hindoo temple and a ruinous Musselman tomb of an octagonal form, with a turret at each angle, and a large and very elegant crown dome of white marble. It is at a short distance to the Lake of Khoskhot, famous for a great legendary battle fought upon its banks, and described in the Mahabharat. It is much visited by Hindoo devotees. The ancient Thunness was sacked and destroyed by Mahmood of Ghazna whose army according to Ferishta, brought to Ghazna 200 000 captives and much wealth.

TIBATI, a tn. Western Africa, on the S.W. frontier of Adamawa, 190 m. S. by W. Yola. It is situated on a small stream which joins the Faro and is one of the few places in Adamawa which are regularly walled. Though the residence of a governor, it is inhabited for the most part only by slaves. It boasts of having the richest vegetation in the kingdom.

TIBBIN, the Tere or Tereven of the Crusaders, a deserted fortress, Palestine, on the summit of an isolated hill near the S. extremity of Lebanon covers a large extent of ground, and exhibits among its ruins many indications of the labour which the Crusaders must have expended upon it. The only part still entire is the gateway.

TIBURON or *St. Marcos*, in the Gulf of California, off the coast of Sonora, from which it is only separated by a narrow channel of no dangerous character that it bears the name of Canal Pangloss. It is nearly in the form of a rectangle, about 30 m. long from N. to S. and 18 broad from E. to W., and is inhabited by Curis Indians, who subsist by hunting and fishing but bear a bad name for their predatory propensities.

TIEN-TSIN or *TEAN-TSUN* (pronounced *ford*) [*id.*]. This may be considered the river-port of the Chinese capital, with which it has water communication by the Peiho River, a distance of about 120 m. by its windings, and 50 m. by land. At the same time only small junks can run up the discharging stream, several miles below the walls of Peking. Foreign vessels of ordinary burden cannot reach the city of Tientsin, on account of a bar at the entrance to the river, and its crooked navigation. Hence large ships anchor outside the Ta-ho roadstead, where their cargoes are transhipped to native craft. In addition to these drawbacks to the free navigation of the channel the river is frozen up from four to

five months in the year from October until February or March, during which period all external trade is cut off. Nevertheless a large export trade is carried on during the open season, between seven and eight months, chiefly in

A VIEW IN TIENTSIN.—From Fishing & Maritime Territory

European merchandise, through foreign houses but principally by native merchants, with the traders who flock to this mart from the interior. It was a knowledge of this traffic which caused this port to be the first named in the famous treaty of Tientsin in 1859, by which eight ports were opened to foreign commerce, in addition to five previously existing. Its proximity to Peking, however, made the concession obnoxious to the Chinese government; and hence it was one of the causes of their resistance to the British and French plenipotentiaries, when they proceeded, in 1860, to put the treaty into effect by force of arms. After the capture of the Taku forts, and the rout of the Tartar army under Sien-lo-hsin, the allied forces occupied Tientsin without opposition, when the inhabitants freely supplied them with provisions, and even volunteered for pay to aid their enemy in the campaign, by carrying commissariat stores. On the ratification of the treaty with supplementary clauses added at the convention of Peking, in October 1860, the allies took military possession of Tientsin, until the indemnity money of £4,650,000—equally divided between the British and French—for the cost of the war, should be paid. As this would have taken five years to accomplish, and the Chinese eventually paid the first instalments, the allied troops evacuated Tientsin in April 1862, after an occupation of eighteen months. According to the terms of the treaty a portion of land adjacent to the city was laid apart for a British settlement, where a branch of the Maritime Customs, a consulate, and numerous warehouses, built by merchants for storing merchandise and produce have been established. At the opening of the port a considerable import trade was done by English residents, and other foreigners renting the land from them, as it was well known that Tientsin supplied a very large extent of country, where the products of western nations, as well as opium and metals find a ready market amongst the natives of Pechili, Shan sea, and Southern Mongolia. Goods landed at this port even find their way into Tibet, on the borders of India, from whence and from the Mongol territory are brought wool and small hails in return. Large fairs are also held at stated periods, at which a system of barter prevails, gold forming one of the native products given in exchange, to a large extent. In 1861 the trade was so considerable that most of the old-established merchants in the south opened branches, and new traders located themselves in the expectation of an increasing business. In this they were deceived by a serious falling off in 1862, which threatened a total extinction

of commerce as far as foreigners were concerned. Trade rallied in 1864, when the imports amounted in the aggregate to £3,885,661, of which £1,390,867 passed through the hands of foreigners, and £1,184,784 through native hands. These consisted chiefly of Manchester goods (£287,787), opium (£228,741) silk piece-goods (£218,833), metals, brass buttons, tea, sugar, tobacco &c. The exports are few and of small value, gold and silver being the chief medium of exchange. Of the bulky articles the value in 1864 was £370,982, the principal items being cotton (£213,963), tobacco (£244,428) and medicine (£26,785). It is noticeable that in this part of China, tea, instead of being an export, is an import to the value of £198,922. This consists almost entirely of brick tea for the use of the Mongolians, who live in a state of pastoral simplicity. Comparing the year 1865 with 1864, there was a large increase in the imports of manufactured goods and opium the total amounting in value to £2,850,812 or £1,506,151 more, but this includes imports from Japan. The value of the exports was somewhat less amounting to £563,987 exclusive of the gold and silver alone, of which no record was then taken. The returns of shipping since the opening of the port are as follows:—1861, 111 vessels, 24,561 tons; 1862, 87 vessels, 21,921 tons; 1863, 124 vessels, 38,276 tons; 1864, 185 vessels, 45,968 tons; 1865, 202 vessels, 60,049 tons. In 1866 the imports amounted to £3,251,428, of which three-fourths were foreign merchandise, and the exports were produce £351,188, treasure £1,905,665, besides gold unaccounted for.

The foreign population in 1864 comprised 40 persons, of whom 34 were British, 6 German, and 2 American. There are consulates of Britain, France, and Russia, and one mission, English. The population of the walled city and suburbs has been computed in round numbers at 400,000.—(Chinese Customs Returns, Remise, The British Arms in China and Japan.)

TIGGFE-URTIN, a vil. N Africa, Egypt. Fezen in habited by the tribe of Tymlikum about 20 m W N W Moussouk. It consists of a number of huts partly grouped and partly detached, some with pointed others with flat roofs, but all of a neat and orderly appearance. Beside emmels, which constitute the chief wealth of the inhabitants, and enable them usually to make long and profitable journeys to Souday, they possess a good many sheep. They must in their way be very devout, for in the morning, when Dr Barth took a walk round the village 'all the men were saying their prayers together upon a sandhill on the north side of the principal cluster of cottages.

TIGRE or GOVANDRO a river S. America, Ecuador, which rises on the E slopes of the Andes not far from Chimborazo enters the territory submitted by the Zaparot Indians and taking the S E. course common to all the affluents of the Amazon coming from Ecuador joins that river on its left bank after a course of 150 m. It flows along alluvial banks thickly covered with magnificent forest trees.

TIHANY, a town Austrian empire, Hungary, co. Zala, on a peninsula which projects from the N W shore of Lake Balaton with an old abbey a Benedictine monastery a dilapidated castle crowning a hill the remains of fortifications by which King Andrew I, who is buried here secured the neck of the peninsula; several rivers, and a remarkable echo. Pop. 840.

TILANTONGO a vil. Mexico, state and about 40 m W Oaxaca, in a fertile plain. It was once the residence of the great chief who ruled Mixteca Alta, and in 1572 when the Dominicans founded a monastery here, contained about 2000 Indian families. At present the number does not exceed 8000.

TILLI, a vil. Western Africa, Hausa States about 60 m. N W Sokoto. It is walled, and entered by two gates, one of them so narrow that a loaded camel cannot pass it. Its market is well supplied, and its inhabitants, numerous and apparently prosperous, possess large herds of cattle, and many herds of camels.

TILSONBURGH a vil. British America, Canada West, co. Oxford, on the Big Otter Creek, 73 m S W Toronto; with two churches, a foundry a tannery, manufacture of shoes, harness and hardware, saw and grist mills, a pump factory, and a trade in lumber. Pop. about 800.

TILWABA a vil. India, Rajpootana, state and 65 m. S W Jodhpoor, 1 bank Looee, is celebrated for its fair held

usually about the vernal equinox, for the sale of five-stock, chiefly camels, horses, and bullocks, and attended by about 2000 persons.

TIMBA is in S.W. Africa, Khabunda country, territory Sumbé, at a short distance from the point where the Kajo Curo or Kava falls into the Atlantic, 100 m. N. Benguela. Though a very valuable place it is the residence of an independent chief, and contains 1500 indolent inhabitants, who employ themselves in agriculture and the rearing of cattle, and living on good terms with the Europeans, carry on some trade with them in gun-cotton war, and orechil.

TIMBUATOO [add.], a town Western Africa, about 6 m. N. of the principal houses of the Niger, lat. $11^{\circ} 57' N$, lon. $3^{\circ} 57' W$. It stands on a flat only a few feet above the average level of the river, and has a circuit of about three miles. Its shape is nearly that of a triangle, of which the base stretches from E. to W. nearly parallel to the river and the apex points towards the N. At present it is not walled, its former wall, which was destroyed by the Falbe in the beginning of 1896, not having been replaced. The streets are partly rectangular, partly winding and all so extremely narrow as scarcely to admit of two horses going abreast. They are all unpaved, and some of them have a sort of gutter in the middle, the large and small market and a small square in front of a mosque, are almost the only open spaces. The dwellings, consisting of about 1000 clay-houses, are for the most part substantially built and in good repair. Among them are many low in height and of limited dimensions but not a few have a second story in front and a tierced roof, and even make some attempt at architectural ornament. Besides the clay-houses there are about 200 conical mud-huts, a few of them elevated promiscuously over the town, but the greater part of them constituting its outskirts on the N. and N.E. sides where rubbish has been accumulated in such quantities, and for so long a period as to form several conspicuous mounds. The only remarkable public buildings are three

chiefly by the bachelors, occupies the site of the royal palace already referred to the latter, situated on the E. side of the town, between the Jangard-bar and the Sid Yabla mosque, covers a considerable space, and furnishes accommodation for a very extensive trade. Unlike Kano, Timbukto has few manufactures, and none of the large ones, except provision or baggage bags, umbrellas, tobacco-pouches, and some other articles in leather. The chief staples of trade are gold, which, however, if compared with a European standard, seems petty, the annual average export probably not exceeding 230 000, salt, brought from the mines of Taodmal, which have been worked for upwards of two centuries and a half, and bartered here for cloth manufactured in Kano and the goro or kula salt, brought from the provinces of Tazgawa, Toudi, and Kani, to the S. of Timb. The leading articles of produce exposed for sale in the market are rice and sugarcorn, vegetable butter, much used in cookery and as oil for lamps, pepper ginger and a small quantity of cotton. Of the caravans which visit Timbukto, the most important are those from Morocco, which bring many articles of European manufacture, particularly calico clothed and unlabeled, much of it with the name of a Manchester firm printed upon it in Arabic letters, red cloth, coarse coverings, matras, looking-glasses, and cutlery. Timbukto was long ruled in Europe as the centre and capital of a great negro empire. This was a mistake, since it has never acted more than a secondary part. It is undoubtedly of high antiquity, and possessed a kind of rude independence under its Timbakh or Tawarak founders, till the beginning of the fourteenth century, when Manus Muna added it to his other conquests, and incorporated it with his kingdom of Melle, which under him attained its greatest extent and prosperity. After a century of subjection Timbukto returned to the Tawarak its original founders, and about the middle of the fifteenth century became a chief entrepot for the salt brought from the mines of Tazgawa. When the Songhay kingdom rose on the ruins of that

of Melle Timbukto passed to it, and received a great accession of wealth and importance in consequence of a general migration of merchants from Walata. When the Songhay kingdom was broken up its conquerors, the Falbe or Felleth, became masters of Timbukto allowing it to be governed as before by an officer who had the title of Timbakh Bey, and appears to have been all but nominally independent. At present Timbukto which has suffered much from the rivalry of the Falbe and Tawarak, who have repeatedly made it their battle field, is governed in accordance with a compromise which was agreed to in 1848. It pays tribute to the Falbe or Felle, who collect it by two kadis, the one Falbe and the other Songhay but it is not governed by any military force, and is thus one or two Songhay magistrates, with the title of amir. To these the municipal administration, and more especially the police, properly belong, but placed as they are between rival Falbe and Tawarak, ever ready to assert their supremacy, and maintain it by any means, how ever violent, their authority exists more in name than in reality. As recently as 1855 the Falbe, dispossessed with the name

GENERAL VIEW OF TIMBUKTOO.—From North Africa.

mosque—the Jangard-bar situated near the S.W. extremity of the town, the Jangard in the N. and the Sid Yabla in the S. The Jangard-bar, or great mosque, begun by Manus Muna, King of Melle, in 1357, is a large and imposing pile of building, about 270 ft. long by 300 wide surrounded by two towers, and composed of nine rows of various size and structure the Sankard, 120 ft. long by 80 wide, has five rows, and is said to have been built by a wealthy lady, the first Yabla, much less than the other two, was built at the expense of a eunuch or judge of the town. Of the royal palace of Ma-daga in which the kings of Songhay occasionally resided, and the Kowba not a trace remains. There are two market-places, a smaller and a larger. The former, now appropriated

of matters in Timbukto undertakes great expeditions against it. The regular inhabitants of the seven quarters into which the town is divided are estimated at 18,000, besides these there is a floating population, which, during the busy season, from November to January, may average 4000 and almost occasionally to double that number.

TIMINUN [add.], a town N. Africa, Great Sahara, emp. dist. Gharra, lat. $20^{\circ} 28' N$, lon. $1^{\circ} 45' W$. It consists of 500 or 600 houses, which, from the number and size of the gardens attached to them, occupy a very large area, and is surrounded by a dry ditch 12 ft. deep and 7 or 8 ft. wide, and a crenelated wall surrounded by towers or small forts, each capable of resisting from thirty to forty combatants,

The entrance to the town is by three principal and five minor gates, and the dividing of it is into nine distinct quarters, each possessing its own mosque. Of these mosques the largest and most remarkable is that of the district of Amang-
 reber. Besides seven large squares, which are the common resort of all the inhabitants, the principal streets are appropriated to particular corporations or trades. Thus one called *Shik Bazaar* is occupied by the butchers and better merchants; another, *Shik Bazaar*, by the shoemakers and saddlers; a third by the dealers in wool and clothing; a fourth by the dealers in grain and dates; and others in like manner by grocers, tobacco-sellers, jewellers, slave-dealers, &c. The trade, export and import, carried on chiefly with the Tell, the Sahara, Boussa, Tunis, and Morocco, partly by individual travellers and partly by caravans, is very extensive, and includes almost every article of necessity and luxury. Among the articles produced within Timman itself, one of the most important is gunpowder the nitre for which is obtained from a salt lake (*Shik*) situated some miles to the west. Near the centre of the town a square fortress or kasbah has been erected on a natural mound. It is of small dimensions, but well answers its purpose as a place of security, in which the inhabitants deposit their most valuable effects in the event of a sudden attack by the Berbers. Such attacks are frequent and notwithstanding the precautions used, have repeatedly had disastrous results. Timman, long subject only in name to Morocco, has asserted its independence, and is governed by a *djema* or council, composed of the principal inhabitants of each quarter with a president at their head. In administering justice the *djema* imposes fines and inflicts bodily punishments, but does not in any instance condemn criminals to death. Even murder is atoned for by a pecuniary fine and banishment for a long or short period.—Dumas, *Le Grand Desert*.

TIMOAN or **TAMU** the largest of a chain of islands Indian Archipelago, lying off the E. coast of the peninsula of Malacca, and belonging to the territory of Pahang. It has a total length of about 12 m. and a breadth of 6 m. and consists of bold and precipitous masses of trap, which, though not picturesque, have an air of grandeur some of the peaks rising more than 8000 ft. above the sea. It contains a pop. of not more than 200, and produces nothing for export except edible nuts, rubber, and damer.

TINDIM a tn. Western Africa, cap prov Kauria. 70 m S.W. Timbuktu. It is one of the original seats of the Songhay and is now inhabited chiefly by the Chokos. During the flourishing period of the Songhay empire it was a favourite royal residence. While thus virtually the capital it derived additional importance from being the first town in a province which not only furnished Songhay proper with a large number of soldiers, but also supplied it with grain, and was hence designated the King's Provider. At Tindim the branch of Gambia separates from the main trunk of the river.

TINGER, a tn. Western Africa, Songhay country 230 m S.W. Timbuktu. Its walls constructed with receding and projecting angles and occasional semicircles like bastions give it all the appearance of a fort. The houses, which are flat-roofed, have walls of sun dried clay, which is formed in regular lumps like stones, and placed in uniform layers, with loose clay between. Thus constructed, their exterior is by no means attractive, but the interior is better and in some of the houses the accommodation is very ample. The inhabitants, who are Songhay, have retained all the efforts of the Fulahs to subdue them. They are industrious cultivators and weavers, and even at the same time disposed to make life pass as pleasantly as possible. Smoking, indulged in alike by males and females, is their great luxury, and dancing their favourite amusement.

TINNEVELLY [add.] a tn India, presid. Madras cap. dist. of same name, 1 bank Tambrapooram opposite to Palani south. It is a populous place containing nearly 30,000 inhabitants, and possessing one large pagoda and several small ones. The intercourse between Tinnevely and Palani, which during the monsoon was maintained only by a ferry, is now carried on without interruption by means of a substantial bridge of eleven arches, erected by a wealthy and public-spirited native. Cotton is largely cultivated in the vicinity. Many of the inhabitants profess Christianity.

TINO, or **TINOS**, a tn. Greece, nomarch Cyclades, cap. *See* *THE GAZ.*—Vol. II.

Island of same name, on a small bay of the S.W. coast. It is the see of a R. Catholic bishop, and has two R. Catholic churches, a Franciscan monastery, a *Holies* and a parish school. On its N.E. side stands the famous monastery of Panagia, with a handsome church which is built of marble, and attracts crowds of pilgrims, particularly at its yearly festival. Pop. 2100.

TINTAGH-ODE, a vil. Western Africa, on the N. frontiers of the country of Ait or Aitona. It extends in a long line over the low foothills of a mountain range, and consists of about 100 huts, only a few of them built of stone and the rest lightly made of grass and the leaves of the desert palm. Small as the place is it is very important for the intercourse between Central and Northern Africa, as it is inhabited by Marabuth or Ansilman a class of devotees called by Dr Barth 'learned and devout men' whose influence over the wild and predatory hordes of the desert gives a security to commerce which would otherwise be impossible. He adds, however, not very consistently that the Ansilman, 'though they style themselves devout men' have not therefore relinquished all concern about the affairs of this world; but, by their ambitious intrigues and waffle proceedings exercise a great influence upon the affairs of the country.

TINTALLIST, a vil. Western Africa, in the country of the Kador, on the N. frontiers of Aitona. It stands in a beautiful mountain valley and though insignificant in itself, is important as the residence of a powerful chief. Such at least was the state of matters when Dr Barth first visited the place when proceeding to Agades. Before his return a change had taken place. He was expecting a hospitable reception, and was astonished to learn that Tintallist was completely deserted. The chief, Amer, had suddenly started off and formed a new encampment considerably to the southward in the valley of Tintagone.

TIRABA, a tn. Turkey in Europe, Albania, eyalet Rum-El, pleasantly situated near the source of the Isard, 18 m K.N.P. Durazzo. It contains about 4000 inhabitants, who are largely engaged in the culture of the olive.

TIRGOVIST, a tn. Turkey in Europe, Walachia, cap. cercle Dumbovitz, on the Yalomina, 45 m N.W. Bucharest. It was once the capital of Walachia, and numbered 80,000 inhabitants though it does not now contain above 2500. Its ramparts and larger houses lie in ruins, but it is still the seat of a court of primary jurisdiction, and has a normal school.

TIRKONUM a tn. India, presid. Madras Tanjavan's Country on the edge of a wood rather more than a mile N.W. Pondicherry. It is a small place, celebrated for its pagoda, which is held in the highest veneration throughout the province, and draws a large revenue from devotees. The inhabitants are chiefly Brahmans.

TIRNOVA, a tn. Turkey in Europe, Bulgaria, eyalet 140 m S.E. Wilna. It was once the capital of Bulgaria, and towards the end of the last century one of the most active manufacturing towns in Europe, giving employment to about 2000 looms. Though greatly declined, it still contains 6000 houses, with 12,000 inhabitants; is the seat of a kaimakan and a Greek bishop, and has manufactures of coarse woollens, silks, and leather.

TIRUWALLA, a tn. India, presid. Madras Travancore cap. dist. of same name, 40 m S.E. Cochin. It consists of an extensive and tolerably regular town, with a large pagoda near its centre. The pagoda, which is surrounded by a high wall nearly a furlong square, ranks, in respect of magnitude and the veneration in which it is held, next to that of Travancore. The other chief buildings are the octagon, the catechery police-office, custom-house, tobacco depot, choultry and a church recently erected by the Syrian Christians to supply the place of one burned down. Tiruwalla had once a considerable trade, but has gradually declined since Champamattur became the principal mart for this part of the country.

TIRUMALLA, a tn. India, presid. Madras, dist. of same name, 6 m S. Madras, on an elevated plain. It consists of a main street, about 3 m. long and 40 ft wide, and of four other streets; and contains a celebrated temple, the festivals of which, held twice a year attract large numbers of devotees. Almost all the inhabitants are Brahmans or persons employed in connection with the temple.

TIRUVADANARI, a vil. India, presid Madras, dist. and 60 m. S.E. Madras. It consists of houses which are tolerably well built, and has a weekly market, but derives its chief claim to notice from its great Hindu temple.

TISCHNOWITZ [add.], a to Austria empire, Moravia, circle and 11 m. N.W. Bratsova, on the Schvurna. It contains in its suburb of Vorklester a beautiful church in the Baroque form, and has a castle, manufactory of linen and lappets, a paper-mill, and dyeworks. Amethysts and fine rock-crystals are found in the vicinity. Pop. including Vorklester 4087.

TISHTIT a to Western Africa, situated at one extremity of the Moorish district of El Kolia, of which it is the principal place, and near the S. foot of the range of rocky hills called El Kolia. Dates of various quality are its only produce, but it has extensive communication with other districts, deriving supplies from Nyamien, and disposing of them in its market to dealers from Wadua and other places. In its vicinity an inferior kind of salt is obtained. Pop. estimated at 3000.

TISZOLAC, a to Austria empire, Hungary, co. Gömör, 43 m. N.E. Schemnitz, with manufactory of cloth, iron-ware, a paper-mill, a mineral spring and a trade in cattle and cheese. It is the site of a castle built by Matthew Corvins. Pop. 3134, mostly Lutherans.

TITALIYA a to India, presid Bengal, dist. and 65 m. N. by W. Dinapore, 1 m. Mahabudhan, in a level country about 25 m. S. from the base of the entangled range of the Humaya. It was once the seat of a British cantonment, which was abandoned on account of its insalubrity. An annual fair recently established here is said to have been extremely successful. Pop. 3500.

TYUMEN [add.], a to Russian empire, W. Siberia, gov. and 115 m. S.W. Tobolsk, cap. circle of same name, on an affluent of the Tobol. It is an ancient place, which figures in the early history of the country, is enclosed by a ditch and a wall flanked by towers, is regularly and handsomely built, extending about 2 m. from E. to W., with a proportional breadth, and contains among its principal buildings ten more churches, a monastery, a townhouse, a school for the circle, and a market hall. As the principal seat of the W. Siberian traffic, it carries on a very extensive trade. Its chief manufactures are leather, soap, and woollens. Pop. 8695.

TIXTLAN, TEXICO, or GUERREHO, a to Mexico, cap. state Guerrero, in a narrow valley 130 m. S. by W. Mexico. Erected into a capital only in 1849 when the state was first formed, it has not yet acquired much importance, and has no buildings either private or public entitled to special notice. The pop. does not exceed 3000.

TLALPUJAHUA [add.], a to Mexico, state Mechoacan 80 m. S.E. Morelia, in a beautiful mountain district at the foot of the Cerro or Campo de Gallo, and at the height of 8000 ft. above the sea. It was once a flourishing mining town, and though greatly decayed, still contains 4000 inhabitants. Its principal buildings are a beautiful parish church, several chapels, and a Franciscan monastery. It was here that the pastor Morelos first raised the standard of independence, and commenced the war of liberation.

TLEMENCI [add.], a to N. Africa, Algeria, prov. and 70 m. S.W. Oran, on a plateau which slopes gently towards the N. is watered by the Safet and Hemel, affluents of the Tafna, and rising towards the S. terminates in a mountain range. The natural strength of its position and its proximity to the frontier of Morocco, have induced the French to make it their chief military station in the W. of Algeria. It is surrounded by a wall with nine gates and occupies property of three quarters, one containing the Mechour or ancient citadel, which has recently been repaired, and contains most of the military establishment; a second in the centre, allotted chiefly to Europeans, and mostly inhabited by Europeans and Jews; and a third, forming the native town properly so called, and presenting the usual characteristic features. The streets, particularly in this quarter are narrow and tortuous, and the houses, though substantially built, are for the most part only of one story, and from the absence of sufficient openings for light and air have a dull somber appearance. At present the place cannot be said to possess any modern buildings deserving of notice, but its ancient grandeur is still attested by numerous mosques, of which thirty-two are counted, and

the remains of aqueducts, baths and extensive sanctuaries. Its manufactures consist of harnesses and other leather fabrications, cotton and muslin handkerchiefs, carpets, &c. The war is well suited, leaving those to the natives, employ themselves chiefly in agriculture, and have recently created a number of oil and flour mills. The markets, which are held twice a week, attract great numbers of the inhabitants of the surrounding districts and produce a considerable amount both of retail and wholesale trade. There is much beautiful and picturesque scenery in the vicinity. A complete forest of olive-trees extends on almost every side; and the forest, in pursuing its course through the valley, forms no fewer than six cascades, the aggregate descent of which is estimated at 300 ft. Timen is said to have been founded by the Zenites, and to have become the capital of an independent kingdom. In the days of its greatest prosperity it had 50,000 inhabitants. Subsequently the possession of it being contested by the Spaniards, the Day of Algiers, and the Emperor of Morocco its property was destroyed. Its present pop. is about 13,000, of whom rather more than 2000 are Europeans.

TLUMACZ, a to Austria empire, Galicia, circle and 12 m. E. by S. Rzeszowa, cap. dist. of same name, has a large manufactory of sugar from beet-root, and contains 4559 inhabitants.

TODOS LOS SANTOS, or BAKKALPA, a lake Chli in the E. of prov. Yaldivia, surrounded by the Ocoron and other volcanic mountains, from which its supplies of water are received. It is about 18 m. long by 6 m. broad, and has its outlet into the Gulf of Relmuvi.

TODOS SANTOS, a to Mexico, Lower California, near the S. extremity of the peninsula, 30 m. S.E. La Paz. It stands in a valley on a river of same name, and was founded by the Jesuits in the beginning of the 18th century. The buildings of the order are still by far the most important in the place, and consist of a church, a monastery and several offices, all inclosed by a high wall. The church is crowned by a dome 125 ft. high, and possesses an altar of great beauty. An annual festival here attracts great crowds of people.

TODUPULLY, or TODUVILLA, a to India, presid Madras, Travancore, cap. dist. of same name, 55 m. S.E. Cochin. It stands on the banks of the Periyar amid grand and romantic scenery and has a considerable trade, exporting cinnamon and cotton root oils, which find a ready sale on the E. side of the Ghats and importing cloth, cambrics, iron, brass, and necessaries.

TOKOD, a to Austria empire, Hungary, no. and about 6 m. S. Gram. It is a small place, with only 750 inhabitants, but has several distilleries of brandy mills, and a very valuable coal-mine. The Turks were defeated here by the Im perials in 1685.

TOLLOGO, a vil. E. Africa, in a valley of same name, 27 m. S.E. Gondokoro. The valley is extremely picturesque. An abrupt wall of grey granite rises on the E. side of it to a height of about 1000 ft. from the perpendicular wall huge blocks have fallen, throwing the base with a confused mass of granite boulders, 10 to 40 ft. in diameter, and among these natural fortresses are numerous villages, of which Tollogo is the chief. The bottom of the valley is a meadow, in which enormous fig-trees grow by the side of a sluggish and in some places stagnant brook. The valley is not more than half a mile wide, and is also walled in by mountains on the W. thus having the appearance of a vast street.

TOLTEN a river Chli which issues from Lake Vil taria, on the N. frontier of Yaldivia, flows easterly to W. across the Indian territory of Arica, and falls into the Pacific. It has never been explored, but travellers between Concepcion and Yaldivia state that at 15 m. from its mouth it has a breadth of 150 yards and sufficient depth for steam-boats. The bar at its mouth is the great obstacle to its navigation.

TOLUCA [add.], a to Mexico, 20 m. W.S.W. of the capital in a beautiful valley which is terminated by lofty volcanic mountains, partly covered with snow. It stands at the height of 8500 ft. above the sea, on the W. of the mountain of same name, which rises to its culminating point, Pico del Fraile, a height of about 15,000 ft. The town is tolerably well built in spacious paved streets, and a public square with fine porticoes, and possesses several handsome churches, but is a dull barren place, with no appearance

of activity except on festival or market days. At one period it was the capital of the province of Mexico, and attained a high degree of prosperity, possessing several important branches of industry, and carrying on a considerable trade, but with the loss of its political status a rapid decline commenced, and grass is now growing on the streets. The market is, however, much frequented and well supplied, particularly with fruits, both of the temperate and the torrid zone. Many of the inhabitants of the valley who supply the market are Aztecs and Indians of the Otomita tribe. The latter are in a very low state of civilization, and much addicted to the use of intoxicating drinks. Pop. about 10 000.

TOMASOVAC, a town in Austrian empire, German Banat Military Frontier, on the Tamas about 80 m. N by E Bel grade; with a Greek non-united parish church, and 2680 inhabitants.

TONDÍ [old], a town in India, presid Madras, on Palak Strait, dist. and 62 m. E.S.E. Madras. It consists of narrow and irregular streets and low built houses, but carries on an active trade with Colombo and other ports, exporting grain, tamarinds, long cloths, and shanks. The cloths are the produce of its own looms, and the shanks are obtained in great abundance by the sea-fishermen.

TONG-CHOO, a town in China, prov. Pecheli on an affluent of the Peiho, 13 m. E. Pekin. Its principal streets are straight, and paved with large square stones, and it carries on a very extensive trade. Among its most conspicuous buildings are granaries and salt magazines. One branch of trade of considerable importance is the transference of the fry or ova of fish in bottles to all parts of the interior.

TONGONI, a village on the E. coast of Africa, not far from the mouth of the Pangani. Though now a petty place, it occupies the site of a ruined city. Remains of houses everywhere sander the ground and old mosques, spacious and well built, with columns of neatly cut coralline blocks and elaborate arches, are still seen while an extensive cemetery, containing many tombs of rather costly erection, bears testimony both to the number and wealth of the inhabitants.

TONI, a town in Western Africa, Hausa States prov. Zegazag, 170 m. S. by W. Kano. It is a large place, surrounded by a wall, and stands in a well-cultivated and populous district. **TONK**, a town in India, Rajputana, within the territory granted to Amer Khan, a bank between, 163 m. S.W. Ajmer. It is a place of considerable size, surrounded by a wall, and defended by a mud fort, and rose in importance under Amer Khan, who fixed his residence about a mile to the S. of it, and embellished it with various public buildings. The revenue of dist. Tonk is about £20 000.

TONE, two rivers, India. —1, *South-eastern Tone* rises in the Sagar and Nerbada territory in lat. 24° N; lon. 80° 20' E, and flowing through a ravine in the Kutra range, plunges over a precipice 300 ft. in height. Thence it flows N.E. enters the valley of the Ganges and joins this river on the right, about 20 m. below Allahabad. Its whole course is about 165 m. —2, *North-eastern Tone* a large offset of the Gogra, leaves this river on the right about 10 m. above the town of Oude, flows E. past Ammargh and uniting with the Barjoe falls into the Ganges on the left, after a total course of 240 m. It is navigable up to Ammargh a distance of 120 m.

TONEB, or **SPON** a river India, which rises at the N. of the Farnetti Peaks in Garwal not far from the centre of the Jumna. It issues from a snow bed 15,794 ft. above the sea, and descends so rapidly as to be almost a continuous cascade. Its course is S.W. till it receives the Fajur, when it changes its course to E., which it continues, but very tortuously, to the junction with the Jumna, in lat. 30° 30' N., lon. 77° 55' E. Its total course is about 100 m., its descent is at the enormous rate of 100 ft. per mile.

TOO-CHEAOU, a town in China, prov. Nganhoei on the N. or left bank of the Yang-tse-kiang about 110 m. above Hankow. It stands nearly a mile from the river, and is surrounded by a white wall and defended by fortifications, both so recent that they have in all probability been erected by the rebels after the place fell into their hands. The mass of ruins and debris lying between the present wall and the river doubtless formed part of the town before run overlook it.

TOONG-LEW a town in China, on the N. frontier of Kimpsee, on the r. bank of the Yang-tse-kiang, about 23 m. S.

Ngan-king It is beautifully situated, is surrounded by a wall which, dipping and rising over the unshading ground, finally descends to a lake. This lake, which half encloses the town, is fringed with trees, and adds much to the beauty of the site. The most conspicuous objects are two pagodas overlooking the houses. The one of eight stories stands close to the shore, the other on an eminence some distance inland. Toong-lew, though it was taken by the rebels, escaped better than most of the other towns which have experienced the same disaster. Whole acres of charred ruins attest their destructive propensities; but for some cause they held it only for a short time, and departed before they had completed the work of destruction. Part of it accordingly still remains entire, and judging from the multitude who flocked to the shore to gaze at the British ships of war as they passed, must be densely peopled.

TOPAKÉ, the modern name of the ancient ruined city Pollanarua Ceylon, 55 m. N.E. Kandy. It was a place of importance at a very early period, and in the eighth century became the favourite residence of the kings of Ceylon. In 1025 it was captured and sacked by invaders from the south of India, now generally designated by the name of Malabars or Tamils. It recovered the disaster, and attained its greatest magnificence in the latter part of the twelfth century, under the renowned sovereign Prākrama Bahu I. In his time, according to the Malawansa a metrical chronicle containing a dynastic history of Ceylon from B.C. 548 to A.D. 1708, Pollanarua was about 80 m. long by 4 m. broad, surrounded by a wall, and containing within its inclosure a stupa, a palace, and numerous temples, hospitals, and schools. A second eruption of the Tamils proved still more disastrous than the first, and the native sovereigns, compelled to retire to the south, left their capital in ruins. These are still the most remarkable in Ceylon, not only from the number and dimensions, but from the superior architecture of the buildings. Among others may be mentioned the remains of Prākrama's palace, the Dulaia Malagaya, in which the sacred tooth was enshrined the Rankot and Jaya wana rama dagobas, and the Galwara, a rock-temple hollowed in the face of a granite cliff. These ruins form such enormous mounds of brickwork that when viewed from a distance they form as striking objects as the hills among which they stand.

TOPKKA, a town in U. States, Kan., on a bank Kansas River, and on the Union Pacific railway 48 m. W.S.W. Leavenworth. It is memorable as the place at which the first free-state constitution of Kansas was formed (Pp. 1885) 2400.

TOULLE a town in Austrian empire kingdom of Croatia and Slavonia, co. and 8 m. S.E. E. Wersaia, with glassworks much frequented thermal springs, which were known to the Romans, and 950 inhabitants.

TORBAÏ British America on the E. shore of Nova Scotia, is a large expanse of water, about 9 m. long from N.E. to S.W. and 4 m. across from S.E. to N.W. At its N.E. extremity a very narrow isthmus separates it from Whitehaven Harbour. On its N.W. shore are three small harbours, affording secure anchorage for small vessels, and each possessing a wooden church. At one of them, called Molasses Harbour the settlers are Austrians. At these settlements the drift boulder clay is cultivated sufficiently to afford pasture to cattle, but immediately behind barren granite hills rise to the height of 360 ft., and give the whole district a somewhat desolate aspect. Whitehaven Harbour immediately adjoining is secure, and has depth and capacity sufficient for a fleet of the largest ships, but the narrowness and indirectness of the channel and a large number of mud rocks, make access dangerous, unless by day and in clear weather.

TORCEGNO a town in Austrian empire, Tyrol circle and about 16 m. S. by N. Trento; with a remarkable parish church, and 1400 inhabitants. The vicinity is famous for its arbutus.

TORSEKKA, a town in Austrian empire, Hungary, on E. 5 m. N.E. Lantabach; with a saw mill, a brewery, a distillery and 1200 inhabitants.

TORJA, a town in Austrian empire, Transylvania, circle and 80 m. N.E. Kronstadt. It consists properly of two distinct places situated opposite to each other, and lies in its vicinity a volcanic mountain, with veins of sulphur, and sulphur and alum springs. Pop. 2180.

TICAMIN is in Austrian empire, Tyrol, circle Brienz,
r. bank Elch or Adige 20 = N. Trunt; with an institute of

TSINGANU or **TUNGGANU** [444] s/n Malacca peninsula, cap. 2000 state of 1000000, a small river, not far from the mouth in the north. It is 600 miles long, 15,000 to 20,000, of whom about 800 are Chinese residents. The state, situated between Kelantan on the N, Pahang on the E, and Perak on the W, is claimed by the Siam as one of their hereditary privileges, but at present Siam does not successfully maintain its independence. It is mostly a small jungle, and produces nothing for export, except a little gold, some black pepper and some tin. The land, which is the staple, amounts annually to about 480 tons. Pop. about 25,000.

TRINOMALEE [add], a tn India, presid. and 108 m. W. Madras, dist. S. Arcot, at the foot of a hill crowned by an old fort. It is a large and tolerably well-built place, possessed of some historical interest from the figure which it makes in the wars of the Carnatic. At present its chief attraction to the traveller is its large and beautiful pagoda, which is situated near the S. base of the hill, and has an unusual festival, which is said to be attended by nearly 50,000 persons. During the festival a large cattle fair is held.

TRIPASSOON, a tn India, presid. and 26 m. W by N Madras, dist. Chingleput. It is a decayed place, with the remains of an old stone fort, three churches, one of them R. Catholic, and two Protestant; a school, and a large Hindoo temple. It was once a station for cadets, but the only Europeans now inhabiting it are non-commissioned officers and privates who, on being pensioned, prefer remaining in India. For their use a number of cottages has been erected. There is also a bungalow for travellers.

TRIPETTY, a tn India, presid. and 70 m. W Madras, dist. N. Arcot, in a valley near the centre of a long range of hills running almost N and S. The only celebrity which it still possesses, and has possessed from early times is derived from a pagoda which is situated at the distance of about 8 m. among the hills, and appears to be more venerated than any other Hindoo temple south of the Kistna. The access to it is by a path leading up to the hill on which it stands through three gorges or portals. Hindoos only are allowed to enter and so strict a watch is kept against profanation, that neither Christian nor Mahometan has ever gained admittance. It is known, however, that the pagoda is constructed of cut granite, and in a costly style. The idol is an erect stone figure about 7 ft. high with four arms, and is meant to represent Vishnu. The offerings made to it are of every conceivable diversity, and must in the aggregate amount to a very large value. They consist among others, of lamps, and various offerings in gold, silver, jewelry, bags of rice, single cones of all sorts, rice, &c. Besides these sources of revenue there are many lands and villages held by the great officers of the temple by hereditary right. At one time the British government managed the temple, providing for its customary services out of the revenues and offerings, and pocketing the surplus. This abolition was finally abolished in 1843.

TRIVADY, a tn India, presid. and 105 m. S W Madras, dist. S. Arcot, on the Godevidam. It is a small place, possessed of historical interest in consequence of the figure which it makes in the wars between the British and the French when contending for supremacy in India. Its pagoda having been fortified stood several sieges, and was repeatedly the scene of desperate struggles.

TRIVICANY, a vil. India, presid. Madras dist. S. Arcot, on the Arrinconopam or Villanore, about 18 m. W N W Pondicherry. It now consists only of a few scattered huts but the remains in its vicinity prove that it occupies the site of a much more important place, while it has still its own claim to notice in the considerable forests found in its vicinity. They consist chiefly of large stilted trees, which are often finely varnished and coloured, and so strongly resemble coral and agate, that they are made into beads, bracelets, and other ornaments.

TROIS PISTOLES, a vil. British America Canada East, co. Temiscouate, 8 back St. Lawrence, 130 m. N E Quebec. It is a large and flourishing place, with a R. Catholic church an academy of the Fyres du Saint Viateur, several industrial establishments, and an extensive trade in lumber. Pop. about 2000.

TROITSKA-SILO, a tn. Russian empire, E Siberia, gov. Irkutsk, near the frontiers of China, 8 m. N Kiaschta. It stands among hills on a plateau about 2500 ft. above the sea, and is a place of great commercial activity, containing the custom-house and the warehouses, where all the merchandise, whether from Russia or China, must be deposited under government custody, and where the sale or barter of the different commodities is carried on.

TRONA one of a series of narrow lakes in Fennia, N. Africa, N.W. Murzuk. They are all situated along the N. side of the Wall Thargi and Wall Garbi. Oudney and Clapperton reported they were shut up by inaccessible sandhills, but, though Vogel, by actually visiting them,

proved this report to be inaccurate, he found the desert in which they are situated to be of the most terrific character—a labyrinth of hills, undulations, valleys, fountains—preventing not one square yard of level ground, formed entirely of drifting sand, in which the camels sunk up to their bellies. For carrying my tent and cooking apparatus, together with two water-pipes, in all about 250 lbs. weight, I required no less than five camels, and nevertheless performed only 5½ m. in eighteen hours! As according to native report the Troena Lakes, particularly the most easterly called Bahr-el-Dud were bottomless, and every living being that ventured in inevitably perished Vogel's attendants were horrified when they saw him jump in. His object was to ascertain the depth, which proved to be only 24 ft. at the greatest, and to average not more than 18 ft. The Bahr-el-Dud is remarkable for containing red worms, which are caught with cotton nets in which are baited up at the same time innumerable flies and other insects, with which the lake is filled. The whole is mixed with a red kind of date into a paste, which has a similar smell and taste to salt herring, and is used by the inhabitants of Fennia in the place of meat along with herring.

TROPPAU [add] a tn Austrian empire cap. duchy Rhinea, pleasantly situated r bank Oppe, near the Prussian frontiers, and on a branch communicating with the Vienna and Oderberg railway, 73 m. N E Brinn. It is well built, containing in particular two very handsome squares, and consists of an inner town surrounded by walls and of three suburbs. The principal buildings and establishments are the palace of the Prince of Liechtenstein, the high-church an ancient structure of basalt with two modern towers one of them unfinished a beautiful church which belonged to the Jesuits a Minorite convent with a fine church a seminary an upper gymnasium, with a museum and a library of 20 000 volumes, a high-school and other educational institutions an old and spacious town house a state-house, an elegant tower rising conspicuously in the centre of the town, a handsome garden, a theatre, three hospitals and infirmaries, an institute for the poor an asylum for orphan children a beautiful garden called the Klost, and a large public park. The manufactures consist chiefly of woollen and linen cloth best-rod sugar beer liquors, paper and brick and tile works. The trade, particularly in woollen and linen goods, is extensive and there are several large wool cattle and other yearly markets. A congress of sovereigns was held here in 1820. Pop. 15,861.

TRUMAU, a vil. Austrian empire, Lower Austria, on the Trausung, with 1700 inhabitants, and a large cotton mill.

TRISKAWIEC a tn Austrian empire, Galicia, circle and about 20 m. S E Sambor. It has mineral springs, of which the principal ingredients are sulphur and naphtha. There are several springs of rock oil in the vicinity. Pop. 900.

TSAE-SHIH KE, a tn China on the Yang tee kang, near the frontiers of Kienpoo and Nganhoo between Nankin and Taining. It stands on a low eminence in a recess formed by hills, and is surrounded by a wall, and defended by some circular stone redoubts. When War of Eight passed up the river it was in the hands of the insurgents, who totally unprovoked, and as if by way of bravado, first fired off a number of gongs at the British vessels, but from such a distance that no harm could be done, and then shot a ball from one of their brass guns. The result of the gongs was treated with contempt but the firing of the ball provoked a retaliation during which a Moorish shell dropped into the centre of the fort, and sent the whole erection into the air.

TSCHERKOWITZ, a tn Austrian empire, Moravia, circle and about 15 m. S W Hradisch with an ancient castle, and 8668 inhabitants.

TSCHERNEMBL, a tn Austrian empire, duchy Carinthia, on a height above a small stream which joins the Kulpa, an affluent of the Save, 47 m. S E Laybach. It has a castle, some trade in wine and fruit, and 1300 inhabitants.

TSCHERNOWITZ a tn Austrian empire, Bobolnia, circle and 9 m. E R.E. Tabory with a deanery church, a castle, a townhouse a brewery and five mills. Pop. 1700.

TSCHUPRIA or **TSCHUPRA** a tn Turkey in Europe, Servia, cap. circle of same name, at the confluence of the Raramitza with the Morava, 71 m. S.E. Belgrade. It is the seat of a civil and criminal court and has a new church a school, and important yearly markets. Pop. 2000.

THE-KEE, a tn. China, prov. Chekiang, near one of the mouths of the river and 16 m. E.W. of the town of Wuyang. It is partly isolated by a canal or moat, and surrounded by walls, which have a circuit of about 9 m. The space within being only partially built upon, contains a number of gardens, and even cultivated fields. It is a very ancient place, beautifully situated on a flat plain surrounded by hills, which rise above it with heights varying from 800 to 1000 ft., and are in many instances crowned with temples, which, viewed from below have a most imposing appearance. The streets are narrow, and the shops generally have a queer appearance, but the market is remarkably well supplied with vegetables, fruit, fish, pork, &c. Many of the wealthiest inhabitants of this part of China reside in The-kee. Their houses, however, though the best in the place, make no appearance externally in consequence of the custom of surrounding them with high walls, so that they are not visible from the street. Outside the walls, beyond the N gate, there is a pretty lake, crossed by a causeway with arches and alleys, and leading to a range of temples at the base of the hills. 'A side view of this causeway,' says Mr. Fortune 'with its round-arched bridge and above, the smooth water of the lake, the rich vegetation of its banks, and the temples at the foot of the hills, would form a lovely picture worthy of the pencil of our first European artists—a more fairy like spot it would be most difficult to find.

TRHBNRETZ, a tn. Turkey in Europe, l. bank Danube, on the W. frontier of Wallachia, esp. circs. Mahomedan, 43 m. N.W. Widin. It is the seat of a court of primary jurisdiction, has a church and a normal school, and was once a place of importance, though now reduced to one long winding street. Pop. 1173.

TRIEN TANG a river China formed by two branches at the town of Yen-chow in prov. Chekiang, flows circumlocutively first N past the town of Hang-chow-fo, then E.N.E. and falls into a broad estuary of same name called also Hang-chow Bay, after a course of about 120 m. below Yen-chow. Of the two branches by which it is formed, the more southerly has its sources among the Boba Mountains on the N. foot of Fokien and among some hills N.W. of the town of Chang-shen, where the three provinces of Chekiang, Kueang, and Nanking meet. The other branch rises in the N.W. of the province of Szechuen, and is called the Hsueh-shan. Both branches are navigable by country flat-bottomed boats for about 150 m. above Yen-chow. There is a bore in the Trien tang so remarkable that, according to a Chinese proverb it is one of the three wonders of the world. Dr. Hengowen, medical missionary at Ningpo, who witnessed it at Hang-chow-fo, thus describes it. Loud shouting from the fleet announced the appearance of the flood, which seemed like a glutinous white cable stretched across the river at its mouth as far down as the eye could reach. Its noise, compared by Chinese poets to that of thunder, quickly drowned that of the boats, and as it advanced with prodigious velocity—at the rate, I should judge, of 25 m. an hour—it seemed the appearance of an almighty wall, or rather of a column four or five miles across and about 30 ft. high, moving bodily onward. It seemed as if the boats, which, in anticipation of its approach had moved out into the centre of the stream, would inevitably be swamped, but by keeping their bows toward the wave they all floated, as it were, to the summit with perfect safety.

TRUENKA [add] an isl. in the Strait of Corea, between Japan and the Corea, is about 95 m. long from N. to S., and from 5 to 10 m. broad. A singular two-pointed peak rises from the centre to a height of 1760 ft., and another mountain to the southward has an elevation of about 3500 ft. the highest in the island. The S. part of the island consists of two broad valleys, divided by a low covered with timber, and partially inhabited and cultivated; the higher lands are covered with virgin forest. The S. shore is sparsely inhabited, and presents an abrupt and rocky coast line. On the western side a deep sound almost bisects the island, the northern and larger division being connected with the southern by a low sandy spit, dry at low water. About the sound a network of deep channels, dividing the billy country in all directions, forms a labyrinth of waters, the country, instead of being wild and rugged, is soft and rounded, massive foliage everywhere dropping into the water. The shores are so steep, so

that large ships might be moored in safety to the base of the basin. A few fishermen's huts line the margin of the bay, and there; but for the most part the hills are clothed with forests of evergreen oak, persimmon, maple, cypress, and cotton of every variety. The island possesses wild deer, and phenomena of special interest in Japan. A road connects Truena Sound with Tatum, the capital, about 9 m. distant. The prince, who is absolute proprietor and independent chief, maintains a garrison of 300 men at Truena, a town in the Corea, with which he enjoys a monopoly of the trade, consisting of tiger skins, hides, rice, silver, and gold. Pop. of Truena about 80,000.

TUCUMAN, a tn. La Plata, esp. prov. of same name beautifully situated 3490 ft. above the sea, on a plain covered with orange-trees and gardens at the foot of a lofty mountain range; lat. 26° 51' S., lon. 64° W. It is built with great regularity in somewhat narrow streets and contains a number of houses of a more elegant appearance than is usual in a provincial town. Most of the better description are of two stories, and open from the interior into spacious patios or courts. The principal public buildings are the high-church, which has two lofty towers flanking the place and a lofty dome, and the theatre near several other churches and chapels, a Franciscan and a Dominican monastery, a newly erected cabildo, with a circular front and a tower terminating in a spire; the college of San Miguel, the Casa de Jesus, a kind of retreat for penitents, and another religious building which bears the name of the Pantheon. The chief industrial establishments are tanneries and leather factories, sugar-wrks, and brassy distilleries. The manufacture of saddle covers, known by the name of pellones, woven and finished entirely by women, is famous. Tucuman early took an important part in the war with Spain, and was selected as the place of meeting for the congress which on the 9th July 1816, passed the declaration of independence. Pop. about 9000.

TULA, a tn. Mexico, state and 40 m. N.W. Mexico, esp. dist. and on the l. bank of a river of same name, at the height of 8500 ft. above the sea. It stands at the N. outlet of the valley of Mexico, is regularly built in broad streets, and has a large market-place, surrounded partly by substantial buildings and partly by others of very indifferent appearance, a church, founded at the period of the Spanish conquest, and a Franciscan monastery. The place is surrounded by a regular fortification. Tula occupies the site of the ancient Toltec capital of the Toltecs.

TULANCINGO a tn. Mexican Confederation, state and 85 m. N.E. Mexico at the height of 2800 ft. above the sea. It stands in a beautiful district, has a handsome parish church and a monastery, and contains 5000 inhabitants, chiefly engaged in agriculture and rearing cattle.

TULCAN a tn. S. America, Ecuador on the E. frontier of Granada, 90 m. N.E. Quito. It is the capital of a canton of same name and contains some good houses. In its vicinity are several thermal springs. Its height above the sea exceeds 9000 ft.

FUMBA a tn. S.W. Africa, Kaimbunda country, territory Bihé, seated on a hill which rises in the midst of the Baikal Bush Steppes, and is surrounded by mesquite-trees, a species of platanes. It contains about 800 inhabitants, occupied by fugitives from the neighbouring lands who have adopted it as their residence. Though the place has no external defence it proves a secure asylum in consequence of some superstitious feeling on the part of the natives, who regard it as a sanctuary which must not be violated. The inhabitants, nominally subject to Bihé, live by agriculture, trade, and hunting; to strangers they are friendly and hospitable.

TUMEN KIANG, or TUMEN HING, a river, Asia, which separates Corea from Manchuria, and is, by treaty concluded on 14th November 1860, the N.E. boundary between the Russian and the Chinese empire, has its mouth in the Sea of Japan, in lat. 42° 19' N. It is said to have a course of 180 m., but has only been properly examined for the first 10 m. In this part of its course its l. bank is hilly and terminates in steep sandy slopes, while its r. bank presents extensive flats covered with brackish lakes or meadows. A long sand-spit extending from the l. bank across the entrance and forms a bar, and the channel is so winding and unsheltered with shoals that navigation is extremely difficult from the first, and soon becomes altogether impracticable.

TUNDA, s. n. W. Africa, Kibunda country territory, 40 m. E. N. E. of the summit of a conical hill, is the residence of a chief who claims to be independent and contains 3000 inhabitants, who are as industrious cultivators as their predatory tactics and habits allow them to be.

TUNDA-GROW or **TUNDA-GUO**, a walled in China, prov. Pekin, 1. bank Peiho 13 m. E. Pekin. It is a large place, comprising the old and new cities one thick wall, 85 ft. in height, encircling the whole. A narrow stream from the Peiho runs through it, the houses are small, dirty and squallid and the temples second-rate. On the north wall is a lofty minaret of twelve stories, 150 ft. high, constituting the chief object of interest in the place.

TUNKA, a tn. Russian empire, Siberia, gov. and 190 m. W. S. W. Irkutsk on a stream of same name, at its confluence with the Irkut, near the Chinese frontier. It consists of 800 houses, which lying scattered and isolated, cover a large extent of ground. It was once defended by a fort inclosed by strong palisades, and mounting cannon at the four angles of its square, but the fort has been dismantled and the old wooden church which stood over its centre is now in open ground. The inhabitants are partly Cosacks but the majority being Mongols, the Mongolian element so far prevails that even the Cosacks and even use the language, dress, and manners of Mongolia. The chief wealth of the place is in its cattle. Corn is cultivated but does not always ripen.

TUNNIUM a fort, India, presid. Madras, Pondicherry, County 10 m. S. Poodoocottah. It was built nearly a century and a half ago, and is still a place of some strength, consisting mainly of a fortified rock, moated by an outer ditch and a wall of a circular form flanked with 21 bastions. The wall at its S. E. side is washed by a large lake and immediately beneath the rock there is a pagoda. Gunpowder is manufactured here for the Pondicherry market.

TURCHAL, a tn. Turkey in Asia, prov. Ruvas, between and nearly equidistant from Amasia and Tokat. It was once defended by a castle, finely seated on a commanding height but now in ruins; and consists of about 200 houses in tolerable condition. Apparently it has at one time been much more extensive, but the inhabitants seem prosperous and besides weaving linen for which flax is extensively grown in the vicinity take advantage of the great thoroughfare passing the town to carry on a considerable general trade.

TURGOVKA, a tn. Austrian empire, Hungary, on, and about 50 m. N. E. Trenchin, in the neighbourhood of extensive pine forests, with 5906 inhabitants, who are chiefly employed in felling and sawing timber.

TUNK a group of islands, West Indies the most easterly of the Bahamas. It consists of nine islets, situated on a narrow bank, and extending about 25 m. from N. E. to S. E. W. They are all composed of sand and sandstone, clothed with stunted bushes and a peculiar species of cactus, which, somewhat resembling a Turkish cap has probably given them their name. The largest of the group, and the only one inhabited are Grand Turk Island which is about 5½ m. long by 1 m. broad, and is much resorted to for the salt made in an extensive pond in front of a small town of

same name lying on its W. shore; and Salt Cay, which is almost triangular in form, and has a small town, which is situated near its N. W. extremity, and possesses a valuable midsound. The islands have no fresh water except what is collected in tanks during rain, and are so barren that the inhabitants derive all their supplies from without—from America, Hayti, and the Galles group.

TURBINTZ, a tn. Austrian empire, Lower Austria, circle Upper Wienerwald near the source of the Traisen, 44 m. S. W. Vienna. Has manufactures of sayings, a quarry of beautiful marble, several saw mills, a considerable trade in gypsum, which abounds in the vicinity; and contains 2370 inhabitants.

TURNOVA a tn. Turkey in Europe, eyalet and 60 m. S. S. W. Selimki. It was once a place of importance, but now contains only 4500 inhabitants who are chiefly employed in weaving cotton and silk and in dyeing yarn.

TUSIJA (anc. Dume), a tn. Turkey in Asia, Anatolia on an affluent of the Halys in a fertile and well-cultivated valley 95 m. S. S. W. Sinope. It consists of about 3000 houses, and has manufactures of shawls from goats hair.

TUSNAD a tn. Austrian empire Transylvania, circle and about 23 m. S. E. Udvarhelyi, with mineral springs in a narrow pass of the Altit and 1550 inhabitants.

TUPACORIN or **TEYCONY**, a tn. India, presid. Madras, dist and 30 m. E. N. E. Tinnevely on the Gulf of Mander. It was built by the Dutch who had a factory here at the time when the island of Ceylon was in their possession. The native merchants still carry on a coasting trade, and European agents make considerable shipments of the cotton grown in the province. The shank fishery here is annually let out by government and the produce is sent chiefly to Calcutta. There was also a pearl-fishery so ancient that it is distinctly mentioned by Marco Polo. The pearls had a bluish or greenish tint which diminished their value, but still a considerable sum was realized. This fishery no longer exists the improvement of the Pamphun Pass having created currents fatal to the pearl banks.

TUTUTEPEC, a tn. Mexico state and 87 m. S. S. W. Oajaca. It stands on a height, has a number of handsome houses, and contains about 1000 inhabitants, who are chiefly employed in fishing and selling fish to be sent into the interior.

TWONICZ, a tn. Austrian empire Galicia, circle and W. Sankt, with 1850 inhabitants, the descendants of Swedish prisoners.

TYCZYN a tn. Austrian empire, circle and 7 m. S. S. E. Sandomir cep dist. of same name, with an elegant castle, and 1400 inhabitants.

TYNIEC a tn. Austrian empire, Galicia circle Wadowice, on the Vistula, 5 m. S. W. Cracow with a Benedictine abbey which, founded by Boleslawa the Valorous in 1015, and suppressed in 1815, is now the summer residence of the Bishop of Tarnow. Pop. 1050.

TZIA-TZONTIN, a tn. Mexico state Michoacan on the N. end of the lake and about 50 m. W. S. W. of the town of Morelia. It was once the capital of the native kings of Michoacan but is now only an Indian village with about 2000 inhabitants.

U

UALAN, or **Ualan** an id. of the N. Pacific the most easterly of the Caroline group; lat. 5° 19' N. lon. 168° 6' E. It is about 30 m. in extent, and attains an elevation of about 2000 ft., is well-wooded and fertile and is inhabited by a race among whom civilization has made good progress. Most of them speak good English and make a profession of Christianity, but their numbers seem to be rapidly declining as they have been committed to 1500 and now fall short of 1000. Their chief employment is fishing. They are governed by a chief or king, who resides in Lela. The harbour is well-sheltered, and frequently visited by foreign vessels.

URA a tn. W. Africa, on the N. frontiers of Adamawa or Fumbina, 165 m. S. by W. Kukurwa. It consists of two quarters, an east and a west. The former is inclosed by a double stone-fence and a low earthen wall, but consists only of a few huts scattered over a wide space, and presenting a cheerless appearance; the latter is more densely and substantially occupied; each cluster of huts is surrounded with a little corral, carefully fenced. The only buildings deserving of notice are the governor's house, on one side of a small square, and the mosque in the form of a spacious quadrangle. **URWARI**, by far the largest id. of Lake Tanganyika in

ains of Urandi, E. Ujiji, S. the Ukuranga country and W. Lake Tanganyika. A large number of families and a small hill, evidenced by the loss of the forest-trees and the numerous ruins, render it the most productive district in this part of the continent. The principal crops are holms, the Indian *bagel* (*Eleusine corollaria*), maize, ground nuts, beans, and hard crops. The weather is rather hot, though the latter was at one time grown by the Arabs on the shores of the lake, and is said to have attained the height of 8 or 9 ft. The depositions of the monkey, the elephant, and the hippopotamus were among the main causes of abandoning its cultivation. Sugar-cane, tobacco and cotton are always to be purchased. The principal fruits are the plantain and the Guinea-palm; the principal vegetables, the manioc, the egg plant, the sweet-potato, the yam, the cucumber and an edible white fungus growing subterraneously. The inhabitants, or 'Wajiji', are a dusky race, with dark skins, plain features, and straight strong limbs. Their feet and hands are large and flat, their voices hoarse, and their manners independent even to insolence. They are extremely tattooed. Their arms are small battle-axes, daggers, spears and bows and arrows. Before Burton visited the country Ujiji was generally spoken of as a city. It is now needless to say that it has no hills to the name. At best it is but a collection of villages, composed for the most part of mere hovels. The only thing which remains one of a town is the bazar, which however, is only a relic of Arab civilization and though much frequented and well-supplied is little more than a raised plot of ground, where, between 10 A.M. and 8 P.M. a mass of standing and squatting negroes buy and sell butter and exchange, with a hubbub heard for miles. The direct distance of Ujiji from the E coast is 590 m., and the indirect, allowing for the sinuosities of the route 905 m. The Arab caravans owing to various causes of detention usually take six months to reach it. Burton and his party accomplished the distance in 100 days travelling at the average rate of 4½ hours per day and 227 m. per hour.

UKARANGA, a dist. Central Africa, extending eastward from the Unguwa, an affluent of the Malagasy, to the E. shores of Lake Tanganyika. On the S it is bounded by the territory of Uthungwa, and on the N by the Ruhe, a feeder of Tanganyika. The villages, scattered in clumps over the plain are wretched places, with a few cultivated fields in the drier parts of the savanna. The so-called port of Ukuranga, on the E shore of the lake, is an open roadstead where even a single canoe is seldom seen. This roadstead is separated from Ujiji by the mouth of the Ruhe in a deep hollow bay from 5 to 6 miles across. It swarms with crocodiles and hippopotamuses which are said to be singularly bold and fierce. The voyage across from Ukuranga port to Ujiji or Karawa is performed in three hours, and is rendered attractive by the picturesque forms and gorgeous tints of the mountains around the lake.

UKERWE, an island in the S.E. of Victoria Nyanza, East Africa, about lat. 2° S. lon. 33° E. It is of a triangular shape, with a surface which, though diversified in some parts, is generally flat. So little however is ascertained that it remains a question whether Ukerwe and the adjacent Malila are really two islands, and not rather a single peninsula of the mainland. The ground of the latter opinion is the Arab allegation that they are connected with each other and with the eastern shore by a low neck of land which is dry in the hot season and even during the rains is never so deeply flooded that cattle cannot ford it. Be this as it may a fact of greater consequence is, that Ukerwe is exceedingly populous and carries on a considerable trade in ivory which is collected in the country toward the E., and stored up against the arrival of a caravan, when it is disposed of chiefly for beads.

ULANOW, a town in Austrian empire, Galicia, circle and 30 m. N.E. Rzeszów, cap. dist. of same name at the confluence of the Turaw with the San. It is the central entrepot of the Galician trade in wood and corn, and contains 2807 inhabitants.

ULASZKOWICE, a town in Austrian empire, Galicia, circle and 30 m. W. Czortkow, with a Basilian monastery, a large yearly market, and 2135 inhabitants.

ULICZ, a town in Austrian empire, Galicia, circle and 9 m. N.E. Smolna, with a Basilian monastery, a large yearly market, and 2600 inhabitants.

See also GAL.—Vol. II

UMAGO, a town in Austrian empire, circle Istria, on the Adriatic, 19 m. S.W. Trieste. It has a charitable endowment and a harbour at which some trade is carried on. Pop. 1900.

UMANDA, a prov. East Africa, territory Unyamwezi, situated N. of Unyamwezi and S. of Victoria Nyanza. It forms a long oval with a length of 80 m. and a breadth of about 2 marabes, and consists chiefly of a well-cultivated and populous valley. The inhabitants are a turbulent and quarrelsome race, combining the unsettled and predatory habits of the pastoral, with the dishonesty and greed of gain characteristic of the half-agricultural tribes. They are, however, disposed to trade, and occasionally send caravans to the E. coast.

UMBALLA, a town in India, British, cap. dist. of same name, in a level and well cultivated country near the Guggur, 122 m. N. by W. Agra. It is a large place surrounded by walls and defended by a fort, and consists of brick houses ranged in streets so narrow that an elephant can scarcely pass along them. Immediately beneath the walls of the fort is the surrounding ground of the British troops. The dist. of which Umballa is the capital has an area of 998 sq. m., and a pop. of 67,134. The area, however, is said to be that only of the government lands, the area under police control is 2176 sq. m.

UM EL-JEMAL, an ancient city, Asiatic Turkey in the Hauran about 75 m. S. Damascus. Standing alone in the desert, it has scarcely suffered from the ravages either of men or of time, and is still so perfect in all its parts, that in walking through it it is scarcely possible to believe that it is so totally uninhabited. It is surrounded by a high wall, enclosing a rectangular area equal in dimensions to modern Jerusalem. Many of the streets are paved and in different parts are seen open spaces resembling our modern squares. The houses contain usually three rooms on the ground floor and two on the first story and some of the public buildings are very large. Um-el-Jemal is conjectured to have been the Both Gamul of Scripture. There can be no doubt of its having been a place of great importance, both long before and during the Roman dominion, and yet its history is a perfect blank.

UMROHAI, a town in India, N.W. Provinces, dist. and 20 m. N.W. Moradabad. It stands in an open country surrounded by large plantations of sugar and cotton, but, though it contains 72,677 inhabitants so little seems to be known of it, that it is only described by one writer as having a neat mosque and an extensive garden, and by another as abundantly supplied with provisions and water.

UNGAVA, a bay, British America, an indentation of Hudson's Strait, N. of Labrador, between Cape Clydeigh (lat. 60° 14' N. lon. 69° 55' W.) on the N.E. and Cape Hope a distance (lat. 61° 17' N. lon. 70° 30' W.) on the W. Its shores have an extent of 400 m. and it is generally free from ice except near the entrance, where the large island of Akpatok occupies the central and western part. The navigation of the bay is rendered peculiarly difficult by the great violence of the currents which run in many places with great velocity, and are increased by the strength of a tide which rises to a perpendicular. These currents are supposed to be attributable to the strong current which sets out of Davis Strait along the coast of Labrador, and rushes round Resolution Island into Ungava Bay from which it has no outlet, and consequently causes the prodigious rise of tide, and the numerous eddies and currents that are met with all over the bay. To the same cause are attributable the immense quantities of ice which encumber the bay till late in the summer it being late in August before the bay is safely navigable, and by the end of September it is again dangerous, owing to the fury of the wind blowing constantly from the N. at this season. The rivers falling into Ungava Bay are the Koksoak or South River, George's River, Whine River and a few others the South River, entering the bottom of the bay from the south, being the largest. Rocks and barren rocks are the distinguishing features of the coast with a few stunted trees at the mouths of the rivers. The general appearance of the country at the bottom of the bay is hilly rather than mountainous, but rough and rugged.

UNITED STATES [add.] The long existing contention between the two great sections of the U. States, the southern slave states on the one hand, and the northern free

states on the other for seceding in the national government, reached its climax when, in 1860-1 the North carried the election of president after a hot contest. The question of slavery was the great cause of difference, and when the vote came into the hands of the people pledged to bring about the abolition of slavery the southern states at once, and almost unanimously, determined on secession from the union, alleging the constitutional right of every state to secede if it thought proper. South Carolina took the lead, and was rapidly followed by Mississippi, Alabama, Florida, Georgia, Louisiana, and Texas the whole, with the subsequently seceding states forming themselves into a southern confederation with Mr Jefferson Davis and Mr Alexander M. Stephens for president and vice-president. The custom-house, arsenals, and U States buildings generally, were seized and occupied by Confederate officers and every preparation made to organize a separate government. Defections of officers and men, naval and military and of other public servants of the nation, took place far and wide, and a very large volunteer army was speedily in readiness to maintain the independence of the seceded states. At the time of the outbreak the U States army consisted of only 14 000 regular troops, scattered over the country in all directions; and the navy numbered only 5000 seamen, in all parts of the world. The troops in garrisons in the Confederate states either surrendered or joined the Confederate cause. The garrison, however, at Charleston, in South Carolina, was an exception, for, taking possession of Fort Sumter under Major Anderson, this small body of troops determined to make a stand. Here the first blow was struck on April 12 1861 the Confederates proceeded to bombard the fort, which after thirty-two hours resistance, was forced to surrender, without a life being lost on either side. This episode aroused the North to active measures. The president, Mr Abraham Lincoln, called out by proclamation 75,000 volunteers, who were organized into an army with great rapidity. This measure precipitated the secession of Virginia, Arkansas, North Carolina, and Tennessee, states which up to this period had hesitated to openly join the first seceders. Maryland was held back by force in Missouri the people were divided, and Kentucky proclaimed itself to be neutral. Hostilities commenced in Virginia, the Federal General Butler being defeated at Big Bethel in the east, and M'Callan being successful in the west. But the first serious on a large scale took place at Ball Run, about 25 m E. of Washington, between the newly raised Federal army of 50,000 men under General A. Howard, and the Confederate army of 30,000 men under General Beauregard. During the action a panic seized the Federal troops, and a most disorderly retreat at once commenced, the men throwing away their arms and accoutrements, and hurrying back terror-stricken to the capital. General Beauregard did not follow up his advantage and the president of the Northern states immediately prepared to recover the disaster and took far larger measures, by calling out two levees successively of 500,000 each. During the remainder of 1861 frequent collisions took place between the rival forces at different points almost always to the disadvantage of the North, much so that at the close of the year the Federals had possession of very few places in the seceded territory. In the following spring of 1862 however besides the capture of Fort Mendenhall on the Cumberland river by General Grant, the same commander obtained a signal victory over the Confederates at Pittsburg Landing in Tennessee. The naval operations comprised the capture of Memphis Island and of Forts Pulaski and Macon, and engagements on March 9th and 10th in Hampton Roads, in the James River in which the *Merrimack*, an iron-clad steam ram, made great havoc of the Federal fleet, but, on attempting to renew her attack the next day was encountered by the *Monitor*, a Federal iron-clad turret ship, and obliged to return. On April 24 the Federal fleet under Admiral Farragut, having passed the forts at the entrance of the Mississippi below New Orleans, that city was evacuated by the Confederates, after burning vast quantities of cotton and other property and formally surrendering to the Northern forces. An attempt was then made by General M'Callan to invest Richmond, the capital of the Confederacy from the peninsula between the York and James rivers the Federal lines were established along the Chickahominy within sight of the capital. But after a determined onset by the Confederates, under Generals

Lee and Stonewall Jackson, reinforced for several days the Northern army was driven back to the James River and the shelter of the gunboats. The Southern forces under General Jackson then turned northward and repulsed with great energy and success a Federal army under General Pope, which was pushing on with some 60,000 men, without base of operations. General Lee then assumed the offensive and directed Washington, necessitating the recall of M'Callan from the James River for the defence of the Northern capital. After a successful engagement with the advanced guard of the Confederates at South Mountain, and a second and obstinate fight on the banks of the Antietam, which however was attended with no decisive result, the Federals had the satisfaction of seeing the Confederates retrace the Potomac. In the meantime the Federal General Rosecrans obtained advantage in the north of Mississippi, and elsewhere the Northern forces had success. After a pause M'Callan was superseded by Burnside, and in December another advance to Richmond was commenced, this General Lee had anticipated, and intrenched himself behind the town of Fredericksburg, south of the Rappahannock. The Federals attacked this position with immense energy but could make no impression upon it; and at last, baffled and demoralized, they were forced to recross the Rappahannock, to the great consternation of the North. The year 1863 thus closed with no material progress made on either side, but with heavy losses and disasters to both combatants in turn. The first days of 1863 were signalized by a struggle prolonged over three days at Murfreesboro, in Tennessee at the close of which the Confederates fell back defeated. At the end of April, General Hooker superseding Burnside in the command of the army of the Potomac commenced another movement towards the Confederate capital, and crossing the Rappahannock, some distance above Fredericksburg, thought to turn the left of Lee's army. Lee, however, despatched Stonewall Jackson to intercept this movement, and so suddenly and impetuously was this effected on two successive days, near Chancellorsville that Hooker with difficulty saved his army from total defeat. This done, Lee turned back and drove a Federal force out of the position at Fredericksburg, which he had just left and they had occupied. The success at Chancellorsville was attended with irreparable loss to the Confederates in Stonewall Jackson who was mortally wounded by a chance shot from his own division. Finally the Federal General Lee transferred his army to the valley of the Shenandoah, entered Maryland and crossed into Pennsylvania, but at Gettysburg he was obliged to turn upon the Federals under Meade, their new commander who were following him. On the first three days of July prolonged and desperate encounters took place between the two armies on the third the Confederates, with whom the balance of advantage thus far rested prepared for a grand and desperate attack upon the high ground on which the Federals were posted, but Meade bringing up his reserves, the almost superhuman efforts of the Southern army were of no avail, and the battle ended in favour of the North. Lee slowly retreated into Virginia, having lost nearly 15 000 men of the flower of his army in a week's fighting. On the Mississippi the fortune of war was also in favour of the Federals. Vicksburg and Port Hudson were the strongholds of the Confederacy in this direction. Against the former General Grant commenced operations in the beginning of 1863, but was unsuccessful until Admiral Farragut with his fleet dashed past the batteries of Port Hudson, as he had done at New Orleans, captured Vicksburg, drove away the Southern fleet, and effected a junction with Admiral Porter below Vicksburg. Grant resolutely resumed the offensive, and after failing to carry the place by storm, at last, in conjunction with the fleet, reduced it by regular siege to a surrender on July 4. Soon after the whole length of the Mississippi was in the hands of the Federals. In the spring a Federal iron-clad fleet bombarded Charleston and was signally repulsed. In July a bombardment of Fort Sumter and the other forts was commenced by a land force, but an attempt to capture Sumter which had been betrayed to them, by assault was unsuccessful. In September the Federals were beaten on the banks of the Chickahominy, and were hastening back in total rout to Chancellorsburg in Tennessee, where they were beset by the Confederates posted on Lookout Mountain and Missionary Ridge. Grant replaced Rosecrans,

and having received these reinforcements prepared for a grand sortie on November 25. On that day a vast army issued from the beleaguered town, drove the Confederates from Lookout Mountain into the valley behind one division with some difficulty also defeating the Confederates from Missionary Ridge. The Southern army fled wildly from the field of battle, and left the Federal masters of the situation in this quarter.

In the early months of 1864 numerous engagements took place in various directions, resulting for the most part in Confederate success, but having little influence upon the issue of the conflict. The chief interest now centred in the army of the Potomac, over which Grant was appointed commander-in-chief and which he at once set himself to reorganize. In May he moved his main force across the Rapidan against Lee who awaited him on the R. bank. A co-operating column advanced down the Shenandoah, while Butler with a large force moved up the James River towards Richmond. On May 6th the fighting began at the Wilderness, and lasted throughout the 6th, 7th, 9th, 10th, and 11th, Grant displaying marvellous tenacity and fertility of resources, and Lee exhibiting surpassing skill in baffling every attempt of his antagonist. Unable to reach the Confederates, Grant and Lee fought a flank movement to cut them off from Richmond but Lee anticipated the attempt and foiled it. This was repeated again and again till reaching the Chickahominy Grant dashed upon the Confederates line, but so deadly was the Southern fire, that it not minutes the assailants were totally repulsed. This baffled Grant, by a circuit crossed the James River, joined Butler and attacked Petersburg but was repulsed, and obliged to begin a regular siege. Thus relieved from immediate attack Lee despatched Ewell against the Shenandoah army, which he defeated, marched up to the very walls of Washington and leisurely retired with enormous booty. Meantime Sherman with a large Federal force in Georgia after much successful fighting and excellent strategy reached Atlanta and forced the Confederates to evacuate it. Atlanta, however, was not evacuated, and the Federal forces at the entrance of Mobile Bay, and with wooden vessels compelled the Iron ram Tennessee to surrender. Grant having failed in two assaults upon Petersburg and endeavoured to cut off its communications with the South, and established his own strongly on the Weldon railroad. On November 14th Sherman abandoned Atlanta, and after several weeks of public uncertainty as to his course he reappeared on December 14th before Savannah which Fort M. Alister being taken by storm, was shortly after abandoned by the Confederates. In the middle of January, 1865 Sherman advanced with the main column of his army towards Charleston, which was evacuated in the night of February 17th, and entered by the Federal the next day and on the 23rd Wilmington was captured by a combined naval and military force. In the meantime, severe fighting had taken place between Grant and the defenders of Petersburg and Richmond; till at length, after three days sanguinary combat, the Confederates lines were broken, and Richmond lay at the mercy of the Northern armies. Lee retreated north of the Appomattox, while Grant occupied Richmond and Petersburg on Monday, April 8th, and then followed in close pursuit of Lee, who four days after, seeing that further resistance was hopeless, surrendered with his army as prisoners of war. The remaining Confederate armies in the field soon after surrendered likewise, or disbanded themselves. Thus hostilities ceased and the four years war ended in the complete subjection of the Southern states to the Federal government. In the course of the war the total and unconditional abolition of slavery had been proclaimed by President Lincoln, and at the end of it every slave found himself absolutely free.

On April 14th President Lincoln was assassinated in Ford's theatre at Washington by a Southern fanatic named Booth. He was at once succeeded by Vice-president Johnson, who prepared to carry out the wise and moderate measures which Mr. Lincoln had contemplated for the pacification and revival of the exhausted country. As the states returned to their allegiance to the union, they were re-admitted to their state and national privileges, but soon party spirit in the North began to rise, and in the congressional struggles of the rival Democrats and Republicans, the liberties of the Southern states have been sorely infringed, and many of the states sub-

jected to the rule of military governors nominated by the Northern cabinet. The restoration of property to the South has thus been greatly impeded, and the condition of both negroes and whites has been one of great privation, and often almost of destitution.

The following statistics will show the present condition of the U. States, and also, where they are comparative the effects of the civil war upon the commerce and progress of the country.

The increase in the amounts of both revenue and expenditure in the years 1861-5 is thus shown —

Years ended	Revenue.	Expenditure.
1861	417,909,999	417,739,092
1862	721,178,087	116,926,864
1863	1,810,307,031	1,810,654,508
1864	2,000,000,711	2,000,000,711
1865	2,723,274,464	2,723,274,464

The public debt in the same years increased as follows —

Year	Amount of Debt.
1861	418,000,197
1862	1,071,127,080
1863	2,000,000,711
1864	2,000,000,711
1865	2,723,274,464

On May 1 1867 the amount was \$2,500,016,043.

The registered shipping of the United States in the years 1860 and 1864, distinguishing sailing and steam vessels, was of the following compass —

	Sailing.	Steam.	Total.
1860	4,434,901 tons.	80,807 tons.	4,515,708 tons.
1864	4,226,000	900,000	5,126,000

The tonnage of American and foreign vessels entered and cleared at ports in the United States in the years 1860-4 is thus stated —

Tonnage Entered.			
Year.	American.	Foreign.	Total.
1860	9,981,905	5,523,611	15,505,516
1861	9,038,917	5,523,611	14,562,528
1862	6,117,946	2,946,278	9,064,224
1863	4,314,608	2,946,278	7,260,886
1864	5,094,484	3,471,219	8,565,703

Tonnage Cleared.			
Year.	American.	Foreign.	Total.
1860	9,164,924	2,594,006	11,758,930
1861	4,859,818	2,594,006	7,453,824
1862	4,961,016	2,410,000	7,371,016
1863	4,447,301	2,061,000	6,508,301
1864	5,094,484	3,471,219	8,565,703

The British vessels entered in 1864 were 15,502 of 2,869,761 tons, and cleared 13,039 of 1,520,560 tons.

The value of the imports and exports (exclusive of gold and bullion) in the years 1860-4 was as follows —

Year.	Imports.	Exports.
1860	478,000,000	400,400,011
1861	50,000,000	78,000,000
1862	19,400,000	60,000,000
1863	10,000,000	10,000,000
1864	10,000,000	10,000,000

The imports for the first three months of 1867 are given as \$19,740,512 and the exports \$22,929,886.

The amount of bullion and specie imported in 1864 was \$2,740,773 and of that exported \$31,901,197.

The quantity of cotton exported from the United States, as well as the prices of it varied exceedingly during the continuance of the civil war as the following table will show —

Year.	Quantity.	Price per lb.
1860	1,707,000,000 lbs.	10-05 cents
1861	2,011,000,000	11-07
1862	2,000,000,000	20-10
1863	17,000,000	60-00
1864	10,000,000	93-05

During the first three months of 1867, 298,000,000 lbs. of cotton, valued at \$18,797,917 were exported — (Hunt's Map)

The average, quantities, and value of the various kinds of agricultural produce raised in the United States in the year 1864 are retraced as follows —

Product	Area	Barrels	Value
Indian Corn	17,488,792	580,437,486	\$87,151,182
Wheat	12,126,080	100,656,822	\$9,410,719
Rye	1,010,085	19,578,078	\$1,015,018
Oats	6,461,789	1,590,136	189,881,847
Barley	644,817	10,710,928	16,941,928
Small-grain	1,691,786	26,664,782	\$2,664,782
Potatoes	905,285	96,822,020	\$7,184,948
Hay	16,054,664	16,118,001	\$65,707,675
Tobacco	289,008	127,689,250	\$0,000,225

The rapid increase of the population may be seen in the figures below—

Year	Total Population	Proportion of Negro
1800	3,929,285	886,071
1820	15,838,000	3,286,648
1860	31,553,000	—

The statistics of population according to the census of the States in 1860 are given in the enclosed table. Of some of the territories organized since that date, only approximate statements can be made—

TOTAL POPULATION of each STATE and TERRITORY of the UNITED STATES, distinguishing WHITE, FREE COLORED, and SLAVE, in the year 1860.
N.B.—The figures following the names of the States and Territories show the date of their constitution or first settlement.

STATES AND TERRITORIES.	WHITE			FREE COLORED	TOTAL	SLAVE			TOTAL

* Chinese and half-breeds.

† The territory of Arizona, esp. Tucson was organized in 1856 with an estimated area of 100,000 sq. m. esp. not mentioned. The territory of Idaho, with an area of 200,000 sq. m. organized in 1820. As account of territory by the foundation of the Russian territory in N. America to the United States for the sum of 7,000,000 dollars was effected in 1867.

UNKOPSKY a bay Chinese empire, in the Sea of Japan. Its entrance, formed on the E by Cape Chou, a bold promontory which is the easternmost point of the peninsula of Corea, and on the W by Crown Point, is 4 m. wide, and has a depth of 7 to 12 fathoms. At 2 m. from the shore there is good anchoring ground in 7 fathoms, with the important drawback, however, that it is open to the prevalent winds in autumn and to those of the NW in winter. The N. shore is bold and lofty, the W shore is of moderate height,

consisting chiefly of abrupt or steep sandy cliffs, which with the adjoining hills, are of sandy whiteness. The interior of the bay is so little explored that its extent has not been determined, but several large settlements are seen along the shores.

UN FA a v. island of Great Lee-Choo in the N. Pacific, about lat. 26° 30' N., lon. 147° 40' E. It is beautifully situated on a bold promontory overhanging the S. shore of Barrow's Bay and forming the entrance of a picturesque

They also prepare the skins of game very beautifully, rendering them as soft as domestic leather and make them up usually into moccasins, ornamenting their needles by sharpening the end into a fine point, and then stringing it over and hammering it into a small oval in the body of the needle, to form the eye. The apicals, at which Kamrad, the ruler, resides, stands at the junction of the Kafue with the Bomaest or Victoria Nile, in lat 1° 40' N lon. 28° 20' E. It is a large village of grass huts situated upon a barren slope.

UPATA, a *tu*. S. America, Venezuela, among the Imataca Mountains, on the watershed between the basins of the Orinoco and the Essequibo, 100 m. S.E.E. Angaitum. It stands at the height of 1150 ft. above the sea consists of about a dozen streets, formed by houses of a single story covered with tiles, and has a striking thriving appearance, caused mainly by its position on the direct line of route to the gold-washings of Carat.

UPSTART a cape and bay Australia, on the E. coast of Queensland, opposite to the Great Barrier Reef --1, Cape Upstart, so named by Captain Cook, from the remarkable steepness with which it rises from the narrow neck of swampy ground connecting it with the mainland, consists of a peninsula or a narrow island as a narrow creek intersects the isthmus, about 5 m. long from N. to S. by 4 1/2 m. broad and composed chiefly of a mass of granite scantly covered with stunted trees and scrub. In summit, somewhat table-topped is cloth by a deep gorge, and attains in Station Hill its culminating point, the height of 1800 ft. above the sea. --2 Upstart Bay lying between the mainland on the W and the above peninsula on the E. is 10 m. broad from E. to W. and 8 m. deep from N. to S. It has not been minutely surveyed, but immediately with its entrance has an average depth of 7 fathoms. About 10 m. S. from its head Mount Abbott rises to the approximately estimated height of 3460 ft. The Wickham a small barred river has its mouth on the W shore of the bay.

UR, a river Russian empire, East Siberia, which rises in a mountainous district, joins a S.E. course nearly parallel to that of the Amur and pursues the Zeya on its R. bank in lat. 54 N., lon. 125 E. It flows very tortuously at one time between steep and rocky banks as an undulating country, at others along low and swampy tracts with small lakes. The principal branch among several into which it divides, has a width of 50 yards.

URESA, a *tu*. Mexico sep. dep. Sonora, situated near its centre, in a romantic valley of the same name, inclosed by lofty mountains, lat 29° 57' N lon. 111° 12' W. It lies along the banks of the Sonora, among beautiful gardens copiously irrigated by canals but though deriving much importance from having been selected as the seat of government, it possesses little trade. Its only buildings of any note are the governor's residence and the government offices.

URFAHU, a *tu*. Austrian empire Upper Austria, L. bank Danube opposite to Linz, with which it is connected by a long bridge. It has a hospital a machine-factory a spinning-mill, and some trade in fruit and vegetables. Pop. 3600.

URIQUE, a river Mexico, which, rising in the central cordillera of the Andes, in dist. Huesamby, prov. Chihuahua, winds round the mountains, passes the town of Urique, and then flowing S.W. in a large and rapid stream joins the Fuerte on its R. bank.

URIQUE, a *tu*. Mexico, dep. and 110 m. S.W. Chihuahua, on the Urique or Fuerte, in the centre of a valley 1600 ft. above the sea. It is an old town, which before the expedition of the Spaniards was the centre of extensive mining districts rich in silver and had a pop. of about 6000, which, since the mines ceased to be productive, has dwindled down to about 900. For this decay the indolence of the inhabitants is chiefly to blame since, independently of its mines, Urique has sources of wealth which only want industry and enterprise to develop them. The soil is fertile, and being well adapted both for agriculture and pasture, might easily be made to yield heavy crops of maize, and rear great numbers of cattle.

URMENY, a *tu*. Austrian empire, Hungary, on the Lower Tisza, 45 m. E. by S. Presburg; with a fine castle with a square citadel, and 2000 inhabitants.

URTINGITZ, a *tu*. Austrian empire, Moravia, about 12 m. S.W. Olmitz; with a parish church and 1400 inhabitants.

URUGUAYANE, a *tu*. South America, Rio de Janeiro, dist. It is a small town, close to the frontier of La Plata. It is a large well-built thriving place, with about 1800 inhabitants. It lies on the E. bank of the river, which is here about a mile wide, and runs with a rapid current between rocky banks, in the small town of Restrepo, which lies to the S. of it.

URUNDI a territory East Africa, which lies N. of Ujiji and on the W. stretches for about 50 m. along the shores of Lake Tanganyika. It consists of a low strip of exceedingly fertile bordering the lake and a mountainous range which rises from it, stretches N.E. till it becomes linked with the mountains of Karagah. The Wagandi, its inhabitants, are evidently natives of a high cold country. Their complexion varies from tawny yellow to a clear dark brown, so brightened by the daily use of a mixture of coffee and palm-oil that the real tint is scarcely discernible. Their limbs are stout and well proportioned many of them stabling upwards of 8 ft. high and bearing a manly and martial appearance. The men tattoo with curies and lines like clapping-cups. Their dress is the mburu worn in the loosest way; their ornaments are beads, brass wire and strings of white-colored substance across the head and forehead. Their arms are heavy spears and unusually strong arrows. The Wagandi, or prasia, wear a curious hood, a tath of long white grass or fibre, cut away at the sides, and allowed to hang behind the shoulders their half-naked figures, occasionally resting with wooden clappers and cowering occasionally like mauls, present a savage appearance. The government is held by a single chief or naseba whose war, forming a large host easily numbered are the terror of the neighbouring tribes.

URWU, a *tu*. India, presid. Bengal, dist. Behar R. bank Son. 40 m. R.W. Patna. It stands in a well cultivated country in which grain and opium are largely produced, and possesses an indigo factory and manufactures of good paper. Pop. about 1800.

UBAGARA a territory E. Africa, bounded by Khuta on the E. and Ugo on the W. between which it extends about 50 m., its breadth from N. to S. cannot be defined. It is covered almost throughout by the mountain range of some mass, and is for the most part a beautiful and romantic region, traversed by lofty ridges which are clothed with a robust forest-trees, and separated from each other by plains of great extent and fertility. In the lower ground the soil consists of decomposed granite, granitic sand, or a coarse incipient sandstone. Higher up, where it varies in depth from a few inches to 80 ft., it is of an ochraceous brick-red colour, or of a dull gray which in the sun's rays, becomes dazlingly white. Indications of strong volcanic action are evident in the upheaval of the granitic and other igneous rocks above the prevailing sandstone and alluvial clay. In the basins where water is near the surface, and on the banks of streams, there is a richly green vegetation and the growth of gigantic timber. Flowers and fruit abound. The air is heavy with the delicious perfume of the yessamine, the strong odour of a kind of sage, and the sweet scent of mimosa flowers, which stand like golden balls on the bright green boughs. Among the trees are the tamarind, which everywhere growing wild, attains enormous size, the myombo, a fine forest-tree with a green flower smelling like jessamine; the mbua bearing an edible fruit, the calabash from 40 to 50 ft. in girth, and the mbura or nyamora, which, rising with a pillar'd trunk, sometimes overhangs a circuit of 500 ft. Cultivation, carried on chiefly in patches with the sickle, irrigated, raises luxuriant crops of grain and palm. Numerous small rivers provide for the irrigation of this fertile tract, they abound with fish, and their banks are beautifully adorned with groves of blossoming acacia. The climate, generally mild and damp, varies according to altitude, being healthy in the higher, and very opposite in the lower grounds, where the people suffer severely from malarious, cutaneous disorders, and other ailments. The country is occupied by several independent tribes. Differing considerably in character and condition, they are frequently engaged in destructive hostilities. Most of the villages are built on the projecting spurs of a range of hills, where their inhabitants can soon easily raise attack, or, if defeated, secure shelter and concealment. The normal habitation is the small circular hut of mud and grass.

and the size of each village entirely depends upon the wealth and power of its head or chief.

USAGARA, a range of mountains, E. Africa, becomes naked towards the W. with the Tigra Mountains, and extends towards the S. where it is said to culminate. Some of its peaks have an elevation of 8600 ft. The flanks of the range consist of large rounded cones, intersected by plains and valleys, which have been formed not by denudation, but by volcanic, and a primary and igneous origin. Towards the interior the cones are irregularly disposed, the ridges presenting no general direction, and creating each other suddenly. The highest summits are generally well-wooded. From the slopes of the chain numerous streams descend, some flowing eastward into the basin of the Kinyati, and others flowing northwards into that of the Ewaha, the same gives to the Bahr in the upper part of its course.

USHETZA [add] a in Turkey in Europe, Servia esp. circle of same name, near one of the streams which contribute to form the Servian Morava 76 m S S W Belgrade. It stands among orchards and is of some strategical importance being defended by a castle which commands three important roads, leading respectively N to Belgrade, W to Bona Seral in Bosnia, and E to Vlah or Nissa in Turkish Servia. It is the seat of a court of justice and other public establishments and contains a Greek church fifteen mosques a Serbian and two Turkish schools. Pop 6800 of whom 8700 are Turks. USTRON a in Austrian empire Silesia, dist. Skotschant on the Vistula, 42 m E S E Troppa, with a Protestant and a R. Catholic parish church a castle, a bathing establishment, a paper-mill, and extensive ironworks. Pop. 5391.

USTREYKI a in Austrian empire, Galicia, circle and 23 m. S.E. Sarok, cap. dist. of same name, with a potato refinery, and 1100 inhabitants.

USUKUMA, an extensive but ill defined territory East Africa. It has been explained to signify the lands bounded N. by Uuyanswei and extending N to the borders of the Victoria Nyansa, or Lake. It thus forms an extensive region, contained between lat. 2° 24' and 5° S. Lake Uyanwan generally it is a rolling plateau of primitive and unstratified formation with lower levels of brown clay or sand, mixed with vegetable matter. The undulations resemble long waves from 8 to 16 m in length with second and descents equally gradual while the low rocky hills irregular as if disposed by conflicting currents, may be compared to the small curving breakers of a short and chopping sea. In some places huge outcrops of syenitic granite appear. The hill tops are bare, and the slopes are only dotted with a thin bush of cactus and aloes, but the plains though deficient in large timber have a profuse growth, and when cleared are of extreme fertility. Owing to this fertility and one main cause of it—the excellent loam and abundance of spring-water Usukuma is well populated and in regard to cattle, is the richest territory in this part of Africa. It has also an inexhaustible source of wealth in its iron, which is both abundant and of excellent quality, though the present yield is but small: as the natives, instead of mining it, content themselves with picking up and smelting the pieces of ore which lie scattered on the surface. The quantity however, is sufficient to admit of a considerable export to W Uyanwan. It is supposed that besides iron coal might be found. While iron is thus brought from the N. iron is the great staple of the E, and cattle and cereals abound in every quarter. The principal crops are maize, millet, and holcus, which grow so profusely that the people can afford to live almost entirely on the intoxicating drink pombe which is made from them, and is at least as much the national beverage as beer is in England. Fuls, water-melons, manioc, tomatoes, sweet-potatoes, pumpkins, and cucumbers abound. Tobacco is grown on the richest soils and superior cotton is raised, particularly on the S. frontiers of the Victoria Nyansa. The inhabitants, or Uyanwan are a belated and barbarous race, tawny, coarse, and unrefined. Their dress is rude and scanty, and their mode of articulation is so explosive and unpleasant, that a stranger might think the speaker was scolding at him. Considerations of self-interest, however, and a fear of probable retribution, prevent the Uyanwan from plundering and molesting travellers and those who allow themselves to be decoyed to a certain extent by the exactions of the chief, generally find him both able and willing to afford them sufficient protection.

USUNDHKOYA a vil. Turkey in Europe, cyclot and about 40 m. N. W. Adrianople, is celebrated for its annual fair which is the largest in the country, and is said to be attended by about 100,000 persons.

USURI a river E. Asia, forming part of the boundary between Chinese and Russian Manchuria, and after the Songari the largest affluents which the Amoor receives on its E. bank, has its source in the W. slope of the mountains which run N N E., parallel to the W. shore of the Sea of Japan. At first, under the name of the Sandogot or Upper Ussuri, it flows with great rapidity hemmed in by mountains on both banks. At some distance below it begins to flow through a wide plain till it again enters the mountains. Having traversed them for 100 m. it enters a vast and in part swampy prairie, similar in character to that of the Amoor, which it finally joins at the town of Khabarovka, after a course, windings included, of 497 m. The Dobkai one of its earliest affluents is remarkable on account of the gold found in its sands, but the principal affluent is the Songahon, which issues from Lake Klinka.

USZTYE, a in Austrian empire, Hungary co Arva-Thurova, at the confluence of the Black Arva with the Arva, 20 m S W Neumark in Galizia. It contains 1000 inhabitants who work a coal mine, and have a trade in linen.

UTOROP a to Austrian empire, Galizia, circle and about 20 m S W Kolomoia, with salt-springs, a large trade in salt, and 1800 inhabitants.

UTSCH KILIRSA a vil. Asiatic Turkey Armenia, near the Maral tobac or Eastern Euphrates 80 m. E S E. Erzeroum Close to it is a celebrated Armenian convent and church. The convent is a palace place but the church, consisting of a nave running on sixteen columns, possesses an attraction which renders it one of the most venerated and frequented pilgrimages in Asiatic Christendom. This attraction is the grave of John Baptist, whose reputed bones are shown as relics. The inhabitants of the village are Armenians, and a mixed race called Tere Kameh strongly resembling gypsies.

UVINZA a territory E. Africa bounding on the E. with Uyanwan and extending W. to the country of the Walker range. Its N. and S. limits are not defined. It formerly included both sides of the Malagarasi River but the men of the Wabura having rendered the N. or E. bank untenable, the inhabitants of Wabura, now confine themselves to the fertile grounds of the L. bank. Here the sultan, who bears the title of Lord of the River takes advantage of his position to levy black mail on the caravan proceeding to or from Uji. At Nyete within his territory there is a ferry over the Malagarasi, which it is necessary to cross, and he is only to withdraw his canoe in order to have the caravans at his mercy. From the one with which Durio travelled, Sultan Magera, after a week's haggling, exacted about forty cloths blue and white, six wire bracelets, and ten fowls of coral beads equivalent to that country to about 50 in Great Britain.

UVIRA a settlement and landing-place near the N. W. extremity of Lake Tanganyika in Central Africa. It possesses only a few tattered hovels and hence when traders arrive they have no alternative but to provide themselves with temporary booths made of boughs. On a neighbouring height better accommodation might be found in a village belonging to the Mwanu, or Sultan Maruta but the traders hesitate to accept the welcome which he offers them, because they fear the violence of his people. The imports to Uvira are brass wire armlets, salt beads, tobacco, and cotton cloths the exports, provisions ivory slaves bark-cloth and rawware. The last, for which the raw material is obtained from a locality a little west of the lake, is the principal manufacture of the people. They also make neat pendants or bangles and cut light and pretty bowls out of various soft woods.

UTSAL, a in Austrian empire, Galicia, circle Wadowice, about 45 m S W Cracow, with 2800 inhabitants, employed chiefly in preparing match-wood.

UZURAMO a territory E. Africa, extending westward from the Indian Ocean on lon 29 E., along the banks and basin of the Kinyati, to the point where this river is joined by the Mgeta about lon. 28° It has thus a total length from P to W of about 70 m. On the W it is bounded by the territories of Kibwa and Usukuma. The general character

of the country is a rolling ground, with no eminences worthy of notice. The surface, which is generally covered with a luxuriant vegetation, and nowhere rises more than 850 ft. above sea-level, sloping gradually eastward, and only presenting a few short and abrupt precipices on approaching the coast. The climate, though somewhat mitigated on the higher grounds is hot and oppressive. The strata on the coast consist of coralline, limestone, calcareous tuff, and rude gravelly conglomerates, inland sandstone and primitive rocks prevail. In the river-beds blocks of fine black hornblende abound, and are used by the natives as whetstones. There, too occur beds of clay, which they employ in making

pottery. The soil is generally a rich brown or black loam, which under cultivation yields excellent crops, and is a source of nature becomes covered with a most luxuriant vegetation. The grass in the swamps and marshes rises to the height of 15 ft. and the lucerne growing in the meadows and extending as to be superlative till pastures are everywhere to be seen. Cattle are unknown; but sheep, goats, and poultry are plentiful, and near the jungles protected from the insupportable canoes by large wooden huts like cages, raised for cleanliness on piles. The principal diseases are severe diarrhoea and fever generally of a tertian type. The latter usually yield to mild remedies.

V

VAAL, a town Austrian empire, Hungary co. and 18 m N.E. Bachelweissenburg, with a castle, which in early times was an important post in the Turkish wars, manufactures linen cloth, works, a trade in wine and four yearly markets. Pop. 2462.

VACOVIA a fishing vil. Central Africa, on E shore of the Victoria Nyanza, in lat. 1° 15' N., lon. 30° 50' E. It is a miserable place, standing about 1/2 m. from the edge of the lake. The soil is so impregnated with salt that cultivation of it is impossible hence fishing the implements and tackle for which are everywhere visible, forms the main resource of the inhabitants. Salt also being the natural production of the country, gives employment to many of the people in its manufacture and forms an important staple of trade, being exchanged for supplies from the interior. The flat sandy plain that extends from the lake for about 1 m. to the foot of the precipitous cliffs 1500 ft. high appears to have been at one time a part of the bottom of the lake. In fact, the flat land of Vacovia looks like a bay as the mountain cliffs about 5 m. N. and S. descend abruptly to the water's edge, and were the level of the lake 15 ft. higher this flat would be flooded to the base of the hills. At Vacovia it was that Sir E. W. Baker first came in sight of the Albert Nyanza.

VALDIVIA, or **CALLA-CALLA**, a river Gulf which issues from Lake Huancabamba or Guancabamba, flows W. receiving the Quishillo and Cotacachi on its left and the Cruces on its right bank, falls into the Pacific, forming an estuary which is regarded as the shortest roadstead on the coast. It is navigable for 15 m. from the junction of the Cruces, a little above the town of Valdivia.

VALDOBBIADENE [add.] a town Italy Veneto 21 m N.W. Treviso at the S. foot of Mount Cansone and not far from the bank Piave. It is the seat of a court of justice and other public offices, has a high church with beautiful paintings, a civil hospital and several silk and walk mills. Pop. 4552.

VALENTI, a town Turkey in Europe, Wallachia, circle Muscovy, on an affluent of the Yalomatia, 49 m. N. Bucharest. It stands in a beautiful mountain district and has a church and a parish school. There are mineral springs in the vicinity. Pop. 3000.

VALENTIN (St.), a town Austrian empire, circle Upper Wieserwald, on the Krka has an hospital, hospital, and a saw-mill, and contains 2800 inhabitants.

VALLEJO a town U. States, California, at the mouth of Napa Creek, on N.E. side of San Pablo Bay, 29 m. N.E. of San Francisco. It has a large coal and harbor accessible by the largest sea-going ships. The U. States navy-yard is on Mare Island, adjacent to the harbour. The town is built on the slopes of hills rising gently from the water to a height of 100 ft. or more, and contains several churches and stores. Pop. 1000.

VALTAGNO a town Italy Veneto, 25 m. N.W. of Vicenza, on the Brenta, with a beautiful parish church and paper and silk mills. Pop. 2390.

VALTAVENE, a town Italy Veneto, prov. Udine, 2 m.

N. Caserta, near the Tagliamento, which is here crossed by a long bridge. It is memorable for the victory gained on 16th June 1797 by Napoleon I. over the Austrians.

VALVETTI TORRE, a town on the N. shore of Caylen, 8 m. W. of Point Pedro, its northernmost extremity. It is a populous, industrious, and enterprising place, with building-yards, in which vessels of considerable tonnage are turned out by the Tanila, who are among the most skillful and successful ship-builders in Ceylon.

VALVYO a town Turkey in Europe, Servia, cap. circle of same name, on the Kolubara with a court of justice, a church and a school. Pop. 1200.

VA MACILLICE a vil. British America, Canada East co. St. Maurice, on the river of its name, 58 m. N.E. Montreal with a R. Catholic church an agricultural society several tanneries and mills, and a considerable trade in oats and lumber. Pop. about 1000.

VANCOUVER or **QUADRA** and **VANCOUVER** [add.] an isl. W. coast British America lat. 45° 19' to 50° 53' N. lon. 123° 17' to 123° 28' W. length N.W. to S.E. 278 m. breadth varying from 50 m. to 65 m. On the E. and N.E. it is separated from the mainland of British America by the Gulf of Georgia and Queen Charlotte's Sound, and on the S. from that of the U. States by the Strait of Juan-de-Puget. On the N. and W. it lies open to the Pacific. From its somewhat analogous position it has been named 'the England of the Pacific, but the comparison is not borne out by its appearance from the sea. Instead of the white cliffs of Albion, dark and gloomy rocks start abruptly from the waters and behind this natural sea wall a series of rounded hills rises inland, covered with the monotonous fir. The scene is backed, says a recent writer by a loftier range of bare rocky mountains, which traverses the entire centre of the island, and culminates in a rough uneven series of pointed peaks. There are, however, some occasional hills of English-like scenery clothed with groves, and rejoicing in green meadows and the central highlands not unbecomingly remind the traveller of the fountains of Scottish scenery. On the banks of the rivers, and in the valleys and open tracts, the soil is surprisingly rich, and wheat, potatoes, turnips, and other vegetables thrive amazingly. Oats and more northern grasses grow, however, less successfully. The climate is healthy, mild, and genial. A short spring is the prelude to a long unobstructed summer when rain seldom falls and the heat is mitigated by gentle breezes. A cold and misty autumn follows, and that, in its turn, is succeeded by winter which, though not without its days of rain, has its periods of fine weather and is seldom extremely cold. 'Actual observation, says Dr. Ratsey, 'goes far to show that the climate is superior to that of England, both in physical character and salubrity and experience proves that it is equally well adapted for agricultural and pastoral farming.' The chief towns in Victoria, situated on undulating ground to the S. of the island. Its harbour, of the same name, is not, however, adapted for an increasing commerce, and the principal port is that of Esquimaux, about 3 m. from it. The whole coast is indented with excellent

salmon, crabs, and shellfish, which afford a safe shelter for ships, and a valuable source of food. The harbor is the future prosperity of the island will be dependent on coal. Coal of good quality has been discovered at Nanaimo Harbor and on Newcastle Island. The latter is a small island, about two miles, of from 6 to 8 ft. thick, and has been worked at an average depth of 10 ft. from the surface. Vessels drawing 18 ft. of water can approach within a few yards of the pier's mouth, while the harbor itself is well protected, and can safely be entered by ships of considerable burden. A great demand for coal has arisen on the W. coast of N. America, and the existence of a supply on Vancouver Island must largely augment the prosperity of the colony.

VANCOUVER, a vil U States Washington territory on the Columbia River 90 m from its mouth, and 10 m N Portland. It contains several churches, and large vessels can anchor to it.

VANDA (Kna) a tn. Austrian empire, Hungary, co Budapest, 50 m N E. Dobrunn, cap dist of same name, in a marshy district with a court of justice, an old castle a distillery and 8663 inhabitants.

VARNABO, a tn. Austrian empire, Hungary co and 16 m. S. S. W. Trencau, on the Waag with 1700 inhabitants, mostly employed in agriculture, fishing, and quarrying limestone.

VARNAVIN, a tn. Russia, gov and 160 m. S. S. E. Krasnodar, cap circle of same name, on the Weilinga, with two churches, a school for the orphans, and 1008 inhabitants. Many of the inhabitants of the circle are engaged in making mats.

VAROSH, or **DOLATA**, a tn. Turkey in Europe, Bosnia near Travnik. It consists of about 800 houses built on a slope, and occupied by R. Catholics, who obtained it as their residence by an arrangement with the Mahomedans. It is connected by a good road with Travnik, where many of the inhabitants have shops.

VASGAR, a tn. Austrian empire, Hungary co and 20 m N W Temerin, with a trade in corn, wine, and tobacco and 1700 R. Catholic inhabitants.

VASILKOV, a tn. Russia, gov and 20 m. S. by W Kiev, cap circle of same name, on the Stugna, an affluent of the Dniester. It has three churches a circle and a parish school, and a charitable institute. Pop 8972.

VASLUI, a tn. Turkey in Europe, Moldavia, cap circle and on a stream of same name, 28 m S by E Jassy. It is the seat of a court of justice, has a normal school, and was once the residence of the Moldavian prince. Pop 3500.

VASZECH, a tn. Austrian empire, Hungary co Leptan, on the Waag among forests in which large quantities of trophies are found. It contains 2100 inhabitants, who are mostly Lutherans, and carry on a large trade in timber and laths.

VEDDAHs, a semi-barbarous race, Ceylon believed to be a remnant of its aborigines. The country at present inhabited by them is in the S. E. portion of the island, extending for about 80 m. in length by half its breadth, from the base of the Badulla and Ova Hills towards the sea, but their range within a comparatively recent period was much larger, and in the time of the Dutch, to whom they paid a tribute in elephants, they were found the N in the Wanny, within a short distance of the peninsula of Jaffna. They consist of two great divisions—the village Veddahs, and the rock Veddahs. The village Veddahs approach the confines of the European settlements on the E. coast, and dwell in huts of mud and bark. They are somewhat migratory in their habits, removing frequently as food varies for the cultivation of a little rice, yams, and yams, and occasionally carrying off some of the property of the Moors for watching the yam fields at night, in order to drive away wild elephants. Some who, as they may almost be considered a third class, are called some Veddahs, have settled in the jungle between Batticaloa and Trincomalee, and subsist by adding the fishermen in their expeditions, or by selling timber for the Moors to be floated down the rivers to the sea. The rock Veddahs remain confined in the forests, subsisting on roots, fish, honey, and the produce of the chase, lodging in caves or under the shelter of overhanging rocks, and sometimes sleeping on stones which they find among the trees. They are divided into small clans, and sometimes the most virtuous themselves for hunting grounds,

marking the limits of each possession by natural objects, as streams, hills, rocks, or well-known trees. In their food they are almost omnivorous, subsisting on roots, grain, fruits, vermin, and carrion of every kind, however repulsive, and yet from some unexplained cause, rejecting the flesh of the bear, elephant, and buffalo. The iguanas, lizards, and monkeys, both roasted, are their favorite delicacies. Their only weapons are a katana and a bow in the use of which they are very dexterous. The produce of the chase not required or suitable for their own use they dry and reserve for barter. This traffic they carry on in a very singular manner, attending their aversion to intercourse with civilized life. When disposed to barter they repair by night to the village nearest their hunting field, and indicating by well understood signs and models the articles required, deposit an equivalent value of honey or deer's flesh near the door of the dealer and retire to the jungle. After a reasonable delay they return stealthily as before, and find the required articles on the same spot.

This mode of dealing must be very ancient, since it is not only mentioned by a writer of the eleventh century, but has distinctly alluded to by Ptolemy. Though ignorant in the extreme, and without any idea of God or a future state, they are described as a quiet and submissive race, obedient to the slightest intimation of a wish, and very grateful for attention or assistance. Government and the W. Malayans colonists have made some attempts to reclaim these poor outcasts, and with no small measure of success. As they refused to leave the vicinity of their native forests, cottages were built for them on the spot, walls dug, coco-nuts planted and rice land assigned them. In this way settlements were formed at Vippam Madoo, Oomany and Villen-gelavely, and school-houses erected, and teachers provided to give instruction through the medium of the Singhalan language. The settlement at the first place failed through the misconduct of the teachers, but not till such an impression had been made that the Veddahs who had belonged to that area, when dispersed, return to their savage habits, but built huts and continued to cultivate the ground as they had been taught. The settlement at Oomany continues to prosper. Twenty-five families reside in its cottages, coco-nut trees are growing beside them, and as much rice and other grain is raised as suffices for the consumption.

VEIT (St) [old], a tn. Austrian empire, duchy Carniola, in the valley of the Ghan, 11 m N Klagenfurt. It is surrounded by walls, and has a market-place with a marble fountain, an old town-house, fine gardens, and important horse-markets. It was once the residence of the Duke of Carniola and is still the central entrepot for the iron made and manufactured in the duchy. In the vicinity are many feudal castles of which the most important, Rothen Otterwitz, is maintained in excellent condition, and has a beautiful chapel with various monuments and other objects of interest.

VEIT (St), a tn. Austrian empire, Lower Austria, circle Upper Wismerswald on the Gelsen, with numerous saw and other mills, a considerable trade in wood, and a steam of lignite. Pop 2310.

VELLORE, or **RACH YELLORE**, a tn and fort, India, presid. and 80 m W. S. W. Madras, dist. K. Arcot. The town or pettah, situated close to the foot of a range of hills is large, and contains many good houses and a very heavy bear but has no edifice deserving of notice, except the white-washed mosque of Chunda Bahis. The fort, situated W of the pettah, is of considerable extent, inclosed by a broad and deep ditch, and high, broad, and strongly built ramparts, flanked at intervals with towers and bastions. It is also provided with a flame-thrower, but this and all other means of defence are useless, as it is completely commanded by the adjoining hills, and so near them that a six-pounder planted on them can throw its shot over and beyond it. Within are a great pagoda, forming one side of its square, and now used as an arsenal the hospital which is somewhat low in the roof, but well ventilated and generally dry, the barracks magazine, and quarters for staff officers. The soil of the neighborhood, a rich dark-brown mould, produces heavy crops of rice and tobacco. Vellore is famous for a revolt of the native troops, which occurred on the 10th of July, 1806, and in some of its features, more especially in the savage and bloodthirsty spirit manifested, bears some resemblance to the Sepoy mutiny of 1857. S. Pop. of town, 51,408.

VENEV a tn. Russia, gov and 15 m. N.E. Tula, imperial circle of same name. I bank Venevka. It has seven churches, schools for the clergy and parish, a charitable institution, several manufactures, and a large trade in horned cattle. Pop. 2661.

VENLOOZ, or **VANNOOZ**, a bay, on the E coast of Caylon, 45 m. S.E. Trincomalee. It is fringed on the N by Elephant Point, and on the S, by a point of its own name, and receives the Nester a wide and rapid stream. A bar of rocks, stretching across it at a short distance from the shore, is frequented all day long by pelicans, that come at sunrise to fish, and return at evening to their solitary breeding places remote from the sea. The surrounding scenery is beautiful gentle undulations wooded to the summit rising from the shore, while the river is seen flowing through an opening among a cluster of little islands covered with mangroves and acacias. The bay is famous for its shells, which literally cover the strand in endless variety and furnishes the shell-dealers of Trincomalee with their principal supplies. The trade is exclusively in the hands of the Moors who clean the shells with great expensiveness, arrange them in satin-wood boxes and send them to Colombo one part of the island for sale.

VERDACHELUM a tn. India, presid and 125 m. S.W. Madras, dist. S. Arcot, on the Maraymootah Nulden. Its position on the road from Trichinopoly to the British encampment at Trivandy made it a place of some importance in the Carnatic wars. Its pagoda was accordingly well fortified and some severe struggles took place in its vicinity. It has again become comparatively insignificant.

VERKNE ISRETI ZKOL, Russia, gov Form 2 m from Ekaterburg. Though it has the appearance of a considerable town, with its churches and other buildings, it is only the central establishment for the ironworks belonging to the Yakovlev family. Among the buildings are an enormous pile containing all the offices for the administration of the family mining property, warehouses for iron and other produce, blast-furnaces, forging, tinning and rolling mills. The sheet-iron made here is said to surpass the best that is made in any other part of the Ural. Large quantities of it, both raw and manufactured into sheets of various sizes, are exported to America. Another Zavod called *Nyaz Lavskoy*, situated lower down in the valley of the Isset, about 8 m from Ekaterburg, is the seat of extensive blast furnaces belonging to the crown. To obtain the necessary supply of water a large lake has been formed by throwing an embankment across the river.

VROZEE a tn. Austrian empire Hungary on Neograd 20 m. S.W. Balassa Gyarmath on the Danube and the railway from Presburg in Pesth, with 1640 inhabitants, who grow an excellent wine. There is a pleasure-palace in the vicinity.

VEROVITICA a tn. Austrian empire, kingdom of Croatia and Slavonia, on and 15 m. N.E. Poucha on the Drava. It was once fortified, has a fine castle, a high-school, and a trade in wine, and contains 4200 inhabitants.

VERRIA or **KAKATHRIA**, a tn. Turkey in Europe about 40 m. W.W. Saloniki. It contains 8000 inhabitants, whose chief employment is in weaving a cloth composed of a mixture of linen and cotton, and much used as towelling for baths.

VESENBERG a tn. Russia, gov Kholmok, in its most fertile district, 60 m. E. Revel has a church a ruined castle, a circle and an elementary school, and two charitable establishments. Pop. 4360.

VESEGONSK, a tn. Russia, gov and 78 m. N.N.E. Tver, capital circle of same name, on the Mologa. It stands on the N.E. extremity of the gov. has four churches, a parish school two charitable endowments, and a large annual fair, from the 6th to the 16th of January at which a great deal of business is done. In the circle immense numbers of hats and boots and shoes are manufactured. Pop. of town, 2563.

VELUGA, a tn. Russia, gov and 160 m. E. Kastrama, capital circle and on the river of same name. It has two churches, a parish school and a charitable endowment, and contains 2777 inhabitants. Large numbers of hats are made within the circle.

VIANNIKI, a tn. Russia, gov and 65 m. E. Vladimir capital circle of same name, on the Khlama. It has seven churches, a circle school numerous manufactures, particularly of linen and a large trade in corn. Pop. 2542.

VICHTWANG, a tn. Austrian empire, Upper Austria circle, Hausruck, 22 m. S.W. Steyr, with an elegant parish church, an hospital and a post of 1900.

VICTORIA, a prov. Australia [N.L.] In 1851 the province, which had previously formed part of New South Wales, was erected into an independent government, with lieutenant-governor executive council, and two legislative chambers. At this period the total number of inhabitants, exclusive of aborigines, was 77,545. Owing to the fertility of the soil the produce of food had become so superabundant, and the influx of settlers comparatively so small, that the produce could not be consumed, and sheep were bred solely for their wool, of which in 1850, 18,091,562 lbs were exported to England. But the discovery of gold in the province, immediately after that in New South Wales, and almost contemporaneously with the establishment of its independence, attracted an enormous immigration. The first discoveries were made nearly simultaneously at Ballarat, then a sheep station 70 m. W. of Melbourne at Anderson Creek, 10 m. from Melbourne, and at the Clunes Station on the Bendigo River, about 100 m. W.W. of the city. The richest and most rich fields of gold speedily sprung. Melbourne, its male population, and was swarmed by immigrants from the other colonies, Tasmania, New Zealand, California, and after some months from England, so that, in twelve months from the date of the gold discovery about 65,000 had been added to the number of the population. In one fortnight in 1852, 45 vessels sailed from England with not less than 15,000 emigrants, to Australia. This extraordinary influx naturally threw things into confusion and lawlessness, as well as much privation and distress, prevailed. The power of the government was unequal to the emergency and deeds of violence and formidable gangs of robbers set law and order at defiance for a time. Resistance to the license fee of 50s a month, exacted by the government from every digger produced serious riots at Ballarat and elsewhere at the end of 1854, which had to be suppressed with the aid of the military. An increased and more efficient police, aided by a special police force derived from England, was at length successful in restoring public order and personal safety. The accession of poplar trees gave great impetus to agriculture, and the large demand and high prices of food induced many of the pastoral and agricultural classes who had forsaken their calling and taken to the gold-fields to return to their proper occupation, which could now be carried on most profitably. From the time of the discovery of gold at Ballarat in August, 1851, to the end of the year the estimated quantity dug was valued at £265,523. In 1852 the value of the gold produce was £15,899,735, in 1853, £14,100,088 in 1854 £9,568,263 a considerable falling off, owing to the disturbed state of the population in the gold fields, in 1855 £11,171,261 and in 1856 £11,948,769 from which date there was a gradual decrease to £6,686,199 in 1862. The progress of commerce and manufactures was correspondingly rapid during the same period. The shipping entered was as follows—

	Vessels.	Tons.
1850	712	129,476
1851	1607	406,510
1852	2054	481,779
1853	2500	570,576
1854	1807	421,736

The value of the imports and exports during the same period is also stated thus—

	Imports.	Exports.
1851	£1,026,037	£1,009,900
1852	4,939,728	7,421,540
1853	16,543,877	11,002,544
1854	17,680,341	10,774,524
1855	12,097,602	12,440,230

Where the exports were less than the value of the produce of gold, it is accounted for by there being at the time no duty on gold, and the official returns taking no account of the large quantities carried away by private hands.

At the close of 1851 the population was estimated at 97,459 in 1852, at 169,321; in 1853, at 223,585 in 1854, at 219,507; and in 1855 at 244,528. The proportion of the sexes in the last-mentioned year was 224,450 males to 129,078 females. At the commencement of 1856 there were in the province 349 churches and chapels, accommodating 75,545.

governs, and 438 schools attended by 24,478 scholars. In 1837, when the population had reached 410,760, the following denominations were ascertained to be—

Church of England	172,618
Roman Catholics	60,085
Presbyterians	30,365
Methodists	18,838
Baptists	6,484
Lutherans	5,374
Unitarians	1,480
B. Catholics	77,861
Jews	3,308
Mohammedans, &c.	27,264
Unspecified	6,774
Chinese Chinese.	

The revenue of the province for the years under consideration was as follows—

1850	\$259,431	1851	\$3,400,083
1851	436,853	1852	6,154,635
1852	1,377,181	1853	4,719,698

The expenditure was principally made on roads, bridges, and other public works and railways have been constructed to the principal gold-fields the cost of which has been raised by loans. The following more recent statistics will show the position which the province has maintained to recent times. The total quantity of land sold by the government up to the 31st December 1856 was 6,949,703 acres, and the extent

remaining unalienated was estimated at 43,694,456 acres. The extent of land leased in 1855 was 1,690,177 acres, and the amount of rent received \$211,709. The number of acres in sheep runs was 59,354,467; the number of acres attached to runs was 2,866,000, the extent of land under cultivation in 1854 was 679,463 acres, and in 1855 680,196 acres, showing an increase of 60,733 acres. There were in the colony in March, 1855, 840,625 cattle, and 8,405,284 sheep, and in March 1856, 821,337 cattle, showing a decrease of 19,288 and 8,833,960 sheep, being an increase of 439,146. The number of immigrants who arrived in the colony by sea in 1855 was 38,976, of whom three came from the neighbouring colonies 18,405 from the United Kingdom 16,862 and from foreign countries 1709. The population of the colony on the 1st of January 1855, was 605,501 and on the 31st December, 1855, 626,639 being an increase of 21,288. The estimated population on the gold fields on the 30th September 1856, was 358,247 of whom 227,496 were Europeans, and 30,401 Chinese. The trade of the colony had apparently not been in a prosperous condition in 1855 the imports and exports in that year having fallen off considerably. The imports amounted to \$13,857,537 and the exports to \$13,150,746. The value of the imports was lower than in any of the preceding nine years, and the value of the exports was less than in any year of the same period except 1850 and 1852.

VICTORIA, a town British N America, cap. Vancouver Island, on the N side of the Strait of Juan de Fuca and on the S.E. end of the island lat. 48° 27' N. lon 123° 30' W

A STREET IN VICTORIA.—From Mayne's British Columbia.

The inlet which forms the harbour runs northwards for some miles with an average breadth of a few hundred yards. The country around is undulating in the distance thickly timbered, but in the immediate vicinity open, and covered with fertile grassy pastures. The town lies on the eastern side of the harbour. The site was selected about eighteen years ago by the officers of the Hudson Bay Company for a fort and depot, on account of the safe harbour for small vessels, and the quantity of good water land in the neighbourhood for the support of the establishment. Since then the influence of the neighbouring gold-fields and other natural advantages have made it a place of considerable importance. It has become the seat of government of the island, and contains several churches and other public buildings, but from the unobtainableness of its harbour will not become a place of commerce. The entrance of this harbour is narrow and shoaly the channel tortuous and, without a pilot, dangerous, notwithstanding the aid of buoys and other means of improvement; and the bay itself scarcely affords convenient anchorage for six large vessels. For these reasons, and the difficulty of procuring water, the harbour has been abandoned for large vessels, and Esquimalt, about 3 m. to the S., has become the port. Pop

about 8000. Fort Victoria, in the immediate vicinity, consists of a square inclosure with octagonal bastions.

VICTORIA is in Mexico cap state. The town lies near the river San Juan, and at the foot of a mountain range which bounds it on the S. and S.W. lat. 23° 45' N. lon 99° 10' W. It stands at the height of about 1000 ft. above the sea, is regularly built, consisting of a large central square, with a number of streets radiating from it, and has a church built in the Moorish style a town-house, and a number of handsome private mansions. From being commanded by adjacent heights, it possesses little military importance, but its position near the San Juan which is here navigable for large boats, and at the point where several important roads meet, gives it great facilities for trade. Victoria was founded by Escandon in 1748 and after being called New Santander and Aquayo, received its present name in 1825 in honour of the president Guadalupe Victoria. Pop 6184.

VICTORIA, a town La Plata, prov Entre Rios, on a small stream of its own name, forming a branch of the Parana River, 300 m. N.W. Buenos Ayres. It stands on the top of an elevated ridge, is a flourishing place, carrying on an active trade in hides, wool, and tallow, and has a pop. of about 4000.

VICTORIA or *Pernu van Guesar* a bay, Russian capital, is the Bay of Japan, on the S.W. coast of Manchuria, is a large indentation which looks towards the S. and is divided into the two gulfs of Napoleon on the E. and Garcia on the W. by the Albert Peninsula, projecting S. from the mainland, and continued in the same direction by a group of islands called the Eugénie Archipelago. In Kamelle Strait, near the S. extremity of the peninsula, is situated Port May or Vladivostok, completely sheltered by hills. The whole coast line, consisting chiefly of clay-sand heaved up by rocks of red porphyry, exhibits marks of volcanic action. The surrounding country is well wooded with oak, elm, and walnut, and has large tracts of fine grazing land, abounding in various coloured flowers. The rice grows luxuriantly and matures in its fruit.

VICTORIA, or *Cocora* (native, *Tyehale*) a harbour, New Zealand, E. side of Middle Island on the N.W. of Banks Peninsula. The entrance the heads of which are bold and steep-to, is $2\frac{1}{2}$ m. from the S. and of Pegasus Bay and the harbour runs $7\frac{1}{2}$ m. S.W. by W. directness. The town and port of Lyttelton situated on the N. shore, is a small bay $4\frac{1}{2}$ m. from the heads, above it there is sufficient depth for small coasting vessels only. The entrance is 1 m. wide and retains this width to the anchorage off Lyttelton. The harbour is easy of access in most weathers, except in S.W. gales, which draw out with great violence. Opposite Lyttelton, and connected at low water with the S. shore, is Quail Island, midway between which and the town is a reef.

VICTORIA (Port), a magnificent harbour and roadstead on the E. side of the island of Mahé, the largest of a group of twenty-nine islands forming the Archipelago, about lat. 5° S. lon. 55° E. The harbour is capable of safely receiving five or six m. of the line while the bay in which it lies, about $4\frac{1}{2}$ m. deep by $3\frac{1}{2}$ m. wide, furnishes a roadstead completely inclosed by little islands on all sides except the N. The excellence of the harbour has given rise to a town of the name of Victoria, which however has not made much progress, consisting merely of wooden houses covered with shingles.

VICTORIA FALLS (native name *Moosekottah*), S. Africa, in the Lemboye or Zambesi, about $35\frac{1}{2}$ m. below the confluence of the Chiloé.

The falls have been formed by a crack right across the river in the hard black basaltic rock which forms the bed of the Zambesi. The lips of the crack are still quite sharp, save about $5\frac{1}{2}$ ft. of the edge over which the river rolls. The walls go sheer down from the lips without any projecting rock or sign of stratification or dislocation. No change of level took place when the vast rift occurred between the two parts of the river's bed thus rent asunder the part of it on the opposite side of the cleft, in descending the river, being on the same level with that over which the water still flows, and covered with grass and where the stream formerly ran. The first crack is in length a few yards more than the breadth of the river when on his second visit Dr Livingstone found to be a little over 1850 yards. The main stream is here running nearly due N. and S., and the cleft across it lies nearly E. and W. The depth to the surface of the water at the bottom of the chasm was found by measurement to be about 800 ft., the actual bottom being of course still lower. The width of the cleft at its narrowest part is about 80 yards, and at its broadest somewhat more. Into this chasm the river, more than a mile wide rolls with a deafening roar. The water in this case is the bottom of the fissure flowing from each end of it towards the centre, where the two currents unite, forming a fearful boiling whirlpool, and then find an outlet by a crack at right angles to the great fissure, this outlet is about 1170 yards from the W. end, and 600 yards from the E. end of the chasm. The river now apparently not more than 20 or 30 yards wide, surges and rushes S. through this narrow channel for about 180 yards, and then enters a second chasm somewhat deeper and nearly parallel with the first. Leaving the eastern half of this second chasm to the growth of large trees, the stream turns sharply to the W. and forms a promontory between it and the first fissure of 1170 yards in length, and 416 yards in breadth at its base. Reaching this base the river runs abruptly round the head of another promontory, and flows to the E. in a third chasm, then turns round a third and much narrower promontory and goes to the W. in a fourth chasm,

and appears again to sweep round another promontory towards the E. In this large stream, not above twenty feet deep, the rocks are all so sharply cut and angular that the keenest eyes could see that the hard basaltic rock must have been river-cut by some force acting from beneath. The sand between the falls retains, as stated before, the same form as the rock, and is rent was made. The top of the promontory between the first, second, and third falls is flat, smooth, and studded with trees. Viewing the falls from the first promontory that is, facing them at the W. end of the chasm there is first a fall 36 yards in breadth and course, as all are, 800 ft. in depth, from intermediate islands, a small island, and next a great fall, 573 yards broad, a projecting rock separates this from the third fall, 235 yards in breadth in all, upwards of 600 yards of running falls. Then comes Garden Island, eastward of which, at the dry season, when the river is at its lowest, towards a good deal of the bare rock of the river's bed with a series of narrow falls, which in the floods of the wet season constitute and enormous cascade nearly half a mile in extent. Near the E. end of the chasm are two other large falls, but not to be compared at low water with the western ones between the islands. The whole body of water rolls clear over quite unbroken but after a descent of 10 or more ft., the entire mass suddenly becomes like a huge sheet of driven snow. Jets of water leap off it to the form of comets with tails streaming behind till the whole snowy sheet becomes myriads of rushing leaping, aqueous comets. This peculiarity was not observed by Charles Livingstone at Niagara and here it happens possibly from the dryness of the atmosphere or whatever the cause may be which makes every drop of Zambesi water appear to possess a sort of individuality. It runs off the rocks to the middle, and glides in beads along the smooth surface, like drops of quicksilver on a table. The vast body of water separating into the comet-like forms described necessarily incloses in its descent a large volume of air which forced into the cleft to an unknown depth, rebounds and rushes up loaded with vapour to form from three to six columns, as if of steam visible 31 m. distant. Rising 300 or 800 ft. above the cascade, this vapour becomes condensed and falls in a perpetual shower of spray on the grove of evergreen trees opposite, the heavy drops from the leaves of which collect on the forest, little rills which run down the steep face of the valley until they are blown off and carried up again by the columns of vapour.

VICTORIA NILE. See SOMERSET RIVER in Egypt.

VICTORIA NYANZA, a large fresh water lake, Eastern Africa, about 400 m. E.N.E. Lake Tanganyika. Its E. extremity is in lat. 2° 24' S., lon. 35° E., and the height of its water is 5780 ft. above sea-level but its extent to the N. is unknown. According to some native accounts it extends to 1° or 1° 30' N. This would give it a total length of 250 m. As the S. extremity, where it receives the Malagarwa, it forms a creek almost completely choked up with an accumulation of brown rocky tree-trunk bluffs, but immediately beyond it widens out into a magnificent expanse, roughly estimated at 25 m. In this part of the lake about lat. 2° 30' S. there are two islands of some size—Maita not far from the S.E. shore and a little to the W. of it, and at least double its size Ukerewe, which sometimes gives its name to the lake. Nyansa lies open and elevated, rather resembling the drifts and temporary deposit of extensive floods than a volcanic depression, as Tanganyika seems to be. Its shores are low and flat, distant here and there with little hills, and its water is universally commended for its lightness and softness. The depth is said to be great, but as no soundings have yet been regarded as trustworthy.

VIEJO, a tn. Central America, Department, Dep. Central, in the vicinity of the volcanic mountain, same name, about 20 m. N.W. Leon. While one of the oldest, it is also one of the best-built places in the state, many streets and wealthy families having selected it for their residences. It has two churches, one of them a building of some merit. Pop. about 3000.

VIEJEGUENEN, a tn. Andean empire Moravia, about 40 m. N. from, on the frontier of Bolivia; with a castle, and a pop. of 1200.

VIGAY, a river, India, princ. Madras, which rises among the mountains which separate Travancore from dist. Madras, and flows first N.E. receiving numerous small tributaries,

and then S.E. past the ruins of Madura. In the lower part of the cone it dips into a large lake called Periyakulam, but elsewhere proceeding E. for 5 m., loses itself in a salt marsh. Reappearing at the E. end of the marsh, and still following the same S.E. serpentine course S.E. for 30 m., it reaches the sea at the S.E. end of the island a little below the point of the lighthouse. Its whole length is about 140 m. It is generally in flood from October to December and possesses water throughout the whole year, contributes greatly to the fertility of the districts through which it flows.

VILMA POORA, a ruined city, Ceylon, 80 m. N by W Kandy. It stood near the N shore of the abortive tank of Kelawera, became a royal residence 500 years before the Christian era, and was a city and a fortress when Anurajapora was still a village. It was surrounded, according to the Mahawamsa by a triple battlement and entered by a gate of iron, and after various vicissitudes was rebuilt as late as the twelfth century by Praksamsa. So rapid, however and so complete has been its decay, that nothing now remains except the foundations of the fort, a flagpole evidently built of bricks taken from the city wall, a few stone troughs, and chiseled pillars and mounds of earth and debris.

VILHONIA, a town, Austrian empire, Hungary, on the right bank of the Danube, with 1200 Lutheran inhabitants, who rear sheep and make famous ewe-milk cheese.

VILHONIA, a town, Russia, gov. and 50 m. E S.E. Vilna, emp. circle of same name, on the Vilva with three churches, a charitable institute and a pop. of 2045.

VILHELM, a town in S.W. Africa, Kumbunda country territory, Baulunde, on a stream of same name to the W of the Katusa, about lat. 11° 55' S. lon. 18° 40' E. It is situated in the midst of dense woods, is surrounded by a palisade and a ditch, and contains about 2000 inhabitants, who besides cultivating the soil carry on a considerable trade in bees wax.

VILKOMIR, a town, Russia, gov. and 45 m. N. W. Kovno with a church, a circle and a parish school, two charitable institutions and 4183 inhabitants.

VILLA-DE-VILUNA, a town, Chili, prov. Coquimbo, in a fertile valley, 7 leagues E. of the N. E. La Serena; with a parish church, a town house, two normal and three primary schools. Pop. 3076.

VILLA FONTANA, a town, Italy, Venetia, prov. and about 9 m. S.E. Verona, on the Mincio, with a parish church, which contains good paintings by Giordano and Farnese.

VILLAFRANCA, a town, Italy, Venetia, prov. and 9 m. S.W. Verona, emp. dist. of same name on the railway to Mantua. It is the seat of a court of justice, has two parish churches, a Capuchin convent, and an hospital, and contains 7147 inhabitants. The French and Austrian emperors met here on 25th July 1859, and settled the preliminaries of a peace which deprived Austria of the greater part of Lombardy.

VILLALTA, or SAN ILDEFONSO DE VILLA AITA, a town, Mexico, state and about 45 m. N.E. Oajaca in a beautiful and healthy district at the height of 4000 ft. above the sea. It was established by Cortes in 1531 as a military post or presidio, and continued long to be one of the most important places of New Spain. The present inhabitants not above 1000 in number, weave coarse cloth out of yam (the fibres of the agave) and show considerable skill in carving articles of wood. Coffee, cotton, tobacco, and fruits are grown and gold and silver were once mined in the district.

VILLA MOLINA, a town, Chili, prov. Talca, 130 m. S.W. Valparaiso. It is a clean little town built chiefly along the main street, with an indifferent-looking church, and a pop. estimated at 1400. A broken plain, almost entirely barren, surrounds the town and extends to Talca.

VILLANDER, a town, Austrian empire, Tyrol, circle and about 8 m. W. Brienz, with 1800 inhabitants, and a church containing a number of remarkable tombs. In the Pfander Mountain in the vicinity are mines of silver, lead and copper.

VILLA RICA, a town, Paraguay, 85 m. S.E. Asuncion, 10 miles from the Tibiquari on the E., and its tributary the Ytiquarini on the W. It is picturesquely situated amid fertile plains, which terminate E. and W. in a low mountain range covered with noble forests.

VILLARICA, a lake, Chli, in the N. of prov. Valdivia,

and at the N.W. foot of the volcanic mountain of its name. Its area is estimated at rather more than 100 sq. m. It was originally called Llanquén, but Valdivia, in consequence of the quantity of gold found in its vicinity, assumed a settlement on its shore, of which, notwithstanding its repeated devastation by the Indians, the ruins may still be traced. Its surplus waters are carried W. to the Pacific by the Tollen.

VILSA, a town, Austrian empire, Tyrol, circle and 38 m. N.W. Innsbruck, on the frontiers of Bavaria, with a beautiful parish church, and an old castle. Up to the seventeenth century Vilsa was an imperial free town. Pop. 1000.

VINELAND, a town, U. States, New Jersey on the Millville and Gloucester railway 32 m. S. by E. Philadelphia. It contains three churches, several manufactures and the cultivation of fruit forms the principal occupation of the people.

VIRACHOLEN, a town, India, presid. Madras, dist. and 54 m. S.E. Madras on the S. bank of the Kradamandi. It was anciently the residence of the rajahs of the country and indicates its importance by the extent and magnificence of its remains, though it is now insignificant, with no existing building worthy of note except a small Hindoo temple. The manufactures consist of long cloths.

VIRGIN GORDA, an island, W. Indies, Leeward Islands, the most easterly of the Virgin group, has a very irregular outline, and is occupied towards its centre by an immense hill which rises gradually and terminates in a peak 1370 ft. high. On its W. side is a peninsula, broken up by some convulsion of nature into vast granite blocks, which lie scattered on the shore. To the southward are several cays and islets similarly composed of disrupted granite. The largest of these islets having the appearance of a town in ruins is named Fallen Jerusalem. The inhabitants, about 764 are engaged in raising stock and vegetables, cutting wood and burning charcoal for the markets of St. Thomas and St. Croix.

VIRGINIA CITY, two places, U. States—1, A town, Nevada, situated among rocky ledges and ravines, on the E. slope of Mount Davidson, 15 m. N.E. Carson, and 274 m. N.E. San Francisco, 6205 ft. above the level of the sea. The principal streets, in many instances cut through the solid rock are level, and those devoted to business are lined with blocks of substantial stone and brick fire-proof buildings three to five stories high. The environs are adorned with many hand some private residences. Virginia City owes its origin and rapid growth to the rich veins of silver discovered in 1859, from which upwards of \$2,000,000 of silver was obtained in 1864. A vein near the city is the largest yet discovered being 166 ft. thick and 4 m. long. The city is lighted with gas and well supplied with water and good roads have been constructed in various directions. Pop. (1860) 2845 (1885, about 15,000—2, A town, Idaho near the Rocky Mountains, 225 m. E. N.E. Idaho City has productive gold mines, and the adjacent country is said to be well supplied with wood.

VIBONTA, a town, Austrian empire, Hungary, co. Heves. E. Gyomay is famous for the wine of its name, strongly resembling Burgundy. Pop. 800.

VIBUCI, a town, Austrian empire, Military Frontier, Lienz, district, about 69 m. S.E. Trieste, on a narrow mountain pass with a Greek non united parish church, and the extensive ruins of an ancient castle. Pop. 1230.

VITENDA, a town, S.W. Africa, Kumbunda country territory, Baulunde. It is situated on the Katusa and Mungoya, about 82 m. above its confluence with the Oosma, is enclosed by a strong palisade and a ditch, and contains 2000 inhabitants under the rule of a powerful chief nominally subject to that of Baulunde.

VITIZ, or VITIZ, a town, Turkey in Europe, eyalet Adrianople, 78 m. N.W. Constantinople. It has a picturesque site on a mountain slope is surrounded with walls, and is the seat of a Greek archbishop. The olive grown here are famous. Pop. 5000.

VIZAKNA or SAKENNA, a town, Austrian empire, Transylvania, circle and 6 m. N.W. Hermannstadt, with large salt-works, and 2441 inhabitants.

VLADIMIR (St.) a bay, Russian empire, on the W. coast of the Sea of Japan; lat. 42° 53' 40" N. lon. 135° 27' 21" E. It opens between the rocky promontories of Baikal on the N. and Vachaki on the S. which are 12 m. apart, and ex-

leading westward, form three ridges—N. E., and W. The last is the smallest; the other two are vast circular basins, separated from each other by a hilly and wooded peninsula, and both of them surrounded and sheltered by adjacent wooded heights. The S. inlet, the largest and most completely sheltered, affords every facility for careening and repairing a ship. It is said that these inlets are only frozen over from the middle of December to the middle of February, and that the effect of the offshore swell is to keep the entrance of the bay almost free from ice.

VLOKAVEK, a tn. Russian Poland, gov. and 85 m. N. W. Warsaw, on the Vistula. It has a cathedral and three other churches, a circle and an elementary school and a considerable trade in corn and contains 6163 inhabitants.

VOINITEA a tn. European Turkey, Bosnia, ayakt. Bosnia, 29 m. W. by N. Bosnia-Herzegovina. It lies among mountains, and contains 4000 inhabitants, mostly R. Catholic Bosnians, who are chiefly employed in mining and smelting. To the S. W. is the largest R. Catholic monastery in Bosnia situated.

VOITELSBRENN a tn. Austrian empire, Moravia, circle and 24 m. E. S. E. Znaun, on the frontiers of Lower Austria, with an ancient parish church a saltpetre spring a trade in wine, and 1000 inhabitants.

VOKLABRUCK a tn. Austrian empire, Upper Austria, circle Hausruck on the Völs, 35 m. W. S. W. S. W. has a female educational institute, a town hospital, an infirmary and manu. factory of calico and woollen ware. Pop. 1300.

VOLCANO BAY in the S. W. of Japan one of the Japan Isles, is nearly of a circular shape, and has a width of about 55 m. at its entrance, which is formed by Cape Tetoum on the N. and Point Zamru on the S. Its depth which is 50 fathoms near the centre, decreases gradually towards the shore. Captain Broughton, who visited it in 1796, gave it its name, because he then saw three volcanoes in activity. The U. States expedition to Japan in 1854 saw only two,

which were situated in the N. E., and throwing out delish. ively columns of thick smoke. The scenery of the bay is very beautiful, presenting a spectacle of lofty mountains, their summits covered with snow, and their lower slopes clothed with the richest verdure. At 11 N. E. entrance of the bay, is lat. 48° 21' N., lon. 140° 10' E. The bay is a fine but snug harbour of Kankow, and is the terminus of the vessels entering it.

VOLOKLAMSK, a tn. Russia, gov. and 65 m. N. W. Moscow, on circle of same name, on the Lense, at its confluence with the Rhaissa. It has seven churches, a circle and a parish school, and a benevolent endowment. In the vicinity there is a wealthy monastery of the same name, which was founded in 1479. Pop. 1290.

VOLS, a tn. Austrian empire Tyrol circle and 10 m. S. W. of Brionn, with 1900 inhabitants. In the vicinity are much-frequented mineral springs.

VOSKRESENK, a tn. Russia, gov. and 36 m. N. W. Moscow, circle Sverdlovsk, on the Istra. It has a church but its chief claim to notice is derived from the monastery of same name, which lies in the vicinity, and, from a supposed resemblance to the ancient Jewish capital, has been designated *New Jerusalem*. Within the walls which inclose it are two cathedrals and two churches. Pop. 1078.

VRANYA, a tn. Turkey in Europe, the S. of Turkish Servia, ayakt. and 30 m. N. E. Uskut, on the Morava. It contains about 7000 inhabitants, chiefly Bulgarians and Albanians, who have iron works and manufactures.

VYSA (and Vysa) a tn. Turkey in Europe, provincially situated at the foot of the Struma ridge, and near the head waters of the Erkeno or Ergun, 75 m. S. W. Constantinople. It is the seat of a third-rate Turkish governor and a Greek bishop and has good schools both for Bulgarian and Greek, but none for Turkish. The ancient town, which stands on an eminence overlooking the modern has extensive ruins, which are freely used as quarries.

W

WARASHA a tn. U. States, Minnesota, exp. on. of same name, 1/2 bank Mississippi 2 m. below Lake Pepin, and 26 m. N. E. Rochester. It is built on sloping ground between the river and a high bluff about 1/2 m. from the shore. It contains a handsome court-house, three churches, two banks, a public library four-mill five grain warehouses, and a lumber yard. Pop. 2300.

WABUHA a comparatively insignificant tribe, Central Africa, inhabiting the district of Uba, which is washed by Lake Tanganyika on the N. and bounded N. by Lake E. by Lake and S. by the Malagazi. Their principal settlement, Uyuwa, is merely a clearing in the jungle, with a few pyramids being fields of sweet-potatoes. They are a harmless but oppressed race, dark curly-headed and hard-favoured. They dress in skins and tree-bark, wear the sheath or top knot of hair for ornaments, brass and copper armlets (very disks and bands, and are never without their weapons—spears, assegais, daggers, and small battle-axes. They suffer much from the Watuts.

WADAN, a tn. Western Africa, on the S. frontier of the Moorish dist. Adzer lat. 20° 40' N., lon. 10° 55' W. It has a rugged and elevated site on the E. side of the celebrated valley which intersects the district, consists of houses built of stone and mud and has a Moorish population of about 5000 who supply themselves with necessaries from Timb. The Portuguese attempted to establish a factory here in the latter part of the fifteenth century.

WADI a tn. Western Africa, Bornu, 125 m. W. by N. Kukawa. It is of considerable size, and consists of two distinct quarters, walled all round, and separated from each other by a wide open space, where the cattle are accosted.

WADI SHATI or **WADI SHIATI** a tn. N. Africa, re-

gion of Tripoli on the route to, and 100 m. N. N. W. Meur souk. It stands on the top of a steep terraced hill in the midst of a valley, and consists of an old and a new town. The former crowning the hill is in ruins, but gives indications of having once been densely peopled; the latter is entered by two gates, and has several well-cultivated gardens, together with a large grove of date-trees, in the fields the chief crops are wheat and barley.

WADOE, a tribe N. Africa, occupy a tract of country southward from the V. with one of the Wadagers, chief of the Wakhware near Khut on the W. and on the E. by that of the Wadodere or tribes of Saadani, the Gerna and Kan gun rivers form their boundary on the S. The Wadoe of country their domain has few cattle, but produces grain in such abundance as to have a surplus oforghum and wax, which is exported to Zanzibar. The Wadoe were once a powerful tribe, and the terror of their neighbours—a terror however produced not so much by their arms as by their horrible mode of warfare. When an enemy was about to enter the Wakhware, and fearing that they had begun to cut slices from the bodies of those whom they hated, and then roast and eat them. This abominable practice for succeeded that the Wakhware, terror-struck, took to flight; but vengeance soon overtook the disgusting cannibals, and they had all perished. The Wadoe differ much in color and form, some being tall well-made negroes with a light complexion, while others are almost black. The distinctive mark of both sexes is a pair of long cuts down both cheeks from the temple to the jaw. They have a wild look, dress in enhanced alba stained yellow with minims bark, and are said to drink out of human skulls, without perceiving them in any way be singular a use. When a chief dies, a male and female slave

are dependent alive with them. This custom has been abolished by means of the tribe, but not entirely, or by mistaking a dog for the slaves. The Wadwa have numerous sub-tribes.

WADOWIE, an African empire, Gallia cap. circlo. It is situated in the district on the Skawa, 24 m. S W of the capital. It has a large public office, and has large military hospital, a high-school for the circle, a large school and an infirmary. *Pop.* 8171.

WADI BOPAN, a valley, N. Africa, Tripoli, which commences near Zibin, near the S. slope of the Jebel range, about 30 m. S W Tripoli, and extending with a considerable curve from W. to E., terminates in the Gulf of Sidra. On the N. it is limited by low sand-hills, and on the S. by a low range, which separates it from Wadi Zemzum and contains the town of Enfid. It has an average width of about 5 miles and during the rainy season is almost entirely inundated. This account appearing scarcity by copious supplies of water it forms the most fertile tract of the regency of Tripoli. Its upper portion being particularly rich in figs, its middle portion in barley and wheat, and its lower portion, near the sea, in fowls of date-trees.

WAGOGO the name of a tribe in E. Africa, inhabiting a territory which extends from the W. base of the Lagaia Mountains to Malabar, about 100 S. E. and from the country of the Wabara to the N. to that of the Wabara tribes on the S., a distance computed at 8 stages. This territory however, they partly share with others being mingled in the N. with the Wabumba, in the S. E. with the Wababa, and in the S. with the Warori. As usual among slave-purchasing races, the Wagogo display great variety of colour in the E. and N. settlements they have fine stout forms and light complexions in other directions many of them are black as negroes. Their features in general are not uncomely and the upper part of the face is often fine. The most prominent defects are thick lips and a coarse mouth, the expression also is wild and angry and the eyes are often reddened and bleared by drink. The distinctive marks of the tribe are the absence of the two lower incisors and an extraordinary distension of the lobes of the ears, in which process of ears an inch or two long and nearly twice the thickness of a man's finger are inserted, so as to look like handles to the head. The dress of the Wagogo far surpasses that of most of their neighbours. The men usually wear some Arab cloak or dyed Indian cotton, and many of them wear sandals of single hide. The women of the wealthier class are clothed in cotton of the poorer in skins. Even the children are generally dressed. As usual the males, when they appear in public, are armed. Their chief weapons are a long bow and a spear. They have no shield. The dwellings are square huts, formed externally of poles driven into the ground and puddled with mud, and divided internally into several compartments, which the inmates share with the domestic animals, dogs and goats. They are, of course, dirty in the extreme. The Wagogo, though not devoid of a rude hospitality and accustomed to trade regularly in salt and ivory, which they barter for slaves, are notorious for their plundering propensities. Government is in the hands of a chief, or sultan, with the title of *madid*. The sultan exercises great authority.

WABARA, a tribe in Central Africa, so-called from their original seat, Ubia, a lake situated N. by the Mountains of Ubia, and S. and E. the Mountains of Ubia. Having been plundered and driven from their country by the powerful Wadwa, they have quitted the fertile plains, which have in consequence been converted into a waste of jungle, and are now dispersed over the country between Enyayawie and Lake Tanganyika. A part of them contributing to the Mountains of Ubia, have found a sufficient protection against their enemies in their fastnesses. They are fair, and not uncomely, but, partly perhaps in con-

sequence of a tradition that they came originally from a southern region, the most ancient seat of slavery in E. Africa, they are universally regarded and treated as a vile and servile race.

WABERE, a tribe, E. Africa, dwelling between the Wabara on the E. and the Wagogo on the W. and bearing some resemblance to both. They have plain features, but are stout and well grown. Though seemingly good-natured and good-hearted their plundering propensities are largely developed, and they have more than one attacked caravans, and threatened to close their route. Their distinctive mark is two elevated incisions on both cheeks. Rearing of cattle and slave-dealing are their chief employments. They are on bad terms with all their neighbours, and more especially with the Warori, whom, however, they dare not meet in the field.

WAHUMBA, a tribe, E. Africa, occupying a territory which extends from the N. of Lagaia to the E. shore of the Victoria Nyassa or Ukerewe. Being generally mountaineers, the surface is more adapted for pasture than agriculture, and the tribe, adapting themselves to their position, are generally employed in rearing cattle, milk and flesh constituting their sole food. As they have little ivory, the Arab merchants have no attraction and hence their highlands remain almost entirely unexplored. In features they are fair and comely, and though lightly made, possess a martial spirit which makes them somewhat troublesome neighbours. On more than one occasion the lands of Usagara and Upoga have been ravaged by them. Like the Wagogo, they pluck and distend their ear lobes and like the Wabara, they stain their clothing with an ochraceous clay. Their huts are singular each consisting of a hemisphere of boughs roofed with a bull's hide, and so small that the legs of the occupant may be seen protruding beyond the entrance. Their weapons are broad-headed spears, long axes or two-edged daggers, and *wasas* or knob-knives, with double bulges in the wood as large as a man's fist to weight them in whirling through the air. They have no bows and arrows but use the *perce*, or large hide-shield which distinguishes the Caffres of the Cape.

WAIAPU a river New Zealand which takes its rise under Mount Kaurangi, in the E. peninsula of North Island or Lister and flows S. W. way through a sandy beach into the sea 6 m. S of East Cape. Draining a considerable extent of country, it assumes the appearance of a large stream at high water, but the fishes come down with such violence as to render it an unsafe anchorage even for the smallest vessels.

WAIKATO a river New Zealand, W. side of North

SCENE OF THE WAIKATO RIVER. - From House for Oceanic Frigate Marine.

Island or New Lister, prov. Auckland, rises in Lake Taupo, about the centre of the island, a fine expanse of water nearly 100 m. in circumference, and overtopped by the snow-capped mountain Tongarewa, 7000 ft. high and flowing S. W. until it reaches the parallel of its embouchure, when it turns westward to the sea. It is navigable for vessels of considerable

size. It is navigable for vessels of considerable

also for 80 or 70 m., where it is joined from the S. by the Waipa, up which boats can ascend for 60 m. further. At its outlet into the Waikato is a considerable stream. It does not form a bar, but has a narrow channel by which, at low-water, only vessels of about 80 tons can enter. Inside the headlands it is a stately river. The left or S. shore consists, for about 8 m. from the sea of shifting sand; the right shore is hilly and at the foot of the hills near the embouchure of the river, is, or was, the station of the Church Missionary Society, established in 1840. But the adjacent district, named from the river and remarkable for its grassy downs and pastoral and agricultural capabilities, has long been in a disturbed state from the war with the natives. But with the cessation of hostilities it is probable that the country will be re-occupied by the settlers, and its prosperity restored.

WAIMATE, a small bay, New Zealand, North Island or Ulster on the S. shore of the peninsula occupied by Mount Egmont. The bay forming only a slight indentation in a coast bordered by an unbroken line of cliffs, averaging 100 ft. in height, affords no shelter for vessels, and seaweeds collect only on account of the ebb-tide, pale situated at its N. extremity. This pale, formerly one of the strongholds of the natives and the scene of many a sanguinary struggle, occupies an almost impregnable position. Being joined to the mainland only by two narrow shingle spits it is nearly insulated. On the outer side it is a perpendicular cliff, 100 ft. high while on the land side there is a natural ditch with apparently deep water in it. The summit, which does not cover more than 100 square yards, is covered with pits for the reception of provisions as well as for shelter.

WAIMEA, a river New Zealand, which rises among the mountains in the N. of the Middle Island or Munster flows N. and enters the head of Blind Bay by three channels. The easternmost of these, aided by the waters from Nelson Haven, has hollowed out a deep space, known by the name of Bolton Hole where there is good and sheltered anchorage in 6 and 7 fathoms. The central and western channels, situated respectively 2½ and 6½ m. W. of Nelson, are both navigable for coasters. Above N. beyond the W. channel the coast, previously low rises into bold white cliffs, which in some places rise to the height of 250 ft., and are seen far off at sea.

WAITANGI the name of two rivers, New Zealand — 1 Waitangi, in the N. of North Island, has its mouth in the Bay of Islands. It can be entered and ascended for a short distance by small vessels having never less than 5 ft. water at the entrance and 12 ft. inside. — 2 Waitangi Middle Island, fed by the numerous lakes and mountain ranges of the interior becomes a considerable stream, and flows first S. and then E. forming the natural boundary between the settlements of Canterbury and Otago. In spring and summer the melting of the snow makes its current so rapid that it is unsafe even for boats to enter it.

WAITERA, a river New Zealand, which has its mouth on the W. coast of the North Island, 8 m. N.E. New Plymouth. At low springs it has not more than 2 ft. of water on its bar but the tide ranges 12 ft. It is thus rendered navigable by coasters, and is often visited in both directions and for trade with the natives, who have a village situated a quarter of a mile within the entrance, where there is good anchorage in 3 and 4 fathoms.

WAITENZKEHOREN is a Prussian empire, Upper Austria, circles Hausruck, 20 m. W. Linz. It has a town hospital, an endowment for the poor and in the vicinity an old castle situated on a lake. Pop. 1000.

WAKHUTI, a tribe, E. Africa, so called from inhabiting especially the province of Khaz, which bounds on the E. with Loamra. They are not, however, confined to it, but spread over a territory which extends from the Ngila W. to the Mountains of Umanza, and from the Dutham Hills N. to the Kafia. They are originally settled to the Wazemba, wearing the pointed beards and cowrie shells, but are inferior to them physically and mentally. Their colour is exceedingly dark; their eyes are blood-red and red with intercession; their hair, if not curly, is indifferent in quality, consisting chiefly of hollow perilla without gloss and of smallish; and they bear many marks of degradation, the effect partly of humid heat and sunburn, and partly of the bondage in which they are held by tyrannical rulers. Their usual dwellings are low circular huts, from 12 to 15 ft. in diameter,

and the straggling villages formed by them are elevated and dirty. Many of the Wakhuti occupy fixed establishments as porters, but because no natives of the country have been now disposed to trust them. They are everywhere to be met, not only in the Wazemba, and known to the latter, who are kept in a state of fearful servitude, but also in the territory of the interior where as soon as they enter Khaz.

WAKIMBU, a tribe, E. Africa, who claim a noble origin and according to their own account, emigrated into Unyanyemba about thirty-five years ago accompanied by their neighbours the Wakhonga and the Wamli. Their previous settlements were in Nguru, Umanza and Umanza, which they were obliged to abandon in consequence of the constant attacks of the Wazemba. They settled first at Kipini, a beautiful bay of the Tura, and have since extended into Ngunda, Mungu and Unyanyemba where they hold the land by inheritance from the Wazemba. They are apparently now being generally clad in skins, but they build firmly stockaded villages, grow sorghum, maize, millet, peas, cucumbers, and water-melons, rear cattle, and have slaves, and carry in small quantities, either through the merchants or by personal visits to the coast. In features they are dark and uncouth and have for their distinctive mark a number of small lines formed between the hair of the temples and the eyebrows, by raising the skin with a needle and opening it by means laterally. Some wear necklaces of curiously plaited straw, others a strip of white cow-hide bound around the brow. Their arms are bows and arrows, spears, and knives scabbard in their leathern waistbands. Their neighbours accuse them of being treacherous.

WAKKALA, a vil E. Africa, Latoka country near the Kamusi River, 60 m. S.E. Gondokoro. The village or town, in a fine forest of large timber, is composed of about 700 houses, strongly protected by a palisade of the hard iron-wood of the country with the addition of a hedge of iron-wood trees growing to a height of 20 ft. The entrance is a curious gateway 10 ft. deep, formed of the iron-wood palisades with a sharp turn to the right and left, making a zigzag. The inhabitants, governed by an independent chief, are great hunters, and the neighbourhood abounds with elephants, giraffes, buffaloes, rhinoceroses, and large antelopes. The soil is rich with abundance of fine grass and good pasturage, and a plentiful supply of water.

WALATA, or DUKU a tn. W. Africa, situated at the N.E. extremity of the district of El Hulla, and at the foot of a range of hills overlooking a large valley, 250 m. W.N.W. Timbuktoo lat. 18° N., lon. 7° W. It is a large place, consisting of wall-built clay houses, with a rough coat of plaster, but is extremely unhealthy and owing to this and other causes has become a seat of poverty and wretchedness. The inhabitants include a mixture of blacks and whites, the latter Barbers and Arabs of various tribes, and the former belonging to the widely scattered nation of the Fula, and of the Awar. About a mile W. of Walata are the ruins of an ancient place, supposed to have been identified with the celebrated capital of the Ghana empire. In Walata itself there is a spacious mosque of high antiquity.

WALISH, or WALFING (add), a bay on the N.W. coast of Africa, lat. 22° 50' S., lon. 14° 50' W. It is a small and extremely shallow, being protected on three sides by a sandy shore, and exposed only to the N. and N.W. winds, which here blow seldom. Large ships find good anchorage under the lee of a sandy peninsula, terminating in St. Pelagos Point, and smaller craft ride safely under the lee of the shops. The great disadvantage of the bay is that it is destitute of fresh water, and is brought from a distance of 8 m. inland. Walish Bay was in reputation, Walish Bay was much renowned for its provisions by the ships engaged in that trade, and a large establishment, erected for salting and curing them, and also providing fire outfit, found full employment in supplying the ships, and also, in exchanging a contract with the British government, for sending live cattle to St. Helena. Both branches of trade, having ceased, the establishment was broken up, but the houses and stores, which were left standing, have since been occupied by merchants of Cape Town. The bay is stony, with fish, and at certain seasons is much frequented by smaller species of whale known by the name of *Stenopterus*.

both the fish and the oil obtained from the whales promises to be a valuable source. It is situated on the coast of the British colony of Alaska. It affords an easy communication with the interior and was used with success for that purpose by the late Sir John Anderson.

WALLAGAH, a small settlement in Polynesia, Pacific Ocean, 14° 10' S, 149° 10' W; discovered by Captain Walker in 1816. It has also been named Low Woody Island, an appellation which graphically indicates its natural characteristics.

WALLACE, a vil British America, Nova Scotia, on the N coast, at the mouth of the Penobscot which falls into a bay, and forms a small harbor. It is a prettily situated but straggling place, in which the only conspicuous object is the St. John's church. Its harbor, having 16 ft of water on the bar at the ebb of ordinary spring-tides, and then rising 3 ft admits vessels of large draught and was much frequented by timber ships, till the supply failed. The inhabitants have compensated for the decline of this trade by turning their attention to agriculture.

WALLAGHABAD a town and cantonment, India, present and 80 miles W. Mysore dist. Channarayana, near bank, Palar. The town consists chiefly of one street, running E. and W., and both from its vicinity to the river and a nullah which intersects it, is well drained and tolerably clean, airy and dry. The cantonment, situated about half a mile N.W. of the town occupies a piece of ground rising gently above the surrounding plain, and is about three-quarters of a mile long by half a mile broad. Rice is grown to some extent in the vicinity.

WALM, a town, Austrian empire, duchy Bukovina, dist. and about 50 m. S.W. Czernowitz, with 3843 inhabitants, who are chiefly employed in the surrounding forests. In the vicinity is a pillar commemorating the victory of the Moldavians over the Turks.

WAN, or **WAM HIEH**, a town, China, prov. Szechuen, 1 bank Yangtze-kiang about 110 m. above Quanshow. It is a small place surrounded by a wall and contains an apparently industrious and thriving population. Its shops are well stocked, and expose for sale, among other articles, coal, sulphur, sugar cane, and blue cotton prints. The hills in the vicinity are well wooded, and produce good crops of rice, wheat, barley, beans, tobacco, cotton, tobacco, &c. Between Quanshow and Wan the breadth of the river is nowhere less than 100 yards, but it is encumbered by reefs, which however generally leave a clear channel of considerable depth. The rapids are not so impetuous as below Quanshow.

WANDALA, a mountain range, Western Africa, which commencing in the E. of Bornou, near its S. frontier stretches S.W. along the N.W. frontier of Adama, and is succeeded by a number of isolated mountain masses, with which it does not seem to be connected. Mager, its culminating point, has an estimated height of 3000 ft., which is probably 500 ft. more than the average of the range. The isolated mountains beyond are much loftier, one of them, Minied, being not less than 6000 ft.

WANGANUI a town, New Zealand, New Ulster prov. Wellington, on a river of same name, about 2 m. above its mouth on the W. coast. It is a military port, a leading music station, and being accessible to vessels of 100 to 200 tons, is the center of a large and flourishing native trade. A small steamer belonging to the police regularly to Wellington and Nelson, and every other inhabitants who already number about 1000, come to the coast with Sydney and Melbourne.

WANGARUA, a river, New Zealand, which rises in the mountainous district of the N. Island from N. to E., flows S. and then E. to the coast, towards its E. entrance, 4 m. below the mouth of the Patea; lat. (N. head) 39° 57' 20" S. lat. 175° 1' E. It has 8 ft. over its bar at low water, and is entered by vessels of 10 to 12 ft. draught, which can ascend as far as Price, but most of the coasting trade is carried by vessels of about 25 tons burden. The entrance should not be attempted except in fine weather with a landing wind.

WANGGARI, a river, New Zealand, which has its mouth in the bay of the same name by the N.E. of the North Island, 3 m. S. of the entrance to the Gulf of Hauraki. The river is at its entrance, between Lost Point on the E. and a point of Mars Bank on the W., is 1/2 m. wide, but immediately opens out to a width of 2 m. Much of this width, however, is laid dry, New Zeal. Gaz.—Vol. II.

or nearly so at low-water, and the real channel is diminished to 3 m. The shore on the S. is low and swampy, but on the N. it is fringed by hills of considerable height. Within Wangari Bay there is a large harbour with good anchorage.

WANGARUA, a bay and harbour, New Zealand, on the W. of North Island or Ulster. It has high and steep shores on either side, is well sheltered by Stephenson Island is entered by a narrow channel, and has in its main branch an average width of about 1/2 m. with a depth of more than 3 m. On the E. side are three bays, every one of which affords good anchorage.

WASHINGTON a town U. States Iowa cap. of same name in a prairie 40 m. W. S.W. Muscatine, with which it is connected by a branch of the Mississippi and Missouri railway. It contains nine churches, a bank, a steam mill machine shops, and several manufactures and is surrounded by a rich agricultural district. Pop. (1855), 8000.

WASIN, a small coraline is. about 24 m. long by 1 m. broad off the E. coast of Africa S. of Mombasa, and N. of Zanzibar, to the latter of which it belongs. The only settlement is built upon the N. shore, and consists of stone and lime mosques, long rooms with flat roofs, and a few small houses of mangrove timber scattered among palm trees. There are some 4000 people, some of them 40 and 45 ft. in girth give a pleasant air to an otherwise squalid settlement. The inhabitants suffer severely from fevers, scurvy, and small pox.

WASKULFZ, a town, Austrian empire, duchy Bukovina, dist. and W. N. W. Czernowitz, on the Osnabromer, with a paper-mill and a pop. of 8696.

WATERLOO the name of four places, British America, Canada West. The most important are 1. A vil. on Ottawa, 80 m. W. Montreal, with a R. Catholic church, a school, and a steam saw-mill.—2. A vil. cap. of same name, within 1 m. of a station of the Grand Trunk railway 61 m. W. S.W. Toronto. It is a flourishing place, inhabited almost exclusively by Germans who have their own Lutheran church and vernacular newspaper, cabinet and chair, carriage shop, billiard and door factories, a brewery, a tannery, an iron-foundry, and a grist and steam saw mills. Pop. about 1500.

WATKINS, or **JAY'S BROOK**, a vil. U. States New York, at the S. of Seneca Lake and on the Cayuga and Elmira railway 31 m. E. Elmira. It contains five churches and two banks, and steamboats ply between it and Geneva. A large quantity of coal is shipped here. Pop. 8000.

WATLING, an is. West Indies, Bahamas 50 m. E. San Salvador, or Cat Island about lat 28° 57' N. lon. 74° 28' W. It is about 12 m. long from N. to S. by 6 to 7 m. broad and has slightly indented shores, with an interior largely cut up by salt-water lagoons which are separated from each other by small woody hills from 100 to 140 ft. high. It is, however, considered the most fertile of the Bahamas and raises the best breed of sheep. The E. shore is fringed with a reef and the only safe anchorage is at the N. and the inhabitants, 450 in number, are scattered over the island. Captain A. B. Becher in an article in vol. xvi. of the *Journal of the R. G. S.*, has endeavored to prove that not San Salvador as Humboldt and Washington Irving maintain, but Watling is what is called the landfall of Columbus, or the first land which he reached on his first voyage across the Atlantic.

WAZERABAD, a town, India, Punjab about 3 m. from 1 bank Church, 60 m. by W. Lahore. It stands in a fertile district commanding beautiful views of the Himalayas, and is described as one of the handsomest towns in India. Arvin, a European officer in Rungt Singh's service, having rebuilt it in the European style with wide streets and an elegant and commodious bazar. Rungt Singh had a pleasure-ground here, and a palace of singular construction covered externally with red fresco full length figures of the ten Sikh Gurus.

WAZEGURA a tribe, E. Africa, occupying the land S. of the Pangani River to Cape Unwana, and extending as far W. as the Nguru Hills. They were originally a powerful tribe, but the possession of firearms has made them terrible to their neighbours whom they are constantly kidnapping for the slave-market. One of them, originally of low origin, having succeeded in conquering the Ukami, occupying a district which extends eastwards from the Duthum Hills has almost depopulated it to supply the slave-markets of Zanzibar.

and still carries on his depredations to such an extent that the security of the caravan route to Ungayemba is seriously endangered. The Wasagur, instead of owning hereditary subjects, obey the loudest tongue, the most open hand, and the sharpest spear; hence, in every quarter bloody feuds prevail.

WEICHSEL, a tn. Austrian empire, Silesia, 55 m. S.E. Troppau. It is a straggling place, situated among the Carpathian Mountains, at the source of the Weichsel or Vistula, whose head-streams uniting here, form a remarkable waterfall 180 ft. high. The place has a Protestant parish church, and contains 3417 inhabitants.

WEIDENAU, a tn. Austrian empire, Silesia, cap. dist. of same name, 40 m. N.W. Troppau, with manufactures of linen and hosiery and four yearly markets. Pop. 3000.

WEIES, a tn. Austrian empire, duchy Styria, cap. dist. and on a stream of same name, in a very romantic district 18 m. N.E. Graz. It has two churches, one very ancient, and the other with a fine high-altar an hospital manufactures of scythes and other articles in iron and a saw-mill. There are several old castles in the vicinity. Pop. 1300.

WEISENKIRCHEN, a tn. Austrian empire, Lower Austria circle Upper Marchburg, S. bank Danube, 48 m. W. N. Vienna. It contains 1040 inhabitants, employed chiefly in weaving and in growing wheat and fruit.

WEISSENSTEIN, a tn. Russian gov. Ekhtoria, cap. circle and on a stream of same name 53 m. N.E. Ryval. It stands among gardens, has a church, a school and an elementary school, and two benevolent endowments and contains 3637 inhabitants.

WELLAWAY, a river Ceylon which rises among the mountains to the E. of Adam's Peak, flows S.E. and reaches the sea on the S. shore of the island near Hambantota, after a course of 69 m. It drains an area of 763 sq. m.

WELLINGTON, the name of three places in British America, Canada West.—1. A vil. co. Prince Edward, on West Lake a bay of Lake Ontario 84 m. N.E. Toronto with a Protestant church a public school, an iron foundry a tannery saw-mills, and a fishery in the bay where great numbers of white fish are taken. Pop. about 600.—2. *Wellington Square*, a vil. co. Halifax, on Lake Erie 36 m. S.E. Toronto. It possesses Church of England and Wesleyan churches, a ladies' seminary, an iron foundry a pottery and a carriage factory. The surrounding country is celebrated for its wheat and cattle. Of the latter great numbers are sent to the eastern markets. Pop. about 750.—3. *Wellington Mines*, a vil. co. called from the copper mines in its vicinity. They are situated between Lakes Huron and Superior and belong to the Montreal Mining Company. Including that of the contiguous Bruce Mines, the produce is said to average 100 tons of copper ore monthly.

WELLINGTON, a prov. New Zealand, forming the S. portion of New Ulster bounded N.W. by Taranaki, N. by Auckland, and N.E. by Hawke's Bay prov., and washed in all other directions by the sea, has an extreme length from N. to S. of 200 m. an extreme breadth of 50 m. and a coast-line of about 300 m. It is bordered on its S. and W. coasts by two parallel ranges, enclosing an interior valley but almost precluding access to it by the dense forests with which they are clothed. Evidence of volcanic action are seen in many localities, and earthquakes, particularly in the direction of Cook's Strait, where Wellington, the capital, is situated, are not infrequent. The narrow belt interposed between the mountains and the shore particularly on the W., while it is the most accessible is also among the most fertile parts of the province, and on it accordingly most of its settlements have been formed. One of these, Manawatu, situated about 70 m. N. by E. Wellington, lies along the banks of a river of its name which is navigable for coasting craft. The most important, however is Wanganui situated about 50 m. farther N. Pop. 12,000 of whom 5000 are natives.

WELLINGTON cap. of above prov. standing at the entrance of Cook's Strait, midway between the N. and S. extremities of the two larger islands, occupies the most central position in New Zealand. The harbour named Port Nicholson, is a noble sea-lake 6 m. in length, surrounded by wooded hills and opening by a deep channel into the strait. The town stands in a fine situation at the western side of the lake, and displays a line of stores, shops, and substantial ware-

houses upon the margin of the water, with some important public buildings, and many private residences on the terraces above. Wooded slopes rise almost perpendicular from the harbour-lake, and the country for 20 m. around contains mainly of densely-wooded mountain ranges, and up gullies and ravines. The valley and thriving village about 6 m. from the town

along the shores of the harbour is the only agricultural one in connection with Wellington. Evidence of volcanic action still remains and two or three considerable shocks have been felt within the last twenty years, but have had no serious effect. Situated at the entrance of Cook's Strait, the town is often swept by heavy gales of wind which however, conduce to its healthiness. Enjoying important facilities for trade Wellington is making rapid progress; it is the centre of much commercial activity, and already contains 1000 inhabitants.

WEMBITSCHE, a tn. Austrian empire, Bohemia, circle and about 20 m. N.E. Olmütz, with a parish church, a mill and 1260 inhabitants.

WEQUAMIKOONG, a vil. British America, Canada West, on a deep bay of same name, near the N.E. extremity of Great Manitoulin Island. It is a missionary station of the Jesuits, and contains a large stone church. The inhabitants, about 600 Indians, are mostly emigrants from a village established E. Catholic mission on Lake Michigan.

WERDNIN, a tn. Austrian empire, Bohemia, circle and 13 m. S. Wetzlar, with a Baptist church, a mill, and 1000 inhabitants.

WERFFEN, a tn. Austrian empire, duchy and 25 m. S. by E. Salzburg, cap. dist. of same name, on the Salzach, with a Capuchin monastery and iron-works. In the vicinity is the old feudal castle of Hohenwerfen. Pop. 1000.

WEST FARNHAM, a vil. British America, Canada East, co. Mimiquoi, 37 m. S.E. Montreal. It is a thriving place, with Church of England, Wesleyan, and E. Catholic churches, an academy, manufactures of potash, mill-wheels, carriages, and woollens, and a number of saw-mills, employed in sawing lumber, which is drawn to St. John's, and thence exported to the States. Pop. about 700.

WESTFIELD, a *U. S.* town, New York 1 m. S. of Schoharie Harbor, on Lake Erie, and on the Lake Shore railway, 31 m. S.W. Buffalo. It has five churches, several mills and factories, sawmills, steam engines, and a number of other buildings.

WESTFIELD, a *U. S.* town, in British N. America, and on the Columbia River. It is about lat. 49° 15' N. and long. 120° 30' W. It is above its mouth and on the site of Fort Langley. The ground rises to the rear of it, and is covered with a forest of large pine-trees. It has a court-house, assay office, and several places of worship. It is the site of a bishop, and had a new cathedral, which was burned down in 1860.

WESTON, a *U. S.* village, British America, Canada West co. (see 60 m. S. of London, and on the Grand Trunk, as well as the Ontario, Simcoe, and Huron railways 40 m. N.E. Toronto. It possesses a Church of England, Wesleyan, and Baptist churches, manufactures of woollens, harness waggons, and machinery, an iron-foundry, a brewery and a distillery. The manufacture of lumber, once very large, now suffices only for local consumption. There is an extensive turf bog in the vicinity. Pop. about 800.

WEST WINDWARD, a *U. S.* village, Connecticut on the outlet of Long Lake 30 m. by railway N. Waterbury. It is adjacent to the coast, and contains several factories, large numbers of wharves are made here. Pop. 800.

WETTENDORF, a *U. S.* town, Austrian empire, Hungary co. Eisenburg 4 m. S. of Eisenburg in a fertile district, with an old castle and 1400 inhabitants, many of whom are gipsies.

WETTER, a *U. S.* town, in the Archipelago, Flores Sea, on the N. of Flores, towards its E. end, in lat. (N. point) 8° 5' E., lon. 125° 58' E. It is about 10 m. long by 30 m. broad, is mountainous towards the N., but has on the S. some open plains and valleys. The inhabitants, like those of Timor are an intermediate race between the Malay and the Negro, and in a very rude state. The only export of any consequence is bees wax. Pop. roughly estimated at 22,000.

WHALEFISH, a group of islands off the W. coast of Greenland to the S. of Disco Island and in the entrance of Disco Bay lat. (Boat Island) 68° 58' 42" N. lon. 53° 18' W. The two main islands are about 600 ft. high and afford good anchorage in the channel which separates them. On the S. island, called Xron Prins the Danes have an establishment, and carry on the seal fishery. Most of the persons employed are Esquimaux.

WHITE, or **WHAKARI**, an isl. New Zealand, in the Bay of Plenty 28 m. off the coast of North Island or Ulster lat. 37° 40' S., lon. 177° 12' E. It is an active volcano, about 24 m. in circuit and 860 ft. high. The base of the crater, 1 m. in circuit and level with the sea, has in its centre a boiling spring, which is about 100 ft. in diameter and sends volumes of steam fully 2000 ft. high in calm weather, and round its edges numerous small geysers, which sound like so many high-pressure engines, and emit steam with so much force that the steam thrown into the vortex would be immediately shot into the air. Looking down the crater the appearance is that of a well drained meadow of gorgeous green, with meandering streams feeding the boiling caldron below. On examination this green is found to be the purest crystallized sulphur. The whole island is so heated that it is difficult to walk upon it, and natural life may be said to be extinct, scarcely a lizard being found on the slopes. White Island is the N. point of an extensive belt of subterranean agitation stretching from Mount Egmont through Tongareva, and the Taranaki and Whararua Lakes to White Island or Mount Hiri.

WHITE MOUNTAIN RIVER, British America, rises in a swampy bog, about lat. 50° 20' N., lon. 99° 30' W. and flowing very directly, first N.E. and then E., enters Lake Manitoba at its S.W. extremity. It drains an extensive area of the richest fertile land, is well timbered on its banks with oak, elm, ash, maple, spruce, and balsam poplar, possesses valuable fisheries, and is navigated by canoes for 80 m. above its mouth.

WHITESUNDAY, an isl. off the N.E. coast of Australia, 11 m. long, 11 m. wide, and near its S. and E. end, is a low, sandy, desolate island, with a few small trees. Its culminating point is 1504 ft. above the sea.

WHYDAH, a *U. S.* town, (native *Gro-lan* or *Gro-lan*, 'plantation house') a *U. S.* town, Africa, Dahomey. It stands about 2 m. N. of the sea, from which it is separated by a narrow lagoon, a swamp and a lofty sand-bank, and extends 1 m. from S.E. to N.W., and is about 1/2 m. broad. The streets are formed by the walls of compounds and blocks of houses built uniformly of sun dried clay in three or four courses, from 1 1/2 ft. to 2 ft. thick and thatched with palm-leaves or grass. The outside sun is crumbly, but inside the houses are often convenient and comfortable. The houses are scattered, and the place generally has a ruinous appearance, everything showing decay, the slave-trade, upon which its prosperity depended being suppressed by the strict blockade of the seaboard. Whydah is really a group of villages divided into five quarters, each under the rule of a *scheyee*, subject to the headship of the *vooyey*. Though filthy it is not a very unhealthy place there being a strong day-breeze, and the nights cool the highest part, the W. and is about 40 ft. above sea-level. The soil is argillaceous clay and sand. There are four forts, or rather factories French, Brazilian, English, and Portuguese. The great market covers a large space. The approach to the town from the sea is by three roads the right leading to the Portuguese fort, the left to the French and the middle one to the market and the English fort. There is an excellent local police, and quite a good order prevails, crimes of serious violence or theft are rare, but pilfering is universal. In February 1864, three fires, on successive days destroyed a great part of the town, with a serious loss of life. The native inhabitants are snake-worshippers, venerating a non-venomous python called *deahybe*. The population is estimated variously from 12,000 to 25,000, the former probably being more nearly correct. There are 600 R. Catholics among them 200 boys under missionary teaching, and about 110 annually baptised. — (Barrow).

WIOHALA, a *U. S.* town, American empire, circle and about 23 m. N. of Gatcha with 1100 inhabitants employed chiefly in spinning, weaving and the culture of flax.

WIKLIE-OCZY, a *U. S.* town, Austrian empire, Galicia, circle and 24 m. N.E. Presmyl, with a Dominican monastery and 1500 inhabitants.

WIKPEZ, a *U. S.* town, Austrian empire, Galicia, circle and 39 m. S.W. Grosow on a stream of same name, with 2500 inhabitants, most of whom are employed in weaving drills and table-cloths.

WIEROWAN, a *U. S.* town, Austrian empire, Moravia, circle and about 7 m. S. Olmitz with a mineral spring and 1000 inhabitants.

WIKERZOWIEC, a *U. S.* town, Austrian empire, Galicia, circle and 10 m. S. by E. Kolomea with a fine baronial castle, containing a valuable library and picture-gallery. The manufactures consist of cloth and morocco leather. Pop. 1200.

WIESEN, a *U. S.* town, Austrian empire, Bohemia, circle and 38 m. N.E. Kilmgratz, on the frontiers of Silesia, with 1100 inhabitants, who are mostly employed in weaving and spinning. For the latter there is a model spinning school.

WIKEMATH, a *U. S.* town, Austrian empire, Lower Austria, 40 m. S. Vienna with manufactures of linen, several mills, and 1400 inhabitants.

WIGSTADTL, a *U. S.* town, Austrian empire, Silesia, cap. dist. of same name, 12 m. S.W. Troppau with manufactures of linen and cotton goods, and important cattle-markets. The old feudal castle of Wigstau is in the vicinity. Pop. 2636.

WILDSCHITZ, a *U. S.* town, Austrian empire, Silesia, dist. Sauerbrunn 46 m. N.W. Troppau, with a castle an hospital, and 2100 inhabitants.

WILDBSTEIN, a *U. S.* town, Austrian empire, Bohemia, circle and 10 m. N. Eger, cap. dist. of same name, with a parish church, a castle, manufactures of calico, two cotton and five other mills. Pop. 6786.

WILLIAM, a port, New Zealand in Forrester Strait, on the N.E. of the South Island or Stewart, and nearly opposite to Bluff Harbour in Middle Island. The coast about Bluff Harbour, Ruapuka Island, and the rocks and shoals between it and Peterhead's Inlet shelter it from easterly winds, and it is also so effectively protected from the swell rolling round both ends of the island that it becomes a perfect secure haven. The schooners engaged in whaling and sealing make it their head-quarters.

WILTEN, a *U. S.* town, Austrian empire, Tyrol, on the

hill, circle and S. of Innsbruck. It occupies the site of the Roman town of Vindobona, and has among its principal buildings a Franciscan abbey, a beautiful endowed and a parish church, the latter with fine paintings, a Carmelite monastery, and the station of the Innsbruck and Kufstein railway S. W. from this town, on the road to Italy, is Mount Loel, remarkable as the scene of three victories gained in 1809 by the Tyrolese under Moller and Himpfinger. Pop. 1000.

WINDIG-JENIKAU a tn. Austrian empire, Bohemia, circle Gams, with a demerit church, a mill and 1000 inhabitants.

WINDISCHGARTEN a tn. Austrian empire, Upper Austria, circle Traun on the Telsch 20 m. S. Steyer has a central institute for the poor, an endowed school, manufactures of articles, and much-frequented sulphur baths. Pop. 1200.

WINDISCHGRATZ a tn. Austrian empire, duchy Styria, cap. dist. of same name, on the Murelinsch 44 m. S. N. W. Gratz; with a very ancient parish church, a high school, an hospital, a theatre, and 1200 inhabitants.

WINNIPEG [add.] the largest of a chain of lakes which form one of the features of the features of British America as follows:—length, 230 m., greatest breadth, 57 m., length of coast line, 530 m., area of water 8500 sq. m., area of basin 400 000 sq. m., height above the sea, 428 ft., or only 28 ft. more than Lake Superior. The coast line is very much diversified, presenting at one time low swampy beaches and at another rugged promontories and bold promontories. Towards the N. W. the coast is very low and much broken by deep and narrow bays, but in proceeding southward beyond the mouth of the Saskatchewan, the great headland of Kitchi canis comes into view stretching so far into the lake that its extreme point is 23 E. of the point of coast line. For some distance S. of Kitchi canis the shore continues comparatively high and abrupt, presenting a series of limestone ridges, generally wooded with aspen and other deciduous trees, with intervening swamps timbered with tamarack and spruce. The S. coast consists for many miles of alternate strips of sand containing willows, and narrow reedy marshes running parallel to the coast line. Some of these sand strips, well protected by drift-lands, are evidence of considerable age; others of them are recent, enclosing ponds in which muds are just beginning to show themselves, and furnishing a clear indication of the process by which the land is making its conquests on the water, and gradually diminishing its area. The E. coast consists generally of a succession of knolls or low domes of granite and gneiss, rising generally 8 to 10 ft. above the water and having on their flanks a scrubby growth of timber, chiefly Saskatoon pine and spruce. Between the knolls ponds and swamps often occur, and the whole line of coast is much broken by deep inlets and well sheltered bays, which should the lake come to be navigated, may be termed a good account. The great features of the lake are the Saskatchewan, which enters it on the N. W., the Dauphin or Little Saskatchewan on the W., and the Red River and Assiniboia on the E. Its only outlet is through the contracted and rocky channel of the Nelson, which flows N. E. to Hudson's Bay. The finest scenery of the lake is furnished not so much by its shores and the adjacent mainland, as by some of the many islands which it contains. Of these the two largest and most important, both situated in the E. portion of the lake, are Big Bear Island, by far the largest of all, and Dow Island, the latter particularly deserving of notice, both for its beauty and its valuable fishery where sturgeon and great numbers of white fish are taken. Lake Winnipeg freezes every winter, the ice frequently becoming 5 ft. thick, and not leaving the upper end of the lake before the 10th of June.

WINNIFEG [add.] a river in British America, flowing through several lakes in the river of the Hudson's Bay, down at first by a series of bays, and then into a mighty river, which is the source of the navigation by means of the Hudson's Bay Company, and is a N. W. direction, it descends 240 ft. by a series of magnificent cascades, bounded by precipitous cliffs or rounded hills of granite, and not infrequently expands into large deep lakes full of islands. At each extremity of the river the Hudson's Bay Company have a station, the one at the outlet, called Rat Portage, and the other at the mouth, Fort Alexander. Both are finely situated, but more especially the former which stands on an island surrounded by hills about 300 ft. high, and near it are some tall red and white pine trees remains of an ancient forest. On the left bank of the river, 25 m. below Rat Portage, stands Selkirk Mission, in connection with the Church of England. It was held for several years by the R. Catholics who were driven away by the Indians in consequence of the death of a young priest in the mission at Red River settlement. Besides the mission-house and a school-house, which is used as a church, five other houses have been built, and some progress has been made as the congregation composed almost entirely of Swampy Cree Indians, numbers 45. The country around Selkirk being like most of that through which the Winnipeg flows wholly granitic, has a dreary look, but the Mission itself is a favoured spot, its domain extending over 250 acres of a fertile clay on which all kinds of farm and garden crops succeed well. The Winnipeg opposite to Selkirk is about 250 yards wide, and flows past with a rapid current.

WINNIFEGO-SIS or **LITTLE WINNIFEG** [add.] a lake, British America, about 50 m. W. of Lake Winnipeg, in which it is not only nearly parallel, but bears through a diamond-shaped scale a marked resemblance in shape. Greatest length 110 m., greatest breadth about 25 m. The shores of the lake are low and swampy particularly towards the E. where the whole tract which intervenes between it and Lake Winnipeg is of the same character. The monotonous features of the lake are occasionally exchanged for others of a more pleasing description particularly towards the S., where some fine old cimes, crooked and gnarled are seen, and where Saskatoon Island, one of the many which is a chain, presents some very interesting rocky exposures of a limestone which is highly fossiliferous, beautifully stratified, very hard and bituminous. Winnipeg as received two important features—the Swan, which enters it on the W., through a lake of same name; and the Red Deer which enters it on the N. W. Both of these rivers open communication to an important tract of country E. and N. E. of the head-waters of the Assiniboia, and discharges itself into the Manitoba through the Water Hen River which is very broad, shallow, and ready on a rock of land which projects from the S. shore of the lake towards the N., salt works have long been established and are still carried on with some spirit, though the competition with British salt has so much lowered the price as almost to annihilate the profit. The mine bed which must be of large extent, since it is found far to the N. W., and is worked by the Hudson's Bay Company on the Swan River, is a very extensive yellowish-white clay, containing both nodules of flint and limestone boulders. The salt is obtained in the form of brine, by sinking wells in the clay where the small bubbling spring is observed to issue from N. W. openings, is so strong that thirty gallons of it, when evaporated, produce a bushel of salt.

WINONA a tn. U. States, Wisconsin, cap. dist. of same name, on bank Mississippi, 44 m. E. of St. Paul. It contains a courthouse, eight churches, three banks, a steam saw-mill, &c., and is the E. terminus of the Winona and St. Peter's railway. Wheat and other grains are shipped here, and timber and limestone abound in the county. Pop. (1860), about 5000.

WINTERBERG, a tn. Austrian empire, circle and 24 m. S. W. Paster, in a valley on the Mollnabach; with a parish church, a castle, a town house, a brewery, and manufactures of leather, paper, and spirits. The town is small, and still some remains of its old walls and other antiquities. Near it are glassworks and smelting furnaces. Pop. 2500.

WOADI, or **WODI**, a town in the Africa, Nubia, prov. of the Nile, at the confluence of the Nile, 1,000 m. S. E. Khartoum. It is a large place, composed chiefly of mud-brick houses, with many small shops and a few large ones. The principal buildings are a mosque and a school. There is a market, the residence of the commander of the barracks. In front of the fort, and on the banks of the river, is a large open place, recently planted with date palms, figs and other fruit trees.

WODINA, a market village, Turkey in Europe, at the foot of Mount Rhodope in Roumelia, not far from Philippopolis. It occupies a beautiful and salubrious site, contains 1,000 inhabitants, who are mostly Greek Christians and possesses an educational establishment attended by about one hundred pupils.

WODNIAN (add.), a town in the Austrian empire, Bohemia, circle and 12 m. S. E. of the bank Blatitz. It is an ancient place partly surrounded by walls and a deep ditch, is the seat of several public offices, and has two churches, a synagogue, a superior and ordinary school, a hospital, military barracks, and four important yearly markets chiefly for horses and cattle. Pop. 8990.

WOJNITOW, a town in the Austrian empire, Galicia, circle and 32 m. E. N. E. of the city, with 1780 inhabitants chiefly employed in making earthenware.

WOLCZYNIC, a town in the Austrian empire, Galicia, circle and 2 m. N. E. of the city, with a gypsum mill and 1000 inhabitants.

WOLFSBURG, a town in the Austrian empire, Bohemia, circle and 22 m. N. E. of the city, with a parish church, two mills and 2403 inhabitants.

WOLFGANG (St.), a town in the Austrian empire, Upper Austria, circle, Hausruck, on the lake of same name, on the frontiers of the duchy of Styria, 18 m. E. S. E. of the city of Salzburg. It possesses a large and ancient Gothic church with a beautiful high altar which dates from 1481 fine paintings and carvings, and has some industrial establishments. Pop. 800.

WOLKOVSK, a town in the Russian empire, 40 m. S. E. of Grodno, cap. circle and on a river of same name. It has two churches, a secular parish school two charitable institutions, several factories, and contains 3416 inhabitants. An important annual fair is held within the circle at the village of Belska.

WOLFIN, a town in the Austrian empire, Moravia, circle and about 10 m. S. E. of the city. It was once the seat of a Benedictine abbey, has an old church and manufactures of linen, and contains 1500 inhabitants.

WOLZOWITZ, a town in the Austrian empire, duchy Bukovina, circle, and S. W. of the city, with a very ancient church, containing the remains of Prince Drago, the founder of the Moldavia state.

WONG-CHANG, or **WONG-CHANG**, a departmental city capital of the province of Chefoo, China, lat. 30° 11' N. lon. 115° 46' E. It is situated on the bank of the Yang-tse-kiang, facing Hangchow.

It is divided by a ridge of hills trending S. E. from north which a tunnel is cut to facilitate the communication between the E. and W. quarters, the former containing the greatest number of shops, dwellings, and public buildings. The main streets are wider than usually exist in Chinese cities, and have paved foot-paths, the shops are spacious and well stocked with merchandise and produce and the government offices are extensive and built in the best style of native architecture. It is surrounded by a consolidated wall 20 ft. high, about 7 m. in circuit, with nine gates entering by the land, and one by the river. The latter entrance is in the middle of a fortified rampart washed by the stream, about a quarter of a mile in width and from 25 to 50 ft. in height, constructed of solid masonry, at a cost of half a million

sterling, after the Imperialists re-captured the city from the Taipings in 1869. The view from the hills that intersect the city is unequalled in the whole empire, as it commands the prospect of Hangchow and Hangyang on the opposite bank, together with the confluence of the Han and the Yang-tse, both streams crowded at all times and seasons with junks, and where the foreign steamers and sailing vessels lie at anchor. Looking within the precincts of the walls from these

WONG-CHANG.—From Oliphant's China and Japan.

heights, an immense area is seen covered with the quaint towered roofs of the houses, here and there diversified by the more elevated roofs of temples, pagodas, pavilions or official palaces all more or less surrounded by trees and gardens. On the hill facing the river stands a group of newly built edifices, profusely ornamented with floral and gilded carvings of Chinese design, with a battery of foreign ordnance commanding the approaches by land and water. Woe-cheng is the residence of the provincial governor of Hoo pei, also the foo, or intendant of the department, who has jurisdiction over ten districts, including one city of the second order and nine of the third. It is a place of much repute for its educational establishments with a hall of examination capable of accommodating 7000 students during the triennial competitions for degrees admitting to the Hsueh College at Peking. A large contingent of Chinese troops are quartered within the gates of the city, which are closed at night, and guarded by sentinels. In time of war or rebellion immense numbers of the inhabitants from the adjacent towns flock into Woe-chang for protection, when a dense population throngs the streets and open places. At such times the people may number 1,500,000, or as some authorities state, 2,000,000, but in time of peace the settled inhabitants do not exceed 800,000, including the garrison. Being the most central spot in China, it has communication with all parts of the empire, forming in conjunction with Hangchow and Hangyang a vast emporium of native and foreign commerce; but it is not opened as a place of trade or residence for foreigners, although they may freely visit the city under protection of the authorities. (Mossman, M.S. Notes.)

WOOD, a small island, British America, off the coast of Labrador, in the Strait of Belle Isle, about 7 m. W. of Port au Port. It is 1½ m. long, by 1 m. wide at its S. E. where broadest, is composed of sandstone much less elevated than the mainland and is covered with moss and coarse grass, the woods to which it owed its name having been all cut down by the fishermen who are in consequence obliged to go to Newfoundland for their stages etc. It possesses two large fishing establishments belonging to Jersey merchants, who, in addition to that of cod, which forms the staple, carry on both the seal and the herring fishery. The fishing vessels

arrive from home in the beginning of June, and often are many days drifting about in the ice before they reach their home. They all return to Europe in the fall of the year having only a son or two in charge of each post, with numerous dogs, mostly of the Esquimaux crossed with the Newfoundland breed, which draw their sledges with firewood, or go over to the male and hunt bears, foxes, deer &c. The climate is very severe, and also uncertain.

WOO-HOO, a town, China, prov. Nanchang, near Yangtze-kiang, about 60 m. above Nankin. It consists of the town proper, situated about 1½ m. inland, and a suburb extending some distance along the margin of the river. The town is surrounded by white walls, and the suburb is not only also surrounded by a wall, but forms a military post defended by three forts erected on opposite eminences. The town, capital of a district of same name, is said to have been one of the largest of its class in China, with many good streets and handsome shops. During the Taiping rebellion it was one of the headquarters of the rebels, who have left little of it standing except the wall and a part of the two principal streets, each extending about ½ m. inside the gates, and nearly as far outside. Since its suppression in 1864 the inhabitants have been returning and the authorities are restoring the public buildings, but it will be a long time before the place resumes its former prosperity.

WOO-SUNG, or **WU-SUNG** [add]. Since the opening of Shanghai to foreign commerce, Woo-sung has risen into importance from its situation at the mouth of the Whang-poo, 13 m. by water and 8 m. by land from the British settlement. At the entrance to that inlet from the sea a bar stretches across the channel above Woo-sung over which ships of large tonnage cannot pass except at high-water or spring tides. Hence the anchorage at this place is always crowded with shipping waiting to cross the bar which, if heavily laden, they cannot accomplish for some days, or even weeks. This drawback to the navigation of the channel in Shanghai places Woo-sung in a favorable position to become the natural export of that exportation, with a railway 8 m. long across a level country. From the immense quantity of sediment deposited by the stream, the water across the bar is becoming shallower and the channel narrower, while an island has been formed near Woo-sung several acres in extent, since foreigners visited the port. On a rampart flanking the anchorage are the remains of a battery which mounted one hundred guns and was captured by Admiral Parker in the expedition under the High Gough in June, 1862. Vessels upward-bound are piloted up to the roadstead by a staff of foreign pilots and they are boarded by the officers of the harbor-master's department and maritime customs. These are the only foreign residents at Woo-sung; while the native village from whence it derives its name, is a small place, inhabited by a sea-faring population. (Morse, *M.S. Notes*.)

WOITIZ, a town, Austria empire Bohemia, circle Tabor, cap. dist. of same name, 30 m. S S E. Prague. It has a

parish church, a synagogue, a Franciscan monastery, a townhouse, a brewery, and two mills. Pop. 2244.

WU-CHU, a town, China, prov. Kiangsu, at the junction of the Yangtze and the Kwei-chow rivers, with the Yangtze. It is the most important commercial port of the province, being the entrepot for all the goods of the Yangtze valley, and is chiefly of wood, rice, sugar, oil, silk, and cotton. It is also a manufacturing town from Canton. The city was explored by a British squadron of gunboats in 1860 for up to Wu-chu, and found to be there nearly navigable for junks, though its clear channel was between 500 and 600 yards wide. The trade of Wu-chu, and of the Si-king generally was almost destroyed by the civil war, but it is now recovering.

WUKARI, a town, Central Africa, cap. prov. Kano, on a branch of the Benue, about 10 m. from its S. or L. bank, and 300 m. S S W Kano. According to native information it is a very large place, about 15 m. in extent, and densely inhabited to the very walls. Its government is an absolute despotism. All the handicrafts are under the immediate control of the king, who permits none but his own people to exercise them. He also monopolizes the foreign trade. The chief manufacture is cotton cloth, said to be of a peculiar kind of cotton. There seems also to be much kind of indigenous coffee. Yams are much cultivated.

WUNGABEJEWUNG a village, British Columbia, Canada West, on the Great Mainland Island. It is a missionary station of the Church of England, and as yet only in embryo. The Indian inhabitants, about seventy formerly dwelt at Mahmoteahung 25 m. distant. They live partly by agriculture, but chiefly by furnishing firewood to the steamers plying between Collingwood and Saint John's.

WUNZEN LAKE the most celebrated of the five active volcanoes now existing in Kinai, the most southern and westerly of the sites of Japan. It is situated in prov. Fum near the N W extremity of the island and has had repeated eruptions in modern times. In one of these, which destroyed the city of Numa-Bura, 35,000 persons are said to have perished. In 1793 the summit of the mountain sank entirely down, and torrents of boiling water issued from the deep cavity thus formed.

WUSHEK, a town, Central Africa, Bornu, prov. Maroubo on the S. Tawarak frontier 178 m. N E Kano. It stands at the foot of a mountain range among groves of date and tamarind trees, fields of wheat, cotton grounds, and kitchen gardens, and consists of four distinct groups of buildings within a light fence, embracing a circuit of about 3 m., and containing a pop. of about 8000. Wushek is the principal place for the cultivation of wheat in W. Bornu, and has an important weekly market.

WYANDOT, a town, U. States, Kansas, cap. co. of same name, on W bank Missouri, just above the mouth of Kansas River and 2 m. above Kansas city. It is on the Union Pacific railway and is a place of active trade. Pop. (1863) 2,404.

X

XAMILTEPEC, or **JAMILTEPEC**, a town, Mexico, state and 93 m. S W Oajaca, on the Chiapas coast. It is situated near a series of lagoons which deeply indent the coast, is of pleasing appearance, and contains about 4000 inhabitants, who trade in honey, wax, cotton and salt. In the maritime plains of the bay of which it is the capital much sugar is produced, and many cattle are reared.

XARBAI (Zay), or **JARBAI**, a town, Mexico, state and about 65 m. N Oaxaca, in a beautiful valley on the frontiers of the State of Oaxaca. It has a castle belonging to the Marquis of Jarra one of the largest proprietors in Mexico, and contains 3000 inhabitants.

XAVIEN, an island, America, off the S W coast of Chili, lat. (N E. extremity) 47° 5' 15" S; lon 74° 15' W. It lies 4 m. W of the mainland from which it is separated by Ochope Channel, is high and thickly wooded, rising into hills 1300 to 1400 ft. high, and covered with large and tall trees, and has

two good anchorages Port Xavier in the N. and Grande Bay in the S. The W coast is lined with rocks, which the sea breaks with violence.

XIENGMAI or **CHIANG-MAI**, a town, Siam, largest in the Laos States on the Menam, about 100 m. N of Bangkok. It is surrounded by walls about 8 m. in circumference, and exports teak wood to the value of \$400,000. This timber which is floated down the Salween to Moupin, is the chief source from which teak is supplied to the navy-yards of Great Britain.

XIMBA, a town, S W Africa, Kimberley country, territory Balfour, on the N. slope of the Dymke range lat. 17° 25' S; lon 18° 55' E. It belongs as a kind of appendage to the hair-apartment of Balfour, who resides in it; is surrounded by a palisade and a ditch, and contains 3000 inhabitants, who, as more especially under the jurisdiction of the prince, possess some special privileges.

YABBOUD, a village, Syria, 50 m. N N W Damascus, at the entrance of a well-known ravine. It occupies the site of the *Jabrud* of Ptolemy and exhibits in the bevelled stones of its cathedral the remains of one of the earliest Syrian churches.

YAGODINAE, a town, Turkey in Asia, Serbia, cap. circle of same name, a semi-circular basin surrounded by mountain peaks, near the Serbian frontier, 66 m. S S E Belgrade; with a market, a church and a school. Pop 5741.

YALE, a town, British Columbia, Western N America, about 90 m. up the Fraser River, on the bank. It is a gold mining station and a central place for the surrounding district. The navigation of the river is obstructed by some rapids about 6 or 8 m. below it, and immediately above it is the Little Cañon, a mountain gorge which contracts the river so much as to render the stream a torrent with immense velocity, and therefore impassable. Yale is useful chiefly for shipping and unloading materials from and to the gold fields.

YANG-CHOW, or **CHANG-CHOW-POO**, a town in China, prov. Kiangsoo, on the Imperial canal, 110 m. W N W Shanghai. It was reputed to be a place of great wealth and splendour but having been in the hands of the insurgents on three separate occasions, must have suffered severely. Little more is known of it than that it had a famous imperial library of which there were only two duplicates in existence, the one at Peking and the other at Yang-chow. This library, if not destroyed, has been completely dispersed. The pagoda of Yang-chow still forms a conspicuous object in the distance.

YANG-TZE-KIANG [a.], a river, China. This river and the ports of Chien-kiang, Kiu-kiang and Hankow situated

ENTRANCE OF LO-SAI GORGE, UPON YANG-TZE. From Hankow.

on the banks, were opened to foreign navigation by the treaty of Tientsin, ratified in 1860. Previous to that date very little was known of its upper waters beyond Hankow. In Feb

rury, 1861 a British squadron of six vessels, under Admiral Hope, ascended this great river upwards of 800 m. from its mouth, where it is a deep-flowing stream 3 m. widest. To-chow, the entrance to Tung-ting, the greatest lake in China. From this point an expedition traced its course to Ping-shan a distance of 1782 stadia, in from Shanghai. Above its confluence with Tung-ting the navigation of the river for large vessels is interrupted by rapids, which could only be ascended during high floods. Native craft, however, are taken up at all times by trackers, who ascend the stream to within a comparatively short distance of its source. The country through which the Upper Yang-tze flows is bold and mountainous, running between precipitous gorges, presenting wild and varied scenery. In its lower reaches, the banks are annually flooded to such an extent that boats sail over the level lands for hundreds and thousands of square miles, where the herbage grows when the waters retire. At Hankow the river reaches its highest flood in September, which is from 35 to 40 ft. above its lowest, in February when the tidal influence reaches as far as the entrance to Lake Po-yang, 436 m. from the sea. (Blaikston *The Yang-tze*, Macmillan & Co. 1885.)

YANGUITLAN, a town, Mexico state and 45 m. W N W Oajaca. It occupies a cool and lofty site in an ancient place, which when the Spaniards first visited it, contained 12 000 inhabitants, and has a fine Dominican monastery which was founded by one of the companions of Cortes in 1542. The surrounding district though elevated is fertile, and rears great numbers of cattle.

YANITZA, a town, Turkey in Europe, cyclad and 30 m. W N W Salonika. It stands on a height, has several mosques, and contains 6000 inhabitants. The best tobacco of Macedonia is grown in its vicinity. Near the town is the village of Allah Khusan, containing the ruins of Pella, the residence of Philip of Macedonia and the birth-place of Alexander the Great.

YAO-CHANG, a town, China, prov. Szechuen, at some distance from the Yang-tze Kiang and 171 m. S E Tsching-tse-fu. Though of considerable extent it is not surrounded by walls, or otherwise defended. Among its buildings are a principal pagoda and a great Bonze monastery. Part of this monastery is appropriated as a theatre, consisting of a vast square platform, supported by twelve granite columns, and surmounted by a richly ornamented pavilion resting on pillars of varnished wood.

YARANSK, a town, Russia, gov. Perm, cap. circle of same name, on the Yarana, with five churches, secular and religious schools for the circle and the parish, a charitable endowment, and a yearly market, which lasts from the 22 of September to the 1st of October, and at which goods to a great amount are disposed of. Pop 1330.

YARAPISSON or **ARABISSON**, a town, Turkey in Asia, Karamania 320 m. S E Constantinople on a rugged limestone height with numerous terraces. It consists of 200 houses, occupied by about 1200 inhabitants, who, in addition to the ordinary labours of agriculture, cultivate the vine, and take advantage of the high-road passing along the banks of the Helles to carry on some trade.

YARMOUTH, a seaport, in Nova Scotia, 120 m. S W Halifax, lat 48° 50' N lon 60° W. The public edifices are good and substantial especially the educational, possessing all modern improvements and capable of accommodating 3000 pupils. There are eight churches, Episcopalian, Presbyterian, Methodist, Baptist, Congregationalist, and B. Catholic. A lighthouse with a revolving light 135 ft. above the level of the sea, is on Cape Foulmer, a short distance to the west of the entrance to the harbour. The harbour is safe, and accessible to vessels drawing 18 ft. of water. It has direct steamboat and sailing packet communication with Halifax, St. John's, N B. and Boston, U. S. The shipping, which is very extensive, has increased with marked success, the 199 vessels, with a tonnage of 78,005 owned to the town of Yarmouth, being one-quarter of the entire shipping of Nova

Boffa. The people are noted for business enterprise, and at present it is considered the most thriving town in Nova Scotia.

YASSI HUK, a. Turkey in Asia, Anzolia. It stands on a height about 100 ft. above the Sakaria, which here makes a sudden bend to the W., and then widens out, forming several small islands. The district round it is more pastoral than agricultural, and rears great numbers of sheep and Angora goats.

YEDDO (Edo, or Yama [Dutch] [ed.]) In the same year (1858) that Lord Elgin and Baron Gros negotiated the treaty of Tientsin, in China, these plenipotentiaries concluded the treaty of Yedo, in Japan, which opened the ports of Nagasaki, Yokohama, and Hakodadi, with permission for ministers representing Great Britain and France to reside at Yedo. This was accomplished in 1858, and the legations were being built on a commanding site in the city so close to the populace and some of the authorities, that they were burned down by incendiaries before they were finished. At the same time the members of the British legation, leaving their abode in a native dwelling, were repeatedly attacked, and several killed and wounded, which rendered it so unsafe to live in Yedo, that the two embassies left the city and resided at Yokohama, while the allied fleet threatened to bombard Yedo unless reparation was given, and a heavy indemnity paid. These were ultimately acceded to, and in 1865 the British and French ministers returned to Yedo, and took up their residence in Japanese temples fitted for their accommodation. During these transactions it was found that the treaty of Yedo was not concluded with the hereditary monarch of Japan, the mikado, who resides at Kioto, the imperial capital, but with the shogoon or prince elected by the daimios—who form an oligarchy of nobles, subject to the mikado. This grave error was rectified by the British minister Sir Harry Parkes in 1866, who skillfully obtained the emperor's signature to the original treaty.

Yedo is the place of residence of the shogoon or tycoon and the powerful daimios or native princes are obliged to reside at his court during stated periods; hence their retinues form a considerable portion of the population—which has been estimated as under for the year 1862—

Followers of the daimios.	45,000
Imperial officials.	120,000
Priests belonging to temples.	200,000
General inhabitants.	500,000
Floating population.	300,000
Total inhabitants.	1,165,000

Yedo has a circumference of 94 m., and covers a surface of 26 sq. m. The O-kawa or Great River divides the city into two parts; the eastern part is called *Hondo*; the western part bears more especially the name of Yedo. *Hondo* has a circumference of about 9 m., with an area of 8 sq. m. It is completely surrounded by water and intersected with canals, three large and numerous small ones cutting each other at right angles, and dividing the island into eight principal districts. Of these four upper are chiefly occupied by the palaces of the daimios, with thirty temples; the two middle are exclusively palaces, with thirteen temples; and the two south districts contain twenty-one temples, whose gardens and outbuildings cover a large surface. The remainder of these districts is occupied by government stores, and the dwellings of artisans, fishermen, and workmen connected with the warehouses. *Hondo* is a very quiet part of the capital, as the residence of the Japanese aristocracy and the quay along the left bank of the O-kawa forms a long and beautiful street. It is connected with the western quarter of the city by four great wooden bridges of very simple but solid construction.

Yedo proper is divided into three parts—*Kira* 'the castle town,' 'outside the castle,' and *Mikita*, 'town and suburbs.' The castle has a circumference of nearly 5 m., with an area of 13 sq. m., and contains the palaces of the shogoon and the royal family the members of the council of state, and about twenty of the highest daimios; but not a temple, priest, or simple citizen. The space which contains the two imperial palaces is surrounded by a high wall and several canals, which the public is not allowed to pass, and almost every palace is flanked by a moat across which there is a large number of

small bridges, besides numerous public edifices. The roads round the castle are very agreeable and picturesque; and along the banks of the principal canal are to be seen thousands of aquatic birds on the water. The palaces of the daimios are long buildings of one story, high and narrow, and are washed, and having the appearance of being washed, and having out any pretensions to fine architecture. The palaces are furnished with the massive doors, which are sometimes ornamented with carvings, or covered with small plaques of copper, forming various designs, such as the weapons or coat of arms. The interior of these palaces is of great simplicity; the beauty and splendor of the mats, carvings, and paintings are the only points of distinction between them and the houses of the citizens. There is little or no furniture in them, and their principal ornament is their cleanliness.

Outside the castle, or *Koto-uro* quarter 10 m. in circumference, with an area of 8 sq. m., the greater part is occupied

by daimios' palaces, but of lesser rank. Besides the bridges which connect it with *Hondo* and the rest of Yedo, there are twenty within its own precincts, one of which is the celebrated *Kyo-ko* Bridge, or Bridge of *Kyo-ko*, which is considered the central point of the empire, and from which the geographical distances are calculated. Here are the temples, mostly Buddhist, covering about 1 sq. m. The remaining space is very densely inhabited, and some considered the most remarkable quarter of Yedo. This district is situated on the E. of the castle, and is in the form of a parallelogram. It is traversed by a canal, which is the *Yodo-ko*, or main-road of Japan, and is intersected by fifteen bridges with the rest of Yedo. The district is divided into twenty-two transverse streets, which intersect at right angles, and forming seventy-eight small squares, from one another by wooden gates, ordinarily kept open, but always guarded by a small soldier force, who at any moment can lock any given part off. There are no daimios' palaces nor any large temples in this quarter. Here the principal commerce of the city is concentrated; and it is only in this part that regular streets can be found. They are very numerous, though the total absence of wheeled vehicles makes them less bustling than the great thoroughfares of Western cities.

The *Mishi* quarter, or town and suburbs, contains the

is shown by the fact that of the \$35 698 derived by the customs as revenues in 1866 only \$2400 was paid by foreigners. Formerly about 8000 junka arrived and departed annually but no more than 1800 entered in 1866, the native shippers preferring foreign bottoms. The producing districts in the neighbourhood of 1 mi. from the town are the following: 8 E. Moriguchi from the Great Wall to Soufuri—(Consular Reports (Customs Returns)).

10, or 10 a. m. Western Africa, on the N.E. frontier of Honnō, 35 m N. by W. Kikawa. It rises from the flat on which it stands so as to form a conspicuous object at a great distance and consists of the town proper with closely packed streets and a little suburb situated on the banks of a stream running eastward with a strong current to Lake Chad. Cotton of which a very good kind is grown and wheat in small quantities are the only articles of agricultural produce. Yash abounds from the river and the lake forms the principal food of the inhabitants.

10JOA or TADUKA a lake Central America, Honduras between lat 14 40' and 15 5' N. lon 88 3' and 88 15' W. It is about 2 1/2 m long by 8 broad, and stands at the height of about 2000 ft. above the sea. Its average depth is 10 to 15 to 24 ft. Its basin is one of those to which the name of lacunas or pockets is not inappropriately given being formed by the contortions of the mountain system of the country the ranges of which frequently bend back on themselves and make inlets in which the waters of the mountain springs and torrents are collected. The mountains which thus include Yaja are Miambar on the S. and E. and Santa Barbara on the N. and W. These mountains which are an average height of about 6000 ft. above the sea, hem in the lake so completely as to leave only a narrow marshy run which itself becomes flooded during the rains. Feeding the lake the slope are too abrupt for cultivation but on the other side they descend gradually by a series of terraces towards the rivers Honnō and Santa Barbara and being well watered by springs derived apparently from the lake by a process of natural filtration are both cultivable and productive. Yaja is fed by numerous small torrents and discharges itself at its N. E. extremity by the Jacque which men in round descending are of a circle and joins the Santa Barbara.

YOKOHAMA a foreign settlement and treaty port Bay of Yedo Japan, about 17 m. by the road skirting the bay to the S.W. of the city of Yedo and adjoining the town of Kanagawa. The last-named place was the port fixed on by the treaty but it was abandoned on account of its unsuitableness for the purpose. Before that the present site of Yokohama was a small village which was removed to another spot and the ground laid out for the foreign settlement by the Japanese authorities in the form of an oblong square, about 1 1/2 m long and 1 m wide. It is completely surrounded by water across which are several bridges on the landward side with gates where native sentries are posted day and night. The dwelling-houses and warehouses of the foreign residents are chiefly built of wood, along the frontage facing the bay each proprietor having his ground walled in, the streets are three lines of houses with streets intersecting at right angles. All the buildings are of one story with the plots of ground around them laid out as gardens more or less tastefully arranged according to the ideas of the occupants. Their pretensions to architectural ornamentation vary in like manner. The warehouses are substantially built but only one of them is fire-proof, and escaped destruction during a conflagration in 1866, that nearly swept the settlement of its buildings, and destroyed property and merchandise to the value of half a million sterling. This accident has induced the residents to erect structures of stone and brick instead of wood but it is feared that these may suffer from the earthquakes which shake the volcanic district on which they stand and within view of Fuji yama, an active volcano. Beyond the third row of houses the ground is laid out in a race course where races are held by the residents during the winter and autumn, in which the Japanese take a part with native ponies. Across the canal that separates the settlement from the mainland, the To-ho-do, or great official high way of Japan, passes from N. to S. communicating with Yedo. Beyond the canal the ground rises into hills about 400 ft. high which are covered during the summer with

flowers of surpassing beauty, and the old trees in the top of the ridge. A flight of stone steps leads up to these heights, from whence a comprehensive view is seen of the bay and the surrounding country. Here stands a small temple where the devotees turn their faces towards Fuji yama, the sacred mountain, and murmur their prayers for the success of the shipping have to pass through the town of Kanagawa to reach the foreign settlement. Hence the port is sometimes called Yokohama-Kanagawa.

Since the opening of the port in 1861 trade has fluctuated on account of the unsettled relations between foreigners and the government, who threatened on several occasions to expel them from Japan. This feeling no longer exists, and commerce is placed upon a more equitable footing, still, it is subject to many restrictions, which the officials endeavor to render still more troublesome by exactions and monopolies. The chief exports are silk and tea as follows—

Report of Silk

Year	Value
1861-62	1,915 1861 62
1862-63	25 80 1862-63
1863-64	13,611 1863 64
1864-65	16,226 1864 65

Report of Tea

Year	Value
1861-62	5 20 1861 62
1862-63	5 20 1862 63
1863-64	5 20 1863 64
1864-65	5 20 1864 65

The imports are chiefly cotton manufactures and metals. The following table exhibits the value of imports and exports—

Year	Imports.	Exports.	Total.
1866	£38 911	£1 26 843	£1 27 656
1867	1 434 443	1 400 048	2 834 491
1868	3 075 643	4 000 10	7 075 743

During 1866 the number of ships entered was 116 of 76 488 tons, chiefly British and the customs duties amounted to £47 488 on imports and £61 178 on exports. The British trade constitutes 1/3 of the whole the Americans Dutch French and Prussians are the others, comprising thirty two firms half English. The foreign residents number about 310 persons, of whom 140 are British 80 Americans and 40 Dutch including the consuls of Great Britain France America, &c.—(Consular Reports Mosman M.S. Notes)

In the vicinity of Yokohama and off the To-ho-do or main road, near Kanagawa on the way to Yedo is a volcanic mountain

COLONIAL BODIES (HEAD OF BUDDHA, NEAR YOKOHAMA. From a Photograph.

Image of Buddha the most remarkable idol of the kind in Japan, which is shown in the illustration. In recent times

Kamakura was the site of an ancient city but now it is only a straggling village with the remains of numerous temples that once flourished there. Of these, the bronze image in question is the principal, and named Da Buiki, signifying Great Buddha. It is not less than 80 ft in diameter at the base and fully 100 ft in height. The limbs measure 9 inches in circumference. The proportions of the figure are admirable, and it is composed entirely of copper cast in numerous pieces, neatly joined together the image being hollow inside. A door at one end leads into the interior lighted with windows at the back and there are seen hanging up many strips of paper and small gilded images of Buddha; with boxes for the offerings of the devotees who visit the shrine. Outside, the image is surrounded by a petronage garden with fine specimens of trees and shrubs many of which are trained and shaped into curious forms. It is said to have been erected upwards of six centuries ago. At that period it was enclosed in a temple, the walls and roof of which were rent afterwards by a severe earthquake, when they were removed. Altogether the place, the scenery and the sublime repose of this image in the open air is unrivalled in the far East and it is associated with a recent tragedy when two British officers were assassinated while on a visit to the spot.—(Fortune's Plants in Japan and China, Moorman MS. Note)

YOLA (also called Western Africa, an kingdom of Adamawa or Foulah, near its W. frontier about 12 m S. from 1 bank Houma. It stands on a swampy plain near an inlet of the Benue, which when flooded inundates it, and occupies a space which in length from E to W is not less than 3 m. The residence of the prince and his brothers are large dwellings built entirely of clay, but all the other houses though they have clay walls are a protection against the rains are more rude. Each however has a large and spacious courtyard, which as it is not wanted for any other purpose is not infrequently sown with grain. The market is very indifferently supplied and there is no industry. Turkeys, beads and salt are the chief articles exposed for sale and the export trade is confined almost entirely to slaves and ivory. The pop. notwithstanding the size of the place does not ex. a. d. 12,000.

YOMARI a tn Central Africa 1 bank Niger 190 m N. W. Timbukto. It is one of the two chief places of the Foulahs, the thought consisting entirely of cool huts, is said to be nearly as populous as Timbukto. Its importance may be inferred from the amount of tribute which it pays estimated at 5000 head of cattle. During the rains Lake Doba is so much increased that its shore is close to Yomari but during the dry season there is about 1 m between them. A great many Fulbe live in the neighborhood of Yomari.

YOSEMITY a cascade, U States California, on Mari pass, formed by the river Merced in the range of the Sierra Nevada, 9 E. of Coulterville. From the surprising elevation of these romantic falls, and the wild and picturesque character of the scenery which surrounds them they are not unjustly regarded as one of the natural wonders of the American continent. To obtain a view of them the traveller has to traverse a dense forest of gigantic oaks (*Quercus gigantea*), the mammoth trees of the Americans, individual trees reaching upwards of 400 ft in height, and exceeding 100 ft in circumference. He then emerges in the fertile evergreen valley of Yosemite dwarfed by trees and thickets like the park of an English mansion and surrounded on three sides by almost perpendicular walls of rock 3000 ft high. Over one of the highest of these, at the extremity of the valley, the water Merced pours its waters sheer down an abrupt cliff 2100 ft. in height, and thence by two further leaps of 100 and 400 ft. reaches a miniature lake below, after a total descent of 900 yards. The volume of water of these Yosemite Falls is far inferior to that which makes up the cataract of Niagara, but the latter is not more than 54 yards in height so that the Californian cascade, which claims our admiration as the highest in the world need not fear comparison with the Canadian falls. From the small lake already mentioned, the Merced issues again in a narrow stream and with many a bend and curve rolls through the dark rocky mountain walls of the valley or glides through the deep shadow of the woods of oak and pine, and poplar, which clothe its banks, and afford as yet undisturbed shelter to elk, squirrels and Californian hares, to gray and spotted

partridges and golden pheasants, and to innumerable ducks and other waterfowl. It is an important affluent of the San

YOSEMITY WATERFALL, 200 ft. high.—From J. Illustration.

Joaquin, and by that river discharges its waters into the bay of San Francisco.

YREKA, a tn U States California, in the valley of Shasta River 125 m N Red Bluff. It is on the main road from Sacramento to the Willamette Valley and is surrounded by mountains. The principal resources of Yreka and the adjacent country are gold mine. Pop. (1860) 2400.

YUPA (A or FRAHAGUOY) a tn Paraguay 1 bank Parana which is here 1½ m. wide and rolls on majestically between a bordering of lofty trees. It was one of the most famous of the Jesuit settlements but having been abandoned and disappiated by a duplicit and avaricious government, now consists of only a few ruined houses and the remains of a church which, when the Jesuits were in their glory was one of the most beautiful and gorgeous buildings in the country.

YU-YA HWA a tn China near the N. frontier of Chekiang on the borders of the great silk country. It stands on the banks of a canal leading E. towards Ningpo, on the N. side of Hang chun Bay, and is an important place with about 100 000 inhabitants who are largely engaged in silk trade. A few isolated hills in the vicinity form the N. boundary of an immense alluvial plain stretching to the N and E and are apparently a schistose formation of disintegrated granite combined with porphyry.

YUNG a river China, prov Chekiang. Opposite to its mouth in the Parado, in lat. 29° 57' N lon 121° 43' E are three islets called the Yaw Islands or Triangles which form three separate entrances. On the W side, immediately within the entrance, is the support of Chun has where the width of the channel is about 400 yards. This width with depths varying from 5 to 2 fathoms it retains for 1½ m up to Ningpo. Here it separates into two branches the Tayao or Tye-ke coming from the N.W. and the Fungwa from the S. by W. The Fungwa, barely 200 yards wide is crossed by a bridge of boats about ½ m above the fork. The Tayao, from the sharpness of the turn, the crowded state of the

river and the setting of the flood tide towards the Fungwa is very difficult to make. In December 1841 three British war steamers proceeded up this branch to clear it of fire-junks. The British consulate is situated on its bank opposite to Nhangpo.

YU LU a to S W Africa. Kumbunda country territory. Anbambu, between the Mujini, an affluent of the Longa, and the Kupo 160 m. N N E. It crowns the very summit of the Hama range and contains 2000 inhabitants.

YU YAOI a to, China, prov. Chekiang on the N

branch of the river and about 10 m. above the town of Ningpo. It consists of two portions, the other separate tributary, one on the S and the other on the N side of the river. The town on the S side appears to be very ancient, and is in ruins—the walls broken down and covered with well-grown bamboo wood. The town on the N side is comparatively new and apparently flourishing. Within its walls is a small island 800 ft. high crowned by a temple dedicated to a minister of state who flourished in the Ming dynasty. There is nothing else remarkable about the place.

Z

ZAREMA or ZAMA a prov. of the Hausa States. Western Africa, is bounded towards the S W by the Niger towards the S. by prov. Daudina and Dast Tanika, and to the S E. by prov. Moura. The N and S W boundaries cannot in our present state of knowledge be properly defined. It is inhabited by a race of Songhay and Twarek apparently of a degraded and mixed character. With the exception of one or two open places the country scarcely appears to have any centres of a settled population: the most interesting portions of it is the broad valley rich in cotton, by which it is intersected. This valley is said to be girt by fine tamarind trees. The prov. has rich pasture grounds, which induce many of the Fellahs to visit it annually for some months.

ZALALIAN a to Mexico, dep. and 50 m. S W. Mexico is a mountainous district 6000 ft. above the sea. It consists of well built stone houses ranged in regular streets and a public square adorned with a handsome church and a commanding splendid view which embraces on the left the N. side of Toluca, in the centre the twin volcanoes of Iztaccihuatl and Popocatepetl and on the right the snow-capped peaks of the Orizaba. There are many alluvial plains in the vicinity of Zocalan.

ZADWEB/177 a to Austrian empire. Mirava circle and about 70 m. N. Hradec with 1000 inhabitants who are all Protestants and have a Reformed parish church.

ZAGHOLAN or ZAGWAN a large village of Tunes at the extremity of the mountain chain which separates the districts of Tunis and Baza. It is the site of Zuchra a Roman town about eight hours' march from Tunis and twelve from Baza. The houses are built in the form of an amphitheatre on the slope of a hill at the foot of the elevated peaks of the Jebel Zagholan and between the blocks of buildings narrow streets lead down in a serpentine path to the valley beneath which presents the vegetation of Europe in all its luxuriance allied with the flora of the desert. The population only a few hundreds in number is largely composed of Jews.

ZAHLEHAN a river Palestine, which issues from several perennial fountains in a great gorge on the W. slope of Lebanon runs S W along the W. base of Jebel Liban and suddenly breaking through a low ridge which forms its W. bank runs off W. to the Mediterranean.

ZAIYAR, a to Austrian empire, Hungary on Zala, 24 m. S E Zala Eisenberg between the river Zala and the marshes at the N. W. extremity of Lake Platten or Balaton. It has two remarkable ruins the one of the old castle of Zala, from which the county takes its name, and the other of a famous abbey which has now its seat in Asper. Pop. 1000.

ZAIYANCE a to Austrian empire, Galicia, circle and 23 m. E Zloczow cap dist. of same name. It is traversed by the Mereth which divides it into an old and a new town. It has an institution for the Sisters of Mercy an infirmary and an asylum for orphan girls. Pop. 4820.

ZALOZNICA a to Austrian empire, Military Frontier, Croatia, dist. Otočac with 980 inhabitants. The Turks were defeated here in 1683 by Peter Zrinski. There is a famous cavern in the vicinity.

ZAMBALAN a to, Philippine Isles, the most westerly part of the island of Luzon lies between the Gulf

of Laganvan on the N and the Bay of Suban on the S and consists of a long and narrow maritime strip of land stretching along the foot of a mountain range of same name. It is about 100 m. long by 20 m. broad and contains an area of 1200 sq. m. The mountains themselves are too steep and rugged to admit of cultivation but the land between them and the sea, forming the main part of the province is fertile and well watered suited to the growth of rice and sugar cane and even producing wheat on the higher slopes. The capital Iba or Yba situated near the mouth of a river navigable only for small craft, is at lat. 10° 42' N. lon. 118° 01' P. The inhabitants speak a peculiar dialect, but in their manners and social state resemble the other civilized nations of Luzon. It is said that the Spaniards, when they first arrived found them in possession of a written language and some poetical compositions. Pop. 95,000.

ZAMBESI (add.) a river South Africa. The Zambezi pours its waters into the Mozambique Channel between lat. 14° and 15° S. by four mouths namely the Milambe which is the most westerly the Kongoma, the Luabo and the Tlimbe or Manolo. The immense amount of silt brought down by the river has formed a belt of promotion with bars which acting against the waters of the delta have led to their exit sideways. The Kongoma, which is the best entrance, is one of these lateral branches and its bar has nearly 2 fathoms at low water, and the rise at spring tides is 12 to 14 ft. Proceeding up the Kongoma which has a straight and deep channel for 20 m. and is lined with mangrove jungle, after 25 m. the broad Zambezi is reached. The mangroves are soon left behind, and vast level plains of dark rich soil, covered with gigantic grasses, and scattered with huts stand on piles a few feet above the ground and are surrounded with excellent gardens. Rice is largely cultivated and sweet potatoes, pumpkins, tomatoes, cabbage, onions, peas, a little cotton, and sugar-cane are also raised. The whole of the fertile region from the Kongoma canal to beyond Mazara an extent of 90 m. in length and 50 m. in breadth is admirably adapted for the growth of sugar cane. The deep channel of the Zambezi is winding, and the bottom of the river appears to be a succession of immense submerged sandbanks having, when the stream is low from 1 ft. to 4 ft. of water on them. The main channel runs for some distance between the sandbank and the river's bank with a depth in the dry season varying from 5 to 15 ft. and a current of nearly 2 knots an hour. The channel then splits and flows in a diagonal direction across the river, shifting constantly from bank to bank. In these crossings the beach is shelving. Approaching Mazara the scenery improves, and the wooded Shimpanga ridge is seen stretching to the left, and its front blue hills rise dimly in the distance. To Mazara all the merchandise of Sena and Tete is brought, and thence carried six miles across the country to be re-shipped on a small stream that flows into the Kwana or Quilimane River which is entirely distinct from the Zambezi, but a narrow natural canal, the Mutu allows canoes to pass from the Zambezi to the Quilimane River ascendingly during the highest flood. The Landana or Zama held the right bank of the Zambezi and annually receive a considerable tribute from

Inhabitants live on a good supply of fisheries water is considered one of the symptoms of prosperity. The fish are taken before their spawning season. They haul, trawls used to obtain small fish. The town from muddy walls, the drinking of which produces diarrhoea and other diseases. By this means the climate gets a bad name, while later researchers have shown to be undeserved. The population is of a very mixed character. The Arab landowners form the basis and at the same time a kind of aristocracy being proprietors of large plantations and numerous slaves which they constitute the great bulk of the labour force. There are also a few Europeans, the Central Malays and of the W coast of Madagascar, and a considerable number of the natives from the coast of Madagascar in Arabia. About 6000 to 9000 Indians are permanent residents and their numbers increase yearly. During the N E monsoon the population is temporarily increased several thousands by the arrival of traders and the total population of the island may be taken at about 2-3 million of whom 60,000 belong to the town.—The lower end of the peninsula on the W coast of the island is called Lamakia, towards it the country becomes more level and badly made streets which never hang down steeply except by road runs, are usually in a very filthy state. The only public buildings are the mosques, plain but substantial.

edifices erected in the same line as the houses one of them has a minaret which serves as a landmark to entering vessels. The houses are large, and well filled with articles of foreign manufacture. Nearly all the shopkeepers and workmen are natives of India. The palace of the sultan and the houses of the wealthier Arabs and foreigners lie close to the sea, opposite the harbour and are generally flat-roofed, and have a court in the centre. The streets here are better laid out

ZAPOTIAN (El Zapotero) in Mexico, state Jalisco, 80 m S by W Guadalupe, near the centre of the territory of Colima. It is a place of considerable importance, with a pop of 12,800.

ZARFY or **THARFY** in Russia, about 180 m N W Astrakhan, on the Volga. It occupies the site of what was once the capital of the Golden Horde, and contains many of its ruins.

ZARZIS [add] a small seaport, in Africa, Tripoli near the S.E. entrance of the Gulf of Gabes. It consists of several villages, each with its own flat grove, and with houses in solid mud-brick and neatly whitewashed. In the vicinity are some Roman ruins, especially a column of very great length. Near the same place Lake Bahari communicates with the sea by a narrow channel. Some suppose that this lake, which is now of the nature of a deep gulf, occupies the site of the land, and that according to a native tradition that it was covered with towns and rich corn-fields, which owing to a subsidence of the ground were an island swallowed up. The Bedouins of the neighbourhood belong to the tribe of the Akara.

THE PORT OF ZANIBAR, showing the Port and Customs-house. From Le Tour du Monde.

better kept and are provided with a foot-path of cloison. The harbor is the most interesting point as the fort erected by the Portuguese and now partly used as a prison and the custom house near it on the shore, the latter being one of the busiest of the place. The town being exposed to the sea breeze and supplied with good water is healthy but even a single night spent in the interior by Europeans is often followed by the most serious consequences.

The harbour is very convenient, and secure at all seasons of the year, being protected on the W. and N. side by four islands which are united with each other by coral reefs upon which the surf breaks so that the water in the harbour is always quiet. It is protected from the S. wind by the tongue of land upon which the town is situated. Vessels anchor a few yards from the shore in 7 to 9 fathoms and may be laid to repair without danger upon the sandy shore. N. from the town is an extensive bay in which vessels of 300 to 400 tons may be overhauled with safety. Zanibar is now the chief market for the supply of ivory gum-resin, and cloves and it exports likewise a considerable and increasing quantity of sea cow bow-lar and pepper coco-nuts, cocon and oil. The total value of the exports amounts to about £200,000 yearly. The imports consist of large quantities of gray and coloured cottons, Indian coloured cottons, Muscat silk, cotton, sugar, and turbanes. Venetian pearls, brass wire, muskets, jump wire, rice, wheat, jewelry and glass of the total value of about a million sterling. The population of the town is about 60,000 largely increased as already stated, by the arrival of traders during the Y. moon.

ZAYIA (Zayia) a vil N Africa, Habara, oasis of Fezzan, about lat. 20° 20' N. lon. 12° 20' W. It is a place of pleasant appearance, protected by a wall about 6 ft. high, and a small castle situated near the centre of the place. In this castle the inhabitants deposit their valuables and retire in the event of an assault by the Berbers, they repair for safety. Adjoining the castle is the market of Zayia, which is held in the highest veneration in Fezzan, and throughout the whole of the Sahara. In the autumn of every year it is visited by great numbers of pilgrims. The position of the village on a principal caravan route between the great markets of Timbuktu of the N. and Tadmek of the S. and the abundance and excellence of its date, make it one of the most frequented localities in the W. of the Sahara. — *Dumas*

empire Galicia, circle Wladawa, 20 m W W. Zaborow near the confluence of the Rawa with the Vistula. It has a beautiful Gothic parish church, and an ancient castle, still habitable, finely seated on a steep height. Zabor was once the capital of a Polish duchy which passed to the Poles in 1457. Pop. 2000.

ZABWA a in Austrian empire, Galicia circle Wladawa, 40 m S W (racow with iron-works, and 1775 inhabitants. In the vicinity Mount Belus Odra, on the frontiers of Hungary rises to the height of 6660 ft. above the sea.

ZABWA or **ZERZEN** [add], a small seaport, on the E. coast of Africa, 1-10 m S W Aden. Born from the sea, its whitewashed houses and minarets peering above a long low line of brown wall flanked with round towers, has a pleasing appearance. This is not confirmed by actual inspection. Its site is a low and level spit of sand, which high-tide makes almost an island. Its streets are merely dusty roads, and its dwellings, with the exception of a dozen large whitewashed stone houses, consist of 200 Arab or thatched huts each surrounded by a fence of wattle and matting. The walls built of coralline rubble and mud, and pierced with five-gate arches in places dilapidated and have neither gates nor windows for them. The public buildings include six mosques, none of them deserving particular notice. Zayia, though exposed and exposed and it cannot be said to have a harbour as vessels of 2-3 tons cannot approach within a mile of the landing place, is from its position the northern port of Aden in Aden of Harar, and of S. Abyssinia. It sends caravans northwards to the Danakil, and south-eastwards to the Red Sea and Gurgine. Its exports, which are valued at £100,000, consist of slaves, ivory, hides, honey, antelope horns, and other goods, and are collected in the far north by Arab caravans. The inhabitants, exclusive of a large floating population, amount to 1500. — *(Burton's First Footsteps in E. Africa)*

ZBOROW a in Austrian empire Hungary, co. Sora, on the S. slope of the Carpathians, on the frontiers of Galicia 28 m N E Epurina, has two castellated mansions, a distillery a brewery and a trade in corn linen hides, and honey and contains 2000 inhabitants.

ZBOROW a in Austrian empire, Galicia, circle and 10 m N E Zaborow, cap. dist. of same name. It had once a strong castle and is memorable for a victory gained by the Poles over the Cosacks and Tatars in 1649. Pop. 1000.

ZDAUNEK, a tn. Austrian empire Moravia, circle and 8 m. N W Hradec in a valley between lofty heights, with a factory chain, mill and 1100 inhabitants.

ZEBRAK, a tn. Austrian empire Bohemia, circle and 16 m. S W Prague on the railway from Prague to Pilsen, with a factory chain, a town house, a town-hospital and a school mill. The ruined castle of Zebrak near King's Mineral often referred is situated a little N of the town. Pop 1800

ZEIDLICH, a tn. Austrian empire, Bohemia, circle and 10 m. N W Tezmeritz on a stream of same name with 500 inhabitants. They are mostly employed in the manufacture of linen houses, umbrellas.

ZELI, a tn. Austrian empire, Hungary on and about 2 m. S W Szeged with paper-mill and 1200 inhabitants. Hungarians and Jews. On a vine clad hill in the vicinity there is a chalybeate spring with a bathing establishment.

ZELL, a tn. Austrian empire, Upper Austria, circle of Linz on the Pram an affluent of the Elbe 30 m W Linz, has a handsome church with a large organ a castle with beautiful frescoes and several industrial establishments.

ZELL (BATTLE), a tn. Austrian empire, Lower Austria, circle Upper Wenenwald with manufactures of iron wire, iron mills, and a large trade in woodland charcoal. Pop 340

ZEMERZYCE, a tn. Austrian empire Galicia, circle Wadowice, on bank Skawa, about 44 m S W Cracow with a remarkable parish church, and 1800 inhabitants.

ZEMPINOGORSK, a tn. Russian W Siberia, gov and 150 m S W Tomsk on the Obia a tributary of the Irtysh. It stands on very high ground overlooking a vast steppe to the W, and exposed to the hurricanes which blow frequently from that quarter. It contains a church, several large buildings connected with the administration of the mines, and smelting furnaces. The last, situated in the valley below, are employed in smelting the ore of a mine which is said to be the richest in silver within the Russian empire.

ZENONI DI MORZO, a tn. Italy Venetia prov and 1 m. S S W Verona, with a parish church and handsome villas is memorable for the league which was here formed on 4 March, 1826, by sixteen towns of Lombardy against Frederick the Great.

ZERKMAN, a tn. Italy Venetia prov and 15 m S W Belluno with a parish church, a convent of Minorites, and 1100 inhabitants.

ZERNST, a tn. Austrian empire Transylvania circle and about 8 m. W B W Kronstadt with a cotton mill and a saw house and 2519 inhabitants many of whom are carriers. The Galat Austrian and Sassenburg forces were here signally defeated in 1690 by Toköly and the Turks.

ZEZA, a river, Manchuria, which though the feet is not well defined appears to run in a branch of the Yabuki Mountains, flows easterly to the Amoor about 60° N. Russia has recently founded the town of Blagoveshchensk in the path of zeza, and has declared it to be the seat of government. Near the sources of the Zeza the finest sables are obtained.

ZHIBO, or HIBU, a tn. W Africa cap dist of same name, prov Kororob, near 1 bank Benue, 230 m above its confluence with the Niger. It stands about 1 m. from the river on rising ground, which gives it a commanding view. It is surrounded by strong palisading, and entered by gates and open spaces. The houses are arranged with some regularity in streets or lanes, which are kept very clean. The inhabitants about 4000, almost mostly Mohammedans are said to dispense with agriculture, and perform their devotions in the open air. Maize and corn are extensively cultivated in the neighbourhood.

ZIBALCHE, a tn. N America, Yucatan 40 m N E Campeche with 1400 inhabitants, of whom 9000 are Indians.

ZIERAWITZ, a tn. Austrian empire Moravia, circle and 12 m S W Hradec, with a castle, a mine of lignite and 1000 inhabitants.

ZIMAPAN, a tn. Mexico state and 92 m N W Mexico, at the height of 5400 ft. above the sea. It was a flourishing place before the expulsion of the Spaniards having

numerous mines both of gold and silver which were extensively worked. It has since fallen into decay though mining is still the chief employment of the inhabitants.

ZINKENDORF (GONAV), a tn. Austrian empire, Hungary on and 4 m. S E Odensburg near the S shore of Lake Neusiedl with a fine castle with gardens an hospital, many factories of beet root sugar a machine factory and a silk mill. Pop 1000

ZIRL, a tn. Austrian empire, Tyrol circle and 6 m. W Innsbruck, on the Inn. It stands at the foot of a precipitous known by the name of Marbus Dyke, from the wonderful escape of the Emperor Maximilian I. and has in the vicinity the ruins of the once extensive castle of Frangenberg and a church to which numerous pilgrimages are made. Pop. 1700

ZIS, or ZYA, a river N Africa, Morocco which rises on the S slope of the Great Atlas flows N in S. W. and makes a remarkable bend nearly in the form of a horse and, thereafter resuming its S direction is lost in the sands of the Sahara. Its whole course is about 240 m.

ZITACUARO, a tn. Mexico state Michoacan about 30 m W Morelia. It stands at the height of 6000 ft. above sea-level and was a flourishing mining town before the expulsion of the Spaniards. It has since fallen into decay and contains only 2900 inhabitants.

ZLAIAULST or **ZLATOU**, a tn. Russia gov term on the banks of the Ai in a very narrow part of the valley nestled between mountains one of which, the Luga, rises far above it. It ranks as the Birmingham and Sheffield of the Ural. Among its public buildings is a museum erected by the emperor Alexander I. containing a fine collection of arms, cuirasses and similar curiosities, with specimens of every variety of sword or other arm manufactured at the works, a library and a well-arranged collection of minerals. The works themselves include blast-furnaces, forging mills, and every requisite for converting iron into steel and an enormous fire-proof building of three stories, where sabres, swords, daggers, and helmets are forged and finished. The art of damascening having been discovered anew by Colonel Anosoff who had long the management of the works, the etching and ornamenting on some of the swords are most excellently finished.

ZOGIRMA, a tn. Western Africa, Hausa State prov Kabbu and near the edge of the shallow swampy valley which intersects it. 15 m. S W Sokoto. It has a clay wall in good repair and is under a governor whose residence makes some approach in its style of architecture to the British, though its fine and well ornamented clay walls are only loosely held together by a framework of boards and branches. The inhabitants from 7000 to 8000 suffer much from the troubled state of the country.

ZOLYNIA, a tn. Austrian empire, Galicia, circle and 12 m N W Bessow, contains 4700 inhabitants, chiefly employed in weaving cloth and making soap.

ZOMBA, a mountain N W Africa between Lake Bidwa and the Shira lat 12° 8' S long 35° 15' E. It is 20 m long and from 7000 to 8000 ft. high and has a beautiful stream flowing through a verdant valley on its summit and running down into Lake Bidwa. The highlands are wooded and many fine trees grow on the various water courses, and there is abundance of grass suitable for cattle pasture. The western side is the most imposing with the plateau about 3000 ft. high stretching away to the S. The climate is healthy.

ZOMBOR (Zad.), a tn. Austrian empire Banat cap circle of same name, near the Francis canal 100 m W Temesvar. It consists of the tn. proper and four suburbs, and has had some county buildings, a fine town house, a new united Greek preparatory institute an under school a public library, a town hospital, some culture of silk and an important trade in corn, cattle and articles of manufacture. Pop 22 436

ZOOD, a tn. Austrian empire Transylvania circle and 12 m S Barmansdorf with extensive manufactures of alcohol and powder wool and walk mills. Pop 1850

ZOGA, a river S. Africa, which being properly only a prolongation of the Tamasake, commences at the point where it communicates with an arm of Lake Ngami, flows first E. and then S. S. E. for about 300 m., and discharges itself into Lake Kunene. As it approaches the lake, which is only 12 m long and 4 m broad, the volume of water in

the river is very small, whereas at its commencement it forms a considerable stream at once broad and deep. Sometimes, when the rains have been more than usually abundant, a little water flows beyond Kamadan into a dry rocky bed composed outward. The banks of the Zonga, perpendicular on the one side and sloping and grassy on the other are lined with magnificent trees, and are very beautiful. The sloping bank is selected by the Bayeye a native tribe, for the pit falls in which they entrap the animals that come to drink. The Zonga swarms with alligators.

ZERKZ a tn. Austrian empire, Hungary co. Borsod about 10 m. S. Miskolcs with 1100 inhabitants who belong mostly to the Reformed church, and have extensive vineyards and shade and forest no quatrains.

ZIMBO a tn. Africa situated near the confluence of the Loagwa with the Zambezi lat. 15° 37' 2" S. lon. 20° 32' E. It was at one time possessed, and seems still to be claimed by the Portuguese who, attracted by its advantageous site, made it the seat of an important trade. With this view they formed commercial establishments and built a number of large stone houses facing the river and yet high enough up the banks of the range of Manazao to command a pleasant view. Besides these there was a church seated at a central point and a fort on the opposite or E. bank of the stream. To complete these establishments a number of fine gardens lined the banks of both rivers. Zumbo the town thus founded had water communications: 1. by three different channels—by the Loagwa to the N. W. by the Kafue to the W. and by the Zambezi to the S. E. London however situated to the N. seems to have been the chief point of attraction as it furnished what were then the great Portuguese staples—ivory and slaves. Unfortunately the detail now given is only a record of the past. The Portuguese establishments have been withdrawn and the buildings exist only as ruins. Natives in sufficient numbers to form a new village cling to the place and the which sometimes spoken of as Portuguese subjects, are ruled by the chief or Mburau. The site of the village is one of the most picturesque in the country. The chapel near which lies a broken church bell commands a glorious view of the two noble rivers the green fields the undulating forest the pleasant hills and magnificent mountains in the distance. It is an utter ruin now. The whole place is overgrown with rank weeds and bushes.

ZUMIANGO a tn. Mexico state and N. W. Mexico on the N. W. shore of the Lake of Zumpango. It contains 4000 inhabitants who raise large quantities of maize and other produce.

ZUNGOMERO a dist. E. Africa, bounded by Duthum on the E. and bordering on the province of Lagawa on the W. about lat. 30° 15' lon. 37° 20' E. It lies at the head of the great valley through which the Mgeta and the Kungur rivers and consists of a plain open towards the E. or the line of drainage, but inclined in all other directions having the

peaks of Duthum on the E. the hills and other spurs of the Lagawa chain on the W. and detached cones, steep, rocky and densely wooded to the S. During to excessive heat and moisture, and the malaria produced by damp vegetation the climate is usually so oppressive that it is almost impossible to leave the house when from any cause a day is to be spent in the district makes a prolonged stay a great misfortune. Notwithstanding this serious drawback Zungomero is the great rendezvous, or centre of traffic in the eastern as Unyanyembe and Ujiji are in the middle and western regions of Africa. Lying on the main route from the E. coast it must be traversed by up and down caravans and hence, during the travelling season thousands of men and large herds pass through it every week. To the caravans the main attraction of Zungomero is the cheapness of provisions. The caravans which many find equally strong in the abundance and cheapness of an intoxicating liquor made from the grain of the holcus and called *pombe* and the quantities of *baobab* and *Acacia Senegalensis* growing wild and of course sold at a low price for the gathering.

ZUNGOMERO [old] an important vil. E. Africa, in the country of Lagawa, in lat. 7° 28' S. lon. 31° 58' E. The neighbouring country is exceedingly fertile, supply rewarding the exertions of its cultivators but agricultural pursuits are now almost wholly neglected, the population having been so diminished by the baneful operation of the slave trade. The plateau on which the grass huts of Zungomero cluster is watered by the Mgeta, and surrounded by a simple theatre of rolling hills.

ZUNGWE a river Central Africa flanking country a tributary of the Zambezi which it enters from the W. on its E. bank in lat. 17° 17' S. lon. 27° 34' E. According to from its mouth in the dry season Dr. Livingstone found no water in its sandy channel for the first 8 or 10 m. Willows were growing upon the banks, and water soon began to appear in the hollows and a few miles further up it was a fine flowing stream. Shale and coal crop out in its banks, as in many other parts of the country and the large roots of *algernia* and allied plants are found. The river takes its rise in the highlands of the Katoko country.

ZUPANJE a tn. Austrian empire, Brood Military Frontier on the borders of Turkey about 35 m. S. Eger and on the Save. It has two R. Catholic churches and a considerable trade and contains 2280 inhabitants.

ZURAWICK a tn. Austrian empire, Galicia circle and 4 m. N. Przemyśl with a model farm. In the vicinity the earthen entrenchments thrown up during the Swedish war still remain. Pop. 1100.

ZURAWNO a tn. Austrian empire, Galicia circle and 20 m. E. Biry at the confluence of the Bwila with the Dunajec. Here, in 1676, the Polish King John Sobieski held his ground magnanimously against the Turks, and compelled them to grant an honourable peace.
